Na and K trace amounts detection in Al based solid rocket propellants by neutron activation analysis, using gamma ray spectroscopy for nondestructive analysis
02 p0270 A72-11959
- Lunar rock 12013 sawdust and fragment composition from neutron activation analysis, comparing to Java tektite J2
05 p0722 A72-17127
- Apollo 6 photogrammetric, photometric and neutron activation analysis of smoke plume, determining eddy diffusivity
06 p0819 A72-18439
- Bulk and rare earth abundances in Luna 16 soil levels A and D by sequential instrumental neutron activation analysis
09 p1381 A72-22275
- Neutron activation data for Ru, Os, Ir, Pt and Pu in iron meteorites, noting correlation
14 p2157 A72-30582
- Boron concentrations in Mo-Hf alloy samples from neutron activation analysis, measuring Li 8 beta radiation with plastic scintillation detector
16 p2391 A72-33238
- Platinum and gold in chondritic meteorites.
17 p2610 A72-35149
- Gas retention chronology of Petersburg and other meteorites.
18 p2723 A72-36062

Instrumental neutron activation analysis of igneous rock abundances in petrogenic and stratigraphic problems, applying to Colombia River basalts and Apollo 11 rock samples
20 p2899 A72-39829

Multielement neutron activation analysis of geological and lunar material using chemical group separations and high resolution gamma spectrometry.
20 p2899 A72-39830

Neutron activation and neutron-capture gamma ray analyses of igneous rock trace elements, discussing Tyrone Igneous Series granites
20 p2899 A72-39831

Neutron activation techniques for nondestructive analysis of meteorites and lunar rocks, noting types of nuclear reactions for geochemical application
20 p2899 A72-39832

Neutron activation and mass spectrometry methods for geochemical analysis of rare earth elements in meteoritic, lunar and terrestrial materials
20 p2899 A72-39835

On the determination of trace elements in meteoritic phases by neutron activation analysis.
20 p2900 A72-39838

Elemental abundance trends in the australite strewn field by non-destructive neutron activation.
20 p2900 A72-39839

Coincidence counting applied to the activation analysis of meteorites and rocks.
20 p2900 A72-39841

Neutron activation analysis of tin in geochemical and cosmochemical material, using 40 minute Sn-123.
20 p2900 A72-39843

Instrumental neutron-activation determination of cobalt and certain other elements in plant materials
22 p3183 A72-42471

Instrumental neutron-activation analysis of the trolite of the Sikhote-Alin meteorite
22 p3225 A72-42472

Simultaneous neutron-activation analyses of scandium, cobalt, iron, and zinc in biological objects with the aid of a total-absorption gamma spectrometer
23 p3259 A72-43347

NEUTRON BEAMS

Depth-dose experiments with monodirectional 14 MeV neutrons in low scatter environment, describing test facility
02 p0162 A72-12068

Neutron radiography visual examination method, using uniform intensity neutron beam from nuclear reactor source
06 p0816 A72-17998

NEUTRON COUNTERS

NT NEUTRON SPECTROMETERS

Scintillation counter to determine neutrons number and distribution in time in pulses generated in hot plasma
02 p0263 A72-11419

Neutron albedo flux recording instrument with composite scintillation crystal and photomultiplier scanning to monitor near space
02 p0273 A72-11934

Solar neutrons search near solar maximum with plastic scintillator counter, discussing irregular excess in counting rate
05 p0719 A72-16524

Space anisotropy responsible for solar semidirectional variation of cosmic ray intensity studied with data from worldwide network of neutron monitor stations
09 p1377 A72-22929

Solar proton event classification system with index of three digits representing proton flux, absorption and sea level neutron monitor response measurements
11 p1714 A72-26425

Neutron albedo flux recording instrument with composite scintillation crystal and photomultiplier scanning to monitor near space
13 p2030 A72-29246

Molnira 1 satellite slow neutron monitor with photomultiplier scanned scintillator, noting limiting effect of geomagnetic perturbations
14 p2105 A72-30628

Two new methods to increase the contrast of track-etch neutron radiographs.
19 p2833 A72-37636

Change in the eleven-year modulation at the time of the June 8, 1969, Forbush decrease.
22 p3172 A72-42424

NEUTRON CROSS SECTIONS

Temperature dependence of scattering cross sections for cold and hot neutrons colliding with oxygen and deuterium molecules
08 p1211 A72-21872

NASA-Lewis experiences with multigroup cross sections and shielding calculations.
19 p2833 A72-37633

An integral test of the inelastic cross sections of Pb and Mo using measured neutron spectra.
19 p2837 A72-37634

Anomalous high concentration of lunar rock Xe-131 relation to Ba-130 nonthermal neutron-capture cross section in resonance energy region
20 p2967 A72-39180

NEUTRON DECAY

X ray observation inconsistency with matter creation in steady state universe due to inner bremsstrahlung from neutron decay
11 p1713 A72-26125

NEUTRON DETECTORS

U NEUTRON COUNTERS

NEUTRON DIFFRACTION

Niobium nitride neutronographic structural study with diffractometer after foil nitriding and rapid cooling
07 p1023 A72-20670

Neutron diffraction study of inorganic materials atomic structure, examining symmetry properties and group arrangements of hydrogen compounds
09 p1358 A72-23478

NEUTRON DISTRIBUTION

Scintillation counter to determine neutrons number and distribution in time in pulses generated in hot plasma
02 p0263 A72-11419

Cosmic ray neutrons angular distribution and energy spectrum at 3200 m altitude, using ionization calorimeter and proportional counters
02 p0275 A72-12828

Earth albedo neutrons energy and angular distributions, suggesting neutron source of inner radiation belt trapped protons
11 p1712 A72-25880

Characteristics of cosmic ray diurnal variation from Deep River neutron and meson data and temperature effects.
17 p2601 A72-35400

Gd and Sm isotope composition in Apollo 15 soils and drill stem samples, discussing lunar sedimentary processes dating from neutron capture dependence on depth
18 p2729 A72-36974

NEUTRON EMISSION

Stilbene scintillator detector for gamma ray spectrometry in energy range 0.5-5 MeV, separating gamma rays from neutrons by pulse shape discrimination technique
03 p0408 A72-13031

Gamma ray and neutron emissions from sun, considering acceleration of charged particles in solar atmosphere
04 p0566 A72-14724

X ray spectrum and D-D neutrons emission from high temperature plasma produced by two pulsed Nd-glass laser systems
07 p1041 A72-19394

Negative reabsorption coefficient for induced emission of neutron moving in medium in magnetic field
09 p1364 A72-23357

Short laser pulses for plasma heating, considering turbulent heating mechanisms, neutron yield and electromagnetic radiation
09 p1364 A72-23444

NEUTRON FLUX

U FLUX [RATE]

NEUTRON FLUX DENSITY

Cosmic ray neutron leakage flux and energy spectrum measurements in 0.01-10 MeV range by OGO 6 satellite-borne neutron detector
01 p0119 A72-10877

Epithermal neutrons energy spectra in atmospheric equilibrium layers at 57 geomagnetic N, noting agreement with experimental error limits
02 p0273 A72-11918

Neutron cosmic ray spectrograph method of separating recorded data by energies, using statistical analysis of data combinations with different dead times
02 p0229 A72-11936

Altitude effects on high energy neutrons and galactic gamma rays flux and spectrum variations from balloon flight studies
06 p0873 A72-17639

Diurnal, sporadic and yearly variations in cosmic ray flux based on neutron component data, noting relation to solar activity cycles
07 p1066 A72-20647

Epithermal neutron differential flux spectrum in equilibrium layers of atmosphere at 57 degrees north
07 p1066 A72-20652

Atmospheric pressure, temperature, humidity and 200-mb level changes effects on cosmic ray neutron component intensity, using multifactorial regression analysis
08 p1225 A72-20702

Solar cosmic ray energy spectrum from calculation of secondary emission neutron component generation multiplicities
08 p1225 A72-20723

Gd and Sm isotopic composition measurement in Luna 16 soil with largest low energy neutron fluence
09 p1380 A72-22265

Boltzmann neutron transport equation solution for homogeneous slabs and spheres, noting dominant critical eigenfunction existence and total flux boundedness, continuity and positivity
09 p1358 A72-23072

- Neutron flux and energy spectra from crossed field acceleration model of plasma focus and z-pinch discharges
11 p1693 A72-25565
- Earth albedo neutrons energy and angular distributions, suggesting neutron source of inner radiation belt trapped protons
11 p1712 A72-25880
- Epithermal neutrons energy spectra in atmospheric equilibrium layers at 57 geomagnetic N, noting agreement with experimental error limits
13 p2030 A72-29230
- Neutron cosmic ray spectrograph method of separating recorded data by energies, using statistical analysis of data combinations with different dead times
13 p1957 A72-29248
- Diurnal cosmic ray neutron variation dependence on interplanetary magnetic field based on neutron monitor data
16 p2449 A72-33940
- Solar cosmic ray anisotropy 27-day variations during IGY from global network stations neutron component data
18 p2722 A72-36876
- Atmospheric pressure, temperature, humidity and 200-mb level changes effects on cosmic ray neutron component intensity, using multifactorial regression analysis
19 p2852 A72-38330
- Solar cosmic ray energy spectrum from calculation of secondary emission neutron component production multiplicities
19 p2852 A72-38351
- Balloon-borne telescope search for solar neutrons and gamma rays during enhanced solar activity periods
21 p3101 A72-41298
- NEUTRON IRRADIATION**
- Reactor source neutron radiography for nondestructive testing, noting hydrogen detection, boron fiber imaging and photographic or electronic color enhancement
01 p0069 A72-10807
- High peak power LSA epitaxial GaAs diode relaxation oscillator breakdown under neutron irradiation
01 p0044 A72-11309
- Excess Xe 131 in lunar Ba feldspar rocks, discussing results of reactor irradiation experiments with fast and epithermal neutrons
03 p0414 A72-12901
- Li-diffused Si compared to conventionally doped materials under neutron irradiation, considering carrier removal
03 p0403 A72-14078
- Gamma and neutron radiation effects on bipolar transistor current gain response predicted from multiple linear regression analysis
03 p0335 A72-14091
- Matched Si junction FET under neutron burst and pulsed gamma radiation, investigating device parameters degradation
03 p0335 A72-14093
- Ni-C solid solution, determining room temperature neutron irradiation effects on C distribution during decomposition
03 p0378 A72-14251
- Visual discrimination task-trained monkeys performance and physiology after pulsed mixed gamma-neutron irradiation, noting blood pressure and respiratory and heart rate changes
06 p0763 A72-17873
- Neutron irradiation effect on grain boundary degradation in Al and Al-Li alloy by internal friction investigation
06 p0830 A72-18292
- Neutron irradiation induced material degradation and circuit failure in high power GaAs Gunn diode oscillator operating in LSA relaxation mode
06 p0788 A72-18472
- Endurance limit of construction materials under fast and thermal neutron irradiation in reactor channel
06 p0834 A72-18682
- Neutron damage effects on red and green output of GaP light emitting diodes at 300 K
07 p1047 A72-19043
- Cosmic radiation effects in Concorde prototype cabin, using photographic dosimeters for neutron dose measurement and nuclear emulsions for all charged particle recordings
07 p0927 A72-19241
- Neutron irradiation produced lattice disorder in Li doped float zone melted n-p type Si solar cells
08 p1216 A72-21182
- Neutron irradiation effect on submicroporosity formation and redistribution in structural graphite
09 p1340 A72-23482
- Thermal neutron radiography industrial applications, describing nondestructive testing techniques
10 p1216 A72-23813
- Neutron capture effects on Gd isotopic composition and irradiation histories of lunar rocks from Apollo sites, using mass spectroscopic measurements
10 p1536 A72-24154
- Metal matrix composites, testing neutron irradiation effects on mechanical properties for nuclear application feasibility
11 p1654 A72-25483
- Neutron irradiation effects on GP zones and precipitates in ternary Al alloy, measuring X ray small angle scattering and electrical resistivity
11 p1655 A72-25514
- Visual image indicator used beside and behind objects for neutron radiography quality determination and radiographs series grading
11 p1632 A72-25822
- Irradiation produced defects and electrical properties of n and p-type Si, discussing radiation damage due to neutron and ion implantation
12 p1857 A72-28058
- EPR for point defects produced in Si by fast neutron irradiation, emphasizing damage cluster model
12 p1858 A72-28060
- Introduction rate and annealing of defects produced in Li-diffused float zone n-type Si by 30 MeV electrons and fission neutrons
12 p1858 A72-28064
- IR absorption bands in mechanically and chemically polished GaAs single crystals irradiated with varying neutron and electron doses
12 p1859 A72-28069
- Carrier concentration Hall mobility and photoconductivity in n- and p-type CdTe after neutron and electron bombardment
12 p1859 A72-28072
- Russian book on penetrating radiation effect on radio components covering resistors and capacitors electrophysical characteristics and parameters changes under gamma and neutron radiation
12 p1793 A72-28342
- Permanent operational characteristics changes of Si and Ge transistors bombarded by gamma and neutron radiation
13 p1928 A72-28700
- Defect annealing in neutron irradiated Si by deep trap concentrations, using space charge limited current (SCLC)
13 p2022 A72-29630
- Radiation effects measurement on neutron, proton and electron irradiated Li-drifted Si detectors by IR response technique, comparing characteristics with photovoltage effect
15 p2234 A72-31538
- Radiation damage effects in Li compensated Si nuclear particle detectors induced by irradiation with electrons, protons and fast neutrons
15 p2291 A72-31539
- Dose response curves for pink somatic mutations in Tradescantia after neutron and X ray irradiation
15 p2186 A72-31723
- Neutron irradiation effects on structural materials brittle fracture initiation and propagation mechanisms, discussing residual elements influence on radiation defect stabilization
15 p2258 A72-32486
- Electron trapping data in neutron irradiated high purity Si, using space charge limited current measurements
15 p2294 A72-32514
- Charpy impact tests of neutron irradiated nuclear reactor component steels to determine ductile/brittle transition temperature, describing setup and gas heating and cooling procedures
16 p2373 A72-33222
- Effect of fast-neutron irradiation on ceramics and ceramic-metal seals.
17 p2559 A72-34591
- Implications of ceramic-insulator irradiation results for thermionic reactor design.
17 p2496 A72-34592
- Radiation damage to refractory metals as related to thermionic applications.
17 p2566 A72-34595
- Iridium and tantalum foils for spaceflight neutron dosimetry.
17 p2558 A72-35901
- Neutron irradiation effects on thermionic converter materials, performance and service life
18 p2707 A72-36140
- Behavior of tungsten-clad Mo-UO₂ fuel under neutron irradiation at high temperature.
18 p2708 A72-36143
- Physical-mechanical properties of beryllium oxide and investigation of its electrical resistance under irradiation in a reactor
18 p2703 A72-36147
- In-core thermionic converter emitters irradiation tests to determine fuel, fission gas venting system and emission layer performances
18 p2708 A72-36158
- Thermionic fuel element triple diode configuration, processing, assembly and performance during neutron irradiation testing in reactor
18 p2708 A72-36159
- Breeder reactor testing of fast neutron irradiation effect on alumina and yttria cylinders for thermionic fuel rod designs
18 p2708 A72-36161
- Thermal neutron radiography as NDT technique for industrial inspection, noting advantages for low atomic number and radioactive materials
18 p2695 A72-36457
- Thermal release Xe analysis of neutron irradiated white inclusion samples from Allende carbonaceous meteorite, noting iodine and plutonium isotopes abundance
18 p2728 A72-36971
- Viscoelastic analysis of graphite under neutron irradiation and temperature distribution.
18 p2704 A72-37088
- Polyacrylonitrile based carbon fiber strengthening by fast neutron irradiation at high temperatures
22 p3196 A72-41965
- Effect of voids on angular correlation of positron annihilation photons in molybdenum.
22 p3187 A72-41967
- Dielectric dispersion of irradiated BaTiO₃ near the phase transition.
22 p3215 A72-42934
- NEUTRON PHYSICS**
- Neutronic studies for the French thermoelectronic program
18 p2645 A72-36179
- Equation of state of neutron-star matter at sub-nuclear densities.
22 p3228 A72-42564
- NEUTRON SCATTERING**
- Water absorber lateral scattering effect on absorbed dose from 400 MeV neutron and proton beams [CERN-71-16]
02 p0162 A72-12062
- Phonon dispersion curves from inelastic neutron scattering for actinide and transition metals carbides, noting superconducting properties
09 p1369 A72-22564
- Very-high-frequency gravitational radiation from neutron stars.
21 p3111 A72-41484
- Inelasticity of cosmic neutron interactions in carbon
21 p3102 A72-41840
- Coherent/incoherent elastic/inelastic neutron scattering in amorphous solids, presenting neutron intensity and correlation functions
22 p3206 A72-42799
- NEUTRON SPECTRA**
- Neutron production mechanism and energy spectrum in thermal plasma focus by time of flight spectrometry
01 p0109 A72-10243
- Neutron energy spectrum of radiative pion captured by carbon 12, using gamma and neutron counters
05 p0692 A72-16688
- K-neutral pion inelasticity factor measurement for nucleon interactions in carbon corresponding to primary neutron energy transferred to pions
06 p0869 A72-17269
- Altitude effects on high energy neutrons and galactic gamma rays flux and spectrum variations from balloon flight studies
06 p0873 A72-17639
- Epithermal neutron differential flux spectrum in equilibrium layers of atmosphere at 57 degrees north
07 p1066 A72-20652
- Neutron capture effect on isotopic composition variations of Sm in Apollo lunar samples, comparing with terrestrial abundance
10 p1537 A72-24156
- Effect of neutron spectra on the swelling of ceramic insulators and implications for thermionic reactor design.
18 p2703 A72-36146
- An integral test of the inelastic cross sections of Pb and Mo using measured neutron spectra.
19 p2837 A72-37634
- NEUTRON SPECTROMETERS**
- Resonance neutron transmission for nondestructive absorption spectroscopic evaluation of quantitative chemical or isotopic composition at depth in large samples
01 p0069 A72-10806
- Neutron cosmic ray spectrograph method of separating recorded data by energies, using statistical analysis of data combinations with different dead times
02 p0229 A72-11936
- Short and long term spectral modulation of primary cosmic rays above 2 GV during solar cycle 19 descending phase, presenting neutron monitors calibration procedure
06 p0874 A72-18160
- Neutron cosmic ray spectrograph method of separating recorded data by energies, using statistical analysis of data combinations with different dead times
13 p1957 A72-29248
- NEUTRON STARS**
- NT PULSARS**
- Pulsar nature and radiation mechanism, examining rotating neutron stars structure and atmospheric dynamics
01 p0131 A72-10973

Astronomical research, discussing Venus exploration, stellar evolution quasar structure, Maffei galaxies, black holes, dwarfs and neutron star model

01 p0133 A72-11099

Pulsar theory, discussing rotating neutron star principle, kinetic energy, structure, atmosphere, radiation mechanics and supernovae remnants

03 p0417 A72-13103

Neutron star surface structure and cooling calculations for pulsar cosmic ray production through surface material acceleration

03 p0421 A72-13136

Crab Nebula optical pulsar NP 0532 polarization minima delay mechanism, suggesting relativistic radiation from region orbiting relativistically around neutron star

03 p0434 A72-13553

Electromagnetic pulsar models features and predictions, using rotating neutron stars with strong dipolar magnetic fields

03 p0437 A72-13873

Equation of state for matter at 10-500 trillion g/cc, applying to baryon matter and neutron stars

04 p0571 A72-14557

Relaxation time estimation for electron velocity relative to dilute vortex core array in rotating neutron superfluid, applying to pulsar slowdown rate

04 p0571 A72-14590

Pulsar model, discussing polar radiation diagram formation with source motion around neutron star

04 p0573 A72-14903

Gravitational waves proposed origin, considering black holes, star collapse, white dwarf and neutron star formation and galaxy center neutron star clustering

04 p0576 A72-15074

Tesseral equilibrium shapes of rotating neutron stars emitting gravitational radiation pulses

05 p0719 A72-16602

Neutron star and white dwarf strong magnetic field generation mechanism involving thermodynamic equilibrium states of electron gas

05 p0723 A72-17162

Galactic nuclei and quasars as IR source, noting critical accretion of gas at neutron stars

06 p0883 A72-18015

Microscopic calculations for nuclear forces, compressibility of neutron matter and maximum mass of neutron stars based on solid state model at high densities

06 p0891 A72-18507

Isolated pulsar or neutron star upper mass limit based on consideration of rotational energy, by ejection of low energy cosmic rays or photons

06 p0891 A72-18508

Pulsar dynamics and electrodynamics for power derivation from rotational energy, discussing toroidal magnetic field induced nonhydrostatic stress in neutron star

07 p1068 A72-19001

Loop structure of Monoceros supernova remnant, predicting thermal soft X ray point source as cooling neutron star

07 p1073 A72-19421

Pulsars suggested as rotating neutron stars based on collapsed star magnetic field strength, mass-radius relation and radio flux emission

07 p1080 A72-20055

Neutron star evolution theories, emphasizing neutrino emission processes and stellar collapse

07 p1080 A72-20056

Pulsar model based on neutron star rotation with skew magnetic field, considering radiated particle acceleration responsible for high energy activity in supernova remnants

07 p1080 A72-20057

Pulsar and quasar energy sources, discussing Crab nebula, rotating neutron stars and gravitational collapse role

08 p1233 A72-21208

Pulsar braking index and period-pulse width distribution calculations within proposed model leading to neutron star surface magnetic field strength estimates

08 p1235 A72-21389

Black body X ray sources creation due to neutron stars rotational energy dissipation by strain hysteresis in crust

09 p1382 A72-22284

Long time behavior of neutron star magnetic fields, noting pulsar evidence for large internal fields in main sequence stars

09 p1389 A72-23393

Neutron star properties, formation theories, crust composition and internal structure, examining interior neutron behavior, fermion systems superfluidity, magnetic field effects and stellar dynamics

10 p1533 A72-23890

Pulsar radiation mechanism study from magnetosphere structure model, taking into account neutron star evaporated gas accumulation in gravitation-centrifugal force balance region

10 p1544 A72-24672

Cold static superdense model for white dwarf and neutron stars, using relativity theory and variational principles for stellar structure in hydrostatic equilibrium

11 p1715 A72-25528

Pulsar rotational models, considering white dwarves, neutron stars, oblique rotators, etc

11 p1718 A72-25907

Galactic nuclei and quasars as IR sources, noting critical accretion of gas at neutron stars

11 p1718 A72-25951

Pulsar speed increase mechanism as metastable flow state transition in neutron star superfluid core

11 p1724 A72-26705

Stellar gravitational collapse to neutron stars and black holes, discussing gravitational wave emission from Galactic center

12 p1875 A72-27958

Low mass neutron star source of pulsed X radiation in binary Centaurus X-3 ejected during low energy supernova explosion

14 p2156 A72-30570

Degenerate electron gas magnetic properties implications for metals, white dwarfs and neutron stars, discussing nonmagnetic state for thermal equilibrium

14 p2158 A72-30728

Magnetic neutron stars /pulsars/ atmosphere, questioning vacuum approximation method applicability

14 p2160 A72-30887

Radio emission due to relativistic electrons spiral orbit motion in rotating pulsating neutron star

15 p2304 A72-31333

Rotating neutron stars stability and radial pulsations by energy method, allowing for relativistic effects

15 p2304 A72-31335

Rotating white dwarfs and neutron stars quasi-radial pulsations frequencies, discussing central densities critical values

15 p2304 A72-31336

Flare mechanism of pulsar radiation near magnetic poles of rotating neutron stars

15 p2298 A72-31627

Vela pulsar speedup explanation by corequake release of elastic energy stored within solid neutron lattice

16 p2450 A72-32869

Neutron star acceleration of He, Fe and supernova debris into cosmic ray flux throughout Galaxy, discussing magnetic and superfluidity effects

16 p2448 A72-33745

Mathematical model for magnetosphere surrounding rotating neutron star, noting computer programs for Maxwell and plasma equations solution

16 p2460 A72-33927

Fermi lectures by Dyson on neutron stars and pulsars origin and structure, using perfect gas and realistic models

16 p2460 A72-33974

Pulsating X ray sources with 1 sec periods as stars with central densities between neutron stars and white dwarfs

17 p2599 A72-35074

Formation of neutron star spots and its connection with pulsars. I.

17 p2613 A72-35502

Single body and stellar cluster models of quasars and galactic nuclei stability, noting neutron and collapsing star lifetimes

19 p2862 A72-38052

Unsteady hydrodynamic accretion on a neutron star

19 p2862 A72-38053

Neutron-rich nuclei in a Fermi gas

19 p2837 A72-38060

Effects of nuclear reactions on the stability of degenerate stars

19 p2864 A72-38100

Neutron star matter properties and model calculations, investigating magnetic field decay

19 p2865 A72-38482

On the acceleration of charged particles to cosmic ray energies.

19 p2852 A72-38483

Stability of nonradial vibrational modes of relativistic neutron stars.

20 p2972 A72-39869

General relativity equations for hydrostatic equilibrium of spherical distribution of mass combined with equations of state for highly relativistic neutron star central regions

20 p2955 A72-40011

Neutron star detection based on nearby pulsar soft thermal X ray flux observations

21 p3107 A72-41218

Very-high-frequency gravitational radiation from neutron stars.

21 p3111 A72-41484

Self similar procedure derived for gas fall to solid surface in constant gravitational field, applying to initial phase of neutron star matter accretion

21 p3113 A72-41753

Equation of state of neutron-star matter at sub-nuclear densities.

22 p3228 A72-42564

Neutron star model for magnetic field and superfluidity effects on cooling during pulsar stage

22 p3228 A72-42565

Accretion disc models for compact X-ray sources.

24 p3435 A72-44828

Centaurus X-3 - Possible reactivation of an old neutron star by mass exchange in a close binary.

24 p3439 A72-44976

Radiation pressure supported stars, degenerate dwarfs, neutron stars and black holes high energy observations from space platforms

24 p3446 A72-45536

NEUTRON TRANSMUTATION

U NUCLEAR REACTIONS

NEUTRONS

NT FAST NEUTRONS

NT THERMAL NEUTRONS

Pyramidal tract neuron reactions to antidromic and afferent stimuli in cats, determining somatosensor cortical neurons responses by intra- and extracellular potential outlets

02 p0159 A72-11768

Explosive p-process nucleosynthesis limiting conditions in supernova envelopes, using proton capture and neutron photodisintegration rates

04 p0579 A72-15318

Atmospheric neutron production by cosmic rays, calculating Cd-In ratio

05 p0662 A72-16258

Probabilistic integral multiplicity of generation of primary cosmic ray particles from count rate and primary spectrum relationship, using definition for neutron component calculations

07 p1067 A72-20656

Si burning in stellar explosions, discussing initial composition and neutron enrichment

10 p1544 A72-24666

Negative photoconductivity in CdSe single crystals due to free carrier mobility decrease after surface treatment in gas discharge, noting neutron traps role

13 p2024 A72-30046

Kinetic equations for ultradense matter neutronization, noting stellar configuration of given mass with variable volume

21 p3086 A72-40096

Neutron production in exploding-wire discharges.

21 p3089 A72-40338

Universe evolution study from contemporary chemical composition of cosmic matter, noting concentration changes of protons, neutrons and He 4

22 p3222 A72-42140

The threshold of disintegration of nuclei in a degenerate electron-neutron gas

22 p3209 A72-42963

NEWTON SECOND LAW

Mechanical systems generalization using multilinear transformations and multiple index system flow formalism

24 p3424 A72-44624

NEWTON THEORY

Particle escape within Newtonian gravitational system of three point masses, discussing necessary conditions

01 p0122 A72-10007

Newtonian quasi-static crack propagation theory application to nonlinear structures, considering slender beams, plates and circular cylindrical shells

02 p0292 A72-12029

Power law bodies lift and drag coefficients interrelationship under Newtonian nonaffine similarity laws, presenting rules for equivalent transformations identification

02 p0151 A72-12273

Newton laws and solution existence of two and three body problems in remote universe

03 p0388 A72-13174

Relativistic cosmological model, showing relation to fluid dynamics in Newtonian theory and space-time dependence on causality condition

03 p0426 A72-13267

Newtonian theory for maximum lift drag ratio of blunt-cone cylinder bodies, optimizing rocket reentry nose shape

05 p0602 A72-16535

Nonsymmetrical aerodynamic damping moments on 10 deg cone at supersonic speeds and large angles of attack, comparing Newtonian theory prediction with wind tunnel test results

05 p0609 A72-16947

Stationary stars rigid and differential rotation angular velocity limits, showing analogous conditions in general relativity

06 p0882 A72-18001

Homogeneous isotropic Newtonian and Robertson-Walker cosmological models, discussing radiative transfer and optics

07 p1074 A72-19431

Hypersonic vehicles lateral dynamics during great circle flight, using linearized equations of motion and Newtonian theory for stability derivatives estimation

08 p1110 A72-21603

Newton cooling law applicability to unsteady heat and mass transfer approximate calculation for ion exchange process

09 p1412 A72-23685

- Relativistic homogeneous anisotropic models
analogous construction in Newtonian cosmology
11 p1716 A72-25711
- Newtonian hydrodynamic equations derived from
scalar-tensor theory field equations for cosmic fluid
nonlinear effects during galaxy formation
11 p1717 A72-25866
- Potential or gravitational energy in Newtonian
physics based on Maxwell definition, noting energy
transfer
12 p1843 A72-27187
- Structural and integral parameters for rotating stellar
configurations within Newton gravitation theory,
giving equations for gravitational potential, outer surface
geometry and multipole moments
13 p2035 A72-28677
- Relativistic and Newtonian theory compared for orbiting
satellite matter release criteria and subrelativistic
change effects during gravitational collapse of central
dense core
13 p2040 A72-29407
- Mechanics fundamentals in aerodynamical aircraft
analysis, noting force concept and Newton theory
14 p2073 A72-30817
- Study of the stability of certain relative equilibria of
a symmetrical satellite
17 p2620 A72-34282
- General relativistic planetary structures comparison
with Newton gravitational theory, deriving field equations
for spherically symmetric planets with explicit
pressure and density distributions
18 p2728 A72-36751
- Linear pulsations and stability of differentially
rotating stellar models. I - Newtonian analysis. II -
General relativistic analysis.
19 p2855 A72-37247
- Metric gravitation theories classified according to
field type and interaction mode, constructing post-
Newtonian limit
22 p3206 A72-42567
- The topology of the regularized integral surfaces of
the 3-body problem.
23 p3309 A72-43982
- Solar neutrino and dilaton theory of non-Newtonian
gravity.
23 p3329 A72-44315
- About the first integrals of the generalized problem
of translatory-rotary motion of rigid bodies
24 p3442 A72-45235
- NEWTON-BUSEMANN LAW**
Newton-Busemann pressure law derived for hyper-
sonic rotationally symmetric flow from momentum
theory considerations and plane flows
12 p1751 A72-27120
- Determination of slender bodies of minimum total
drag in hypersonic flow using Newton-Busemann
pressure coefficient law.
23 p3249 A72-44267
- NEWTON-RAPHSON METHOD**
Equivalent current system from measured geomagnetic
disturbance vectors, solving Biot-Savart formula
derived nonlinear equations by Newton-Raphson
iterative method
01 p0055 A72-10430
- Partial iterative refinements of parameters by
reduced Newton-Raphson process based on generalized
inverse, noting method use in gravitational n-
body integration
04 p0581 A72-15630
- Some properties of iterative square-rooting methods
using high-speed multiplication.
19 p2769 A72-37577
- Existence of a unique solution for a class of non-
linear systems of equations and its calculation by iterative
methods
19 p2827 A72-38546
- Finite difference and extended Newton methods
application to transient and steady state creep deformation
in shells of revolution under high temperature and
high stress
22 p3235 A72-42482
- Treatment of the flutter equation by functional analysis,
using the Newton method
22 p3240 A72-42907
- NEWTONIAN FLUIDS**
Self similar solutions for unsteady shear flows of
conducting Newtonian fluids with rheological power law
under transverse magnetic field
03 p0397 A72-13997
- Newtonian fluid laminar free convection over
curved wall with arbitrary temperature variation, investigating
similarity solutions existence by method of
free parameters
04 p0596 A72-15193
- Forebody blowing induced dynamic instability effect
on slender cones at hypersonic speeds, presenting
theory based on unsteady imbedded Newtonian flow
concepts
05 p0607 A72-16919
- Forced convective heat transfer for laminar flow of
Newtonian fluid inside noncircular duct, taking into
account viscous dissipation and work compression
07 p1100 A72-19628
- Transpiration cooling of laminar tangential Newtonian
flow in annuli, obtaining temperature distribution
07 p1100 A72-19631
- Viscosity measurement error estimates for Newtonian
incompressible fluid flow through deformed
capillary tube
07 p0991 A72-20535
- Nonvertical alignment effect on performance of
falling cylinder Newtonian fluid filled viscometer
07 p0992 A72-20552
- Heat transfer in laminar and turbulent Newtonian
fluid flow in narrow channels with allowance for temperature
dependence of viscosity and energy dissipation
08 p1148 A72-20955
- Concentric double and single screw seals in laminar
Newtonian fluid flow operation, using mathematical
methods for optimum thread geometry and maximum
sealing coefficients
08 p1178 A72-21930
- Tacky adhesive tearing between two flexible strips,
solving Newtonian viscous fluid slow flow problem by
iterative numerical scheme
12 p1798 A72-27831
- Viscoplastic media flow rate in noncircular tube
from Newtonian fluid velocity profile, using Green
formula
12 p1799 A72-27981
- Classical flow problem solution by fixed point approach,
using quasi-Lipschitz conditions for Newtonian
potential gradients
15 p2216 A72-31468
- Flows between stationary surfaces of revolution,
having similarity solutions.
17 p2537 A72-34304
- Boundary value problem approximate solution for
Stokes flow of unbounded viscous Newtonian fluid
past single body, applying algorithm to spheroidal
shapes
19 p2784 A72-37369
- Fluid dynamic forces exerted by Newtonian fluid
axisymmetric creeping flow on accelerating body of
arbitrary shape, calculating pressure gradient via Navier-
Stokes equation
23 p3347 A72-43726
- NICHROME (TRADEMARK)**
Nichrome matrix composites with W and Mo reinforcing
fibers
07 p1013 A72-19744
- Heat resistant Nichrome composite alloy with tungsten
filament reinforcement, discussing manufacture and
mechanical properties at 1100 C
07 p1013 A72-19747
- High porosity nichrome fiber materials sintering at
1000-1350 C, considering size, electric conductivity,
shear strength, interfibrillar contact and briquet quality
13 p1967 A72-30105
- Reliability of nichrome film resistors deposited in
vacuum by sublimation on a glass substrate
18 p2669 A72-37117
- Strength properties of highly porous materials made
of metallic fibers
19 p2820 A72-38288
- Electrical resistivity changes in nichrome films sintering
of various thickness with different heat treatment
conditions, noting heat stability and thermal
shock tests
23 p3292 A72-43280
- Pores visualization in porous materials by liquid
filling and subsequent solidification and basic material
removal, observing porous samples of sintered W and
nichrome powders
23 p3290 A72-44016
- NICKEL**
Plastic strain and rupture characteristics of thin
walled tubular Ni samples under complex loading and
biaxial tension
04 p0588 A72-15058
- Dislocation substructure in fatigued Al and Ni
polycrystals surface layer and interior due to high and
low stress cycling, discussing stacking fault energy influence
04 p0534 A72-15577
- Mono- and polycrystalline Ni high temperature
creep kinetics, investigating substructural changes
05 p0671 A72-16000
- Electron density profiles as function of position in
enhanced coronal region from Ni XV and Fe XIII
emission lines observation
05 p0719 A72-16517
- Tensile strength of tungsten reinforced nickel,
determining temperature effect on fibers deformation
after vacuum rolling simultaneously with plastic
matrix
06 p0832 A72-18362
- Composite plasma sprayed coatings of Cu, Ni and
boron nitride, noting antifriction and wear characteristics
06 p0822 A72-18429
- Thermocycling treatment influence on structural
changes and strength in coarse grain Ni under creep
tests
06 p0834 A72-18686
- X ray study of structural changes in Ni single
crystals during recrystallization process after uniaxial
deformation under compression loads with high loading
rates
06 p0834 A72-18744
- Steady creep rates in Ni poly- and single crystals in
presence of dislocation stresses
06 p0835 A72-18748
- Magnetic domain structure of Ni single crystals
after plastic deformation as function of stress induced
anisotropy of layer-like dislocations
07 p1020 A72-20411
- Small impurity amounts effect on packing defect
density and deformation energy in Ni
08 p1188 A72-21791
- Electron microscopy application to dynamic wear
studies of Ni on Ni surface and subsurface topography
and microstructure in nitrogen atmosphere
08 p1179 A72-21943
- Magnetization and elastic stresses effect on Ni
dislocations movement due to domain wall interactions
09 p1371 A72-22866
- Nonstabilized Ni-P thin films electrical conductivity
at 50-280 C, using mass spectrographic, thermal differential,
X ray diffraction and electron microdiffraction analyses
10 p1495 A72-24076
- Powder metallurgy Ni-Cr thoria cleaning by reduction
with atmosphere of hydrogen plus HCl or HBr
10 p1488 A72-24697
- Ni fatigue crack propagation under low cyclic loads
at high temperature in vacuum after annealing and
mechanical treatment
11 p1655 A72-25497
- Ni powder artificial dielectric in waveguide transverse
magnetic field, noting nonreciprocal nature of
microwave attenuation and phase shift
11 p1607 A72-26786
- Ni additive effects on tungsten trioxide reduction
with hydrogen and W powder sinterability
11 p1643 A72-26835
- Microstructural properties of Ni-Al powder
synthetic material from transmission and photoemission
electron microscopy, discussing low and high
temperature strength characteristics
11 p1645 A72-26855
- Ni single crystal growth by Czochralski method,
investigating growth rate, direction and initial structures
effects on substructure
13 p1976 A72-28906
- Cs vapors thermal conductivity at various temperatures
and pressures, using low emissivity Ni cylinders
13 p2065 A72-29896
- Modified geometrical model for sintering Ni-doped
W, including surface tension effect at Ni-vapor interface
14 p2121 A72-30770
- Absolute intensity LEED spectra for clean Ni surfaces,
discussing measurement uncertainties
15 p2276 A72-31854
- Kinematic intensity recovery from LEED data of
specular and nonspecular beams from Ni(111) surface,
noting multiple scattering interference elimination
15 p2276 A72-31855
- Carbon monoxide adsorption on nickel surface,
determining preferential orientation by extended
Huckel calculations
15 p2276 A72-31867
- Tensor analysis for planar magnetoresistivity and
Hall effect in Ni single crystal thin films, noting
anisotropy effects in ferromagnetic crystals
15 p2294 A72-32386
- Cold rotatory forging and subsequent heating effects
on microstructure, texture and mechanical properties
of dispersion hardened Ni specimens obtained by hot
extrusion
16 p2407 A72-33530
- Aluminum oxide high temperature equilibrium
morphology in Ni matrix prepared via vapor deposition
and internal oxidation methods
16 p2411 A72-33824
- Gas shielded arc welding of Ni, discussing current
density, energy, arc length and preheating temperature
effects on welds porosity
18 p2695 A72-36427
- Plastic anisotropy quantitative calculation formula
verified on Cu, Ni and Al, discussing physical sense of
coefficients
18 p2735 A72-36475
- Influence of twinned growth crystals on the texture
of nickel work hardened in tension
18 p2702 A72-36703
- Secondary recrystallization of nickel 270 work-
hardened by tension
18 p2702 A72-36704
- An investigation of impurities segregation to the
/001/ nickel surface during thermal treatment - Work
function changes and Auger electron spectroscopy
using the LEED camera.
18 p2720 A72-37022
- Creep of porous nickel in oxidizing and neutral
media
19 p2819 A72-38287

Deformation and fracture of dispersion-strengthened nickel charged with hydrogen.

20 p2935 A72-39004

Adhesion characteristics of alpha-aluminum oxide-nickel system from shear strength measurements, investigating effects of sintering parameters and Ti and Zr alloying components

20 p2940 A72-39445

The plastic behavior of pure and dispersion-hardened nickel in the temperature range from 20 to 600 C

20 p2940 A72-39455

Effect of cold work on the oxidation of nickel at high temperature.

21 p3067 A72-40846

Oxidation of TD nickel at 1050 and 1200 C as compared to three grades of nickel of different purity.

21 p3067 A72-40915

Investigation by the mass transfer method of the diffusion of nickel at a $\{110\}$ surface of tungsten single crystals

21 p3068 A72-40955

Investigation by the method of secondary ion-ion emission of the initial phase of the formation process of a silver vacuum condensate on a nickel substrate

21 p3068 A72-40960

Gas permeability of high-porosity nickel cermet

22 p3188 A72-42196

Rotational hysteresis in single crystals of powdered nickel

22 p3192 A72-43011

Growth rate of refractory oxide particles in nickel cermets

23 p3299 A72-43290

Determination of Ni, Ga, and Ge in iron meteorites by X-ray fluorescence analysis.

23 p3262 A72-44128

Spontaneous magnetization of Ni foils in high pressure H gas, noting Hall voltage measurement in ferromagnetic foils and thin plates

23 p3324 A72-44140

The kinetics of the reaction between oxygen and sulfur on a Ni $\{111\}$ surface.

24 p3378 A72-44951

Tensile strength of tungsten reinforced nickel, determining temperature effect on fibers deformation after vacuum rolling simultaneously with plastic matrix

24 p3416 A72-45749

NICKEL ALLOYS

NT HASTELLOY [TRADEMARK]

NT INCONEL [TRADEMARK]

NT NICHROME [TRADEMARK]

NT UDIMET ALLOYS

NT WASPALOY

Ni-Cr-Al alloys high temperature oxidation, detailing surface reactions and continuous oxide layer formation [ECS PAPER 114]

01 p0082 A72-10172

Thermal conductivity, electrical resistivity, Lorentz ratio and thermopower of Ti, Al and Ni alloys for aerospace structures over 4-300 K range

01 p0113 A72-10173

Magnetic transformation effect on creep behavior of fcc nickel-cobalt alloy compared with self diffusion data in Curie temperature vicinity

01 p0083 A72-10391

Dispersion strengthened Ni-Cr alloys processing technique and mill products development, noting increased strength at elevated temperatures

01 p0075 A72-10744

High temperature high strength Ni alloys with Ti, Nb and Hf additions, using modified Hastelloy N

01 p0084 A72-10746

TD nickel as construction material for rocket thrust chambers, discussing spin-forming, welding, machining, electric discharge machining and electroforming operations

01 p0075 A72-10753

Arc jet simulation tests of thorium dispersed Ni and Co alloys for space shuttle Metallic Thermal Protection System, determining material degradation

01 p0086 A72-10978

Ni, Fe and Ti alloys creep rupture characteristics in high temperature, high pressure gaseous hydrogen and helium

01 p0086 A72-10979

Stress effects on TiNi compound martensitic transformation, investigating deformation as function of composition and heat treatment

01 p0087 A72-11023

Mo and Zr additions induced mechanical strength increase of Ni-Al-Nb alloys in cast and deformed states at 20-1100 C

01 p0088 A72-11081

Ductility enhancement in directionally solidified Ni base Mar-M200 alloy by Hf additions increasing gamma-gamma prime eutectic

01 p0089 A72-11104

Thoriated Ni-Cr alloys oxidation kinetics at high temperatures, discussing oxide formations as function of CR content

01 p0089 A72-11164

Diffusion aluminide protective coating formation mechanisms on Ni-base superalloys observed from microstructures and compositions in Ni-Al intermetallics

01 p0089 A72-11165

Ni base superalloy powder with refractory oxide particle dispersion, presenting high temperature creep, stress rupture, microstructure activation energy and processing history

02 p0240 A72-11442

Powder metallurgy advantages for Ni-based superalloys, presenting thermomechanical process results

02 p0240 A72-11443

Alumina dispersions structural stability in Fe and Ni based alloys metal matrices

02 p0241 A72-11445

Thorium oxide dispersion strengthened Ni powder metallurgy alloys, noting thermomechanical processing effects on tensile strength

02 p0241 A72-11447

Anodic polarization curves of Ni-Fe alloys relating reaction to attack at controlled voltage of gamma joints and Ni content, using electron microprobe

02 p0243 A72-12168

Eutectic Ni-Cr alloy temperature effects on deformation rate on plasticity, noting superplasticity point

02 p0244 A72-12243

Titanium and aluminum variations effects on eta and gamma prime solvus temperatures and on mechanical properties of iron-nickel superalloy

02 p0245 A72-12508

Mean free path and particle size distribution in dispersion hardened nickel-thoria alloys, obtaining interparticle spacing by Scheil method

02 p0245 A72-12549

Gamma prime precipitate hardened Ni base alloys, attributing strengthening mechanism to coherency strains and precipitates antiphase boundary energy

02 p0247 A72-12817

Quenching effects on thorium-dispersed Ni sheet plastic stress relaxation and room temperature mechanical properties

02 p0247 A72-12822

Powdered chromium carbide-nickel alloys phosphorus addition effects on sintering temperature, shrinkage, density and hardness

03 p0372 A72-13546

Vapor pressure and partial thermodynamic functions of Co-Ni alloys, observing negative deviations from Raoult law

03 p0374 A72-13928

Nb-Co-Sn and Nb-Ni-Sn ternary systems, investigating intermetallic compounds existence by X ray analysis

03 p0375 A72-13944

Structural features of heat resistant Ni-Cr alloy from electron diffraction microscopy, observing coherent lattice bond and plastic deformation

03 p0376 A72-14015

Dilatometric investigation of martensitic transformation in TiNi compound, observing plastic memory effect

03 p0377 A72-14021

Ni-C solid solution, determining room temperature neutron irradiation effects on C distribution during decomposition

03 p0378 A72-14251

Short range order and nucleation of long range order in Ni-rich Ni-Nb alloys, observing electrical resistivity changes dependence on solute concentration

03 p0379 A72-14338

Grain size and precipitate parameters effect on creep properties of Ni-Cr alloys

03 p0379 A72-14339

Quenched and tempered Ni-Cr-Nb-Co alloy, describing cellular precipitation mechanism

04 p0533 A72-14977

Low energy He ion bombardment effects on Ni alloy single crystal surface, observing defect structure with stacking faults, tangled dislocations and carbide precipitation

04 p0533 A72-15159

Flow stress measurements in disordered and partially ordered Ni-Ta alloy single crystals, correlating with ordered phase volume fraction and domain size

04 p0534 A72-15272

Ni alloy stress rupture data correlation and extrapolation from computerized evaluations of time-temperature parameters relative abilities

[ASME PAPER 71-WA/MET-4] 05 p0670 A72-15905

Order-disorder reaction in Ni-V, Ni-V-Nb and Ni-V-Ta alloys, estimating critical temperature

05 p0671 A72-15999

Ni-based metal graphite materials, investigating sintering process control variables effects on structure and phase composition responses

05 p0665 A72-16090

Ni-Cr thick films triode sputtering technique with temperature control by low-energy electron bombardment heating, presenting phase diagram

05 p0675 A72-16393

INCO 713C and IN 100 cast Ni base alloy gas turbine blades under thermal fatigue tests

05 p0675 A72-16497

Binary and ternary alloys of Cr and Fe with Ni, determining interaction coefficient and molar enthalpy for Cr at 1600 C by mass spectrometry

05 p0676 A72-17103

Ni-NiNb intermetallic unidirectional eutectic alloy crystal structure and high temperature behavior, considering mechanical twinning relationship to strain hardening and ductility

05 p0677 A72-17108

Sequential sulfidation and oxidation effects on sulfur self propagation in Ni-Cr alloy

05 p0677 A72-17110

Directionally solidified Al-AlNi intermetallic eutectic composites creep tests, identifying time dependent fracture mechanism

05 p0678 A72-17114

Directionally solidified Al-AlNi intermetallic eutectic alloy microstructural characteristics and effects on creep fracture

05 p0678 A72-17115

Plastic flow stress around dislocations on Ni-Al intermetallic cube and octahedral cross slip systems

05 p0678 A72-17118

Impurities effect on microstructure alignment in unidirectionally solidified Al-AlNi eutectic intermetallic, noting fiberless region defects

05 p0679 A72-17123

Fe effect on dispersion hardened Ni alloys with various quantities of Nb and Ti during cryogenic operation

05 p0679 A72-17202

Superplasticity relation to heat resistance in metal systems Ni-Cr, Ni-Cr-W-Ti-Al and Ti-Si

05 p0680 A72-17212

Crystal structures and martensitic transformation mechanism of TiNi, using X ray diffraction and electrical resistivity measurements

06 p0827 A72-17421

Ni-Al alloy, investigating Y addition effect on vacancy agglomeration suppression during oxidation

06 p0829 A72-17787

Internal friction spectrum peaks in Fe-Ni alloy at 20-1100 C upon heating and cooling, explaining by grain boundary relaxation and martensitic transformations

06 p0830 A72-18293

Anomalous temperature-strain rate dependence of Ni-Al intermetallic compound mechanical properties from plastic deformation mechanism

06 p0832 A72-18417

Hardening mechanisms of interaction between superlattice dislocations and point defects in Ni-Al intermetallic compound mechanical properties strain rate and temperature dependence

06 p0832 A72-18420

Damping characteristics of Ni base heat resistant alloys at high temperatures, showing increase with cyclic strain amplitude

06 p0833 A72-18630

Nickel base alloy under axisymmetric tension compression tests, obtaining breaking load diagrams and fatigue and creep curves

06 p0833 A72-18638

Aging kinetics in Co-Ni-Ti alloys, noting three dimensional periodically modulated structure development

06 p0834 A72-18742

Critical cleavage stresses dependence on ordering degree in Ni-Cr alloy

06 p0835 A72-18745

Nitrogen interaction with Ni-based melts at 1600 C, noting absorption rate dependence on nitrogen diffusion rates and melt viscosities

07 p1011 A72-19546

Nitrogen interaction with liquid binary Ni alloys, investigating solubility as function of temperature and pressure and titanium nitrides existence conditions

07 p1011 A72-19547

Rare earth metals microadditions influence on Ni grain boundaries free energy and compounds formation

07 p1012 A72-19676

Transition metals distribution of IV-VI and VIII A groups in metastable refractory nickel alloys gamma and gamma-prime phases

07 p1012 A72-19678

Aluminized layer phase and chemical composition on heat resistant iron and nickel alloys

07 p1013 A72-19748

Heat resistant weldable precipitation hardened Ni base alloy, discussing intermetallic phase hardening

07 p1014 A72-19842

Hf addition effects on grain boundary structure of cast Ni-base superalloys

07 p1015 A72-19931

Jerky flow /serrated yielding/ in Co-Ni-Cr-C fcc alloys during tensile testing, noting no correlation to dislocation-precipitate interactions

07 p1016 A72-19940

Corrosion resistance decrease and embrittlement in Ni-Mo cermet alloys after heat treatment from electrical resistance measurement

07 p1017 A72-19965

Vacuum hot press diffusion welding of nickel-chromium-thorium dioxide sheet, describing specimen

preparation, welding procedure and welded joints photomicrographic microstructure 07 p0997 A72-20002

Ni-Cr-Ti alloy hardening during intermetallic phases precipitation, discussing atom segregations, Guinier-Preston zones and fcc and hcp lattices 07 p1019 A72-20152

Fe addition effects on structural and mechanical properties of heat resistant Ni-Cr alloys 07 p1020 A72-20416

Kinetic data analysis of internal oxidation in dilute Ni-Be alloys, deriving activation energy and diffusivity of oxygen in Ni 07 p1021 A72-20435

Diffusion creep influence on grain boundary-adjacent precipitate free zone formation in Ni-Cr alloys subjected to high temperature tensile and creep tests 07 p1021 A72-20437

Precipitation hardened Ni-Al alloy mechanical properties, relating ductility and strength to precipitate caused inhibition of microcrack initiation and propagation 07 p1021 A72-20438

Electrode potential gradients during dimensional electrochemical treatment of Ni and Ni based alloys 08 p1175 A72-21041

Dispersion strengthening of electrolytically deposited nickel-aluminum oxide alloys, comparing tensile tests to theoretical values 08 p1186 A72-21442

Ni-Cr-Nb alloys structure and phase composition changes from W-Mo additions and hardening by intermetallic Ni-Nb precipitated from supersaturated solid solution 08 p1187 A72-21782

X ray study of martensite fine structure produced by plastic deformation in Fe-Ni alloy 08 p1188 A72-21788

Plastic deformation characteristics of Fe-Cr-Ni alloy single crystals at low temperatures 08 p1188 A72-21790

Fe-Ni alloys atom redistribution during aging before phase precipitation, discussing Mo and Co clusters in martensitic maraging steels 08 p1190 A72-22189

High strength Ni alloy hot working properties evaluation from extrusion simulation by torsion testing, considering stress-strain-time relations, microstructure, recrystallization and ductility 08 p1190 A72-22199

Mechanical properties anisotropy in heat resistant Ni alloys due to strengthening phase nonmetallic inclusions distribution, suggesting purification by vacuum melting 09 p1327 A72-22231

Ceramic fiber reinforced Ni base alloy for gas turbine blades, improving creep resistance at high temperatures 09 p1335 A72-22396

Analytic determination of Nb low content in highly alloyed Ni base alloys 09 p1276 A72-22637

X ray K absorption edges in binary solid solutions of Co, Fe and Ni with localized hole increases 09 p1371 A72-22846

Parabolic oxidation kinetics of Ni-Ti alloy compound at elevated temperatures 09 p1330 A72-23358

Microstructure and mechanical behavior of unidirectionally solidified magnesium-magnesium nickelide eutectic composite over range of solidification rates 09 p1330 A72-23376

Thermomechanical strengthening of gamma prime precipitation hardened nickel base superalloy, emphasizing working operation and dislocation substructure 09 p1330 A72-23377

Environment and grain size effect on steady state creep and creep rupture properties of Ni-W solid solution 09 p1331 A72-23381

Protective aluminum oxide scale development on Ni-Cr-Al alloy, describing transient oxidation stage 09 p1332 A72-23584

Samaria distribution effect on Ni-Cr alloy oxidation rate for various oxygen pressures, discussing behavior of electroplated and bulk specimens 09 p1332 A72-23585

Differential sputtering yield of Ni-Cu alloy solid solution bombarded by Ar ions 10 p1495 A72-24057

Electron bombardment disordering of ordered Ni-Mn alloy along different crystallographic directions 10 p1514 A72-24075

Carbon effects on internal friction of low temperature Fe-Ni alloy during martensitic transformation 10 p1495 A72-24083

Nb-W equilibrium phase diagram estimation from known phase diagrams of Ni-Nb, Ni-W and Ni-Nb-W systems via Guggenheim quasi-chemical model application to Ni-Nb-W thermodynamic properties 10 p1496 A72-24233

Electrochemical and stress corrosion tests of Ti-Ni alloys in acidic chloride solutions at ambient and elevated temperatures [NACE PAPER 30] 10 p1497 A72-24321

Chloride ion concentration effect on polarization behavior of Fe-Ni alloy, noting cathodic curve parallel shift in noble potential direction 11 p1652 A72-25290

Superplasticity relation to heat resistance in metal systems Ni-Cr, Ni-Cr-W-Ti-Al and Ti-Si 11 p1727 A72-25338

Temperature dependence of Ni and Ni alloys and solid solutions microhardness, noting strengthening effect of Ti, Cr, Al and B additions 11 p1654 A72-25491

Ni and Ni alloys microstructure under tensile stress, determining Cr and Ti effects on plastic deformation at high temperature 11 p1654 A72-25494

Titanium oxide, carbide and nitride fractional determination in Ti-Ni alloy, noting optimum extraction conditions 11 p1655 A72-25513

Manufacturing process for dispersion strengthened nickel-chromium-thorium dioxide alloys for space shuttle thermal protection system panels, discussing joining optimization and mechanical properties 11 p1659 A72-26035

Temperature and strain rate effects on superplasticity of Ni-Cr eutectic alloy 11 p1659 A72-26129

Fe effect on plasticity and ductility of dispersion hardened Ni alloys with various quantities of Nb and Ti at cryogenic temperature 11 p1660 A72-26137

Young modulus of TiC-Co and TiC-Ni hard composites as function of volumetric fraction, using bending tests 11 p1660 A72-26487

Fatigue properties of Ni-Al-W alloy with gamma-prime matrix, noting high endurance limit/yield strength ratio at room temperature 11 p1661 A72-26653

X ray analysis of internal friction strains in nickel molybdenide during ordering process at 650-700 C, using torsional pendulum method for friction measurements 11 p1662 A72-26654

Cold working effect on precipitation-recrystallization interaction in Cu-Ni-Zn alloy, discussing superposed strengthening mechanism during annealing 11 p1641 A72-26738

Cold working effect on Cu-Ni-Si-Mg and Cu-Ni-Si-Cr alloys age hardening behavior, presenting hardness and tensile strength vs aging time at 350 and 400 C 11 p1662 A72-26743

Oxygen, carbon and boron effect on liquid phase sintering behavior and mechanical properties of Ni base superalloys 11 p1645 A72-26848

Dispersed phase nickel-thoria alloy production method based on organometallic compounds, avoiding high temperature and solvent elimination difficulties 11 p1664 A72-26849

Dispersion strengthened nickel-chromium-thoria alloy production methods, noting halogen gas phase diffusion process 11 p1645 A72-26850

High temperature effects on stability, corrosion behavior, structure and protective effectiveness of Al coatings on Ni and Co alloys 11 p1664 A72-26852

Mg addition effect on high temperature mechanical properties of nickel-alumina alloy, studying particle coarsening mechanism changes 11 p1664 A72-26856

Ordered crystallization casting of Ni superalloys for turbine blades, using power down and high rate solidification processes 11 p1646 A72-26894

High temperature Ni base alloys microstructure via transmission electron microscopy and electron diffraction contrast theory, predicting yield and creep strength 11 p1667 A72-26931

Slip and mechanical twinning in nickel-nickel-niobide directionally solidified eutectic alloy, showing variation with temperature of stress-strain curves 11 p1667 A72-26935

Compression creep in ordered binary and ternary ordered bcc Ni alloys investigated by transmission electron microscopy 11 p1667 A72-26937

Low cycle fatigue deformation of lamellar eutectic and cast Ni-Sr alloys, noting microstructure and chemical composition effects on fracture energy 11 p1668 A72-26939

Dislocation bands in electrolytically hydrogen charged fcc Ni-Co alloy, describing band structure in terms of band axis and planes and Burgers vector 11 p1669 A72-26947

Electron microscope study of commercial Ni superalloys, discussing intermetallic compound and carbide precipitation hardening 12 p1827 A72-27137

Photometric determination of Mo in Ni based steels and alloys in molybdenum-unithiol complex form, noting temperature and aqueous solution pH effects 12 p1828 A72-27445

Electrochemical conditions for separation of gamma prime phase from heat resistant Ni alloys by electrolysis 12 p1828 A72-27446

Tensile plastic deformation effect on structural evolution of Ti-Ni alloy under anisothermal heat treatment 12 p1830 A72-27738

Chemical interaction effects on single crystal sapphire filament strength in Ni and Ni alloy matrices during heat treatment in inert atmosphere 13 p1974 A72-28661

Electron diffraction study of transformation twin rotations in Fe-Ni martensites, showing foil plane uncertainty effect with respect to image plane 13 p1975 A72-28666

High temperature steady state tensile creep behavior of Ni-W solid solutions, showing creep rate relation to stress and stacking fault energy 13 p1975 A72-28668

Mo influence on gamma prime phase precipitate in wrought Ni-base superalloys, considering solvus temperature, weight fraction and lattice parameters 13 p1975 A72-28669

Mo addition effect on Al and Ti diffusion from intermetallic compounds into Ni matrix, noting increased high temperature stress rupture life 13 p1975 A72-28670

Ni-Mn alloy phase transformation characteristics from neutron diffraction and small angle scattering studies, showing ordered nearly stoichiometric metastable phase for entire temperature range 13 p1976 A72-28903

Optical interband transition energies in Ni and Ni based alloys, measuring light conductivity at various spectral energies 13 p1976 A72-28904

Ni-Co alloys Nemst-Ettingshausen and Hall effects anomalous constants relationship determination from emf and electrical conductivity measurements 13 p1977 A72-28910

Fcc lattice ferronickel alloys para-process susceptibility anomalous increase explanation by phase transition thermodynamic theory 13 p1977 A72-28911

Phase composition, structure and strength properties of aluminumizing coatings on Ni-Al alloys, noting plasticity increase due to Ta addition 13 p1980 A72-29485

Ti-Ni alloy strengthening by titanium nickelide intermetallic epsilon phase formation control via heat treatment 13 p1981 A72-29829

Sintering of binary systems Co-Ni Co-Fe and Fe-Ni with infinite mutual solubility at different temperatures 13 p1966 A72-29954

Metal particle decomposition products composition in slags from smelted Cr, Ti, Ni and Zr alloys, using X ray microanalysis 14 p2112 A72-30157

Phase precipitated helicoidal dislocations and vacancy-type stacking faults in aged austenite Fe-Ni-Ti alloy, using electron microscope diffraction contrast analysis 14 p2112 A72-30162

Ni-Mo-W alloys hardness rating and corrosion resistance to sulfuric and hydrochloric acids, discussing dispersion hardening, quenching and aging treatments 14 p2114 A72-30272

Sn alloying effect on heat resistant Ni-Cr alloys plastic strain resistance and strength at room and high temperatures 14 p2114 A72-30274

Microstructure effects on thermomechanically processed dispersion strengthened Ni alloys yield strength at various temperatures 14 p2114 A72-30368

X ray and metallographic analyses of Ni-Mo, Ni-Ta, Ni-Nb, Ni-Zr and Ni-Ti alloys crystallized at high cooling rates, observing metastable phases 14 p2115 A72-30405

Martensitic transformation athermal kinetics and accompanied martensite morphology change in Fe-Ni and Fe-Ni-Cr alloys 14 p2115 A72-30407

Electron microscopic and X ray analyses of ordering kinetics in Ni-Mo alloys, noting lattice type change and complex domain structure formation causes 14 p2115 A72-30409

Nickel ion charge sign and magnitude estimation in Ni-Cr alloy by electron transfer method 14 p2116 A72-30415

Heterogeneous order-disorder transformation in Ni-Mo alloy at 78 K after annealing, using ion field emission microscopy 14 p2116 A72-30416

High temperature composite turbine blade materials, discussing service conditions and fiber/matrix selection, noting cast Ni and Mo based alloy fibers 14 p2125 A72-30533

Ni additions effect on Fe-Cr alloys oxidation behavior at high temperatures during varied exposure time periods, noting dichromium trioxide scale formation

14 p2118 A72-30545

Accelerated intergranular corrosion and grain boundary precipitation mechanisms in stainless steel Fe-Ni-Cr alloy, using Huey, acid and Strauss tests

14 p2118 A72-30548

Heat resistant Ni alloys grain boundaries precipitates as function of composition and heat treatment, noting effects on mechanical properties

14 p2118 A72-30589

Primary recrystallization in TD-nickel bars on sublight optical level identified by transmission electron microscopy examination of deformation and annealing substructures

14 p2119 A72-30601

Coarse grain transformation in TD-nickel bar subjected to deformation and annealing, noting abnormal growth caused by thermomechanical effects

14 p2119 A72-30602

Mo-Ni-Al system phase equilibria at 600 C from X ray and microstructural analysis, noting hardness dependence on composition

14 p2123 A72-30985

Nickel-trinickel alumide-trinickel niobiumide system polythermal cross sections from X ray and microstructural analysis, noting electrical resistivity increase with Al content

14 p2123 A72-30988

Ni-Al-Nb-Mo system phase diagram from X ray and microstructural analysis, noting solid solubility and dependence of hardness and electrical resistivity on components

14 p2123 A72-30989

Phase diagrams of Ni-C and Co-C systems with metastable equilibrium lines, investigating microstructure and microhardness of carbide eutectic

14 p2123 A72-30990

Alloying characteristics of heat resistant Ni base Ni-Cr-Al-Ti-Nb-Mo disk alloy

15 p2255 A72-31566

Dispersion hardening Ni base alloys for gas turbine blades, considering composition, structure, gamma phase and embrittlement avoidance

15 p2255 A72-31568

Dispersion hardening /aging/ effect on embrittlement of Ni base alloys in cold worked pipes during heat treatment

15 p2255 A72-31569

Mobile dislocation density and strain rate sensitivity of bcc Fe-Ni alloys from deformation onset to high temperature plateau

15 p2258 A72-32639

Aircraft gas turbine engine Ni base alloy disks and shafts thermomechanical treatment, considering yield strength and high and low cycle fatigue resistance

16 p2406 A72-33299

Mo and W simultaneous addition effects on Ni-Cr-Nb alloy properties, noting heat resistance increase and Nb solid solubility decrease

16 p2408 A72-33534

C concentration and temperature dependence of graphite wetting by liquid Ni and Co and melts of Ni-C and Co-C alloys, noting nonequilibrium effect

16 p2415 A72-33537

Ternary Ni-Cr-Al superalloys oxidation at 800-1300 C as function of composition, temperature, oxygen pressure and reaction time

16 p2410 A72-33811

Investigations aimed at eliminating the susceptibility to thermal cracking of the high corrosion resistant NiMo 30 nickel-molybdenum alloy /Remanit HB/

17 p2559 A72-34394

Susceptibility of the NiCr 15 Fe chromium-nickel alloy /Remanit 1675 SEW and Thermax 1675/ to intercrystalline corrosion

17 p2566 A72-34396

Study of certain features of the electronic structure of the ternary alloys Ni3/Mn, Fe/ and Ni3/Mn, Co/

17 p2568 A72-35518

The effects of environment on the elevated temperature fatigue behavior of nickel-base superalloy single crystals.

18 p2700 A72-36587

Grain-boundary relaxations in an Fe-Ni-Cr alloy.

18 p2700 A72-36588

Composition dependence of density in NiTi and CoTi.

18 p2701 A72-36592

Diffusion in the nickel-rich, Ni-Al solid solution at 1260 C.

18 p2701 A72-36593

Behavior of Fe-21.6 Ni, Fe-18.4 Ni-15.0 Co, Fe-16.8 Ni-5.0 Mo subjected to cumulative thermal cycling at 300 C/hr

18 p2701 A72-36701

Hot corrosion of experimental aluminum-coated cobalt-base alloys.

18 p2702 A72-36797

Self-diffusion of cobalt in the ternary system Co-Ni-Fe

19 p2814 A72-37416

The effect of Mo, Al, and C on phase transformations in Ni alloys

19 p2814 A72-37417

Some problems concerning microplastic deformation and isothermal transformation of Fe-Ni-C alloy. III - Effect of aging in the temperature range from 203 to 304 K on microplastic deformation at 77 K

19 p2814 A72-37419

Some problems concerning microplastic deformation and isothermal transformation of Fe-Ni-C alloy. IV - Effect of transformation plasticity on microplastic deformation at 77 K

19 p2815 A72-37420

Comparison of experimental and theoretical thermal fatigue lives for five nickel-base alloys.

19 p2815 A72-37639

Effect of molybdenum on the properties of TiC-Ni cermet hard alloys

19 p2819 A72-38283

Relations between mechanical properties and microstructures in TiC-Mo2C-Ni alloy.

19 p2821 A72-38375

Phase composition and isothermal cross section diagrams of Cr-Ni-B system at 800 C, using X ray and microstructural analyses

19 p2822 A72-38678

Self-diffusion of cobalt in coarse grained polycrystalline Ni-Co alloys at low temperature

20 p2935 A72-39016

The mechanism of oxidation of Ni-Cr-Al alloys.

20 p2937 A72-39214

The internal oxidation of Ni-Cr-Al alloys.

20 p2937 A72-39215

Formation of voids and dislocation loops in near-stoichiometric NiAl by aging at 700 to 900 C, and some effects on alloy properties.

20 p2937 A72-39288

The effect of elastic anisotropy on dislocations in Ni3Fe.

20 p2937 A72-39293

The effect of plastic deformation on the martensite-to-austenite transition in an iron-nickel alloy.

20 p2938 A72-39298

Tensile and compressive stress coarsening effects on coherent gamma prime precipitate yield strength of Ni-base superalloy single crystals

20 p2938 A72-39299

Decomposition, solubility and coherent phase stability of modulated structure Co-Ni-Ti system at high nucleation temperatures

20 p2939 A72-39312

Investigation of solid solution decay in cobalt-titanium, iron-cobalt-titanium-aluminum and iron-nickel-titanium-aluminum alloys

20 p2939 A72-39314

Interdiffusion in nickel-molybdenum and palladium-molybdenum systems

20 p2939 A72-39315

Powder-metallurgical production of dispersion-hardened nickel and cobalt alloys

20 p2929 A72-39454

Deformation and failure characteristics of joints in a Ni-Al system under the action of high thermal pulses

20 p2942 A72-39822

Domain structures in metal crystals, investigating ordering in Ni-Mo alloys

20 p2962 A72-39997

Fe-Ni sheet with austenitic cube texture by rolling and annealing, investigating plastic deformation during martensitic transformation

21 p3065 A72-40090

Some results of an investigation of the tungsten-nickel-boron ternary system

21 p3066 A72-40393

Ni alloys weld testing for hot cracking resistance, describing vareststraint test method

21 p3060 A72-40848

A comparison of the effect of inward and outward diffusion aluminate coatings on the fatigue behavior of nickel-base superalloys.

21 p3067 A72-40916

Contribution of the invar anomaly and the elinvar effect to the formation of the thermal stability of the modulus of elasticity of iron-nickel invars

21 p3068 A72-40952

Calorimetric investigation of atom ordering effects in a Ni2Cr alloy

21 p3068 A72-40958

Changes in the structure of nickel-beryllium alloys during deformation, recrystallization, and aging

21 p3068 A72-40959

Diffusion of cobalt in Ni-Co alloys at temperatures up to 1000 C

21 p3070 A72-41645

Martensite formation temperature decrease and grain size reduction caused by martensite crystals interaction with barriers in Fe alloy containing austenite beta phase particles

21 p3070 A72-41679

Temperature dependence of the thermal electromotive force and of the Nernst-Ettingshausen effect in nickel-cobalt alloys

22 p3187 A72-41855

Study of the properties of porous materials of nickel-molybdenum and nickel-chromium-molybdenum alloys

22 p3188 A72-42193

Kinetic aspects of plastic strain induced martensite in polycrystalline Fe-Ni-C alloy from tensile tests on austenitic specimens

22 p3189 A72-42437

Thermoelastic martensite caused elastic vibration damping in Cu-Al-Ni alloy, observing shape memory effect

22 p3190 A72-42442

Alloys of thorium with certain transition metals. VI - The constitution of thorium-nickel alloys containing 50-96% nickel.

22 p3190 A72-42769

Influence of temperature on the mechanical properties of metallic compounds

22 p3191 A72-42804

Magnetic properties and texture of a thin strip of nickel-iron-molybdenum alloys

22 p3192 A72-43012

Influence of alloying elements on ordering in alloys of the nickel-molybdenum system

22 p3192 A72-43016

Carbide phases in nickel-based heat-resistant alloys

22 p3192 A72-43018

Grain size and temperature effects on Cr and Al diffusion coefficients and mobility in Ni-20Cr and thoria dispersed NiCr alloys from measurement at 1038-1200 C

22 p3193 A72-43028

Aluminized thoria dispersed NiCr and Ni-20Cr alloys with protective alumina scales from pack diffusion, observing oxidation resistance by isothermal and cyclic oxidation tests

22 p3193 A72-43030

Constitution of the Ni-Cr-Fe system from 0 to 40 pct Fe including some effects of Ti, Al, Si, and Nb.

22 p3194 A72-43038

Composite Al- and Ni-base alloys strengthened by B and W/Mo fibers respectively for reduced weight wing spars and high temperature applications

22 p3197 A72-43139

Thermoelectric properties of alloys of the gallium-nickel system under standard conditions

22 p3215 A72-43191

Titanium carbonitrides alloying with Ni in nitrogen atmosphere, noting N concentration effect on cermet wear resistance

23 p3298 A72-43281

Magnetic properties of the powders of highly dispersed iron-cobalt-nickel alloys

23 p3299 A72-43288

Flow-stress recovery of nickel-aluminum alloys.

23 p3299 A72-43563

Recovery of high temperature deformed Ni-Al alloys.

23 p3300 A72-43564

Investigation of the structural state of the InNDK40T7 high-coercivity alloy

23 p3300 A72-43594

Mechanical properties of heat and corrosion resistant nonmagnetic Ni-Cr-Nb spring alloys with W addition tested in aggressive and nitric acid base media

23 p3300 A72-43595

Desulfurization of cobalt, nickel, and their eutectic carbon alloys during noncrucible zone melting in vacuum

23 p3300 A72-43647

Phase diagrams from X ray analysis of rapidly crystallized Ni-Sn alloys, noting crystal lattices and phase transformation

23 p3300 A72-43648

Heat resistant Ni-base composite stiffened with W wires, investigating interaction between alloy and fibers from metallographic and X ray diffraction microscopy data

23 p3301 A72-43740

Strain hardening effect of Ni, Mn and Mo in Cr steel after high temperature annealing

23 p3301 A72-43742

Energy dissipation in metals during high-frequency fatigue tests. II

23 p3302 A72-43964

Investigation of the state of the structure of turbine-disk materials after operation

23 p3302 A72-43965

Influence of the nature of the particle distribution of the hardening phase in powders on the thermal stability of dispersion-strengthened nickel

23 p3302 A72-44011

Estimation of creep and fatigue behaviour under cyclic loading.

24 p3456 A72-44793

The creep of dispersion-strengthened Ni-Co alloys.

24 p3413 A72-44923

A study of the hardening of the subspinoidal alloy Fe-Ni-Al

24 p3415 A72-45395

Growth kinetics of dispersed thoria in Ni and Ni-Cr alloys.

24 p3415 A72-45480

NICKEL CADMIUM BATTERIES

Charging methods for Ni-Cd batteries used in satellites, noting life increase and weight reduction
01 p0007 A72-11054
Electrical power subsystem for Initial Defense Communications Satellite Program/Augmentation, noting solar cells for power conversion and Ni-Cd batteries for energy storage
01 p0008 A72-11066
A comparison of sealed and vented Ni/Cd battery characteristics.
17 p2498 A72-35567
Thermal conductivity measurements of nickel-cadmium aerospace cells. II - Component conductivities.
21 p2997 A72-40841

NICKEL COATINGS

Cermet coating with enhanced microhardness by Ni electroplating with fine corundum particles, presenting optimum electrolytes
09 p1318 A72-22527
Deposition of Ni-B coatings with specified electrical resistance onto fiberglass cloth reinforced plastics
09 p1318 A72-22528
Developments in vacuum braze coating of aero-engine nozzle guide vanes.
17 p2559 A72-34937
Structure and properties of nickel-phosphorus coatings as a function of the temperature and annealing time
20 p2929 A72-39583
Magnetostriction of porous nickel films
23 p3299 A72-43340
Thermal diffusion annealing improved Ni-B composite electrolytic coatings with uniform B distribution over bulk matrix
23 p3303 A72-44012

NICKEL COMPOUNDS

NT NICKEL OXIDES
X ray and Mossbauer spectral analyses of thermomagnetically treated nickel ferrite samples containing Co, investigating ordering mechanism
13 p2020 A72-28490
Mossbauer and X ray structural analysis of nickel ferrite-chromite magnetic moments, comparing with theoretical data
14 p2141 A72-30171
Photocolorimetric determination of boron in nickel and titanium borides via Magnezone I in alkaline medium, determining solution pH, reaction time, light absorption, etc
18 p2655 A72-36099
Certain physical properties of the borides of cobalt and nickel
21 p3068 A72-40953
Iron-nickel-molybdenum carbonyl powders
23 p3298 A72-43276
Complex compounds of cobalt and nickel with hydrazine
23 p3262 A72-44165

NICKEL OXIDES

Antiferromagnetic dispersion, absorption and light scattering in NiO and other face centred cubic crystals.
20 p2960 A72-39458

NICKEL PLATE

Ni plating by chemical reduction method in boron hydride solution, deducing stabilizing effect of sulfur compounds and Pb salts from catalyst poisoning theory
11 p1641 A72-26265

NICKEL STEELS

Nondestructive determination of temperature dependence of elastic moduli of Al alloy and Ni and stainless steels by resonant frequency method
01 p0084 A72-10518
Maraging and Ni steels stress corrosion cracking rates dependence on stress intensity factor, discussing measurements in salt and distilled water
01 p0086 A72-10995
Ni maraging steel microstructure effects on strength and fracture toughness
01 p0087 A72-11024
Stress corrosion cracking of Cr-Ni austenitic stainless steel with Mo and Cu additions in boiling sulfuric medium
01 p0089 A72-11181
Sintering and heat treatment effects on mechanical properties of atomized and mixed powders of Ni-Mo steel
02 p0234 A72-11462
Press and sinter production of Ni maraging steel powder metallurgy parts
02 p0234 A72-11464
Temperature-time dependent torsional strength and fracture failure of Cr-Ni steel microalloyed with La and Ce as function of grain boundaries
02 p0243 A72-12010
Temperature dependence of low temperature endurance of Cr-Ni steels in bending fatigue tests
03 p0371 A72-13463
Stepwise thermomechanical treatment effect on improved cyclic fatigue strength of Ni-Cr sheet steel with tension and rolling deformations
03 p0372 A72-13598

Hydrogen charging of iron-chrome-nickel austenitic stainless alloys, investigating crack initiation in Inconel 600
03 p0373 A72-13600

Alloy additions and heat treatment effects on mechanical properties and weldability of quenched and aged high strength Ni steels
03 p0378 A72-14173

Potential change under pitting corrosion and repassivation on Cr-Ni steels alloyed with V, Si, Mo and Re
04 p0535 A72-15730

Hardened and tempered Ni-Cr-Mo steel, testing rest periods caused fatigue life increase in terms of cycles to failure
06 p0895 A72-17802

Boron addition effects on scaling resistance of Ni-Cr steel at high temperatures
07 p1012 A72-19738

Long-time isothermal temper embrittlement in Ni-Cr-Mo-V steels, noting tensile ductility decrease and intergranular fracture
07 p1015 A72-19932

Adiabatic reversion of Ni martensitic steel to austenite under shear in orthogonal cutting
07 p0996 A72-19934

Aging effect on brittleness and hardening of Fe-Ni-Mn alloy at various temperatures
07 p1016 A72-19939

Heat treatment of martensitically aging steels with Co, Ni and Mo, considering hardening effects and optimal conditions for high mechanical properties
07 p1020 A72-20414

Hydrogen embrittlement of stable austenitic Ni-Cu steel, observing intergranular decohesion in fractured specimens by microfractography, electron microscopy and X ray crystallography
07 p1021 A72-20485

Carbon determination in Cr-Ni steels and Ni alloys by layerwise spectral analysis, using electrode gap with He
07 p0993 A72-20609

Explosive loading effect on Cr-Ni stainless steel structure with electron microscope study of gamma, alpha and epsilon phases
08 p1187 A72-21780

German monograph on fracture formation and behavior in Ni maraging steel under repeated stress alternations, considering Al and Ti effects on steel strength
08 p1190 A72-22172

Quenched and tempered Ni carbon steel retained austenite transformation and crack observation by X ray diffraction under low cycle fatigue testing
09 p1329 A72-23149

Ni carbon steel microstructure changes in retained austenite phase and crack observation during low cycle fatigue testing
09 p1330 A72-23150

Prototype fine wire feed unit and microplasma welding torch and equipment for butt welding of Ni maraging steel, testing welds mechanically
09 p1321 A72-23636

Fe-Ni-C alloy mixed austeno-martensitic microstructure embrittlement, investigating mechanical properties after thermomechanical treatment
10 p1495 A72-24087

Magnetic properties, electrical resistivity and hardness of vacuum melted Ni-Fe-Ta alloys
11 p1655 A72-25512

Transitional ferrite phase formation in Fe-Cr-Ni alloy evidenced on electron micrographs and diffraction patterns
11 p1657 A72-25760

Coherent precipitate structure in Fe-Ni-Co-Mo maraging alloys, using electron microscopy
11 p1668 A72-26940

Photometric determination of Mo in Ni based steels and alloys in molybdenum-unithiol complex form, noting temperature and aqueous solution pH effects
12 p1828 A72-27445

Austenite grain growth characteristics of heat treated Ni maraging steel
13 p1976 A72-28673

Austenite deformation effect on thermal stability and hardness of Ni steels at various C and Ni concentrations
13 p1977 A72-29019

Ni-Cr-Mo stainless maraging steel, investigating yield strength, toughness, corrosion resistance and weldability
14 p2113 A72-30270

Ni, Si and Mn alloying effect on structural transformations, phase composition and mechanical properties of cast Cr-Ni steels
14 p2114 A72-30273

Co, Mo, Ti and Al alloying effects on aging and hardening processes in Ni steel from hardness, thermal emf and electrical resistance measurements
14 p2115 A72-30408

Cr-containing Fe-alloy and Ni steels, investigating thermal cycling effects on thermal resistance by factorial program
14 p2118 A72-30546

Transformation induced plasticity /trip/ Ni-C steel strengthening by thermal cycling between martensite and reverted austenite
16 p2399 A72-33815

Incoloy low cycle fatigue tests at high temperatures and different strain rates, discussing fatigue life at 10 and 60 min hold times
16 p2410 A72-33820

Low-temperature properties of nitrogen-alloyed austenitic chromium-nickel /molybdenum/ steels and chromium-manganese-nickel steels and their applicability as low-temperature ductile steels
17 p2566 A72-34395

Contribution to the study of the stabilization of corrosion-resistant chromium-nickel austenitic steels
18 p2702 A72-37014

Fe-Ni-C alloys internal damping, martensitic structure and mechanical properties after quenching and tempering, discussing Mo and Cr additions
19 p2806 A72-37418

Effect of twins produced by annealing on high-temperature failure of chromium-nickel-molybdenum steel
20 p2939 A72-39316

Formation of deformation martensite in Fe-Ni-C alloys which do not undergo transformation on cooling.
21 p3066 A72-40270

Deformation-induced martensitic transformation in isothermal and athermal Fe-Ni-C alloys.
21 p3066 A72-40272

Nickel-titanium intermetallic phase effect on recrystallization of dispersion hardening high melting point steel during furnace and induction heating
21 p3071 A72-41789

German monograph - Determination of the diffusion coefficient of hydrogen in the binary iron-nickel system at 25 and 58 C.
22 p3194 A72-43057

German monograph - The causes of hot crack formation in welded joints of austenitic steel with 16 percent chromium and 16 percent nickel.
22 p3195 A72-43079

Investigation of the thermal fatigue of Kh18NiOT steel under complex stress-strain state conditions
23 p3301 A72-43956

Influence of the chemical composition of Kh25Ni16G7AR steel on its heat resistance
23 p3303 A72-44098

Corrosion and electrochemical properties of Kh15Ni5D2T and Kh15Ni4AM3 oxidized steels
23 p3303 A72-44099

Temperature dependence of low temperature endurance of Cr-Ni steels in bending fatigue tests
24 p3413 A72-44938

Measurement of stacking fault energy in CrMnNi austenitic steel by the method of extended nodes
24 p3415 A72-45397

NICOTINE

Separation of central effects of CO₂ and nicotine on ventilation and blood pressure.
21 p3001 A72-40918

NICOTINIC ACID

Effect of nicotinic acid on myocardial metabolism in man at rest and during exercise.
17 p2506 A72-35968

NIGHT

Nighttime ground surface temperature prediction by net flux radiometer
05 p0684 A72-16792

Energy spectra of positive ion bursts on lunar night side from Apollo 12 and 14 Alsep suprathermal ion detectors data
06 p0872 A72-17462

NIGHT AIRGLOW

U AIRGLOW

U NIGHT SKY

NIGHT E LAYER

U E REGION

U NIGHT SKY

NIGHT F LAYER

U F REGION

U NIGHT SKY

NIGHT SKY

Tweaks contribution to atmospheric radio noise background, discussing nighttime ionospheric source information
01 p0056 A72-10444

Daytime and nighttime sporadic F layer regularities correlation with other ionospheric phenomena based on vertical sounding data
01 p0059 A72-10611

Nighttime sodium layer observation by tuned laser beam resonance scattering technique, measuring seasonal variation in Na abundance and height distribution
01 p0063 A72-10915

Equilibrium concentrations of negative ions in nighttime D region, comparing computations to mass spectrometric measurements
01 p0063 A72-10917

Nighttime ionosphere dynamical behavior, discussing motions effect on OI emission intensity
01 p0063 A72-10919

Lower ionospheric nighttime absorption as ionization processes indicator, discussing relationship to geomagnetic activity

02 p0216 A72-11921

Night sky upper ionospheric electron concentration perturbations during magnetic storm, noting latitudinal distribution

02 p0217 A72-11940

Nighttime ionospheric radio wave propagation, determining geomagnetic latitude variations effects on absorption and reflection

02 p0218 A72-11944

Quadrantid meteoritic shower upper atmosphere contamination effects on twilight and night sky brightness

02 p0283 A72-12467

Nighttime radio satellite scintillation from ionospheric irregularities heights associated with magnetic activity at subauroral latitudes

02 p0221 A72-12468

Ray path and absorption calculation for mf and hf radio wave oblique propagation through model ionosphere in nighttime, noting E region ionization role

02 p0184 A72-12875

Thumba night time equatorial E region electron density profiles from rocket-borne Langmuir probe experiments

04 p0517 A72-14957

Van Rhijn height and intensity variations of 5577 A emission in night E layer airglow

04 p0518 A72-14960

Nighttime radio absorption from lower ionospheric ionization by Sco X-1 and Tau X-1 X rays, using full wave admittance method

04 p0519 A72-15161

Large aperture ratio wide field VCN-UV camera exploration of night sky, presenting isophotes of zodiacal light and Milky Way

04 p0525 A72-15685

Nighttime polar atmospheric structure and temperature variations due to gas kinetic and electron energy changes

05 p0656 A72-16240

Terrestrial atmospheric effects on quasar red shift measurements, considering night sky emission lines and atmospheric window size limits

05 p0723 A72-17159

Nighttime plasmopause and thermal ion plasma structures relationship to micropulsations, considering excitation in post storm recovery and diurnal plasma bulge regions

06 p0804 A72-17453

Quantum efficiency at 6300 and 6364 A of recombination mechanism in nighttime F layer, obtaining ionospheric electron density profiles

07 p0974 A72-18893

Nighttime ionospheric dynamo current modulation due to galactic X ray ionization, observing diurnal sidereal time variation in geomagnetic field

07 p1056 A72-18898

Supersonic hydrogen plasma flow in collapsing post sunset upper ionosphere, noting nonvanishing temperature gradient effect on critical point location

07 p0974 A72-18899

Forbush decreases in galactic cosmic ray flux and associated vlf nighttime ionospheric propagation phenomena

07 p1056 A72-18900

F 2 layer diffuse reflections and critical frequencies increase on ionogram recordings during Northern Hemisphere nighttime magnetic storm of 2 December 1967, noting cosmic radio emission decrease

08 p1154 A72-20738

Nighttime and sunrise period ionospheric electron density profiles with respect to time after sunset and solar zenith angle

08 p1226 A72-21102

Neutral wind influence on lower ionosphere nighttime electron and NO ion density profiles

08 p1157 A72-21112

Ionospheric electron density nighttime changes as function of local time, height and latitude during geomagnetic storms

08 p1157 A72-21113

Nighttime D region ionization production by cosmic X rays from various celestial sources and galactic background

09 p1375 A72-22359

Supersonic and subsonic measurements of mesospheric ionization at night, using Arcas rocket parachute borne nose-tip and blunt probes

09 p1296 A72-22362

Laboratory ionization chamber measurement of ion chemistry and production rates from partial simulation of disturbed nighttime ionosphere at 300 K

09 p1275 A72-22368

Nocturnal F region electrodynamic drift at conjugate point sunrise time, discussing dynamo electrostatic field normal component change as cause of ionospheric vertical movement

09 p1297 A72-22576

Star sky simulation in testing and training stands, using spherical mirror, collimator and imbedded spheres

09 p1310 A72-22949

Inferred perturbation effects of Arecibo large nighttime gravity wave on neutral atmosphere velocity and temperature

09 p1300 A72-23021

Equatorial Faraday rotation measurements for night ionospheric electron density peak structures during equinoctial months, using ATSC geostationary satellite radiation

10 p1476 A72-24958

Nighttime E region electron density variation effects on MF and HF radio wave propagation, discussing ionospheric absorption detection experiments

11 p1593 A72-26070

Twilight and nighttime ionospheric temperatures from oxygen 6300 and 5577 A spectral line profiles obtained with Fabry-Perot interferometers

11 p1625 A72-26406

Daytime and nighttime electron temperatures from topside resonances, using oblique echo theory

11 p1625 A72-26409

F region parameters relationship to night sky optical emission, considering electron distribution produced by dissociative recombination

12 p1802 A72-27308

Lower ionospheric nighttime absorption as ionization processes indicator, discussing relationship to geomagnetic activity

13 p1948 A72-29233

Night sky upper ionospheric electron concentration perturbations during magnetic storm, noting latitudinal distribution

13 p1949 A72-29252

Nighttime ionospheric radio wave propagation, determining geomagnetic latitude variations effects on absorption and reflection

13 p1949 A72-29256

HF radio signal reception behavior near maximum usable frequency during evening and at midnight, noting SNR

14 p2085 A72-30656

Midlatitude nighttime sporadic E layer relationship to geomagnetic field, considering wind shear theory

15 p2224 A72-31798

Nighttime F region vertical velocity estimation, using electron density profiles vs true height

15 p2231 A72-32267

Magnetospheric convection induced longitudinal or Fermi acceleration role in nighttime auroral particle flux production mechanism

17 p2601 A72-35592

Rocket radiometers measurement of oxygen IR atmospheric system altitude profile at night, noting auroral enhancement possibility

22 p3170 A72-42365

Rocket measurement after sunset for altitude distribution of 1.27 micron band nightglow emission from diatomic oxygen molecules

22 p3172 A72-42435

Observations of the airglow continuum.

22 p3174 A72-42888

Outer magnetosphere near midnight at quiet and disturbed times.

23 p3341 A72-44513

NIGHT VISION

Color defective vision performance predictions during day and night tests of aviation color signal light discrimination

06 p0767 A72-17871

Landolt ring radioactive plague night vision tester comparison with electoretinography and Goldmann-Weekers dark adaptometry apparatus from special tests of night blind patients

12 p1777 A72-28332

Human vision sensitivity to covert IR illuminators for image intensification during night observation

15 p2189 A72-32046

Lightweight man-portable uncooled semiconductor laser illuminator design for field use in night vision applications

15 p2248 A72-32047

Low level night operations of Army aircraft. [AHS PREPRINT 631]

17 p2488 A72-34481

Monocular and binocular magnifiers for night vision equipment.

20 p2921 A72-39030

Night vision performance measure based on object recognition experiments with optical instruments, noting improvement with image intensifier

21 p3007 A72-40741

IR night vision instruments range calculation, taking into account atmospheric optics and electro-optical image converter characteristics

21 p3059 A72-41816

NIGHTGLOW

Nighttime airglow layer effect application to autonomous navigation and orientation of piloted space vehicles

02 p0256 A72-12289

F2 layer 6300 A night airglow emission photometric data on 31 January 1968, showing large electron content and movements

04 p0517 A72-14958

Lower ionosphere 5577 and 5893 A and hydroxyl band emissions interrelationships, observing atomic O and vertical eddy transport effects

04 p0518 A72-14961

Oxygen Herzberg bands excitation in nightglow, obtaining quenching reaction rate coefficients

07 p0976 A72-19579

Earth horizons nighttime, twilight and daytime visual observations from manned Soyuz spacecraft, discussing upper atmosphere emission layer structure and aureole development

08 p1158 A72-21148

Nightglow evidence of precipitating energetic electrons in midlatitude nighttime D region based on intensity determination from satellite and rocket data

09 p1375 A72-22358

Dynamic model of night time hydroxyl rotational temperature variations from airborne and ground measurements

09 p1298 A72-22587

Nighttime airglow layer effect application to autonomous navigation and orientation of piloted space vehicles

10 p1508 A72-23758

Hydroxyl vibration levels excitation rates calculation from transition probabilities and band sequence nightglow intensity measurements

13 p1954 A72-29816

Seasonal features of nocturnal 6300 A emission variation and decay coefficient in nightglow related to recombination coefficient for F layer ionization

14 p2097 A72-30132

Nightglow small scale intensity fluctuations of 5577 A atomic oxygen emission due to turbulent transport of horizontal wind observed with photometers

14 p2098 A72-30143

Nightglow ground based spectrophotometric observations of hydroxyl emission intensity and rotational temperature variations related with solar and geophysical activity

14 p2098 A72-30144

Sounding rocket observation for emission height of night airglow continuum near 6050 A, using photoelectric photometers

15 p2231 A72-32329

Semidiurnal variation in O I 5577 A nightglow due to lunar tidal dynamics effect in E and F regions

16 p2383 A72-32971

Observation of the intensity ratio between /5,1/ and /9,4/ bands of OH emission in the night airglow.

17 p2546 A72-35059

Atomic oxygen green line emission in nightglow from OGO-F photometer observations, calculating tropical F region electron density spatial distribution

17 p2549 A72-35604

Nocturnal and semiannual variations of the intensity of 5577 A emission of atomic oxygen.

19 p2789 A72-37511

Nightglow observations and ionospheric soundings for red oxygen line intensity relation to F region parameters

19 p2792 A72-38638

Earth horizons nighttime, twilight and daytime visual observations from manned Soyuz spacecraft, discussing upper atmosphere emission layer structure and aureole development

20 p2916 A72-39253

Rocket measurement after sunset for altitude distribution of 1.27 micron band nightglow emission from diatomic oxygen molecules

22 p3172 A72-42435

NIMBUS SATELLITES

Nimbus 3 and 4 satellite technological and meteorological performance, discussing atmospheric temperature humidity and ozone vertical sounding for numerical weather forecasting models

01 p0130 A72-10955

Nimbus satellite image dissector camera system for continuous meteorological scanning, noting special suitability for cloud and ice features discrimination from brightness changes

08 p1171 A72-21967

CAT probabilities relationship to temperature radiance gradients determined by IR spectrometers on-board Nimbus satellites

23 p3310 A72-43614

NIMBUS 2 SATELLITE

Sea surface temperature determination on Nimbus 2 satellite, using three channels in medium resolution IR radiometer

15 p2224 A72-31674

NIMBUS 3 SATELLITE

Autumnal stratospheric temperature variations in northern and southern hemispheres from Nimbus 3 IR spectrometer

11 p1680 A72-25761

Stepwise multiple regression techniques for Nimbus 3 IR interferometer-spectrometer /IRIS/ data inversion, obtaining radiation predictors of meteorological parameters

16 p2418 A72-33666

NIMBUS 4 SATELLITE

Nimbus 4 vertical atmospheric sounding techniques, obtaining temperature, water vapor and ozone profiles with Michelson IR interferometer
 01 p0095 A72-10957

Total ozone estimation by interpolation from Nimbus 4 satellite data on backscattered UV earth radiance attenuation
 01 p0096 A72-11285

Nimbus 4 satellite selective chopper IR radiometer atmospheric temperature measurements from earth surface to 50 km altitude, describing instrument design, operation and performance
 07 p1029 A72-19097

Nimbus 4 satellite-borne selective chopper radiometer design characteristics, obtaining maps of stratospheric warmings in both hemispheres
 08 p1173 A72-22168

Regional geologic features of Alaska and Western Canada from Nimbus 4 satellite image dissection camera system /IDCS/ photographs
 10 p1477 A72-25109

NIMONIC ALLOYS

Nimonic 75 sliding pin and rotating disk frictional force, wear rate and surface temperature
 06 p0830 A72-18156

X ray diffraction patterns of aging nimonic alloys, noting effects of atomic volume difference between precipitation phase and matrix
 13 p1976 A72-28766

X ray diffraction patterns of aging nimonic alloys, noting effects of atomic volume difference between precipitation phase and matrix
 21 p3065 A72-40267

Dilatometric studies of volume compression effect during aging of nimonic alloy showing linear dependence of matrix lattice constant on gamma prime phase
 21 p3068 A72-40957

NIMPHE [ENGINE]

U HYDRAZINE ENGINES

NIOBATES

Tunable optical and IR radiation source by rotating lithium niobate crystal in front of Q switched ruby laser
 04 p0550 A72-15599

Optical holographic storage in lithium niobate single crystals, noting erasability and rewritability
 07 p0981 A72-18890

Temperature dependence of destruction threshold of lithium niobate surface under laser irradiation, noting ferroelectric properties effects
 12 p1853 A72-27069

Discrete ten stage system for laser beam deflection based on electro-optical effect in lithium niobate crystals
 12 p1808 A72-27595

Longitudinal electro-optical effect in oblique cut lithium niobate crystal with minimum half wave voltage between incident beam and optical axis angle
 12 p1855 A72-27603

He-Ne laser light modulation with lithium niobate crystals, noting lower light power and modulator volume requirements, better mechanical properties and lower thermal sensitivity
 13 p1969 A72-29632

Undoped lithium niobate for holographic storage applications, reviewing physics and recording performance
 15 p2239 A72-32353

Transition metal doped lithium niobate for holographic storage, measuring recording sensitivity, maximum diffraction efficiency and erase behavior
 15 p2239 A72-32354

He-Ne laser radiation modulator at 1.5 GHz using X and Z cut lithium niobate crystals in toroidal microwave cavity
 18 p2697 A72-36113

Fracture of nonlinear KDP and LiNbO3 crystals by ruby laser radiation
 19 p2812 A72-38537

Electro-optic KTN /potassium tantalate niobate/ crystals for modulators, deflectors, phase shifters and polarization rotator devices
 20 p2922 A72-39047

Use of oblique-cut lithium niobate in optical-beam control systems.
 24 p3411 A72-45606

Profile of a parametric luminescence line emitted by lithium niobate crystals.
 24 p3432 A72-45614

Temperature and angular widths of the phase-matching curve of a lithium niobate crystal.
 24 p3432 A72-45615

Temperature dependence of destruction threshold of lithium niobate surface under laser irradiation, noting ferroelectric properties effects
 24 p3432 A72-45722

NIONIUM

Hydrogen diffusion kinetics in Nb under various temperatures during gas-metal absorption experiments, observing room temperature hardness profile
 01 p0087 A72-11026

Niobium anomalous oxidation below 600 C, noting suboxide formation between solid solutions and heat resistance reduction
 02 p0243 A72-12214

Oxygen determination in Nb with reduction fusion, determining metallic bath temperature, nature and composition effects on extraction efficiency
 03 p0374 A72-13674

Oxygen and/or nitrogen interstitial solute pick-up effects on yield stress during Nb annealing, discussing Hall-Petch plot parameter values
 05 p0676 A72-16730

Ni-Mo-N system alpha-solid solution thermodynamic analysis, deriving reaction enthalpies/entropies, free energy and interaction coefficients
 05 p0676 A72-16795

Flux lines interaction with dislocations in twisted superconducting niobium single crystals, measuring flux gradient and dislocation arrangement
 06 p0830 A72-18055

Bcc Mo and Nb after cold working observing internal friction relaxation peaks as function of stress, strain, temperature and strain rate
 06 p0831 A72-18296

V, Nb and Ta deoxidizing capability in liquid Fe from oxide phase formation identification by electronographic and X ray analyses
 07 p1011 A72-19545

Steady state high temperature niobium creep in torsion under rarefied oxygen infiltration conditions, discussing surface interactions kinetics
 07 p1012 A72-19679

Reflection electron diffraction and ellipsometric studies of oxidation of niobium crystal surface, showing oxygen absorption in lattice and oxide film formation stages
 07 p1017 A72-19944

Absorbed oxygen concentration variation with depth in Nb during oxidation
 07 p1022 A72-20555

Ta, Nb and La superconductivity, investigating surface contamination effects on electron tunneling characteristics
 09 p1367 A72-22554

Analytic determination of Nb low content in highly alloyed Ni base alloys
 09 p1276 A72-22637

Carburization kinetics of Nb in acetylene or methane at high temperatures and low pressure
 09 p1319 A72-22985

Various restrain dislocation distributions effect on mechanical twinning behavior in purified Nb single crystals
 10 p1497 A72-24824

Bending stress in oxygen presaturated Nb during oxidation, cooling, dissolution and annealing, using thin film model
 11 p1658 A72-25853

Tensile stress effect on formation of suboxide needles, microcracks and oxide wedges during low temperature Nb oxidation
 11 p1658 A72-25854

Carbon solubility in Nb at 1500-2150 C, determining saturation concentrations from electrical resistivity vs reaction time curves
 11 p1662 A72-26740

Superconductive behavior of cold-worked sintered Nb wires, examining effects of aluminum oxide addition on residual resistivity, magnetization behavior and critical current density
 11 p1662 A72-26742

High temperature dislocation rearrangement in lightly cold deformed Nb as function of time and temperature, using etch pit technique for evaluation
 12 p1827 A72-27136

Niobium diffusion into copper as function of time and temperature, obtaining rates by electrical resistance measurements
 12 p1828 A72-27448

Nb superconducting resonant cavities application to linear accelerator and RF particle separator structures in GHz region for wall energy loss reduction
 13 p1922 A72-29348

Low and medium strain rates and temperature effects on bcc structure polycrystalline Nd and Mo, determining mechanical properties of yield and flow
 14 p2114 A72-30367

Hydrogen adsorption and absorption by niobium, investigating sticking probability and heat of solution
 15 p2276 A72-31864

Decarburization kinetics of Nb wires with dissolved carbon in high temperature oxygen flow, monitoring electrical resistivity and CO partial pressure
 15 p2244 A72-32113

Anelastic damping of cold worked Nb sheet as function of vibration frequency, temperature, rolling rate and oxygen content
 15 p2258 A72-32638

Oxygen and nitrogen atoms effect on defects recovery in cold rolled Nb during annealing
 16 p2406 A72-33208

Fcc in thin films and bcc in thick vacuum condensates deposited from Nb molecular beams obtained by evaporation and condensation in mass spectrometer
 16 p2407 A72-33528

Computed performance data for a thermionic converter having a CI-CVD-W emitter and a polycrystalline Nb collector.
 17 p2521 A72-34613

Grain-size dependence of Snoek peaks in niobium.
 17 p2566 A72-34671

The effects of composition and annealing conditions on the stability of columbium /niobium/-treated low-carbon steels.
 20 p2938 A72-39301

Vapor deposition effects on high density Mo, W and Nb obtained by carbonyls pyrolysis or chlorides and fluorides reduction
 20 p2941 A72-39821

Anomalous line broadening in the low temperature X-ray diffraction pattern of niobium.
 20 p2942 A72-39989

Chondrite and achondrite Nb abundance from spark source mass spectroscopic analysis
 21 p3104 A72-40492

Nb heat pipe design with Na coolant for high temperature operation, discussing slopes effect on transmitted power
 21 p3129 A72-41051

Microcracks observed in hydrogenated niobium foil.
 21 p3069 A72-41300

Hydrogen cold work peak measurements in Nb, showing hydrogen atoms-dislocations binding energy extent and temperature effects on internal friction
 22 p3189 A72-42440

Ultrasonic evidence against multiple energy gaps in superconducting niobium.
 22 p3190 A72-42476

Niobium superconductive tunnel diode integrated circuit arrays.
 22 p3161 A72-43090

NIONIUM ALLOYS

Nb alloys bend ductility at various temperatures, showing silicide coatings and electron beam and gas tungsten arc welding effects on mechanical properties
 01 p0083 A72-10284

Cb alloy processing technology from ores to manufactured finished fabricated, joined and coated hardware, discussing reduction methods, annealing, forming, joining, etc
 01 p0075 A72-10745

Bare and coated Nb alloy in high temperature vacuum conditions, discussing tensile and bend tests and mechanical properties
 01 p0084 A72-10747

Larson-Miller parameter application to N6 base alloys creep rupture data, discussing extrapolation method limitations
 01 p0084 A72-10748

Nb alloy silicide coating thickness data correlation by thermoelectric, metallographic and pointed micrometer techniques, discussing state of art in thickness control, penalties and substrate independence
 01 p0075 A72-10750

Coated Nb alloys as reradiative thermal protection system skin materials for space shuttle, investigating flaw growth
 01 p0085 A72-10757

Field repair of Nb alloy panels with protective coatings designed as part of space shuttle thermal protection system
 01 p0091 A72-10758

Field repair of fused slurry silicide coating for oxidation protection of Nb alloys in space shuttle environment
 01 p0075 A72-10759

High temperature carbide dispersion strengthened Nb alloys, using heat and thermomechanical treatments
 01 p0085 A72-10863

Nondestructive tests of Nb alloy radiative thermal protection heat shield design for space shuttle requirements
 01 p0048 A72-10980

Niobium alloy for reentry vehicle heat shields, describing slurry coating process reliability
 01 p0077 A72-10982

Mo and Zr additions induced mechanical strength increase of Ni-Al-Nb alloys in cast and deformed states at 20-1100 C
 01 p0088 A72-11081

Niobium-oxygen-nitrogen system solid solution, noting gas composition effects on hardness and electrical resistivity
 03 p0369 A72-12958

Nb-Mo-N solid solution nitrogen solubility equilibrium at various temperatures and pressures
 03 p0370 A72-12962

Nb-Ti-B ternary system melts hardened in vacuum, determining solidus temperature and surface from phase diagram
 03 p0370 A72-13186

Alkali ion scattering by NbTi alloy and SiC and components, comparing scattering coefficients
 03 p0401 A72-13424

Nb-Co-Sn and Nb-Ni-Sn ternary systems, investigating intermetallic compounds existence by X ray analysis
 03 p0375 A72-13944

Short range order and nucleation of long range order in Nisrich Ni-Nb alloys, observing electrical resistivity changes dependence on solute concentration

03 p0379 A72-14338

Quenched and tempered Ni-Cr-Nb-Co alloy, describing cellular precipitation mechanism

04 p0533 A72-14977

Nb-Ti alloy critical current density increase dependence on temperature, discussing evidence supporting rigidly pinned vortex lattice model

04 p0562 A72-15292

Vacuum diffused Cr, Si, Ti and combined coatings effect on heat resistance of Nb and Nb alloys

04 p0534 A72-15660

Order-disorder reaction in Ni-V, Ni-V-Nb and Ni-V-Ta alloys, estimating critical temperature

05 p0671 A72-15999

Nb-Zr alloy vacuum chamber tests for oxygen reaction rates, showing oxide surface film relation to sticking probability

05 p0674 A72-16391

Nb-O and Nb-N alloys, investigating oxygen and nitrogen solute-hardening effects on room temperature flow stress

05 p0675 A72-16729

Nb alloy oxidation behavior dependence on temperature in 550-1316 C range

05 p0676 A72-16732

Ni-NbNb intermetallic unidirectional eutectic alloy crystal structure and high temperature behavior, considering mechanical twinning relationship to strain hardening and ductility

05 p0677 A72-17108

Mo-Nb alloys single crystals work function, obtaining thermionic emission pattern

06 p0832 A72-18414

Deformation kinetics and failure of refractory Nb and Mo base alloys in plastic state under low cyclic fatigue

06 p0833 A72-18631

Temperature and deformation velocity effects on elasticity and tensile strength of Mo and Nb alloys

06 p0833 A72-18636

High temperature creep of niobium alloy, obtaining creep limit, microhardness and gas analysis data

06 p0833 A72-18637

Nb and Nb-Zr alloy tubular and sheet samples cyclic loading tests, determining heat treatment effects on notch sensitivity and fatigue strength

06 p0834 A72-18646

Microstructural changes and mechanical properties of deformed Nb alloy during annealing process, observing low temperature plasticity increase

06 p0835 A72-18747

Nb-Mo alloys behavior in aggressive boron containing medium at high temperatures, relating boride phases growth rate to component percentages

07 p1012 A72-19680

Diffusion kinetics in Nb-Al system for varying time and temperatures

07 p1015 A72-19930

Microstructure and high temperature mechanical properties of unidirectionally solidified pseudobinary Fe-Cr-Nb eutectic alloy

07 p1016 A72-19938

Nb and Nb alloys mechanical properties during plastic deformation and heat treatment, discussing grain size, dislocation structure and substructural changes effects

07 p1018 A72-20144

Precipitation hardening of quenched superconducting Nb-Al alloys, examining polycrystalline and single crystal samples and intermetallic phases

07 p1050 A72-20155

Nb-Ga system equilibrium phase diagram determination by differential thermal, tempering microstructural and X ray analysis techniques, discussing various compounds formation temperatures and characteristics

07 p1050 A72-20161

Precipitates dispersion and fluxoid pinning/critical current density/ in superconducting Nb-Hf alloy during aging, using transmission electron microscopy

07 p1020 A72-20409

Cast Nb-C alloys carbon solubilities of 1.4 and 0.25 percent at 2100 and 1200 C, showing molten microstructure and measuring procedures

07 p1023 A72-20669

Critical supercurrents in heat treated and cold worked Nb-Ti wires, proposing pinning model based on enhancement of Ginzburg-Landau parameter in cell walls

08 p1186 A72-21594

Phase diagrams, superconducting properties and annealing critical temperature of Nb-Al-Ge alloys, establishing four phase peritectic equilibria

08 p1218 A72-21778

Ni-Cr-Nb alloys structure and phase composition changes from W-Mo additions and hardening by intermetallic Ni-Nb precipitated from supersaturated solid solution

08 p1187 A72-21782

Electron microscopic investigation of niobium-oxygen alloys with Zr and Hf additions, measuring oxygen solubility

08 p1187 A72-21787

Cast Nb alloys plasticity enhancement by heat treatment, discussing solid solution decay kinetics and carbides composition of Nb-Mo-Zr-C system

09 p1327 A72-22229

X ray diffraction and chemical phase analysis of Nb alloys in cast and heat treated state, considering hardening mechanism

09 p1327 A72-22636

Nb-Al-Ge alloy superconductor deposits structure, transition temperature and critical current densities after preparation by triode sputtering and heat treatment

09 p1369 A72-22795

Soft X ray emission spectra from Al-Nb and Al-Pd alloys, deducing electron state density near Al ions

09 p1371 A72-22848

Nb-W equilibrium phase diagram estimation from known phase diagrams of Ni-Nb, Ni-W and Ni-Nb-W systems via Guggenheim quasi-chemical model application to Ni-Nb-W thermodynamic properties

10 p1496 A72-24233

Russian book on Nb in ferrous metallurgy covering physicochemical properties, steels, slags, ore reduction and smelting for Nb alloys production

11 p1659 A72-26048

Ti-Nb and Ti-Nb-Al alloys heat treatment effects on tensile and bending strengths

11 p1659 A72-26131

Nb-Ti alloy elasticity modulus temperature dependence, considering foreign atoms interactions with dislocations

11 p1662 A72-26737

Transmission and scanning electron microscope observations of Nb-Hf alloys fracture morphology, noting precipitate free zone

11 p1667 A72-26934

Slip and mechanical twinning in nickel-nickel niobide directionally solidified eutectic alloy, showing variation with temperature of stress-strain curves

11 p1667 A72-26935

W addition effect on Co-Nb alloys, noting phase structure transformation from cubic to hexagonal due to mean electron density increase

12 p1829 A72-27642

Isothermal profiles for Nb-Zr-C and Nb-Ti-C alloys from microstructural and X ray analyses, noting Widmanstatten structure, and second phase formation

12 p1829 A72-27643

Two phase and three phase composition of ternary alloys Nb-C-Re at 2000 C from X ray, metallographic and chemical analysis

13 p1973 A72-28567

Ti-V and Ti-Nb alloys mechanical strength and stress concentration resistance at low temperatures

13 p1977 A72-29018

Critical superconductivity currents measurement in niobium based U shaped and coiled wires within steady magnetic field

13 p2007 A72-30013

Tungsten and carbon combined solubility in solid niobium at 2000, 1700 and 1100 C

14 p2113 A72-30165

Mo addition effect on high temperature creep resistance and diffusion activation energy of Nb alloys tested in torsion and tension at 1100-1500 C in vacuum

14 p2116 A72-30436

Metallurgical and superconducting properties of beta-tungsten structure niobium aluminide with high critical temperature

14 p2119 A72-30607

Alpha solid solution of nitrogen in Nb-Mo alloys, obtaining excess partial quantities and activity and interaction coefficients at high temperatures

14 p2121 A72-30773

Nb-Ti-Zr-Hf system phase diagram from X ray analysis, observing beta solid solution below solid curve

14 p2122 A72-30977

Phase composition of Nb-O-Hf and Nb-O-Zr ternary alloys, noting O solubility decrease

14 p2122 A72-30980

Ni-Al-Nb-Mo system phase diagram from X ray and microstructural analysis, noting solid solubility and dependence of hardness and electrical resistivity on components

14 p2123 A72-30989

Ru-Nb-Zr alloys phase diagrams from physicochemical analysis, noting components interaction

14 p2123 A72-30993

Rare earth metals interactions with V, Nb and Mo alloys, describing procedures for interstitial impurities removal

15 p2252 A72-31190

High temperature steady creep of Nb and niobium-aluminum oxide alloys at 850-1400 C

15 p2254 A72-31561

Dispersion hardening of Nb-Zr-O and Nb-Hf-O alloys, discussing composition and heat treatment effects on aging, recrystallization temperature and grain growth

15 p2255 A72-31567

Edge and surface modification of Nb alloys prior to coating with fused silicide for oxidation life extension

15 p2244 A72-32134

Multifilamentary superconducting Nb-Sn composite wires in ductile metal matrix, determining transition temperature and critical current density

15 p2294 A72-32534

Heat capacity data analysis for solid solutions of superconducting Nb-Ti system, investigating electronic structure

15 p2296 A72-32692

K and L lines of X ray emission spectra of Ti in alloys with Nb, noting atomic structure change during alloy formation

15 p2259 A72-32701

Nitride precipitate platelets and dislocation loops formation in Nb-N alloys during aging at 535 C from electron microscope observations of structural changes

16 p2405 A72-32999

Nb-Mo alloys elastic constants anomalous temperature dependence, proposing phase changes role and relationship to neutron diffraction and specific heat

16 p2405 A72-33167

Mo and W simultaneous addition effects on Ni-Cr-Nb alloy properties, noting heat resistance increase and Nb solid solubility decrease

16 p2408 A72-33534

Solid phase reaction kinetics in zirconium beryllide alloys with Ta and Nb at 900-1400 C, noting Be diffusion effect

16 p2408 A72-33535

Si stabilization of laves and intermediate phases in Nb-Fe-Si and Nb-Co-Si systems

16 p2409 A72-33805

Precipitation hardening effects on yield strength, toughness and ductile to brittle transition temperature of low alloy steels containing Nb

16 p2409 A72-33809

As-quenched and aged form of omega phase in Ti-Nb alloys investigated by electron microscopy and X ray diffraction

16 p2410 A72-33818

Electron diffraction patterns of previously deformed Ti-Nb alloy containing unequal populations of omega phase variants, noting anisotropy

17 p2566 A72-34673

Mo-Nb alloys single crystals work function, obtaining thermionic emission pattern

17 p2567 A72-34863

Interstitial and substitutional dynamic strain aging of Fe-Nb alloy and Al-Nb bearing steel at 295-950 K

18 p2699 A72-36342

Thermodynamic description of the metal-rich part of the system niobium-molybdenum-nitrogen

18 p2701 A72-36597

Nitrogen interactions in Nb-Zr alloys, investigating interior friction spectra peaks

18 p2702 A72-36707

Characteristics of temperature dependences for the thermal conductivity coefficients of niobium-zirconium solid solutions

19 p2817 A72-37739

Elastic constants of niobium-molybdenum alloys in the temperature range -190 to +100 C

19 p2821 A72-38591

The low strain tensile behavior of U-7.5 wt pct Nb-2.5 wt pct Zr

20 p2938 A72-39303

Phase precipitation structure of superconducting Nb-Ti alloys after cold working and low temperature annealing

21 p3067 A72-40951

Fabrication studies of Nb3Al superconductors

21 p3097 A72-41182

Study of the hot pressing kinetics for niobium-cemented tungsten and titanium carbide alloys

22 p3182 A72-42191

Critical superconductivity currents measurement in niobium based U shaped and coiled wires within steady magnetic field

22 p3190 A72-42735

Superconducting alloys of niobium and vanadium

22 p3191 A72-42808

Niobium and molybdenum alloys containing borides and carbides of the IV-a group metals

22 p3191 A72-42814

Mechanical and thermophysical properties of heat resistant Nb alloys, noting application for thermionic cathodes

22 p3192 A72-42821

Characteristics of superconducting niobium-tin alloys obtained by the vacuum evaporation method

22 p3192 A72-43013

Superconducting transition temperature increase in Nb-Al-Si alloys as function of composition under tetragonal lattice crystallization

22 p3192 A72-43020

Specific-heat and magnetic measurements in superconducting Ta-Nb alloys

23 p3323 A72-43273

Antifriction and electrical properties of WSe2-NbSe2 quasi-binary alloys

23 p3299 A72-43292

Mechanical properties of heat and corrosion resistant nonmagnetic Ni-Cr-Nb spring alloys with W addition tested in aggressive and nitric acid base media 23 p3300 A72-43595

Diffusion bonded columbium panels for the shuttle heat shield. 24 p3406 A72-44889

NIOBIUM CARBIDES

Physical properties of monocarbides of Zr, Nb and alloys in homogeneity range, explaining electronic structure relationship to composition changes 02 p0241 A72-11453

X ray diffraction analysis of dilute Nb-C alloys epsilon phase, discussing Bravais lattice and unit cell dimensions 03 p0375 A72-13932

Niobium carbide thermodynamic properties tabulated for 0-3000 K, deriving equation for heat capacity from low temperature experiments 06 p0832 A72-18430

Niobium carbide coatings for carbon steels and cermets, comparing with titanium carbide coatings 08 p1186 A72-21724

Nonstoichiometric solid solutions based on ZrC and NbC, investigating microhardness variation due to differing valences of atoms in metal sublattices 08 p1188 A72-22100

Niobium carbide resistors properties, investigating temperature dependence of electrical resistance and thermal stability 09 p1331 A72-23483

Plane titanium and niobium carbide precipitation in microalloyed steels during heat treatment above 1300 C, noting eutectic sulfide effect 12 p1827 A72-27102

Shock wave reduction, microcracks and dislocation density of hot pressed titanium, zirconium and niobium carbide powders, using X ray crystal analysis 13 p1982 A72-30110

Niobium and molybdenum carbide film deposition on steel substrates by open arc welding with partial carbon burnout 14 p2107 A72-30156

Niobium carbide coatings for carbon steels and cermets, comparing with titanium carbide coatings 17 p2567 A72-35124

Systems of niobium monocarbide with transition metals. 20 p2942 A72-39985

Study of the process of niobium carbide production in a fluidized bed 23 p3293 A72-43294

Some technological factors influencing the ductility of thermoplastic dross and the properties of niobium-carbide-based finished products 23 p3293 A72-44009

NIOBIUM COMPOUNDS

NT NIOBATES

NT NIOBIUM CARBIDES

NT NIOBIUM OXIDES

NT NIOBIUM STANNIDES

Intercalation complexes of Lewis bases and layered tantalum and niobium disulfide superconductors, noting critical temperatures 01 p0113 A72-10018

Niobium trifluoride synthesis, noting semiconductor and paramagnetic properties 02 p0243 A72-12170

NbN thin film stabilization by metal overlays with reduction in ac losses, discussing superconducting reversibility to normal transition 04 p0560 A72-14542

NbN film superconducting properties measured as function of thickness, discussing transition temperature, critical current and magnetic field 04 p0562 A72-15294

Enthalpy measurements of niobium silicides at 1200-2200 K by mixing method, using isothermal calorimeter 06 p0833 A72-18431

Niobium nitride neutronographic structural study with diffractometer after foil nitriding and rapid cooling 07 p1023 A72-20670

NbN family high transition temperature values application to phonon spectrum prediction based on superconductivity microscopic theory 09 p1369 A72-22565

Atomic radius ratios and lattice constants in intermetallic compounds Laves phases, presenting semistatistically calculated values for niobium diferide based on rigid sphere model 10 p1527 A72-24978

Low field magnetization measurements at 4.2 K on bulk and thin film niobium nitride, discussing Pauli spin paramagnetism and spin-orbit scattering 16 p2442 A72-33843

Influence of hydraulic extrusion on the composition and properties of the Nb3Sn compound 23 p3323 A72-43597

NIOBIUM OXIDES

Tensile stress effect on formation of suboxide needles, microcracks and oxide wedges during low temperature Nb oxidation 11 p1658 A72-25854

Conditions and mechanism of formation of suboxide phases in the niobium-oxygen system 21 p3066 A72-40381

Observation on phenomena associated with a slowly varying surface barrier at niobium oxide and aluminum interface. 21 p3097 A72-40702

NIOBIUM STANNIDES

Uniaxial stress effect on monocrystalline niobium stannide superconducting transition temperature, considering crystal structure 04 p0562 A72-15293

NITRATE ESTERS

Liquid nitrate ester sensitivity and dissolved water desensitization, using thermal initiation and drop weight impact tests 09 p1373 A72-23145

Nitrate ester propellants self ignition hazard and ballistic stability, describing heat generation test at various temperatures for long term storage 14 p2144 A72-30754

NITRATES

NT AMMONIUM NITRATES

NT CELLULOSE NITRATE

NT METHYL NITRATE

NT NITROGLYCERIN

Boron/potassium nitrate parachute mortar design for aircraft and spacecraft applications, comparing with high-low propellant 08 p1221 A72-20783

Vacuum thermal decompositions of the nitrate salts of hydrazine. 19 p2848 A72-38876

NITRIC ACID

Chemical efficiency improvement of aluminum combustion with nitric acid in organic solid fuel 03 p0405 A72-13540

Vertical distribution of nitric acid vapor concentration in lower stratosphere from balloon sounding 11 p1622 A72-26086

Atmospheric nitric acid vapor radiation absorption measurements at various partial pressures 12 p1805 A72-27993

Development of a solid fuel on a polyurethane basis for a hybrid rocket propulsion system with 98% nitric acid as oxidizer 20 p2962 A72-39416

Atmospheric nitric acid vapor radiation absorption measurements at various partial pressures 22 p3174 A72-43007

NITRIC OXIDE

Airborne and spaceborne remote measurement and mapping of atmospheric nitric oxide, describing system configuration with mono or bistatic and pulsed or CW laser [ALAA PAPER 71-1112] 01 p0068 A72-10556

Vertical concentration profile and diurnal variations of N and NO vs solar activity from satellite horizon airglow experiment 02 p0217 A72-11925

Dissociative recombination coefficients of water vapor and nitric oxide in determining D region electron densities 03 p0347 A72-13389

Atmospheric model for mesosphere odd-nitrogen concentration relation to NO dissociation rate and downward flux through mesopause 03 p0350 A72-13526

Reaction kinetics of NO and CO formation in lean premixed hydrocarbon-air flames 04 p0594 A72-14409

Kinetic-analytical models for nitric oxide formation in combustion processes, evaluating heterogeneous effects [WSCIPAPER 71-28] 04 p0482 A72-14581

NO formation in spherical diffusion flames around hydrocarbon fuel drops burning in air [WSCIPAPER 71-29] 04 p0482 A72-14582

Computer program for construction and integration of chemical reaction rate equations, applying to nitric oxide formation and decomposition [WSCIPAPER 71-27] 04 p0482 A72-14583

Fluorescence polarization and intensities of nitric oxide vibrational bands from Cd line and continuum excitation for spectrometer calibration 04 p0552 A72-14893

Nitric oxide formation rate in combustion products of propane-air and hydrogen-air diluent flames 07 p0935 A72-19361

Atmospheric ozone photochemistry, discussing pure oxygen and moist atmospheres, NO mechanism, tracer applications, stratospheric dynamics and Umkehr observations 07 p0979 A72-20228

Vacuum UV excitation cross sections measurement by electron impact on nitric oxide, tabulating threshold energies and transition probabilities 09 p1357 A72-22857

Day, night and sunset mesospheric nitric oxide concentrations during polar cap absorption from rocket measurements of cation composition and charged particle densities 09 p1300 A72-23026

NO ion production rate in D region in relation to electron densities 09 p1300 A72-23027

Electron impact excitation of nitric oxide in vacuum UV, measuring absolute cross sections for emission features [AD-742536] 10 p1515 A72-24341

Neutral atmosphere effects on lower ionosphere, considering D region atomic oxygen, nitric oxide and water vapor and electron density distributions 10 p1474 A72-24712

Vertical concentration profile and diurnal variations of N and NO vs solar activity from satellite horizon airglow experiment 13 p1948 A72-29237

Photochemical model of N and NO distribution based on E region ion composition 15 p2226 A72-31916

Nitric oxide gas release by rocket in auroral glow to determine atomic oxygen densities in ionosphere via observation of auroral light emission 15 p2226 A72-31936

Potential energy curves for exothermic reaction between oxygen cations and nitrogen molecules to form nitric oxide and atomic nitrogen 16 p2360 A72-32921

Mathematical model of nitric oxide formation by fuel droplet burning above fuel critical pressure, applying to diesel engine operations 17 p2511 A72-34901

The reaction of hydrogen peroxide with nitrogen dioxide and nitric oxide. 17 p2511 A72-35466

Fringe shift and slope analysis of interferometric spectrogram formed by NO-gamma system spectral band 17 p2586 A72-35833

A Monte Carlo model of turbulent mixing for the prediction of NO production in steady-flow combustors. [WSCIPAPER 72-8] 20 p2982 A72-38973

Theoretical investigation of nitric oxide and its role in D-region ionization. 20 p2918 A72-39531

NITRIDES

NT ALUMINUM NITRIDES

NT BORON NITRIDES

NT SILICON NITRIDES

NT TANTALUM NITRIDES

NT TITANIUM NITRIDES

NT ZIRCONIUM NITRIDES

Germanium nitride thermolysis, discussing allotropic alpha and beta phases stability and activation energies 01 p0023 A72-10191

Physical properties of transition metal nitrides, carbonitrides and nitride-based cemented hard alloys, discussing carbides stability in presence of high pressure nitrogen 02 p0241 A72-11450

NbN thin film stabilization by metal overlays with reduction in ac losses, discussing superconducting reversibility to normal transition 04 p0560 A72-14542

Sputtering sources fabrication by plasma spraying for nitride films deposition with Ta-Hf mixtures 04 p0527 A72-15494

Electrical resistance, Hall coefficient and magnetic susceptibility of transition metal nitrides at low and room temperatures 06 p0827 A72-17386

Uranium mononitride as nuclear reactor fuel for space vehicle power supply applications, discussing fabrication techniques and irradiation behavior 09 p1349 A72-22406

NbN family high transition temperature values application to phonon spectrum prediction based on superconductivity microscopic theory 09 p1369 A72-22565

Equilibrium states difference of ternary metal-boron-nitrogen systems, taking into account chemical bond type and crystal structure of boride and nitride atoms 14 p2112 A72-30154

Dynamic elastic moduli of diffusion saturated high melting point nitrides, carbides and borides of Ti, Zr, Nb, W, Mo and Ta 15 p2252 A72-31199

Nitride precipitate platelets and dislocation loops formation in Nb-N alloys during aging at 535 C from electron microscope observations of structural changes 16 p2405 A72-32999

Low field magnetization measurements at 4.2 K on bulk and thin film niobium nitride, discussing Pauli spin paramagnetism and spin-orbit scattering 16 p2442 A72-33843

Evaluations of uranium-nitride fueled converters. 17 p2497 A72-34609

NASA research on refractory carbides, nitrides and borides, discussing electronic and defect structures, hot extrusion, uranium nitride, cermets for bearings and composite evaluation 18 p2701 A72-36594

Hot pressing of transition metal nitrides and their properties 19 p2808 A72-38281

NITRIDING

- Heat treatment, quenching and aging caused metastable and stable alpha and beta structures effects on nitrogen diffusion rate in Ti alloy during nitriding 02 p0244 A72-12248
- Phase and microstructure changes during nitriding process of Fe-Ti alloys, stressing Ti concentration effect 07 p1013 A72-19749
- High temperature nitriding of martensitically aging steels in ammonia-nitrogen mixtures, obtaining hard nonbrittle diffusion surface layers 07 p1020 A72-20418
- Niobium nitride neutronographic structural study with diffractometer after foil nitriding and rapid cooling 07 p1023 A72-20670
- Structural changes of nitrified steel diffusion zone, showing alpha solid solution and hard nitride phases mixture 08 p1188 A72-21880
- Heat treatment produced metastable and stable alpha and beta structures effects on nitrogen diffusion rate in Ti alloy during nitriding 11 p1660 A72-26134
- Mo-Hf alloys high temperature mechanical properties improvement by internal diffusion nitriding, noting precipitates effects 11 p1644 A72-26843
- Nitride phase microstructure in ferrochromium nitrified in liquid state, comparing electrolytic etching and film coloration methods 12 p1829 A72-27454
- Boron nitride coated boron fibers for metal matrix composite reinforcement, discussing surface nitriding process by heating 12 p1815 A72-28088

- Shock wave impact at flat/spherical end surface of cylindrical body in supersonic nitrogen flow, using pulsed ruby laser for shadow photography 11 p1571 A72-25702
- Electrically excited carbon dioxide-nitrogen laser using high repetition rate discharge pulses from pin electrode array transition to supersonic flow 11 p1647 A72-26147
- High pressure electroionization carbon dioxide and nitrogen filled carbon dioxide lasers 11 p1652 A72-26793
- Nitrogen solubility, degassing kinetics and diffusion coefficients for Mo-N, W-N and Re-N systems for 1300-3050 C 11 p1663 A72-26841
- High temperature low pressure reaction kinetics of nitrogen sorption by titanium foil, using ultrahigh vacuum microbalance 12 p1777 A72-27045
- High temperature solubility and diffusion coefficient of nitrogen in rhenium 12 p1827 A72-27138
- Absorption spectrum of molecular nitrogen in 730-980 A band, investigating absorption cross sections and optical oscillator strengths 12 p1848 A72-27853
- Chlorella population age structure and cell requirements correlation with nutrient medium nitrogen and phosphorus absorption 13 p1909 A72-29311
- Vibrational relaxation mechanism in supersonic flows of chemically reacting carbon dioxide-nitrogen mixture, using numerical integration 13 p1913 A72-29502
- Nonlinear light amplification in molecular nitrogen amplifier as function of input pulse delay relative to excitation start 13 p1969 A72-29522
- Resonance scattering and direct photoelectron excitation contribution to molecular nitrogen first positive bands emission in day airglow from rocket measurements 13 p1953 A72-29808

Nonequilibrium dissociating inviscid nitrogen flow pattern over spheres and circular cylinders, obtaining temperature, pressure and density fields 13 p1895 A72-30032

Low carbon and nitrogen concentrations in chromium ferritic stainless steel obtained with gas rinsing at reduced pressure, noting weldability and corrosion resistance 14 p2119 A72-30606

Photoelectron precipitation induced dissociation of atmospheric nitrogen molecules during moderate solar activity 14 p2102 A72-30659

Four-parallel-compartment lung model for emptying pattern study, using expired nitrogen concentration data to calculate alveolar dilution ratio and emptying rate 14 p2079 A72-30703

Alpha solid solution of nitrogen in Nb-Mo alloys, obtaining excess partial quantities and activity and interaction coefficients at high temperatures 14 p2121 A72-30773

First positive and first negative nitrogen emission excitation kinetic mechanisms, investigating shock tube measurements of nonequilibrium radiation 14 p2134 A72-30837

Anomalous excitation of nitrogen positive bands in seeded Ar free plasma jet, measuring oscillator strengths of atoms 14 p2140 A72-30899

Ce-N alloys phase diagram from durometric, X ray, metallographic and differential thermal analyses 14 p2123 A72-30991

Molecular nitrogen pulsed laser wavelength measurements, observing IR bands, stimulated emission lines and population inversion mechanisms 15 p2249 A72-32151

Nitrogen molecular beam rotational excitation by collision with argon beam, describing electron beam spectrographic experimental method and numerical simulation technique 16 p2431 A72-33071

Nitrogen existence in galactic cosmic ray sources, considering formation from CNO cycle hydrogen and He burning and ejection from normal stars 16 p2448 A72-33739

Coupling of free electron and nitrogen vibrational temperature nonequilibrium in weakly ionized nozzle expansions of shock heated nitrogen [AIAA PAPER 72-683] 16 p2380 A72-34059

Nitrogen plasma jet flow, attributing discrepancies in electrical conductivity and velocity to shock effects on probe measurements [AIAA PAPER 72-671] 16 p2440 A72-34069

Combustion process in mixing gas jets of different density, using argon and nitrogen for internal flow and air for external jet 16 p2381 A72-34169

Regression analysis for steady state N2 inequality in O2 consumption calculations. 17 p2507 A72-34542

Effects of nitrogen and helium upon pulmonary damage after rapid decompression to 2 torr. [AD-746093] 17 p2508 A72-34544

N2 positive and N2+/- band systems and the energy spectra of auroral electrons. 17 p2545 A72-34634

Breakdown in argon and nitrogen under the influence of a 0.35-micron picosecond laser pulse. 17 p2564 A72-35508

Determination of the quenching of O(1D) by molecular nitrogen using the ionospheric modification experiment. 18 p2685 A72-35991

Equilibria and degassing kinetics in the systems Mo-N, W-N, and Re-N 18 p2701 A72-36596

Thermodynamic description of the metal-rich part of the system niobium-molybdenum-nitrogen 18 p2701 A72-36597

Proton capture mean lifetimes in fast C-N cycle, presenting nitrogen/carbon abundance ratio variation with temperature 18 p2721 A72-36650

Nitrogen interactions in Nb-Zr alloys, investigating interior friction spectra peaks 18 p2702 A72-36707

Vibrationally excited nitrogen in upper atmosphere 18 p2688 A72-36865

Vibrational excitation in N2 by electron impact in the 15-35-eV region. 19 p2837 A72-37546

Pulse nitrogen laser at high repetition rate. 19 p2813 A72-38696

Neurologic oxygen toxicity - Effects of switch of inert gas and change of pressure. 19 p2758 A72-38704

Myth of nitrogen equality in respiration - Its history and implications. 19 p2758 A72-38708

IR emission of nitrogen layer heated by reflected shock wave, noting absorption cross sections under free-free electron transitions in neutral particle fields 19 p2835 A72-38776

The influence of interstitial nitrogen on the asymmetry of the yield stress of tantalum. 20 p2935 A72-39006

Exploratory investigation of Y, La, and Hf coatings for nitridation protection of chromium alloys. 20 p2944 A72-39290

Results of a study of heat and mass transfer during the purification of helium from nitrogen by the condensation method 21 p3127 A72-40130

Molecular orbital calculation of the isotropic hyperfine interactions in triatomic nitrogen radicals. 21 p3013 A72-40564

Angular distribution of electrons elastically scattered from N2. 21 p3088 A72-40777

Critical flow rate and pressure ratio for nitrogen flowing through convergent-divergent nozzle at stagnation conditions, emphasizing thermodynamic critical region 21 p3046 A72-41180

Nitrogen excretion as a measure of protein metabolism in man under different conditions of renal function. 21 p3003 A72-41523

Nitrogen temperature determination in arc tunnel air flows. [AIAA PAPER 72-1022] 21 p3042 A72-41600

Energy exchange processes in a low temperature N2-CO transfer laser. 22 p3184 A72-41993

OI 6300 and 5577 A, NI 5200 A and H beta 4861 A emission line measurement during 8-9 March 1970 auroral arc event 22 p3169 A72-42018

Airglow observations with a Hadamard photometer. 22 p3169 A72-42023

Thermospheric atomic oxygen and molecular nitrogen densities from OGO 6 neutral atmospheric composition experiment, comparing with prediction by Jacchia models 22 p3172 A72-42431

Spontaneous self mode locking in transversely excited nitrogen laser operation in first positive system 22 p3186 A72-42618

Drift velocities, diffusion coefficients, and temperatures of photoions in argon, nitrogen, and oxygen 22 p3209 A72-42926

German monograph - Ionization of nitrogen-oxygen gas mixtures by shock waves. 22 p3209 A72-43073

Molecular gas presence effect on electron energy balance in atomic gases, noting inelastic collisions loss factor in heated Ar plasma containing nitrogen molecules 22 p3213 A72-43110

Titanium carbonitrides alloying with Ni in nitrogen atmosphere, noting N concentration effect on cermets wear resistance 23 p3298 A72-43281

Second positive system of nitrogen bands in the day airglow from Cosmos-224 data 23 p3282 A72-43356

Visual perception of accelerated nitrogen nuclei interacting with the human retina. 23 p3256 A72-43940

Electronic excitation of N2 and dissociative excitation of O2 by proton impact. 23 p3317 A72-44520

Laser-source spectroscopy. II - Experimental study of line broadening for the 00 1-/10 0, 02 0/ transition of CO2 disturbed by N2: Application of the theory of Anderson, Tsao, and Cornette to the calculation of pure and N2-disturbed CO2 linewidths 23 p3298 A72-44535

On the use of a Fabry-Perot interferometer for the study of Raman spectra of gases under high resolution. 24 p3426 A72-44904

High speed mixing of nitrogen vibrationally excited with carbon dioxide 24 p3464 A72-45065

Electron scattering by molecules with and without vibrational excitation. IV - Elastic scattering and excitation of the first vibrational level for N2 and CO at 20 eV. 24 p3427 A72-45304

Electron scattering by molecules with and without vibrational excitation. V - Elastic scattering and non-resonant vibrational excitation of N2 at 30-83 eV. 24 p3427 A72-45305

Transport properties of a gas of diatomic molecules. VI - Classical trajectory calculations of the rotational relaxation time of the Ar-N2 system. 24 p3427 A72-45308

NITROGEN ATOMS

Vertical concentration profile and diurnal variations of N and NO vs solar activity from satellite horizon airglow experiment 02 p0217 A72-11925

Vertical concentration profile and diurnal variations of N and NO vs solar activity from satellite horizon airglow experiment 13 p1948 A72-29237

Oxygen and nitrogen atoms effect on defects recovery in cold rolled Nb during annealing 16 p2406 A72-33208

Theory of dispersion in relation to light shifts. 24 p3409 A72-44921

- Theoretical interpretation of the optical and electron scattering spectra of polyatomic molecules. III - N₂O and the discovery of resonant phenomena in the B region at 6.8 eV. 24 p3426 A72-45301

- Theoretical interpretation of the optical and electron scattering spectra of polyatomic molecules. III - N₂O and the discovery of resonant phenomena in the B region at 6.8 eV. 24 p3426 A72-45301

discussing need for international scientific cooperation
10 p1476 A72-25006

Nike-Apache rocket-borne particle collection and photometry of noctilucent clouds, obtaining single-shadowed particle size distributions and inflight shadowing surface data
15 p2226 A72-31923

Rocket-borne laser radar for aerosol observation in upper atmosphere, noting light scattering layer relation to noctilucent cloud appearance
15 p2231 A72-32331

Noctilucent cloud research, discussing morphology, rocket studies and ice particle theory
16 p2386 A72-33605

Luminous intensity, visibility duration, condensation nuclei and mass balance of noctilucent clouds
18 p2686 A72-36504

Heavy metal particle detection in noctilucent clouds by rocket experiments, using Pandora inflight shadowing technique
20 p2964 A72-39373

First approximation for spacecraft observations of noctilucent clouds from circular orbits with optimal optical axis orientations
21 p3049 A72-41438

Noctilucent clouds in daytime - Circumpolar particulate layers near the summer mesopause.
22 p3173 A72-42515

Mesospheric noctilucent clouds tables listing weather stations geographical coordinates, observation time periods, elevation above northern horizon and azimuth
22 p3173 A72-42575

NOCTURNAL VARIATIONS
Upper atmosphere particle flux density determined from nocturnal electromagnetic absorption caused by geomagnetic storms, noting ionization process time lag in lower ionosphere
13 p1945 A72-28580

Nocturnal and semiannual variations of the intensity of 5577 A emission of atomic oxygen.
19 p2789 A72-37511

Upper atmosphere particle flux density determined from nocturnal electromagnetic absorption caused by geomagnetic storms, noting ionization process time lag in lower ionosphere
24 p3397 A72-45080

NODES (STANDING WAVES)
Matrix displacement method for nonuniform beam vibration problems, using internal nodes concept
11 p1735 A72-25740

Helicopters vibration reduction through fuselage nodalization, discussing analysis method and dynamic scale model and full scale flight test results
[AHS PREPRINT 611] 17 p2489 A72-34487

NOISE (SOUND)
NT AERODYNAMIC NOISE
NT AIRCRAFT NOISE
NT ENGINE NOISE
NT JET AIRCRAFT NOISE
NT ROCKET ENGINE NOISE
NT SONIC BOOMS
NT THERMAL NOISE
Environmental noise induced human fatigue, considering physiological and psychological effects
01 p0016 A72-10050

Pitch shift of pure tone by masking tones and band limited noise
01 p0101 A72-10159

High and low pass filtered clicks lateralization tests, suggesting lateral position discrimination dependence on IF content and cochlear partition apical end
04 p0550 A72-15297

Transportation noises - Conference, University of Washington, Seattle, March 1969
07 p0931 A72-20162

Noise rating methods for speech communication effectiveness evaluation, presenting charts and tables for intelligibility limits with various communication techniques and equipment
07 p0932 A72-20167

Noise effects on human attention and work efficiency in extroverted and introverted individuals
08 p1128 A72-22137

Noise and vibration control engineering - Conference, Purdue University, Indiana, July 1971
13 p2005 A72-29553

French book on industrial acoustics elements and metrology covering transmission, absorption, noise and complex sound measuring apparatus and preventive measures
15 p2275 A72-31524

Fan noise estimation from equation involving delivery volume and pressure to correct ratings to generated sound power levels
16 p2377 A72-33323

LF whole body vibration effects on rat escape conditioning in terms of frequency, amplitude and controls for noise and activation
16 p2357 A72-33868

Blowdown wind tunnel internal and external noise fields prediction by empirical method, considering valves, burners, turbulent boundary layers and exhaust jets as sources
[AIAA PAPER 72-668] 16 p2374 A72-34070

NOISE ATTENUATION
U NOISE REDUCTION
NOISE ELIMINATION
U NOISE REDUCTION
NOISE GENERATORS
Noise reduction by acoustic interference, using sound generators operating in antiphase mode to noise input
02 p0262 A72-12897

Fluctuating flow in idealized model of turbulent shear layer composed of many discrete two dimensional vortices, analyzing noise generation
[AIAA PAPER 72-155] 05 p0609 A72-16955

Digital system for wideband Gaussian noise generation using simultaneously generated PN-sequence with analog summation of independent binary waveforms
07 p0941 A72-19284

Circular jets sound generation analysis, using Lighthill equation and Michalke spectral method [DEVL-SONDIR-179] 07 p0910 A72-20100

Acoustical theory application to jet engine noise reduction, developing mathematical model for blade shock wave spacing in noise generation process
07 p1055 A72-20542

Junction and MOS FETs noise sources interaction with small signal model parameters and signal source admittance parameters, investigating amplifier If performance
08 p1141 A72-21428

Pressure sensor measurements of fluctuating aerodynamic forces on rotor blades related to compressor noise generation
[ASA PAPER H 6] 08 p1107 A72-21486

LF noise generator with Rice variable amplitude probability distribution law, using shielded vacuum tube superregenerative amplifier
09 p1285 A72-22345

Two dimensional dynamic model for background noise generation in bipolar transistors, using equivalent circuit
09 p1286 A72-23105

Aerodynamic noise generation mechanism of ideally expanded supersonic jet based on large scale flow instabilities, deriving mathematical model
10 p1418 A72-24331

Russian monograph on self oscillatory noise generation during gas jet ejection covering single, parallel, supersonic, flat and cylindrical jets stability
11 p1617 A72-26066

Theory of a coaxial gas-discharge generator loaded by a spiral line
17 p2529 A72-34841

Variable strong atmospheric radio noise production under fair weather conditions without manmade signals, noting peaks before midnight and sunrise
22 p3173 A72-42885

NOISE HAZARDS
U HAZARDS
U NOISE [SOUND]
NOISE INJURIES
Hearing damage scaling methods, discussing audiometric frequencies effect and damage risk criteria
07 p0932 A72-20169

Physiological and psychological effects of noise noting vulnerability of circulatory apparatus, neurovegetative system and stomach
14 p2079 A72-30696

NOISE INTENSITY
Aircraft engine noise effects in airport vicinities, discussing measurement scales, turbofan sources, noise reduction and future air traffic
02 p0154 A72-12022

Jet noise suppression near airports, discussing noise physical description, source relation to engine technology and ICAO certification standards
03 p0309 A72-13097

Electromagnetic noise and effects on communication systems, considering statistical parameters definition and measurements
03 p0324 A72-14036

Aircraft and other transient noise levels temporal characteristics effect on noise assessment
04 p0464 A72-14843

Cats cochlea and cochlear nucleus neural responses in auditory masking of low frequency tones, showing phase locked cells progressive desynchronization with intensity
04 p0475 A72-15251

Pyroelectric detector noise equivalent power limitation factors, discussing heterodyne systems and pulsed submillimeter lasers detection
04 p0551 A72-15602

Metrology and technology for sounds intense enough for physiological distress and mechanical structure damage, discussing accompanying high temperature and vibration
[ONERA, TP NO. 1009] 05 p0661 A72-16024

Aerospace vehicle noise induced structural vibration, presenting propellers, turbojet engine exhausts and sonic boom waves
05 p0739 A72-16597

Duration effect on judged acceptability of noise, discussing interpretation and meaning of laboratory determinations
06 p0766 A72-17765

Reconstruction errors, quantization noise and channel bandwidth in high order digital to analog conversion
06 p0779 A72-17783

Airport surrounding communities survey on attitudes toward aircraft noise, noting daily activity disturbance, emotional reactions, economic effects, noise abatement awareness, etc
06 p0767 A72-17870

Optimal signal detection relative to Neumann-Pearson criterion invariant with respect to amplitude and random noise intensity in radio location
07 p0938 A72-19019

Noise level measurement scales, units datum points and mathematical formulas, suggesting method of quasi-peak level above masked threshold
07 p1035 A72-20164

Perceived noise level correction for background noise effects based on frequency band SNR
07 p0932 A72-20170

Loudness and noisiness judgment contours, considering experimental subjective and objective conditions, subject age and sex and sound field characteristics
07 p0932 A72-20171

Mark VII ear performance calculation procedure for perceived loudness or noisiness levels relation to sound pressure, using experimental frequency weighting contours
08 p1127 A72-21895

Microwave transistor noise factor measurement for various geometries and parameter values correlation with predictions
09 p1286 A72-23104

Noise characteristics and mechanisms in avalanche diodes and transferred electron devices
09 p1287 A72-23115

CW circuit stabilized InP microwave reflection amplifiers in Q band, determining power gain and noise figure
10 p1450 A72-24308

Optimal antennas statistical synthesis for minimum noise power for given signal gain
10 p1436 A72-24505

Minimum noise coefficients of M-type microwave beam amplifiers with crossed fields, taking into account delay system distributed losses
10 p1453 A72-24913

Human performance under intense noise, measuring effects on muscle tension, metabolism, respiration rate, visual accommodation, saccadic eye movement and dark adaptation
11 p1583 A72-25728

Auditory sensation overall loudness prediction for steady broad-band noise from summation of weighted intensities of power spectrum sub-bands
11 p1686 A72-25800

Aircraft flyover house noise reduction data, noting application to indoors noise level estimation
[SAE AIR 1081] 11 p1686 A72-26029

Complementary metal oxide semiconductor applications, noting device power dissipation, high noise immunity, good switching speeds and cost reduction
11 p1701 A72-26386

Noise immunity and code sequence rejection probability in real multifrequency communications systems with multipositional frequency shift keying
11 p1598 A72-26729

Low noise power level measurement at microwave frequencies, noting Nyquist equation applicability and cooled-to-uncooled element connections effects in receivers
12 p1779 A72-27175

Noise characteristics of regenerative amplifier with direct coupling to load
13 p1929 A72-28897

Aircraft noise sources, showing noise intensity relationship to airfoil velocity and pressure ratio
13 p1897 A72-29568

Masking functions for intensity discrimination of pulsed sinusoids with and without noise masker
13 p2006 A72-29772

Microwave radiometer performance analysis, deriving input noise power relation to instrument indication in terms of noise parameters
14 p2105 A72-30587

White background noise intensity effects on human visual target detection performance considering display difficulty levels, target location, detection time and error
14 p2083 A72-31156

Preferences for signaled over unsignaled noise from subjectively rated noise intensity experiments, discussing preparatory response vs information cognitive control interpretations
15 p2187 A72-32763

Fan noise estimation from equation involving delivery volume and pressure to correct ratings to generated sound power levels
16 p2377 A72-33323

- Design requirements for a quiet helicopter.
[AHS PREPRINT 604] 17 p2488 A72-34484
- Cavitation study of pump with semiopen impeller, obtaining hydraulic performance, flow photographs and noise level 17 p2561 A72-35899
- Synchronization and noise performance of mutually coupled oscillators. 18 p2668 A72-37036
- Thermal modulation and FM noise of Gunn oscillators. 18 p2668 A72-37038
- Correlation between the reliability of silicon bipolar transistors and their excess background noise 18 p2669 A72-37110
- Effect of temperature on the base resistance and the noise factor of a bipolar junction transistor. 19 p2773 A72-37848
- Mean value of noisy signal quantized by analog/digital converter, noting input noise level relation to estimate accuracy 20 p2904 A72-39785
- Separation and detection of signals in the presence of nonadditive noise 21 p3023 A72-41746
- Aircraft noise duration correction for effective perceived noise level [EPNL] computation, eliminating mathematical anomaly incurred by present FAA and ICAO prescribed method 22 p3139 A72-42909
- German monograph - Studies of the ground effect on the noise levels and their frequency distribution in the near field of an engine jet directed vertically against the ground. 22 p3217 A72-43060
- Statistical analysis of the sound level distribution of aircraft noise as a function of time 23 p3252 A72-44337
- Community noise levels of the L-1011 Tristar Jet Transport. 24 p3365 A72-44677
- NOISE MEASUREMENT**
U ACOUSTIC MEASUREMENTS
NOISE METERS
- California airport noise standards instrumentation, discussing battery operated measurement of hourly and community noise equivalent levels 07 p0985 A72-19490
- Quadratic logarithmic converter used with linear microammeter for decibel scale noise measurements 09 p1306 A72-22344
- ELF wideband noise receiver for atmospheric waveshape magnetic tape recording, computer processing and system simulation 12 p1791 A72-27637
- Microwave radiometer performance analysis, deriving input noise power relation to instrument indication in terms of noise parameters 14 p2105 A72-30587
- A new approach to the measurement of very low acoustic noise levels. 20 p2953 A72-39554
- Multipoint real time all-day computerized noise monitoring system for diagnostic evaluation of airport, discussing design and applications 24 p3387 A72-44684
- NOISE POLLUTION**
- Portable detector-recorder for automobile, blast furnace, railroad car, engine room and helicopter infrasonic noise measurements, discussing peak frequencies and subjective effects 01 p0101 A72-10157
- Air transportation evolution and relation to atmospheric and noise pollution 03 p0459 A72-14151
- Aircraft operations effects on community noise pollution, discussing ATC airline operational procedures modifications in terms of noise reduction 04 p0464 A72-14819
- New York-New Jersey megalopolis offshore jetport feasibility, considering noise, air-water pollution, land conservation, cost, etc 13 p1938 A72-28792
- Acoustical environment pollution control, considering noise annoyance effects due to industry and construction, surface and air traffic, alarm devices, radio and TV, etc 13 p2067 A72-29554
- Private and governmental regulatory aspects of environmental noise abatement and control, discussing legal efforts and trends at local, state and federal levels 15 p2340 A72-32614
- Noise pollution measurements parameter selection based on human reactions and attitudes, discussing psychoacoustic experiments, ratings and acoustic instruments 16 p2390 A72-33165
- Hypersonic transports commercial applications, examining economic and noise and air pollution aspects [ICAS PAPER 72-32] 21 p2995 A72-41157
- VTOL aircraft noise reduction through design methods and flight path management in terminal area,

- evaluating acoustical annoyance to surrounding community [ICAS PAPER 72-34] 21 p2995 A72-41159
- Aircraft gas turbine engines environmental effects, considering thermal radiation, acoustic emissions and exhaust gases in relation to propulsion system design parameters 23 p3328 A72-44296

NOISE PROPAGATION

- Turbojet engine noise causes and reduction techniques, noting U.S. antinoise standards 04 p0465 A72-14925
- Radiative noise effect on threshold current, output power and quantum yield of injection laser, evaluating noise loss factor 04 p0531 A72-15077
- Flexible elastic plate nonlinear vibration response and noise transmission from turbulent boundary layer by Monte Carlo technique, discussing subsonic and supersonic flow regions [AIAA PAPER 72-199] 05 p0651 A72-16850
- Cross flow effect on lifting fan noise at subsonic blade tip speeds, analyzing radiation pattern change due to inlet flow distortion 05 p0608 A72-16921
- Acoustic ray path method for computing atmospheric conditions effect on aircraft noise propagation, using digital computer 13 p1897 A72-28840
- Supersonic jet noise and sonic boom sources, propagation and reduction, considering airport community disturbances, aircraft cabin noise and fatigue problems 13 p1898 A72-29578
- Acoustic environmental prediction model for near, mid and far field rocket engine noise 13 p2028 A72-29582
- Sudden decreases of atmospheric due to solar flares effects on lower ionosphere, discussing noise propagation 15 p2230 A72-32256
- Transient acoustic point source disturbance transmission in two dimensional idealized jet, noting velocity profile effects on noise radiated to far field 18 p2679 A72-36406
- Tone noise from rotor/stator interactions in high speed fans. 24 p3433 A72-44917
- NOISE REDUCTION**
- Liquid-base foam sound absorbing properties for jet aircraft noise reduction 01 p0115 A72-10160
- Acoustic power radiated by jet aircraft fuselage structure exposed to turbulent boundary layer pressure field, evaluating noise reduction treatments 01 p0002 A72-10216
- Jet aircraft turbofan engine fan compressor noise reduction by acoustic linings, giving R and D results [BAS PAPER 71 SA6] 01 p0115 A72-10223
- Jet noise reduction technology, hardware and tests for NASA Quiet Engine Program to develop low noise subsonic civil transport aircraft propulsion system [SAE PAPER 710774] 01 p0116 A72-10266
- FM communication system multiterminal phase lock loop state equations derivation from phase model, predicting noise improvement characteristics by analog and digital simulation 01 p0044 A72-10328
- AM and FM noise reduction of cavity and injection stabilized microwave Gunn and avalanche diode oscillators 01 p0037 A72-10644
- Wideband modulation feedback technique for IMPATT diode oscillator AM-FM noise suppression 01 p0037 A72-10647
- Substorm electron drift relationship to cosmic noise absorption on auroral zone morning side, calculating electron energy loss 01 p0063 A72-10918
- STOL aircraft for solving noise reduction and land use problems in future transportation systems, discussing airport location and layout for growing air traffic 01 p0005 A72-11153
- Earplugs effect on passenger speech reception and intelligibility in rotary wing aircraft, noting protection against noise annoyance, fatigue and deafening 01 p0022 A72-11294
- High speed jet noise source physical properties interpretation by theory and scale-model experiments for supersonic transport aircraft noise suppression problem 02 p0154 A72-11973
- Aircraft engine noise effects in airport vicinities, discussing measurement scales, turbofan sources, noise reduction and future air traffic 02 p0154 A72-12022
- Papers on noise and vibration control covering acoustics in free space, outdoors, small enclosures and rooms, measurement, analysis and design problems 02 p0258 A72-12100

- Noise reduction by acoustic interference, using sound generators operating in antiphase mode to noise input 02 p0262 A72-12897

- Jet noise suppression near airports, discussing noise physical description, source relation to engine technology and ICAO certification standards 03 p0309 A72-13097

- Circular polarization parasitical signal reduction in variable profile antennas by curved wire grating, noting application to solar magnetic field studies by radio methods 03 p0331 A72-13289

- Short haul operating systems in air transportation environments, discussing terminal vs cruise configurations, costs and noise abatement 03 p0309 A72-13422

- Air breathing propulsion systems for reducing engine noise level, discussing stoichiometric gas turbine engines, V/STOL propfans and variable-geometry supersonic inlet and exhaust nozzles 03 p0406 A72-13486

- Noise reduction in pulse width modulated converters with rms voltage values digital readout, using active or passive filters methods 03 p0331 A72-13557

- NASA Quiet Engine experimental program for jet aircraft noise reduction, discussing aerodynamic and acoustic evaluation and tests of three fans 03 p0406 A72-13679

- French jet aircraft noise reduction research facilities, discussing in-flight and overfly noise measurements, various silencer configurations and Concorde engine tests 03 p0406 A72-13680

- Cloud interference-free sea surface temperatures, using techniques to reduce noise effect in Nimbus IR radiometer data 03 p0385 A72-14227

- Aircraft operations effects on community noise pollution, discussing ATC airline operational procedures modifications in terms of noise reduction 04 p0464 A72-14819

- Aircraft industry noise reduction efforts to meet FAA requirements for CTOL and STOL aircraft, emphasizing turbofan and compressor noise suppression and/or attenuation 04 p0565 A72-14820

- National Aviation System technology, discussing wide body jets, smokeless turbofans, all-weather operational capability, collision avoidance and noise reduction 04 p0597 A72-14824

- Sound propagation in acoustic ducts with shear flow and wall lining by Ritz-Galerkin technique 04 p0511 A72-14848

- Flight helmet optimal fitting technique, using automatic recording audiometer and noise source for acoustic leakage detection 04 p0479 A72-14873

- Turbojet engine noise causes and reduction techniques, noting U.S. antinoise standards 04 p0465 A72-14925

- Telemetry systems with discrete compression-expansion function, calculating noise stability improvement as compared to linear and nonlinear signal conversion operations 04 p0487 A72-15000

- Jet aircraft noise reduction, discussing engine design modifications 04 p0465 A72-15167

- Sound attenuation in lined rectangular ducts with uniform steady flow, considering aircraft engine noise reduction 04 p0565 A72-15267

- Cross correlation model for interpreting empirical results on binaural noise masking level differences in sinusoidal signal detection, comparing with equalization-cancellation model 04 p0550 A72-15296

- Avalanche transit time diodes noise mechanisms and performance in microwave amplifier, oscillator and mixer applications 04 p0500 A72-15302

- Rocket-borne mass spectrometer with helium cooled electron bombardment ion source to reduce gas-wall interactions effects 04 p0524 A72-15538

- Aircraft noise measurement units and methods, discussing engine design for noise reduction 05 p0611 A72-16026

- Leaning vanes for fan noise reduction, discussing rotor-stator plane fluctuating pressure amplitude decrease and radial distribution modification [AIAA PAPER 72-126] 05 p0706 A72-16823

- Jet engine silencing plug nozzle suppressor configurations acoustic and thrust performance measurements [AIAA PAPER 72-160] 05 p0706 A72-16826

- Twilight atmospheric sounding in oxygen absorption bands to reduce noise level in secondary light scattering 06 p0807 A72-17943

Rotorcraft based on VTOL concept for aircraft noise reduction in urban transportation
06 p0758 A72-18248

X band IMPATT and Gunn oscillator, calculating injection lock time, modulation bandwidth, noise and FM suppression and dynamic response
06 p0788 A72-18471

Hybrid computer method of nonstationary spectrum analysis of aircraft noise, applying to flyover and jet aircraft noise abatement under operational conditions
07 p0911 A72-18778

Externally blown flap noise tests at various nozzle exhaust velocities for STOL aircraft noise reduction [AIAA PAPER 72-129]
07 p0908 A72-18962

Engine fan-compressor maximum noise reduction for given aircraft configuration by acoustic linings on nacelle inlet and exhaust walls
07 p1054 A72-19268

PCM systems low pass filter characteristics from PAM off-band signals noise attenuation calculations
07 p0943 A72-19435

Hovercraft noise and vibration source and reduction for improved crew and passenger comfort
07 p0912 A72-19648

Jet noise intensity reduction by screen across nozzle exit, using acoustic and hot wire measurements
07 p0968 A72-19873

Turbojet and turbofan engines noise signatures and sonic boom effects, discussing frequency spectra, atmospheric attenuation and noise suppression systems
07 p0912 A72-20163

Design criteria for transportation system noise regulation, considering ambient noise, hearing damage, speech interference and subjective reactions
07 p0932 A72-20173

Aircraft noise protective earplug design, employing perforated and slit modifications for additional protection without tympanic membrane pressure excess risk
07 p0933 A72-20187

Laser telemetry performance, considering means of noise reduction
07 p0947 A72-20256

Interference rejection method for high speed analog to digital converters, noting application to on-line computer systems
07 p0948 A72-20386

Acoustical theory application to jet engine noise reduction, developing mathematical model for blade shock wave spacing in noise generation process
07 p1055 A72-20542

Operational and equivalent circuit characteristics of low noise hf and shf transistors in wideband amplifiers
08 p1139 A72-21052

Sonic boom minimization, obtaining positive phase signature pressures as function of altitude, Mach number, weight and length
08 p1110 A72-21903

Helicopter noise and vibration testing and cabin soundproofing for improved comfort
08 p1128 A72-22141

Aerodynamic noise produced by gas jet flow around airfoil, discussing sound reduction
10 p1417 A72-24107

Hot water ejector application to environmental control, considering noise suppression, air and gas purification and dust particles precipitation
10 p1460 A72-24491

Estimate of effectiveness of utilization of composite signals to combat external interference with available a priori data
10 p1436 A72-24580

Commercial applications of quiet light aircraft technology, discussing cost and noise reduction [SAE PAPER 720339]
11 p1576 A72-25596

Noise reduction effects of wake interaction between rotor blade rows in axial flow compressor, cancelling velocity defect at stator position [ASME PAPER 72-GT-15]
11 p1569 A72-25614

Low pressure ratio Q-FAN propulsor noise reduction tests on wind tunnel model, discussing source components and design configurations [ASME PAPER 72-GT-40]
11 p1569 A72-25634

NASA quiet engine program, discussing noise reduction technology for subsonic civil transport aircraft propulsion system [ASME PAPER 72-GT-96]
11 p1705 A72-25667

Aircraft flyover house noise reduction data, noting application to indoors noise level estimation [SAE AIR 1081]
11 p1686 A72-26029

Transistorized amplifier input elements design for biopotentials recording, providing minimum noise at high input impedance
11 p1585 A72-26468

Atmospheric pressure noise reducer for active microbarograph array, evaluating performance in field tests
11 p1613 A72-26510

STOL aircraft role in civil aviation, discussing short range operation, ATC, reduced noise and weather capability
12 p1754 A72-27518

Future short haul aircraft transportation systems, discussing aircraft forms, noise reduction technology and runway requirements
12 p1754 A72-27660

Statistical characteristics of IR receivers with parametric carrier frequency conversion, describing noise index minimization technique
12 p1846 A72-27889

USAF V-51R noise protector earplugs modification to allow for pressure equalization during aircraft climb and descent
12 p1774 A72-28276

Subtraction circuit design for impulse noise elimination at front end of aircraft oriented OMEGA navigation system receiver
13 p1999 A72-29204

Noise and vibration control engineering - Conference, Purdue University, Indiana, July 1971
13 p2005 A72-29553

Undesirable mechanical vibration control concepts for acoustic noise reduction, considering environment characteristics, attenuation degrees and passive and active control mechanisms
13 p2005 A72-29555

Noise and vibration control in industrial and aerospace environments, discussing materials and techniques for structural vibration damping
13 p2059 A72-29557

Building soundproofing codes for airport zoning ordinances, emphasizing wider latitude in land use options
13 p2067 A72-29561

Noise control by Helmholtz resonators, considering equivalent circuits via feedback schemes
13 p2005 A72-29567

Fiberglass performance as duct liner in presence of spinning modes from free field measurements, noting ineffectiveness for plane wave attenuation
13 p2028 A72-29573

Fan engine compressor noise measurement by spinning mode synthesizer for use in duct liner optimization
13 p2028 A72-29574

Supersonic jet noise and sonic boom sources, propagation and reduction, considering airport community disturbances, aircraft cabin noise and fatigue problems
13 p1898 A72-29578

Bibliography on noise control covering surface transportation, machinery and aircraft noise, industrial criteria, biodynamics, legislation and measurement
13 p2006 A72-29588

Noise suppression by time exposure oscilloscope photography to enhance repetitive electric signals obscured by noise of equal amplitude
13 p1959 A72-29754

French book on industrial acoustics elements and metrology covering transmission, absorption, noise and complex sound measuring apparatus and preventive measures
15 p2275 A72-31524

Avalanche photodiodes for Nd and injection lasers radiation detection, reducing noise equivalent power
15 p2247 A72-32035

Adjacent channel discrimination enhancement in Gray-scale binary coded two dimensional array, using checkerboard filter for pattern noise suppression
15 p2238 A72-32162

Low noise aircraft-engine configuration feasibility, discussing turbofan engine noise reduction
15 p2181 A72-32322

Holographic precoded TV system, discussing coherent light noise elimination and redundancy effects on image quality
15 p2239 A72-32356

RB 211 three-shaft turbofan engine for L-1011 airliner, describing design for noise reduction
15 p2298 A72-32428

Private and governmental regulatory aspects of environmental noise abatement and control, discussing legal efforts and trends at local, state and federal levels
15 p2340 A72-32614

U.S. federal regulation on occupational noise exposure control for hearing loss prevention, discussing noise measurement, reduction and periodic tests
16 p2358 A72-33324

STOL aircraft for civil transport applications, considering optimum design concepts, noise reduction and terminal facility requirements
16 p2348 A72-33331

Twilight atmospheric sounding in oxygen absorption bands to reduce noise level in secondary light scattering
16 p2386 A72-33784

Statistical characteristics of IR receivers with parametric carrier frequency conversion, describing noise index minimization technique
16 p2427 A72-33998

STOL aircraft minimum noise takeoff trajectories determination, taking into account engine thrust and listeners distance from noise source [AIAA PAPER 72-665]
16 p2349 A72-34072

NASA/General Electric joint development of low noise propulsion technology, describing demonstrator engine A design, components development and aerodynamic/acoustic performance evaluation [AIAA PAPER 72-657]
16 p2443 A72-34077

Leading edge serrations effect on rotor noise and aerodynamic characteristics, noting vortex and rotational noise reduction and overall efficiency decrease [AIAA PAPER 72-655]
16 p2349 A72-34079

Sonic boom alleviation by flow field alteration near supersonic aircraft, considering finite rise times, reduced overpressures and shock pressure rises [AIAA PAPER 72-653]
16 p2349 A72-34081

Jet noise reduction by screen placed across jet flow, investigating acoustic properties, velocity and pressure in mixing zone [AIAA PAPER 72-644]
16 p2381 A72-34088

Acoustic attenuation and thrust loss incurred by shrouded multiube supersonic jet noise suppressor [AIAA PAPER 72-642]
16 p2381 A72-34090

NASA R and D for STOL short haul transportation systems, discussing propulsive lift, blown flap and augmentor wing concepts, noise reduction, etc
17 p2487 A72-34238

Bayesian recursive linear Kalman filtering technique for image estimation with noise background elimination, proposing time invariant dynamic model to provide stationary statistics
17 p2520 A72-34403

Design requirements for a quiet helicopter. [AHS PREPRINT 604]
17 p2488 A72-34484

Reduction of noise and acoustic-frequency vibrations in aircraft transmissions. [AHS PREPRINT 661]
17 p2491 A72-34508

Digital correlator for change detection in picture element processing with CDC 1700 computer to obtain spatial alignment accuracy
17 p2556 A72-35538

Bayesian recursive estimation by Kalman filtering for enhancement of image corrupted by additive random noise
17 p2557 A72-35539

Externally blown flap impingement noise. [AIAA PAPER 72-664]
17 p2487 A72-35961

Tracking radar system rain clutter reduction by backscatter polarization technique for signal phase and magnitude adjustment
18 p2659 A72-36310

Sonic jet noise pressure source model for radiated sound power and jet pressure frequency spectra ratio derivation with application to noise suppression
18 p2680 A72-36414

NASA R and D programs for quiet STOL aircraft and engines development
18 p2721 A72-36503

Internal noise reduction in hovercraft.
18 p2642 A72-36574

Spatial diversity technique based on predetector equal-gain combining for fast fading reduction of AM radio receiver, using phase shifter
18 p2661 A72-36845

The theoretical amplification limit of modulation amplifiers with correlation detection
18 p2668 A72-37035

Forward flight effects on mixer nozzle design and noise considerations for STOL externally blown flap systems. [AIAA PAPER 72-792]
19 p2746 A72-38109

Flight evaluation of three-dimensional area navigation for jet transport noise abatement. [AIAA PAPER 72-814]
19 p2750 A72-38116

Aircraft noise problem in piston engine to turbofan jumbo jet transports, discussing need for noise reduction research [AIAA PAPER 72-815]
19 p2750 A72-38117

Jet aircraft noise sources in subsonic and supersonic exhaust mixing process, suppressing noise via turbofan exhaust speed reduction
19 p2849 A72-38380

Ionosonde receiver with automatic noise suppression and digital-analogue recording of the first ionospheric reflection.
19 p2805 A72-38867

Interference suppression design of switching circuits utilizing slewing rates.
20 p2906 A72-38982

Frequency assignment for collocated transmitters using the branch-and-bound technique.
20 p2901 A72-38986

Minimisation of the solar array generated electrical interference on the GEOS satellite.
20 p2889 A72-38990

An algorithm for linearly constrained adaptive array processing.
20 p2904 A72-39777

Quiet engine design for V/STOL and reduced takeoff and landing /RTOL/ aircraft, discussing various engine noise sources, countermeasures and tolerance levels
20 p2963 A72-39819

Supersonic aircraft wing form influence on sonic boom, discussing supersonic wind tunnel tests for noise reduction
20 p2888 A72-39931

Thermal imaging with pyroelectric IR detector arrays, discussing signal processing by digital technique to eliminate voltage offset variations effects in preamplifiers
20 p2928 A72-39968

- ATS F and G radio link with ground stations, discussing telemetry and command functions with redundancy for RF interference minimization
21 p3019 A72-40883
- A model of low-frequency sound propagation in a lined duct.
21 p3085 A72-41112
- Noise radiation from V/STOL aircraft.
[ICAS PAPER 72-22] 21 p2995 A72-41147
- VTOL aircraft noise reduction through design methods and flight path management in terminal area, evaluating acoustical annoyance to surrounding community
[ICAS PAPER 72-34] 21 p2995 A72-41159
- NASA Quiet Engine program R and D on conventional takeoff and landing subsonic cruise aircraft engine noise
[ICAS PAPER 72-48] 21 p3100 A72-41173
- Noise control technology for jet-powered STOL vehicles.
[ICAS PAPER 72-50] 21 p2995 A72-41175
- Analysis of noise immunity of two-channel eddy-current flow detector.
21 p3057 A72-41723
- Jet noise generation theory (Lighthill-Ffowcs Williams) verification by model tests, discussing means of reducing or eliminating shock cells
[ICAS PAPER 72-55] 21 p3047 A72-41852
- NASA's quiet engine programs.
22 p3217 A72-43152
- Noise resistance of optical communication lines with radio and optical AGC systems
23 p3264 A72-43770
- Supersonic aircraft focused sonic boom suppression by slowing down during turning flight, obtaining conditions for focus cut-off at ground by atmospheric refraction
23 p3251 A72-44125
- NOISE SPECTRA**
- Quasi-steady spectrum of hydromagnetic noise in proton belt, using random excited broad wave fields in nonisothermal magnetosphere
01 p0118 A72-10367
- VLF noise spectra in earth-ionosphere cavity due to thunderstorm discharges, noting resonance level splitting by geomagnetic field
01 p0028 A72-10598
- LF noise spectrum of Gunn oscillators due to direct modulation of rf admittance for constant voltage bias source
01 p0037 A72-10639
- Millimeter and submillimeter microwave spectrometric studies of high temperature plasmas and noise emission, discussing instrumentation and absolute measurements
02 p0223 A72-11409
- Dc excited argon laser anode oscillation noise, discussing relation to ballast resistance, suppression conditions and current fluctuation frequency response to laser fluctuation
02 p0239 A72-12826
- Tube wall temperature and acoustic noise spectra dependence on thermal flux density in bubble coalescence
03 p0458 A72-14162
- Optimal digital Kalman filtering for systems with continuous input noise by autocorrelation function matching
[ASME PAPER 71-WA/AUT-21] 05 p0640 A72-15952
- Periodic quasi-noise spectrum and amplitude modulation of LF pulsed signals from earth in magnetosphere plasma
05 p0696 A72-16605
- Turbobfan multiple pure tone noise analysis, discussing rotor geometry, relative Mach number and incidence angle effect on sound emission
[AIAA PAPER 72-127] 05 p0706 A72-16824
- Jet flap type exhaust flows acoustic and fluid dynamic characteristics, measuring sound power output and noise spectra for various configurations
[AIAA PAPER 72-130] 05 p0608 A72-16920
- Aerodynamic noise measurement, discussing physical units, spectral analysis, conversion and correction formulas
05 p0614 A72-17195
- Noise spectra of double sided CW silicon TRAPATT oscillator comparable to silicon IMPATT oscillator
06 p0783 A72-17482
- Cylindrical plasma ion-acoustic resonance measurements from various excitation methods for noise component identification
06 p0856 A72-17523
- Si MOSFET substrate resistivity effect on surface state noise spectra
06 p0783 A72-17609
- Kalman-Bucy colored noise filtering discrete time results and continuous time linear minimum variance estimation by calculus of variations
06 p0793 A72-17955
- Hybrid computer method of nonstationary spectrum analysis of aircraft noise, applying to flyover and jet aircraft noise abatement under operational conditions
07 p0911 A72-18778

- Spectral measurements of jet turbulence noise in core and annular mixing region, using subsonic test experiments
[AIAA PAPER 72-158] 07 p0966 A72-18957
- Low frequency modulation noise generation due to conductance fluctuations in Gunn oscillators, measuring noise spectra temperature dependence
07 p0954 A72-19050
- Schottky barrier and n-n heterojunction diodes hf noise, considering ideality factor effect
07 p0955 A72-19358
- Turbojet and turbofan engines noise signatures and sonic boom effects, discussing frequency spectra, atmospheric attenuation and noise suppression systems
07 p0912 A72-20163
- Standard procedures development for perceived noisiness or noise annoyance evaluation, taking into account spectral complexity, spectra weighting, time integration and onset duration
07 p0932 A72-20166
- Stationary statistical model for microwave oscillator flicker frequency noise, leading to power spectral density and time domain frequency instability
[ONERA, TP NO. 1085] 08 p1141 A72-21431
- Frequency response of spectral noise amplitude in chalcogenide glass switches
09 p1366 A72-22215
- German monograph on frequency noise of microwave transistor power oscillators covering generation mechanism and spectral density determination
09 p1285 A72-22340
- Statistical noise characteristics and conditional signal distribution function measurements at output of standard FM demodulator
09 p1277 A72-22570
- Band limited background noise variance measurements by analog and digital techniques
09 p1280 A72-23103
- Resonance occurrence in generation-recombination noise spectrum of Co 60 gamma irradiated Ge single crystals, investigating Hall effect
09 p1372 A72-23112
- Model of dynodes system with random electron-hole pairs number, calculating equations for mean fluxes transport and correlated noise fluctuations
09 p1280 A72-23116
- LF noise spectral density measurements in avalanche diodes as function of frequency, considering mean square voltage drift
09 p1287 A72-23118
- LF originated background noise in Gunn oscillators, developing evolution equation for oscillator weakly perturbed by noise
09 p1288 A72-23121
- Noise of high electric field biased gallium arsenide diodes, calculating LF power spectrum
09 p1288 A72-23123
- Instantaneous frequency statistical characteristics of passive noise spectra and fluctuating signals reflected from nonpoint moving radar targets
10 p1436 A72-24514
- High efficiency low noise volume /Lippmann-Bragg/ holograms recorded on photographic plate, using bleaching-darkening procedure
11 p1629 A72-25316
- Si Pd-n-p/plus/ transit time diode microwave oscillator, discussing fabrication, FM noise spectrum and bias current fluctuation
11 p1604 A72-25748
- Spectral density of frequency deviating process for performance predictions from oscillator testing and frequency noise calibration, discussing sample averages convergence to statistical values
11 p1593 A72-25892
- Spatial noise in holographic images of diffusely scattering objects with allowance for recording apparatus resolving capacity
12 p1810 A72-27871
- Measurement of spatially coherent and incoherent structure of axial compressor-generated noise modes propagating in duct
[ONERA, TP NO. 1045] 12 p1861 A72-28049
- Mathematical random fluctuation models for noise and energy spectra of pulsed processes during current passage through semiconductors
13 p2021 A72-29064
- Optimal random search noise recognition systems with Bayes teaching technique
13 p1924 A72-29162
- Parametric resonance suppression in annular laser by steady noise perturbation, discussing beat signal spectrum
13 p1968 A72-29505
- Noise generated by free flow turbulence incident on rotor or stator in axial flow fans and compressors, noting sound spectrum dependence
13 p2028 A72-29575
- Digital data processing techniques for aircraft engine noise data reduction, analyzing fan noise spectrum
13 p1925 A72-29840
- Tu-104 turboprop aircraft flight noise measurements and spectral changes at different distances from land-

- ing strip, evaluating public nuisance and resident reactions
14 p2072 A72-30446
- Lf white noise voltage theory of avalanche diode extended to small multiplication M values and unequal hole and electron avalanche ionization coefficients
15 p2206 A72-31642
- Thermodynamic plasma density fluctuation induced electric noise field measurement as means to determine plasma density and electron and ion temperatures
15 p2284 A72-31943
- Current noise spectra in single crystals and polycrystals of transition metal compounds, discussing flicker noise origin
15 p2293 A72-32384
- Gaussian beam laser Doppler velocimeter system under high scattering center concentrations and steady flow conditions, deriving noise spectral densities and SNR
16 p2390 A72-33210
- FM/FM multiplex receiver with carrier and subcarrier demodulators, deriving average click rate, output noise spectrum and SNR from Rice model
16 p2362 A72-33212
- Spatial noise in holographic images of diffusely scattering objects with allowance for recording apparatus resolving capacity
16 p2395 A72-33980
- The estimation of nonstationary spectra from moving acoustic source distributions.
[AIAA PAPER 72-667] 17 p2583 A72-35486
- Acoustic power spectrum of a subsonic jet
17 p2541 A72-35544
- Low energy auroral electron precipitation associated ELF noise band observation by polar-orbiting satellite INJUN 5
17 p2517 A72-35593
- The effects of electron bombardment on the noise properties of field effect transistors.
18 p2666 A72-36322
- Quantum noise in semiconductor lasers.
18 p2697 A72-36345
- Temperature dependence of low-frequency excess noise in junction-gate FET's.
18 p2666 A72-36454
- Characteristic features of ELF-noise spectra during the excitation of the earth-ionosphere resonator by cosmic sources
18 p2662 A72-36861
- Si MOSFET elementary channel resistances before saturation onset from one dimensional theory, investigating current noise
18 p2668 A72-37037
- Ambipolar diffusion noise in a semiconductor in the presence of a magnetic field.
19 p2846 A72-38599
- Frequency instability due to discrete noise in frequency synthesizers.
19 p2775 A72-38618
- Theoretical and experimental investigations of a second-order phase-coordinate receiver
19 p2775 A72-38658
- Polar ionosphere ELF/VLF noise distribution from Alouette 2 electric dipole observations
20 p2903 A72-39538
- A general analysis of noise in Gunn oscillators.
20 p2909 A72-39782
- Observation of quantum-phase and quantum-amplitude noise for a laser below and above threshold.
20 p2934 A72-39813
- Analysis of large-signal noise in Read oscillators.
21 p3032 A72-40698
- A numerical evaluation and experimental study of the intermodulation noise spectra of traveling wave tubes.
21 p3033 A72-40880
- Signal voltage density, pulse shape and noise power spectrum analysis of matched filter configurations in IR scanning system model
21 p3033 A72-41078
- Signal voltage density, pulse shape and noise power spectrum analysis of running integrator output in IR scanner model
21 p3056 A72-41086
- Discrete component of the noise spectrum of a supersonic annular jet
21 p3045 A72-41100
- Tu-104 turboprop aircraft flight noise measurements and spectral changes at different distances from landing strip, evaluating annoyance factors and resident reactions
21 p3009 A72-41110
- Description and use of a method for characterizing noise sources in jets
[ICAS PAPER 72-35] 21 p3046 A72-41160
- Parametric method of statistical synthesis with incomplete initial information on signal and noise distribution, discussing signal detection in white noise with unknown spectral density
22 p3154 A72-42230
- Current noise and conductance-temperature characteristics of thin discontinuous Pt films on glass sub-

strate interpreted by quantum mechanical electron tunneling model
22 p3214 A72-42453

General transport theory of noise in pn junction-like devices. I Three-dimensional Green's function formulation.
22 p3160 A72-43083

General transport theory of noise in pn junction-like devices. II - Carrier correlations and fluctuations for high injection.
22 p3160 A72-43084

Statistical analysis of the sound level distribution of aircraft noise as a function of time
23 p3252 A72-44337

Basic directivity and spectra of jet noise with improved correction for refraction.
24 p3389 A72-44678

Statistical noise characteristics and conditional signal distribution function measurements at output of standard FM demodulator
24 p3379 A72-44749

Noise properties of the injection-limited Gunn diode.
24 p3385 A72-44962

External noise effect on capture conditions in ring laser, noting capture bandwidth narrowing with noise spectral density increase
24 p3410 A72-45423

NOISE STORMS
Statistical tests for spectral correlation analysis of continuum VHF radio emission fluctuations from noise storms
21 p3102 A72-41778

NOISE SUPPRESSORS
U NOISE REDUCTION
NOISE TEMPERATURE
Radome enclosed Haystack parabolic antenna characteristics as radio astronomical instrument, discussing gain, polarization, interference susceptibility and noise temperature
[AD-737166] 01 p0032 A72-11233

Millimeter wave sky noise temperature measurement with 16 and 35 GHz radiometers, including antenna loss and rain and cloud effects
02 p0171 A72-11665

Josephson effect /superconducting weak link/ devices for low frequency magnetic field sensing, noting applications in magnetocardiography and absolute noise thermometry
08 p1218 A72-21919

Alternating Josephson effect and junctions applications to radiation generators and detectors, electromotive force regulators, oscillators, mixers and noise thermometers
09 p1370 A72-22799

Noise temperature and admittance of space charge limited double cathode tube with transit time effects at microwave frequencies
10 p1454 A72-25105

Bulk negative resistance devices equivalent noise temperature derivation via diffusion-impedance field noise formula, obtaining Gunn oscillators SNR approximate value
10 p1454 A72-25106

Earth station parabolic antenna gain-noise temperature ratio measurement using radio star and Applications Technology Satellite technique
[AIAA PAPER 72-528] 12 p1779 A72-27354

Microwave radiometer performance analysis, deriving input noise power relation to instrument indication in terms of noise parameters
14 p2105 A72-30587

Antennas scattering coefficients measurement by ground and atmospheric radiation, permitting antenna noise temperature components determination
15 p2206 A72-31652

Parametric amplifiers for satellite microwave communication systems, discussing frequency stability, noise temperature and gain relationships
16 p2369 A72-33520

SHF airborne distributed phased array antenna system.
17 p2531 A72-35572

An X-band paramp with 0.85 dB noise figure /uncooled/ and 500 MHz bandwidth.
19 p2770 A72-32758

Schottky diode frequency converter characteristics, considering series resistance, housing reactance, barrier layer capacitance, noise sources and noise temperature
19 p2773 A72-37937

A general analysis of noise in Gunn oscillators.
20 p2909 A72-39782

Low-noise parametric amplifiers for radio astronomical observations at 18 to 21 cm wavelengths
21 p3025 A72-40303

Variation of tropospheric slant-path attenuation in the UK at 11.75 and 17 GHz.
22 p3155 A72-42751

Accuracy of measuring the noise figure of microwave two-ports
23 p3273 A72-44313

NOISE THRESHOLD

Impulse noise reproduction for temporary threshold shift and impulse noise measurements, considering rise time, frequency response and limitations of tape recorders
04 p0521 A72-14847

Noise threshold improvement of PCM signals for satellite transmission, using quality detector and error detecting codes
10 p1441 A72-25102

Audiometric determination of human temporary threshold shifts due to steady state and impulsive noise
11 p1583 A72-25873

Amplitude-time quantization of radar pulse signals in analog-digital converter, improving noise threshold and ranging accuracy
11 p1595 A72-26294

Binaural frequency discrimination in masking level difference /MLD/ noise under homophasic and antiphase conditions
13 p2006 A72-29771

Coherent IR heterodyne receivers with quantum noise threshold sensitivity for laser communications and radar transmission
15 p2198 A72-32063

Threshold noise of an FM receiver at small signal-to-noise ratios
22 p3154 A72-42236

Reciprocal mean-square error and signal-to-noise ratio as distinct performance measures in below-threshold communication.
23 p3265 A72-44177

Cumulants of multidimensional response of linear and nonlinear systems to Poisson distributed impulses, estimating joint probability distribution and evaluating threshold statistics
23 p3314 A72-44368

NOISE TOLERANCE

Rating scale judgments of aircraft noise based on surveys around airport
03 p0309 A72-12956

Psychophysical comparison methods for evaluating noisiness or annoyance values of sounds
07 p0932 A72-20168

Community response prediction to noise based on laboratory tests of individual acceptability judgments.
07 p0932 A72-20172

Human performance under intense noise, measuring effects on muscle tension, metabolism, respiration rate, visual accommodation, saccadic eye movement and dark adaptation
11 p1583 A72-25728

Acoustical environment pollution control, considering noise annoyance effects due to industry and construction, surface and air traffic, alarm devices, radio and TV, etc
13 p2067 A72-29554

Noise and vibration stress combined effects on human mental performance as function of time of day, taking into account circadian rhythm factor
14 p2081 A72-31083

Individual functions and intersubject differences of noise annoyance susceptibility, noting relationship to Rorschach test
16 p2357 A72-32987

NOMENCLATURES

Mars surface features Schiaparelli nomenclature from Mediterranean Sea area classical geography
04 p0569 A72-14500

Extension of lunar nomenclature to the far side of the moon
17 p2610 A72-35213

NOMINAL VALUES

U APPROXIMATION

NOMOGRAPHS

Tunnel diode microwave oscillator design by circle diagrams of operational and load characteristics
01 p0035 A72-10048

Nomogram determination of frequency characteristics of closed loop linear automatic control systems
02 p0197 A72-12563

Gravity data free air and Bouguer correction /elevation correction/ by nomographic alignment chart
06 p0809 A72-18148

Optimal nomographic determination of surface gyrocompass parameters ensuring minimum period of undamped precession oscillations
09 p1307 A72-22346

Fermi level and scattering phase function nomograms for semiconductors with parabolic and isotropic energy bands, noting charge transfer effects
11 p1700 A72-25781

Onboard turbogenerator igniter operating conditions determination from fuel-air ratio obtained from nomogram
12 p1861 A72-28145

Lifetime nomogram for evaporating drop at vapor combustion, applying thermomechanical and aerodynamic decay to jet engine combustion chamber [DFVLR-SONDDR-203] 16 p2477 A72-33422

NONCONSERVATIVE FORCES

Nomographic correction method for quantization error limited data systems, modifying root-summed-squared error analysis for non-Gaussian distribution
16 p2367 A72-33863

Nomogram for heat detector size determination from thermal inertia index and Biot number
16 p2395 A72-33968

A method of solving the problem of choosing an optimal transfer orbit with the aid of an invariant nomographic scale
17 p2610 A72-35217

A nomogram for determining the phase difference of an elliptically polarized wave
18 p2663 A72-37219

A nomogram for look angles to geostationary satellites.
19 p2869 A72-37298

Solar altitude nomogram for estimating terrestrial ground objects heights from shadow length on aerial photographs
22 p3181 A72-43196

NONADIABATIC CONDITIONS

U ADIABATIC CONDITIONS

NONADIABATIC THEORY

Supplemental internal gaseous film cooling combined with external cooling of combustion chamber walls, analyzing effectiveness via nonadiabatic model [AICHE PREPRINT 3] 18 p2741 A72-36550

Viscous non-adiabatic laminar flow through a supersonic nozzle - Experimental results and numerical calculations.
[ASME PAPER 72-HT-49] 20 p2985 A72-39662

Application of variational methods to the solution of some thermal shock problems
21 p3128 A72-40978

Nonadiabatic condition effects on ultrarelativistic electron energy losses in geomagnetic trap in remote magnetosphere regions
22 p3218 A72-42224

NONAXISYMMETRY

U ASYMMETRY

NONCONDUCTORS

U ELECTRICAL INSULATION

NONCONSERVATIVE FORCES

Nonconservative radiative transfer in spherically symmetric system, calculating linearly polarized electron scattering atmosphere
01 p0102 A72-11127

Nonconservative stability problems, obtaining eigenvalues with adjoint variational methods [AD-742170] 04 p0583 A72-14446

Mathematical modeling of discrete nonconservative dynamic elastic systems for finite sensitivity, using Liapunov stability
06 p0840 A72-18320

Galerkin method application to nonconservative nonself-adjoint aeroelasticity problems based on interpretation as mathematical formulation of virtual work principle
07 p1025 A72-18788

Linear mechanical elastic systems divergence with infinitely large frequency onset, noting discrete cantilever beam under nonconservative forces [ASME PAPER 71-APM-DDD] 10 p1555 A72-24189

Simultaneous nonhomogeneous internal and external friction effects on nonconservative force systems motion stability, considering cantilever beam compression
12 p1845 A72-27321

Numerical analysis methods for solution stability of reduced field equations describing perturbed motion of body under nonconservative loads
13 p2001 A72-28485

Averaging variational Euler-Lagrange equation for nonlinear waves with dispersion in nonconservative system
13 p2003 A72-28774

Generalized Thomson-Tait-Chetaev stability theorem for n-degrees-of-freedom mechanical oscillating systems with virtual nonconservative displacement forces
15 p2274 A72-31456

Unsymmetrical coupled columns stability under nonconservative lateral and end loading, using finite element method
15 p2331 A72-32557

A comparison of approximate methods for solving non-conservative problems of elastic stability.
17 p2634 A72-35410

An approximate analysis of non-linear non-conservative systems subjected to step function excitation.
17 p2582 A72-35412

Some properties pertaining to the stability of circulatory systems.
18 p2737 A72-37060

Integration of equations of motion for nonconservative holonomic systems with pulsed coupling factors
19 p2825 A72-38192

The post-flutter oscillations of discrete symmetric structural systems with circulatory loading.
21 p3120 A72-41207

On the destabilizing effect in a non-conservative system with slight internal and external damping.
21 p3124 A72-41483

Stability of elastoplastic rod under external conservative and nonconservative forces, discussing nonconservative component effect and critical load magnitude 22 p3234 A72-42149

NONDESTRUCTIVE TESTS NT PRELAUNCH TESTS

Nondestructive determination of temperature dependence of elastic moduli of Al alloy and Ni and stainless steels by resonant frequency method 01 p0084 A72-10518

NDT program for detectability changes of tight defects in Al as function of applied load 01 p0085 A72-10756

Nondestructive evaluation in aerospace, weapon systems and nuclear applications Conference, San Antonio, April 1971 01 p0075 A72-10801

Acoustic emission tests of nuclear pressure vessels and piping, detecting weld slag, porosity, fatigue microcracking and stress corrosion cracking 01 p0048 A72-10802

Acoustic emission characteristics from nuclear reactor irradiated steels during tensile and wedge opening load tests 01 p0068 A72-10803

Acoustic emission evaluation of damage of filament wound composite materials under tensile loading applied to spherical test shapes 01 p0069 A72-10804

Nondestructive identification of alloy elements by nondispersive X ray fluorescence spectroscopy using Si/Li detectors and radioisotope sources for mobile applications 01 p0069 A72-10805

Resonance neutron transmission for nondestructive absorption spectroscopic evaluation of quantitative chemical or isotopic composition at depth in large samples 01 p0069 A72-10806

Reactor source neutron radiography for nondestructive testing, noting hydrogen detection, boron fiber imaging and photographic or electronic color enhancement 01 p0069 A72-10807

Radiographic detection of small flaws in bulk graphite and carbon/carbon composites, improving image quality and sensitivity by contrasting liquid impregnation 01 p0069 A72-10808

Nondestructive radiographic tests for void and unbond detection in Scout solid propellant rocket motors 01 p0114 A72-10812

Nondestructive radioactive gas penetrant tests for porosity and fatigue damage in jet engine castings 01 p0069 A72-10813

Portable self contained ultrasonic field inspection equipment for nondestructive crack detection in T53 gas turbine compressor disks 01 p0076 A72-10814

Integrity control procedures for machining, drilling and grinding of steel and Ti alloy aircraft parts, discussing nondestructive inspection method [SME PAPER IQ 71-238] 01 p0076 A72-10969

Nondestructive tests of Nb alloy radiative thermal protection heat shield design for space shuttle requirements 01 p0048 A72-10980

DGS diagrams for defect size determination in ultrasonic NDT 01 p0070 A72-11016

Automatic ultrasonic testing equipment for NDT tests of helicopter rotor blades 01 p0071 A72-11021

DC-10 nondestructive testing manual, detailing section/subject format, methods, planned area accessibility and aircraft maintenance 01 p0078 A72-11109

NDT holographic interference pattern technique to determine Advanced Test Reactor fuel element swage joint tightness 01 p0078 A72-11110

Point density measurement and crack detection in P/M green compacts with interconnected porosity by pneumatic tests, noting application to quality control 02 p0233 A72-11458

Graphite-epoxy conductive polymers as fatigue damage indicators of structures under cyclic strain [SESA PAPER 1915] 02 p0287 A72-11509

NERVA fuel quality control, discussing planning, nondestructive tests, computer data acquisition and certification systems 02 p0258 A72-11552

Subsurface discontinuity detection by microwave radiometry, noting microwave temperature correlation with moisture patterns 02 p0209 A72-11792

Na and K trace amounts detection in Al based solid rocket propellants by neutron activation analysis, using gamma ray spectroscopy for nondestructive analysis 02 p0270 A72-11959

Impending metal fatigue failure holographic detection by optical correlation of coherent light reflection from deformed surface structure as function of time 02 p0294 A72-12442

Metal fatigue damage nondestructive detection, discussing inspection methods, equipment, advantages, limitations and test results [AD-741977] 02 p0296 A72-12498

Acoustic emission techniques in defect structure materials tests, discussing fracture strength, crack propagation, fatigue, plastic deformation and creep in metals, composites and rocks 03 p0362 A72-13225

TV time lapse interferometry and contouring for photoelastic nondestructive testing, comparing with photographic techniques 03 p0358 A72-13436

Ultrasonic flaw detector pulse transducers operation using electrodynamic and capacitance receivers 03 p0361 A72-13987

Ultrasonic defectoscope sensitivity, discussing statistical character of random signal level distribution and test conditions 03 p0364 A72-13988

NDT for detecting density variation, local anomalies regions and completeness of copper-infiltrated W powder rocket nozzle inserts 03 p0364 A72-14025

Thermography capabilities and limitations for design analysis and quality control in nondestructive testing of material test vehicle carbon-carbon composite cones 03 p0364 A72-14026

Nondestructive testing for materials inspection and monitored aircraft maintenance programs 03 p0364 A72-14201

Boron/aluminum composite sheet quality evaluation by radiography, ultrasonic C-scanning and micro-ohm resistance measurement, correlating with resistance weld strength 04 p0526 A72-14839

Nondestructive examination of steel plate weld specimen, comparing ultrasonic and X ray techniques 04 p0527 A72-14840

Stress measurement at surface of polycrystalline bodies by nondestructive X ray diffraction method 04 p0525 A72-15553

Crossing points computed curves from metal sheet response to pulsed eddy currents, suggesting independent lift-off distance variation possibility 05 p0666 A72-17049

Ultrasonic acoustic holography for real time nondestructive testing of cracks, voids, nonbonds and other defects in metals, ceramics and plastics [SAE PAPER 720173] 06 p0811 A72-17319

Acoustic emission systems application to materials nondestructive testing, discussing single and multiple piezoelectric transducer arrays with on-line computer analysis [SAE PAPER 720175] 06 p0819 A72-17323

Spacecraft incipient failure detection, stressing acoustic energy release techniques 07 p0964 A72-18829

X ray, ultrasonic and eddy current nondestructive testing of aircraft structure for maintenance and special problems 07 p0994 A72-18840

Micrographic evaluation of inclusions in austenitic stainless steel tubes ensuring surface quality control 07 p0994 A72-18972

Two-fold congruency tests of penetrant inspection system sensitivity using hydrophilic and lipophilic removers/emulsifiers/ 07 p0995 A72-19650

Nondestructive tests of welded joint heterogeneities and corrosion cavities by densitometric photometric differentiation of radiographs 07 p0995 A72-19674

Holography applications and processes, discussing holographic microscopy, particle analysis, high speed photography, data storage and retrieval, interferometry, nondestructive testing, etc 07 p0989 A72-20221

Nondestructive testing - Conference, Trieste, Italy, May 1971 07 p0991 A72-20420

Optimal test conditions in magnetoscopic control by electrical system for subsurface defects detection, obtaining tangential magnetic field on carbon steel plates 07 p0991 A72-20421

Nondestructive ultrasonic determination of defects in structural steel blanks 07 p0991 A72-20423

Bulk conductors dc field distribution applications to electrical resistivity measurements and nondestructive testing 07 p0998 A72-20461

Nondestructive testing of electroexplosive devices, considering bridgewire-explosive interface and faults-abnormalities interrelationship 08 p1220 A72-20764

Nondestructive testing techniques - ISA Conference, Chicago, October 1971 08 p1163 A72-20914

Holographic interferometry for nondestructive testing, discussing applicability to laminate structures 08 p1164 A72-20924

Nondestructive determination of glass reinforced plastics normal elastic and shear moduli and strength characteristics by vibrational, pulsed and acoustic methods 08 p1195 A72-21773

Betatron electron beam evaluation for flaw detection in laminated materials by radiographic and radiometric methods 08 p1177 A72-21774

Gamma radiation source energy and activity determination for radiometric flaw detection in steel 08 p1177 A72-21775

High pressure bulk modulus test rig for composite material specimen nondestructive test, discussing measurement method and errors 09 p1315 A72-23391

Welded high strength maraging steels fatigue performance, stressing nondestructive testing technique 09 p1332 A72-23617

Thermal neutron radiography industrial applications, describing nondestructive testing techniques 10 p1485 A72-23813

Diffusion bonded joints tensile strength determination from ultrasonic pulse echo and attenuation measurements, discussing contamination and SNR effects 10 p1485 A72-23814

Delayed pulse echo and through-transmission ultrasonic techniques for nondestructive inspection and quality control of braze bonds in high current electric contact assemblies 10 p1487 A72-24173

Visual image indicator used beside and behind objects for neutron radiography quality determination and radiographs series grading 11 p1632 A72-25822

Multifrequency ultrasonic pulse echo interference effect applying to flaw detection in metals 11 p1687 A72-26051

NDT of diffusion formed coatings on refractory alloys and superalloys, stressing eddy current technique 11 p1641 A72-26287

NDT application to aircraft design and reliability, discussing fatigue life analysis and in-service monitoring for structural elements, components and airframes 12 p1813 A72-27198

Metal matrix composites radiography in NDT, discussing parameters optimization and uses of microfilm, densitometers and high resolution vidicon tubes 12 p1813 A72-27199

Electrothermal NDT of metal structures by IR scanning camera or thermal image transducer 12 p1813 A72-27200

Fracture toughness of high strength alloys, discussing rocket motor cases, nondestructive test standards and subcritical crack growth 12 p1829 A72-27656

Frequency method of mechanical impedance monitoring of natural frequency of transducer-article system under load in defectoscopy 13 p1956 A72-28923

Optimal level of recording defects in ultrasonic flaw detection, taking into account inspection conditions and defect size probability distribution 13 p1956 A72-28924

Thickness gage for continuous autographic record in nondestructive testing of irregular cross section specimens 13 p1959 A72-29759

Nondestructive technique for continuous recording of thickness or contour profiles, using mechanical probes 13 p2000 A72-29760

Reliability of nondestructive ultrasonic testing methods of quality control, discussing defect size distribution and detectability coefficient 14 p2106 A72-30149

Radiation defectoscopy methods based on calculating perturbations in gamma radiation field due to inhomogeneities 14 p2106 A72-30150

Fatigue life tests of structural sandwich plates with honeycomb layer, considering temperature effects, material scattering and defects inside honeycomb by nondestructive methods 14 p2164 A72-30280

Leak detection in pressurized installations via NDT, discussing uses of fluid tracers, thermal and acoustic sensors, halogen detectors, He mass spectrometers and radioactive tracers 14 p2104 A72-30374

Lamb acoustic surface wave method for rapid nondestructive evaluation of rolling texture in arbitrarily thick metal sheets and plates 14 p2107 A72-30615

Carbon fiber reinforced plastics nondestructive testing by ultrasonic compressional and shear wave resonance 14 p2107 A72-30856

- Continuous NDT of coalescers /jet fuel filters/ by liquid crystals, detecting split seams, cap leaks, cracks, material imperfections and epoxy filled voids [ASME PAPER 72-DE-25] 14 p2108 A72-30867
- Heat flux nondestructive inspection methods for laminate and sandwich structures and electronic components 15 p2232 A72-31322
- Structure-borne acoustic nondestructive testing for readiness assessment, fault isolation and automatic checkout of space vehicle mechanical devices 15 p2214 A72-31699
- Optical nondestructive surface flaw detection for steel plates using oblique angle illumination combined with high pass spatial filter 15 p2238 A72-32153
- Ultrasonic flaw detector data analysis, discussing digital computer interface and encoders 16 p2397 A72-33202
- Nondestructive monitoring techniques to optimize performance and service tests, considering penetrating radiation, electromagnetic induction, ultrasonics, holography, microwaves, acoustic emission and thermal monitoring 16 p2397 A72-33219
- Nondestructive vibration analysis of mechanical structures, using digital computer technique for sound wave spectrum analysis 16 p2397 A72-33220
- Microwave transmission phenomenon and application to NDT, discussing various methods and examples 16 p2391 A72-33233
- Surface crack detection in ferrous and nonferrous metals, glass, ceramics and plastics by water-washable dye penetrants process 16 p2397 A72-33239
- Nondestructive vibration tests of fatigue crack damage in composite structures, investigating glass reinforced epoxy and polyester laminates 16 p2414 A72-33318
- Reliable nondestructive microstructure testing via surface ultrasonic waves 16 p2399 A72-33822
- Holographic nondestructive testing with impact excitation. 17 p2555 A72-35197
- Ultrasonic wave propagation in metal-matrix composites. 17 p2560 A72-35287
- Nondestructive ultrasonic inspection of braze bonds in high current electrical contact assemblies. 18 p2695 A72-36116
- Thermal neutron radiography as NDT technique for industrial inspection, noting advantages for low atomic number and radioactive materials 18 p2695 A72-36457
- Acoustic emission technique as NDT method for quality control of brazed metal-ceramic bonding 18 p2695 A72-36458
- Nondestructive test for measuring the state of heat treatment in closure welds. 18 p2695 A72-36672
- Factors governing radiographic crack detectability in steel weld specimens. 18 p2695 A72-36673
- Detection of defects in semiconductor structures by means of recording the temperature and electric fields. 18 p2693 A72-37106
- Applications of holographic nondestructive testing techniques in engineering. 19 p2806 A72-37608
- Holometric deformation measurement on carbon carbon biaxial test specimens. 19 p2822 A72-37616
- Swept frequency resolution and optical processing in propellant grain flow detection by microwave holography, using Vander Lugt filter imaging 19 p2798 A72-37626
- Application of video techniques and speckle pattern interferometry to engineering measurement. 19 p2799 A72-37628
- Nondestructive testing of advanced composites. 19 p2799 A72-37669
- IAD-3 amplitude-phase impedance defectoscope. 19 p2805 A72-38765
- Electro-optical TV technique with laser source illumination to provide engineering metrology and NDT procedure resembling real time holographic interferometry 20 p2930 A72-39038
- Acoustic emission experiments design based on piezoelectric transducer, discussing signal detection and data acquisition methods 20 p2924 A72-39278
- Crack growth behavior correlation to acoustic emission signal amplitude distribution in high strength steel heat treated to different fracture toughness values 20 p2924 A72-39282
- Infrared testing of solar cell arrays. 20 p2890 A72-39339
- Neutron activation techniques for nondestructive analysis of meteorites and lunar rocks, noting types of nuclear reactions for geochemical application 20 p2899 A72-39832
- Non-destructive activation analysis of some elements in stony meteorites by proton- and bremsstrahlen-irradiation. 20 p2899 A72-39833
- Elemental abundance trends in the australite strewn field by non-destructive neutron activation. 20 p2900 A72-39839
- Non-destructive examination of fibre reinforced polymers with special reference to continuous carbon fibre reinforcement. 21 p3073 A72-41169
- Use of stress wave emission for nondestructive testing of materials and articles. 21 p3061 A72-41720
- Bilateral version of an ultrasonic velocimetric method of defectoscopy. 21 p3057 A72-41721
- The magnetic field of eddy currents above a surface crack in metal with excitation of them by an applied inductor. 21 p3057 A72-41722
- Analysis of noise immunity of two-channel eddy-current flaw detector. 21 p3057 A72-41723
- Plastic model shells design, construction and instrumentation for elastic stability studies in NDT, discussing deformation measurements for critical condition prediction 22 p3163 A72-42694
- Nondestructive stability evaluation of large shell structures by direct computer controlled testing. 22 p3157 A72-42695
- The importance of service inspection in aircraft fatigue. 24 p3367 A72-44740
- Bonded honeycomb structures. II - Bonded joints and non-destructive testing. 24 p3407 A72-45288
- Non-destructive testing of adhesive bonded metal-to-metal joints. I. 24 p3408 A72-45289
- Non-destructive testing of adhesive bonded metal-to-metal joints. II. 24 p3408 A72-45290
- Electromagneto-acoustic non-destructive testing in the Soviet Union. 24 p3408 A72-45291
- NDT techniques selection, economics and organization for aircraft industry, considering ultrasonic holographic and adhesion tests 24 p3408 A72-45292
- A bibliographical survey of acoustic emission. 24 p3408 A72-45293
- Ultrasonic defect detection and evaluation techniques, stressing limitations for defect geometry, size and nature 24 p3408 A72-45294
- NDT application and development in industry, considering confidence in inspection techniques, framework and management resistance 24 p3408 A72-45295
- NONELECTROLYTES**
- Nonequilibrium transitions for thermodynamic systems with generalized forces and flows by linear transformations, applying to nonelectrolyte solutions with concentration and temperature gradients 07 p1097 A72-18806

- Development of the AEDC-VKF tunnel J - A real gas high density, true velocity, hypersonic, aerodynamic test facility.
[AIAA PAPER 72-993] 21 p3040 A72-41579
- Weak shock wave propagation in a relaxing gas.
24 p3391 A72-45042
- Laminar high speed mixing of nonequilibrium dissociating gases.
24 p3392 A72-45056
- Study of a reactive nozzle flow associated with solid gas-phase interaction.
24 p3433 A72-45063
- ### NONEQUILIBRIUM IONIZATION
- Nonequilibrium effects on ionization growth in molecular hydrogen, tabulating experimental data for comparison with Monte Carlo computation
02 p0267 A72-12793
- Strong normal shock wave structure upstream and downstream of discontinuity due to nonequilibrium radiation and collisional ionization
06 p0902 A72-18106
- Nonequilibrium ionization theories for high pressure discharge in inert gas-alkali metal vapor
10 p1515 A72-24414
- Nonequilibrium partially ionized viscous shock layer on blunt body, determining electron temperature and electron-ion density profiles
11 p1744 A72-25560
- Ionization turbulence effect on nonequilibrium plasma MHD generator performance, using I-V characteristics equation
13 p1900 A72-29354
- Nonequilibrium ionization phenomena effects on electric conductivity of combustion gas-particle plasma generated by aluminized fuel seeded with potassium nitrate
13 p2013 A72-29363
- Hypersonic flow of nonequilibrium ionized monatomic inviscid radiating gas past axisymmetric blunt body with allowance for electron and ion temperatures difference
13 p1895 A72-29877
- Nonequilibrium relaxation phenomena in the near-emitter region of the thermionic converter.
18 p2647 A72-36209
- Influence of boundaries on the ionization instability of a plasma in a discharge of coaxial geometry
22 p3209 A72-41876
- Influence of inelastic electron-energy losses on the development of ionization instability in a plasma
22 p3209 A72-41877
- Kinetics of impact-radiative ionization and recombination
23 p3318 A72-43296
- ### NONEQUILIBRIUM PLASMAS
- Electron and population densities in inhomogeneous nonequilibrium plasmas with photoabsorption, using radiative transport equation
02 p0266 A72-12441
- Electron temperature measurements in ionospheric isotropic nonequilibrium plasma by electrostatic probes and radar backscatter
03 p0349 A72-13520
- Nonequilibrium plasma production by induced electric field in helium and argon streams in magnetic field
05 p0700 A72-17229
- Fast electron-cyclotron wave excitation with infinite phase velocity along magnetic field in nonequilibrium electron plasma
06 p0862 A72-18402
- Vibration modes and stability of nonequilibrium low density He-Cs plasma in magnetic field
07 p1043 A72-19876
- H Balmer lines H alpha/H beta ratios as electron temperature indicators in nonequilibrium plasmas
09 p1359 A72-22666
- Nonequilibrium ionization theories for high pressure discharge in inert gas-alkali metal vapor
10 p1515 A72-24414
- T Tauri type variable stars spectral features relation to evolutionary sequences, noting stellar atmosphere nonthermal equilibrium plasma region effects
10 p1549 A72-25056
- Nonequilibrium MHD generator with electrode walls slanted away from magnetic field direction, predicting electrical performance for comparison with flat wall generator
13 p1899 A72-29352
- Linear nonequilibrium Faraday type MHD generator, predicting electrode configuration effects on voltage drops, axial leakages and current distribution
13 p1900 A72-29353
- Ionization turbulence effect on nonequilibrium plasma MHD generator performance, using I-V characteristics equation
13 p1900 A72-29354
- Random phase approximation for nonlinear theory of MHD nonequilibrium plasma steady turbulent regime, noting ionization level rise by energy dissipation
13 p2013 A72-29359
- Cs seeded nonequilibrium MHD Ar plasma stability in fully ionized seed regime
13 p2014 A72-29368
- Ionization stabilization in MHD generators by sensing electron density perturbation with linear feedback into nonequilibrium plasma
13 p2014 A72-29369
- Fluctuating electric current induced magnetic field effects on long wave nonequilibrium plasma instability associated with large scale closed cycle MHD generators
13 p2014 A72-29370
- Nonequilibrium plasma wave scattering cross section dependence on energy bands shape and field orientation in semiconductors
13 p2023 A72-29992
- Nonequilibrium relativistic plasma fluctuations with direct movement of particles, considering isotropic velocity distribution of particles
15 p2289 A72-32695
- Weakly ionized nonequilibrium plasma flow from gas discharge tube positive column, obtaining electron temperature axial decay rate from energy equation
16 p2437 A72-33655
- Fast electron cyclotron wave excitation with infinite phase velocity along magnetic field in nonequilibrium electron plasma
17 p2588 A72-34853
- Vibration modes and stability of nonequilibrium low density He-Cs plasma in magnetic field
17 p2589 A72-35126
- Nonequilibrium energy constants associated with large-amplitude electron whistlers.
17 p2517 A72-35620
- Polarization and interferometric investigations of discharge modes in thermionic energy converters
18 p2647 A72-36219
- Study of the mechanism of motion of nonequilibrium plasma inhomogeneities in a magnetic field
18 p2717 A72-37176
- Dispersive waves in a slightly ionized nonequilibrium plasma.
21 p3092 A72-41223
- Kinetic equation for electron distribution in high temperature laser plasma, calculating nonequilibrium conditions for strong field and plasma parameters
23 p3318 A72-43323
- Magnetic pulsation spectra in a nonisothermal plasma
23 p3323 A72-44483
- ### NONEQUILIBRIUM RADIATION
- Nonstationary radiation transfer with one dimensional anisotropic scattering, deriving Bessel function expressions for quantum exit from semiinfinite medium
02 p0262 A72-12830
- Two dimensional time dependent nonlinear radiative transfer and nonequilibrium diffusion in arbitrary geometry by synthesis method
05 p0746 A72-15996
- Strong normal shock wave structure upstream and downstream of discontinuity due to nonequilibrium radiation and collisional ionization
06 p0902 A72-18106
- Long wave fluctuations in nonequilibrium gas with pair collisions, using Bogoliubov equations for simultaneous correlation functions
15 p2282 A72-32450
- ### NOEUCLEDIAN GEOMETRY
- ### U DIFFERENTIAL GEOMETRY
- ### NONFERROUS METALS
- Russian papers on light and nonferrous alloys structure and properties covering phase diagrams, alloying effects, reduction, crystallization and recrystallization, solid solutions decomposition, etc
14 p2123 A72-31027
- ### NONFLAMMABLE MATERIALS
- Nonflammable coolants for Saturn instrument unit environmental control systems, considering component materials compatibility with selected dielectric fluids
01 p0091 A72-10769
- Flame resistance requirements of high temperature resistant and highly chlorinated fibers
[PI PAPER 11] 03 p0380 A72-13245
- Phosphorus compounds incorporation in polyurethane foams and polyesters for flame retardancy
[PI PAPER 12] 03 p0380 A72-13246
- Fire retardant capabilities of bromine and chlorine compounds in polymers
[PI PAPER 13] 03 p0380 A72-13247
- Weibull distribution government of dispersion of destructive temperature gradients characteristic of fireproof ceramic materials heat resistance
21 p3074 A72-41713
- ### NONGRAY ATMOSPHERES
- Venus lower atmosphere from Venera 4, 5 and 6 and Mariner 5 data, evaluating greenhouse effect by microwave absorption and by nongray radiative model
01 p0129 A72-10795
- Book on stellar atmospheric physics covering gray and nongray atmospheres, radiation emission and absorption, transfer equation, Eddington approximation, spectral lines formation, etc
10 p1532 A72-23725
- Jupiter atmospheric greenhouse effect modeled by two layer emission, deriving temperatures from non-gray step function approximation of IR absorption
15 p2312 A72-32096
- Mechanical equilibrium equation of nongray stellar matter, approximating electron pressure vs temperature in early stellar atmospheres
21 p3109 A72-41435
- Mean coefficient of opacity in stellar atmosphere model calculations
21 p3110 A72-41443
- ### NONGRAY GAS
- Nongray treatment of nonisothermal IR radiative transfer problem in terms of mean absorption coefficient
09 p1354 A72-22668
- IR radiative energy transfer to laminar flow of non-gray absorbing emitting gases through circular tube
10 p1563 A72-25038
- Transient radiative heat transfer in a non-gray medium.
19 p2880 A72-37835
- Slab band absorbance for molecular gas radiation.
23 p3316 A72-44327
- Semigray approximation to nongray radiative transfer, taking into account mean absorption coefficient variation with spatial position and photon propagation direction
23 p3314 A72-44328
- ### NONHOLONOMIC EQUATIONS
- Motion equations of gyrostat with nonholonomic constraint under gravitational force
08 p1208 A72-21359
- Gyrostat inertial motion under nonholonomic constraint of mass center coincidence with fixed point
08 p1208 A72-21360
- Linear invariant solution to gyrostat motion under nonholonomic constraint
08 p1208 A72-21361
- Virtual displacement application to nonholonomic systems with arbitrary constraints to derive Lagrange and Appell equations of motion
10 p1513 A72-24995
- Control parameters required for stabilization of motion in systems with nonholonomic couplings by dynamic programming method of summary representations
13 p2003 A72-29068
- Relation between the first integrals of a nonholonomic mechanical system and a corresponding system freed of constraints
22 p3204 A72-41902

Motion of a solid with a nonholonomic constraint around a fixed point in a conservative force field 23 p3313 A72-43800

Equations of motion of nonlinear nonholonomic mechanical systems of variable mass with impulsive constraint factors 23 p3313 A72-43848

NONHOMOGENEITY

NONLINEAR EQUATIONS

NT DUFFING DIFFERENTIAL EQUATION

NT QUADRATIC EQUATIONS

Nonlinear effects due to crack front plastic yield and slow crack extension in energy release rate and fracture toughness calculations 01 p0140 A72-10993

Step-by-step algorithmic numerical solution for nonlinear Volterra integro-differential equation, considering convergence 01 p0093 A72-11105

Sixth order nonlinear differential equation isolated equilibrium point stability determination, constructing Liapunov function 01 p0094 A72-11125

Nonlinear equations for M-type amplifiers derived from Maxwell equations 02 p0189 A72-11567

Monte Carlo methods for hybrid computer solution of nonlinear parabolic partial differential equations with two spatial dimensions 02 p0186 A72-11657

Liquid motion in circular cylinder with elastic bottom under longitudinal excitation, representing dynamic and kinematic free surface conditions as nonlinear equations 02 p0204 A72-12254

Axisymmetric circular membranes large deflections, solving nonlinear partial differential equations by iterative method in conjunction with finite difference approximations 02 p0296 A72-12526

Variational solutions of nonlinear free boundary integrodifferential Euler equations for rotating star models 02 p0252 A72-12540

Bogoliubov-Mitropolski-Hale integral manifold theorem for perturbed nonlinear differential equations, using generalized variation of parameters formula 03 p0381 A72-12907

Nonlinear differential second order equation system development for gyroscopic coupling of forced nonlinear oscillators 03 p0389 A72-13631

Soviet book on nonlinear problems of inhomogeneous shallow shell theory covering bending, stability, bearing capacity, plasticity criteria, compressibility, etc 03 p0454 A72-14225

Nonlinear ionization wave equation, calculating nonlinear response of unstable positive plasma column to weak pulse disturbance 03 p0399 A72-14346

Nonlinear elliptical equations first boundary value problem, presenting approximation capacity and convergence of straight line procedure 04 p0538 A72-14625

Nonlinear heat conduction equation explicit solution in combustion theory with allowance for gas dynamics model equation and resulting Cauchy problem solution 04 p0595 A72-14643

Nonlinear differential equations systems solution by A-stable numerical integration techniques 04 p0539 A72-14732

Cauchy problem for nonlinear biharmonic equation in Euclidean n-space, deriving a priori inequality estimate by logarithmic convexity of functional F 04 p0539 A72-15044

Matrix representation of nonlinear equation iterations based on polynomial methods, considering convergence and application to parallel computation 04 p0540 A72-15373

Quasi-linear parabolic equations loaded system first boundary value problem for heat and mass transfer equations inverse problems 04 p0540 A72-15545

Superposable and self-superposable MGD flows from nonlinear differential equations, considering entropy, flow velocity and magnetic field strength 05 p0694 A72-16030

Nonlinear transient coupled thermoviscoelasticity problems solution by finite element method and iterative solution for integrodifferential equation 05 p0736 A72-16085

Rectangular variable thickness plate deflection under uniform lateral pressure, solving nonlinear partial differential equations with variable coefficients by iterative procedure 05 p0738 A72-16533

Nonlinear differential equation of second order, investigating integrability criteria 06 p0838 A72-17553

Numerical integration solution of nonlinear equations and two point boundary value problems, using quasi-linearization and imbedding methods 06 p0839 A72-17957

Autonomous two body system described by nonlinear differential equations of motion, obtaining free relative vibration solution in terms of elliptic functions 06 p0849 A72-18694

Gyroscopic error analysis, solving nonlinear equations by continuous Markov processes theory 06 p0819 A72-18724

Power series method with Cauchy formula for nonlinear partial differential equations solution in unsteady periodic temperature oscillations 06 p0905 A72-18727

Algorithm for constructing linear and nonlinear differential and algebraic equations of state variables of nonlinear electronic circuits 07 p0958 A72-18846

Tangent methods for nonlinear equations iterative solution using alternate tangent and derivative values 07 p1026 A72-19039

Averaging techniques for nonlinear integral and integrodifferential equations, considering standard equations with and without rapid and slow variables, asymptotic series application to unsolved problems 07 p1027 A72-19609

Electrodynamics and magnetoelasticity nonlinear Emden-Fowler equation solutions, considering heavy current carrying filaments equilibrium and boundary value problems 07 p1035 A72-19975

Nonlinear difference schemes for quasi-linear transfer equation in gas dynamics and shock wave computations 07 p0971 A72-20085

Gas dynamics K-wave interaction in nonlinear media described by nonlinear partial differential equations 07 p0972 A72-20103

Iteration procedure for approximate integration of nonlinear system of partial differential equations with time lag, presenting upper and lower estimates 07 p1028 A72-20209

Self similar invariant group solutions to Bellman nonlinear partial differential equation for optimal correction problems of control systems motion with random disturbances 07 p0963 A72-20322

Truncation error correction based on Richardson extrapolation in finite difference approximation of nonlinear partial differential operators 07 p1101 A72-20328

Transcendental series solution of Chini-Painleve nonlinear differential equations describing vehicle and meteorite oscillation during planetary atmospheric entry 07 p0964 A72-20594

Goodman-Lance method of adjoints extension for solving boundary value problems of nonlinear differential equation systems 08 p1197 A72-20786

Coefficients estimation in nonlinear differential equations by direct integration followed by unconstrained nonlinear programming 08 p1197 A72-20854

Switching characteristics of MOS channel transistors, solving nonlinear differential equations describing current and potential distribution 08 p1140 A72-21267

Nonlinear differential equations system stability conditions for arbitrary initial perturbations of zero solution, using Liapunov functions 08 p1199 A72-21461

Asymptotic method solution for boundary value problems for nonlinear differential equations describing transonic and slow supersonic flow past thin bodies 08 p1108 A72-21709

Nonlinear beam and plate analysis, obtaining smooth elastic-plastic transition through modified Richard moment-rotation equation application 08 p1249 A72-21923

Hilbert space filling curves for solutions of sets of nonlinear equations 09 p1340 A72-22244

Equilibrium statistics of randomly forced two dimensional viscous flow three mode representation constructed by numerical integration of nonlinear equations system 09 p1293 A72-22459

Riemann invariants method for plasticity theory application to first order quasi-linear systems, considering plastic flow in arbitrary die 09 p1403 A72-22760

Approximate method for nonlinear differential equations of motion solution in flight dynamics, applying to control surface buzz and slender wing oscillations 09 p1262 A72-23453

Numerical solutions of linear and nonlinear hydrostatic primitive equations for frontogenesis forced by nondivergent horizontal wind, noting discontinuities prediction 09 p1347 A72-23651

Third order nonlinear differential equation invariants use to obtain integrable forms 10 p1504 A72-24053

Sobolov-Orlicz anisotropic spaces application to calculus of variations equations with strongly nonlinear coefficients 10 p1505 A72-24215

Numerical solution of nonlinear integrodifferential equation governing finite amplitude wave propagation on concentrated vortices 10 p1468 A72-24419

Algorithms for spatially varying parameters estimation in nonlinear partial differential equations from noisy observations, noting diffusivity in heat equation 10 p1506 A72-24457

Oscillation modes and stability region of harmonic oscillators with homogeneous nonlinear rheological differential equations of motion 10 p1513 A72-24998

Nonlinear differential equations cycle properties and frequency, using Leray-Schauder theorem for cycle existence proof 11 p1675 A72-25325

Perturbation method for asymptotic solutions of initial value problems for hyperbolic wave equations with small nonlinearities 11 p1676 A72-25355

Geometric interpretation of solution existence for nonlinear ordinary differential equations with linear and nonlinear boundary conditions, analyzing funnel of solutions 11 p1676 A72-25503

Boundary value problems to initial value problems transformation method extended by physical parameters invariant properties, noting fluid mechanics nonlinear equations 11 p1616 A72-25878

Control theory application to nonlinear elastic analysis of trusses, partitioning structure into statically determinate stages 11 p1736 A72-25989

Coupled nonlinear equations of motion of large deflections of impacted helical springs, comparing with streak photographs 11 p1688 A72-26061

Method of characteristics for solution of quasi-linear hyperbolic partial differential equations, analyzing frequency response 11 p1678 A72-26551

Nonlinear integral equations solution for heavily loaded actuator disk induced flow field, taking into account blade tip vortices and thrust coefficient effects 11 p1573 A72-26577

Dynamic stability of rapidly heated shallow cylindrical shells, formulating nonlinear equations 12 p1877 A72-27076

Nonlinear equilibrium equations and elastic stability of cylindrical shell weakened by circular hole 12 p1878 A72-27080

Existence and uniqueness of general solutions of initial value problem for nonlinear Maxwell-Boltzmann equation with finite time interval 12 p1836 A72-27122

Equation difference minimization techniques for ordinary nonlinear differential equations approximate periodic solution generation, noting error bounding procedure validity 12 p1836 A72-27240

Nonlinear stochastic partial differential equations solution by graph technique, calculating correlation function and phase change spectrum in phase locked circuit 12 p1837 A72-27575

Variational problems in automatic control theory, presenting existence theorems for solution of boundary value problems for nonlinear differential equations with deviating argument 12 p1837 A72-27995

Differentiation method for complex root calculation for system of nonlinear equations with analytic functions 13 p1985 A72-28710

Shock waves internal structure in gas of elastic spheres, solving nonlinear Boltzmann equation 13 p1944 A72-30029

Variational problem solution for solid strained body with nonlinear stress-strain relation, applying finite element method 14 p2130 A72-30189

Gradient catastrophe /solution derivative discontinuity/ occurrence time for quasi-linear hyperbolic differential equations describing elastic string oscillations 14 p2130 A72-30194

Relaxation method for thermal computation programs to solve nonlinear heat exchange equations for

steady state temperature distribution, discussing numerical instability due to linearization

14 p2170 A72-30684

Polynomial spline function for approximate solution of Cauchy problem for nonlinear differential equations of order n

14 p2126 A72-30716

Russian book on averaging method in nonlinear mechanics covering algorithms and schemes based on variables change, asymptotic methods and applications

15 p2273 A72-31274

Nonlinear differential equations of motion of complex configuration, developing stable solution method

15 p2261 A72-31489

Approximate periodic solutions of second order nonlinear differential equations via step function

15 p2262 A72-31553

Boundary value problem solution uniqueness relation to existence for nonlinear differential equations of arbitrary order satisfying solution compactness condition

15 p2263 A72-31753

Boundary value problems for discrete spectrum of nonlinear ordinary differential operators on unbounded intervals

15 p2263 A72-31760

Nonlinear Boltzmann equation prediction of time correlation functions with long asymptotic time tails

15 p2278 A72-32307

Nonlinear equations systems iterative solution methods convergence, generalizing Varga matrix splitting technique to nonlinear mappings in Banach space

15 p2264 A72-32465

Liapunov functions for nonlinear autonomous difference equations stability analysis, defining difference gradient, principal sum and definite sum

15 p2265 A72-32802

Joint maximum likelihood estimation of three parameters of Weibull distribution, obtaining modified quasi-linearization algorithm for nonlinear equations iterative solution

16 p2416 A72-33348

Variational principles application to nonlinear heat transfer problems, using Euler-Lagrange equation

16 p2478 A72-33435

Nonlinear equations of discrete elastic Cosserat media from multipolar media equations, studying small rotation theory

16 p2425 A72-33591

Onsager irreversibility theory extension to nonlinear constitutive relations and with allowance for inclusion of all thermodynamic variables

16 p2479 A72-33826

Stability of a class of systems of nonlinear differential equations

17 p2574 A72-34348

Approximate solutions of problems involving simultaneous multifunctional nonlinear partial differential equations, noting rectangular plate deflection under lateral pressure

17 p2627 A72-34780

The maximum principle and controllability of nonlinear equations.

17 p2533 A72-34951

Variational principles in nonlinear viscoelasticity.

17 p2633 A72-35402

Book - Nonlinear partial differential equations in engineering, Volume 2

17 p2576 A72-35449

A priori estimates and nonlinear parabolic equations of arbitrary order.

17 p2577 A72-35796

Three point distribution function related to lower order functions for closure of hierarchy of equations for turbulent probability distribution functions

18 p2677 A72-36005

Cameron-Martin-Wiener /C-M-W/ representations of nonlinear random process tested on Burger turbulence for real fluid problem

18 p2677 A72-36010

Steady state response of nonlinear beam under periodic loading, using finite element techniques for nonlinear differential equation

18 p2732 A72-36078

The Cauchy problem for the nonlinear Boltzmann equation in general relativity

18 p2710 A72-36471

Note on the 'alpha'-constant stiffness method for the analysis of non-linear problems.

18 p2739 A72-37172

Nonlinear equations for explosive instabilities of three plasma waves interaction with mutually different linear damping

19 p2838 A72-37326

Nonlinear equations solutions for interior ballistics parameters of solid rocket propellants combustion during rocket engine nozzle opening

19 p2878 A72-37352

Optimal control of plant described by nonlinear hyperbolic equations with variable initial conditions of system, noting constraints on plant phase coordinates

19 p2777 A72-37434

Asymptotic method application to wave propagation in nonlinearly elastic rods, describing displacement field by perturbation series

19 p2875 A72-37885

Numerical integration of nonlinear convective flow equations for arbitrary atmospheric temperature and wind profiles, discussing cloud streets formation

19 p2828 A72-37998

A certain property of standard Fredholm-type nonlinear integro-differential equations

19 p2825 A72-38178

Solution of nonlinear integro-differential Volterra equations and their systems with the aid of power series

19 p2825 A72-38196

Investigation of the solution of a two-dimensional nonlinear Volterra integral equation

19 p2825 A72-38203

Convergence of a multipoint iteration method for solving nonlinear equations

19 p2826 A72-38215

Lyapunov functions for quadratic differential equations with applications to adaptive control.

19 p2826 A72-38264

Waveguides of arbitrary cross section by solution of a nonlinear integral eigenvalue equation.

19 p2773 A72-38292

Investigation of generalized and classical solutions of a mixed boundary value problem in a finite domain for one class of nonlinear second-order parabolic equations

19 p2827 A72-38448

Approximate integration of a nonlinear system of differential equations with time lag

19 p2827 A72-38468

Existence of a unique solution for a class of nonlinear systems of equations and its calculation by iterative methods

19 p2827 A72-38546

German Book - Introduction into nonlinear optics, Volume I

19 p2813 A72-38775

Method of characteristics for nonlinear equations of perturbed motion of fluid near contact point between shock and diffraction waves

20 p2912 A72-39023

Solution of a boundary value problem for a class of nonlinear ordinary differential equations by the method of successive approximations

20 p2945 A72-39463

A modified gradient technique for solving boundary and initial value problems.

20 p2946 A72-39618

Electrodynamics and magnetoelasticity nonlinear Emden-Fowler equation solutions, considering current carrying heavy filaments equilibrium and boundary value problems

20 p2955 A72-40032

Decomposition of multidimensional nonlinear equations of heat-conduction type and construction of nonlinear electrical integrators

21 p3128 A72-40181

Electrical modeling of nonlinear problems of thermal engineering

21 p3128 A72-40182

Nonlinear differential equation periodic solution approximation by pseudo-linear representation of nonlinear terms effects on single harmonic, using describing function matrix method

21 p3076 A72-41314

Non-linear elastic constitutive equations.

21 p3125 A72-41514

Nonlinear equilibrium equations for hinged flat circular and spherical membranes under large axisymmetric elastic deformations due to internal pressure

21 p3125 A72-41516

Non-linear rotor bearing behavior.

21 p3061 A72-41518

Group properties and invariant solutions of electric-field equations in the case of nonlinear Ohm's laws

21 p3086 A72-41654

Reissner nonlinear equations for stability analysis of shallow shells of revolution, noting critical loads range and error analysis

22 p3232 A72-41856

Investigation with the aid of a Fourier method of the classical solution of a multidimensional composite problem for a class of hyperbolic equations of the second order with a nonlinear operator right-hand part

22 p3198 A72-41897

Solution method for some boundary problems of nonlinear hyperbolic-type equations and propagation of weak shock waves

22 p3164 A72-41904

Time evaluation of discontinuity occurrence in solutions of boundary problems for second-order hyperbolic quasi-linear systems

22 p3198 A72-41912

A collocation solution of the nonlinear equations for axisymmetric bending of shallow spherical shells.

22 p3232 A72-41938

A priori estimates and Harnack's inequality for general solutions of second-order degenerate quasi-linear parabolic equations

22 p3198 A72-42159

On the solution of non-linear simultaneous equations with particular reference to fluid-dynamics.

22 p3199 A72-42325

Diatomic molecular dissociation in pure gas and mixtures with inert diluent, expressing as set of coupled quadratically nonlinear differential equations [AICHE PAPER 6B]

22 p3208 A72-42400

Three dimensional thermoelastodynamic theory for elastic beams, deriving nonlinear motion equations by combined expansion and variational methods

22 p3235 A72-42523

Asymptotic method for nonlinear wave systems of periodic structure

22 p3155 A72-42657

On the perturbation method in the stability analysis of continuous systems.

22 p3206 A72-42842

Vertical asymptotes and bounds for certain solutions of a class of second order differential equations.

22 p3199 A72-42914

Nonlinear natural vibrations of rectangular plates and cylindrical panels

22 p3242 A72-43134

Calculation of transient processes in a capacitance parametron by the phase approximation method

23 p3312 A72-43351

Widely convergent method for finding multiple solutions of simultaneous nonlinear equations.

23 p3308 A72-43400

Numerical integration of nonlinear differential equations in nonlinear circuits analysis, obtaining information on unsteady processes from calculation with controlled level time quantization step

23 p3269 A72-43444

Problem of the spatial localization of thermal disturbances in nonlinear heat-conduction theory

23 p3356 A72-43529

Representation of the solution of a nonlinear differential equation in the form of a path integral

23 p3308 A72-43580

Nonlinear mechanics perturbation method for Liapunov functions construction, noting application to nonlinear differential equations

23 p3308 A72-43582

Method of equivalent turns in the kinematics of inertial systems

23 p3311 A72-43583

Equilibrium equations and deformation of elastoplastic thin isotropic cylindrical shell with circular hole, noting nonlinear partial differential equations for plate displacements

23 p3345 A72-43587

Influence of a nonlinearity in a coherent accumulator of pulse signals on the gain in the signal-to-noise ratio

23 p3264 A72-43762

The internal boundary value problem for the Boltzmann equation in the steady state and weakly nonlinear

23 p3280 A72-43820

Asymptotic behavior of solutions of nonlinear parabolic equations.

23 p3309 A72-43979

A priori bounds and upper and lower solutions for nonlinear second-order boundary-value problems.

23 p3309 A72-43980

Dual extremum variational principles relevant to nonlinear heat transfer, applying to temperature distribution on thin walled spherical spacecraft surface

24 p3465 A72-45474

A numerical integration method useful for studying ionospheric phenomena.

24 p3399 A72-45582

Application of the method of mechanical quadratures to the approximate solution of nonlinear singular integral equations

24 p3419 A72-45646

Straightforward difference scheme for nonlinear parabolic equations in polar coordinates

24 p3420 A72-45649

NONLINEAR FEEDBACK

Self oscillating dc-dc converter analysis and optimal design, modeling by single loop nonlinear feedback system

04 p0465 A72-14571

Control system stability with nonlinear feedback in steady equilibrium state

07 p0963 A72-20321

Hammerstein form nonlinear systems class invertibility and reproducibility criteria derivation, noting decoupling possibility by dynamic precompensation and nonlinear state feedback

10 p1502 A72-23781

Computerized synthesis technique for nonlinear feedback control systems, incorporating circle and Popov criteria

13 p1936 A72-29107

Saturating nonlinear feedback systems stability under bounded input excitation, discussing error signals magnitude and duration

15 p2212 A72-32246

Effect of nonlinearity in the feedback circuit of a recirculation-type comb filter

20 p2906 A72-38893

Stabilities and settling times of nonlinear and time-varying feedback systems.

22 p3161 A72-41937

NONLINEAR FILTERS

Learning-identification of unknown nonlinear discrete systems, using local estimation results for global function learning

01 p0046 A72-11199

Distributed systems modeled by partial differential equations, identifying unknown parameters by Galerkin method using steepest descent method and nonlinear filter

04 p0505 A72-14674

Optimal nonlinear discrete filters with finite memory for polynomial signals, discussing synthesis with aid of minimax method

04 p0505 A72-14998

Suboptimal nonlinear filter performance evaluation methods based on Kolmogorov equations for Markov process transition density function

04 p0505 A72-15040

Optimal nonlinear logical filters for noise protection of space vehicle servosystems

05 p0726 A72-16460

Nonlinear spatial filter synthesis by one-to-one signal-to-reference beam ratio and optimum exposure condition

05 p0663 A72-16676

Numerically exact nonlinear filter synthesis, describing confidence intervals for error performance statistical inferences

08 p1144 A72-20850

Hybrid computer synthesis and simulation algorithm for optimal discrete nonlinear filters, giving timing, accuracy and equipment requirement estimates

08 p1137 A72-20851

Optimal filtering for state estimation of nonlinear dynamic models observed with discrete noisy observations by retaining second order terms in series approximation

08 p1145 A72-20863

Nonlinear filter dynamics for stochastic optimal control for quadratic cost functional, evaluating performance

08 p1145 A72-20866

Nonlinear filtering synthesis of optimal receiver for pseudorandom phase shift keyed signal with arbitrary modulation angle and white noise background

10 p1436 A72-24510

Nonlinear filtering for random signals in statistically unknown noise, noting application to satellite orbit determination, aircraft navigation and missile tracking

11 p1611 A72-25986

Integrated inductorless quadratic bandpass filters for constant bandwidth wide frequency range, using IC analog multipliers network

13 p1927 A72-28403

Forced oscillations in RC amplifier with negative feedback through nonlinear bandpass filter with varicaps

13 p1931 A72-29266

Bayesian estimation for nonlinear filtration of nonstationary non-Gaussian radio signals, deriving second central moments and parameter estimate errors

15 p2195 A72-31656

Regenerative nonlinear RC amplifier oscillations due to series opposed varicap diode capacitance

18 p2665 A72-36109

Nonlinear double T-shaped RC filter

19 p2774 A72-38417

Effect of nonlinearity in the feedback circuit of a recirculation-type comb filter

20 p2906 A72-38893

Real time estimation of trajectory for lifting reentry vehicle of shuttle orbiter type, discussing iterated nonlinear filter and adaptive filter

20 p2966 A72-39126

Optimal frequency-difference communications system with manipulated amplitudes

22 p3154 A72-42237

The application of Monte Carlo methods to the nonlinear filtering problem.

23 p3274 A72-43541

Some numerical results using Kalaba's new approach to optimal control and filtering.

23 p3274 A72-43543

Integrated navigation systems and Kalman filtering - A perspective.

24 p3386 A72-44642

NONLINEAR PROGRAMMING

Nonlinear programming iteration scheme for fuel-time optimization of satellite orbital rendezvous terminal phase

03 p0437 A72-13838

Coefficients estimation in nonlinear differential equations by direct integration followed by unconstrained nonlinear programming

08 p1197 A72-20854

Carrier based attack aircraft allocation model formulation and solution for maximum inflicted target damage, using sequential unconstrained minimization technique with nonlinear programming

08 p1256 A72-21469

Nonlinear programming analysis of free vibration of simply supported beam

08 p1249 A72-22136

Man machine automatic control system structural synthesis, treating system operation as nonlinear programming problem

09 p1291 A72-23438

Nonlinear programming and parameter optimization algorithms for constrained feedback control system design

10 p1441 A72-23790

Nonlinear programming solution of optimal control problems, using methods of centers and feasible directions

10 p1455 A72-23797

Flight vehicle structures optimum design for random vibration environment, presenting formulation as nonlinear programming problem

11 p1736 A72-26003

Path arrangement optimization method for fluid distribution network with separable and concave cost function, using simplex method in nonlinear programming

13 p2053 A72-28423

Computerized optimal design by nonlinear programming for minimum weight elastic plates crossed with rigid ribs for vibrational loading to meet natural frequencies condition

14 p2165 A72-30576

Linear electric circuits optimal synthesis as nonlinear programming of network parameters, discussing approximation algorithms

19 p2776 A72-37306

Electric circuits design by combined network synthesis and optimization methods, noting approximation by nonlinear programming

19 p2776 A72-37308

Frequency response optimization of electric filters, modulators and impedance matching circuits using minimax criterion, noting nonlinear programming sequence

19 p2771 A72-37310

Man machine automatic control system structural synthesis, treating system operation as nonlinear programming problem

19 p2782 A72-38521

Nonlinear programming in computerized electronic circuits design, discussing optimization methods and real time operation

19 p2782 A72-38578

The branch and boundary method as a regular method of solving irregular problems of mathematical programming. I

22 p3198 A72-42188

Minimum weight elastic structure designs under dynamic loads with nonlinear constraints on stress displacements and natural oscillation frequencies

22 p3236 A72-42737

A survey of methods of feasible directions for the solution of optimal control problems.

23 p3274 A72-43537

NONLINEAR SYSTEMS

Random background noise effect on nonlinear self oscillation envelope passage time moments, discussing relationship between amplitude and frequency stabilities

01 p0035 A72-10032

Duffing type quasi-linear differential equation system, obtaining ultraharmonic resonance by small parameter and harmonic balance methods for comparison with analog computer solutions

01 p0101 A72-10034

Imperfect nonlinear system elastic buckling critical load calculation by higher order approximation, using perturbation approach and discrete coordinate diagonalized system

01 p0136 A72-10035

Nonlinear hydromagnetic waves in finite beta collisionless plasma, calculating space-time evolution with nonlinear integrodifferential equation

01 p0107 A72-10143

French monograph on extremum values of function with two variables and nonlinear feedback control systems stability, using associate recurrence solutions properties

01 p0044 A72-10164

Frequency conditions of absolute stability for closed automatic control system with nonlinear unsteady units

01 p0045 A72-10499

Controllability of dynamic systems with motion described by nonlinear differential equations

01 p0045 A72-10500

Error fluctuation component spectral density determination in closed automatic nonlinear system for controlling random vibration spectrum

01 p0045 A72-10505

Difference analog of nonlinear hydrodynamic boundary value problem from Navier-Stokes steady state theory

01 p0050 A72-10576

Learning-identification of unknown nonlinear discrete systems, using local estimation results for global function learning

01 p0046 A72-11199

Step width for gradient projection method in Hilbert space for optimal linear control problems with quadratic functional

01 p0047 A72-11386

Nonlinear mechanics and stability - Conference, Rome, February 1970

02 p0251 A72-11492

Structural analysis of cable stayed bridge scale model with fractional and full loading, showing system linear behavior with small displacements and real nonlinearities, respectively

02 p0199 A72-11515

Nonlinear systems absolute stability calculation, considering time lag, backlash type nonlinearity and process controller

02 p0196 A72-11674

Elastic continuous media nonlinear models approximation, obtaining Euler-Lagrange functions

02 p0259 A72-12234

Self-correcting incremental solution procedure for nonlinear structural mechanics, noting application to systems with many degrees of freedom

02 p0260 A72-12272

Asymptotic method for investigating multiwave interaction processes in one dimensional weakly nonlinear distributed systems with slowly changing parameters

02 p0261 A72-12585

Frequency fluctuations in nonlinear self oscillating system in presence of periodic nonstationary random noise effects

02 p0195 A72-12586

Statistical linearization approach to determine approximate instantaneous correlation matrices of nonlinear structure response to nonwhite excitation

02 p0298 A72-12663

Free flight simulation tests for V/STOL aircraft nonlinear attitude control system adaptation to helicopter pitch and roll control

02 p0155 A72-12714

Describing function method for nonlinear systems under stochastic input, considering statistical optimizations/linearization and self oscillation under noise

03 p0337 A72-13074

Neighboring optimal feedback control for multiinput nonlinear dynamical systems with discontinuous control, applying to minimum time satellite attitude acquisition problem solution

03 p0338 A72-13407

Frequency criteria for stability of nonlinear multivariable RLC networks with bounded solutions approaching equilibrium

03 p0338 A72-13411

Tunnel diode quartz oscillator frequency stability improvement and dc power requirement reduction using nonlinear feed circuits

03 p0331 A72-13555

Nonlinear thermoviscoelasticity problem exact solution expressed as product of two functions, formulating conditions

03 p0445 A72-13576

Additive type composite oscillations in nonlinear damped vibratory system with two degrees of freedom, presenting modified Galerkin method

03 p0382 A72-13628

Read avalanche diode noise theory, showing carrier current modulation and lf and hf noise coupling in nonlinear regime

03 p0333 A72-13848

Mathematical modeling methodology for communication receiver life cycle EMC decisions, considering analysis and prediction problems with emphasis on nonlinear circuits and systems

03 p0324 A72-14034

Nonlinear oscillations stochastic instability in dynamic systems, discussing nonequilibrium statistical mechanics

03 p0390 A72-14316

Closed-loop nonlinear sampled-data systems with sampler and finite Hankel transformable distributed elements, deriving frequency domain stability criteria

04 p0504 A72-14662

Nonlinear stochastic systems stability conditions description by Volterra integral equation, applying to distributed parameter feedback control system with nonlinear amplifier of random gain

04 p0504 A72-14663

Sequential interpolating estimation algorithm derivation for distributed-parameter noisy dynamic systems described by nonlinear partial differential equations

04 p0538 A72-14669

Nonlinear plant and observation models with white Gaussian noise and continuous data, obtaining state vector a posteriori probability density for optimal prediction

04 p0506 A72-15112

Third order nonlinear van der Pol oscillating systems, discussing digital computer verification for existence of stable limit cycles in state space trajectory plots

05 p0639 A72-15806

Stationary nonlinear dynamic systems identification, using modified differential approximation technique
[ASME PAPER 71-WA/AUT-11]

05 p0682 A72-15955

Single- and many degree of freedom nonlinear structural systems transient dynamic response by presentation of equations of motion, damping and restoring force functions

05 p0736 A72-16082

Quasi-periodic solution of nonlinear differential system in case of resonance, concerning Duffing equation

05 p0682 A72-16120

Probabilistic output analysis of dynamic nonlinear system with random characteristics by functional Volterra series

05 p0641 A72-16315

Nonlinear multivariable and linear systems optimal control in aerospace field, discussing use of performance indexes for fuel consumption, process evolution time or combination

05 p0725 A72-16453

Optimal closed loop control of stochastic nonlinear systems by expanded cost function applied to reduced terminal error atmospheric entry problem

05 p0685 A72-16462

Nonlinear control systems of vehicles angular orientation, investigating dynamic properties by method of harmonic linearization

05 p0727 A72-16474

Controlled motion dynamics of spacecraft performing maneuvers, applying point transformation to third-order nonlinear system moving about center of mass in lateral motion

05 p0730 A72-17029

Optimal control of one dimensional physical system with delayed argument described by nonlinear first order hyperbolic partial differential equations, using maximum principle

05 p0691 A72-17138

Optimal control algorithm for nonlinear stochastic systems ensuring probability-wise stability and minimum error, using Liapunov theory and dynamic programming

05 p0691 A72-17141

Nonlinear optimal control problems with undetermined final time, using conjugate-gradient method

06 p0792 A72-17312

Third order nonlinear systems phase plane analysis, noting applicability to unity feedback closed-loop systems with linear memory

06 p0792 A72-17313

Suboptimal feedback control for nonlinear dynamic processes, presenting control algorithm based on linear plant optimal solution

06 p0792 A72-17314

Nonlinear stochastic systems analysis by extended Volterra-functional method for first and higher order linear plants with constant or time varying parameters

06 p0838 A72-17376

Higher order nonlinear autonomous oscillation system limit cycle and stability determination by numerical solution based on Andronov point transformation and Liapunov theory

06 p0838 A72-17377

Computer aided steady state response analysis for nonlinear electric circuits with periodic input, using Newton algorithm with rapid convergence

06 p0779 A72-17480

Validity proof of asymptotic methods in oscillation theory of one dimensional nonlinear dynamic systems described by hyperbolic and parabolic differential equations

06 p0839 A72-17681

Random vibrations nonlinear theory, investigating nonlinear systems response to random excitation via Markov processes modeling

06 p0896 A72-17961

Frequency criterion of weak instability in nonlinear control systems

06 p0794 A72-18304

Nonlinear oscillations in mechanics - Conference, Kiev, U.S.S.R., August 1969

06 p0849 A72-18692

Lightly damped nonlinear mechanical oscillators under random excitation, calculating stationary response frequency and autocorrelation by heuristic procedures

06 p0849 A72-18693

Nonlinear self excited oscillations in uniformly distributed oscillators interacting with traveling transverse or surface waves of elastic body

06 p0849 A72-18698

Nonlinear elastic systems with distributed parameters, obtaining single frequency mode random oscillations solution of boundary value problem by asymptotic method and Markov process

06 p0850 A72-18700

Mechanical systems with nonlinear position functions, elastic elements or self damping, investigating oscillation mode onset and stability conditions

06 p0850 A72-18701

Aerodynamic radial bearing analysis based on Reynolds equation, emphasizing gas bearing nonlinear oscillation stability

06 p0824 A72-18702

Nonlinear resonance oscillations of flexible rod and elastic cylindrical shell under potential and nonpotential forces, investigating motion instability

06 p0900 A72-18704

Elastic systems nonlinear oscillations with moving inertial loads, noting standing waves superposition

06 p0901 A72-18706

Nonlinear solid body system rotating and oscillating parts effect on spatial vibration stability, deriving excitation-natural frequencies relationship

06 p0850 A72-18711

Single frequency oscillations in nonlinear mechanical systems described by one dimensional mixed boundary value problems, using asymptotic methods

06 p0850 A72-18715

Nonlinear self oscillation solution for systems with two degrees of freedom, comparing with harmonic linearization method for error of small parameter method

06 p0851 A72-18721

Nonlinear mechanical oscillation systems analysis by analog computer, exemplifying pendulum rotating about vertical axis

06 p0851 A72-18725

Perturbation theorems proving for nonlinear systems of differential equations with integral solution of linearized equation

06 p0840 A72-18739

Numerical algorithm for Galerkin solutions of nonlinear ordinary differential equations in dynamic system applications

07 p1025 A72-18785

Nonlinear dynamic system mathematical model for unit mass particle escape trajectories from potential well, taking account of trapped motions and stable oscillations

07 p1025 A72-18807

Stability analysis of steady control systems acted upon by random signal in single valued one dimensional nonlinearity form, using statistical linearization

07 p0959 A72-18989

System parameters random step changes effect on nonlinear system steady vibration stability

07 p1088 A72-19172

Book on asymptotic behavior and stability in ordinary differential equations covering linear and nonlinear systems, Liapunov and analytical-topological methods

07 p1026 A72-19184

Cross modulation relationship to intermodulation product based on third order distortions in nonlinear system

07 p0941 A72-19255

Real time near optimal closed loop control solution to fixed time nonlinear differential game by periodically updating to two point boundary value problem

07 p1027 A72-19278

Multiinput and multioutput linear and nonlinear dynamic system maximum likelihood identification based on state vector formulation and optimal filter use

07 p0959 A72-19286

Quasi-time optimal nonlinear controller for steerable antennas or telescopes in target acquisition or slew mode, predicting performance by digital simulation

07 p0959 A72-19288

Hyperstable algorithm for multiinput and output systems identification through equation error method, representing scheme as equivalent time varying nonlinear feedback system

07 p1027 A72-19290

Singular perturbation of absolute stability of Lure-Postnikov nonlinear systems described by differential equations with small parameters at higher derivatives

07 p1027 A72-19293

Harmonic oscillations sum conversion by two terminal pair network with complex nonlinearity

07 p0956 A72-19565

Model-following control for nonlinear multivariable plants, considering implicit algorithm solution and application to variable stability aircraft control synthesis

07 p0961 A72-19708

Optimal control on nonlinear multivariable plant with common constraint on control action, presenting linear programming algorithm

07 p0962 A72-19717

Nonlinear multivariable system optimal control with respect to time and fuel consumption, discussing Gauss-Newton and Davidson methods and application to geostationary satellite

07 p0962 A72-19719

Geometrical methods in fluid mechanics, solving quasi-linear nonelliptic systems by method of characteristics

07 p0969 A72-20063

Nonlinear controls for single axis gyro platforms, using time optimal Luenberger observers

07 p0989 A72-20278

Sequential testing of actual and calculated error covariances consistency in recursive nonlinear estimators, noting method application to linear filters

08 p1197 A72-20857

Discrete-time nonlinear estimators digital implementations by computerized Monte Carlo method, comparing with alternative techniques

08 p1145 A72-20864

Conditional mean state estimate approximation for nonlinear systems by parallel computation to reduce computer time

08 p1145 A72-20868

Random vibration theory and Markov processes in nonlinear stochastic systems with probability and asymptotic methods application

08 p1205 A72-20965

Parametric oscillations of nonlinear systems prone to self excitation, using asymptotic method

08 p1206 A72-21243

Nonlinear system of differential equations for gravity perturbation on geometrical form of thin axisymmetric cavity in heavy fluid

08 p1151 A72-21705

Nonlinear dynamic response of deformable solids under time and space dependent thermal and mechanical loads determined by finite element method

08 p1248 A72-21822

Nonlinear closed loop system reduction of differential trajectory sensitivity to continuous variations or external disturbance

09 p1340 A72-22245

Mechanical system with inertial vibration sensor and nonlinear spring, obtaining global asymptotic stability of zero solution of differential equations describing natural vibration

09 p1399 A72-22697

Nonlinear systems controllers design based on Liapunov functions and time domain ratio criterion, presenting digital computer algorithm

09 p1290 A72-23090

Generalized polynomial operators for nonlinear systems analysis, presenting local invertibility theorem

09 p1341 A72-23092

State estimation for nonlinear discrete-time system based on quantized data, presenting maximum likelihood estimate solution and Monte Carlo simulation results

09 p1290 A72-23095

Quasi-harmonic vibrations of dynamic system with arbitrary number of degrees of freedom and finite number of discrete nonlinearities, using Van der Pol method

09 p1352 A72-23178

Stability regions of phase-locked AFC with nonlinear control circuit, describing system dynamics by differential equations

09 p1290 A72-23180

Nonlinear dynamics of flight vehicle - Conference, University of Technology, Loughborough, England, March 1972

09 p1407 A72-23451

Nonlinear dynamic motion response analysis of flight vehicles typified by continuously changing vibration damping and frequency

09 p1262 A72-23452

Beecham-Kryloff-Bogoliubov approximation method application to a degree of freedom nonlinear systems, using averaged kinetic energy and virtual work terms in Lagrange equation

09 p1342 A72-23454

Single degree of freedom systems with nonlinear spring characteristics of skew symmetric form, discussing 1/2 subharmonic oscillation analysis by harmonic balance method

09 p1342 A72-23455

Liapunov functional stability analysis in structural dynamics problems including wave equations with nonlinear damping

09 p1407 A72-23457

Random vibration of linearly elastic lumped mass systems containing, nonlinear damping to ideal stationary Gaussian white noise excitation

09 p1408 A72-23460

General structure steady state response under harmonic forcing in internal resonance relation, noting inertial nonlinearity effects on autoparametric interactions and energy flow

09 p1408 A72-23462

Applied nonlinear mechanics problems solutions by variable scale method, choosing transformations for linearization of differential equations

09 p1343 A72-23602

Nonlinear vibrations under random excitation, discussing equivalent linearization and small parameter perturbation methods and Fokker-Planck equation

09 p1353 A72-23604

Nonlinearity effects on random vibration displacement and frequency characteristics of one degree of freedom system, using Fokker-Planck equation

09 p1353 A72-23605

Zaidenberg correlation method for nonlinear systems dynamic properties under random excitation, determining statistically equivalent linearized terms for equations of motion

09 p1353 A72-23607

Nonlinear systems optimal design mathematical modeling, discussing synthesis, manufacturing, production, exploitation and evaluation

09 p1343 A72-23610

Hartman-Olech theorem to prove asymptotic stability of mechanical system with nonlinear elastic characteristic, analyzing differential equations of motion 09 p1343 A72-23612

Hammerstein form nonlinear systems class invertibility and reproducibility criteria derivation, noting decoupling possibility by dynamic precompensation and nonlinear state feedback 10 p1502 A72-23781

Optimal estimates for nonlinear dynamic systems with time delay, using calculus of variations 10 p1454 A72-23784

Differential geometric methods to extend linear system theory to nonlinear classes, considering differential equations, controllability, optimal control, stochastic processes and bilinear system problems 10 p1503 A72-23788

Compression of data from measurements in real time nonlinear estimation to reduce data processing requirements without performance deterioration, applying to reentry vehicle tracking 10 p1442 A72-23802

Optimal nonlinear estimation problem with nonlinear plant and observation models obtaining state vector a posteriori probabilities for prediction and smoothing via partition theorem [AD-736521] 10 p1455 A72-23803

Stochastic nonlinear system one-step optimal dual control instead of separation control policy for performance improvement 10 p1456 A72-23810

Optimal closed loop control of discrete stochastic nonlinear systems, considering guidance and navigation for space and terrestrial vehicles 10 p1456 A72-23811

Optimal closed loop control of discrete stochastic nonlinear systems, obtaining solution by cost function in power series around deterministic trajectory 10 p1457 A72-24499

Antisymmetric pseudorandom signal performance in measurement of second order kernels in Volterra series representation of nonlinear system by cross correlation 10 p1439 A72-24805

Periodic motions stability of nonlinear control systems with energy consumption, using contact transformations 10 p1458 A72-25074

Optimal control problems characterized by nonlinear Volterra equations system, obtaining necessary conditions for extremality in maximum principle integral form 11 p1675 A72-25319

Global controllability of nonlinear differential systems during linear system perturbation, discussing controllable and uncontrollable parts splitting and null domain nature 11 p1608 A72-25323

Nonlinear resistive network analysis by piecewise linear mappings, studying Lipschitz condition and global homomorphism 11 p1608 A72-25360

Nonstationary nonlinear multidegree-of-freedom systems resonant response analysis by asymptotic method, investigating gyroscopic system for combination differential resonances [AIAA PAPER 72-401] 11 p1629 A72-25422

Longitudinal and transverse vibrations and transient response of elastically coupled nonlinear mechanical system 11 p1732 A72-25534

Accuracy improvement of nonlinear systems phase trajectories graphic construction, noting second order ordinary differential equations solution 11 p1733 A72-25547

Probabilistic output analysis of dynamic nonlinear system with random characteristics by functional Volterra series 11 p1610 A72-25798

Suboptimal feedback control law synthesis for nonlinear systems, using second order approximation to optimal control 11 p1610 A72-25872

Computer aided iterative design of nonlinear single loop control system with sinusoidal describing function and time response display capability 11 p1601 A72-26042

Static deflection effect on nonlinear spring mass system step function response, considering approximate calculation of oscillation period 11 p1688 A72-26372

Equations of motion for torsional vibrations in system with nonlinear elastic term and variable moments of inertia, noting analog computer simulation 11 p1739 A72-26982

Natural vibration modes of coupled spring-mass nonlinear system with two degrees of freedom from stability analysis 12 p1844 A72-27245

Perturbation procedure for weakly coupled oscillators in connection with statistical mechanics ergodic problem and nonlinear interaction models 12 p1844 A72-27248

AM/PM conversion and transfer in nonlinear signal transmission systems, calculating coefficients as function of multicarrier powers for intelligible crosstalk 12 p1782 A72-27554

Mathematical model for hydraulic fatigue testing machine, analyzing nonlinear control stability of vibratory loading process 12 p1796 A72-27978

Fourth order normal modes and resonances of nonlinear vibrations, applying to gyro horizon compass sensitive element gimbal motion 13 p2000 A72-28382

Stability and oscillation in linear and nonlinear systems, examining existence of T-periodic solutions /harmonic forced vibrations/ 13 p2000 A72-28484

Averaging technique for nonlinear viscoelastic dynamic problems, considering forced oscillations of oscillator with weakly nonlinear hereditary elastic characteristics 13 p2054 A72-28551

Popov frequency criterion analog for stochastic nonlinear continuous systems with random parameters and disturbances, investigating stability 13 p1935 A72-28608

Additional operator method application to nonlinear servosystems self adjusting circuits design, presenting system simulation results 13 p1935 A72-28611

Shock wave solutions of nonlinear hyperbolic system of conservation laws, considering case of zero viscosity 13 p1940 A72-28616

Differential systems perturbation method by association with easy-to-integrate reduced system, applying to nonlinear mechanics 13 p1987 A72-29780

Transients analysis for nonlinear branched dynamic systems by integral manifold and small parameter method 13 p2007 A72-29997

Linearization method to determine changes in principal harmonic resulting from nonlinear device characteristic deformation due to HF components 13 p1937 A72-30019

Frequency criterion of weak instability in nonlinear control systems 13 p1937 A72-30072

Absolute stability of nonlinear automatic control systems based on root locus trajectories and Popov line hodographs 13 p1937 A72-30094

Graphical design technique based on Nyquist plane construction using circle criterion for nonlinear systems controller synthesis 14 p2091 A72-30375

Parameter resonances influenced by nonlinear damping amplitude-limiting due to vibrating systems nonlinearities with periodic coefficients 14 p2131 A72-30712

Nonlinear resonant circuits analysis, noting steady state operation of ferroresonant circuit with staircase response curve and synchronization conditions 14 p2132 A72-31103

Short signal pulse shaping based on phase and amplitude selective properties of distributed parametric amplifiers operating under nonlinear conditions 14 p2090 A72-31112

Laser amplifier nonlinear properties by simplification of partial differential equations of amplitude and phase behavior, considering signal pulse deformation 14 p2111 A72-31113

Nonlinear autooscillatory systems forced vibration under random perturbations, calculating dynamic processes by statistical linearization 14 p2132 A72-31114

Nonlinear coupled cyclotron oscillators excitation by external sine wave force, analyzing amplitude/phase variation and negative absorption 14 p2132 A72-31115

Ferroresonant circuit with inductor, resistor, nonlinear ferrocapacitor and voltage source, deriving oscillation stability condition 14 p2090 A72-31119

Van der Pol oscillator periodic pulling behavior under weak perturbation near natural frequency, analyzing Fourier frequency spectrum 14 p2132 A72-31122

Van der Pol oscillator acted upon by weak random noise, evaluating oscillations envelope dispersion from probability density function and phase derivation 14 p2132 A72-31123

Nonlinear oscillation systems mathematical model, determining periodic mode parameters, self excitation and damping mechanisms by point mapping method 14 p2133 A72-31126

Nonlinear self excited oscillations with negative hysteresis in automatic control systems 14 p2091 A72-31127

Quasi-conservative optimal nonlinear self excited oscillation systems theory for automatic control, telemechanics and computer applications 14 p2133 A72-31130

Nonlinear approximation of slowly changing standing waves in self excited parametric oscillators with distributed and bulk structures 14 p2090 A72-31131

Nonlinear variable transformation method to determine locking band and transition processes in automatic phase and frequency control systems 14 p2087 A72-31132

Nonlinear processes in oscillatory systems with semiconductor diodes, calculating amplitude and phase characteristics in steady state and transient conditions 14 p2090 A72-31133

Van der Pol and nonlinear parametric oscillators fluctuations due to random noises analyzed by averaging method and discrete Markov processes 14 p2133 A72-31134

Rectangular plate nonlinear lumped-parameter model for large displacement amplitudes, deriving differential equations of motion via Hamilton principle and Euler equations 14 p2169 A72-31148

Nonlinear microwave circuit feedback model analysis by describing function in control theory, applying to oscillator phase locking problem 15 p2210 A72-31355

Nonlinear electronic /transistor/ system mapping-on by matrix dynamic transform algorithms, comparing with Newton-Raphson method 15 p2210 A72-31491

Parameter-dependent linear and nonlinear equation systems solution by approximation polynomials, developing numerical algorithms 15 p2261 A72-31496

Partial differential equations of motion for nonlinear mechanical systems solved by Lanczos formula, discussing prismatic cylinder oscillations under uniformly distributed transverse load 15 p2275 A72-31729

Nonlinear systems normal mode vibrations analysis by group theory using symmetry properties 15 p2275 A72-31732

Globally controllable nonlinear differential systems arising from linear system under perturbation 15 p2264 A72-31762

Optical field emission effects on photoelectron emission nonlinearity from metal cathode using ultrashort mode locked laser pulses 15 p2250 A72-32303

Mathematical models for electromagnetic interference in electronic equipment, discussing nonlinear circuit analysis 15 p2201 A72-32568

Automatic control theory trends /1950-1970/, discussing nonlinear, discontinuous and adaptive systems, optimization problems, Liapunov stability theory, etc 15 p2212 A72-32576

High speed deterministic adaptive controller for linear and nonlinear plants, identifying control law from state and input data by linear regression procedure 15 p2212 A72-32794

Limit set configuration of optimal nonlinear feedback control scheme in n-dimensional state space 15 p2213 A72-32797

Damping perturbation of high order nonlinear autonomous Liapunov system, reducing system equations integration to quadratures via transformation to lower order quasi-linear nonautonomous system 16 p2422 A72-32938

Finite element method application to nonlinear dynamic problems exemplified by study of plastic deformation behavior of cylindrical billet under impact of heavy rigid body 16 p2466 A72-33019

Group perturbation method for accuracy analysis of nonlinear stochastic automatic control systems, noting computer time reduction 16 p2371 A72-33091

Observability conditions for nonlinear and unsteady linear systems, noting control systems design 16 p2371 A72-33092

Nonlinear vibration damper system subject to forced vibrations considered as stochastic processes in form of white noise and stationary and ergodic processes 16 p2467 A72-33144

Averaging and Ritz methods for solution approximation of nonlinear periodic and combined resonances in vibrating systems with multiple degrees of freedom 16 p2424 A72-33145

Single degree of freedom nonlinear mechanical system vibration characteristics calculation by averaging procedure, taking into account energy dissipation 16 p2424 A72-33279

Optimal filtering estimate of noisy nonlinear partial differential distributed parameter system, using least squares and invariant imbedding techniques 16 p2416 A72-33575

Nonlinear generalizations of matrix diagonal dominance with application to Gauss-Seidel iterations 17 p2573 A72-34220

Application of statistical linearization techniques to nonlinear multidegree-of-freedom systems.
[ASME PAPER 71-WA/APM-5] 17 p2624 A72-34315

State dependent state variable feedback method to control multiple input multiple output nonlinear and/or time varying systems
17 p2532 A72-34420

Nonlinear system consisting of gas filled tube with pressure sensitive heat source, noting oscillation evolution due to equilibrium perturbation
[ASME PAPER 72-APM-21] 17 p2580 A72-34796

Design of nonlinear networks with a prescribed small-signal behavior.
17 p2533 A72-35199

An approximate analysis of non-linear non-conservative systems subjected to step function excitation.
17 p2582 A72-35412

Russian book on numerical methods in optimal control systems theory covering functional extremum, dynamic programming, control synthesis and statistical linearization of nonlinear systems
17 p2533 A72-35458

Stability and transient behavior of composite nonlinear systems.
17 p2534 A72-35530

Numerical solution of an optimal control problem with a probability criterion.
17 p2534 A72-35531

Reachable sets and singular arcs for minimum fuel problems based on norm-invariant systems.
17 p2534 A72-35533

Equivalent predictions of the circle criterion and an optimum quadratic form for a second-order system.
17 p2577 A72-35534

New description of a first harmonic approximation for nonlinear distributed parameter systems
17 p2534 A72-35722

Fundamental, harmonic and combination frequency components amplitude analysis via dual input describing function for nonlinear element response under two incommensurate frequency sinusoidal signals
18 p2671 A72-36051

Nonlinear dynamic feedback control systems modeling by parameter estimation scheme with polynomial representation for state variables
18 p2672 A72-36057

Feedback controller synthesis from nonlinear system modeling by linear equations, proving theorem relating stability properties
18 p2672 A72-36060

The effects of damping on a non-linear system with two degrees of freedom.
18 p2709 A72-36080

Nonlinear current oscillations in a plasma diode
18 p2714 A72-36205

Output signal-to-noise ratio of a nonlinear device and bandpass filter.
18 p2666 A72-36334

Criteria for nonlinear systems controllability in terms of state variable analytic function and derivatives, implying strong accessibility for manifolds including Euclidean spaces
18 p2673 A72-36616

Computation of optimal controls by a method combining quasi-linearization and quadratic programming.
18 p2673 A72-36824

Hopscotch algorithm for numerical integration of nonlinear hyperbolic partial differential equation systems based on finite difference method
18 p2705 A72-37020

Digital computer simulation of human systemic arterial pulse wave transmission - A nonlinear model.
18 p2655 A72-37028

Maximal contraction points of autonomous nonlinear system phase trajectories, using van der Pol differential equations
18 p2674 A72-37149

Minimax method of optimizing electric circuits in the absence of constraints on the variable parameters
19 p2777 A72-37309

Equivalent circuits and oriented graphs for network analysis and synthesis of nonlinear transducers used in control systems
19 p2777 A72-37316

Extension of the frequency-type unconditional stability criterion of controlled systems with one nonlinear nonstationary element
19 p2777 A72-37431

Stability of nonlinear automatic systems with double pulse modulation, discussing systems with linear and nonlinear pulse elements
19 p2777 A72-37435

Nonsymmetric oscillations in certain symmetric nonautonomous systems
19 p2777 A72-37436

Variational method in the control system invariance problem
19 p2778 A72-37990

Evaluation of the coefficients of influence of initial information and model errors on optimization results
19 p2779 A72-37996

A circle criterion for nonlinear stochastic feedback systems.
19 p2779 A72-38235

Variable stability simulation techniques for nonlinear, rate dependent systems.
19 p2780 A72-38241

Distributed parameter linear and nonlinear systems analysis, deriving theorem for solution stability of linear partial differential equations
19 p2826 A72-38247

Hyperstability concepts and their application to discrete control systems.
19 p2780 A72-38248

Nonlinear on-line rapid estimation scheme with application to trajectory maneuvering vehicles.
19 p2781 A72-38258

Decoupling and synthesis of certain nonlinear systems.
19 p2827 A72-38275

Study of the stability of a polar coordinate compensator
19 p2783 A72-38581

Nonlinear oscillations stochastic instability in dynamic systems, discussing nonequilibrium statistical mechanics
19 p2836 A72-38814

Difference schemes with a divergent operator for a general system of second-order hyperbolic equations
19 p2828 A72-38854

Dynamic nonlinear system direct statistical analysis by Covariance Analysis Describing Function Technique with linearization, giving illustrative examples [AIAA PAPER 72-875] 20 p2905 A72-39124

Heuristic description for harmonic oscillator as quantized model of anharmonicity applied to excitation fields involving particle clusters and multibody configuration
20 p2953 A72-39398

Dynamic models for hydraulic machine parts, discussing resonant properties of one degree of freedom system and dynamic characteristics of nonlinear parametric systems
20 p2953 A72-39421

Nonlinear system described by three generalized coordinates, noting dynamic response stability equivalence to two degrees of freedom system
20 p2953 A72-39553

Iterative solution of nonlinear structural problems, using convergence criteria based on displacement quantities
20 p2946 A72-39625

Book - Some aspects of the optimal control of distributed parameter systems.
20 p2946 A72-39731

Possibility of developing combination method for calculating, with a controlled quantization step, the response of a nonlinear network
21 p3074 A72-40184

Use of the multidimensional Laplace transform for the analysis of nonlinear systems with variable parameters
21 p3036 A72-40185

Using the quasi-homogeneity of differential equations in modeling physical systems
21 p3083 A72-40377

Necessary conditions for optimality in a general class of non-linear mixed boundary value control problems.
21 p3037 A72-40644

Bounded-input bounded-output stability of nonlinear discrete systems by a method of comparison.
21 p3037 A72-40645

Geometric criterion for the design of a non-oscillatory dynamical system.
21 p3037 A72-40647

State vector moments of nonlinear mechanical systems under stochastic excitation, using Fokker-Planck equation for transition probability and differential equations derivation
21 p3084 A72-40679

Trajectory synthesis of optimal control
21 p3037 A72-40704

Absolute instability of nonlinear pulse-amplitude modulated control systems - Frequency criteria
21 p3038 A72-40707

Evaluation of the mean time to tracking failure in a nonlinear pulsed servo with irregular signal input
21 p3038 A72-40708

The behaviour of the solutions of the equations of motion of a mechanical system, with a parameter occurring as a coefficient of each derivative.
21 p3084 A72-40812

Canonic model representations for communication receiver to analyze and simulate input-output behavior as nonlinear signal processing black box
21 p3019 A72-40889

Analysis of impact vibrations by delta-function method - Case of one degree-of-freedom system. I - Perfectly elastic collision.
21 p3121 A72-41238

The design of a nonlinear multi-parameter model for the human operator.
21 p3011 A72-41421

A comparison of the effects of small nonlinearities on several estimation schemes.
[AIAA PAPER 72-905] 21 p3076 A72-41555

Propagation of electromagnetic disturbances and the stability of stationary states in media with a nonlinear Ohm's law
21 p3086 A72-41651

An algorithm in the gradient method for synthesis of nonlinear control systems
21 p3039 A72-41804

Cross-modulation in tuning circuits with nonlinear capacitances.
21 p3039 A72-41830

Stabilities and settling times of nonlinear and time-varying feedback systems.
22 p3161 A72-41937

Development and optimization of a nonlinear multiparameter human operator model.
22 p3149 A72-41949

Complex amplitude four-pole network nonlinear conversion of sum of sinusoidal oscillations
22 p3158 A72-42083

Synthesis of statistically optimal multiloop control systems containing essentially nonlinear elements
22 p3162 A72-42182

Variational method for invariance problem solution for optimal finite state of nonlinear dynamic systems under external disturbances
22 p3162 A72-42240

Self focusing effect on wave beam propagation in optical lens waveguides, discussing system nonlinearity
22 p3186 A72-42656

Theory of thermal fluctuations in nonequilibrium systems
22 p3206 A72-42659

Decision surface estimate of nonlinear system stability domain by Lie series method.
23 p3274 A72-43540

Singular small parameter perturbation effect on absolute stability of high order derivatives in Lure-Postnikov nonlinear systems
23 p3274 A72-43544

Polynomial operators for nonlinear systems analysis.
23 p3308 A72-43599

Decoupling and diagonalization conditions determination for nonlinear multivariable time-varying differential equations system by state feedback, giving illustrative examples
23 p3275 A72-43611

Stability bounds for nonlinear systems designed via frequency domain stability criteria.
[ASME PAPER 72-AUT-1] 23 p3275 A72-43636

Application of an electronic computer to the calculation of the locking band in nonlinear phase-lock automatic frequency control systems
23 p3264 A72-43763

Parallel-type varactor frequency multipliers. I - Spectral analysis of the voltage at a partially forward-biased varactor
23 p3270 A72-43764

Optimal parallel-type varactor frequency multiplier calculation for reverse-biased conditions in terms of nonlinear conductance loss and diffusion capacitance Q factor
23 p3270 A72-43774

Equations of motion of nonlinear nonholonomic mechanical systems of variable mass with impulsive constraint factors
23 p3313 A72-43848

An algorithm to obtain the steady state response of nonlinear periodic systems.
23 p3267 A72-43852

Sufficient condition formulation for Lure type nonlinear continuous control system exponential absolute stability
23 p3309 A72-43854

Regions of absolute ultimate boundedness for discrete-time systems.
23 p3309 A72-43857

Nonlinear nonautonomous dynamic systems practical stability conditions for specified settling time, verifying constant matrix Hurwitz property
23 p3309 A72-43858

Linear inequalities and P matrices, with applications to stability of nonlinear systems.
23 p3309 A72-43859

Optimal design of a class of nonlinear networks.
23 p3276 A72-43865

Linearizing compensation for nonlinear control system transformation into linear system without approximation, discussing differential operator matrix definition and random noise effects
23 p3277 A72-43945

Controllability properties of right invariant nonlinear systems described by evolution differential equation in Lie group
23 p3309 A72-43981

Qualitative investigation of nonlinear pulse systems by the point mapping method
23 p3277 A72-44006

Approximate harmonic linearization method of stability analysis of nonlinear periodic systems, identifying fictitious oscillations due to computation errors
23 p3277 A72-44007

Stabilization of the motion of certain nonlinear systems by a linear approximation 23 p3313 A72-44045

Cumulants of multidimensional response of linear and nonlinear systems to Poisson distributed impulses, estimating joint probability distribution and evaluating threshold statistics 23 p3314 A72-44368

Equivalence conditions for classes of linear and non-linear distributed parameter systems. 23 p3277 A72-44369

Non-linear free vibration of a beam with time-dependent material properties. 23 p3355 A72-44374

Non-linear flexural vibration of orthotropic skew plates. 23 p3355 A72-44375

Nonlinear differential equations control systems, determining conditions for observability of initial state and vector of constant parameters extended from time-varying linear systems 23 p3310 A72-44548

Analytical designing of regulators for second-order nonlinear systems 24 p3387 A72-45519

The first initial-boundary value problem for a nonuniform parabolic equation. 24 p3419 A72-45631

Allowable regions for stability multiplier characteristics. 24 p3420 A72-45787

NONLINEARITY

MHD waves nonlinear interaction in magnetosphere, calculating transverse Alfvén and magnetosonic and longitudinal acoustic wave decay instabilities 01 p0109 A72-10618

Closed quasi-linear cubic theory of viscoelasticity for bodies with force and moment physical nonlinearity 03 p0454 A72-14218

Chebyshev approximation by nonlinear families on general compact space with local Haar condition 04 p0539 A72-14730

Nonlinear phenomena in transition region through resonance of dense inhomogeneous plasma in alternating electromagnetic field 04 p0489 A72-15390

Implicit equations in nonlinear network analysis, deriving conditions for existence of unique solutions 04 p0540 A72-15695

Quasi-linearized solution to nonlinear Volterra equations in design of structures under creep deformations 06 p0897 A72-18318

Amplifier amplitude characteristic nonlinearity effect on dynamic properties of autooscillatory temperature controller 07 p0981 A72-18926

Small parameter method application to quasi-linear problems solution in nonstationary heat conduction with substantial nonlinearities and weak perturbation, analyzing error 07 p1098 A72-18937

Solution uniqueness in physically nonlinear viscoelasticity dynamic theory 08 p1195 A72-21761

Thermal stress-strain state analysis of nonlinear elastic medium by small parameter method 09 p1400 A72-22717

Nonlinear effects in optical pumping of Ne transition by laser line 10 p1491 A72-24109

Nonlinear transformation for improper integral calculation, noting faster convergence than linear methods 10 p1506 A72-24997

Complex gain nonlinearity of transmitting microwave amplifiers in single and multicarrier operation 10 p1454 A72-25147

Magnetic field generation in presence of turbulent velocity distribution, considering gyrotropy parameter equation and nonlinearity 11 p1686 A72-25716

Nonlocal elasticity theory from global equilibrium and second thermodynamics laws, deriving constitutive equations from Clausius-Duhem inequality and Gibbs thermodynamics 11 p1738 A72-26721

Nonlinear interactions between synthesized plasma positive and negative ion beams, discussing effect on individual velocity distribution functions 12 p1849 A72-27058

Regenerative semiconductor parametric amplifier under dc through p-n junction, analyzing nonlinear phenomena 14 p2090 A72-31124

Nonlinear regression method for nonlinear least squares problem compared to other solution techniques, discussing convergence theorems and computational results 15 p2262 A72-31632

Computerized Monte Carlo techniques for nonlinear error analysis of system behavior, using random number generators for input distribution simulation 15 p2264 A72-32184

Ionized and neutral atmospheres coupled ionospheric continuity and motion equations, discussing nonlinear force effects on F2 height and electron density 15 p2230 A72-32257

Nonlinear thermoelasticity theory extension via entropy production inequality theorem, deriving expressions for stress tensor and heat conduction vector 16 p2465 A72-32980

Linearization and perturbation procedures to calculate nonlinear effects in fluid stability problems with application to nonlinear critical layer 16 p2377 A72-33338

Nonlinearity effects on finite amplitude, plane uniform oblique shock wave reflection, using inviscid gas analogous solution techniques 16 p2426 A72-33661

Nonlinear flexural vibrations of a clamped circular plate. [ASME PAPER 72-APM-18] 17 p2628 A72-34798

Focusing of intense electromagnetic waves in ducts with saturating nonlinearity. 18 p2659 A72-36293

On the numerical solution of a class of nonlinear problems in dynamic coupled thermoelasticity. 18 p2738 A72-37078

Effect of a junction capacitance nonlinearity on the spectral characteristics of a tunnel diode current 20 p2906 A72-38897

Nonlinear theory of particle motion in monochromatic Alfvén wave field application to Pc-1 geomagnetic pulsations evolution 20 p2917 A72-39408

Russian book - Introduction to nonlinear electrodynamics. 22 p3204 A72-42076

Calculation of the nonlinear dynamic regime of a two-terminal pair network with a weak nonlinearity 23 p3270 A72-43772

Spectrophotometer linearity testing using the double-aperture method. 23 p3289 A72-43894

Standardization of resistance and capacitance elements nonlinearity measurement procedure, proposing constant amplitude supply voltage 24 p3386 A72-45392

Nonlinear interactions between synthesized plasma positive and negative ion beams, discussing effect on individual velocity distribution functions 24 p3431 A72-45711

NONNEWTONIAN FLOW

Non-Newtonian pipe flow turbulence measurements by laser anemometer, describing optical system and signal processing instrumentation [AD-742872] 11 p1646 A72-25554

Flow of a non-Newtonian fluid in a tube with sinusoidal deformation. 21 p3044 A72-40192

On the vortex street behind a circular cylinder in non-Newtonian flows. 21 p2992 A72-41227

NONNEWTONIAN FLUIDS

Turbulent mixing length formulation and velocity profiles for non-Newtonian power law fluids, determining friction factor for pipe flow at high Reynolds numbers 03 p0343 A72-14318

Non-Newtonian real fluids flow characteristics, determining stress-deformation relationship by tensor analysis, with application to lubrication theory 04 p0528 A72-15742

Turbulent flow and heat transfer characteristics of non-Newtonian fluids on flat plate, measuring velocity and temperature distributions 05 p0648 A72-16003

Plane Couette flow of incompressible non-Newtonian viscous fluid between parallel plates, using minimum entropy production variational principle 06 p0798 A72-17779

Non-Newtonian Reiner-Rivlin fluid flow between two coaxial porous cylinders with longitudinal pulses applied to inner cylinder at finite time intervals 10 p1468 A72-24402

Second order fluids plane Poiseuille flow instability to finite amplitude disturbances, noting implications to Toms friction pressure reduction phenomenon in pipe flow 10 p1470 A72-25065

Magnetic and electric field effects on steady state laminar MHD Couette flow of non-Newtonian fluids governed by Prandtl rheological law or Ostwald-de Waele power law 14 p2139 A72-30717

Velocity distributions for slow steady rotational motion of non-Newtonian inelastic viscous fluid contained between two concentric spheres, using successive approximations 15 p2217 A72-31689

Dilatant suspensions impact energy absorbent properties, considering application to ejection seat cushions for occupant acceleration attenuation 15 p2191 A72-32604

Pulsatile flow of linear viscoelastic fluids in elastic-viscous tubes. 23 p3280 A72-43823

Stability of the laminar flow of a 'power-law' non-Newtonian fluid in the boundary layer on a flat plate 24 p3393 A72-45255

NONOHMIC EFFECT

On the theory of electrical conductivity in semiconducting thin films under a high electric field. 20 p2959 A72-39216

NONOSCILLATORY ACTION

Geometric criterion for the design of a non-oscillatory dynamical system. 21 p3037 A72-40647

NONPARAMETRIC STATISTICS

Nonparametric constant false alarm rate /CFAR/ radar extractor for target detection in background noise, using sign test 05 p0629 A72-16569

Noise statistics sensitivity of two sample Mann-Whitney nonparametric detector for radar application. 05 p0629 A72-16570

Signal detection in noise, investigating quantiles position optimization in nonparametric test statistics 07 p0943 A72-19519

NONREFLECTION

U ENERGY ABSORPTION

NONRELATIVISTIC MECHANICS

Nonrelativistic quantum concept of electromagnetic field interaction with charged microparticles 11 p1692 A72-26093

Hydrodynamic equations for incompressible fluid in steady relativistic state extended to nonrelativistic velocities case, noting transition from Euler to Predvoditelev equations 23 p3279 A72-43686

NONRESONANCE

Spherically specularly reflecting nonresonant cavities for use as absorption cells in far IR spectroscopy, predicting performance 11 p1629 A72-25301

Nonresonant mode and nutation damping of rotational-vibrational motion of free solid body with elastic elements 12 p1846 A72-27968

Optically pumped magnetometer error, predicting atomic g-factor modification by nonresonant RF field 15 p2239 A72-32335

NONRIGIDITY

U FLEXIBILITY

NONSTABILIZED OSCILLATION

Instability effect on aperiodic motion of nonlinear thermomechanical oscillator from periodic solutions 04 p0547 A72-14458

Power series method with Cauchy formula for nonlinear partial differential equations solution in unsteady periodic temperature oscillations 06 p0905 A72-18727

Nonstable oscillating motions positive measure set in dynamic system with noncompact phase space, considering elastically rebounded falling sphere on horizontal plate 08 p1210 A72-22188

Instability of rotational and gravitational modes of oscillation. 21 p3078 A72-40773

NONSYNCHRONIZATION

Dual mode - An efficient encoding method of nonsynchronous data signals on PCM. 21 p3023 A72-41827

SECANT midair collision avoidance system based on nonsynchronous microsec pulse transmission and receiving via randomly selected frequency, describing modular components and operating principles 24 p3422 A72-44647

NONUNIFORM FLOW

Nonhomogeneous fluid geostrophic flow, establishing relationship between velocity and density fields 01 p0051 A72-11230

Nonuniform flow along axial turbomachine blades, presenting pressure loss evaluation method under boundary layer effect on external walls 01 p0002 A72-11271

Average stagnation pressure measurement in low velocity ducted gas flow with nonuniform velocity profiles, discussing mathematical technique and computer program [ASME PAPER 71-WA/PUR-1] 05 p0645 A72-15910

Suspended compression shock construction near supersonic point in plane nonuniform ideal gas flow by hodograph technique 05 p0600 A72-16213

Hingeless rotor helicopter blade steady state response with nonuniform inflow and elastic blade bending [AIAA PAPER 72-65] 05 p0741 A72-16933

Internal compressible spatially nonuniform ducted flow performance, defining diffuser efficiency, loss coefficient and static pressure rise coefficient [AIAA PAPER 72-85] 05 p0652 A72-16960

Nonuniform propeller stream effects on aerodynamic characteristics of high aspect ratio wing, using airfoil theory [AD-745477] 07 p0908 A72-19092

- Nonuniform vortex flow of compressible gas past cascade of plates, noting monochromatic pressure waves at harmonics of plate vibration frequency
10 p1418 A72-24538
- Statistical theory of nonuniform turbulent incompressible fluid flow, presenting approximate formulas of nonisotropic two point correlation tensors
13 p1941 A72-28629
- Slender profile in nonuniform flow, deriving lift, normal force distribution and moment from vortex and source distribution induced flow field
13 p1894 A72-29005
- Inhomogeneous two phase flow past sphere, comparing structural and hydrodynamic characteristics on basis of X ray photographs
13 p2066 A72-30003
- Cylindrical pitot tube displacement effects on stagnation point and static pressure angle in impeller nonuniform peripheral flow
14 p2094 A72-30720
- Investigation of the influence of nonuniform conditions at the inlet and of secondary flows on the flow parameters in arbitrarily twisted channels
21 p3045 A72-41067
- Inhomogeneous two phase flow past sphere, comparing structural and hydrodynamic characteristics on basis of X ray photographs
22 p3167 A72-42726
- Simultaneous measurements of temperature and velocity in heated flows.
23 p3292 A72-44541
- Nonsymmetric flow in Laval-type rocket nozzles, deriving formulae for optimum nozzle design with neutralized lateral forces and turning couples
24 p3359 A72-44675
- ### NONUNIFORM MAGNETIC FIELDS
- MHD equations for plasma of arbitrary collision frequency in weakly inhomogeneous magnetic field, considering collisional and resonant particle effects
01 p0108 A72-10241
- Magnetospheric magnetic field distortions under quiet and slightly disturbed conditions, obtaining scalar intensity with OGO 3 and 5 rubidium vapor magnetometer
01 p0060 A72-10886
- Nonuniform magnetic field effects in MHD slider bearing, showing inertia terms contribution dependence on Hartmann number
[ASME PAPER 71-LUB-8] 02 p0235 A72-11533
- Two dimensional MHD channel flow of inviscid fluid in circular nonuniform magnetic field
02 p0267 A72-12771
- Faraday rotation as perturbation for analytic solution of system of differential equations for line formation in inhomogeneous magnetic fields
03 p0427 A72-13295
- Equilibrium state linear theta pinch plasma confinement dependence on nonuniform magnetic force lines curvature radius
03 p0396 A72-13655
- MHD approximation to solve natural convection problem in vertical channel under external inhomogeneous magnetic field, noting fluid flow rate
04 p0555 A72-14646
- Nonrelativistic charged particle resonating with circularly polarized transverse electromagnetic wave in nonuniform magnetic field, showing Fresnel diffraction pattern-like motion
04 p0557 A72-14951
- Thermal noise and ion-acoustic waves excitation in Q machine two beam plasma with high temperature ratio in presence of inhomogeneous B-field, observing instability
06 p0856 A72-17517
- Weakly ionized plasma instability in strong nonuniform magnetic field with convective flow and steadily oscillating final state
06 p0865 A72-18543
- Induced nonuniform magnetic field effects on MHD channel flow between two infinite parallel plates, obtaining solution by perturbation theory
08 p1214 A72-21427
- Plasma injection in magnetic trap along curvilinear inhomogeneous magnetic field, showing long plasmoids polarization and drift reduction by depolarization currents
09 p1363 A72-23218
- Magnetoacoustic wave propagation and reflection in equilibrium inhomogeneous plasma under nonuniform magnetic field
11 p1695 A72-26094
- Induced current distribution in flat narrow conducting strip moving in inhomogeneous magnetic field, presenting current field and densities
11 p1691 A72-26751
- Plasma flow under inhomogeneous axially symmetric magnetic field, investigating axial component of poloidal Hall induction current
11 p1699 A72-26757
- Auroral plasma particle discharge during motion in strong inhomogeneous magnetic field, magnetospheric instability due to temperature anisotropy
11 p1715 A72-26904
- Dispersion relationship for electrostatic instability associated with electron beam trapped in magnetic mirror of magnetosphere, taking into account nonuniformity of magnetic field
15 p2283 A72-31434
- Thermomagnetic effect in a plasma placed in a nonhomogeneous magnetic field
17 p2588 A72-34838
- The influence of a nonuniform transversal magnetic field on the power output of a gas laser.
18 p2715 A72-36338
- ### NONUNIFORM PLASMAS
- Warm inhomogeneous plasma models perturbation analysis, computing high frequency oscillation and eigenfrequencies and eigenfunctions formulas
01 p0106 A72-10134
- Electrostatic wave-particle interactions in inhomogeneous collisionless plasma, calculating resonant distribution function, charge densities and trapping periods
01 p0107 A72-10136
- Periodic inhomogeneous plasma electrostatic waves, considering dispersion relation and longitudinal oscillations
01 p0107 A72-10141
- Nonlocal behavior of ion sound instability in collisionless nonuniform confined plasma shock wave
01 p0108 A72-10240
- Multifrequency interferometer for inhomogeneous plasma density soundings, determining time dependence, spatial distribution and plasma layer size
02 p0263 A72-11413
- Nonuniform plasmas resonant wave-particle interactions, using linearized Vlasov equation
02 p0264 A72-12119
- Frequency variations from uniformly moving source in homogeneous and inhomogeneous isotropic plasmas, calculating source-to-transmitted-wave group velocity ratio from Doppler curves slopes
02 p0264 A72-12120
- Inhomogeneous plasmas parametric instabilities excitation, observing threshold electric field power requirement
02 p0266 A72-12370
- Electron and population densities in inhomogeneous nonequilibrium plasmas with photoabsorption, using radiative transport equation
02 p0266 A72-12441
- Second harmonic emission from plasma hybrid resonance region during electromagnetic wave normal incidence on nonhomogeneous magnetoactive plasma layer
02 p0180 A72-12578
- Right handed circularly polarized electromagnetic wave propagation in hot inhomogeneous plasma, deriving local dispersion equation by WKB methods
03 p0393 A72-12949
- Magnetoplasma with skin current characterized by current and electron temperature nonuniformity, analyzing instabilities for perturbations above ion gyrofrequency
03 p0396 A72-13713
- Hf electric field influence on electron drift instability and slow ion-acoustic waves for inhomogeneous magnetized plasma stabilization
04 p0555 A72-14617
- Electromagnetic wave propagation across external magnetic field in contraststreaming thermally anisotropic plasmas, investigating plasma stability
04 p0556 A72-14942
- Nonlinear phenomena in transition region through resonance of dense inhomogeneous plasma in alternating electromagnetic field
04 p0489 A72-15390
- Electromagnetic absorption heating in cold randomly inhomogeneous plasma, discussing consequences of thermal particle motion neglect
04 p0489 A72-15393
- Electromagnetic wave propagation and stability in inhomogeneous collisionless plasma under static magnetic field
04 p0490 A72-15401
- LF oscillations due to drift diffusion of current free weakly ionized inhomogeneous plasma in magnetic field
05 p0697 A72-16984
- Hall fields effect on interaction of MHD waves in inhomogeneous plasma, considering MHD wave dispersion
05 p0701 A72-17237
- Pulsed FM radio pulse signal reflection from inhomogeneous plasma or ionosphere calculating electron collision loss effects on distortion
06 p0854 A72-17487
- Dynamic stabilization of transverse Kelvin-Helmholtz instability driven by nonuniform plasma motion, using ac electric field near ion cyclotron frequency
06 p0857 A72-17531
- Microwave absorption by longitudinally inhomogeneous plasma, noting waveguide excitation in critical concentration region
06 p0776 A72-18409
- Plasma density inhomogeneity effects on beam-plasma instability and Landau damping from digital simulation using charge sheet model
06 p0865 A72-18541
- Threshold condition for purely growing parametric instability in inhomogeneous plasma
07 p0975 A72-19153
- Dispersion relation for uhf drift waves in nonuniform plasma with cold electrons drift through stationary ions, deriving plasma stability conditions
07 p1042 A72-19612
- Nonuniform plane parallel plasma streams instability with/without magnetic field, comparing with conducting fluid
07 p1042 A72-19618
- Electrostatic oscillations of multivelocity electron streams in hot inhomogeneous plasma
07 p1046 A72-20502
- Inhomogeneous high-collision finite pressure plasma stability, finding thermal instability development under uniform temperature and arbitrary pressure
07 p1046 A72-20514
- Long radio waves slant incidence on isotropic inhomogeneous ionospheric plasma
08 p1131 A72-20737
- Charged particles nonlinear oscillations in nonhomogeneous plasma, noting amplitude limitation and heating by external hf field energy absorption
08 p1212 A72-21210
- Electromagnetic wave polarization effect on linear transformation of waves in inhomogeneous magnetoactive plasma in magnetic field
08 p1212 A72-21245
- Dielectric permeability tensor operator for surface wave-electron beam interaction in relativistic nonuniform plasma stream with cylindrical geometry
09 p1359 A72-22769
- Electromagnetic wave propagation obliquely incident on thermal inhomogeneous plasma at frequencies near second electron cyclotron harmonic
09 p1365 A72-23521
- Inhomogeneous plasma effect on helical slow wave systems approximated by anisotropically conducting plane
10 p1522 A72-24518
- Inhomogeneous rarefied plasma, investigating nonlocal, linear and nonlinear effects on electromagnetic wave reflection and transmission
11 p1694 A72-25717
- Magnetoacoustic wave propagation and reflection in equilibrium inhomogeneous plasma under nonuniform magnetic field
11 p1695 A72-26094
- Nonlinear waves in nonuniform plasma, extending Butler and Gribbon formulation for Vlasov-Poisson equations
11 p1697 A72-26598
- Nonlinear wave interaction in plasma with random inhomogeneities, using quasi-hydrodynamic approximation
12 p1849 A72-27062
- LF oscillations due to drift-diffusion of current free weakly ionized inhomogeneous plasma in magnetic field
12 p1850 A72-27128
- Diagnostic procedures for nonhomogeneous plasma based on geometrical optics approximation, irradiating plasma by plane wave at oblique incidence
13 p2013 A72-29295
- Alternating magnetic field effect on collisionless nonhomogeneous magnetoplasma ion acoustic oscillations stability, examining parametric excitation of Langmuir oscillations
13 p2016 A72-29604
- Plasma inhomogeneity in crossed electromagnetic field, comparing motion velocity to ion component transverse drift rate in polarized electric field
13 p2019 A72-29893
- Nonlinear damping of potential monochromatic waves in inhomogeneous plasma, obtaining resonance particle distribution function
13 p1923 A72-29984
- Quasi-hydrodynamic equations for transverse waves in inhomogeneous plasma, using geometric optics approximation
13 p2019 A72-29986
- Non-Maxwellian inhomogeneous collisionless plasma equilibrium and stability, proposing statistical thermodynamic model
14 p2137 A72-30394
- Ion viscosity tensor and ion thermal flux derived for microinstabilities of inhomogeneous collisional high pressure plasma, noting second derivatives of temperature
14 p2137 A72-30395
- Electrostatic cyclotron harmonic waves propagation in inhomogeneous electron plasma slab, deriving RF electric field
14 p2138 A72-30397
- Experimental investigation of electrostatic cyclotron harmonic waves excited in inhomogeneous plasma column with axial magnetic field by RF capacitor field
14 p2138 A72-30398

Wave pattern of three dimensional hydromagnetic perturbations produced by harmonic magnetic dipole in anisotropic plasma 14 p2102 A72-30661

Electromagnetic waves backscattering in magnetoactive plasma containing random inhomogeneities of electron density, calculating field spatial-time and cross correlation functions 14 p2086 A72-30789

Electromagnetic waves propagation in inhomogeneous moving cold electron plasma without external magnetic field and collisions, investigating dynamo-optical effects 14 p2086 A72-30790

Magnetized nonuniform plasmas, discussing description to all orders in electron and ion temperatures of waves by operator method 14 p2139 A72-30879

Solitons propagation in two ion streams plasma for cold and finite temperature ions, noting periodic waves condition 15 p2286 A72-32276

Singly scattered radiation in weakly inhomogeneous turbulent plasma for incidence angles greater than critical angle, calculating backscattered wave depolarization from radiative transport equation 15 p2288 A72-32425

Quasi-linear approximation of absorption of oscillations excited by electron beam in nonuniform plasma, noting electron distribution change with heating under magnetic field 16 p2432 A72-32807

HF electrostatic instabilities driven by electron-ion relative drift velocity across external magnetic field for inhomogeneous plasma, noting Landau damping role 16 p2433 A72-32809

Langmuir wave coupling in inhomogeneous plasma due to combined density gradient and external HF electric field 16 p2436 A72-33654

Scattering of electromagnetic waves from an inhomogeneous magnetoplasma column moving in the axial direction. 17 p2587 A72-34359

Microwave absorption by longitudinally inhomogeneous plasma, noting waveguide excitation in critical density region 17 p2588 A72-34859

Investigation of two types of collisionless linear dampings of electromagnetic waves in a non-homogeneous magnetized plasma. 17 p2588 A72-34870

Critical point regularity conditions and asymptotic solutions to the time stationary, linearized, inhomogeneous solar wind flow problem. 17 p2599 A72-35095

Water bag model application to one dimensional inhomogeneous two-stream collisionless electron plasma stability computation, noting electrostatic modes 17 p2592 A72-35619

Growth rate and frequency dispersion characteristics of drift waves in an RF collisional plasma. 18 p2716 A72-36924

Amplitude limits to the theory of resonant absorption in cold plasmas. 18 p2716 A72-36960

Discontinuities in a collisionless plasma flow having a strong magnetic field. 18 p2717 A72-37042

Study of the mechanism of motion of nonequilibrium plasma inhomogeneities in a magnetic field 18 p2717 A72-37176

Long radio waves oblique incidence on isotropic inhomogeneous ionospheric plasma 19 p2766 A72-38365

Potential created by a point charge oscillating in an inhomogeneous plasma 19 p2842 A72-38522

Continuum eigenmodes of an inhomogeneous plasma. 20 p2956 A72-39015

Drift instabilities in an inhomogeneous collisionless plasma 20 p2957 A72-39355

Parametric excitation of Bernstein waves in inhomogeneous magneto-plasmas. 21 p3089 A72-40187

Alternating magnetic field effect on ionoacoustic oscillations stability of collisionless nonhomogeneous magnetoplasma, examining parametric excitation of Langmuir oscillations 21 p3091 A72-40658

Excitation of volume ion-acoustic oscillations in an inhomogeneous dense plasma by the field of an electromagnetic wave. 21 p3092 A72-40836

Absorption of an obliquely incident extraordinary wave in a weakly inhomogeneous plasma in the hybrid resonance region 21 p3095 A72-41694

Electrodynamical mathematical model for electroconductivity of nonuniform plasma with Hall effect, calculating current distribution from Riemann problem solution 22 p3210 A72-41888

Coupled fields in inhomogeneous warm plasmas with static pressure gradients. I. 22 p3210 A72-42313

Transport of RF energy to the lower hybrid resonance in an inhomogeneous plasma. 22 p3212 A72-42898

Theoretical study and wind tunnel simulation of the electrical phenomena of reentry 22 p3231 A72-43092

Surface drift vibrations of a weakly ionized plasma 22 p3212 A72-43102

Diffusive spreading of weak plasma discontinuities in the presence of two kinds of positive ion 23 p3283 A72-43363

Use of the simulation method for the solution of a dispersion problem for the propagation of symmetrical magnetic waves in a rectangular waveguide filled with a nonhomogeneous plasma 23 p3263 A72-43450

Plane parallel nonuniform velocity plasma streams instability in absence and presence of magnetic field, comparing with ideal conductive liquid flows 23 p3320 A72-43518

Perpendicular collisionless shock wave instability. 23 p3320 A72-43523

Method for solving the problem of radiation in an anisotropic plasma 23 p3321 A72-44220

Anode sheath plasma current instabilities, examining electron and ion turbulent heating, plasma particle limiting energies and unsteady oscillation spectra 24 p3429 A72-45490

Current-driven drift wave instability in a sheared magnetic field. 24 p3430 A72-45570

Nonlinear wave interaction in plasma with random inhomogeneities, using quasi-hydrodynamic approximation 24 p3431 A72-45715

NONUNIFORMITY

Thin shell theory analysis of thin walled cylindrical shell necking phenomenon as tensile deformation nonuniformity 08 p1248 A72-21821

NONVISCIOUS FLOW
U TURBULENT FLOW
NOON

Airborne optical measurement comparison with satellite observation for auroral emissions and particle precipitation at noon, suggesting electron precipitation role 19 p2868 A72-38738

NORADRENALINE

Ground and flying activity endurance training effect on urinary excretion of noradrenaline and adrenaline 04 p0478 A72-14868

Heat production increase by muscular contractions due to noradrenaline in cold adapted rats 05 p0620 A72-17215

Hypothalamus increased noradrenaline turnover after adrenal glands demedullation in rats given disulfiram inhibitor 07 p0924 A72-20621

Protein biosynthesis inhibitors retardation of noradrenaline and serotonin induced hyperpolarization of neuron membranes in cortical sensorimotor region of rabbits 08 p1122 A72-22192

High altitude hypoxia preadaptation effects on left ventricle myocardium noradrenaline concentration in rats with experimental vitium cordis 12 p1761 A72-27648

Adrenaline and noradrenaline metabolic stages and production mechanism under various physiological and pathological conditions, noting application to flight emotional stress detection 21 p3002 A72-41196

NOREPINEPHRINE

Epinephrine and norepinephrine effects on cerebral blood circulation volume and oxygen tension in tissues 02 p0165 A72-12517

Antimotion sickness drugs effectiveness based on acetylcholine or norepinephrine induced changes of balance between vestibular and reticular neurons 10 p1427 A72-23726

Modifications of the rate of renewal of norepinephrine in various peripheral organs of the rat during exposure and acclimatization to cold 23 p3258 A72-44244

NORMAL DENSITY FUNCTIONS

Gaussian periodic data optimal smoothing, describing convolution kernel and computer program 03 p0381 A72-13200

Multidimensional Gaussian distribution integrals evaluation for correlator analysis, discussing fix error probability and variance 03 p0387 A72-14189

Error distribution computation for combined Rayleigh-Gaussian statistics data, applying to antenna radiation beam-pointing example 04 p0500 A72-15303

Rice exceedance statistics application to atmospheric turbulence, indicating strong nonGaussian second order distributions [AIAA PAPER 72-136] 05 p0684 A72-16969

Markov type isotropic random Gaussian field analysis in n-dimensional Euclidean space 08 p1198 A72-20999

Clutter correlated lognormal random variables generation from statistically independent Gaussian random variables for radar simulations 08 p1134 A72-21423

Fresnel diffraction integrals for irradiance and power distribution calculations of Gaussian beams focused through annular apertures 09 p3352 A72-23334

HF radio waves scattering by spherical electron cloud with Gaussian density distribution 09 p1282 A72-23515

Solute dispersion distribution over tube cross section with flowing solvent, comparing with Gaussian distribution 10 p1466 A72-24330

Feature selection from pattern recognition of Gaussian distributed classes by mapping of vector samples from n dimensional space to m dimensional space via transformation matrix 10 p1445 A72-24461

Computer approximate computation of multidimensional normal distribution, examining error measure, random processes and correlation coefficient 11 p1676 A72-25429

Expected value of two dimensional Gaussian random array gain, assuming two dimensional isotropic noise field of single frequency 11 p1604 A72-26040

Target position information for radar energy potential calculation and detection quality, describing transmitter power reduction for normal range distribution density 11 p1596 A72-26313

Least squares method algorithm for estimating unsteady harmonic signal parameter in presence of normally distributed additive noise 13 p1915 A72-28435

Automated problem solving in continuous stochastic processes, using nonergodic representation of Gaussian process with continuous spectral density 15 p2204 A72-32588

Statistical analysis of position-fixing general theory for systems with Gaussian errors. 17 p2578 A72-34294

Book - Elements of applied stochastic processes 17 p2575 A72-34624

Experimental investigation of the parameters of a statistical Gaussian field model for centimeter waves beyond the radio horizon 17 p2515 A72-34834

Motion of ion-cloud in the ionosphere, field-aligned cloud with Gaussian distribution of ionization density. 17 p2546 A72-35060

Correlation functions and reconstruction error for quantized Gaussian signals transmitted over discrete memoryless channels. 17 p2516 A72-35333

A bivariate normal theory maximum-likelihood technique when certain variances are known. 21 p3075 A72-40826

Spherical focusing transducers with Gaussian surface velocity distribution. 21 p3057 A72-41477

Geometrical interpretation of Gaussian beam optics. 23 p3288 A72-43877

NORMAL DISTRIBUTIONS

U NORMAL DENSITY FUNCTIONS

NORMAL FORCE DISTRIBUTION

U FORCE DISTRIBUTION

NORMAL SHOCK WAVES

Steady normal shock wave analysis in binary inert monatomic gas mixtures using kinetic theory moment method 04 p0513 A72-15340

Radiative transfer and chemical nonequilibrium phenomena for radiating flow field predictions behind high altitude hypervelocity normal shock waves 05 p0603 A72-16545

Strong normal shock wave structure upstream and downstream of discontinuity due to nonequilibrium radiation and collisional ionization 06 p0902 A72-18106

Cylindrical tube geometry and electrode separation effects on normal ionizing shock waves, showing speed proportional to azimuthal drive and axial magnetic fields 10 p1470 A72-24794

Electron beam fluorescence method for normal shock wave velocity distribution in Ar-He mixtures 11 p1615 A72-25556

Supersonic turbine stator and rotor blading design corrected for boundary layer displacement thickness, discussing limitations due to normal shock wave at flow separation [ASME PAPER 72-GT-63] 11 p1571 A72-25653

- Normal ionizing shock waves characteristics in He under varying conditions of magnetic field strength, discharge current and gas pressure
11 p1694 A72-25789
- Magnetic structure of normal ionizing shock waves with zero transverse energetic component
11 p1618 A72-26607
- Aerodynamic normal shock noise measurements on nose cylinder bodies in transonic flow [AIAA PAPER 72-669]
16 p2346 A72-34068
- Analytical investigation of normal shock waves in water near the thermodynamic critical point.
17 p2543 A72-35635
- One dimensional stationary gas flow across normal shock wave, taking into account nonequilibrium factors and momentum, mass and energy transport
20 p2914 A72-39970
- Pressure jump across normal ionizing shock waves.
21 p3045 A72-40566

NORMALIZING

- Computer aided renormalized perturbation method for inhomogeneously loaded waveguide performance calculation
06 p0786 A72-18377
- Dense convexes class characterization in real seminormalized space on basis of decomposition family concept
13 p1987 A72-29779
- Long term weightlessness-induced physiological response normalization by muscle bioelectrostimulation, muscular tissue energy load increase and mineral metabolism stabilization
16 p2354 A72-33543

NORMALIZING [STATISTICS]

- Criterion for signals records legibility obtained by analog recorders, deriving relationship between normalized root-mean-square error and apparent frequency
09 p1316 A72-23663
- Solar X-ray data normalization, using conversion factors independent of incident photons spectrum
13 p2034 A72-29941
- Fluctuation renormalized transport coefficients in corrected nonlinear transport equations derivation from generalized Fokker-Planck equation
15 p2337 A72-32653

NORMS

- Error bounds relationship to norm in approximate numerical solutions of initial value problems for ordinary differential equations
11 p1679 A72-26957
- Ideas of individual on group members majority behavior in various situations, noting norm concept confirmation from psychological tests on reference groups
13 p1903 A72-28796
- Norms of the successive overrelaxation method.
17 p2574 A72-34448
- Reachable sets and singular arcs for minimum fuel problems based on norm-invariant systems.
17 p2534 A72-35533
- Evaluation of the norm of a function in terms of its Fourier coefficients, convenient in problems of approximation theory
24 p3419 A72-45549

NORTH AMERICAN MILITARY AIRCRAFT

- U MILITARY AIRCRAFT
NORTHERN HEMISPHERE
NT ARCTIC REGIONS
- Weather map numerical analysis for Northern Hemisphere, describing program with flow field for geopotential value checking
01 p0094 A72-10196
- Tropospheric processes effects on Northern Hemisphere stratospheric meridional transformations in geopotential field and air circulation
02 p0253 A72-11732
- Numerical weather prediction, discussing automatic forecasting, error sources, models and four-day validity in Northern Hemisphere
02 p0254 A72-12781
- Tropical east-west atmospheric circulation geometrical, thermal and intensity characteristics during northern summer
03 p0384 A72-14143
- Northern Hemisphere mean zonal flow across arbitrary horizontal surfaces, evaluating vertical transports of kinetic energy
04 p0541 A72-14454
- Ozone content and vertical distribution variations as causes of winter stratospheric warmings in Northern Hemisphere
07 p0973 A72-18861
- Baroclinic primitive equation prediction model for nontropical part of Northern Hemisphere with allowance for moisture exchange, radiative heat influx and cloud formation processes
11 p1683 A72-26886
- Hydrodynamic theory of atmospheric action center formation due to pressure migration for Northern troposphere two level meteorological forecasting
14 p2127 A72-30261

- Long term atmospheric pressure fluctuations in relationship to solar activity over Northern Hemisphere, confirming 22 year cycle
14 p2101 A72-30648
- Explorer 19 satellite drag evidence for neutral exosphere He concentration asymmetry between Northern and Southern Hemispheres over entire solar activity cycle
15 p2228 A72-31977
- Imposed southern boundary experimentation for large scale Northern Hemisphere midlatitude atmospheric flow numerical prediction, discussing factors contributing to model success
15 p2267 A72-32726
- Temporal behavior of hemispherically averaged geostrophic zonal and meridional flow from dynamic climatological studies of Northern Hemisphere large scale circulation
21 p3077 A72-40251
- Stratospheric general circulation patterns from geographical, vertical and annual distribution for Northern Hemisphere temperatures, geopotential heights and winds
21 p3078 A72-41611
- A diagnostic study of the vorticity balance at 200 mb in the tropics during the Northern summer.
22 p3201 A72-42507

NORTHROP MILITARY AIRCRAFT

- U MILITARY AIRCRAFT
NOSE [ANATOMY]
Otorhinolaryngological organ response during hypokinetic antiorthostatic bed rest for control, exercising and muscular electric-stimulated groups
23 p3256 A72-43917

NOSE CAPS

- U NOSE CONES
NOSE CONES
NT ABLATIVE NOSE CONES
NT ROCKET NOSE CONES
- Newtonian theory for maximum lift drag ratio of blunt-cone cylinder bodies, optimizing rocket reentry nose shape
05 p0602 A72-16535
- Surface heat transfer and pressure measurements for downstream effects of transpiration cooled nose tip, using nitrogen as injectant fluid [AIAA PAPER 72-185]
05 p0605 A72-16840
- Transitional and turbulent heat transfer measurements on yawed blunt cone nosetip in supersonic air flow at various angles of attack
07 p0964 A72-18960
- Boundary layer transition on slender cone in hypersonic flow as function of nose bluntness, free stream Reynolds number and angle of attack [AIAA PAPER 72-216]
07 p0908 A72-18961
- Conical and spherical nose shapes effects on drag and static stability at Mach 10
07 p0908 A72-19695
- Optimal selection of flawless nose cones from graphite billets, obtaining mathematical model based on ultrasonic reflection test data
07 p1086 A72-20350
- Thermal stress measurement and thermoelastic behavior of carbon-carbon-materials for reentry nose cones, describing gage mounting, temperature compensation and data recording
08 p1164 A72-20921

- Aerodynamic normal shock noise measurements on nose cylinder bodies in transonic flow [AIAA PAPER 72-669]
16 p2346 A72-34068
- Prediction of nose shape effects on nonlinear stability characteristics of slender cones.
20 p2886 A72-39628
- Hypersonic leading edge problem - Wedges and cones.
24 p3364 A72-45778

NOSE WHEELS

- Electromechanical nose wheel steering system for general aviation aircraft ground maneuverability improvement, describing design
01 p0006 A72-10963

NOSES [FOREBODIES]

- NT ABLATIVE NOSE CONES
NT NOSE CONES
NT ROCKET NOSE CONES
- Iterative solutions for three dimensional turbulent boundary layers on rotating nose-body, using streamline and cross flow momentum equations
01 p0002 A72-11397
- Al alloy plates and D-nosed specimens indentation and penetration under hail impact test
07 p1086 A72-18764
- Nose bluntness effect on bodies of revolution pitching moment characteristics in incompressible flow at various angles of attack

U CODING

NOTCH SENSITIVITY

- Waspaloy sheet creep rupture time dependent sensitivity to sharp-edged notches at 1000-1400 deg F, optimizing smooth and notched specimen yield strengths [ASME PAPER 71-WA/MET-3]
05 p0670 A72-15906

- Nb and Nb-Zr alloy tubular and sheet samples cyclic loading tests, determining heat treatment effects on notch sensitivity and fatigue strength
06 p0834 A72-18646

- Chemically etched notches effect on Al-Mg alloy mechanical properties
07 p1018 A72-20139

- Fatigue indicators with analytic or visual notched and cracked coupons techniques and strain multipliers for welded structures
09 p1316 A72-23620

- Tensile strength, plastic properties and notch sensitivity from low temperature tests of binary Ti alloys, noting effects of Sn content and temperature
12 p1831 A72-28239

- Stress-service life relations for duralumin samples from impact and nonimpact tensile tests with cyclic axial loads, noting notch sensitivity
13 p1978 A72-29147

- Li addition effects on Mg mechanical properties temperature dependence and notch sensitivity of binary Mg-Li alloys
14 p2125 A72-31041

- Notch toughness criteria of metals with S shape transition temperature curve, considering experimental design and impact test model
16 p2406 A72-33322

- Notch sensitivity of sintered stainless steel powder as function of density from application of sharp crack fracture mechanics methods to plane strain fracture toughness
16 p2408 A72-33700

- Thermal and mechanical stresses concentration near peripheral notches on ring-shaped graphite, noting notch sensitivity relationship to tip curvature and graphite grain size
23 p3306 A72-43755

- Chemically etched notches effect on Al-Mg alloy mechanical properties
24 p3417 A72-45764

NOTCH STRENGTH

- Elastic equilibrium of infinite wedge with apical asymmetric notch, reducing to Hilbert problem for holomorphic vectors
07 p1093 A72-19976
- Tensile strength of notched carbon and glass fiber reinforced epoxy resin composites as function of crack size
10 p1500 A72-24253
- Low temperature mechanical properties of Ti-base alloys, examining notched samples impact strength as function of temperature and notch depth
11 p1663 A72-26806
- Oxide content and sheet microstructure directionality effects on Be powder and ingot sheets notch strength, noting thickness dependence [ASM PAPER W 72-12.6]
12 p1830 A72-28164
- Cylindrical samples with deep circular hyperbolic notch, investigating cyclic inelastic strain induced stress redistribution effects on load bearing capacity
12 p1830 A72-28229
- Notch stress concentration in disk with elastic core under tension, using finite element method
13 p2060 A72-29600
- Understressing and coaxing cycles effect on deeply notched carbon steel fatigue behavior, emphasizing crack initiation and breakdown
16 p2472 A72-33947
- Some considerations on the residual stresses in orthogonal cut surface of aluminium.
20 p2978 A72-38884

NOTCH TESTS

- NT CHARPY IMPACT TEST
- Finite element analysis of creep due to stress and strain in double edge notched plates and round bars
01 p0138 A72-10519
- Crack angle effect on high strength metals fracture toughness, using Al alloys and tool steel ASTM-type single edge notch tension specimens
01 p0086 A72-10988
- Fatigue crack initiation and growth in sharply notched mild steel, showing specimen size, geometry and loading effects on fatigue life
01 p0142 A72-11098
- Crack opening displacement concept for fracture toughness testing, presenting elastic and plastic notch tip stress and deformation relationships in plane strain
02 p0292 A72-12005
- Quenched and tempered high strength and maraging steels delayed failure properties from notched-tensile sustained-load tests in distilled water
02 p0246 A72-12560
- Crack notched three point loaded bend specimens plain strain fracture toughness determination, showing relation between elastic work and stress intensity factor

Hypersonic two component gas mixture nozzle flow with condensation or evaporation discontinuity, determining Pitot pressure limits

02 p0230 A72-12255

Nonstationary temperature field determination in stream turbine casing-connector nozzle by difference method based on heat balances, comparing results with electric analog studies

02 p0303 A72-12534

Externally water cooled conical nozzle throat wall thickness design for high pressure and temperature argon flow medium

[DGLR PAPER 71-095]

02 p0299 A72-12702

Flow characteristics of pin type nozzles in constant pressure carburetors of Otto cycle engines

02 p0206 A72-12853

German monograph on gas type and nozzle flow conditions effect on condensed molecular jets properties

03 p0391 A72-13275

Rocket acceleration effect on internal isentropic nozzle flow, giving formulas for thermodynamic variables

03 p0441 A72-13627

Mass blocking of subsonic isentropic swirling flow through convergent axisymmetric nozzle, considering radial velocity component effect on vorticity

03 p0342 A72-13957

Skimmer design optimization for maximum nozzle beam intensity yields in hypersonic flow

03 p0362 A72-14052

Nozzle and cavity wall cooling limitations on uranium plasma nuclear rocket specific impulse, discussing wall heat flux and transpirational cooling by propellant flow

03 p0387 A72-14383

Flow development in gas nozzles with depressive networks, describing geometric and functional characteristics

04 p0510 A72-14467

Thermal nozzle combustion effects on supersonic flow of chemically reacting gas in thermodynamic equilibrium

05 p0599 A72-15846

Convergent conical nozzle shape effect on propulsive performance and compressible flow field internal characteristics

[ASME PAPER 71-WA/FE-3]

05 p0647 A72-15937

Flow calculations for subsonic and transonic portions of ring nozzles and plane curvilinear channels

05 p0601 A72-16226

Finite difference calculations for two dimensional unsteady inviscid expanding flow of perfect gas through nozzle, obtaining flow field patterns

05 p0603 A72-16539

Rapid expansion nozzles for gas dynamic laser working gas vibrational energy freezing to obtain population inversion, considering size and shape effects on performance

[AIAA PAPER 72-148]

05 p0669 A72-16965

Nonadiabatic real gas nozzle flow with friction and heat transfer to wall, obtaining solution by Runge-Kutta method

05 p0610 A72-17066

Population inversion of carbon dioxide molecules in gas flow expanding from nozzle

06 p0852 A72-17904

Plane irrotational flow of fluid with arbitrary thermodynamic properties in throat of Laval nozzle, solving flow equations

07 p0972 A72-20111

Vibrational relaxation in nonequilibrium and expansion nozzle flows

08 p1148 A72-21015

Steady flow of dual temperature plasma into vacuum from widening nozzle, taking into account electron thermal conductivity and heat exchange between components

08 p1214 A72-21653

Mixed subsonic-supersonic flows solution for choked isentropic flow in convergent-divergent nozzle, comparing results with series solution

10 p1561 A72-23721

Numerical prediction of subsonic and supersonic flow through convergent-divergent nozzle

10 p1416 A72-23874

Steady inviscid irrotational transonic flow in two dimensional symmetric and axially symmetric nozzle throats

10 p1417 A72-23875

Plane transonic gas flows through Laval nozzle and symmetrical wedge-shaped profile, solving boundary

value problem by reduction to singular integral equation

10 p1418 A72-24433

Aerodynamic throttling effect due to air jet flow interaction in throat region of mainstream two dimensional nozzle flow

10 p1419 A72-24845

Resistojet performance models for investigating energy losses in hydrogen, ammonia, methane and carbon dioxide nozzle flows

[AIAA PAPER 72-455]

11 p1708 A72-26191

Critical discharge regimes of two phase steam/water mixture flow from nozzles, using counterpressure effect

11 p1619 A72-26674

Turbine nozzle vanes edge losses dependence on profile edge thickness, allowing flow velocity variation

12 p1861 A72-28135

Steady flow of compressible heat conducting fluid, discussing effect of small transfer coefficient on isentropic sonic singularity in Laval nozzle

14 p2171 A72-30713

Thermal nozzle combustion effects on supersonic flow of chemically reacting gas in thermodynamic equilibrium

15 p2334 A72-31265

Transient flow induced in convergent-divergent nozzles by shock front impingement, investigating nozzle shape and Mach number effects on formation process of reflected shock

15 p2179 A72-32143

Transient flow induced by shock front impingement on Laval nozzles observed by schlieren method, noting time variations of temperature and pressure

15 p2179 A72-32144

Characteristic parameters of stationary supersonic plasma flow in magnetic de Laval nozzle calculated for collisional and collisionless cases, measuring ion saturation currents

15 p2285 A72-32268

Pseudo-one dimensional dissociative nonequilibrium nozzle flow, presenting governing equations transformation via similarity parameter for oxygen

16 p2375 A72-32906

Inverse Laval problem of three dimensional subsonic and supersonic flows in nozzles and ducts of variable cross section in terms of asymptotic series

16 p2342 A72-32930

Supersonic molecular jet improvement via expansion chamber residual gas pressure reduction and nozzle stagnation pressure increase

16 p2429 A72-33053

Water vapor condensation in jet turbulent mixing zone of confluent high velocity high temperature gas streams for finite axisymmetric nozzle

16 p2377 A72-33260

Three dimensional supersonic nozzle exhaust flow field numerical analysis based on reference plane characteristics, deriving difference equations for three coordinate systems

[AIAA PAPER 72-704]

16 p2344 A72-34040

Nonequilibrium steady quasi-one dimensional expanding nozzle flow of chemically reacting gas mixture, using time dependent finite difference technique

[AIAA PAPER 72-684]

16 p2480 A72-34058

Coupling of free electron and nitrogen vibrational temperature nonequilibrium in weakly ionized nozzle expansions of shock heated nitrogen

[AIAA PAPER 72-683]

16 p2380 A72-34059

Supercritical pressure convergent nozzle performance prediction by time dependent method of characteristics solution to mixed flow problem, adapting Moretti-Abbott technique

[AIAA PAPER 72-680]

16 p2346 A72-34061

Supersonic jet noise mechanisms and scaling laws, studying acoustic fields for rectangular and axisymmetric nozzle configurations

[AIAA PAPER 72-641]

16 p2381 A72-34091

Influence of contraction section shape and inlet flow direction on supersonic nozzle flow and performance

17 p2483 A72-34204

17 p2485 A72-34999

Air film cooling in a nonadiabatic wall conical nozzle

17 p2638 A72-35493

Density distribution in a high-pressure gas jet measured by laser-induced gas breakdown

17 p2486 A72-35630

Method of characteristics application to supersonic jet and nozzle gas flow with allowance for equilibrium and nonequilibrium condensation

17 p2544 A72-35929

Swirling flows vortex breakdown in nozzles, diffusers and combustion chambers, considering analogy to boundary layer separation

18 p2641 A72-36385

Determination of the stream function of a perturbation associated with a plane jet

18 p2680 A72-36470

A through-type counting method for two-dimensional and spatial supersonic flows. II

18 p2642 A72-36810

Structure of turbulent underexpanded jets expelled into a submerged space and into a slipstream

18 p2642 A72-36884

Nonlinear development of capillary waves in a fluid jet

18 p2682 A72-36885

Analysis of a transonic flow in elliptic nozzles

18 p2642 A72-36898

Turbulent diffusion in Laval nozzle, studying mixing of weakly heated jet coaxial with main flow in subsonic flow region

20 p2913 A72-39368

Viscous non-adiabatic laminar flow through a supersonic nozzle - Experimental results and numerical calculations

[ASME PAPER 72-HT-49]

20 p2985 A72-39662

Generalized relations for determining specific impulse losses in nonequilibrium two-phase nozzle flows

20 p2914 A72-39909

Interaction between the droplets of a polydispersed condensate in a nozzle flow

20 p2915 A72-40046

Experimental CW chemical laser studies

[AIAA PAPER 72-712]

21 p3063 A72-40920

Critical flow rate and pressure ratio for nitrogen flowing through convergent-divergent nozzle at stagnation conditions, emphasizing thermodynamic critical region

21 p3046 A72-41180

Critical mass flow and nonequilibrium nozzle flow of vibrationally relaxing, ideal dissociating diatomic and singly ionizing monatomic gases, using steepest descent method

21 p3046 A72-41249

Perturbation analysis of aerodynamic test flow in Ludwig tubes, investigating nonsteady coupling effects on nozzle turbulent boundary layer

[AIAA PAPER 72-994]

21 p2993 A72-41580

Pressure transmitter for flow parameter measurements of aerodynamic nozzles and static pressure taps rotating on turbine rotor blades

22 p3176 A72-42250

Method of characteristics for ideal gas flow in annular space of axisymmetric plug nozzle, noting flow visualization by schlieren photography

22 p3166 A72-42263

Numerical integration of three dimensional flow equations for supersonic jets of ideal gas exhausted from elliptical and rectangular nozzles

22 p3133 A72-42264

Flow equations for axisymmetric compressible conical flow in Busemann nozzle, noting numerical method for integral lines construction for given Mach number

22 p3134 A72-42288

Modified Newton-Kantorovich variational method for calculating flows in subsonic and transonic portions of circular nozzles, noting savings in computer time

23 p3248 A72-43659

Flow parameters and geometric factors effect on wake structure behind nozzle cascades with cooling air ejection through blade trailing edges, evaluating energy losses due to flow mixing process

23 p3248 A72-43665

Experimental investigation of the structure of turbulent jets expelled from a rectangular nozzle and nozzles with a limited head

23 p3280 A72-44020

An experimental study of flows in planar nozzles

[ASME PAPER 72-FLCS-2]

- Jet engine silencing plug nozzle suppressor configurations acoustic and thrust performance measurements [AIAA PAPER 72-160] 05 p0706 A72-16826
- Large scale high aspect ratio multielement suppressor nozzle arrays testing for augmentor wings and internally blown flaps [AIAA PAPER 72-131] 05 p0612 A72-16888
- Steady heat conduction of cooled gas turbine hollow nozzle blades with gas temperature variation along cascade 08 p1223 A72-20948
- Pulsed carbon dioxide laser operation, measuring pulse energy variation with gas pressure, expansion nozzle shape and output mirror transmission 09 p1323 A72-22980
- High velocity water jet generation dynamics, deriving equations of motion for mathematical model with nozzle profiles and liquid compressibility approximations 14 p2093 A72-30180
- Approximate analytical solution for spherical particle acceleration in uniform gas flow, examining nozzle geometry and particle size effects 14 p2095 A72-30924
- Two stream ejector propulsion performance, measuring nozzle geometry effect on discharge coefficient for 2-90 deg convergence angles [ONERA, TP NO. 1050] 15 p2177 A72-31208
- Thermal and I-V characteristics of dc plasmatron with vortex stabilized arc, interelectrode insert and diverging arc channel for various nozzle diameters 15 p2283 A72-31271
- Perturbations effects on plane symmetry supersonic molecular beam intensity as function of nozzle-skimmer geometry and nozzle pressures 16 p2430 A72-33062
- Axisymmetric jet impact on ground board for different nozzle configurations and heights in VTOL aircraft aerodynamic studies 16 p2377 A72-33404
- Liquid propellant rocket engines three dimensional nozzle admittance determination by impedance tube method from pressure distribution measurement, taking into account nozzle geometry effect [AIAA PAPER 72-666] 16 p2443 A72-34071
- Supersonic jet noise mechanisms and scaling laws, studying acoustic fields for rectangular and axisymmetric nozzle configurations [AIAA PAPER 72-641] 16 p2381 A72-34091
- Influence of contraction section shape and inlet flow direction on supersonic nozzle flow and performance. 17 p2483 A72-34204
- Effect of nozzle throat radius of curvature on gasdynamic laser gain. 17 p2561 A72-34210
- Shape factors for nozzle corner cracks evaluated from epoxy-model pressure vessels. 17 p2630 A72-34814
- Servo pump nozzle area controls for gas turbines. 18 p2694 A72-36048
- Extendible variable profile nozzle for various flow regimes operation, developing numerical design algorithm 18 p2641 A72-36661
- Analysis of a transonic flow in elliptic nozzles 18 p2642 A72-36898
- Influence of pressure, mass flow rate, and nozzle angle on the chemical relaxation in nozzles 19 p2880 A72-37494
- Importance of nozzle geometry to high-pressure gas-dynamic lasers. 19 p2811 A72-37867
- Optimal arrangement of conical nozzles in a segment of a partial supersonic turbine stage. 20 p2963 A72-39913
- Flow parameters and geometric factors effect on wake structure behind nozzle cascades with cooling air ejection through blade trailing edges, evaluating energy losses due to flow mixing process 23 p3248 A72-43665
- Experimental investigation of the structure of turbulent jets expelled from a rectangular nozzle and nozzles with a limited head 23 p3280 A72-44020
- An experimental study of flows in planar nozzles. [ASME PAPER 72-FLCS-2] 23 p3249 A72-44066
- Frequency dependence of axially oscillated nozzles admittance real and imaginary parts for different Mach numbers, convergence angles and curvature radii, comparing theory and experiment 24 p3433 A72-45144
- Jet pumps for compressible fluids at supersonic velocities. 24 p3393 A72-45362
- Axisymmetric nozzles shape for thrust optimization, comparing maximum thrust circular arc and conical nozzles performances 24 p3365 A72-45784
- ### NOZZLE INSERTS
- NDT for detecting density variation, local anomalies regions and completeness of copper-infiltrated W powder rocket nozzle inserts 03 p0364 A72-14025
- Aircraft engines high pressure turbine guide vanes air cooling by internal insert, analyzing thermal stresses [AIAA PAPER 72-7] 05 p0707 A72-16864
- ### NOZZLE THRUST COEFFICIENTS
- Convergent-divergent nozzles thrust model measurement on supersonic aircraft afterbody [ONERA, TP NO. 978] 05 p0642 A72-15856
- Thrust stand for evaluation of thrust vectoring nozzle performance. [AIAA PAPER 72-1029] 24 p3389 A72-45406
- Axisymmetric nozzles shape for thrust optimization, comparing maximum thrust circular arc and conical nozzles performances 24 p3365 A72-45784
- ### NOZZLE WALLS
- Externally water cooled conical nozzle throat wall thickness design for high pressure and temperature argon flow medium [DGLR PAPER 71-095] 02 p0299 A72-12702
- Side force and shock wave induced by obstacle on rocket engine nozzle wall, investigating pressure distribution 07 p1055 A72-20250
- Shock wave interactions with nozzle wall turbulent boundary layer, discussing shock strength variation to produce unseparated, incipient and fully separated flow fields [AIAA PAPER 72-715] 16 p2380 A72-34033
- ### NOZZLES
- Hot water rocket engine design and operation principles, discussing high pressure tank and nozzle characteristics 15 p2297 A72-31830
- ### NRX-A REACTOR
- ### U NUCLEAR ENGINE FOR ROCKET VEHICLES
- ### NUCLEAR AUXILIARY POWER UNITS
- ### NT SPACE POWER REACTORS
- ### NT SPACE POWER UNIT REACTORS
- Uranium mononitride as nuclear reactor fuel for space vehicle power supply applications, discussing fabrication techniques and irradiation behavior 09 p1349 A72-22406
- ### NUCLEAR BINDING ENERGY
- Resistometric investigation of Ge addition effect on Al-Zn alloy clustering kinetics, determining Ge atom-vacancy binding energy 02 p0247 A72-12821
- Tight binding model for binding energy determination in transition atoms adsorption on same series transition metal substrate, using moments expansion technique 15 p2281 A72-32379
- Oxygen molecule electron affinity role in ion chemistry of lower ionosphere, noting binding energy of ground state 17 p2585 A72-34260
- ### NUCLEAR CAPTURE
- ### NT ELECTRON CAPTURE
- ### NUCLEAR DEFORMATION
- X ray diffuse scattering from Al crystal at 100-500 V, considering phonon modes effects on anharmonicity and atomic deformation 08 p1186 A72-21591
- ### NUCLEAR ELECTRIC POWER GENERATION
- ### NT NUCLEAR AUXILIARY POWER UNITS
- ### NT NUCLEAR POWER PLANTS
- ### NT NUCLEAR POWER REACTORS
- ### NT SPACE POWER REACTORS
- ### NT SPACE POWER UNIT REACTORS
- ### NT THERMONUCLEAR POWER GENERATION
- Laser beam power transmission to lunar bases or spacecraft from nuclear fueled satellite power station, discussing achievable ranges and efficiencies 17 p2611 A72-35328
- An out-of-core thermionic-converter system for nuclear space power. 18 p2645 A72-36187
- On-board nuclear power plants in space 24 p3423 A72-45119
- United States Space Nuclear Electric Power Program. 24 p3424 A72-45179
- ### NUCLEAR ELECTRIC PROPULSION
- Comet rendezvous and outer planet exploration mission operations by unmanned nuclear electric propulsion /NEP/ system with incore thermionic reactors for electric power generation [AIAA PAPER 72-428] 11 p1722 A72-26173
- Spacecraft nuclear electric propulsion system multi-mission performance evaluation, discussing launch mode and vehicle capability factors in system size selection [AIAA PAPER 72-503] 11 p1685 A72-26226
- Nuclear electric propulsion systems performance evaluation for various escape missions 17 p2606 A72-34577
- Mission operations for unmanned nuclear electric propulsion outer planet exploration with a thermionic reactor spacecraft. 17 p2606 A72-34578
- Thermionic reactor system for auxiliary power and electric propulsion. 17 p2494 A72-34579
- Thermionic reactors design based on flashlight and external fuel concepts for nuclear electric propulsion 17 p2494 A72-34580
- Thermionic reactor power conditioner design for nuclear electric propulsion. 17 p2495 A72-34582
- ### NUCLEAR EMULSIONS
- Nuclear emulsion and solid track threshold dosimetry for ion spectrum division of heavy relativistic particles in primary cosmic rays [CERN-71-16] 02 p0162 A72-12065
- Dispersion energy relation for ultrahigh energy nuclear reactions in cosmic ray emulsion 03 p0410 A72-13148
- Nuclear photoemulsions under bombardment by pion beam of 60 GeV/c momentum, investigating pion-nucleon interactions involving recoil protons 06 p0851 A72-17273
- Pulsed and hf electric field effects on ionizing particle recording in nuclear and photographic emulsions 06 p0816 A72-17833
- Cosmic radiation effects in Concorde prototype cabin, using photographic dosimeters for neutron dose measurement and nuclear emulsions for all charged particle recordings 07 p0927 A72-19241
- Quasi-nucleonic interactions of high energy protons in nuclear emulsion irradiated within pulsed magnetic field 07 p1038 A72-19869
- Primary cosmic rays antineutrino content upper limit from emulsions investigations with balloons and satellites 14 p2148 A72-30885
- Isotopic abundance analysis of primary cosmic radiation with nuclear emulsion technique, discussing mass measurements in Be, C, O, Ne, Mg and Fe tracks 16 p2447 A72-33731
- A comparison of measurements of the charge spectrum of solar cosmic rays from nuclear emulsions and the Explorer 35 solid-state detector. 18 p2721 A72-35988
- General characteristics of proton-nucleon and coherent interactions at an energy of 67 GeV 23 p3317 A72-44415
- High energy inelastic collisions of pions and protons with nuclear emulsion nucleons, noting pion pulse spectra 23 p3317 A72-44417
- Recording high-energy particle interactions by the method of the controlled emulsion stack of large volume 23 p3291 A72-44438
- Angular and impulse characteristics of negative-pion interactions at an energy of 60 GeV in the emulsion 23 p3292 A72-44446
- ### NUCLEAR ENERGY
- Nuclear energy value to society, stressing usefulness for electric power generation and marine propulsion 03 p0387 A72-14376
- Closed type gas turbines heated with nuclear energy, calculating heat transmitter dynamic behavior with computer program 07 p1055 A72-20598
- Laser heating of plasma based on thermal conductivity mechanism, considering nuclear microfusion energy recovery 08 p1213 A72-21303
- Nuclear science and power systems - IEEE-NASA-AEC Conference, San Francisco, November 1971 08 p1166 A72-21506
- Heat transfer research review, discussing gas turbines, aeronautics, astronautics, nuclear power, thermal pollution and controlled fusion challenges 09 p1412 A72-23684
- Laser conductive heating of plasma with accounted nuclear fusion energy, assuming plane thermal wave 10 p1522 A72-24722

Nuclear energy sources in overdense celestial bodies
19 p2862 A72-38061

NUCLEAR ENERGY LABORATORIES
U LABORATORIES

NUCLEAR ENGINE FOR ROCKET VEHICLES
NERVA fuel quality control, discussing planning, nondestructive tests, computer data acquisition and certification systems
02 p0258 A72-11552

Nuclear rocket propulsion program, discussing solid refractory core technology, Rover project and NERVA engine development and tests
15 p2273 A72-31811

NERVA flight engine control system design.
21 p3083 A72-40764

NUCLEAR EXPLOSION EFFECT
Radiation-hardened components, circuits and systems.
18 p2665 A72-36308

Quasi-static loading of the earth by propagating air waves.
22 p3172 A72-42468

Stratospheric concentration of radioactive carbon from 1961-62 nuclear tests by balloon measurements over European U.S.S.R. territory during 1967-69
23 p3286 A72-44492

NUCLEAR EXPLOSIONS
NT THERMONUCLEAR EXPLOSIONS
Point explosion in cosmic spheroid with exponential density distribution, observing shock wave propagation along symmetry axis direction
07 p1075 A72-19583

Papers on high temperature physics and chemistry covering peaceful nuclear explosions, radiative transfer, hydrodynamics, stellar opacity and solar He abundance
07 p1078 A72-19922

Long term A3 absorption associated with nuclear explosion caused artificial radiation belts, discussing electron precipitation role in D region ionization
15 p2299 A72-31933

NUCLEAR FISSION
Molybdenum-uranium dioxide cermet fuel pins fission heating at 1145 K in forced convection He cooled reactor, measuring dimensional changes and U 235 burnup
04 p0546 A72-14424

Symmetric fission of superheavy nuclei, observing overabundance of rare earth elements
10 p1515 A72-24526

Release of fission products from high temperature fuel materials
18 p2707 A72-36137

Transuranium elements in HD 25354.
22 p3224 A72-42381

Uranium distribution in basalt fragments of five lunar samples.
23 p3261 A72-43399

Fission and fusion propulsion for deep space missions, discussing gas and colloid core reactors, controlled fusion, MHD and laser plasma systems
24 p3423 A72-45168

NUCLEAR FORCES
U NUCLEAR BINDING ENERGY

NUCLEAR FUEL ELEMENTS
Nuclear light bulb engine concept, detailing radiant heat transfer calculations in fuel and buffer gas regions
01 p0099 A72-11345

Minicavity reactor rocket engine combining high specific impulse of central gaseous fueled cavity and low weight NERVA type fuel elements in driver region external to moderator-reflector zone
01 p0100 A72-11358

Conductive heat transfer from rib roughened surfaces in gas cooled reactor fuel elements
04 p0595 A72-14596

Design features, fabrication technology and in-pile testing of thermionic reactor fuel elements
17 p2495 A72-34584

Sizing an external-fueled in-core thermionic reactor.
17 p2495 A72-34588

Cythere capsule for irradiation of experimental fuel elements under geometric and thermal conditions representative of thermionic converters
17 p2579 A72-34619

Thermionic converters fuel tests by uranium dioxide-Mo cermet irradiation, noting fission gas retention and metallic matrix deformation
18 p2708 A72-36141

State of development of diodes for incore thermionic fuel elements.
18 p2708 A72-36150

Thermionic fuel element development status summary.
18 p2708 A72-36151

Multicell thermionic fuel element fabrication technology.
18 p2708 A72-36152

Ceramic-to-metal seal development for thermionic fuel elements.
18 p2695 A72-36156

Thermionic fuel element triple diode configuration, processing, assembly and performance during neutron irradiation testing in reactor
18 p2708 A72-36159

Reactor testing and performance of in-pile thermionic fuel elements, noting neutron radiographs
18 p2708 A72-36160

Breeder reactor testing of fast neutron irradiation effect on alumina and yttria cylinders for thermionic fuel rod designs
18 p2708 A72-36161

Pure and thoriated W compatibility with uranium carbide alloys at 1800 C, noting thermal gradient and thoria noneffects
18 p2699 A72-36163

Thermionic fuel cladding development, compatibility, stability and performance for uranium carbide-tungsten and uranium oxide-tungsten systems at high temperatures under irradiation
18 p2709 A72-36164

High-voltage thermionic reactor using double-sheath fuel elements.
18 p2644 A72-36171

Measurements with thermionic fuel elements in the ITR critical facility.
18 p2645 A72-36181

NUCLEAR FUELS
NT CERAMIC NUCLEAR FUELS
NDT holographic interference pattern technique to determine Advanced Test Reactor fuel element swage joint tightness
01 p0078 A72-11110

Injection geometry and inlet flow conditions application to open cycle gas nuclear reactor engine, evaluating fuel containment from cylindrical and spherical chambers experiments
01 p0100 A72-11350

Thermal environment and fuel region simulation for nuclear light bulb engine, using rf induction heater and uranium and tungsten hexafluorides injection
01 p0113 A72-11355

Split-core heat pipe reactor for out-of-core thermionic power systems, using center gap for fuel reactivity control
04 p0546 A72-14425

Cylindrical nuclear fueled capsules heat transfer gaps, determining dimensional changes with neutron radiographs
04 p0546 A72-14428

Uranium mononitride as nuclear reactor fuel for space vehicle power supply applications, discussing fabrication techniques and irradiation behavior
09 p1349 A72-22406

Design of an external-fueled thermionic diode for in-pile testing.
17 p2495 A72-34585

Out-of-core evaluations of a nonfueled and a UO₂-fueled cylindrical thermionic converter.
17 p2497 A72-34608

Evaluations of uranium-nitride fueled converters.
17 p2497 A72-34609

Metal working and testing of nuclear rocket engine components with Mo as structural material and uranium dioxide as fuel, discussing Mo-W interdiffusion
17 p2559 A72-34617

Release of fission products from high temperature fuel materials
18 p2707 A72-36137

Behavior of tungsten-clad Mo-UO₂ fuel under neutron irradiation at high temperature.
18 p2708 A72-36143

State of development of an actinium fueled thermionic generator.
18 p2644 A72-36169

Results of a preliminary experimental investigation of a vapor transport fuel pin.
19 p2832 A72-37631

Developmental status of thermionic materials.
19 p2833 A72-38575

The impact of aerospace technology on energy conversion in the 70's.
17 p2495 A72-34588

[ASME PAPER 72-AERO-11] 22 p3140 A72-43147

NUCLEAR FUSION
NT CONTROLLED FUSION
He abundances in universe, discussing stellar structure and evolution, He production, variable stars and globular clusters H-R diagrams shape
03 p0418 A72-13112

He production from H to maintain Galactic luminosity, discussing interstellar gas enrichment
03 p0419 A72-13116

Helium production within supermassive stars and disks and little bangs, discussing conversion from hydrogen
03 p0419 A72-13117

Magellanic Clouds and Galactic nucleosynthesis from chemical composition
03 p0426 A72-13263

Nuclear astrophysics review, discussing chemical elements and isotopes abundance and cosmic nucleosynthesis
03 p0437 A72-13842

High temperature dense plasma formation by laser heating of gas target, noting fusion reaction in deuterium-tritium mixture
03 p0399 A72-14066

Nucleosynthesis model for gamma ray astronomy, covering explosive events
03 p0413 A72-14275

Early solar system nucleosynthesis of Al 26, discussing silicon and carbon burning and spallation
04 p0567 A72-14912

Nuclear fusion by laser radiation, discussing plasma heating mechanisms and limitations in DD reaction production
04 p0557 A72-15172

Metal-rich 1.19 solar mass main sequence star evolution to convection onset in core during He flash
04 p0577 A72-15283

Explosive p-process nucleosynthesis limiting conditions in supernova envelopes, using proton capture and neutron photodisintegration rates
04 p0579 A72-15318

Nuclear microfusion energy recovery threshold increase during laser pulse heating process of D-T plasma
05 p0695 A72-16280

Energy dependence of solar proton-proton reaction, generating p-p wave function from Schroedinger equation
05 p0718 A72-16501

Elemental synthesis and energy sources in stellar evolution, hydrogen, helium and advanced burning stages, p-p cycle, e process and nuclear equilibrium
06 p0876 A72-17585

Galactic evolution model, tracing stellar and supernova nucleosynthesis influence on interstellar gas composition
06 p0886 A72-18082

Stellar extinction and genesis with Galaxy, discussing Li role in nucleosynthesis and degenerate star structure theory
07 p1073 A72-19427

Elemental nucleosynthesis, considering cosmological, stellar, galactic and solar system evolution and atomic nuclei energetic levels
07 p1083 A72-20466

Laser heating of plasma based on thermal conductivity mechanism, considering nuclear microfusion energy recovery
08 p1213 A72-21303

Laser heating of plasma based on heat conduction mechanism of spherical thermal wave, taking into account nuclear fusion heat generation
09 p1365 A72-23553

Laser heating and fusion energy recovery of D-T plasma by mechanical-magnetic cumulation, considering cylindrical wave system
09 p1365 A72-23553

Main sequence star evolution relation to pulsar formation, discussing stellar core density at carbon ignition with respect to critical density limit
09 p1394 A72-23698

Si burning in stellar explosions, discussing initial composition and neutron enrichment
10 p1544 A72-24666

Closed form solution for spherical and cylindrical wave propagation in laser conductively heated plasma, considering account of nuclear fusion energy recovery
10 p1522 A72-24721

Laser conductive heating of plasma with accounted nuclear fusion energy, assuming plane thermal wave
10 p1522 A72-24722

Averaged equations for laser heating of two temperature plasma with allowance for nuclear fusion energy, noting inequality of ion and electron temperatures
12 p1851 A72-27395

Evolution of extreme population I massive stars from main sequence to He exhaustion phase, discussing various development phases in H-R diagram
14 p2158 A72-30727

Fusion reactor RF heating below 100 MHz, discussing coil structures and arcing and cooling problems in main fusion region
16 p2433 A72-32813

Laser heating of two temperature plasma based on conductive heat transfer, taking into account nuclear fusion energy
16 p2434 A72-32876

Nitrogen existence in galactic cosmic ray sources, considering formation from CNO cycle hydrogen and He burning and ejection from normal stars
16 p2448 A72-33739

The potential of a laser-induced fusion device as a thermal-neutron source.
17 p2591 A72-35353

Thermonuclear fusion spacecraft propulsion systems operation principles, interplanetary orbit-to-orbit mission capabilities and environmental safeguard problems
17 p2598 A72-35953

Mixing processes of newly made elements in Galaxy, taking into account thermodynamics, galactic structure and nucleosynthesis parameters
18 p2727 A72-36732

- Hydrostatic oxygen burning in stars. II.
19 p2854 A72-37236
Averaged equations of the combined process of hydrodynamic expansion and conduction heating of plasma, the recovered energy of nuclear fusion being taken into consideration. I - The plane problem.
19 p2841 A72-38095
Alternative description of the conduction-type laser heating process of two-temperature plasma in the spherically symmetric case, the nuclear fusion energy being taken into consideration.
19 p2841 A72-38096
Recent developments in the history of the nucleosynthesis of the solar system.
20 p2971 A72-39837
The possibility of producing plasma regions at thermonuclear fusion conditions in a supersonic flow by means of high power electron beam.
21 p3092 A72-41224
Averaged equations of simultaneous hydrodynamic expansion and thermal heating of two-temperature plasma, taking the recovery of thermonuclear fusion into account. I - The plane problem. II - The spherical problem.
21 p3093 A72-41476
The problem of conductivity-type laser heating of two-temperature plasma, the nuclear fusion energy being taken into consideration, in the spherically symmetric case.
21 p3093 A72-41480
Averaged equations of laser heating of Z-pinch plasma the nuclear fusion energy being taken into consideration.
21 p3093 A72-41481
Nucleosynthesis theory for advanced thermonuclear evolution models of massive stars from helium burning through final hydrodynamic stages
22 p3227 A72-42561
Approximation of energy generation and nucleosynthesis during hydrostatic carbon burning in massive stars, noting neutrino-dominated evolution effects
22 p3228 A72-42562
Studies of heavy-element synthesis in the galaxy. I - Separation of r- and s-process abundances.
22 p3228 A72-42563
Alternative description of laser plasma heating for spherical thermal wave, the fusion energy being taken into account.
22 p3211 A72-42629
Averaged equations for joint treatment of hydrodynamic expansion and conduction-type heating of plasma, the energy of nuclear fusion being taken into consideration. II - Spherical problem.
22 p3211 A72-42630
Averaged equations of laser heating of plasma in a focus-type system taking into account the heat of nuclear fusion.
23 p3322 A72-44223
Averaged equations of laser heating of two-temperature plasma in a focus-type system taking into account the heat of nuclear fusion.
23 p3322 A72-44224
- NUCLEAR INTERACTIONS**
NT ELECTRON CAPTURE
NT SPIN-ORBIT INTERACTIONS
High energy nucleon tissue doses calculation based on averaged characteristics of nuclear interactions [CERN-71-16]
02 p0162 A72-12067
Inelastic nuclear interactions between 200-GeV cosmic ray particles and polyethylene targets, correlating similarity property, angular momentum spectra and secondary particle pairs
06 p0868 A72-17258
Particle multiplicity and momentum spectra for high energy inelastic nuclear interactions in Wilson chamber with polyethylene target
06 p0868 A72-17261
Spectral calculations of electromagnetism and nuclear showers of cosmic ray muons interacting with substance
06 p0871 A72-17288
Microscopic calculations for nuclear forces, compressibility of neutron matter and maximum mass of neutron stars based on solid state model at high densities
06 p0891 A72-18507
Papers on high energy cosmic ray and nuclear interactions covering extensive air showers, cloud chamber data, electron-photon cascades, solar activity effects, etc
07 p1060 A72-19863
Inelastic high energy multiple interactions between cosmic ray particles and atomic nucleus targets, using Wilson chamber and ionization calorimeter
07 p0988 A72-19864
Radiation measuring instruments assembly for extensive air showers and cosmic ray particle nuclear interactions at high energies
07 p0988 A72-19868
Quasi-nucleonic interactions of high energy protons in nuclear emulsion irradiated within pulsed magnetic field
07 p1038 A72-19869
- Pion generation during collective interactions between nucleons of heavy cosmic ray nuclei, using Proton 4 satellite data
08 p1228 A72-22179
Pion generation during collective interactions between nucleons in heavy cosmic ray nuclei, using Proton 4 satellite data
18 p2721 A72-36235
Effective cross section of the inelastic interaction of hadrons with lead-atom nuclei at energies from 3 to 30 TeV
23 p3330 A72-44410
Nuclear interactions in the atmosphere at energies greater than 100 TeV
23 p3330 A72-44411
Multiple collisions and an optical model of the inelastic interaction between cosmic particles and nuclei
23 p3330 A72-44413
Energy dependence of muon-nucleon inelastic interaction, calculating photonuclear cross section for high energy interactions in iron
23 p3331 A72-44429
- NUCLEAR MAGNETIC RESONANCE**
NT PROTON MAGNETIC RESONANCE
NT PROTON RESONANCE
Nuclear magnetic resonance of Al 27 in topaz /aluminum fluorosilicate/, determining nuclear quadrupolar coupling constant and asymmetry parameter
04 p0564 A72-15638
NMR behavior and magnetic susceptibility of intermetallic compound CeAl, noting exchange polarization of RKKY type between 4f electrons and conduction electrons
05 p0702 A72-16784
High resolution NMR spectrometer conversion from continuous wave to Fourier transform operation, permitting computer systems and pulse amplifiers use
09 p1316 A72-23408
Digital pulse programmer with saturation burst sequence for pulsed nuclear magnetic resonance spectroscopy
12 p1806 A72-27125
Hydrated iron silicon fluoride internal motion pressure dependence examined by wide-line and NMR techniques, noting corrections of second moments for bulk paramagnetic effects
13 p1914 A72-30061
Varian HR-60 NMR spectrometer probe with Dewared insert for low temperature operation
15 p2240 A72-32435
Molecular complexes of methoxyindoles with 1,3,5-trinitrobenzene and tetracyanoethylene /Spectroscopy/association constants/NMR/.
17 p2512 A72-35649
Classical nonlinear electronic relaxation oscillators as EPR and NMR signal detectors, reconstructing resonance lines from absorption induced oscillator waveform changes
18 p2662 A72-36993
Electronic and nuclear magnetic resonances of the oxygen and hydrogen labile negative molecular ions.
20 p2956 A72-39189
Fourier transform C-13 nmr analysis of some free and potassium-ion complexed antibiotics.
20 p2898 A72-39399
A simple, low power, multiple pulse NMR spectrometer.
21 p3056 A72-41005
Investigation of the influence of cobalt on the redistribution of the atoms of the alloying elements in iron-base alloys by the NGR method
22 p3188 A72-42162
Structural characteristics of high resolution NMR spectra, noting interrelationships between line positions and intensities
23 p3290 A72-44171
Analysis of a nuclear magnetic resonance blood flowmeter for pulsatile flow.
24 p3401 A72-44574
- NUCLEAR PARTICLES**
NT ALPHA PARTICLES
NT ANTINEUTRONS
NT ANTIPARTICLES
NT ANTIPROTONS
NT BETA PARTICLES
NT BOSONS
NT MESONS
NT NUCLEONS
NT PHOTOELECTRONS
NT PHOTONS
NT PIONS
NT POSITRONS
Primary cosmic ray nuclear component, discussing Cosmos 163 measurements
01 p0119 A72-10603
Cosmic ray heavy nuclear component during solar activity minimum, using Cerenkov counters onboard Elektron satellites
07 p1060 A72-19872
Radiation damage effects in Li compensated Si nuclear particle detectors induced by irradiation with electrons, protons and fast neutrons
15 p2291 A72-31539
- Quantum yield variations of Nd ion activated glass as function of electron beam energy and intensity, noting nuclear particles effect on laser radiation
19 p2823 A72-38205
Weak decay, branching ratio and decay probability of strongly interacting particle event observed by Niu in cosmic nuclear jet shower
19 p2853 A72-38808
Nuclear particle fluxes and radioactive isotopes production rate distribution from cosmic rays data along orbits, calculating iron meteorite dimensions prior to atmosphere entry
22 p3220 A72-41919
- NUCLEAR PHYSICS**
NT FIELD THEORY [PHYSICS]
NT PLASMA PHYSICS
NT QUANTUM THEORY
NT REACTOR PHYSICS
Nuclear astrophysics review, discussing chemical elements and isotopes abundance and cosmic nucleosynthesis
03 p0437 A72-13842
Japanese cosmological studies covering evolutionary cosmology, astrophysics, relativity, nuclear physics and metagalactic phenomena
13 p2038 A72-29083
German book on vacuum technology covering theory, measurement techniques and applications in nuclear physics research facilities, electronic tubes, space environment simulation, mass transfer, etc
18 p2709 A72-36250
Experimental nuclear physics and theoretical solar structure and evolution explanations of disagreement between calculated and observed solar neutrino flux
18 p2722 A72-37007
- NUCLEAR POWER**
U NUCLEAR ENERGY
NUCLEAR POWER GENERATION
U NUCLEAR ELECTRIC POWER GENERATION
NUCLEAR POWER PLANTS
Permanent manned lunar stations electrical power systems, discussing nuclear energy, solar cells and electrochemical power cells
15 p2214 A72-31814
Probabilistic analysis of aircraft crash-caused structural damage to nuclear power plant, using Monte Carlo method and yield line theory for perforation and collapse modes
16 p2421 A72-33600
- NUCLEAR POWER REACTORS**
NT SPACE POWER REACTORS
NT SPACE POWER UNIT REACTORS
Gas-core reactor power transient analysis.
19 p2833 A72-37632
- NUCLEAR PROPELLED AIRCRAFT**
Nuclear energy for power and transportation, discussing ship, submarine, air cushion vehicle, aircraft and rocket propulsion applications
05 p0688 A72-15777
- NUCLEAR PROPULSION**
NT NUCLEAR ELECTRIC PROPULSION
Electrical and nuclear propulsion plasma containment problems, discussing simulation experiments and scaling devices feasibility
01 p0117 A72-10938
Mini-cavity gas core reactor concept for low thrust high impulse probe propulsion, using U 233 or 235 fuel
04 p0546 A72-14422
Transoceanic helium cooled thermal reactor powered air cushion freighter of gross weight 4500 metric tons, discussing design and performance characteristics
04 p0464 A72-14431
Controlled thermonuclear fusion for space propulsion, discussing magnetic-confinement and laser-plasma fusion engines
04 p0556 A72-14889
Nuclear energy for power and transportation, discussing ship, submarine, air cushion vehicle, aircraft and rocket propulsion applications
05 p0688 A72-15777
Current and future rocket and spacecraft propulsion systems based on chemical propellants, nuclear thermoelectric, electrostatic and electromagnetic power generators
05 p0705 A72-16743
Space technology developments during 1970s and 1980s, discussing solar system exploration, space shuttle systems, cost effectiveness, international cooperation, nuclear propulsion systems, etc
13 p2051 A72-28453
U.S. industry views on NASA plans for 1970s, emphasizing interplanetary nuclear propulsion, space transportation, shuttle costs and economics
14 p2175 A72-31139
Nonchemical space propulsion systems for lunar and planetary flights, discussing fission, fusion and electric rockets
15 p2297 A72-31810
Nuclear rocket propulsion program, discussing solid refractory core technology, Rover project and NERVA engine development and tests
15 p2273 A72-31811

Small power nuclear propulsion engines for Europa launching systems, discussing heat exchange reactor using hydrogen propellant 15 p2273 A72-31812

Thermonuclear fusion spacecraft propulsion systems operation principles, interplanetary orbit-to-orbit mission capabilities and environmental safeguard problems 17 p2598 A72-35953

Gas-core reactor power transient analysis. 19 p2833 A72-37632

Fission and fusion propulsion for deep space missions, discussing gas and colloid core reactors, controlled fusion, MHD and laser plasma systems 24 p3423 A72-45168

Development and testing of a radioisotope-fueled thruster for spacecraft propulsion. 24 p3434 A72-45178

Nuclear safety in nuclear power and propulsion devices for space. 24 p3424 A72-45180

On the utilization of thermonuclear propulsion for an upper stage of the Europa III launcher 24 p3424 A72-45227

NUCLEAR QUADRUPOLE RESONANCE

Frequency marker measurement of nuclear quadrupole resonance (NQR) signal in pulsed radio spectrometer compared with zero beat method 16 p2390 A72-33078

EPR transitions of quadrupole interaction of cubic imperfections with ground-vibronic-state degeneracy /Jahn-Teller effect/ 16 p2431 A72-33725

NUCLEAR RADIATION

NT GAMMA RAYS

NT NEUTRON BEAMS

NT POST-BLAST NUCLEAR RADIATION

NT SPALLATION

NT THERMAL NEUTRONS

Fiber reinforced plastic composite seals for liquid hydrogen and nuclear radiation environments, stressing polyquinoxaline fitness 01 p0075 A72-10773

Nuclear pumped laser, noting electrically excited carbon dioxide laser experiment and high temperature multiple ionized plasma concepts 01 p0082 A72-11329

Nuclear radiation enhancement of carbon dioxide laser performance, discussing low pressure CW and high pressure pulsed discharges 01 p0082 A72-11330

Nuclear and space radiation effects - Conference, University of New Hampshire, Durham, July 1971. 03 p0402 A72-14076

Nuclear radiation interference and damage effects in galactic and solar cosmic ray measurements during charged particle experiments by deep space missions 03 p0438 A72-14085

Solar flare, galactic and magnetically trapped /Van Allen/ nuclear particle radiation environments calculation for three outer planet Grand Tour missions 03 p0413 A72-14095

Nuclear radiation effects on ceramic cemented strain gages and polyimide encapsulated epoxy bonded gages 08 p1164 A72-20922

Metal matrix composites, testing neutron irradiation effects on mechanical properties for nuclear application feasibility 11 p1654 A72-25483

Semiconductor devices application to gamma ray, X ray and nuclear radiations detection and analysis 15 p2235 A72-31644

Needle type solid state detectors for in vivo measurement of tracer activity. 18 p2655 A72-37194

NUCLEAR RADIATION SPECTROSCOPY

Multielement neutron activation analysis of geological and lunar material using chemical group separations and high resolution gamma spectrometry. 20 p2899 A72-39830

Coincidence counting applied to the activation analysis of meteorites and rocks. 20 p2900 A72-39841

NT THERMONUCLEAR REACTIONS

Book on nuclear reactions in stellar surfaces and relations with stellar evolution covering high energy L elements formation, Li-Be observations and thermonuclear and spallative theories 01 p0122 A72-10002

Carbon dioxide laser pumping with nuclear reactions, indicating improved laser performance due to additional ionization by energetic charged particles 01 p0082 A72-11331

Primary cosmic ray interaction with tissues, emphasizing biological effects and nuclear reactions induced radioactivity in astronaut body 03 p0313 A72-12911

Dispersion energy relation for ultrahigh energy nuclear reactions in cosmic ray emulsion 03 p0410 A72-13148

Nuclear reactions in anomalous element abundances production for peculiar A stars, considering surface diffusion and surface and internal nuclear processes 03 p0437 A72-13872

X ray and gamma astronomy, discussing satellite-borne experiments for electromagnetic and nuclear reaction rates and antimatter existence in cosmic radiation 04 p0582 A72-15692

Type R Corona Borealis variable stars luminosity variations attributed to formation of carbon layer from He nuclear transformation process at stellar core-envelope boundary 08 p1231 A72-21086

Nuclear reaction-produced high energy ion beams for gas laser pumping and output enhancement 10 p1489 A72-23948

Algorithmic calculation for composition changes due to nuclear reactions and convective mixing during stellar evolution 15 p2314 A72-32374

Li, Be and B nuclei production via nuclear spallation reactions generated by Galactic cosmic ray bombardment of interstellar gas 16 p2448 A72-33737

Electron and nuclear components and transformations of matter under extreme conditions of pressure and temperature exemplified in stellar /pulsar/ evolution 18 p2725 A72-36520

Effects of nuclear reactions on the stability of degenerate stars. 19 p2864 A72-38100

Kinetic equations for ultradense matter neutronization, noting stellar configuration of given mass with variable volume 21 p3086 A72-40096

Turbulent plasma 'caldrons' in galactic nuclei 21 p3114 A72-41772

The threshold of disintegration of nuclei in a degenerate electron-neutron gas 22 p3209 A72-42963

Nuclear reactions in a degenerate electron-nuclear plasma 22 p3209 A72-42964

General characteristics of proton-nucleon and coherent interactions at an energy of 67 GeV 23 p3317 A72-44415

NUCLEAR REACTOR CONTROL

Controlled thermonuclear fusion for space propulsion, discussing magnetic-confinement and laser-plasma fusion engines 04 p0556 A72-14889

Singular controls calculation based on Poisson brackets, applying to nuclear reactor 06 p0849 A72-18300

Singular controls calculation based on Poisson brackets, applying to nuclear reactor 13 p1937 A72-29440

Dynamics and control of an incore-thermionic-reactor in the power region. 18 p2644 A72-36174

Feedback synthesis of an incore thermionic reactor control system for space. 18 p2645 A72-36186

Control of the incore thermionic reactor /ITR/ by movable reflector elements. 18 p2645 A72-36189

NUCLEAR REACTOR MATERIALS

NT NUCLEAR POWER REACTORS

NT SPACE POWER REACTORS

NT THERMAL REACTORS

NT WATER COOLED REACTORS

Acoustic emission tests of nuclear pressure vessels and piping, detecting weld slag, porosity, fatigue microcracking and stress corrosion cracking 01 p0048 A72-10802

Acoustic emission characteristics from nuclear reactor irradiated steels during tensile and wedge opening load tests 01 p0068 A72-10803

Energy release and accelerating inner stream effects on flow field near fuel injection in gas core reactor, basing Euler equations energy diffusion term on radial radiative transport 01 p0100 A72-11351

Minicavity reactor rocket engine combining high specific impulse of central gaseous fueled cavity and low weight NERVA type fuel elements in driver region external to moderator-reflector zone 01 p0100 A72-11358

Split core heat pipe nuclear reactor dynamics, describing shutdown mechanisms, ramp reactivity inputs fuel melting temperature and wall heat flux 04 p0546 A72-14421

Nuclear Brayton space power systems, discussing efficiency, isotope decay and reactor design 04 p0546 A72-14423

Water radiolysis within sealed Al capsules in nuclear reactor, calculating pressure rise due to water decomposition via predictive models derived by multiple regression analysis 04 p0546 A72-14429

Power supply and converters for satellite and spacecraft, discussing fuel cells, radioisotopes, nuclear reactors, etc 05 p0615 A72-16745

Fluid discharge rate relationship to space fraction for fluidized layers in reactor 13 p1943 A72-29786

Finite element method for nonlinear analysis of nuclear reactor structures, noting elasticity, viscoelasticity and elastoplasticity problems [SMRT PAPER M 2/2] 14 p2166 A72-30724

Magnetic field profile optimization for beta-limitation in minimum-B mirror confined plasma in nuclear reactor 16 p2432 A72-32805

Fusion reactor RF heating below 100 MHz, discussing coil structures and arcing and cooling problems in main fusion region 16 p2433 A72-32813

Completely modular thermionic reactor ion propulsion system /trips/. 18 p2721 A72-36177

Critical experiment ITR - Methods of nuclear design calculation and theoretical interpretation of experimental data. 18 p2709 A72-36185

Ionization of mercury vapor and cesium vapor in a nuclear reactor. 18 p2713 A72-36208

A small, 1400 K, reactor for Brayton space power systems. 19 p2833 A72-37635

NUCLEAR RELAXATION

Photoabsorption and simple and multiple excitations of rare gases internal atomic layers under X ray action, relating electron transition and relaxed core energies 09 p1357 A72-22836

Nuclear and dipole relaxation at polymer-polymer interfaces 23 p3307 A72-43931

NUCLEAR RESEARCH AND TEST REACTORS

NT HIGH TEMPERATURE NUCLEAR REACTORS

NUCLEAR ROCKET ENGINES

Thermonuclear microbomb ignition with intense relativistic electron beams for rocket propulsion, discussing achievable exhaust velocities and system optimization 01 p0117 A72-11222

High temperature gaseous U fission plasma core reactor engine concepts for space propulsion 01 p0099 A72-11327

Nuclear gas core and fusion rocket engines performance potential for various space missions, comparing capabilities in terms of payload ratio 01 p0099 A72-11328

Radiant heat attenuation of W seeded hydrogen aerosol at high pressure and temperature for gas core nuclear rocket propellant application 01 p0112 A72-11340

Shock tube technique for opacity measurement at high pressures in seeded hydrogen for gas core nuclear rockets 01 p0099 A72-11342

Simulation of nuclear light bulb engine propellant radiative heating, using argon seeded with micronized carbon particles and 500 kw dc arc as radiant energy source 01 p0099 A72-11344

Nuclear light bulb engine concept, detailing radiant heat transfer calculations in fuel and buffer gas regions 01 p0099 A72-11345

- Induction plasma heating simulation of open cycle gas core nuclear rocket engine, describing plasma forming material feed, permeable walls and propellant seeding
01 p0112 A72-11346
- Design of 6000 Mw open cycle gas core nuclear rocket engine with hydrogen as propellant, considering critical U 235 mass, major reactor components and specific impulse
01 p0099 A72-11347
- Open cycle gas core nuclear rocket engine, determining scaling laws for buoyancy force effect on fuel containment at various flow parameters
01 p0099 A72-11348
- Open cycle gas core nuclear rocket engine flow studies to obtain maximum system reactivity at low uranium/coolant gas loss ratio
01 p0100 A72-11349
- Injection geometry and inlet flow conditions application to open cycle gas nuclear reactor engine, evaluating fuel containment from cylindrical and spherical chambers experiments
01 p0100 A72-11350
- Space crew radiation dosage calculation from Mars mission high impulse gas core nuclear rocket engine exhaust plume fission fragments
01 p0022 A72-11353
- Nuclear light bulb rocket engine design and performance, presenting start-up, steady state operation, shutdown, dynamic response and control
01 p0100 A72-11354
- Thermal environment and fuel region simulation for nuclear light bulb engine, using rf induction heater and uranium and tungsten hexafluorides injection
01 p0113 A72-11355
- Transparent fused silica wall irradiation induced optical absorption and heat deposition in nuclear light bulb engine
01 p0103 A72-11356
- Minicavity reactor rocket engine combining high specific impulse of central gaseous fueled cavity and low weight NERVA type fuel elements in driver region external to moderator-reflector zone
01 p0100 A72-11358
- Flow characteristics of colloid core reactor rocket engine, studying two component vortex flows with solid to gas mass density ratios over 100
[AD-735527] 01 p0100 A72-11359
- Nozzle and cavity wall cooling limitations on uranium plasma nuclear rocket specific impulse, discussing wall heat flux and transpirational cooling by propellant flow
03 p0387 A72-14383
- Nuclear rocket time optimal start-up using distributed parameter system model with linear control and nonlinear state
04 p0547 A72-14672
- Controlled thermonuclear fusion for space propulsion, discussing magnetic-confinement and laser-plasma fusion engines
04 p0556 A72-14889
- Nuclear energy for power and transportation, discussing ship, submarine, air cushion vehicle, aircraft and rocket propulsion applications
05 p0688 A72-15777
- Gas core nuclear rocket reactor program for 60 day Mars, shuttle and Skylab applications
05 p0688 A72-15778
- Minimum time thrust start-up of nuclear rocket as optimal control problem with integrodifferential constraints, using Pontryagin maximum principle and calculus of variations
11 p1685 A72-25870
- Nuclear rocket for space tug, comparing performance and operational costs with chemical propulsion
13 p2000 A72-28926
- Two phase propellant flow rate through simulated rotating liquid core nuclear rocket fuel bed under high centrifugal acceleration
14 p2129 A72-30923
- Small power nuclear propulsion engines for Europa launching systems, discussing heat exchange reactor using hydrogen propellant
15 p2273 A72-31812
- Mission operations for unmanned nuclear electric propulsion outer planet exploration with a thermionic reactor spacecraft
17 p2606 A72-34578
- Thermionic reactor system for auxiliary power and electric propulsion
17 p2494 A72-34579
- Thermionic reactors design based on flashlight and external fuel concepts for nuclear electric propulsion
17 p2494 A72-34580
- Constant voltage and constant emitter-temperature control schemes dynamics in thermionic reactor, showing closed loop responses to load changes, converter failures and reactivity perturbations
17 p2494 A72-34581
- Thermionic reactor power conditioner design for nuclear electric propulsion
17 p2495 A72-34582
- Design features, fabrication technology and in-pile testing of thermionic reactor fuel elements
17 p2495 A72-34584
- Sizing an external-fueled in-core thermionic reactor
17 p2495 A72-34588
- Development of the insulating multilayer collector system for ITR /Status report/
17 p2559 A72-34594
- Metal working and testing of nuclear rocket engine components with Mo as structural material and uranium dioxide as fuel, discussing Mo-W interdiffusion
17 p2559 A72-34617
- Investigations concerning metal-hydride technology and hydrogen transport in the incore thermionic reactor /ITR/-core.
18 p2699 A72-36157
- Thermionic reactor electric propulsion system requirements.
18 p2720 A72-36167
- Auxiliary power and electric propulsion applications of thermionic reactor power systems in manned and unmanned space missions
18 p2644 A72-36168
- Controlled dc to dc converter for a space-qualified thermionic-reactor.
18 p2644 A72-36170
- High-voltage thermionic reactor using double-sheath fuel elements.
18 p2644 A72-36171
- Electronic temperature-flattening of thermionic reactors.
18 p2644 A72-36172
- Aspects on the modular lay-out of incore thermionic reactors.
18 p2645 A72-36175
- Significance of the results of the ITR critical experiments for the calculation of an incore-thermionic reactor.
18 p2645 A72-36180
- A comparison of thermionic reactor designs employing a common thermionic fuel element.
18 p2645 A72-36183
- Feedback synthesis of an incore thermionic reactor control system for space.
18 p2645 A72-36186
- Control of the incore thermionic reactor /ITR/ by movable reflector elements.
18 p2645 A72-36189
- Developmental status of thermionic materials.
19 p2833 A72-38575
- Nuclear rocket reactor and radioisotope power technology for propulsion and electricity requirements in spacecraft and space stations
24 p3423 A72-45166
- Thermionic reactor systems for space applications.
24 p3423 A72-45177
- NUCLEAR SCATTERING**
NT NEUTRON SCATTERING
NT RESONANCE SCATTERING
Analysis of pion-helium scattering for the pion charge form factor.
19 p2837 A72-37922
- Possibilities of determining complex form factors from experiments with polarized particles
21 p3086 A72-40100
- NUCLEAR SHIELDING**
U RADIATION SHIELDING
NUCLEAR SPIN
Proton and fluorine nuclear magnetic spin-lattice relaxations due to internal rotations in magnesium fluorosilicate hexahydrate
04 p0564 A72-15636
- NUCLEAR SUBMARINES**
U SUBMARINES
NUCLEAR-ELECTRIC MOMENTS
U ELECTRIC MOMENTS
NUCLEATE BOILING
NT LEIDENFROST PHENOMENON
Dry areas occurrence on heating surface in pool boiling near burnout heat flux, discussing nucleate and film boiling stability and hysteresis
07 p1099 A72-19621
- Nucleate pool boiling three component heat flux theory, taking into account latent heat transport, molecular heat conduction and turbulent convection
11 p1746 A72-26539
- High Jakob numbers effect on bubble growth rates during nucleate boiling, taking into account liquid inertia
14 p2172 A72-31053
- Subcooling and acceleration effects on nucleate boiling heat flux, comparing heat transfer prediction models with experimental measurements
16 p2477 A72-33433
- Convective heat exchange of metastable liquid during suspension of boiling
19 p2881 A72-38037
- NUCLEATION**
NT CLOUD SEEDING
Transmission electron microscopic investigation of heterogeneous nucleation of Al-Ag alloys metastable gamma prime phase, noting association with four dislocation types
01 p0083 A72-10209
- Short range order and nucleation of long range order in Ni-rich Ni-Nb alloys, observing electrical resistivity changes dependence on solute concentration
03 p0379 A72-14338
- Electron microscopic examination of molybdenum alloy thin plates aging at 700 C observing nucleation and precipitated phase
05 p0673 A72-16147
- Supercooled water drops freezing by contact nucleation with AgI and silicate particles, determining effective temperature in updraft wind tunnel experiments
09 p1345 A72-22445
- Nucleation mechanism for weld solidification in electron beam and tungsten-inert gas welding processes
09 p1332 A72-23641
- Binary Al alloys intermetallic phases effects on microcracks nucleation and propagation at 300 C in uniaxial tension, considering alloying elements influence on mechanical properties
14 p2124 A72-31036
- Thermal flux transmitted from hot surface to boiling fluid near nucleation site measured simultaneously with bubble growth rate
14 p2172 A72-31056
- Zinc oxide effect on alumina dispersion, energy of formation, nucleation and particle size reduction, calculating critical nucleus radii
16 p2476 A72-33255
- Luminous intensity, visibility duration, condensation nuclei and mass balance of noctilucent clouds
18 p2686 A72-36504
- Nucleation of new grains in recrystallization of cold-worked metals.
20 p2930 A72-39995
- Thin film deposition of carbon on polypropylene, noting morphological templates role in enhancement of polymer nucleation during recrystallization
23 p3305 A72-43269
- Electron-microscope study on the recrystallization in technically pure aluminum.
24 p3412 A72-44719
- NUCLEI**
Cloud and Aitken nuclei vertical distribution upwind and downwind of urban pollution sources from simultaneous airborne observations
09 p1345 A72-22443
- Reactions of aniline with isosamyl nitrite and phenyldiazonium borofluoride with caustic potash, investigating kinetics of chemical polarization of products nuclei
09 p1275 A72-22497
- Collapse of massless nonrotating gas particle nonuniform spheroidal shell contracting around gravitating massive point nucleus, interpreting galactic evolution
24 p3438 A72-44844
- NUCLEI [NUCLEAR PHYSICS]**
NT ALPHA PARTICLES
NT DEUTERONS
NT HEAVY NUCLEI
Cosmic Li, Be and B nuclei charge and isotopic composition measured by particle telescopes, finding L/M ratio
01 p0121 A72-11120
- Heavier-than-helium cosmic ray nuclei composition inferring galactic confinement of particles, path lengths and transit times
03 p0409 A72-13137
- Bevatron nuclear fragmentation of N 14 nuclei, discussing isotopic fragments identification
03 p0391 A72-13692
- Interstellar propagation of 2-8 Z galactic cosmic ray nuclei at 10-1000 MeV/nucleon, analyzing differential kinetic energy spectra
04 p0567 A72-15323
- Nuclear charge composition and energy spectra measurement for hydrogen, helium and medium nuclei in 12 April 1969 solar particle event
04 p0567 A72-15325
- High energy cosmic ray pions and nucleons interactions with atomic nuclei, using ionization calorimeter and spark chambers system
06 p0869 A72-17267
- Adiabatic-nuclei theory application to diatomic molecules excitation by electron impact, approximating fixed nuclei phase shifts dependence on inter-nuclear separation
06 p0852 A72-17826
- Perturbation theory oscillatory wave function for second order correction to oxygen 16 nucleus bonding energy
08 p1211 A72-21067
- Angular distributions of proton polarization during elastic scattering by V, Cr, Ni and Co nuclei in high energy region
08 p1211 A72-21093
- Inclusive isotope spectra of secondary nuclei produced by Bevatron heavy ion fragmentation in carbon and polyethylene targets, noting partial differential cross sections
10 p1517 A72-25144

- Cosmic ray proton and He nuclei differential energy spectra measurements by balloon-borne ionization spectrometer 11 p1712 A72-25881
- Cosmic ray nuclei charge and isotope composition measurement, discussing data for Li, Be, B and 15-30Z nuclei 16 p2447 A72-33727
- Cosmic ray nuclei isotope identification with cryogenic magnet plus plastic scintillators to measure charge composition and rigidity 16 p2447 A72-33732
- Neutron-rich nuclei in a Fermi gas 19 p2837 A72-38060
- Spatial spark jitter measurements of highly charged nuclei for optical spark chambers. 21 p3055 A72-41003
- Investigation of hadron interactions with atomic nuclei at energies greater than 100 GeV 23 p3329 A72-44404
- Multiplicity of particles generated in inelastic interactions of nucleons with LiH nuclei at energies from 150 to 550 GeV 23 p3329 A72-44405
- Multiple collisions and an optical model of the inelastic interaction between cosmic particles and nuclei 23 p3330 A72-44413

NUCLEIC ACIDS

NT RIBONUCLEIC ACIDS

- Site binding model of nucleic acid-protein interactions for chemical evolution and genetic code studies 02 p0159 A72-11765
- Nucleic acid, protein and cell primordial sequence, ribosomes and genetic code for life origin, discussing experiments on homopolyamine acids reaction with mononucleotides 04 p0468 A72-14775
- Proteobionts formation by random aggregation and reproduction from proteins and nucleic acids macromolecules 04 p0469 A72-14782
- Protein evolution, discussing biological group amino and nucleic acid structure variations from phylogenetic tree of cytochrome c data 04 p0470 A72-14791
- Comet collisions in planetary nebulae as source of organic compounds in universe in preplanetary era, noting nucleic acid bases in carbonaceous meteorites 04 p0471 A72-14802
- Genetic organization emergence, considering pretranslational evolution in nontranslational protein synthesis, nucleic acid evolution and gene origin 08 p1119 A72-22010
- Abiogenic formation of nucleic acid bases and nucleosides in photochemically synthesized self sustaining coacervates 12 p1761 A72-27657
- Role of the synthesis of nucleic acids and proteins in the adaptation of the organism to altitude hypoxia. 17 p2502 A72-34990
- Nuclein acid contents in cholinergic and adrenergic spinal cord neurons and in their glial satellite-cells during hypoxic hypoxia and a post-hypoxia period 19 p2756 A72-37742

NUCLOGENESIS

- Amino acid code comparisons of polypeptide chains of globins due to mutations during vertebrate evolution from ancestral gene 02 p0159 A72-11764
- Site binding model of nucleic acid-protein interactions for chemical evolution and genetic code studies 02 p0159 A72-11765
- Nucleotides condensation in aqueous system in prebiotic conditions, investigating effects of imidazole, cyanamide and polymorphine 04 p0483 A72-14766
- DNA primary structure variability relation to origin and evolution, discussing taxon scale in existing animal, plant and microorganism systems 04 p0470 A72-14792

NUCLEON-NUCLEON INTERACTIONS

- Multiple meson production in 250 GeV nucleon-nucleon collisions in LiH targets, noting 40 per cent formation of heavy meson cluster fireballs 06 p0868 A72-17259
- K-neutral pion inelasticity factor measurement for nucleon interactions in carbon corresponding to primary neutron energy transferred to pions 06 p0869 A72-17269

NUCLEON-NUCLEON SCATTERING

- Approximation for Monte Carlo method modeling of pion-nucleon and nucleon-nucleon inelastic collisions at high energies 23 p3317 A72-44414

NUCLEONICS

- Observability of hyperfine structure and Lamb, nuclear-volume shifts in 1sn1-1sn' transitions of helium-like ions. 19 p2837 A72-37544

NUCLEONS

- High energy nucleon tissue doses calculation based on averaged characteristics of nuclear interactions [CERN-71-16] 02 p0162 A72-12067

Nuclear-electron cascades longitudinal evolution calculation in ionization calorimeter for primary nucleons and pions, using Monte Carlo method 06 p0811 A72-17260

Inelasticity factor dependence on particle energy spectra to explain nucleon flux calculations and Proton satellite data, considering scattering cross sections 06 p0869 A72-17264

High energy cosmic ray pions and nucleons interactions with atomic nuclei, using ionization calorimeter and spark chambers system 06 p0869 A72-17267

Secondary particles in pion-nucleon and coherent interactions, measuring momentum from multiple Coulomb scattering 06 p0870 A72-17272

Nuclear photoemulsions under bombardment by pion beam of 60 GeV/c momentum, investigating pion-nucleon interactions involving recoil protons 06 p0851 A72-17273

Pion-nucleon high energy interactions, determining inelasticity coefficient distribution 06 p0851 A72-17274

Primary cosmic radiation nucleonic component composition comparison with elements natural abundance, discussing mechanism of matter injection into cosmic ray accelerator 07 p1059 A72-19586

Extensive atmospheric showers and high energy transfer from interacting nucleons to electron photon cascades 07 p1060 A72-19867

Three dimensional cosmic ray anisotropy and density distribution at earth orbit and in interplanetary space with allowance for primary particle and nucleon energy spectrum 07 p1065 A72-20645

Nucleon and electromagnetic component generation, energy spectrum and diffusion during solar flares 07 p1066 A72-20651

High energy hadrons time structure in extensive air showers, considering production of nucleon-antinucleon pairs in particle interactions 07 p1067 A72-20687

Quantum gravitation theory and Mercury perihelion motion, calculating three body potentials from treatment of celestial bodies as nucleon assemblies 07 p1084 A72-20690

Pion generation during collective interactions between nucleons of heavy cosmic ray nuclei, using Proton 4 satellite data 08 p1228 A72-22179

Scaling of energy spectrum of particles emitted in high energy nucleon-nucleon collisions 10 p1529 A72-24527

The absorption length for solar particles in the earth's atmosphere - Solar proton event November 18, 1968. 17 p2602 A72-35760

Pion generation during collective interactions between nucleons in heavy cosmic ray nuclei, using Proton 4 satellite data 18 p2721 A72-36235

Pion exchange and the cosmic-ray nucleon cascade. 19 p2851 A72-37923

The threshold of disintegration of nuclei in a degenerate electron-neutron gas 22 p3209 A72-42963

High altitude cosmic ray pion and nucleon interaction characteristics at high energies, using spark chamber, Cerenkov absorption spectrometer and ionization calorimeter measurements 23 p3329 A72-44402

Multiplicity of particles generated in inelastic interactions of nucleons with LiH nuclei at energies from 150 to 550 GeV 23 p3329 A72-44405

Collective interactions of the nucleons of heavy nuclei in high-energy cosmic rays 23 p3330 A72-44408

Ionization calorimeter for neutral pion production investigation in high energy hadrons interaction, noting energy transfer identity for nucleon and pion interactions 23 p3330 A72-44409

High energy inelastic collisions of pions and protons with nuclear emulsion nucleons, noting pion pulse spectra 23 p3317 A72-44417

Low-energy nucleons in extensive air showers 23 p3331 A72-44424

Energy dependence of muon-nucleon inelastic interaction, calculating photonuclear cross section for high energy interactions in iron 23 p3331 A72-44429

Characteristics of pion and nucleon interaction with carbon and aluminum nuclei over the energy range from 30 to 300 GeV 23 p3331 A72-44435

High energy nucleon inelastic collision characteristics dependence on secondary particle energy and meson velocity, using Wilson chamber measurement 23 p3291 A72-44445

Primary cosmic ray nucleon spectrum from sea-level muon spectrum and scaling hypothesis parameters. 23 p3332 A72-44458

NUCLEOSIDES

NT ADENINES
NT ADENOSINE DIPHOSPHATE [ADP]
NT ADENOSINE TRIPHOSPHATE [ATP]
NT ADENOSINES

Inorganic phosphates-nucleoside hypohydrous thermal reaction mechanism, discussing thermal polymerization of orthophosphates for phosphorylation and condensing agents in primordial synthesis 04 p0483 A72-14770

Abiogenic formation of nucleic acid bases and nucleosides in photochemically synthesized self sustaining coacervates 12 p1761 A72-27657

Studies in prebiotic synthesis. VII - Solid-state synthesis of purine nucleosides. 23 p3262 A72-43567

NUCLEOSYNTHESIS

Bremsstrahlung from cylindrical beta sources. 21 p3088 A72-41383

NULL HYPOTHESIS

Cyclic phenomena periodicity by expected mean square deviation statistical analysis of observational data samples, using null hypothesis and unequally spaced sample intervals 04 p0574 A72-14908

NULL REFERENCE GLIDE PATH

U GLIDE PATHS

NULL ZONES

Null electromagnetic field propagation in general relativity, applying to Stokes parameters definitions for monochromatic light 02 p0259 A72-12178

Adiabatic charged particle orbits in magnetic null sheet with transverse electric and added normal magnetic fields 03 p0348 A72-13512

Phased antenna array blind spot detection and elimination, describing aperture match with inductive irises 04 p0486 A72-14493

Global controllability of nonlinear differential systems during linear system perturbation, discussing controllable and uncontrollable parts splitting and null domain nature 11 p1608 A72-25323

Exact solutions of the Einstein-Maxwell equations for an accelerated charge. 20 p2955 A72-40008

Feautrier numerical solutions to transfer equation of polarized continuum radiation from sunspot in chromosome 01 p0101 A72-10096

Mathematical analysis of separation standards and aircraft navigational collision risk for parallel tracks in radar monitored systems 01 p0096 A72-10178

Weather map numerical analysis for Northern Hemisphere, describing program with flow field for geopotential value checking 01 p0094 A72-10196

Metal crystals dislocations movements and interactions with dislocation dipole under applied cyclic stresses for various configurations and starting conditions, using numerical methods 01 p0113 A72-10208

Modified implicit continuous fluid Eulerian technique for numerical solution of time dependent fluid flow for Mach numbers from zero to infinity 01 p0049 A72-10226

Fluid flow numerical solution by contour dynamics methodology with flow features resolution advantage. 01 p0049 A72-10227

Simplified Marker and Cell method extension for numerical solution of almost three dimensional incompressible flow and internal obstacle treatment 01 p0049 A72-10228

Alternating directional implicit numerical solution for three dimensional steady low density hypersonic flow over finite width flat plate [AD-736572] 01 p0049 A72-10230

Large scale structural systems dynamic response analysis, discussing numerical techniques with emphasis on computer codes usage [SAE PAPER 710780] 01 p0137 A72-10272

Correspondence principle application to numerical solution for plane boundary value problem of linear viscoelasticity theory based on Kelvin point force solution to field equations 01 p0138 A72-10512

Numerical analysis of radio echoes decay rate from randomly ionized meteor trails 01 p0130 A72-10913

Step-by-step algorithmic numerical solution for nonlinear Volterra integro-differential equation, considering convergence 01 p0093 A72-11105

Numerical method for wave propagation and dynamic stresses in viscoelastic cylinders under internal and external loads 01 p0144 A72-11375

Survey and bibliography of extrapolation processes in numerical analysis based on polynomial or rational functions 02 p0252 A72-11546

Incompressible nonself similar turbulent and transitional flows numerical analysis in wakes, jets and boundary layers, using turbulent viscosity equations 02 p0202 A72-11587

Numerical analysis of nonequilibrium gas mixture flow through nozzle 02 p0149 A72-11589

Associative array digital processors application to numerical solution of partial differential equations, illustrating methodology on weather forecasting equations 02 p0186 A72-11658

Monochromatic electromagnetic field diffraction problems in homogeneous medium, presenting computer aided numerical analysis 02 p0171 A72-11690

Hollow waveguide problem considering numerical solution with scalar field approximation, Green function and conformal transformation 02 p0191 A72-11692

Stiffness matrix method application to finite deformation theory, noting convergence through use of iterative interpolation in numerical calculations 02 p0298 A72-12667

Stress-strain state determination for plane orthotropic bodies by optical polarization method, discussing numerical methods for stress and strain tensor components 03 p0445 A72-13580

Current lines and temperature fields in square cavity with one movable wall and viscous flow and heat transfer, solving equations numerically 03 p0456 A72-13629

Rigid/plastic media plane and axially symmetric deformations determination, using principal and slip line numerical analysis methods 03 p0446 A72-13704

Plastic torsion of prismatic and anisotropic rods, emphasizing inhomogeneity problems numerical solution 03 p0447 A72-13853

Hydrogen diffusivity in Fe with cavities at room temperature calculated by mathematical model and numerical methods 03 p0378 A72-14256

Numerical method and computerized design for feedback controller pulse transfer function in overall error criterion minimization, comparing results with sampled error method 03 p0329 A72-14355

Human body kinematics numerical analysis, obtaining space-time resolution by photogrammetric restitution and electronic data processing of photographic recordings 04 p0478 A72-14710

Shooting and imbedding methods for theoretical analysis and approximate numerical solution of two-point boundary value problems involving n-vector-valued functions [AD-743615] 04 p0539 A72-15043

Numerical fluctuations minimization during luminosity functions and density evolution derivations from data subject to observational selection, applying to 3CR quasars 04 p0577 A72-15284

Buckling of radially constrained imperfect circular ring loaded within perfect rigid circular boundary, obtaining numerical solution by discrete treatment 04 p0591 A72-15286

Spacecraft antenna radiation pattern numerical analysis using combined electric and magnetic integral equations 04 p0500 A72-15407

Numerical instability of gravitational n-body problem considering differences between computed systems and exact solutions to differential equations 04 p0581 A72-15629

Navier-Stokes equations numerical solution by computerized simulation for viscous channel flow with diaphragm orifice reducing cross section 04 p0513 A72-15644

Wilf-type quadrature formulas with preassigned nodes, featuring existence of error bound without derivatives 05 p0632 A72-15816

Approximate numerical method for calculating flow profiles in arteries from local pressure measurements, taking into account Navier-Stokes equations nonlinear terms [ASME PAPER 71-WA/BHF-3] 05 p0621 A72-15948

Numerical method for cylindrical microwave cavities calibration for plasma diagnostics, noting computer programs applicability for arbitrary electron density radial distributions 05 p0662 A72-16418

Higher order nonlinear autonomous oscillation system limit cycle and stability determination by numerical solution based on Andronov point transformation and Liapunov theory 06 p0838 A72-17377

Moderate Hartmann number MHD duct flow with applied transverse magnetic field, using numerical methods 06 p0859 A72-17619

Soviet book on qualitative methods in celestial mechanics covering differential equations of motion averaging schemes, Newton type convergence method, three body problems, etc 06 p0879 A72-17821

Kalman and linear numerical filtering, discussing data processing from wind tunnel and rocket flight tests 06 p0774 A72-17847

Waveguide integral equation numerical solution by moment method, suggesting algorithm for detecting and alleviating relative convergence behavior [AD-745595] 06 p0775 A72-18368

Beams and square plates nonlinear vibration response to random concentrated driving force solved numerically on digital computer 06 p0901 A72-18718

Computer simulated data analysis procedure for improved resolution of optical instrument by integral equation numerical solution 06 p0840 A72-18738

Coefficient matrix for estimation of numerical solution error bounds for finite element models 07 p1025 A72-18786

Numerical analysis of computing velocity distribution in vortex row cascade profiles by method of singularities 07 p0965 A72-18787

Round-off error analysis in numerical solutions of finite element equations in dynamic models 07 p1025 A72-18796

Hf diffusion type chemical laser fluid dynamic and optical properties, discussing computerized numerical analysis [AIAA PAPER 72-146] 07 p1001 A72-19063

Numerical solution of equations for asteroidal mass distribution under collisional fragmentation 07 p1071 A72-19180

Feasible solutions to automatic control problems satisfying multiple state and control variable inequality constraints, discussing algorithmic numerical implementation 07 p0959 A72-19281

Toeplitz matrix in numerical solution of integral equation for cylindrical antenna and array, presenting rapid inversion algorithm by exploiting symmetry properties [AD-743577] 07 p0957 A72-19795

Heat transfer steady state and transient response problems nodal formulation and numerical solution on digital computer 07 p1101 A72-19918

Navier-Stokes equation numerical solution methods, expressing boundary conditions by separate equations for vorticity and stream function 07 p0970 A72-20077

Transonic flow past wing airfoils, obtaining numerical solution by fitting mixed initial boundary conditions 07 p0909 A72-20079

Numerical determination of particle number and mass flux density in monatomic rarefied gas flow through circular orifice at finite pressure ratio 07 p0972 A72-20107

Numerical analysis of passing screw dislocation arrays under stress for computerized work hardening model 07 p1097 A72-20556

Computerized numerical nodal analysis of heat transfer away from bridgewire of electroexplosive device to meet all- and no-fire requirements 08 p1219 A72-20753

Digital computer numerical procedure to solve dynamo theory MHD equations for earth nucleus, using combination of Fourier and finite difference methods for integration 08 p1155 A72-20810

High energy electron beam interaction with dense plasma, investigating unstable waves growth by numerical methods 08 p1213 A72-21259

Numerical solution of disintegration and surface stability of gas bubbles under nonspherical free oscillation 08 p1149 A72-21295

Numerical analysis of capture area ratio effect on shock wave propagation from free stream into moving flowing duct 08 p1150 A72-21619

German monograph on optimum principle for numerical representation of surfaces, discussing association with elasticity theory extremal requirements 09 p1340 A72-22319

Axisymmetric MHD equilibria with elliptical cross sections and flat current profile, obtaining criterion for stability to localized modes by numerical computation 09 p1361 A72-23047

Spatial filtering techniques and numerical classification methods for pattern recognition in automated photointerpretation 09 p1312 A72-23305

Numerical solution of turbulent recirculating flow, using energy equation to estimate eddy viscosity distribution

10 p1464 A72-23869

Metal creep under multiaxial stress states, proposing technique for numerical stress analysis data collection

[SMRT PAPER L 1/3] 10 p1556 A72-24395

Structural design systematology of statics and dynamics numerical approximate procedures based on variational principles and differential equations

[SMRT PAPER M 7/4] 10 p1505 A72-24397

Numerical solution of nonlinear integrodifferential equation governing finite amplitude wave propagation on concentrated vortices

10 p1468 A72-24419

Stiffened panels initial buckling under longitudinal compression, presenting results obtained by numerical methods

10 p1558 A72-24843

Numerical solution of two massive rigid bodies impact with variable slipping direction using Routh momentum change theorem

11 p1735 A72-25769

Numerical stability in linear algebraic equations, considering mapping from input data to desired output information

11 p1677 A72-25861

Numerical calculation of temperature distribution and tempering depth for inductive hardening process with automatic material feed, taking into account temperature dependent material properties

11 p1639 A72-25898

Numerical analysis applications - Conference, University of Dundee, Scotland, March 1971

11 p1679 A72-26953

Integral equation numerical solution applications to rectangular solid capacitance calculation and mixed boundary value problems

11 p1679 A72-26954

Inverse eigenvalue problem numerical solution for matrices and difference and differential equations, obtaining algorithms for parameters estimation

11 p1679 A72-26955

Recursive algorithm for numerical solution of Sturm-Liouville problem with periodic boundary conditions

11 p1679 A72-26958

Representational method for evolution type partial differential equations numerical solution, noting relationship to finite element method

11 p1679 A72-26961

Plane Poiseuille flow Orr-Sommerfeld problem numerical solutions comparison and computer program implementation

12 p1797 A72-27192

Helmholtz equation numerical solution for potential field problems with arbitrary boundary conditions of wave propagation, diffusion and thermal conduction in mathematical physics

12 p1846 A72-27553

Numerical methods for inverse solution to turbulent swirling boundary layer combustion flow problem

13 p2063 A72-28420

Numerical analysis methods for solution stability of reduced field equations describing perturbed motion of body under nonconservative loads

13 p2001 A72-28485

Numerical methods to solve boundary value problems of monochromatic transport equations in light scattering media optics

13 p2001 A72-28504

Numerical description of electromagnetic radiation from open-ended flanged waveguides, giving truncation corrected expressions for field behavior in aperture perimeter vicinity

13 p1915 A72-28520

Numerical analysis of surface current density distribution and electromagnetic fields of conducting body, noting radiation patterns of radial dipole and quarter wavelength monopole

13 p1916 A72-28541

Nonlinearity effect on electron plasma wave dispersion relation, using numerical simulation and theoretical analysis by perturbation expansion and Hamilton variational principle

13 p2011 A72-29121

Numerical analysis method for performance prediction of linear induction machines including liquid metal MHD pumps and generators and linear motors

13 p1900 A72-29365

Digital data processing techniques for aircraft engine noise data reduction, analyzing fan noise spectrum

13 p1925 A72-29840

Relaxation method for thermal computation programs to solve nonlinear heat exchange equations for steady state temperature distribution, discussing numerical instability due to linearization

14 p2170 A72-30684

Holomorphic rational functions involving error bounds without derivatives solution by numerical differentiation procedure

14 p2126 A72-30709

Two dimensional numerical solution of semiconductor steady state transport equations, applying to MOS and bipolar transistors

14 p2142 A72-30847

Arbitrary cascade profiles aerodynamic characteristics calculation via integral equation numerical solution for attached potential incompressible fluid problem

14 p2070 A72-31014

Numerical calculation of stresses and displacements in variable radius bodies of revolution under axially symmetric torsional load, using Fredholm type integral equation

15 p2324 A72-31480

Low storage numerical solution of waveguide problem based on impulse analysis, using random walk technique to eliminate large matrix processing

15 p2194 A72-31542

Numerical analysis of steady one dimensional quasi-shock waves in collisionless plasma within longitudinal uniform magnetic field, noting oscillations behind wave front

15 p2284 A72-31584

Bairstow Method extension with restored convergence for multiple quadratic factors using interval arithmetic

15 p2262 A72-31631

Orthogonal vibration damping matrix numerical evaluation, comparing Caughey series and direct approaches

15 p2326 A72-31711

Monatomic ionized gas thermodynamic properties direct computation by numerical method without iteration or numerical differentiation

15 p2335 A72-31714

Thin circular loop antenna input admittance and current distribution calculation comparison

15 p2209 A72-32673

Numerical methods for Liapunov linear matrix equations solution in control systems analysis and design

15 p2265 A72-32798

Numerical method for force-free magnetic field structures in solar active regions, discussing rotation effects

16 p2455 A72-33462

Sea level wind and pressure data adjustment to governing dynamical equations by numerical variational analysis, using Sasaki matching technique

16 p2419 A72-33941

Numerical construction of the Hill functions.

17 p2573 A72-34216

Rate of convergence of several conjugate gradient algorithms.

17 p2573 A72-34218

Block five diagonal matrices and the fast numerical solution of the biharmonic equation.

17 p2574 A72-34446

On the numerical solution of elliptic partial differential equations by the method of lines.

17 p2575 A72-34647

Discrete vortex model numerical simulation of Onsager negative temperature instability for interacting line vortices two dimensional motions

17 p2538 A72-34871

The evaluation of the stress intensity factors for cracks subjected to tension, torsion, and flexure by an efficient numerical technique.

17 p2631 A72-34966

A comparison of numerical methods for determining stress intensity factors.

17 p2631 A72-34973

Particle interactions in real and numerically simulated plasmas, considering effects of macroparticles formation via idealized clustering

17 p2590 A72-35143

Russian book on numerical methods in optimal control systems theory covering functional extremum, dynamic programming, control synthesis and statistical linearization of nonlinear systems

17 p2533 A72-35458

Numerical solution of an optimal control problem with a probability criterion.

17 p2534 A72-35531

Verification of theory for plasma of finite-size particles.

17 p2592 A72-35618

Programmable computation method based on matrix formulation for numerical solution of differential equations in heat conduction and thermal stress problems

17 p2635 A72-35898

Numerical calculation of energy storage, wave dispersion and propagation in waveguides of periodic resonator chains at high frequencies

18 p2657 A72-36105

Effective dimensional reduction in the computation of linear, discrete, time-delay problems.

18 p2672 A72-36302

Theoretical models for cavity and wake flows, outlining numerical methods for solving functional equations

18 p2679 A72-36387

A basic theorem in the computation of ellipsoidal error bounds.

18 p2705 A72-36602

The numerical solution of Fredholm integral equations of the second kind with singular kernels.

18 p2705 A72-36603

A numerical method for coupled differential equations.

18 p2705 A72-37174

Numerical prediction of the diffusion of exhaust products of supersonic aircraft in the stratosphere

19 p2748 A72-37824

Numerical solutions in the simplest problem of the calculus of variations.

19 p2827 A72-38382

The Galerkin method for the numerical solution of Fredholm integral equations of the second kind.

19 p2827 A72-38384

The possible use of Laguerre polynomials for representing the vertical structure of numerical models of the atmosphere.

19 p2829 A72-38562

Marcum Q function parameters approximations for error probabilities computation in multilevel frequency shift keying and differentially coherent phase shift keying systems

20 p2903 A72-39426

Book - Functional analysis and approximation theory in numerical analysis.

20 p2946 A72-39729

An inverse problem in boundary-layer flows - Numerical determination of pressure gradient for a given wall shear.

21 p3043 A72-40108

A numerical solution for the near and far fields of an annular ring of magnetic current.

21 p3015 A72-40354

Numerical analysis of microwave heat generation in disc-shaped Luneberg lenses.

21 p3032 A72-40627

Computation of three-dimensional non-equilibrium supersonic flows.

[ICASP PAPER 72-37] 21 p2992 A72-41162

Conformal mapping procedure for numerical generation of airfoils with local curvature singularities, presenting test problem results for zero trailing edge angle

21 p2992 A72-41259

Numerical solution of a boundary value problem arising in the deflection of beams and shells.

21 p3122 A72-41311

Computational solutions of matrix problems over an integral domain.

21 p3076 A72-41315

The motion of a viscous fluid past an impulsively started semi-infinite flat plate.

21 p3046 A72-41316

Regularized linear problem with perturbed equation as solution, presenting error overestimate

21 p3076 A72-41336

Eigenvalue numerical solution for dispersion relation and propagation characteristics of nonlocal drift waves in cylindrical plasma based on two fluid model

21 p3093 A72-41495

Orbit prediction for artificial satellites via numerical averaging technique, presenting algorithm for planetary equations solution

[AIAA PAPER 72-934] 21 p3112 A72-41572

Computer-aided numerical solution for electric field structure of rod and plate, calculating field distortion by rod antennas and near lightning rod

21 p3086 A72-41671

Mathematical spectra theory application to matrix eigenvalue problem, obtaining explicit form of determinant characteristic polynomial by numerical methods

21 p3076 A72-41781

Time dependent one dimensional numerical model of hail-bearing cumulus cloud, using microphysical process parameterization and exponential raindrop and hailstone size distributions

22 p3201 A72-42513

Clamped circular rigid-plastic plates subjected to central blast loading.

22 p3235 A72-42601

Numerical solution of bending stresses in elastic cantilever plates under surface and edge loads, noting boundary layer, load concentration and sweep back effects

22 p3236 A72-42609

Numerical analysis of the natural convection in a porous medium between two concentric cylinders

22 p3244 A72-42640

Analysis of the transient response of shell structures by numerical methods.

22 p3237 A72-42762

Multimoded components wavefront arrival angle from measurements of signal induced in linear array, discussing numerical calculation from linear equation solution and polynomial roots

23 p3264 A72-43601

Numerical determination of the stress concentration around a hole in a circular cylindrical shell

23 p3348 A72-43799

Results of a numerical solution of a complex dispersion equation for the HE-sub 11 wave in a two-layer circular waveguide 23 p3273 A72-44214

Numerical evaluation of elastic stress intensity factors by the boundary-integral equation method. 23 p3353 A72-44233

Numerical analysis of global satellite triangulation grid projects 24 p3397 A72-44868

Numerical analysis of natural frequency spectrum of plastic plate free vibrations in compressible inviscid fluid 24 p3459 A72-45003

Frequency multiplication with a traveling-wave tube. II - Numerical analysis of a traveling-wave frequency multiplier by the large-signal theory. 24 p3386 A72-45285

A general theory of convergence for numerical methods. 24 p3419 A72-45300

NUMERICAL CONTROL

Nd-YAG laser system generating gold conductor patterns on ceramic substrates, using numerical control system for Si production 07 p1002 A72-19213

Closed line magnetic confinement device filled with laser produced hydrogen plasma, discussing laser beam high speed numerical control for injected pellet interception [CLEA PAPER 12,1] 07 p1040 A72-19392

Numerically controlled machine tools accuracy, discussing feed spindle and displacement/angle measuring system errors determination through angular step transducers and laser interferometer 07 p0995 A72-19684

Large automated tape placement machine tool design and construction for laying up aircraft structures from composite materials 08 p1177 A72-21690

Sequential control using computer program for signal processing, noting machine tool, die casting, elevator and warehouse applications 09 p1290 A72-22240

Deterministic methods to calculate quantization error in digital control system 11 p1610 A72-25976

Floating point arithmetic operators with variable dynamic range and multiple precision, noting word method for numerical data processing in computation and process control 12 p1787 A72-27666

Astronomical pointing of radio telescopes using on-line computer 12 p1793 A72-27813

Numerically controlled composite tape laying machine, discussing production run simulation, raw material quality effect and control corrective devices 12 p1815 A72-28078

Control optimization avoiding stability problem by integrating matrix Riccati equation 13 p1937 A72-30074

Measuring technique importance for aircraft R and D, emphasizing quartz tensometer, digital control and signal processing 14 p2092 A72-30286

Optimal state space synthesis of discrete linear computer controlled systems with quadratic cost function, using Liapunov, Pontryagin, and Bellman techniques 15 p2212 A72-32765

Die-casting machine design trends, considering uses of elbow lever and hydraulic systems and programmed control 16 p2399 A72-34142

Computerized photographic imagery analysis system with interactive operator controls for processing option selection in image enhancement prior to pattern identification 17 p2520 A72-34407

Book on Soviet astronomical reflecting telescopes, paraboloid mirrors, computer control, microphotometers and image converters 17 p2553 A72-34623

A method of using a control computer in a system controlling onboard spacecraft equipment 17 p2522 A72-35027

A probabilistic model of a control computer complex for estimating the efficiency of communication of a computer with data sources and receivers 17 p2522 A72-35029

Analysis of a control computer complex as a multiphase queuing system 17 p2522 A72-35030

Process computer system design, discussing structural units, data flow coordination with storage, input/output channels and periphery coupling problems 17 p2523 A72-35443

Numerical control component insertion for missile IC electronic module, tabulating producer-user survey data for designs usage and machine tools 17 p2532 A72-35923

Computer control of aircraft landing. 17 p2578 A72-35950

The AEG 60-50 process computer in special research field 55 at the Rhein-Westphalian Technische Hochschule at Aachen 18 p2664 A72-36680

Program-controlled machine for the investigation of mechanical properties of materials under a complex stress. 19 p2795 A72-37575

Development of a digital control system for a spacecraft propulsion test facility. 19 p2783 A72-37641

Computers and automatic drafting machines as aids in artwork production for printed circuits 19 p2809 A72-38307

Process control of the 100-meter telescope - Astronomical concept 19 p2803 A72-38485

Process control of the 100-m telescope - Communication of the observer with the computer-controlled telescope 19 p2804 A72-38487

Advanced fighter controls flight simulator for all-systems compatibility testing. 20 p2911 A72-39090

[AIAA PAPER 72-837] Operational software for computerized process control, considering operations system, translator, supervision and auxiliary and service programs 21 p3024 A72-41000

Dynamic characteristics, stability and steady state accuracy for orbital gyroscope with digital control, noting bit density requirements of onboard computer 22 p3202 A72-42207

Electrical components in gas turbine control systems. 22 p3216 A72-42521

Digital computer controlled testing equipment for separately driven coaxial gas turbine low and high pressure compressors, emphasizing reliability and flexibility in system design 22 p3157 A72-42682

Computer-operated data acquisition and control system for automatic diagnostic monitoring of propulsion research instrument 22 p3216 A72-42684

Development of a digital control system for a spacecraft propulsion test facility. 22 p3163 A72-42685

Nondestructive stability evaluation of large shell structures by direct computer controlled testing. 22 p3157 A72-42695

Computer control of the General Dynamics High Speed Wind Tunnel. 22 p3157 A72-42697

Computer-controlled queuing system with service interruptions. 23 p3275 A72-43605

Qualitative investigation of nonlinear pulse systems by the point mapping method 23 p3277 A72-44006

The use of minimum order state observers in digital flight-control systems. 24 p3382 A72-45343

Parallel Element Processing Ensemble (PEPE)/digital computer for real time radar data processing and control, discussing system design and applications 24 p3383 A72-45666

A prognosis on fault-tolerant digital control systems. 24 p3383 A72-45672

NUMERICAL FLOW VISUALIZATION

Numerical shallow fluid model for air flow across orographic variable grid barrier, using idealized Andes Mountains range 12 p1838 A72-27023

Numerical simulation of three dimensional shape-preserving convective elements from buoyancy release in incompressible fluid, using Navier-Stokes equations 12 p1839 A72-27027

Two dimensional dynamic model numerical simulation for micro- and macrostructures of moist convective clouds, comparing to field observations 12 p1839 A72-27028

Numerical model of global scale propagating waves in equatorial stratosphere generated by tropospheric heat sources for Kelvin and Rossby-gravity modes 12 p1839 A72-27029

NUMERICAL INTEGRATION

NT RUNGE-KUTTA METHOD

Kalman filtering process digital simulation by numerical integration of matrix differential equations describing linear system random process model and optimal filter 01 p0024 A72-10225

Aircraft stability coefficient determination by numerical integration fitting to differential equations of motion 01 p0005 A72-11136

Numerical solution for swirling ideal gas flow in Laval nozzle, determining swirling effects on nozzle performance 02 p0149 A72-11583

Asymptotic methods application to differential equations in nonlinear solar convection theory at high

Rayleigh number, noting discrepancy from numerical integration 02 p0276 A72-11644

Stellar systems existence with positive total energy, using numerical integration of equations of motion for members of Orion Trapezium 03 p0435 A72-13808

Numerical integration of element T (transit time through perihelion/ in perturbations of near parabolic comet orbits 03 p0436 A72-13829

Orthogonal polynomials in several variables relation to approximate multiple integration, extending Stroud theorem for two-dimensional regions cubature formulas to n-dimension 04 p0539 A72-14731

Nonlinear differential equations systems solution by A-stable numerical integration techniques 04 p0539 A72-14732

Matricial difference schemes based on numerical methods characterized by approximations for integrating stiff systems of differential equations 04 p0540 A72-15375

Differential equations systems formulation and numerical integration in gravitational problem of stellar n-bodies, discussing close approaches 05 p0713 A72-16052

Stability characteristics of finite difference schemes based on lumped-parameter model and numerical integrator for wave propagation in continuous media 05 p0735 A72-16081

Boundary layer of gas-particle flows with pressure gradient, numerically integrating momentum equation for cascade particulate flow [AIAA PAPER 72-87] 05 p0604 A72-16808

Compressibility and total enthalpy difference effects on laminar free shear layer from numerical integration of equations of motion 05 p0653 A72-17011

Numerical integration solution of nonlinear equations and two point boundary value problems, using quasi-linearization and imbedding methods 06 p0839 A72-17957

N-body problem equations of motion numerical integration methods supplemented by two body perturbation description and coordinate and time transformations 06 p0885 A72-18072

Numerical integration of N-body problem integrodifferential equations, using integrals as constraints and for correction application in least squares procedure 06 p0885 A72-18074

N-body gravitational problem direct integration techniques, discussing fourth order polynomial method, computer algorithm and regularization procedure for two body encounters and close binaries 06 p0885 A72-18078

N-body gravitational problem numerical integration treatment of close approaches, using transformations for eliminating differential equations of motion singularities 06 p0885 A72-18079

Plasma Dory-Guest-Harris type instability nonlinear evolution from numerical integration of Vlasov equation, using particle simulation and Fourier-Hermite transform methods 06 p0865 A72-18542

Numerical solution of integral equations with singular and weakly singular kernels by weighted residuals method 07 p1025 A72-18781

Numerical approximation of Pochhammer-Chree longitudinal vibration modes in elastic cylinders by quadratic spline functions 07 p1087 A72-18797

Singular integral equations numerical solution from Gauss-Chebyshev formulas for mixed boundary value problems 07 p1026 A72-18808

Difference method for numerical integration of Navier-Stokes equations for two dimensional incompressible steady flow along flat thin plate 07 p0908 A72-19170

Digital simulation of two dimensional or marginally turbulent three dimensional flows by discretization and numerical integration, noting Galerkin method efficiency in avoiding errors 07 p0951 A72-20355

Numerical integration of unsteady heat conduction equations for gas turbine rotor with shrouded blades, using grid method 08 p1223 A72-20950

Numerical simulation of two dimensional and marginal three dimensional turbulent flows, discussing variable eddy viscosity model, discretization, numerical integration and Galerkin methods 08 p1200 A72-21492

Equilibrium statistics of randomly forced two dimensional viscous flow three mode representation constructed by numerical integration of nonlinear equations system 09 p1293 A72-22459

Ordinary differential operators eigenvalues calculation, noting numerical integration scheme for initial value problem

09 p1340 A72-22461

Numerical integration of viscous and inviscid fluid flow equations, comparing various methods with exact solution

09 p1293 A72-22463

Numerical integration of primitive equations for barotropic atmosphere, using spherical polar coordinates

09 p1346 A72-22809

Numerical algorithm for matrix case extension of transport problem in periodic media

09 p1342 A72-23368

Numerical solutions of linear and nonlinear hydrostatic primitive equations for frontogenesis forced by nondivergent horizontal wind, noting discontinuities prediction

09 p1347 A72-23651

Fifth order modified Runge-Kutta integration algorithm, presenting truncation error estimation method and computation procedure flow chart

10 p1505 A72-24091

Coupling of interstitial liquid and porous elastic medium deformation, calculating solidification by numerical integration of partial differential equations system of Lamé type

10 p1465 A72-24116

Navier-Stokes equations numerical solution for symmetric laminar incompressible flow past parabolic cylinder, presenting surface pressure, friction and pressure drag results

10 p1465 A72-24291

Linear multistep methods with variable matrix coefficients for asymptotic numerical integration of ordinary differential equations system

11 p1679 A72-26960

Numerical integration for many body systems equations of motion, noting Monte Carlo and Boltzmann moment methods for large systems

12 p1873 A72-27895

Binary evolution in star cluster models from numerical methods of direct integration, noting domination by heavy binary and double star formation and disruption

12 p1873 A72-27899

Massless test star velocity vector deflection in stellar field from numerical integration on relaxation times

12 p1873 A72-27901

Gravitational many body problem differential equation system formulation and numerical integration

12 p1874 A72-27902

Integrals utilization in numerical integration of n body gravitational systems, discussing accuracy and reduced computation time

12 p1874 A72-27903

Close approaches in numerical integration of gravitational many body problem, discussing smoothing and regularization

12 p1875 A72-27918

Time constant limited stability of numerical integration procedures for systems of kinetic equations, examining causes and effects of stiffness

13 p1985 A72-28419

Atmospheric motion equations numerical integration, presenting conservative finite difference approximation for quasi-uniform spherical grids derived from regular polyhedrons

13 p1985 A72-28445

Digital computer estimates of random processes spectral density by statistical correlation method, calculating errors in numerical integration techniques

13 p1937 A72-29495

Numerical integration of boundary layer equations through region of reverse flow past parallel flat plate with negative surface velocity

13 p1944 A72-30033

Error sources in numerical integration of spacecraft equations of motion in solar and planetary gravitational fields, suggesting methods for improving accuracy

14 p2151 A72-30453

Linear stiff differential equations subdominant solutions, developing numerical integration algorithm

14 p2126 A72-30525

Numerical integration of equations of motion in finite element methods, investigating explicit methods stability

15 p2326 A72-31717

Fast numerical solution for supersonic flow past flat-faced blunt body by integration from stagnation point, noting computing time on CDC 6600

16 p2341 A72-32840

A method of solving partial differential equations for boundary layers

17 p2537 A72-34195

The numerical solution of hyperbolic systems using bicharacteristics.

17 p2574 A72-34449

Initial value techniques in free-surface hydrodynamics.

17 p2538 A72-34644

Single point and multipoint methods for numerical integration of differential equations, discussing solution efficiency improvement via automatic step selection

17 p2576 A72-35040

Numerical integration of ordinary differential equations in a real-time modeling procedure

17 p2576 A72-35041

Numerical evaluation of Chapman's grazing incidence integral $ch/X, \chi_i$.

17 p2549 A72-35609

Computerized numerical integration for nonlinear bending of tapered slender cantilever beams under concentrated tip loads

17 p2635 A72-35975

Numerical solution of Volterra integral equation.

18 p2705 A72-36601

A-stable, accurate averaging of multistep methods for stiff differential equations.

18 p2705 A72-37019

Hopscotch algorithm for numerical integration of nonlinear hyperbolic partial differential equation systems based on finite difference method

18 p2705 A72-37020

Integral equation method for solution of boundary value problems of structural mechanics. I - Ordinary differential equations. II - Elliptic partial differential equations.

18 p2739 A72-37169

Numerical integration of nonlinear convective flow equations for arbitrary atmospheric temperature and wind profiles, discussing cloud streets formation

19 p2828 A72-37998

Numerical integration method with recurrent power series for motion and variational equations of elliptic restricted three body problem

19 p2862 A72-38019

Control theory stability criteria applied to discrete time feedback systems, investigating numerical integration methods for initial value problems solution

19 p2826 A72-38250

Numerical calculation of third virial coefficient in equation of state of real gases eliminating errors associated with substitution of integration infinite integral

19 p2838 A72-38462

Book - Astrodynamics: Orbit correction, perturbation theory, integration

19 p2868 A72-38723

Numerical gas dynamic calculations by difference method with two moving curve families, noting water mass impact on plane solid wall

19 p2789 A72-38851

An intermediate matching technique for solving two point boundary value problems using the perturbation method.

20 p2910 A72-39198

Fractional steps method of difference schemes for approximate numerical solution of parabolic and elliptic initial boundary value problems

20 p2945 A72-39327

Numerical integration of gamma ray photopeak digital data from nondestructive activation analysis

20 p2899 A72-39834

An application of the shooting method to the stability problem for a stratified, rotating boundary layer.

21 p3043 A72-40106

A method of numerical integration for trajectories with variational equations.

[AIAA PAPER 72-910]

21 p3111 A72-41557

Numerical integration of three dimensional flow equations for supersonic jets of ideal gas exhausted from elliptical and rectangular nozzles

22 p3133 A72-42264

Numerical solution of integral equations of the first kind, using a priori information about the function to be restored

22 p3198 A72-42276

Numerical integration of integral equation for phased array radiation modeled by impedance filaments in conductive plane, noting excitation by magnetic flux

22 p3159 A72-42663

Linear multistep methods for a class of functional differential equations.

22 p3199 A72-42774

An approximation to midcourse correction direction errors.

22 p3203 A72-42870

Numerical integration of nonlinear differential equations in nonlinear circuits analysis, obtaining information on unsteady processes from calculation with controlled level time quantization step

23 p3269 A72-43444

A method of computing numerically integrated stiffness matrices.

24 p3457 A72-44878

Satellite orbital motion numerical integration method, using Picard iteration relative to reference orbit to calculate short-term anomalous period intervals

[AIAA PAPER 72-909]

24 p3443 A72-45428

A numerical integration method useful for studying ionospheric phenomena.

24 p3399 A72-45582

NUMERICAL WEATHER FORECASTING

Kennedy Space Center thunderstorm forecasting system, discussing data processing with conditional and exposure period probabilities and nonlinear predictors multiple regression equations

01 p0094 A72-10826

Nimbus 3 and 4 satellite technological and meteorological performance, discussing atmospheric temperature humidity and ozone vertical sounding for numerical weather forecasting models

01 p0130 A72-10955

Weather forecasting, discussing statistical entropy, numerical and statistical methods and computer technology utilization

02 p0254 A72-12777

Numerical weather prediction, discussing automatic forecasting, error sources, models and four-day validity in Northern Hemisphere

02 p0254 A72-12781

Satellite measurements of tropospheric and earth surface state parameters for long term numerical weather forecasting, discussing data fluctuations

02 p0255 A72-12789

Tadzbakhsh method of meteorological data assimilation for numerical weather forecast analyses, testing validity under condition of one of three dependent variables being observed

03 p0384 A72-14141

Closure schemes and retention of third moments in stochastic dynamic equations for numerical weather prediction, discussing imperfect forcing effects and kinetic energy relations

03 p0385 A72-14230

Short period height and long period kinetic energy oscillations in 10-level primitive equation model for circulation prediction in tropical region

03 p0385 A72-14232

CAT, cloud cover and icing forecasting for aviation in terms of numerical model and real atmosphere

04 p0542 A72-14689

Mountain barrier and convective area minimum size determination for numerical forecasting models, reducing primitive equations system to advection difference equation

04 p0544 A72-15459

Numerical two layer model of frontal motions development in atmosphere

06 p0840 A72-17384

Stochastic dynamic equations for atmospheric prediction and numerical weather forecasting, using barotropic model

06 p0841 A72-17633

Linearized two level model for atmospheric motion equations systems, using Psi-balanced system for 24 hour forecast

08 p1156 A72-20995

Numerical forecasting model with precipitation as function of vertical velocity and humidity distribution, noting orographic influence and atmosphere static stability

08 p1200 A72-21796

Filtered-equation pressure coordinate numerical weather prediction model in finite difference formulation, discussing various initialization procedures and boundary value specifications

09 p1343 A72-22427

Primitive equation multilayer model for winter precipitation prediction in U.S. northeast coastal region, noting correlation with observational data

09 p1344 A72-22428

Numerical solutions of linear and nonlinear hydrostatic primitive equations for frontogenesis forced by nondivergent horizontal wind, noting discontinuities prediction

09 p1347 A72-23651

Nonlinear medium range numerical weather forecasting method based on atmospheric spectral model

11 p1683 A72-26884

Stochastic dynamic prediction of meteorological fields in deterministic and indeterminate atmosphere

12 p1838 A72-27020

Meteorological reference level location without wind information for use in numerical weather prediction

12 p1838 A72-27024

F 2 layer parameter forecasting by computer based on series coefficients dependence on Wolf number

13 p1946 A72-28597

Thunderstorm encounter probability at SST altitudes for selected cross country routes, using radar observation data

13 p1992 A72-28853

Mathematical criteria for probable and potential aircraft icing occurrence, using radiosonde and empirical climatological data

13 p1993 A72-28856

Multiscale numerical model for local weather development simulation, noting forecasting for long distance air travel

13 p1993 A72-28857

Winds aloft forecast use to predict southwestern mountain lee wave behavior for general aviation cross country flights

13 p1993 A72-28863

Book on dynamic meteorology covering synoptic disturbance model, numerical weather prediction and baroclinic waves origin 15 p2266 A72-31875

Atmospheric motions prediction with numerical model based on discrete stratified fluid free oscillations 15 p2266 A72-32720

Imposed southern boundary experimentation for large scale Northern Hemisphere midlatitude atmospheric flow numerical prediction, discussing factors contributing to model success 15 p2267 A72-32726

Semiimplicit time integration algorithm in atmospheric baroclinic models for short range weather forecasting in Canada 16 p2418 A72-33665

Convective clouds fluid dynamic numerical modeling, considering plumes, thermals and vortex rings formation [AIAA PAPER 72-651] 16 p2419 A72-34083

Some observed properties of atmospheric turbulence. 18 p2705 A72-36019

Spatial variations in atmospheric predictability. 18 p2706 A72-36627

Numerical methods of solving weather forecasting problems 19 p2828 A72-37386

Dynamic meteorological problems solution by four dimensional analysis, discussing information deficiency effect on boundary value problems analysis in numerical weather forecasting 19 p2828 A72-37997

Computer program for numerical analysis of atmospheric fronts in lower troposphere based on models for spatial distribution of hydrothermal characteristic in air mass 19 p2829 A72-38771

Numerical climatic-change experiments - The effect of man's production of thermal energy. 20 p2947 A72-38962

Computerized long term weather forecasting via mathematical modeling of atmospheric processes based on meteorological parameters worldwide observational data 20 p2948 A72-39939

Thermodynamic conditions for the development of convective clouds and a method of forecasting the quantity of rainfall 22 p3202 A72-42953

Reproduction of the climatic distribution of meteorological elements on the basis of a nonadiabatic spectral model of the atmosphere 23 p3311 A72-43626

On the efficient reduction of truncation error in numerical weather prediction models. 23 p3311 A72-43675

One-level fine-mesh limited-area grid numerical weather prediction atmospheric model, evaluating various finite difference schemes, boundary conditions and initialization methods 24 p3420 A72-44619

F 2 layer parameter forecasting by computer based on series coefficients dependence on Wolf number 24 p3398 A72-45097

Incorporation of steep mountains into numerical forecasting models. 24 p3421 A72-45486

NUSSELT NUMBER

Temperature effects on hot-wire anemometer calibrations, plotting Nusselt number variation with Reynolds number 07 p0990 A72-20369

Heat transfer coefficient, maximum Nusselt number and particle thermal conductivity effect for gas fluidized beds, using surface renewal-penetration theory [ASME PAPER 71-HT-Z] 08 p1251 A72-20879

Evaluation of Collis-Williams and Davies-Fisher heat transfer formulas for flow past fine wires based on Nusselt vs Reynolds number relationship 10 p1562 A72-24294

Fluid flow and heat transfer in tube bank with two cylinders in cross flow, determining static pressure, Nusselt number and drag coefficients 11 p1743 A72-25259

Forced convection and thermal boundary condition in parallel and tapered passages, discussing Nusselt numbers for exponentially decreasing wall heat fluxes 14 p2173 A72-31062

Magnetic field effect on finite amplitude convection in fluids complying with Boussinesq approximation, discussing maximum Nusselt number shift 16 p2452 A72-33039

Nusselt number dependence on Rayleigh number for steady convection in porous medium, explaining heat transport abrupt change by breakdown of Darcy law 18 p2740 A72-36484

Calculus of variations and finite difference method for combined free and forced convective heat transfer through vertical noncircular ducts, calculating Nusselt number 18 p2741 A72-36926

Buoyancy effects on laminar heat transfer in the thermal entrance region of horizontal rectangular channels with uniform wall heat flux for large Prandtl number fluid. 22 p3243 A72-41956

NUTATION

Earthquake excitation of Chandler wobble in earth rotation 03 p0351 A72-14365

Earth motion nutations, considering external forces effects from sun and moon 04 p0575 A72-15030

Earth nutation tables, comparing precession-nutations and tidal potential 04 p0575 A72-15031

Combined rotational motions of free solid and coupled elastic bodies oscillations around center of mass with nutation passive dampers 06 p0850 A72-18707

Terrestrial pole motion components, discussing variations in Chandler wobble period and sidereal motion direction and average annual motion along ellipse 07 p0976 A72-19815

German monograph on optimal guidance of spin stabilized space bodies for combined attitude and angular velocity control and time optimal nutation damping 08 p1241 A72-21847

Elastic dislocation theory of Chandler wobble excitation by earthquakes 09 p1299 A72-22802

Free nutations of earth from 1904-1941 latitude observations at Pulkovo, noting diurnal variations with almost identical amplitudes 09 p1388 A72-23058

Earth free diurnal nutation parameters comparison based on determinations from latitude observations at various observations 09 p1388 A72-23059

Stochastic atmospheric density fluctuations effect on circular-orbiting satellite roll-yaw oscillations stability 15 p2319 A72-31457

Elastic damping of spin stabilized space stations nutational oscillations induced by time-variant moments of inertia 15 p2319 A72-31458

Frequency shift and mode shapes for equatorial vibrations of flexible boom on spin stabilized satellite, applying to thermal flutter resonance and nutational stability 15 p2320 A72-31803

Optimum design parameters for a spin-stabilized spacecraft nutation damper. 17 p2619 A72-34208

Variations of the earth's gravity field due to the free nutation. 17 p2544 A72-34272

Terrestrial pole motion components, discussing variations in Chandler wobble period and sidereal motion direction and average annual motion along ellipse 17 p2549 A72-35740

Determination of the aberration constant and the coefficients of short-period nutation terms from observations by the Pulkovo polar tube during the period from 1953 to 1964 19 p2861 A72-37976

Preliminary results of discussions of latitude observations by the prismatic astrolabe in Pulkovo /1963.2-1968.7/ 19 p2861 A72-37977

Attitude stability and performance of a dual-spin satellite with nutation damping. 19 p2862 A72-38022

Earth precession, nutation, polar axis displacement and rotation period reduction, discussing solid core existence within liquid core, elasticity and polar displacement 23 p3341 A72-44462

Motion of a rotationally symmetrical gyro with an arbitrary number of vessels containing liquid 24 p3395 A72-45578

NUTATION DAMPERS

SAS-A satellite attitude control and determination systems, discussing momentum wheel development, nutation damper and magnetic torquing 03 p0442 A72-14398

Universal ball-in-tube nutation dampers for spinning satellites, noting cost savings 05 p0729 A72-16756

Intelsat 4 nutation dynamics and gyrostat stabilization technique for precision pointing in international telecommunication, discussing damper and fuel sloshing [AIAA PAPER 72-537] 12 p1780 A72-27360

Autotracking antenna effect on dual spin spacecraft nutational stability, using averaging, eigenvalues and digital simulation techniques 12 p1876 A72-27379

[AIAA PAPER 72-571] 12 p1876 A72-27379

Nonresonant mode and nutation damping of rotational-vibrational motion of free solid body with elastic elements 12 p1846 A72-27968

Optimal efficiency of satellite passive nutation damper, noting system moment of inertia and flywheel axis relationship and viscous friction coefficient 14 p2162 A72-30458

Nutational stability of a dual-spin satellite under the influence of applied reaction torques. [AIAA PAPER 72-885] 20 p2976 A72-39116

NUTATIONAL OSCILLATION

U NUTATION

NUTRIENTS

Dihydroxyacetone /DHA/ as nutrient in growing fats diet, showing unsuitability of regenerated DHA-containing formose mixtures for space crew diets 16 p2354 A72-33371

NUTRITION

Apollo 14 food system, describing new items, improvements in production methods, packaging and preparation with emphasis on rehydratable foods 02 p0166 A72-11706

Spinal mesenteric vascular reflexes of vasoconstriction effect of pressure drop in coeliac artery relation to Rein nutritional hepatic reflex 04 p0473 A72-15125

Protein-rich food substitute from microalgae cultures for human nutrition, describing experimental production, protein value determination, special diets and food shortage relief 06 p0768 A72-18159

Higher nervous activity of monkeys two years after the extirpation of the dorsolateral frontal cortex 21 p3001 A72-40803

NUTRITIONAL REQUIREMENTS

NT CALORIC REQUIREMENTS

Chlorella population age structure and cell requirements correlation with nutrient medium nitrogen and phosphorus absorption 13 p1909 A72-29311

NYLON [TRADEMARK]

Parachute canopy fabrics and rigging lines cordage properties requirements, considering nylon, polypropylene, silk, cotton and nonwoven scrim-reinforced fabrics 01 p0005 A72-10314

Webbing joints stitching strain, considering nylon and flax yarns stretching properties and various stitching patterns strengths 01 p0005 A72-10315

Nylon parachute materials failure mechanics, considering friction, light, chemical and thermal effects 01 p0005 A72-10316

Design against fatigue failure in thermoplastics. 24 p3457 A72-44816

NYLON RESINS

U POLYAMIDE RESINS

NYQUIST DIAGRAM

Discrete time systems with periodic feedback gain, deriving stability conditions and Nyquist plot from linear operator spectral theory 11 p1608 A72-25318

Graphical design technique based on Nyquist plane construction using circle criterion for nonlinear systems controller synthesis 14 p2091 A72-30375

The Nyquist criterion for kinematic-dynamic action. 20 p2956 A72-38912

Design of controllers for open-loop unstable multivariable system using inverse Nyquist array. 23 p3275 A72-43609

NYSTAGMUS

Navigators, pilots and airman trainees response to Coriolis accelerations, investigating nystagmus sensitivity coefficient relationship to motion sickness resistance 01 p0021 A72-11286

Vestibular system tests using optokinetic, caloric, positional and rotational stimuli 01 p0022 A72-11292

Lateral geniculate body neurons activity during nystagmic eye movements in cats after vestibular stimulation related to visuo-motor mechanisms counteracting illusory shifts 03 p0315 A72-13623

Eye movement control device for electronystagmography, describing construction, line drawing and basic circuits 03 p0319 A72-13724

Alcohol ingestion effects on tracking performance during angular acceleration, observing nystagmic eye movements and eye-hand coordination 04 p0477 A72-14474

Nystagmus and illusory phenomena in man under simultaneous rotation in two perpendicular planes as function of vestibular excitation 09 p1267 A72-23593

Nystagmus eye movements relationship to oculogyril illusion from test involving vestibular stimulation and visual stimuli velocity estimates 12 p1776 A72-28304

Alcohol ingestion effect on vestibular responses to angular acceleration and Coriolis stimulation, discussing nystagmus and subjective responses 14 p2082 A72-31090

Effects of different alcohol dosages and display illumination on tracking performance during vestibular stimulation. 17 p2508 A72-34554

Vestibular labyrinth reactions and nystagmus thresholds in dogs during negative angular acceleration

tions and simulated chronic galactic radiation from Co 60 gamma source

21 p2998 A72-40439

O

O RING SEALS

Polyurethane O ring seals for high pressure applications, discussing stress relaxation /creep/ behavior, resilience and wear and abrasion resistance

08 p1173 A72-21023

Thermocracking and thermal stresses in packing rings of face-type mechanical seals under dry friction

08 p1177 A72-21927

Reciprocating O ring seal sliding friction behavior prediction by elastohydrodynamic theory, noting dwell time, acceleration rate and previous deceleration effects

12 p1816 A72-28110

O STARS

Early O and Of spectroscopic and photometric data, evaluating atmospheric properties, surface gravities and temperature scales

01 p0131 A72-11009

Circumstellar dust formation hypothesis based on O stars mean circumstellar extinction, explaining Ca and Na abundance in interstellar gas

02 p0284 A72-12636

Line spectrum of Of star zeta Puppis at 3150-8600 A, comparing absorption spectrum to 9 Sgr

03 p0416 A72-13014

Spectrographic observation of hot OB subdwarf HD 149382

03 p0435 A72-13799

Interstellar Ca II, H and K optical absorption lines of bright O and early B stars in Orion region

05 p0723 A72-17200

Non-LTE atmospheric model calculations for H, He I and II spectra of O stars, discussing He abundances

08 p1239 A72-21949

Spectral types and magnitudes of O and WC stars of binary gamma Velorum system

09 p1382 A72-22282

OB star distribution in Puppis from UVB and H beta photometry, noting correlation with hydrogen concentration

10 p1542 A72-24615

Ca II K line profiles in front of distant OB stars, using pressure scanned Fabry-Perot interferometer and coude spectrograph

10 p1542 A72-24616

Perseus two armed spiral shock model based on O associations, young open clusters, H II regions, interstellar absorption lines and 21 cm hydrogen maps

11 p1720 A72-26110

The peculiar O6f star HD 148937 and the symmetrically surrounding nebulae.

22 p3227 A72-42557

Individual reddening laws of O-type stars. I - Computation method, first results

24 p3437 A72-44829

OAO

Absolute UV calibration of rocket photometers used to update OAO calibration for determining energy distribution of reference stars

03 p0355 A72-13065

OAO space telescope of 120 inches aperture, discussing structural design, geometric configuration and stabilization and pointing control system

[AIAA PAPER 72-201] 05 p0663 A72-16800

Dimensional stability and micromechanical properties of materials for use in OAO, investigating residual stresses, creep properties and stress relaxation

[AIAA PAPER 72-325] 11 p1653 A72-25362

OAO IR instruments development to observe IR stars, diffuse galactic objects, galactic center and extragalactic objects

24 p3446 A72-45534

Unmanned OAO spacecraft series and experiment packages, discussing space astronomy scientific achievements, mission plans and space shuttle role

24 p3453 A72-45535

OAO 2

Orbiting astronomical observatory - Review of scientific results.

18 p2731 A72-36555

OAO 3

Self priming high capacity spiral artery heat pipe with ammonia as working fluid for flight on OAO 3, discussing development models analysis, design and testing

[AIAA PAPER 72-258] 11 p1725 A72-25203

OAO 3 satellite Copernicus onboard equipment, discussing UV reflecting and X ray telescopes, attitude sensor, star tracker, solar sensor and computer

22 p3231 A72-42985

OAO-A

U OAO

OBESITY

ECG P-wave-like deflections caused by strong diaphragmatic action potentials in obese woman with fever and erysipelas

13 p1908 A72-28569

OBLATE SPHEROIDS

Rotating earth oblateness and equator ellipticity influence on near-equatorial synchronous satellite behavior, using nonlinear mechanics asymptotic method

03 p0436 A72-13835

Triaxial space station orbit around oblate earth, presenting equations of motion, Hamiltonian and integration methods

06 p0878 A72-17663

Prolate and oblate spheroids flow field generated by axial translatory oscillations in still incompressible viscous fluid from Stokes linearized equations, deriving formulas for drag

10 p1418 A72-24462

Relativistic explanation for excess motion of Mercury perihelion in terms of solar oblateness and interior rotation mechanism

11 p1715 A72-25350

Linearized stability analysis of collapsing uniform nonrotating oblate gaseous spheroid, noting subcondensation growth rate dependence on shape and size

15 p2313 A72-32364

Photographic flow visualization of steady recirculating wakes behind sphere and oblate spheroids for low Reynolds numbers

15 p2180 A72-32419

Photospheric faculae brightness influence on solar gravitational oblateness determination, considering criticism of Dicke-Goldenberg argument on Mercury excess perihelion motion

19 p2855 A72-37239

Faculae and the solar oblateness

19 p2855 A72-37240

Decomposition of the force function of two homogeneous spheroids with noncoinciding symmetry planes

21 p3114 A72-41771

A non imaging approach to solar oblateness measurements.

22 p3222 A72-42046

Electric multipole moments calculation by quasi-static method for homogeneous quasi-neutral oblate plasma spheroid during electromagnetic interaction under resonance conditions

22 p3212 A72-42729

OBLIQUE SHOCK WAVES

Solar wind reverse and forward oblique shock waves, examining discontinuities from Pioneer 6 plasma and magnetic field data

01 p0120 A72-10882

Ion heating in high Mach number oblique collisionless shock waves, noting role of two-ion beam instability from digital simulation

07 p1043 A72-19665

Plane oblique shock wave diffraction on wedge moving in homogeneous gas flow at supersonic speed, reducing boundary value problem to Hilbert problem

07 p0910 A72-20317

Magnetic structure of ionizing oblique shock waves with transverse and normal components in zero magnetic Prandtl number limit

11 p1618 A72-26606

Nanosecond response magnetic probes to measure fast disturbances in oblique shock waves within collisionless plasma, describing experimental technique

15 p2235 A72-31646

Small-amplitude near-steady oblique shock waves in cold collisionless plasma, considering magnetoacoustic and Alfvén waves

15 p2287 A72-32414

Nonlinearity effects on finite amplitude, plane uniform oblique shock wave reflection, using inviscid gas analogous solution techniques

16 p2426 A72-33661

Pressure distribution on a yawed wedge interacted by an oblique shock.

17 p2485 A72-35239

Analytical solutions for straight oblique shock waves in radiating gases.

17 p2542 A72-35616

Particle motion behind oblique shock wave in two phase supersonic wedge flow, deriving expressions for particle trajectories and velocity equalization time

17 p2487 A72-35926

A contribution to the gas dynamics of oblique shocks with change of total enthalpy.

18 p2682 A72-36725

On the conditions for the appearance of the Mach effect in the reflection of an oblique shock wave in supersonic flow

21 p3046 A72-41339

Two-dimensional model for thermal compression.

22 p3136 A72-42868

Earth collisionless plasma bow shock oblique structure assessment by pulsation index I_p devised from empirical results

23 p3341 A72-44511

Pressure fluctuations resulting from the interaction between a shock wave and a turbulent boundary layer.

24 p3359 A72-44682

Supersonic aircraft engine inlet performance in terms of pressure recovery, discussing oblique shock wave formation ahead of entrance to improve efficiency

24 p3360 A72-44991

Instability of the whistler structure of oblique hydromagnetic shocks.

24 p3428 A72-45013

Gas dynamics problems of oblique shock waves around aerodynamic bodies, noting exact quasi-explicit and approximate explicit solutions

24 p3394 A72-45445

OBSERVATION

U OCCULTATION

OBSERVATION

NT SATELLITE OBSERVATION

NT VISUAL OBSERVATION

Optimal control of observation processes, formulating solvability conditions in terms of ordinary differential equations

16 p2370 A72-32927

Optimization of noise impeding observation of dynamic system subjected to random perturbations, discussing optimal control based on least square estimate

16 p2371 A72-33090

Nonlinear differential equations control systems, determining conditions for observability of initial state and vector of constant parameters extended from time-varying linear systems

23 p3310 A72-44548

OBSERVATION AIRCRAFT

Results of the reliability and maintainability demonstration of the OH-58A light observation helicopter. [AHS PREPRINT 652]

17 p2491 A72-34507

OCCIPITAL LOBES

Spatio-temporal scalp mapping localization of human visual evoked responses to half field light adapted stimulation, comparing to half-field stimulation

01 p0015 A72-11185

Occipital and vertex visual evoked response relation to sensory information, perception and stimulation

06 p0763 A72-17723

Factor analysis of frontal and occipital brain regions EEG indices interzonal variability, relating autocorrelation function parameters to neuron ensembles force level

06 p0764 A72-18057

Occipital electroencephalographic response to slowly repeated aperiodic light flashes, discussing alpha wave and rhythmic afteractivity amplitude changes

07 p0916 A72-19041

Comparative EEG characteristics of frontal and occipital human brain cortex, relating psychophysiological and neurophysiological factors

08 p1116 A72-21196

Occipital EEG activity during fluctuations of perception under stabilized image and simplified stimulus conditions.

17 p2506 A72-34247

OCCLUDED FRONTS

U FRONTS [METEOROLOGY]

OCCULTATION

NT LUNAR OCCULTATION

NT RADIO OCCULTATION

NT SOLAR ECLIPSES

NT STELLAR OCCULTATION

Mariner 9 radio occultation measurements of Mars day side atmosphere, indicating isothermal temperature, surface pressures and ionosphere properties

06 p0890 A72-18345

Venus upper clouds composition from Mariner 5 occultation data analysis concerning temperature and pressure profiles, abundances, polarization characteristics, reflection and emission spectra

08 p1236 A72-21496

Periodic intensity and period variations of X ray pulsating source Cen X-3 caused by occulting binary system from Uhuru satellite observation

09 p1382 A72-22289

Model Martian atmosphere, investigating effects of departures from electron density profile spherical symmetry on radio wave phase shift in bistatic radar occultation experiment

15 p2194 A72-31440

Apparent difference in Martian night and day side surfaces atmospheric pressure based on Mariner

spacecraft occultations, noting effects of topography and electron layer

15 p2310 A72-31973

OCCUPATION

Terminal area ATC specialists and trainees job attitude and motivation from questionnaire on challenge, tasks, salary, work schedule, etc

06 p0766 A72-17865

OCEAN BOTTOM

Regulating amplifier with optoelectronic coupler for sonar sea bed layer measurements

09 p1284 A72-22239

OCEAN CURRENTS

Declinational component of geomagnetic lunar tide diurnal variations, noting effects of electric currents induced in oceans

11 p1622 A72-26103

Oceanic and atmospheric flow geostrophic adjustment by means of gravity-inertial wave propagation from initially imbalanced regions

15 p2222 A72-31278

Nonrotating Hadley cells turbulence from steady one dimensional flow instabilities in thin nonrotating differentially heated atmosphere or ocean

15 p2219 A72-32722

Geophysical fluid dynamics approach to dynamical processes in ocean and atmospheric motions, discussing equations of motion, vorticity, geostrophism, Ekman layer, Rossby waves, etc

16 p2377 A72-33336

OCEAN SURFACE

Atmospheric water vapor role in waveguide effects above sea on millimeter and centimeter propagation along transhorizon and beyond horizon paths

01 p0026 A72-10403

Electromagnetic wave propagation anomalies over sea, comparing calculated and measured field strengths based on simultaneous refractivity vertical distribution measurement

01 p0026 A72-10405

Synthetic aperture radar application to oil spill detection and monitoring for ocean surface, demonstrating feasibility

01 p0057 A72-10534

Computer programs for global disk and landmarks registration of cloud motions from satellite data for ocean weather monitoring applications

01 p0070 A72-10871

Earth surface and atmosphere remote sensing by airborne microwave measurements, noting ocean surface emissance dependence on temperature, surface conditions and pollution

02 p0207 A72-11779

Automated operational procedure for sea surface temperature determination from ITOS IR data, discussing error analysis

02 p0211 A72-11810

Synoptic sea surface temperature mapping off Eastern United States using NASA ITOS satellite IR imagery data

02 p0211 A72-11813

Remote passive microwave sensing of ocean surface wind fields, discussing sea microwave brightness temperature dependence on wind speed

02 p0214 A72-11864

Composite scattering theory mathematical model for radar backscattering cross section relation to ocean surface conditions and wind velocity

02 p0172 A72-11868

Ocean wave height measurements with nanosecond radar, using ground truths to relate radar measurements to actual sea conditions

02 p0172 A72-11869

Space TV images use in hydrospherical temperature discontinuity front location, examining cloud cover distributions over Sea of Japan

02 p0214 A72-11872

Cloud interference-free sea surface temperatures, using techniques to reduce noise effect in Nimbus IR radiometer data

03 p0385 A72-14227

Near sea level atmospheric effects on submillimeter radiation absorption in terms of dielectric coefficient theory

04 p0551 A72-15606

Microwave and IR radiometer surveillance of oil spills, discussing sources tracking, sea surface oil volume and flow rate determination and terminal location prediction

05 p0658 A72-16599

Mt/hf/vhf scattering from sea, deriving received power and spectral energy density dependence on grazing angle, frequency, range and surface impedance

06 p0770 A72-17338

Altitude dependent turbulence characteristics in atmospheric boundary layer over wavy ocean surface from wind pulsation measurements

06 p0841 A72-17624

Coherence function and phase shift dependence of free ocean surface on angular energy distribution in two dimensional wind induced wave spectrum

06 p0841 A72-17625

Image enhancement techniques for sea-ice mapping from satellite IR data, discussing gray scale contrast augmentation scheme for visual quantitative information

06 p0807 A72-17825

Remote sensing of oil pollution on water by laser induced fluorescence, using airborne spectroscopy [AIAA PAPER 71-1076]

07 p0981 A72-18822

Atmospheric turbulence measurements over sea from 30 m to 1 km, examining rms vertical velocity variations with altitude

07 p1030 A72-19104

Airborne radar measurement of 2.25 cm backscatter from sea surface, obtaining wind speed by computerized clustering data analysis techniques

09 p1296 A72-22312

Sea surface roughness mapping by airborne microwave radiometry with correction for viewing angle and atmospheric effects

09 p1297 A72-22525

HF radio wave backscatter from sea surface to obtain gravity wave structure information

10 p1438 A72-24739

Electromagnetic theory of HF radio ground wave backscattering from gently rippled sea surfaces, discussing approximations for separated scattering and receiving antennas case

10 p1438 A72-24742

Airborne IR radiometric measurements of upward vertical radiance from tropical sea surface at 10-12 microns, noting absorption coefficient dependence on water vapor

10 p1474 A72-24747

Sea foam emission and reflection characteristics at microwave frequencies from radiometric measurements, correlating data as functions of frequency and angle

10 p1475 A72-24749

Doppler spectral width of radar signal reflected from sea surface as function of illuminated region dimensions, waviness scale and emission factors

10 p1439 A72-24904

Gulf Stream surface front structure, temperature and salinity observation from ship, aircraft and satellite

11 p1620 A72-25348

Global sea surface temperature distribution determination with ITOS 1 radiation measurements and composite histogram, discussing RMS errors

11 p1620 A72-25763

Joint ocean-atmosphere model response to solar zenith angle seasonal variation, noting snow cover and ocean surface effects on lower troposphere warming

11 p1620 A72-25766

Tropical hurricane model describing initial whirlwind and self exciting wind velocity development and dependence on ocean surface temperature

11 p1682 A72-26879

Nonregular oceanic level fluctuations dependence on atmospheric pressure and tangential wind stress, deriving fluctuation spectrum from linear hydrodynamic model

11 p1682 A72-26882

Satellite altimetry based on ocean backscattering, analyzing received signal model and altitude errors

13 p1955 A72-28533

Acoustically scaled simulation of sonic boom N-wave energy penetration into ocean for flat air-water interface

13 p1951 A72-29587

Satellite anemometry for ocean waves and weather forecasting, discussing Skylab microwave radiometer-scatterometer potential design

15 p2221 A72-31239

Upward and downward radiative transfer in atmosphere-ocean system model calculated by Monte Carlo method, noting turbidity effect on radiance

15 p2224 A72-31673

Sea surface temperature determination on Nimbus 2 satellite, using three channels in medium resolution IR radiometer

15 p2224 A72-31674

Sea clutter measurement at low grazing angles by high resolution radar, noting non-Rayleigh probability density and variation with frequency, pulsewidth and polarization

15 p2196 A72-31786

Skylab radar altimeter for earth surface features remote sensing with high range resolution mode for ocean wave height determination

15 p2236 A72-31995

Sea surface wind-caused waves spectral component phase velocity measurement method based on statistical treatment of synchronous continuous records of surface elevation

16 p2417 A72-33291

Sea surface albedo for short wave solar radiation in terms of sun altitude and atmospheric transmittance, noting wind and surface roughness effects

18 p2687 A72-36642

S-band radiometer design for high absolute precision measurement.

19 p2794 A72-37252

German monograph - A proposal for a radar device with two simultaneously emitted radar frequencies which has a reduced susceptibility to disturbances produced by sea echoes

19 p2764 A72-37481

Continuous natural background sources of microseismic motions due to atmospheric and ocean loading, wind, flowing water and local disturbances [AIAA PAPER 72-819]

20 p2915 A72-39104

Nonperiodic oceanic level fluctuations dependence on atmospheric pressure and tangential wind stress, deriving fluctuation spectrum from linear hydrodynamic model

20 p2948 A72-39569

Allowance for the ocean surface temperature in monthly weather forecasts for the Northern Atlantic Ocean

20 p2949 A72-39946

Wind profile development above a locally adjusted sea surface.

22 p3202 A72-42600

Primary cosmic ray nucleon spectrum from sea-level muon spectrum and scaling hypothesis parameters.

23 p3332 A72-44458

OCEANOGRAPHY

IR scanner for Indian land areas and oceans thermal mapping, using satellite-borne multispectral photography

02 p0225 A72-11777

Orbiting multispectral scanner with independent land and oceanographic spectrometers for ground controlled dual mode operation

02 p0226 A72-11823

Geodetic and oceanographic applications of radar equipped satellites in polar orbits for measuring heights along geoid

06 p0809 A72-18259

Stationary-nonstationary temporal sampling for synoptic meteorological networks, illustrating oceanic wind speed measurements

06 p0842 A72-18436

Meteorological satellites and Gemini and Apollo earth photographs, showing annual and diurnal oceanographic, hydrologic and geologic dynamic features

06 p0810 A72-18614

Holographic weak signal enhancement technique in presence of strong noise for seismic and oceanographic applications

07 p0992 A72-20563

Color enhanced black and white IR satellite images for oceanographic applications

11 p1620 A72-25346

Gulf Stream surface front structure, temperature and salinity observation from ship, aircraft and satellite

11 p1620 A72-25348

Satellite IR telescensors in oceanography for data acquisition on ocean state, circulation, surface temperature, salinity, pollution, etc

15 p2221 A72-31238

Barbados oceanographic meteorological experiment /BOMEX/ sea air interaction program in equatorial Atlantic, using real time synchronous satellite information

15 p2225 A72-31808

Barbados Oceanographic and Meteorological Experiment to compare synoptic scale-measured vertical vapor fluxes over tropical ocean

16 p2417 A72-33169

Radar imaging systems application to cartography, geology, hydrology, biogeography, oceanography and geography, emphasizing remote sensing in cloudy environments

16 p2364 A72-33634

Physical and numerical experiments on layered convection in a density-stratified fluid.

17 p2543 A72-35764

The potentialities of space technology in relation to oceanography and surface meteorology.

19 p2790 A72-37924

Liquid n-octane, n-decane and n-undecane densities and adiabatic/isothermal compressibilities from sound velocity measurements at high pressures and 30-140 C

02 p0261 A72-12829

OCULOGRAPHIC ILLUSIONS

Sjoberg hypothesis for zero gravity produced inversion illusion mechanism in aircraft parabolic flight, noting otolith membrane deflection result of force on maculae

02 p0167 A72-11710

Lateral geniculate body neurons activity during nystagmic eye movements in cats after vestibular stimulation related to visuo-motor mechanisms counteracting illusory shifts

03 p0315 A72-13623

Contrast vision enhancement in Hermann grid with variable figure-ground ratio, using Baumgartner receptive field hypothesis

03 p0315 A72-13624

Pilot and nonpilot vestibular sensitivity to rotation, determining oculogular illusion and rotation perception thresholds

06 p0767 A72-17867

Nystagmus and illusory phenomena in man under simultaneous rotation in two perpendicular planes as function of vestibular excitation

09 p1267 A72-23593

Nystagmus eye movements relationship to oculogular illusion from test involving vestibular stimulation and visual stimuli velocity estimates

12 p1776 A72-28304

OCULOMETERS

EEG and electrooculogram recording of chimpanzee sleep, noting rapid eye movement stages

01 p0009 A72-10074

OCULOMOTOR NERVES

Optic nerve axon diameters in central and peripheral cat retina related to conduction velocity groups

03 p0315 A72-13622

Lateral geniculate body neurons activity during nystagmic eye movements in cats after vestibular stimulation related to visuo-motor mechanisms counteracting illusory shifts

03 p0315 A72-13623

Alcohol ingestion effects on tracking performance during angular acceleration, observing nystagmic eye movements and eye-hand coordination

04 p0477 A72-14474

Oculomotor accommodation and convergence as distance perception cues, showing size perception change relation to glasses adaptation

06 p0765 A72-17411

Oculomotor cue-based distance perception, discussing glasses adaptation-caused accommodation and convergence changes in stereoscopic depth perception

06 p0765 A72-17414

Phase shifts of circadian rhythm of optic nerve potentials from isolated eye of sea hare in darkness

07 p0919 A72-19534

Eye movements and dynamic visual acuity as function of tracking velocity, analyzing pursuit and saccadic component by electrooculography

13 p1912 A72-30043

An objective test for evaluating the functional state of the oculomotor system during somnolence states

19 p2756 A72-37876

Involuntary eye movements during the performance of mental tasks

23 p3260 A72-44077

Conjugate and disjunctive optokinetic eye movements in the rabbit, evoked by rotatory and translatory motion.

23 p3257 A72-44243

Eye movements evoked by collicular stimulation in the alert monkey.

24 p3371 A72-44906

ODORS

Single olfactory bulb units under cyclic stimulation, observing activity related to inhalation cycle and odor quality

05 p0617 A72-16162

OFF-ON CONTROL

Solid rocket on-off and acceleration control, discussing motor concepts, thrust modulation and potential technology applications [SAE PAPER 710767]

01 p0116 A72-10262

Orthogonal convolutional coding with on-off signaling and Viterbi decoding for synchronous multiple access communication with bound bit error rate

01 p0026 A72-10343

Time optimal bang-bang response control of two pole single phase static inverter, giving output current transient response data

01 p0008 A72-11062

Bang-bang automatic control of linear plant with discontinuous characteristics element, investigating periodic function oscillation

05 p0639 A72-15757

Logical synthesis of hybrid off-on control systems with proportional and binary variables, presenting example of fluid power, electronic and fluidic implementation [ASME PAPER 71-WA/FLCS-1]

05 p0640 A72-15919

Spacecraft precision off-on attitude control by pure jet torquing, using electronics based on control system idealized model

05 p0726 A72-16459

On-off control system stability with feedback proportional to square of velocity, determining system frequency response

06 p0793 A72-17316

Phase-plane analysis of transient response of on-off control system relative to sinusoidal inputs

06 p0795 A72-18714

Bistable hydraulic servomechanisms limit cycle stable oscillations from bang-bang control and cavitation effects, discussing valve driving gear hysteresis and time lag

08 p1113 A72-22155

Loaded hydraulic cylinder response to step inputs in on-off servos with three position valves, considering cavitation effect on system natural frequency [ASME PAPER 72-AUT-A]

10 p1423 A72-25052

Nonlinear control system optimal bang-bang controls computation, noting algorithm obtained by parameter optimization

11 p1577 A72-26666

Dynamic motion analysis of digital servo system with proportional bang-bang control by trajectory mapping on phase plane

15 p2211 A72-31895

Numerical solution of an optimal control problem with a probability criterion.

17 p2534 A72-35531

OGEE WINGS

U VARIABLE SWEEP WINGS

OGO

NT OGO-A

NT OGO-B

NT OGO-D

NT OGO-E

Magnetospheric magnetic field distortions under quiet and slightly disturbed conditions, obtaining scalar intensity with OGO 3 and 5 rubidium vapor magnetometer

01 p0060 A72-10886

Bidirectional reflectance at several wavelengths from moonlit earth observations by airglow photometer on OGO-4 satellite

03 p0433 A72-13428

Earth bow shock magnetic field data correlation with Ogo 5 flux gate magnetometer, using Tidman-Northrop theory

07 p0975 A72-19145

Electric field variations during substorms - OGO-6 measurements.

24 p3396 A72-44854

OGO-A

Thermal positive ion densities measurement in outer ionosphere and magnetosphere by OGO 1 satellite, relating plasmopause distribution and magnetic activity level [AD-742186]

09 p1300 A72-23011

OGO-B

Geomagnetic survey by polar-orbiting OGO 2 and 4, discussing data acquisition and reduction results and accuracy

02 p0219 A72-12081

OGO-D

Geomagnetic survey by polar-orbiting OGO 2 and 4, discussing data acquisition and reduction results and accuracy

02 p0219 A72-12081

OGO-E

French Lyman alpha photometer experiment on OGO 5 satellite, describing geocoronal observations, extraterrestrial emission and Bennett and Encke comets hydrogen envelopes

04 p0582 A72-15684

OGO-E plasmopause crossing correlation with ground observations of Pi geomagnetic micropulsations

08 p1159 A72-21223

Electron plasma oscillations distribution upstream from earth bow shock, evaluating OGO-E plasma wave detector data

09 p1300 A72-23019

Ogo-5 observation of lower hybrid resonance noise, bursts, VLF hiss and whistlers near plasmopause during large magnetic storm

11 p1624 A72-26399

Plasma wave measurements during OGO-5 dayside magnetosphere polar cap encounters, discussing ULF magnetic field wave levels and VLF electric field amplitude ranges

13 p1950 A72-29380

Nuclear composition telescope measurements on-board OGO 5 satellite, observing presence of geomagnetically trapped carbon, nitrogen and oxygen nuclei

16 p2382 A72-32959

OGO-1

U OGO-A

OGO-2

U OGO-B

OH-6 HELICOPTER

Hughes 500 and OH-6 helicopter tail rotor cambered blades, comparing thrust and stall characteristics with symmetrical blades

14 p2072 A72-30290

OHMIC DISSIPATION

Microwave attenuation due to ohmic losses in periodic linear arrays of metallic cylinders, ribbons and slots in metallic ground plane

06 p0786 A72-18372

Joule dissipation effect on convective instability of current carrying fluid in magnetic field

10 p1522 A72-24533

Ohmic and internal friction loss minimization in stationary rotating incompressible plasmas, assuming magnetic and velocity fields as Trkal fields

10 p1524 A72-24928

Skew magnetic structure of ionizing shock waves with ohmic dissipation as dominant diffusion mechanism

11 p1618 A72-26605

Joule heating power density in NbZr superconductor hollow cylinder, estimating temperature changes and instability locations

13 p2023 A72-29855

Lighthill method for ohmic dissipation pulsation effect on sound field generated by turbulent flow of conducting fluid

14 p2141 A72-31001

Thermospheric density annual and semiannual variations due to solar heat input into ozone layer and Joule heating, discussing decomposition into Fourier terms

15 p2229 A72-32255

OHMS LAW

Electron density and temperature fluctuations coupled through Ohm law for ionizable medium, applying to MHD generators and MPD arc thrusters [AIAA PAPER 72-101]

Plasma rotation during theta pinch collapse, determining ion azimuthal velocity from fields and pressure gradient measurements via Ohms law

08 p1213 A72-21255

Ohmic law generalization in electrodynamics for electrically conductive fluid medium in turbulent motion, taking into account Hall effect

10 p1524 A72-24931

Propagation of electromagnetic disturbances and the stability of stationary states in media with a nonlinear Ohm's law

21 p3086 A72-41651

Group properties and invariant solutions of electric-field equations in the case of nonlinear Ohm's laws

21 p3086 A72-41654

OIL ADDITIVES

Solid lubricant additives effects in oils and fats, discussing molybdenum disulfide and zinc pyrophosphate solid film formation on metal surfaces under contact friction conditions

07 p1024 A72-20395

Antiwear properties of mixed anhydrides of alkyl xanthogene and phosphorus containing acids for use as oil lubricant additives

09 p1336 A72-22499

Antioxidative and antiwear action of S-containing and S-free phosphoric acid ester additives in lubricating oils

12 p1835 A72-28201

OIL EXPLORATION

Heat losses in oil wells hot liquid injections, modifying Orveanu approximation method for exact solution

04 p0597 A72-15743

OILS

NT FUEL OILS

NT LUBRICATING OILS

NT MINERAL OILS

Microwave emission characteristics of oil slicks, showing dependence on oil type, film thickness and sea state

[AIAA PAPER 71-1071] 01 p0057 A72-10533

Synthetic aperture radar application to oil spill detection and monitoring for ocean surface, demonstrating feasibility

[AIAA PAPER 71-1072] 01 p0057 A72-10534

Remote airborne sensors for sea water oil pollution surveillance in near UV, thermal IR and microwave regions

[AIAA PAPER 71-1073] 01 p0057 A72-10535

Sky light polarization, cloudiness and view angle effects on oil remote detection over water surface, describing passive radiometric techniques [AIAA PAPER 71-1075] 01 p0057 A72-10536

Oil slicks aerial photographic and multispectral scanner investigation, discussing detection effectiveness of UV, blue, green and IR imagery

02 p0226 A72-11829

Oil spills remote detection by multispectral photography, IR scanner imagery and microwave radiometry

02 p0226 A72-11830

Colorado Green River Formation oil shale extracts, determining nitrogenous compounds content with high resolution mass spectrometry

03 p0320 A72-13741

Mass spectrometric studies of solvent extractable acid methyl esters of oil shale from Colorado Green River Formation

03 p0320 A72-13742

Microwave and IR radiometer surveillance of oil spills, discussing sources tracking, sea surface oil volume and flow rate determination and terminal location prediction

05 p0658 A72-16599

Airborne optical detection of oil on water based on reflected sunlight, investigating contrast and absorption bands

05 p0658 A72-16689

Turbojet engine oil circuit contamination rate determination by spectrometric analysis, obtaining mathematical theory for data interpretation [SAE PAPER 720303]

11 p1703 A72-25567

Oil spills remote sensing in marine environment, using laser excited fluorescence for detection, identification and quantification

15 p2251 A72-32623

Remote sensing system for oil pollution spectral signature properties, analyzing UV, IR, visible light, radar and microwave data

15 p2242 A72-32624

OLEIC ACID

Negative slip reversal effect formation mechanism during friction, discussing elimination via oleic acid

08 p1181 A72-22092

Negative slip reversal effect formation mechanism during friction, discussing elimination via oleic acid as lubricant additive

17 p2559 A72-34663

OLFACTORY PERCEPTION

Single olfactory bulb units under cyclic stimulation, observing activity related to inhalation cycle and odor quality

05 p0617 A72-16162

Olfactory receptor models sensitivity, discussing threshold dependence on adsorbed odoriferous agent amount and exposure time

11 p1585 A72-26453

Amygdala projection to accessory olfactory bulb in rats, discussing main bulb, olfactory tubercle, pyriform cortex accessory bulb and amygdala relationships

11 p1581 A72-26770

German book - Somatic sensitivity, smell and taste.

22 p3145 A72-42776

Olfactory perception neurophysiological mechanism, discussing receptor cells sensory thresholds and time, temperature and humidity effects

22 p3146 A72-42782

The effect of electrical stimulation of the olfactory bulbs on the behaviour of cats and on the electrical activity of the neo- and archepaleocortex

22 p3147 A72-42960

OLIVINE

Microprobe analysis of Timmersoi hypersthene chondrite from Niger Republic, noting equilibrium between olivine and orthopyroxene at 850 C

13 p2035 A72-28751

Microprobe analysis of Murchison and Vigarano meteorites, noting fractionation processes for Ca distribution in olivines

13 p2036 A72-28752

Lunar interior temperature profile estimation from electrical conductivity distribution based on forsteritic olivine composition

14 p2153 A72-30505

Fe and Ti ion bands in lunar pyroxenes and olivines single crystals polarized absorption spectra

14 p2154 A72-30510

Temperature dependent Mg and Fe hyperfine doublets in lunar olivine, indicating slow cooling crystallization

15 p2303 A72-31302

Olivine-garnet reaction in peridotites from Tanzania.

17 p2551 A72-35937

Compositional characteristics of olivines from Apollo 12 samples.

18 p2723 A72-36063

Activity-composition relations in the fayalite-forsterite solid solution between 900 and 1300 C at low pressures.

20 p2915 A72-39178

Lunar temperature profiles from electrical conductivity profile of olivine single crystal as lunar interior material representative sample

20 p2967 A72-39179

Iron transport in chondrites - Evidence from the Warren meteorite.

21 p3104 A72-40491

OMEGA NAVIGATION SYSTEM

X ray stars atmospheric ionization effects by vlf phase tracking relative to Omega navigation accuracy, diurnal shift variations and astrophysical data

04 p0486 A72-14877

OMEGA system application to airborne long range navigation, describing aircraft position determination technique for extended flight over water without line-of-sight radio navigation aids

05 p0686 A72-16655

Omega system in short range navigation supplementing VORTAC for coverage at low altitudes in mountain areas

06 p0844 A72-17334

Omega radio navigation system lanning problem, discussing ambiguity resolution by multiple state vector Kalman filter

08 p1144 A72-20860

Loran-Omega course and track equipment /LO-CATE/ of integrated upper air meteorological sounding systems, describing radiosonde navigational aids

10 p1484 A72-25086

Radiosonde balloon tracking errors in upper atmosphere wind measurement with Loran C, Omega and radar transmitters

10 p1441 A72-25092

OMEGA navigation system - Conference, Washington, D.C., November 1971

13 p1997 A72-29180

OMEGA short term range precision for broad ocean area navigation, using four range least squares position solution

13 p1997 A72-29181

Loran/OMEGA course and track equipment /LO-CATE/ for remote object tracking by retransmission technique, eliminating search from search and rescue missions

13 p1997 A72-29182

Wind profiles determination by Locate System in connection with OMEGA navigation system as sensing device

13 p1997 A72-29183

OMEGA receiver with digital solid state circuits for remote unmanned platform positioning, discussing ship to shore tests and design features

13 p1925 A72-29184

OMEGA phase shifts in auroral region due to solar phenomena, discussing methods eliminating PCA induced errors

13 p1997 A72-29185

Navigation accuracy of corrected OMEGA close to transmitter, using aircraft flight test at 500 nm range

13 p1997 A72-29186

Polynomial surface approximation to OMEGA sky wave corrections for small computer compatible with automatic receiver

13 p1925 A72-29187

Design characteristics and in-flight performance tests of computerized airborne OMEGA receiver, noting time independent one mile accuracy

13 p1997 A72-29188

AN/ARN-99 OMEGA lane ambiguity resolution for receiver location, using multiple state vector Kalman filter approach

13 p1997 A72-29189

Sky wave correction /Swanson/ model and computer program for real time propagation prediction for airborne OMEGA system

13 p1997 A72-29190

Airborne OMEGA navigation system performance, discussing transmission facilities, three frequency receiver, flight tests and optimization of receiving antenna

13 p1998 A72-29191

Aircraft applications of composite signal OMEGA configuration with phase data combined at separate carrier with weighting coefficients, discussing advantages over uncompensated navigation systems

13 p1998 A72-29192

OMEGA navigation system in civil maritime application, discussing single frequency, composite, difference and differential configurations and sky wave corrections

13 p1998 A72-29193

OMEGA navigation system operation aboard NOAA ship Discoverer in conjunction with satellite system, noting Trans-Atlantic tracklines

13 p1998 A72-29194

FAA airborne OMEGA development program covering signal monitoring, airborne data collection and system operational evaluation

13 p1998 A72-29195

Operational advantages of low cost VLF/OMEGA digital navigation system for various aircraft types

13 p1998 A72-29196

OMEGA effect on oceanic airway safety, noting improvement over inertial navigation systems

13 p1998 A72-29197

Preproduction OMEGA aircraft receivers and antennas development and flight testing, noting signal loss problems in high noise or precipitation static environments

13 p1998 A72-29198

Aeronautical navigation/guidance standardization in conjunction with OMEGA, covering sensor and computer equipment life cycles

13 p1999 A72-29199

Polar region performance of OMEGA navigation system, noting addition of selectable grid reference, multiple parallel DR system, manual celestial computation and bearing resolver

13 p1999 A72-29200

Small aircraft navigation over 10-400 mile course segments by raw OMEGA phase information dc presentation on conventional ID-249 course deviation indicator

13 p1999 A72-29201

OMEGA receiver integration into Navy P-3C airborne computerized navigation system, describing flight test, maintainability and laboratory simulation programs

13 p1999 A72-29202

Test flights into weather at midlatitudes and tropical systems with airborne OMEGA navigation system, discussing E field and H field antennas

13 p1999 A72-29203

Subtraction circuit design for impulse noise elimination at front end of aircraft oriented OMEGA navigation system receiver

13 p1999 A72-29204

Hardware and software integration of OMEGA and LORAN C and D receivers based on hyperbolic navigation systems compatibility

13 p1999 A72-29205

Avionics equipment for signal processing onboard civil aircraft to improve flight safety, discussing uses of OMEGA navigation system and digital computers

15 p2193 A72-31178

VLF signal role in long range time dissemination, communication and navigation, comparing conventional and modern techniques with emphasis on OMEGA system accuracy

15 p2199 A72-32068

Time of delay signal information addition to OMEGA worldwide VLF navigation system by digital code applicable for clock resetting and timing for automatic data recording

15 p2199 A72-32077

The Omega navigation system - Its history, application and versatility.

17 p2578 A72-35559

OMEGA air and maritime navigation system development, test phase and application potential, discussing operational modes, propagation parameters, solar activity effects and signal loss

19 p2831 A72-37796

Implementation status of the Omega Navigation System.

22 p3203 A72-42945

Automatic transmission and application of sky wave corrections with differential OMEGA navigation, discussing test equipment, procedures and results

22 p3203 A72-42948

Application of differential OMEGA to remote environmental sensing.

24 p3421 A72-44639

Satellite relay and Omega navigation system for distress signal transmission and reception in global rescue alarm network serving ships, aircraft and spacecraft

24 p3467 A72-45134

OMNIDIRECTIONAL ANTENNAS

NT MONOPOLE ANTENNAS

NT TURNSTILE ANTENNAS

A millimeter wave receiving antenna with an omnidirectional or directional scannable azimuth pattern and a directional vertical pattern.

17 p2525 A72-34364

A polydirectional antenna in polygon reflector design with cosecant-type elevation directional diagram for providing television in the 12-GHz frequency range

21 p3029 A72-40524

Turnstile antennas polydirectional emission and polarization characteristics, discussing relationship formulation by Scott-Soo Hoo theorem

21 p3030 A72-40531

An antenna principle with universally polydirectional radiation for large spin-stabilized flight devices

21 p3030 A72-40532

Broad-band television transmitting antenna with polydirectional characteristics for the UHF-region

21 p3031 A72-40542

Horizontally polarized polydirectional or beam antenna, which is slightly out of round and consists of beam units, for television and FM radio

21 p3031 A72-40544

OMNIRANGE NAVIGATION

U VHF OMNIRANGE NAVIGATION

ON-LINE PROGRAMMING

Online identification on human describing function by iterative differential analyzer, noting application to man-machine systems and online adaptive control systems

02 p0169 A72-12661

Human neuromuscular coordination control optimization, discussing preprogrammed open-loop control with feedback monitoring loop

04 p0477 A72-14705

On-line digital spectrum analysis based on fast Fourier transform algorithm, exemplifying by plasma density fluctuations correlation

04 p0496 A72-15488

Slat-airfoil combinations aerodynamics modeled by single point vortex to represent leading edge slat, discussing on-line computer graphics program [AIAA PAPER 72-221]

05 p0603 A72-16798

Acoustic emission systems application to materials nondestructive testing, discussing single and multiple piezoelectric transducer arrays with on-line computer analysis

[SAE PAPER 720175]

06 p0819 A72-17323

Bubble chamber high energy particle tracks semiautomatic measuring device, using small on-line computer for data processing

06 p0813 A72-17438

CIRCAL-2 general purpose on-line circuit design computer program featuring multiple analysis, text editing, network representation and user-program interaction optimization capabilities

06 p0778 A72-17474

Interference rejection method for high speed analog to digital converters, noting application to on-line computer systems

07 p0948 A72-20386

Instantaneous velocity vector determination in two dimensional flow by hot-wire anemometer and on-line digital computer technique

10 p1478 A72-23877

Analog and hybrid computers automated programming, setup and checking facilities for off and on-line program preparation and debugging

10 p1445 A72-24090

Rotating analyzer astronomical photopolarimeter automation by on-line computer control system

11 p1600 A72-25695

Astronomical pointing of radio telescopes using on-line computer

12 p1793 A72-27813

Process computer technology, discussing data recognition, on-line open loop operation and system characteristics

13 p1926 A72-30051

Parameter identification of a class of multiple input/multiple output linear discrete-time systems

19 p2826 A72-38269

On-line identification of multivariable stochastic feedback systems

19 p2781 A72-38270

An interactive approach for the generation and verification of test sequences in a logic system

24 p3382 A72-44662

ONBOARD COMPUTERS

U AIRBORNE/SPACEBORNE COMPUTERS

ONBOARD EQUIPMENT

NT AIRBORNE EQUIPMENT

NT AIRBORNE/SPACEBORNE COMPUTERS

NT AIRCRAFT EQUIPMENT

NT SPACECRAFT ELECTRONIC EQUIPMENT

Pilot role in automated ATC system using onboard situation display with navigation and collision avoidance devices

06 p0844 A72-17332

Outer planets Grand Tour trajectory correction requirements, examining combined radio/onboard navigation system and delta V estimates

[ALAA PAPER 72-54] 07 p1068 A72-18947

Mars atmospheric entry experiments for Viking 1975 mission, discussing onboard neutral gas mass spectrometer and retarding potential analyzer

10 p1540 A72-24381

Onboard turbogenerator igniter operating conditions determination from fuel-air ratio obtained from nomogram

12 p1861 A72-28145

Preventive and remedial space flight safety engineering, discussing escape capsules and onboard and earth-launched rescue systems

17 p2620 A72-34427

Military transport helicopter optimum secondary power system, considering onboard auxiliary power unit, electric or hydraulic engine start system, environmental control, etc

[AHS PREPRINT 664] 17 p2494 A72-34480

A horizon sensor with a bolometer and electrooptical modulators

17 p2556 A72-35385

Area navigation and its affect on aircraft operation and systems design

[ALAA PAPER 72-754] 19 p2831 A72-38125

The on-board computer of the Astronomical Netherlands Satellite [ANSI]

24 p3382 A72-45163

Extraterrestrial electromagnetic radiation and particle flux characteristics of low and medium energy, considering onboard spacecraft measuring instruments and data processing systems

24 p3404 A72-45398

ONBOARD NAVIGATION

U NAVIGATION

ONE DIMENSIONAL FLOW

One dimensional unsteady flow in turbine engines rotating and static vane cascades, discussing vibrations propagation

02 p0202 A72-11584

One dimensional plane magnetoacoustic wave stability from synchronous flow in narrow flow gap MHD induction machine

02 p0265 A72-12263

Poincare-Lighthill-Kuo perturbation method and method of characteristics equivalence in one dimensional fluid motion due to ideal piston periodic oscillation

03 p0341 A72-13239

One dimensional Boltzmann equation with linearized small perturbation, determining secondary conditions

03 p0399 A72-14347

Similar unsteady one dimensional motion of viscous heat conducting gas due to sudden energy release at surface

[ASME PAPER 71-WA/HT-3] 05 p0743 A72-15864

Conservation equations for blast waves one dimensional nonsteady flow field, considering Eulerian space and time profiles

[ASME PAPER 71-WA/APM-1] 05 p0745 A72-15974

One dimensional two phase flow transpiration cooling through porous metals

[ALAA PAPER 72-24] 05 p0749 A72-16915

Inviscid conducting gas steady one-dimensional MHD flow, using three-dimensional phase diagram for differential equations analysis

08 p1214 A72-21646

One dimensional expansion of hot vapor and gases remaining behind meteor body

08 p1238 A72-21884

Boundary value solutions and computer programs for one dimensional laminar flame propagation equations

08 p1129 A72-22040

Electromagnetic coupling between one dimensional laminar flows of viscous conducting fluid in presence of magnetic field, noting static and dynamic efficiencies dependence on Hartmann number

10 p1519 A72-24065

Simple waves in one dimensional unsteady nonequilibrium dissociative gas dynamics, discussing internal, chemical bond and dissociation energies

11 p1616 A72-25982

Hot-wire measurement of vector velocity modulus and sign in one dimensional unsteady gas flow

12 p1806 A72-27178

Possible regimes and solutions for adiabatic one dimensional compressible gas flow in convergent and divergent ducts with friction

12 p1797 A72-27348

Numerical algorithm for Boltzmann equation solution with application to shock structure in one dimensional flow

13 p1985 A72-28617

One dimensional unsteady flow of dense magnetized plasma, investigating time evolution of temperature profile in wall layer and thermal conductivity

13 p2018 A72-29876

Pseudo-one dimensional dissociative nonequilibrium nozzle flow, presenting governing equations transformation via similarity parameter for oxygen

16 p2375 A72-32906

Nonequilibrium steady quasi-one dimensional expanding nozzle flow of chemically reacting gas mixture, using time dependent finite difference technique

[ALAA PAPER 72-684] 16 p2480 A72-34058

Theoretical study of electromagnetic coupling in the forced oscillatory regime of two one-dimensional laminar flows of a viscous and electroconducting liquid in the presence of a transverse uniform magnetic field

17 p2587 A72-34281

Steady state heat transfer in one dimensional flow involving simultaneous convective and diffusive transport via finite difference formulation

18 p2741 A72-37171

Linearized problem of one-dimensional periodic gas flow in a pipe

19 p2786 A72-37666

One dimensional stationary gas flow across normal shock wave, taking into account nonequilibrium factors and momentum, mass and energy transport

20 p2914 A72-39970

One dimensional variable slip and homogeneous model predictions of momentum flux in two phase two component low quality flow

21 p3130 A72-41179

Equations of plane potential electrohydrodynamic flow, noting jet and quasi-one dimensional flows of charged particles in curvilinear electrostatic field

22 p3210 A72-42269

One-dimensional shock waves in heat conducting materials with memory. I - Thermodynamics

23 p3314 A72-44341

ONISOTROPY

U ANISOTROPY

ONSAGER PHENOMENOLOGICAL COEFFICIENT

Discrete vortex model numerical simulation of Onsager negative temperature instability for interacting line vortices two dimensional motions

17 p2538 A72-34871

ONSAGER RELATIONSHIP

Euler-Lagrange equation construction to obtain phenomenological description of quasi-equilibrium systems in metrics, noting solution coincidence with Onsager equations

07 p1102 A72-20665

Onsager irreversibility theory extension to nonlinear constitutive relations and with allowance for inclusion of all thermodynamic variables

16 p2479 A72-33826

Negative temperatures in two dimensional vortex motion

18 p2681 A72-36669

OPACITY

Cepheid variables mass discrepancy from evolution and pulsation theories, emphasizing opacity changes, luminosity values and effective temperature

01 p0133 A72-11128

Shock tube technique for opacity measurement at high pressures in seeded hydrogen for gas core nuclear rockets

01 p0099 A72-11342

Fresnel diffraction on opaque half plane screens with statistically rough surfaces, using Kirchhoff approximation

02 p0183 A72-12755

Missing solar UV opacity from band adsorption coefficient comparison between photospheric diatomic molecules and metals and hydrogen

04 p0579 A72-15327

Energy transport within stellar structure, discussing radiative transfer and opacity relationship to mean free path of radiation

07 p1078 A72-19924

Transparent and opaque materials fracture mechanism analogies under laser beam action, determining dislocation structure

08 p1185 A72-22093

Methane contribution to thermal opacity in Uranus and Neptune atmospheres for atmospheric model synthesis

09 p1383 A72-22293

Geochemistry of lunar opaque minerals in Apollo 14 crystalline rocks, including FeNi metal, ilmenite, spinels, schreibersite, baddeleyite, fayalite and tranquillityite

10 p1538 A72-24164

Mean opacities and effective absorption coefficients measurement using wide bandwidths and path lengths

14 p2131 A72-30900

Opacity corrections of main sequence stellar models of 2.25 solar masses in terms of Cox, Carson and Watson formulas

16 p2452 A72-33130

Transparent and opaque crystal surface fracture mechanism analogies under laser beam action, determining dislocation structure

17 p2562 A72-34664

Radiative opacity and calculation of stellar models

18 p2728 A72-36766

Influence of roughness on the thermal radiation emitted by opaque surfaces - Model test

19 p2881 A72-38393

Fresnel diffraction on opaque half plane screens with statistically rough surfaces, using Kirchhoff approximation

20 p2902 A72-39061

On the influence of the opacity values on static stellar models. I - Horizontal branch stars

20 p2973 A72-39879

Mean coefficient of opacity in stellar atmosphere model calculations

21 p3110 A72-41443

OPEN PIT MINES

U MINES [EXCAVATIONS]

OPENINGS

NT APERTURES

NT IRISES [MECHANICAL APERTURES]

NT PORTS [OPENINGS]

NT SLITS

Buckling of shells with cutouts - Experiment and analysis

17 p2634 A72-35405

OPERATING SYSTEMS [COMPUTERS]

Simultaneous operation of digital computer units to reduce input times and prolong useful computer operation time

13 p1925 A72-29944

Multiprogrammed virtual memory digital computer systems analysis and design, discussing component characteristics, operating system structure and mathematical description techniques

23 p3267 A72-43987

OPERATING TEMPERATURE

Thermal resistance estimation for machine parts of heat resistant alloys under real working conditions

06 p0833 A72-18559

Metallic four-lip seal performance, discussing force cycle, mechanical spring-back, reusability at room and higher temperatures and thermal shock behavior

08 p1179 A72-21939

Cesium oxide system stable phases as sources of Cs and oxygen vapors in thermionic energy converters, increasing power and reservoir operating temperature

09 p1263 A72-22959

Semiconductor laser thermal resistance and time constant evaluation, obtaining operating temperature range and maximum attainable pulse width

11 p1647 A72-25808

Cesium oxide system stable phases as sources of Cs and oxygen vapors in thermionic energy converters, increasing power and reservoir operating temperature

17 p2498 A72-35888

Experimental technique for determination of roller bearing preload to optimize dynamic characteristics and minimize operating temperature

19 p2810 A72-38650

OPERATIONAL HAZARDS

Rotary wing and VTOL aircraft induced downwash effects on ground personnel, considering injuries, body heat loss, work capability impairment and sound pressure effects
14 p2072 A72-30425
The onboard authority of the aircraft commanding officer as provided by the 1963 Tokyo Convention
17 p2639 A72-35763
Detection of hazards associated with aerospace operations.
23 p3287 A72-43424
Apollo/Saturn 5 spacecraft liquid propellants safety procedures in event of fire on explosion in operations building at Kennedy Space Center
23 p3343 A72-43552

OPERATIONAL PROBLEMS

Operational stability of rocket engine with combustion chamber having charge of two propellant types with different burning rate dependences on pressure
06 p0867 A72-18206
Prediction of weather induced airline operating delays, discussing fog, snow, freezing rain, thunderstorms, crosswind, headwinds, CAT, wind shear, wet runways and tail winds
07 p1030 A72-19597
Man machine automatic control system structural synthesis, treating system operation as nonlinear programming problem
09 p1291 A72-23438
Aircraft transparencies from civil operator viewpoint, considering replacement cost of flight deck and cabin windows
12 p1753 A72-27005
Hypersonic commercial aircraft operational problems, considering passenger physiology limits flight profile, sonic pollution, traffic demands, route structure, etc
14 p2073 A72-30830
International cooperation in space operations and exploration - AAS Conference, Washington, D.C., March 1971
14 p2175 A72-31135
Earth resources survey systems, discussing benefits, ground truth problem, data analysis, experimental satellites, operational system, and developing countries needs and activities
14 p2175 A72-31142
Aircraft CRT electronic displays discussing operational flexibility versus control and monitor complexities, economics, reliability and human factors
15 p2182 A72-32636
Man machine automatic control system structural synthesis, treating system operation as nonlinear programming problem
19 p2782 A72-38521
Human engineering requirements in aircraft system development.
21 p3011 A72-41423
Material properties, metallurgy, production technology and operational factors effects on machinery structural strength
23 p3347 A72-43733
The space tug orbital operations.
24 p3451 A72-45196

OPERATIONS RESEARCH

NT CRITICAL PATH METHOD
NT DYNAMIC PROGRAMMING
NT GAME THEORY
NT LINEAR PROGRAMMING
NT MINIMAX TECHNIQUE
NT NONLINEAR PROGRAMMING
NT SADDLE POINTS [GAME THEORY]
Cybernetic system effectiveness analysis with operations research and statistical theory based on stochastic treatment
11 p1608 A72-25428
Operations research and reliability - Conference, Turin, Italy, June-July 1969
13 p1961 A72-28351
An operations research approach to solve complex and unstructured problems illustrated for the case of cost-plus-award fee contracts.
17 p2639 A72-35341
Optimal design of indeterminate truss using geometric programming.
23 p3354 A72-44256
The application of operational research to transport problems; Proceedings of the Conference, Sandefjord, Norway, August 14-18, 1972.
24 p3466 A72-44576
The heavy lift helicopter - An operations research/technology/performance blend.
24 p3466 A72-44581
Applications of operational research in the airline industry.
24 p3466 A72-44583

OPERATOR PERFORMANCE

Time shortage as stress factor affecting mental activity of operator in man-flying vehicle system, discussing control signal handling efficiency
05 p0622 A72-16638
Response surface methodology /RSM/ techniques application to operator target acquisition performance

prediction, describing multivariables functional relationship by multiple regression polynomial equation
06 p0773 A72-17714
Dynamic response and functional state of human operator subjected to harmonic and random vibrational excitations, discussing biodynamic nonlinear oscillatory system model construction
06 p0770 A72-18728
Human operator role in ATC systems analysis, evaluating tasks with respect to job demands and personal fulfillment
09 p1270 A72-23127
Operator mental processes during ATC task performance, discussing work load effect, mental representation and operator algorithm definition
09 p1270 A72-23129
Operator, task level and workload effects on operative strategy, showing controllers methods modification in ATC center
09 p1270 A72-23130
Landing sequence strategy variations for individual ATC operators, indicating dependence on flight progress data variation, existing maneuvering conditions and controller personality traits
09 p1271 A72-23131
Pilot and ATC radar controller workload variations relation, discussing distraction stress effects
09 p1271 A72-23132
Time analyses of ATC approach controller tasks, developing flow diagram for task component sequencing and quantifying
09 p1271 A72-23133
ATC operator stress factor evaluation from information theory analysis of radio telecommunication information content
09 p1271 A72-23134
ATC task analysis by subjective rating of work load, discussing information processing measures, scoring method and observer rating procedure
09 p1271 A72-23135
Acceptable load standards in ATC tasks, defining moments of conscious brain control as mental load measure
09 p1271 A72-23139
Individual style differences between operators of simulated aircraft control
09 p1273 A72-23579
Operator independence test for human performance reliability modelling based on symptom detection and fault location of sonar system failure
10 p1429 A72-24002
Human operator role in space systems reliability, suggesting approaches to system design and program planning to exploit human potential [AIAA PAPER 72-228]
10 p1430 A72-24439
Pressure suit effects on psychomotor skills, testing manual dexterity, tracking skills, hand strength, steadiness and coordination for pressurized, unpressurized and shirtsleeve conditions
10 p1431 A72-24796
Optimum performance typewriter keyboard design, discussing biomechanical improvements in finger positioning facilitation, operator postural muscular strain reduction, etc
10 p1433 A72-25114
Multichannel information processing task complexity relation to operator performance for rapidly increasing input conditions
10 p1433 A72-25115
Short sleep period and oxygen breathing effects on arousal level of air traffic controller during detection task performance
11 p1588 A72-26686
Work-rest scheduling and sleep loss effect on operator performance in watchkeeping and active multiple visual tasks
11 p1589 A72-26689
Change in Naval Flight Officer operational role due to modern equipment design in weapons systems, sensors and navigational aids
12 p1775 A72-28291
Tracker recovery strategy during temporary target obscuration in pursuit tracking task, analyzing control stick movements
13 p1911 A72-29820
Compensatory tracking task performance with continuous error information feedback via visual, auditory or electrocutaneous displays
14 p2083 A72-31152
ATC systems fast-time simulation, emphasizing importance of human operator performance realistic modeling
15 p2269 A72-32097
An objective test for evaluating the functional state of the oculomotor system during somnolence states
19 p2756 A72-37876
Man machine systems operational effectiveness augmentation through human factors engineering to enhance human operator capability for parallel data processing and decision making
19 p2761 A72-38308
Visual optical system evaluation from viewpoint of human operator target detection under field conditions

in terms of resolution, transfer functions, aberration and eye movements
20 p2893 A72-39041
An assembly for studying the perceptive motor reactions of man under one-dimensional follow-up conditions
21 p3008 A72-40810
The design of a nonlinear multi-parameter model for the human operator.
21 p3011 A72-41421
A psychologist's laboratory approach to a human factors problem.
21 p3012 A72-41430
The influence of a prediction display on the human transfer characteristics.
21 p3012 A72-41432
Human operator dynamics for aural compensatory tracking.
22 p3149 A72-41950
German monograph - Control performance as a function of the transmission ratio and the Coulomb friction in the operational element.
22 p3152 A72-43052
The simultaneous action of stimulants and tranquilizers on the efficiency of a human operator
23 p3260 A72-43923
Mathematical description of a human operator in ergatic control systems
24 p3376 A72-45514
Algorithmic description of the generalized operational characteristic of a human operator
24 p3376 A72-45515
Estimate of the operational efficiency of a human operator in the follow-up mode of a closed-loop control system
24 p3376 A72-45516
Methodical aspects of studies of ergatic differential-game systems
24 p3376 A72-45517
Man in a control circuit during an information game synthesis
24 p3377 A72-45520
Experimental determination of the distribution rule for the time of failure-free operator action in the tracking mode /with pursuit/
24 p3377 A72-45521
Aircraft interception avoidance problem solved by differential game theory, discussing human operator decision making for random pursuit tracking
24 p3377 A72-45523

OPERATORS [MATHEMATICS]
Semi-Markov process sojourn time within reducible subset of states, examining asymptotic behavior with algorithm developed for linear operators disturbances
01 p0094 A72-11265
Time operator method in creep theory for orthotropic bodies, obtaining asymptotic solutions for laminar orthotropic rod and elastic plate vibration problems
02 p0289 A72-11617
Topological structure of anharmonically coupled many body problem, describing generalized Bose operators formulation
02 p0262 A72-12049
Quasi-linear tensor operator derived in form of series converging inside circle, proving theorem concerning reciprocity conditions and existence of potential
03 p0445 A72-13579
Nonhomogeneous media electrodynamics with varying permittivity and permeability, solving nonstationary equations by differential operators
03 p0389 A72-13654
Multiplication operator unidimensional perturbation by independent variable, considering spectral function density poles and branch points
03 p0382 A72-13728
Liapunov functionals synthesis for continuous system stability study, discussing linear combinations of moments of governing partial differential operators
04 p0538 A72-14671
Edge-coding operators for two dimensional binary picture black-white boundary pattern recognition suitable for use in parallel processing systems
04 p0496 A72-15203
Closure approximation in hierarchy stochastic differential operator equations in statistical mechanics
04 p0540 A72-15257
Vibration theory calculations using parametric matrix function method and associated operators
04 p0550 A72-15543
Continuous linear elastic systems characteristic vibrations differential operator eigenvalues lower bounds calculation, obtaining Green integral operator first invariant upper bound via stress function
04 p0540 A72-15706
Multidimensional time dependent flow field analysis by split finite difference operator technique, using star mesh of quadrilateral cells
05 p0609 A72-16950
Continuous linear probability functions characterization, applying to p-radonizing operators
06 p0838 A72-17554

Exact linear dielectric operator for stratified plasma streams with velocity gradients for diagnostics with electromagnetic waves

06 p0861 A72-17748

Density matrix equation solution in Liouville space, using variational procedure for laser mode equation and separable interaction method

07 p1006 A72-19670

Algebraic algorithm for reducing to state form multivariable control systems defined by linear constant differential operators

07 p0950 A72-19702

Control theory of dynamic multiconnected systems with differential operators, time lags and hereditary components

07 p0962 A72-19721

Boundary value problems in supporting surfaces vibrations theory, constructing Green function from part of differential operator

07 p1093 A72-19984

Truncation error correction based on Richardson extrapolation in finite difference approximation of nonlinear partial differential operators

07 p1101 A72-20328

Signal statistical model parameter evaluation by selection of operators in form of dimensionless quantile ratios

08 p1130 A72-20724

Natural oscillation frequencies of piecewise homogeneous L-shaped membranes, determining eigenvalues of second order elliptical differential operator

08 p1241 A72-20903

Multiple completeness characteristics of eigenvectors and adjoint vectors of polynomial operator packets in separable Hilbert space

08 p1198 A72-21096

Algebraic structures of operator nodes with reduced elements

08 p1198 A72-21097

Integral operators functions approximation for elasticity and materials aging equations, noting transcendental functions in solutions

08 p1243 A72-21239

Bergman operators construction for second order linear partial differential equations

08 p1199 A72-21288

Operator approach solution to boundary value problems with infinite defect for differential equations with deviating argument, considering Fredholm alternative validity and compressed mappings application

08 p1199 A72-21465

Ordinary differential operators eigenvalues calculation, noting numerical integration scheme for initial value problem

09 p1340 A72-22461

Generalized polynomial operators for nonlinear systems analysis, presenting local invertibility theorem

09 p1341 A72-23092

Matrix notation for replacing vector analysis in control theory by introduction of differential operators similar to Hamiltonian operator

09 p1352 A72-23369

Rayleigh-Ritz method supplement for optimal evaluation of eigenvalue bounds for semibounded self adjoint operators

09 p1353 A72-23484

Functional analytical formulation of steady creep processes, using error estimations in solution of equations with monotonic potential operators in Banach spaces

09 p1409 A72-23567

Solutions for multivalued evolution equations, considering monotonic maximal operator on finite dimensional Hilbert space

10 p1504 A72-24061

Spectral continuity conditions of linear operator, noting application to elliptical operators approximation in separable Hilbert spaces

10 p1505 A72-24070

Collision operator behavior in linear Boltzmann equation model of molecular gas in Hilbert space

10 p1510 A72-24102

Stability criteria for continuous dynamic system under parametric excitation derived by Liapunov direct method, using time dependent functionals and Rayleigh operators quotients

10 p1510 A72-24187

Markov processes for local diffusions defined by second order differential operator delta with Holder coefficients on manifold

10 p1505 A72-24201

Discrete time systems with periodic feedback gain, deriving stability conditions and Nyquist plot from linear operator spectral theory

11 p1608 A72-25318

Finite difference approximation of eigenvalues of singular differential operators in Hilbert space

11 p1678 A72-26556

Uniform Markov processes properties in Hilbert space, examining operator subgroups

12 p1836 A72-27071

Quasi-projection operators for calculating electron resonances in multitarget scattering tested on He ion autoionization system

12 p1847 A72-27385

Floating point arithmetic operators with variable dynamic range and multiple precision, noting word method for numerical data processing in computation and process control

12 p1787 A72-27666

Ergodic theorems for operators generated by Markov transients, examining asymptotic properties of stochastic learning model

12 p1787 A72-27924

Generalized Fourier transformation method for mixed boundary value problems of second order parabolic differential equation in unbounded region, noting singular differential operator

12 p1837 A72-27998

Additional operator method application to nonlinear servosystems self adjusting circuits design, presenting system simulation results

13 p1935 A72-28611

Difference scheme application to Laplace operator eigenvalues determination for regions composed of rectangles, using summary representation formulas

13 p1986 A72-29082

Weakly complete projecting convex cone, considering operators subalgebra representation

13 p1987 A72-29776

Bounded operators solution in locally convex topological vectorial spaces with meromorphic properties

13 p1987 A72-29778

Linear functional equations with constant coefficients for generalized partial derivative operators introduced in certain spaces of functions of many complex variables

13 p1987 A72-30083

Operator identities unification and classification, presenting reformulation as algebraic closure properties of graphs

14 p2125 A72-30229

Eigenvalues examination for self adjoint singular differential operators in Hilbert space by finite difference methods

14 p2126 A72-30619

Magnetized nonuniform plasmas, discussing description to all orders in electron and ion temperatures of waves by operator method

14 p2139 A72-30879

Elastic body stress concentration problem formulation as singular integral operator eigenvalue problem for half space

15 p2323 A72-31478

Iteration methods to compute inverse for nonsingular linear operator on Banach space

15 p2261 A72-31495

Boundary value problems for discrete spectrum of nonlinear ordinary differential operators on unbounded intervals

15 p2263 A72-31760

Two-magnon Raman scattering in antiferromagnets, obtaining amplitude-renormalization factor by extended Dyson-Maleev graphical approach to include corrections in transition operator M

15 p2295 A72-32548

Triple and quadruple integral equations solution in analogy to Fourier-Bessel series with mixed boundary values, using Erdelyi, Kober, Sneddon and Srivastav operators

16 p2416 A72-33663

Book - Approximation of elliptic boundary-value problems

17 p2574 A72-34622

Self-adjusting hybrid schemes for shock computations.

17 p2575 A72-34648

Means of converting the solutions of partial differential equations, obtained in operator form, to solutions of conventional form when the differential operators are expressed in general form

17 p2577 A72-35789

Relationship between finite differences and quadratures of a Green's function for a second-order ordinary differential operator

17 p2577 A72-35803

Investigation of a solution to an almost everywhere multidimensional mixed problem of a class of second-order hyperbolic equations with a nonlinear operator-containing right side

17 p2577 A72-35841

Investigation of a strongly generalized solution to a multidimensional mixed problem of a class of second-order hyperbolic equations with a nonlinear operator-containing right side

17 p2577 A72-35843

Necessary and sufficient conditions for space linear operator factorization, noting summation operators theory

18 p2704 A72-36462

Compact self adjoint differential operators in family of Hilbert interpolation spaces, applying perturbation theorem to boundary value problems

18 p2704 A72-36511

Interpolation theorems for nonlinear operators acting on locally convex spaces constituting projective and inductive limits of Banach spaces

18 p2704 A72-36513

Nonzero solutions of boundary value problems for second order ordinary and delay-differential equations.

18 p2705 A72-36617

Differential inequalities for semilinear hyperbolic operators with two independent variables.

18 p2705 A72-36618

Wyld diagram method extended to turbulence decay, considering operators expressed as integrals with kernels

19 p2785 A72-37469

Heat-conduction equations for multilayer shells

19 p2881 A72-38158

Solution of certain systems of partial differential equations in linear commutative differential operators

19 p2825 A72-38183

Problem of the eigenvalues of certain unbounded and nonsymmetrical operators and their applications to ordinary differential equations

19 p2825 A72-38195

Geophysical signal statistical model parameter evaluation by selection of operators in form of dimensionless quantile ratios

19 p2765 A72-38352

Investigation of a mixed boundary value problem for one class of second-order hyperbolic equations with a nonlinear operator-type right-hand side

19 p2827 A72-38447

Difference schemes with a divergent operator for a general system of second-order hyperbolic equations

19 p2828 A72-38854

Certain properties of differential operators with variable coefficients dependent on the domain format

20 p2946 A72-39465

Expansion of a theory of elasticity operator in a series of eigenfunctions

20 p2979 A72-39467

Group properties of ordinary linear second-order differential equations

20 p2946 A72-39471

Operator to minimize information loss, deleterious truncation and aliasing effects introduced by linear interpolation

21 p3077 A72-40104

Stability of solutions to the Hill equation with an operator coefficient having a negative mean value

21 p3074 A72-40256

Linear distributed parameter systems modal analysis and design for low sensitivity optimal feedback control, using linear differential operators

21 p3037 A72-40646

Book on nonhomogeneous boundary value problems covering Hilbert theory for trace and interpolation spaces, elliptic operators and variational equations

21 p3076 A72-41526

Book on nonhomogeneous boundary value problems for different classes of linear evolution parabolic operators, with applications to optimal control problems

21 p3076 A72-41527

Investigation with the aid of a Fourier method of the classical solution of a multidimensional composite problem for a class of hyperbolic equations of the second order with a nonlinear operator right-hand part

22 p3198 A72-41897

Certain necessary conditions for the local solvability of first-order differential equations with infinitely differentiable coefficients

22 p3198 A72-42158

Linear multistep methods for a class of functional differential equations.

22 p3199 A72-42774

Existence and uniqueness theorems of elliptic equations with eigenfunction exponential decrease at infinity and 2m order self adjoint differential operator in n-dimensional Euclidean space

23 p3307 A72-43223

Conditions for complete continuity of integral operators with stationary features in a space of continuous functions

23 p3307 A72-43224

Direct methods of qualitative spectral analysis for the singular Sturm-Liouville equation with an unrestricted operator potential

23 p3308 A72-43578

Polynomial operators for nonlinear systems analysis.

23 p3308 A72-43599

Recent results in convolution feedback systems.

23 p3276 A72-43861

Linearizing compensation for nonlinear control system transformation into linear system without approximation, discussing differential operator matrix definition and random noise effects

23 p3277 A72-43945

Cauchy problem for abstract Love equations

23 p3309 A72-44042

Dirichlet series in eigenvalues of boundary value problems for an arbitrary second-degree elliptic differential operator 23 p3309 A72-44043

Degree of approximation of functions by integral operators in an infinite domain as related to the Hausdorff metric 23 p3310 A72-44163

Boundary value problems for multidimensional hyperbolic equations with degeneration 23 p3310 A72-44487

The growth of entire solutions of differential equations of finite and infinite order. 24 p3418 A72-44725

The superharmonic functions in the axiomatics of M. Brelot associated with a degenerate elliptical operator 24 p3418 A72-44825

Dispersion relations of scalar hereditary theory of nonlinear viscoelasticity, representing integral operators as orthonormalized function series in Fourier space 24 p3459 A72-45264

OPERATORS (PERSONNEL)

NT AIRCRAFT PILOTS

NT PILOTS (PERSONNEL)

NT TEST PILOTS

Frankfurt Airport air traffic controller opinion survey of attitudes toward work and working environment 09 p1271 A72-23138

Invariant transformation of the control laws in ergatic systems 24 p3376 A72-45510

OPHTHALMODYNAMOMETRY

Eye mark recorder system for eyeball movement studies, describing operational principle and various optical systems 06 p0813 A72-17433

Ophthalmoscopic, photocalibrometric and ophthalmodynamometric examinations of test subjects visual acuity during bed rest in hypokinetic antihostatic position 23 p3255 A72-43916

OPHTHALMOLOGY

NT EYE EXAMINATIONS

Optic disk drusen and Marcus Gunn pupillary phenomenon relation to visual field defects, discussing need for calibrated perimetry and binocular field testing 07 p0933 A72-20190

Sight impairment-caused flight personnel disqualification analysis, establishing eye disease structure, sight damage preconditions and ophthalmological practice inadequacies 14 p2080 A72-30748

Eagle eye retinal image quality determination by ophthalmoscopic method, comparing to human visual acuity 15 p2186 A72-31724

An automatic measuring and recording system for clinical electro-oculography. 19 p2759 A72-37400

Quantitative determination of fluorescence within the eye without disrupting the integrity of the eyeball 20 p2893 A72-38941

The use of high refractive index glasses of low dispersion for the correction of medium and high ametropia. 21 p3084 A72-40731

Determination of corneal configuration by the measurement of its derivatives. 21 p3055 A72-40745

Ocular and induced visual effects of systemic and topical drugs in terms of eye neuroanatomy and pharmacology, stressing glaucoma therapy 22 p3150 A72-42499

OPTICAL ABSORPTION

U LIGHT TRANSMISSION

OPTICAL AMPLIFIERS

U LIGHT AMPLIFIERS

OPTICAL COMMUNICATION

Incoherent optical communications fixed receiver passband, determining SNR for pulse time and code modulation with discrete time 01 p0024 A72-10198

Information feedback application to AM laser communication system, predicting multiplicative error, background shot noise and photon arrival fluctuation effects on continuous parameter transmission [AD-736731] 01 p0025 A72-10326

Dielectric surface waveguides for millimeter and optical wavelength applications, discussing technologies, materials, fabrication and measurement 02 p0191 A72-11683

Beam guides for optical and millimeter wave communication, discussing optical pipelines and iris, lens and reflector waveguides 02 p0191 A72-11684

Imperfect timing degradation of direct detection /noncoherent/ optical system using pulse position modulation bits 02 p0174 A72-12141

Modulation/demodulation techniques for optical one-gigabit/sec intersatellite data transmission link system, comparing per-unit data costs for system selection 02 p0174 A72-12142

Optical communication technique based on fiber optic light pipes and time, space or wavelength division multiplexing 03 p0325 A72-14050

Tactical optical ground communication systems, discussing use of GaAs and carbon dioxide lasers and ultrawideband data links 04 p0485 A72-14482

Lens type beam waveguide for optical trunk communication, discussing transmission medium, terrain layout, bandwidth, terminal equipment, misalignment and multibeam application 04 p0497 A72-14483

Millimeter wave and laser space-to-space communication links comparison, considering chf system based on size, weight, power consumption and communication parameters calculations 04 p0493 A72-15609

He-Ne laser controlled frequency shift in wideband optical heterodyne communications systems with Currie low reflection mirror 05 p0668 A72-16346

Wideband electro-optic FM of laser light for optical communication, discussing modulator design, construction and testing 05 p0631 A72-16961

[AIAA PAPER 72-177]

Optical data transmission system with dielectric single-mode glass fiber waveguide, PCM semiconductor laser diode transmitter and avalanche photodiode receiver 06 p0774 A72-17770

Harmonically modulated reflected light signals phase shift and demodulation, assuming single scattering 06 p0848 A72-18047

Incoherent optical system model with photodetectors governed by Laguerre counting statistics obtaining error probabilities for comparison with Poisson counting 06 p0776 A72-18394

Soviet book on laser communication statistical theory covering coherent and noncoherent optical signal detection and discrimination, SNR optimal reception, beam scanning, etc 06 p0777 A72-18518

Gaussian rf noise effect on optical detection signal fluctuations in optically pumped frequency standards 07 p0938 A72-19013

Carbon dioxide laser IR radiation modulation by application of Stark effect in various molecular absorbers, showing absence of saturation 07 p1000 A72-19035

Mode conversion effects on Gaussian laser beam in acousto-optical modulation for optical communications 07 p1004 A72-19225

Wave propagation in thin film optical waveguides with gyrotropic and anisotropic substrates, deriving TE and TM mode conversion conditions 07 p0940 A72-19230

[AD-739120]

Picosecond pulse distortion under multimode conditions in optical fiber communication systems 07 p0940 A72-19231

High sensitivity wideband heterodyne receiver system for spaceborne and ground-based IR laser communications 07 p0940 A72-19238

Wideband laser communication for space applications, comparing carbon dioxide and Nd-YAG systems on basis of SNR 07 p0941 A72-19239

Laser communication systems for terrestrial and space data transmission, discussing line-of-sight requirements and atmospheric effects 07 p0947 A72-20225

Laser telemetry performance, considering means of noise reduction 07 p0947 A72-20256

Aberration introduced by high satellite velocities, investigating application to laser telemetry 07 p0947 A72-20258

Tracking efficiency of laser telemetry on reflector carrying satellites 07 p0947 A72-20259

Tracking efficiency calculation for laser telemetry with laser reflector on nonstabilized satellite 07 p0947 A72-20260

Optical signal heterodyne reception, discussing atmospheric distortion effects reduction 08 p1131 A72-20749

Industrial applications of lasers, considering programmable machining, distance measurement, computer memories, communication, night clubs, machine shops, aircraft manufacture and tunnel boring machine alignment 08 p1182 A72-21207

Optimal continuous recording of amplitude-phase distributions on spatial carrier frequency for light wave modulation and optical antenna simulation 08 p1132 A72-21263

Gaussian noise quasi-optimal filtering in optical communication system, evaluating signal timing accuracy in detector-amplifier circuits 08 p1136 A72-21914

Laser pulse propagation measurements on multimode glass fibers to evaluate communication potential 09 p1323 A72-22868

Material dispersion contribution to signal envelope delay distortion in weakly guiding dielectric optical fiber waveguides 09 p1314 A72-23340

Receivers for PPM optical communication and pulsed signal detection in background light, evaluating upper bounds on error probability based on photoelectron Poisson statistics 11 p1591 A72-25311

Narrow pulse optical communication digital systems with PPM and on-off keying, investigating timing error effects on bit error probabilities 11 p1592 A72-25885

Weak signals detection at visible wavelengths with background noise, examining photoelectric recording and optimal detection characteristics of receiver 11 p1596 A72-26314

GaAs injection laser optical link assembly with silicon photodiode and optical transistor, noting applicability to optical data processing 11 p1648 A72-26328

Video information transmission over planar and rectangular multimode waveguides under excitation by coherent light, calculating field distribution by geometrical optics approximation 11 p1633 A72-26330

Angular variation and spot dancing of laser beam in atmospheric propagation, obtaining standard deviation 12 p1782 A72-27493

Surface wave propagation mechanism on dielectric bodies noting compatibility with physical properties involved with optical cables for commercial transmission systems 12 p1782 A72-27556

Optical communications with FDM digital data channels, examining signal optimal reception and noise stability 14 p2084 A72-30331

Optical communications photodetector sensitivity assessed from input power ratio of ideal and actual detector, noting amplitude modulated systems 15 p2235 A72-31621

Incoherent optical communications fixed receiver passband, determining SNR for pulse time and code modulation with discrete time 15 p2195 A72-31622

Laser communication lines in atmospheric ground layer, comparing SNR for direct-reception and superheterodyne video systems 15 p2247 A72-31887

Optical PCM communication system with megabits/sec information rate based on dye laser with combined frequency-time division multiplexing 15 p2198 A72-32060

Computer simulation for performance of carbon dioxide laser heterodyne communication system with photoconductive n-type mercury-cadmium telluride detector/mixer 15 p2198 A72-32062

Coherent IR heterodyne receivers with quantum noise threshold sensitivity for laser communications and radar transmission 15 p2198 A72-32063

Time division demultiplexing technique using two channel simulation of twenty-four channel digital optical PCM communication system 15 p2200 A72-32163

Quasi-optical transmission line stability improvement, investigating pulsating light beam concept 15 p2202 A72-32663

Computer technique to synthesize binary holograms for wave beams analysis in quasi-optical communication channels 15 p2242 A72-32674

Feedback averaging procedure application to M-ary polarization modulated laser communication system, obtaining error rate improvement over systems without feedback 16 p2362 A72-33215

Variable rate optical communication schemes over earth/space link neutralizing atmospheric turbulence effects 17 p2514 A72-34415

Laser systems. 17 p2562 A72-34567

Theory of optimum M-ary laser detection. 18 p2661 A72-36683

Optical communications in Japan. 19 p2766 A72-38602

An optical communication system using envelope modulation. 19 p2766 A72-38604

Coherent optical signal superregenerative amplification in Q switched gas laser, calculating sensitivity of He-Ne laser light amplifier 19 p2813 A72-38663

- Calculation of pulsed signal amplitudes at linear filter output in optical communication systems
19 p2768 A72-38671
- Experimental effects of finite transmitter-apertures on scintillations.
20 p2932 A72-39500
- Optical communication with distant spacecraft, discussing electro-optical transducers, light sources and receivers
21 p3014 A72-40321
- Optical communication channel optimization with binary signals preamplified in optical parametric amplifier, noting amplifier gain and SNR
21 p3016 A72-40783
- Direct-detection optical receivers for angle-modulated signals.
21 p3017 A72-40858
- Receiver processing for direct-detection optical communication systems.
21 p3017 A72-40859
- Solid state laser sources, light modulators and silicon avalanche photodiode detectors for fiber optical communication, discussing performance and limitations from system design viewpoint
21 p3018 A72-40866
- Optical direct detection using avalanche devices.
21 p3018 A72-40867
- Hybrid digital transmission systems based on optical fiber waveguides and analog repeaters, noting YAG laser light modulation by phase shift keyed sub-carrier
21 p3018 A72-40868
- Injection laser and light emitting diode techniques to transmit digital data in local distribution
21 p3018 A72-40869
- Ground, satellite, terrestrial glass fiber channel and waveguide radiation systems for laser communications
21 p3023 A72-41398
- A new optical PCM communication system
22 p3186 A72-42939
- Noise resistance of optical communication lines with radio and optical AGC systems
23 p3264 A72-43770
- Automatic acquisition and tracking system for laser communication.
23 p3265 A72-44176
- Broad-band information transfer with the aid of laser-beam coupling fields
23 p3266 A72-44359
- The precise simulation of image transfer systems with the aid of an optical convolution obtained with a rotating slit of prescribed form
23 p3261 A72-44361
- Image formation using antenna properties of optical heterodyne receivers.
23 p3409 A72-44802
- Threshold characteristics of receivers with optical quantum amplifiers.
24 p3412 A72-45617
- OPTICAL CORRECTION PROCEDURE**
- Aberration correction in collimator of Schmidt spectrograph camera by changing surface geometry and grating positioning
03 p0362 A72-14358
- Self calibration of surveying cameras for three dimensional object photography without control points, using homologous ray method
06 p0815 A72-17754
- Film flatness in airborne cameras, reducing large area and short period photogrammetric deviations
06 p0815 A72-17758
- Digital image processing for TV camera noise suppression and photometric and geometric distortions calibration and rectification
08 p1172 A72-21977
- Drobyshev stereograph corrector operation for aerial photographs processing with transformed beam of stereoprojector
09 p1308 A72-22483
- Correction procedures for spherical surface transformation on plane for high altitude aerial photographs
09 p1310 A72-22948
- Holographic correction of reflecting refracting telescope objective mirror deformation aberrations, noting interferometric attachment
10 p1479 A72-24049
- Image deformation sources correction in space photography, discussing stationary and moving cameras and panoramic and complex sensing systems
12 p1809 A72-27817
- Film flatness in airborne cameras, reducing large area and short period photogrammetric deviations
12 p1809 A72-27818
- Artificial compensation holograms for complex optical objective substitution, using interference fringe image technique
13 p1958 A72-29513
- Aplanatic mirror-lens telescope systems with spherical optics, discussing isochromatic corrective lens specifications
14 p2104 A72-30497
- Error corrections for UV photometric measurements with light filters involving Bouguer formula
15 p2233 A72-31400

- Correction formulas for aerial photograph distortions due to internal refraction of light rays in separation of gas media by lateral surface of circular cylinder
15 p2277 A72-32124
- Variable area modulation dual signal recording onto single input device for coherent optical correlators
15 p2249 A72-32165
- Composite quasi-optical-broad waveguide transmission lines for millimeter and submillimeter waves with spectrum phase correction
18 p2664 A72-36106
- Polarization offset angle effect on isochromatic fringe visibility of holographic photoelasticity recordings, noting reference beam ellipticity adjustment
18 p2733 A72-36360
- Remotely sensed data processing by scanner/printer designed for photograph scanning, geometric correction and photographic printing of corrected image
18 p2691 A72-36495
- Russian book - Refraction of light rays in the atmosphere
19 p2834 A72-37448
- Lateral chromatic aberration of a double-meniscus telescope in Chile
19 p2801 A72-37919
- Experimental investigation of optical aberrations, due to temperature deformation and convective fluxes, by using a nonequal-arm interferometer with a coherent light source
19 p2801 A72-37920
- Design of a system for automatic compensation of atmospheric dispersion
19 p2801 A72-37962
- Aplanatic mirror-lens telescope systems with spherical optics, discussing isochromatic corrective lens specifications
19 p2803 A72-38326
- Computer aided analysis of hologram optical elements for aberration and dispersion reduction and recording on thick media
20 p2922 A72-39036
- Scattering from inhomogeneous cylindrically symmetric lenses with a line infinity in the index of refraction.
21 p3050 A72-40148
- Spectrophotometer linearity testing using the double-aperture method.
23 p3289 A72-43894
- A simple method of hologram transmission by using random phase reference - Principle and computer simulation.
23 p3290 A72-43949
- Motion thresholds for fovea and peripheral retina with/without correction for peripheral refractive error
23 p3260 A72-43978
- Spectrometer for absolute stellar spectrometry
23 p3290 A72-44039
- Optical alignment of planes and straight lines in space by reflecting prism systems and double ray bundles with mirror symmetry
24 p3424 A72-44768
- The influence of the atmosphere on the wavelength of the He-Ne laser and the solution of corrections of the laser interferometer.
24 p3409 A72-44771
- Optical system chromatic aberration correction relationship to focus plane position in white light based on Strehl and Hopkins criteria
24 p3425 A72-44772
- Linear corrector for laser beam intensity distribution transformation into random distribution with rectangular envelope, noting uniform energy distribution result of spatial fluctuations averaging
24 p3411 A72-45608
- OPTICAL COUPLING**
- Tunable multiple wavelength organic dye laser using optical feedback through partially transparent mirrors
03 p0367 A72-13443
- Output coupling apertures effect on carbon dioxide laser spatial coherence, considering resonator mode structure
05 p0667 A72-16001
- Passive nonlinear output coupler for mode-locked high power picosecond pulse laser, using optical Kerr effect
05 p0670 A72-17190
- Carbon dioxide lasers and GaAs electro-optical crystals 110-MHz bandwidth with coupling modulation technique
07 p1005 A72-19413
- Optical coupling effects in frequency stabilized He-Ne lasers, finding instabilities for interferometric length measurement
07 p1005 A72-19414
- Two coupled lasers theory, obtaining fields equations of motion
07 p1009 A72-20681
- Multipole network characteristics of optical link assemblies /optrons/ using photosensitive element and light source
08 p1139 A72-21057
- Steady state plane wave theory of intracavity coupled parametric oscillator upconverter, obtaining efficiency, pump power transmission and optimum output coupling
09 p1325 A72-23086
- Stable single frequency Ar laser radiation with coupled transitions emission
11 p1650 A72-26356
- Critical values for two surface optical systems of refracting imaginary case modules in coupling and lens design
11 p1691 A72-26746
- Light power coupling efficiency from GaAs injection laser into single- and multimode fibers
12 p1820 A72-27507
- Optical interaction of inhomogeneously excited semiconductor injection laser diodes, noting power efficiency increase with inhomogeneity
12 p1822 A72-27606
- Gas laser asynchronous coupling modulation, examining dependence on lasing threshold, optical spectrum and transition line shape
15 p2246 A72-31660
- Laser coupling through nonlinear gas filled absorber cell, discussing molecules mean free path
15 p2246 A72-31883
- Light emitting diodes, photodiodes and photon coupled pair temperature compensation schemes, including uses of n-p-n transistors, operational amplifier and thermistor-resistor network
15 p2247 A72-32034
- Stable single frequency Ar laser radiation with coupled transitions emission
16 p2403 A72-33709
- Variable output coupling device for far infrared laser.
17 p2562 A72-34643
- Visual aid-to-eye direct coupling, evaluating partial coherence effects on imagery optical performance by computer program
20 p2931 A72-39050
- Laser beam periodic coupler design based on radiation property reciprocity theorem, suggesting use of reflecting layers and long wavelength gratings
23 p3288 A72-43888
- Broad-band information transfer with the aid of laser-beam coupling fields
23 p3266 A72-44359
- A new method of optical coupling of two laser cavities which permits stable generation of ultrashort optical pulses
24 p3410 A72-45075

OPTICAL DATA PROCESSING

- Crop discrimination with manual and automatic computerized side-looking radar imagery analysis for microtexture pattern recognition
01 p0065 A72-10451
- Data correlation and annotation of earth resources remote survey pictorial records
01 p0065 A72-10453
- Digital computer program high speed algorithm for high resolution images geometric correction, discussing application to ERTS return beam vidicon images
01 p0065 A72-10454
- Agriculture and natural vegetation remote sensing programs, discussing dichotomous keys for side-looking airborne radar imagery analysis
01 p0056 A72-10457
- ERTS satellite image processing for multispectral scanning system, discussing distortion from geometrical properties
01 p0066 A72-10458
- Pattern recognition, invariance, redundancy and information reduction in computer aided image processing
01 p0034 A72-10475
- Two dimensional digital pictorial signal processing - Conference, University of Missouri, Columbia, October 1971
01 p0069 A72-10865
- Computer image processing for photorecognition, enhancement and calibration applications
01 p0070 A72-10870
- WINDCO interactive man-computer system for automated cloud motion tracking using precisely aligned digital ATS satellite pictures
01 p0070 A72-10872
- Transfer function compensation technique for processing sampled imagery data prior to recording on hard copy to remove degrading effect for quality improvement
01 p0046 A72-10873
- Optics for data processing, discussing magneto-optic and holographic memories in computer systems
01 p0035 A72-11315
- Remote sensor viewing angle effect on detectability of geological faults in side-looking airborne radar image data by optical spatial frequency analysis
02 p0209 A72-11791
- Sea waves energy spectra from optical Fourier analysis of ocean photographs under particular skylight irradiance
02 p0211 A72-11809

- Natural formations optical spectral reflectance optimal coding with speedy digital computer processing advantage for remote sensing of earth surface
02 p0187 A72-11811
- Aerial multispectral scanner data determination with filtering and smoothing along flight line over extended areas, deriving algorithm for cloud-shadowed area detection
02 p0212 A72-11817
- Microwave hologram CW radar system, discussing theory and flight test imagery, optical processors and alignment procedures
02 p0171 A72-11819
- Digital fast transform methods application to satellite image processing, comparing with nontransform algorithms
02 p0227 A72-11843
- Multichannel multispectral airborne IR imaging system and video data processing for U.S. geological survey
02 p0227 A72-11851
- Crop, soil and geological mapping from digitized multispectral satellite photography, discussing data processing requirements and surface features distinguishable from satellite altitudes
02 p0214 A72-11876
- Multispectral photographic data preprocessing and computerized simulation of ERTS data channel to make terrain maps, testing classification accuracy improvement possibility
02 p0215 A72-11880
- Hybrid system to process multispectral photographic data from aircraft and spacecraft sensors, assessing data quality, cost effectiveness and delay reduction
02 p0228 A72-11883
- Digital picture processing techniques for increased detail resolution, applying equidensity film methods [DFVLR-SONDDR-170]
02 p0229 A72-12018
- Improved Tiros operational satellite visual and IR scanning radiometer data processing for polar and mercator map projection
02 p0173 A72-12127
- Photosensitive MOS devices array as converters performing optical image data analysis, considering sensor sensitivity regulation
02 p0193 A72-12342
- Real time coherent optical processor of pulse Doppler radar signals with Fresnel diffraction masks for PCW target range rate determination
03 p0322 A72-13437
- Spatial pulse modulation of optical signals for use in picture transmission, cinematography and holography
03 p0358 A72-13440
- Microelectronic computer system with image data cross correlation generation for real time video pattern abstraction, discussing design and operating characteristics
03 p0329 A72-14178
- Passive airborne mapping of radiation sources, using fixed side-looking multilobed and scanning fan beam antenna pattern with coherent optical processing of film records
04 p0495 A72-14491
- Edge-coding operators for two dimensional binary picture black-white boundary pattern recognition suitable for use in parallel processing systems
04 p0496 A72-15203
- Optical image recording, transformation, readout, transmission and data processing techniques and instruments, discussing transfer function, cut-off frequency and information quantity concepts and holography
04 p0525 A72-15700
- Geodetic determination of geoid shape by computerized laser-effect space telemetry ground stations
04 p0495 A72-15724
- Photogrammetric coordinate relation of points on lunar surface and stereo panoramas of scanning photographs by Luna 9 and 13 orbiters
05 p0660 A72-15832
- Bayes theorem based iterative method for image restoration by treating degraded images as probability-processing functions, noting adaptability to computer processing
05 p0690 A72-16671
- Hough transformation for detection of lines and curves in pictures, using angle radius instead of slope intercept parameters for efficient computation
05 p0664 A72-17164
- Image data coding by adaptive block classification and quantization of source output symbols, evaluating performance
06 p0772 A72-17402
- Facsimile bandwidth compression by picture elements reduction with contrast preservation, discussing analog processing algorithm and application to weather satellite photographs
06 p0772 A72-17406
- Cellular electronic logic circuit planar array representing objects inertial motion, applying to traffic control, image processing and artificial intelligence
06 p0779 A72-17496
- Nematic liquid crystals application to real time optical data processing
06 p0847 A72-17565
- Upper bound on rate distortion function for discrete ergodic sources with memory, applying to pictorial data processing
06 p0776 A72-18390
- Spacecraft planetary approach navigation with TV camera onboard Mariner 9 giving images of Mars natural satellites against star background, discussing optical data processing programs [AIAA PAPER 72-53]
07 p1032 A72-18946
- Image processing of diagnostic echocardiogram by ultrahigh speed analog to digital converter interfacing digital computer
07 p0928 A72-19312
- Human binocular visual system fusional information processing, evaluating compensatory eye movements role in overcoming retinal image disparity
07 p0929 A72-19314
- MnBi thin films as potential storage media within holographic optical memory system having write-in reference beam for readout [CLEA PAPER 18,1]
07 p0950 A72-19399
- Strain biased transparent ferroelectric electro-optic ceramics for coherent transducers /page compositors/ for holographic memories and optical data processing [CLEA PAPER 18,6]
07 p0950 A72-19401
- Holographic information storage with reference wave modulation by Fabry-Perot interferometer, using two coherent sources
07 p0985 A72-19417
- Holography applications and processes, discussing holographic microscopy, particle analysis, high speed photography, data storage and retrieval, interferometry, nondestructive testing, etc
07 p0989 A72-20221
- Placeholder for on site wet processing of holograms in real time holographic interferometry, obtaining undistorted reconstructed image by liquid gate immersion
07 p0992 A72-20581
- Earth science and technical applications of multispectral photography and digital image processing techniques
08 p1166 A72-21334
- Planetary and lunar surface relief reconstruction from photographic imagery, discussing statistical morphological characteristics determination from relief
08 p1238 A72-21833
- Photosensitive MOS devices array as converters performing optical image data analysis, considering sensor sensitivity regulation
08 p1143 A72-21948
- Digital image processing for TV camera noise suppression and photometric and geometric distortions calibration and rectification
08 p1172 A72-21977
- Rectification process for transformation of single photograph orientation into setting value, noting reduced accidental residual errors
09 p1311 A72-22967
- Optical image filtering to simplify and facilitate automatic aerial photointerpretation processes
09 p1313 A72-23310
- Reversible photodimerization of polycyclic aromatic hydrocarbons as basis for optical information storage, discussing monomer and photodimer photosensitivity, thermal stability and refractive index specifications
09 p1314 A72-23331
- Fourier transform plane irradiance distribution for random phase data masks in holographic data recording, discussing phase quantization level change effects
09 p1314 A72-23335
- Three stage retinal model for visual monitoring method applied to computerized photointerpretation of aerial photographs
09 p1284 A72-23624
- Remotely sensed imagery data photointerpretation by gray tone texture context feature extraction, noting identification accuracy
10 p1442 A72-23812
- Radiographic image enhancement based on mathematical concepts of image convolution, Fourier transformation and spatial frequency filtering, discussing hardware and computer needs [LA-DC-72-57]
10 p1481 A72-24322
- Rapid data input system for Minsk 22 digital computers using photographic film read by photoelectric scanning system
10 p1445 A72-24495
- Image dissector system fabrication for two dimensional area scanning, applying to photograph digitization
11 p1631 A72-25688
- Camac modular instrumentation data handling system for interfacing to digital computers and hardware controllers, noting astronomical data acquisition application
11 p1601 A72-25700
- GaAs injection laser optical link assembly with silicon photodiode and optical transistor, noting applicability to optical data processing
11 p1648 A72-26328
- Computerized image analysis, establishing desirable scene characteristics for biomedical display in automated system
11 p1602 A72-26388
- Scanning photoelectric image conversion /photoanalyzing/ systems for data telemetry from remote optical sensors
11 p1634 A72-26461
- Character recognition experiments to determine attention control and temporal-spatial capacity limitation during visual information processing
12 p1768 A72-27074
- Phi-spatial filter method for straight or curved line geometric feature extraction of characters, using coherent optical system
12 p1820 A72-27494
- Optical correlation technique, converting input data into area charts with binary valued density
12 p1820 A72-27495
- Signal mathematical model in optical and acoustic pattern recognition
12 p1786 A72-27571
- Lens evaluation procedure based on optical transfer function data, discussing computer displays and merit parameters
12 p1810 A72-27936
- Dispersive optical imaging systems for chromatic aberration correction, considering broadband holographic reconstruction and generation, optical information processing and diffraction pattern achromatization
12 p1811 A72-27950
- Language description of remotely sensed image data, noting application to artificial intelligence, linguistic analysis and retrieval
13 p1924 A72-28525
- Modified run-length encoding system for text and drawing documents to obtain higher data reduction ratio
13 p1922 A72-29349
- Photoemulsion diffraction efficiency from latent holographic image signal formed during beam incidence on one or both photoplate sides
13 p1959 A72-29685
- Automatic digitizing and recording of analog information from oscilloscope photographs
13 p1959 A72-29755
- Computer controlled ground truth station for environmental agricultural aerial photographic remote sensors data processing, discussing system components, printout format and computer program
15 p2213 A72-31249
- Optimum processing structure /likelihood functional/ determination for signal sequence detection given noisy common background image sets
15 p2196 A72-31783
- Mariner 9 TV experiment image data display, processing and production for real time analysis, noting computer algorithms
15 p2236 A72-31982
- Spacecraft onboard compact low-power coherent optical data processing system, using GaAs laser and paraboloid mirror segments
15 p2248 A72-32052
- Two dimensional optical phased array beam steering based on membrane light modulation and high speed digital techniques
15 p2248 A72-32053
- Diffraction theory for large storage capacity holographic random access memory design, discussing geometric optimization of detector array and storage plate
15 p2238 A72-32159
- Coherent light signal optoelectronic processing techniques application to engineering components displacement measurement and vibration amplitude real time imaging
15 p2238 A72-32168
- Grid modulation information encoding technique for image features extraction with simple Fourier filtering to replace heuristic method
16 p2365 A72-33752
- Two Dimensional Digital Signal Processing Conference, University of Missouri, Columbia, Mo., October 6-8, 1971, Proceedings.
17 p2520 A72-34401
- Fast computational techniques for generalized two dimensional Wiener filtering.
17 p2532 A72-34402
- Bayesian recursive linear Kalman filtering technique for image estimation with noise background elimination, proposing time invariant dynamic model to provide stationary statistics
17 p2520 A72-34403
- Image enhancement by computer programs, discussing digital filtering, fast Fourier transform algorithm, data management and large matrix handling
17 p2520 A72-34404

Pattern recognition computer programs for input data preprocessing with characterization and transformation through layered recognition cone

17 p2520 A72-34405

Frequency domain design of two-dimensional finite impulse response digital filters.

17 p2532 A72-34406

Computerized photographic imagery analysis system with interactive operator controls for processing option selection in image enhancement prior to pattern identification

17 p2520 A72-34407

Computer processed image enhancement applications to spacecraft returned photoreconnaissance, discussing data transmission and resolution vs recognition and color quality

17 p2520 A72-34408

Texture measurements in earth resources data management system by automatic photointerpretation with analog and digital techniques, discussing data processing rate requirements

17 p2520 A72-34409

Computer program algorithm for processing local landmark and cloud motion data recorded by satellite observation

17 p2520 A72-34410

Automated cloud tracking using precisely aligned digital ATS pictures.

17 p2521 A72-34411

Sampled imagery transfer function compensation by inverse function, noting truncation effects on processing array SNR performance

17 p2521 A72-34412

Laser computer technology - Today and tomorrow.

III

17 p2523 A72-35186

Texture synthesis by image processing equipment consisting of digital computer and input/output unit, noting image signatures of constant parameter areas

17 p2555 A72-35338

Encoding and decoding of color information using two-dimensional spatial filtering.

17 p2556 A72-35537

Digital correlator for change detection in picture element processing with CDC 1700 computer to obtain spatial alignment accuracy

17 p2556 A72-35538

Bayesian recursive estimation by Kalman filtering for enhancement of image corrupted by additive random noise

17 p2557 A72-35539

Application of factorial analysis of correspondences to the compression of image signals

17 p2517 A72-35671

Experimental study of image coding by complex Haar and Hadamard transformations

17 p2518 A72-35673

Adaptive compression of prediction of differential coding images

17 p2518 A72-35674

Range coding application to TV and videophone images, stressing plug memory

17 p2518 A72-35675

Image processing by digital computer.

18 p2663 A72-36247

Rate distortion theory model for visual communication fidelity assessment via weighted noise measurement and K rating

18 p2657 A72-36251

Intraframe coding for picture transmission.

18 p2657 A72-36252

Video data transmission minimum channel capacity requirement calculation from rate distortion function of source with known probability distribution

18 p2657 A72-36253

Picture coding via linear transformation and quantization on subpictures with applications to monochromatic image processing

18 p2658 A72-36254

Recent developments in digital image processing at the image processing laboratory at the Jet Propulsion Laboratory.

18 p2658 A72-36255

Image processing in the context of a visual model.

18 p2658 A72-36256

Image restoration - The removal of spatially invariant degradations.

18 p2658 A72-36257

Space-variant image motion degradation and restoration.

18 p2658 A72-36258

Inverse filtering for linear shift-variant imaging systems.

18 p2658 A72-36259

Role of recursive estimation in statistical image enhancement.

18 p2658 A72-36260

Data structures and computational organization in digital image enhancement.

18 p2658 A72-36262

Computational algorithms compared for spatial frequency image filtering, considering tradeoffs between direct convolution and fast Fourier transform under equal point-spread functions assumption

18 p2658 A72-36263

Generalized multi-dimensional sampling theory and applications in optical systems.

18 p2672 A72-36333

Digital techniques for image data processing and analysis, discussing data sampling, conversion, computer implementation, image matching, etc

18 p2664 A72-36490

Coherent optical terrain-relief determination using a matched filter.

18 p2691 A72-36491

Epipolar scanning to convert image correlation from two dimensional to one dimensional task for application to photogrammetric automation

18 p2691 A72-36492

The image-processing system for the Earth Resources Technology Satellite.

18 p2674 A72-36496

The precision-processing subsystem for the Earth Resources Technology Satellite.

18 p2674 A72-36497

A new computer-assisted stereocomparator.

18 p2664 A72-36499

Resolution of optical-memory matrices prepared from photochromatic materials when using a focused beam to record information

18 p2692 A72-36658

Geometrical study of the shape and orientation of the tail of Comet Bennett /1969/

18 p2728 A72-36764

Error reduction in digitally generated holographic memories via parity sequence interlacing with true data sequence for spectrum shaping

19 p2796 A72-37581

Synthetic aperture radar data processing via tilted plane optical system, explaining technique in terms of holographic analogy

19 p2796 A72-37584

Experimental investigation of direct quasi-optical radiovision of small objects

19 p2768 A72-38673

Optical information processing analysis for coherent optics and holography, discussing characteristic spectral bands, sampling and signal averaging

20 p2922 A72-39035

Radio astronomical event visible image generation by electro-optical processing comparing SNR performance and electronic complexity with conventional technique

20 p2904 A72-39787

New technique of image multiplexing using random diffuser.

21 p3050 A72-40145

Russian book - Principles of holography and coherent optics.

21 p3052 A72-40388

Theoretical model prediction for matched filter selectivity and noise effects on strained object deformation in optical correlation applications, comparing results with experiments

21 p3053 A72-40611

Digital computer synthesis of Fourier holograms of transparencies, noting significance to digital filtering method development for optical signal processing

21 p3054 A72-40670

A measurement of the surface strain distribution by optical differentiation method.

21 p3056 A72-41239

Light emitting diodes /LED/ materials characteristics, heterojunction band structures and optical spectral ranges, considering application to information processing

21 p3035 A72-41649

Effect of the video signal shaping mechanism in a photosensitive scanistor sensor on the optical data processing accuracy

21 p3058 A72-41735

Small-size phase holograms for binary data storage

21 p3058 A72-41744

Real time analog computation at light speed and rapid access data storage in optical data processing systems, considering coherent electro-optical instrumentation

22 p3180 A72-42713

A fast opto-electronic transducer

22 p3180 A72-42944

Suitability of the normal density assumption for processing multispectral scanner data.

22 p3157 A72-43025

German monograph - Contributions to the study of the astigmatic image.

22 p3207 A72-43067

Modeling a holographic process on a computer

23 p3287 A72-43531

Advanced optical storage techniques for computers.

23 p3288 A72-43876

Conditions for space invariance in optical data processors used with coherent or noncoherent light.

23 p3288 A72-43887

A cathode-ray tube with a semiconductor laser screen

23 p3272 A72-43925

Simplified, low-noise processing technique for photographic phase holograms.

24 p3401 A72-44804

Noise characteristics of a digital system of light-beam deflection

24 p3410 A72-45323

Viewing Phobos and Deimos for navigating Mariner 9.

[AIAA PAPER 72-927]

24 p3423 A72-45433

OPTICAL DENSITY

Laser beam deflection as temperature sensor in optically inhomogeneous medium discussing gas density and temperature gradient relations

04 p0531 A72-15136

Inverse boundary value problem of optically inhomogeneous layer nonuniform profile construction from optical field distribution

10 p1510 A72-24050

Optical correlation technique, converting input data into area charts with binary valued density

12 p1820 A72-27495

Crowded photographic emulsions, predicting granularity of multilayer sandwich as function of layers number

12 p1808 A72-27676

Whole blood flow dependence on optical density from light transmission measurement, showing photometric effects of red cell aggregation, deformation and orientation

15 p2185 A72-31639

Radiation intensity angular distribution from optically thick plane cloud layer reflection, relating photon survival probability and scattering functions

16 p2426 A72-33780

Radiant energy transfer in dispersive medium of low optical density under LTE and radiant equilibrium

16 p2427 A72-33859

Screen equidensities in aerial photograph interpretation

17 p2555 A72-35337

Optical system parameters for electrophotographic print quality, discussing aberration effect on image optical density

21 p3059 A72-41818

Phototropic borosilicate glass optical density variation by exposure to UV or blue light, considering utilization for digital data storage and/or cathode ray tubes

22 p3180 A72-42941

OPTICAL DEPOLARIZATION

On depolarization of visible light from water clouds for a monostatic lidar.

18 p2706 A72-36648

OPTICAL EMISSION

U LIGHT EMISSION

OPTICAL EMISSION SPECTROSCOPY

Ozone photolysis in UV region, determining primary products from oxygen optical emission detection using time-resolved flow system

03 p0320 A72-13398

Spectroscopic measurements of light emission from carbon dioxide positive ions and carbon monoxide ion metastable He interaction with carbon dioxide

09 p1354 A72-22667

Stimulated emission and spectroscopic properties of activated ferroelectric crystal laser, noting Stark effect

09 p1323 A72-22981

Spectroscopic device for pulsed light or plasma source temperature measurement, noting operation in 2000-4000 C range

11 p1635 A72-26468

Crystal growth, physical and spectroscopic properties and laser performance of Nd and Ho doped crystals with apatite structure

12 p1825 A72-27927

Small spectral width emission from dye laser with interference filter and quartz plate Fabry-Perot interferometer for spectroscopic investigations

14 p2110 A72-30674

Extensive air showers at zenith, measuring associated UHF radio pulses with optical Cerenkov emission receiver as trigger source

14 p2147 A72-30858

Sounding rocket observation for emission height of night airglow continuum near 6050 A, using photoelectric photometers

15 p2231 A72-32329

Spectral image formation and aberration by spherical concave grating for point light source, using geometric optics method

15 p2278 A72-32337

Ar plasma radiation dispersion by plane grating, measuring ionic spectral lines and continuous spectrum intensity variation

15 p2286 A72-32340

Large sunspot umbra high resolution spectrogram obtained by beam splitter with monochromator polarization optics, noting blends near Zeeman lines

15 p2317 A72-32775

Dissociative excitation of vacuum ultraviolet emission features by electron impact on molecular gases III - CO₂.

17 p2585 A72-34734

Aircraft and spacecraft high latitude optical measurements of magnetosphere-related emissions

discussing red arcs, IR auroras, X ray pulsations, conjugate effects, etc 20 p2918 A72-39539

High-resolution spectroscopy using magnetic-field-tuned semiconductor lasers. 20 p2933 A72-39561

Investigations on spectroscopy by nonlinear Zeeman-resonances of a multimode laser. 20 p2934 A72-39845

Experimental setup for the investigation of the spectral radiative capability of metals 22 p3175 A72-41893

Interferometric spectropolarimetry - Alternate experimental methods. 23 p3289 A72-43890

Experimental studies of injection lasers - Spontaneous spectrum at room temperature. 24 p3409 A72-44713

Gain and bandwidth properties of microwave and optical devices with isotropic active medium, investigating transmission coefficient

Anglo-Australian astronomical optical telescope construction, summarizing project organization, components and system design

Space vehicles guidance with UV optical systems, describing photometric celestial images with various receptors and different wavelength bandwidth selection

Integral image tube optical systems for far UV narrow band and broad bandpass photography from spacecraft outside atmosphere

Low birefringent orthoferrites for optical devices, considering improvement in Faraday rotation detection of magnetic domains in single crystal platelets [IEEE PAPER 10,10]

Prolate spheroidal functions application to optical system performance characteristics, discussing laser modes, signals maximal concentration, image data extrapolation, etc

Optical acoustic field recordings application to turbulent characteristics measurement for transparent media

Laser interferometer for quality control of optical parts and instruments

Photo-optical instrumentation - Conference, Tokyo, June 1970

Eye mark recorder system for eyeball movement studies, describing operational principle and various optical systems

Photo-optical techniques in biomedical data acquisition, discussing cineangiography and X ray tomography applications in cardiological research work

Two-mirror optical system to study energy dissipation in elastic systems subjected to cyclic straining and vibrations

Double beam Mach-Zehnder interferometer, discussing optical element imperfection induced degradation elimination by Moire technique

Lunar laser reflectors specifications and fabrication procedures, discussing lunar environment simulator and optical test equipment, techniques and results

Quartz crystal oscillator device for continuous monitoring and controlling thin film thickness in optical and electronic applications, noting temperature effects on crystal oscillating frequency

Binocular observation of astronomical objects, discussing binocular design of astronomical telescopes

Multiple projection assembly for topographic maps preparation by satellite photographs optical projection onto model surfaces, exemplifying by reverse lunar hemisphere

First order imagery in neighborhood of base ray transversing arbitrary optical system, discussing relationships among anamorphic nature, astigmatism and image rotation

Uniform plane wave theory of internal upconversion and frequency doubling in optical parametric oscillators

Thin organosilicon films for integrated optical circuits and devices, discussing transparency and loss characteristics and refractive index control

Optical mirrors contamination by condensation of outgassed spacecraft materials in vacuum under UV irradiation, describing test apparatus and results with various materials [AIAA PAPER 72-267]

Thin Se film for recording mode structure of 10.6 micron carbon dioxide laser emission, describing optical equipment

Temperature distribution and heat dissipation calculations for CW and pulsed laser optical elements

Optical acoustic field recordings application to turbulent characteristics measurement for transparent media of fluid flows

Book on coherent optical computers covering lens design, power sources, computation mathematics, modulation, detection, digital techniques and applications

Computer designed optical integrating devices for semiconductor laser arrays, considering diode, collection, projection and zoom parameters

Optical modeling of antenna radiation patterns from radio hologram of Fresnel region field

Optical system production acceptance test based on modulation transfer function, discussing instrument design and test philosophy

Glass choice for two lens uncemented objectives, calculating surface and aberration coefficients

Precision laser system for micromachining applications, describing optical system

Coma, astigmatism and spectral line curvature derivation for spherical mirror-concave grating assembly, calculating mounting resolution in terms of wavelength

Polarization optical method for analyzing local stress concentrations in structural members.

Application of the optical transfer function to visual instruments.

Significance of OTF methods in assessing lenses to be used with partially coherent illumination.

Multiple projection assembly for topographic maps preparation by satellite photographs optical projection onto model surfaces, exemplifying by reverse lunar hemisphere

Phase holograms wave front formation as replacement of optical elements with aspherical surfaces and multilens objectives

Optical devices to produce transmitted image rotation about axis, comparing derotation systems and roll and high-speed prisms

Optoelectronic speed control for replacing mechanical gear drives for precisely variable shaft speed ratios

Possibilities of optical elements design using phase holograms.

Visual performance when using optical instruments; Symposium, Munich, West Germany, July 21-23, 1971, Technical Papers.

Viewing stereoscopically through binocular optical systems.

Optical system parameters for electrophotographic print quality, discussing aberration effect on image optical density

Determination of optical transfer functions by Fourier transformation in spatially incoherent light

Flat optical surfaces production methods for Fabry-Perot interferometers, describing Otte polishing process and quality test methods

Experimental determination of some optical characteristics of a double magnetic prism-electrostatic mirror system

Comparison of theoretical and experimental results concerning spatial filtering in coherent optics

Noise resistance of optical communication lines with radio and optical AGC systems

Optical system chromatic aberration correction relationship to focus plane position in white light based on Strehl and Hopkin criteria

Human observation error effect on astronomical refraction calculation from time determination of solar limbs passages across optical instrument reticle

Measurement of the optical transfer function of an onboard objective in the space environment

OPTICAL FILTERS

NT INFRARED FILTERS

NT ULTRAVIOLET FILTERS

Red interference filter design for high performance prominence telescope for H alpha line observation

Feature classifying filter for pattern recognition system simulated on computer for line printed numerals

Gas filter correlation spectral analysis technique for measuring pollutant concentrations in presence of interfering gases, describing application to hydrochloric and hydrofluoric acids monitoring [AIAA PAPER 71-1049]

Correlation filters alignment for optical character recognition, discussing kinematic mounting and in position techniques

Fabry-Perot interferometers as narrow band optical filters, discussing transmission and construction for various wavelengths

Filters and color effects on lunar occultation of stars and appropriate deconvolution procedures

Optics and electronics of digitized birefringent filter solar magnetograph to isolate magnetic sensitive lines

Narrow band electrically controlled interferential polarization filter with fine tuning capability for solar physical research, discussing design and operation

Fourier transform lens design in coherent optical fielding systems

Optical birefringent networks synthesis, describing use of building blocks of polarizers, birefringent crystals and optical compensators

Eclipsing variable binary A1 Draconis BV photoelectric observations, using wideband filters

Complex filter properties of Fresnel hologram with converging beam for optical filtration of three dimensional objects in Fourier or image planes

Rhodamine 6G dye laser tuning by variable birefringence filter using lead lanthanum zirconate titanate electrooptic ceramics for wavelength selection

07 p1002 A72-19203

Photometer using rotating wedge interference filter as wavelength scanning element near 6300 Å for high altitude sounding rocket application

07 p0985 A72-19403

Gaussian noise quasi-optimal filtering in optical communication system, evaluating signal timing accuracy in detector-amplifier circuits

08 p1136 A72-21914

Passive optical shutter implementation for unidirectional emission from traveling wave ruby laser, using diffraction grating

08 p1184 A72-22037

Two dimensional optical signals Fourier transform properties and local frequency filtering methods

09 p1351 A72-22982

Multichannel signal processing system for spatial optical filters synthesized by orthogonal functions

09 p1314 A72-23342

Solid state laser with slow relaxation bleachable filter, calculating modes self synchronization probability statistics relationship to relaxation time

10 p1492 A72-24512

Laser emission spectrum broadening due to saturable dye filter bleaching, discussing amplitude and phase modulation contributions

11 p1649 A72-26341

Optoacoustic processing of large time-bandwidth signals, calculating insertion loss vs delay time

12 p1810 A72-27935

Opaque scatterers disadvantages in interferometric images recording of transparent objects obtained by double exposure holography, noting phase type diffraction gratings

13 p1958 A72-29616

Semiconducting glass filter time dependent transition, absorption coefficient and luminescent spectral dependences, using monopolised ruby laser

13 p1971 A72-29909

Error corrections for UV photometric measurements with light filters involving Bouguer formula

15 p2233 A72-31400

Spectral transmittance enhancement in Fabry-Perot narrow band light filter by wavelength shifted dielectric mirror technique

15 p2233 A72-31414

Simulated Nimbus orbital electron, proton and UV radiation effects on wide bandpass glass and narrow bandpass thin film interference filters and fused silicas

15 p2277 A72-32157

Q switched and free emission mode locking of neodymium glass and ruby lasers via liquid bleachable dye filter

16 p2400 A72-33296

Multispectral angular reflectivity effect on optimum filter combinations for spaceborne multiband photography sensing mission in visible and near IR regions

16 p2395 A72-34104

Use of amplitude filter to improve the partially space coherent diffraction of a defocused circular aperture.

19 p2833 A72-37402

Calculation of pulsed signal amplitudes at linear filter output in optical communication systems

19 p2768 A72-38671

Theoretical model prediction for matched filter selectivity and noise effects on strained object deformation in optical correlation applications, comparing results with experiments

21 p3053 A72-40611

Opaque scatterers disadvantages in interferometric images recording of transparent objects obtained by double exposure holography, noting phase type diffraction gratings

21 p3054 A72-40669

The effect exerted on pictorial-analytical measurements at the television microscope by subjective contrast enhancement with color filters

21 p3055 A72-40749

Improved holographic matched filter systems for pattern recognition using a correlation method.

22 p3177 A72-42445

German monograph - Contributions to the study of the astigmatic image.

22 p3207 A72-43067

Tilting-filter measurements in dayglow rocket photometry.

23 p3289 A72-43893

OPTICAL GENERATORS

U LASERS

OPTICAL GYROSCOPES

Single isotope He-Ne laser gyro comparison with multiisotope system, noting strong mode competition in ring laser

07 p1005 A72-19402

Laser gyro operational principles, discussing passive Sagnac and active ring laser interferometers, readout, errors due to null shift, lock-in and mode pulling, etc

07 p1007 A72-20223

Multimode ring laser gyro phase modulation theory based on oppositely directed traveling waves

09 p1324 A72-23084

Multimode ring laser gyro with intracavity phase modulation, discussing experimental results concerned with lock-in at low rotation rates

09 p1324 A72-23085

OPTICAL HETERODYNING

Absorption cell heterodyne method for nondispersive IR detection of trace gases with molecular vibrational-rotational spectrum

01 p0023 A72-10532

Gaseous pollutants remote detection by IR heterodyne radiometer with tunable lasers

[AIAA PAPER 71-1079] 01 p0080 A72-10538

Carbon dioxide laser IR heterodyne radiometer for remote sensing of atmospheric pollution

[AIAA PAPER 71-1083] 01 p0067 A72-10540

Microwave-range optical heterodyne system with magnetically tuned /Zeeman effect/ laser emissions mixing and AFC

05 p0668 A72-16345

He-Ne laser controlled frequency shift in wideband optical heterodyne communications systems with Currie low reflection mirror

05 p0668 A72-16346

Three frequency IR laser signal heterodyne detection with 40-MHz if narrow-band reception, measuring SNR

05 p0669 A72-16607

Conversion coefficients of optical heterodyne receiver mixer for various amplitude-phase distributions of interfering signal

07 p1000 A72-19012

Sensitivity of optical autodyne quantum receiver in presence of output noise, using photomultiplier signal model

07 p1000 A72-19022

Wideband IR heterodyne receiver in spatially coherent array, discussing signal conversion efficiency, beam crossover control, mixer characteristics and microwave antenna comparison

07 p0940 A72-19237

High sensitivity wideband heterodyne receiver system for spaceborne and ground-based IR laser communications

07 p0940 A72-19238

Optical signal heterodyne reception, discussing atmospheric distortion effects reduction

08 p1131 A72-20749

Sensitivity threshold of optical heterodyne receiver as function of laser radiation amplitude spectrum, using photodetector output noise

08 p1181 A72-20794

Single band optical mixer heterodyne spectrum analyzer for laser radiation image spectrum suppression

08 p1182 A72-21375

Reciprocity theorem for antenna directivity pattern measurement of optical superheterodyne receiver for carbon dioxide laser radiation

08 p1140 A72-21376

Microwave and optical quantum electronic sources for frequency standards, noting primary Cs reference and multimode laser-RF oscillator beat technique

12 p1824 A72-27867

Computer simulation for performance of carbon dioxide laser heterodyne communication system with photoconductive n-type mercury-cadmium telluride detector/mixer

15 p2198 A72-32062

Interfering beams amplitude modulation, applying optical heterodyne techniques

15 p2202 A72-32676

Microwave and optical quantum electronic sources for frequency standards, noting primary Cs reference and multimode laser-RF oscillator beat technique

16 p2403 A72-33976

IR heterodyne radiometer SNR and spectral resolution, noting application to solar physics and air pollution detection

17 p2555 A72-35196

Image formation using antenna properties of optical heterodyne receivers.

24 p3409 A72-44802

OPTICAL ILLUSION

Poggendorff illusion depth processing theory, noting noncollinear line resolution effects on projective relationships within figure

01 p0013 A72-10714

Psychophysical perceived orientation experiments on Poggendorff illusion/transversal interrupted by parallel lines/

01 p0013 A72-10717

Visual persistence and perceptual moment hypotheses for time-dependent visual illusion from viewing moving stroboscopically illuminated object

05 p0621 A72-16150

Geometric central projection properties of optical illusions, including Muller-Lyer, Zollner and Hering configurations

05 p0689 A72-16194

Anisotropic responses to dot and line visual stimuli, obtaining judgments on apparent straightness for various visual field locations and dot densities

10 p1427 A72-25183

On the apparent orbit of the Pulfrich pendulum.

18 p2653 A72-36608

Division and orientation in the vertical-horizontal illusion.

18 p2651 A72-36913

Mach band measurement by psychological compensation technique, causing band disappearance by changes in stimulus pattern luminance and brightness distribution relations

19 p2760 A72-37827

Book - Aspects of motion perception.

21 p3012 A72-41531

Visual angle and apparent size of objects in peripheral vision.

22 p3152 A72-42932

Planetary mass estimation from radar and optical observation data analysis of sun and planets

[AD-737167] 01 p0127 A72-10292

Atmospheric aerosol chemical composition analysis by nephelometer light scattering measurement of suspended particle mass concentration, visibility and size distribution and scattering-humidity relationship

[AIAA PAPER 71-1101] 01 p0058 A72-10549

Optical/electrical apparatus for measuring high brightness temperatures in 6,000-100,000 K range

01 p0068 A72-10620

Active and passive parameters correlations of solid state laser ruby crystals and Nd glass, using mechanical, thermal, chemical, optical, spectroscopic and electrical measurements

01 p0081 A72-11183

Plasma temperature and seed atom concentration in MHD generator ducts and combustion chambers by optical measurements, discussing boundary layer thickness, optical density, etc

01 p0072 A72-11218

Papers on plasma diagnostics, Volume 1, Optical techniques

02 p0263 A72-11400

Solid body surface strain field optical determination, using diffraction gratings

[SESA PAPER 1751] 02 p0199 A72-11512

Absolute gravity acceleration determination using free-falling laser interferometer apparatus with rotation-insensitive mirror at different sites

02 p0207 A72-11597

Remote sensing applications to operational weather forecasting including ground optical measurement of cloud base height and radar observation of precipitation

02 p0253 A72-11825

Classical optical measurement and holographic methods of flow field visualization, discussing operating principles, measurement sensitivity, three dimensional and depth-focusing properties

02 p0230 A72-12300

Optical visualization and probe measurements on combustion characteristics of liquid fuel in compression-ignition engine swirl chamber

02 p0271 A72-12436

Impending metal fatigue failure holographic detection by optical correlation of coherent light reflection from deformed surface structure as function of time

02 p0294 A72-12442

Optical interference measurement of various shaped elastic plates deflection and application to thermal stress problems

02 p0306 A72-12824

He abundances in gaseous nebulae by optical and radio observation, discussing hydrogen and helium recombination spectra interpretation

03 p0419 A72-13115

HCN laser amplifier gain measurement at IR wavelengths in gas mixtures by recording with pyroelectric receiver

03 p0368 A72-13667

Two photon method of measuring ultrashort pulses and nonlinear optical effectiveness of lasers in synchronized mode

03 p0369 A72-14063

Gas lasers application to precise length measurements via absorbing medium resonance determined wavelength

04 p0530 A72-14734

Digital measurement of pulsed laser energy, using planar vacuum photodiode detector with photocurrent capacitive integration and voltmeter display

04 p0530 A72-14921

Optical image recording, transformation, readout, transmission and data processing techniques and in-

struments, discussing transfer function, cut-off frequency and information quantity concepts and holography

04 p0525 A72-15700

Europe-Africa geodetic link in spatial triangulation of passive Pageos satellite, discussing laser telemetry operation

04 p0520 A72-15725

High accuracy laser reflector telemetric measurement for earth-moon distance variation in time by correlation method

04 p0495 A72-15727

Holographic measurements of dioptric powers and glass defects in thin transparent sheet under vertical or oblique parallel and divergent light

05 p0662 A72-16190

Laser interferometer for quality control of optical parts and instruments

05 p0668 A72-16191

Optical interference technique for experimental stress analysis of cracked structures, obtaining crack shape relationship to stress intensity factor

05 p0666 A72-16322

Airborne optical detection of oil on water based on reflected sunlight, investigating contrast and absorption bands

05 p0658 A72-16689

Holographic measurement for optical transfer function of lenses, considering negative black and white photographic indicator emulsion effect

05 p0663 A72-16728

Bubble chamber high energy particle tracks semiautomatic measuring device, using small on-line computer for data processing

06 p0813 A72-17438

Wide angle lenses off-axis modulation transfer function measurement, explaining extrapolation method with MTF and conversion diagrams

06 p0813 A72-17439

Optical observation program for upper atmosphere and interplanetary space investigations, discussing zodiacal light, earth atmosphere composition and stratification, interplanetary dust clouds, etc

06 p0881 A72-17927

Complete measurement in holography using complex coefficients of conversion matrix of interaction between coherent beam and recorded object

06 p0817 A72-18014

Single fiber reinforced plate initial stress distribution due to linear expansion coefficients difference between matrix and fiber, using optical polarization

06 p0836 A72-18557

Two phase flow model of water droplets velocity in air stream, using Fresnel biprism and laser differential scheme

07 p1000 A72-18940

Displacement and profile diffractographic measurement using changes in far field diffraction patterns of slit aperture between test and reference object

[CLEA PAPER 11,5]

07 p0984 A72-19390

Laser interferometers for displacement, length, gas refractivity, laser wavelength and relative object position measurements

[CLEA PAPER 15,1]

07 p1005 A72-19396

Vibrational amplitude measurement of diffuse surface by modulation of projected fringes in optical field

07 p0985 A72-19407

Gas content determination in metals by melting and vaporizing measured microvolumes using laser microprobe and magnetic mass spectrometer

07 p1006 A72-19549

Nonlinear wave propagation of laser beams in absorbing fluid media, comparing computer model calculation results with experiment on liquid carbon disulfide cell

07 p1006 A72-19837

Optical losses, reflectivity and transmissivity measurements of He-Ne laser Fabry-Perot resonator elements, using laser output power dependence on element losses

07 p1006 A72-19905

Light absorptivity measurement in low loss liquid with interferometer based on refractivity dependence on temperature change due to absorption

09 p1309 A72-22602

Refractivity measurement of pure hexagonal structure 2H SiC over visible range, determining birefringence from curve fitting of data to Cauchy dispersion equation

09 p1309 A72-22603

Optical measurement of point velocity on surface of moving solid, applying to Mylar foil accelerated by plasma gun

09 p1310 A72-22773

Vibration measurement based on moire pattern fringes motion due to line gratings respective displacement, noting high accuracy and resolution

09 p1315 A72-23388

Supersonic Ar, He and molecular nitrogen jets, determining electron temperature and concentration and atomic state population in shock waves region by spectroscopic measurement

10 p1517 A72-23837

Air pollution monitoring by remote optical sensing techniques based on light scattering measurements, noting suitability of high power laser probes

10 p1480 A72-24100

Precise optical positions of nine compact radio sources in AGK 3 catalog

10 p1536 A72-24140

Interferometric testing of optical systems, discussing test plates, Fizeau, Lloyd moire, transmission, Twyman-Green, shearing, Ronchi, scatter fringe, grazing and holographic methods

10 p1482 A72-24567

Optical method based on spectral line center intensity recording to measure plasma temperature in MHD generators channels and combustion chambers

10 p1525 A72-25111

IR refractivity measurement for atmospheric aerosol substances and sea salts

[AD-744397]

11 p1620 A72-25306

Coordinate transformation equations derivation to determine third orthogonal velocity component from measurements at common point by two rotationally displaced laser Doppler velocimeter systems

11 p1629 A72-25308

Reflecting surface roughness measurement by holographic interferometry, applying to lapped steel specimens

11 p1629 A72-25309

Light absorption and scattering factors in whole blood related to hemoglobin concentration, discussing oxygen saturation, cardiac output and pathological conditions

11 p1588 A72-26630

In situ measurement of objective lens data for high resolution electron microscope, using Bragg reflex images of crystallites with known orientation

12 p1807 A72-27528

Optical Kerr constant measurement in liquid phosphoryl chloride and toluene and glasses, noting nonlinear refractivity

12 p1823 A72-27756

Tracer particle motion behavior in laser anemometry for turbulent flow, comparing liquids with gases for accuracy

12 p1809 A72-27763

Crystal characteristics of optical detectors for direct measurement of high power laser radiation

12 p1824 A72-27874

Radial temperature and water vapor concentration profiles of radiating combustion source from optical method, using IR band model

12 p1811 A72-27945

Minor planets orbital elements determination accuracy from planets coincident optical observations

13 p2035 A72-28439

Optical measurement of crosswind from effects produced by atmospheric turbulence and wind velocity relationships

13 p1994 A72-28870

Optimal optical measurement for two dimensional object position on plane in Gaussian background noise, calculating mean square error for false identification probability determination

13 p1920 A72-29280

TV speckle pattern recording for coherent laser light measurement of mechanical vibrations in micrometer range

13 p1961 A72-30026

German monograph on optical transmission measurement interferometer with plane-parallel birefringent crystal plates covering plate combination selection based on interference pattern mathematics

15 p2233 A72-31525

Strain analysis of thin metallic films on low modulus structural substrate by light intensity measurement

15 p2325 A72-31526

Sine, square and triangular wave targets for optical transfer function measurements, comparing modulations in partial coherent light under different illumination conditions

15 p2246 A72-31613

Vehicle orientation degrees of freedom remote measurement with mounted passive devices and polarization-modulated light, discussing data reduction and system accuracy

15 p2267 A72-31780

Transient phase object high sensitivity measurement by He-Ne laser beam transmission through differential interferometer and signal detection with p-i-n photodiode

15 p2235 A72-31784

Planetary nebulae RF observations comparison with optically determined H-beta intensity for extinction coefficients

15 p2307 A72-31797

Roll angle detector for angular position measurement of two independent bodies, using optical-mechanical-electrical system

15 p2268 A72-32043

Laser Doppler velocimeter designs for atmospheric applications, discussing illuminating techniques, SNR, performance comparison and system selection

15 p2237 A72-32051

Time transfer measurement between two locations using nearly simultaneous reception times from optical pulsar signal transmission

15 p2199 A72-32076

Optical nondestructive surface flaw detection for steel plates using oblique angle illumination combined with high pass spatial filter

15 p2238 A72-32153

High energy storage laser material Nd-doped silicate oxyapatite refractivity temperature dependence characteristics measurement

15 p2249 A72-32167

Photochromic crystal materials erase mode recording characteristics measurement, using Ar laser for optical recording and readout

15 p2240 A72-32361

Optical measurements of electric fields turbulence level in gun plasma, noting compatibility with spatial Landau damping

15 p2287 A72-32409

Oil spills remote sensing in marine environment, using laser excited fluorescence for detection, identification and quantification

15 p2251 A72-32623

Optical measurement for simultaneous determination of transparent isotropic medium thermal diffusivity and conductivity

16 p2389 A72-32947

Angular measurement error for group and repetition techniques as function of observation time, deriving formulas for comparison in terms of economy and efficiency

16 p2389 A72-33030

Correlation function measurements of optical gravity center roaming of spatially limited light beams in turbulent atmosphere

16 p2364 A72-33486

Atmospheric turbulence from illuminance and intensity fluctuation measurements at focused light beam

16 p2364 A72-33488

Focused light beam intensity fluctuations measurement during passage through turbulent atmosphere, discussing random walks effects on dispersion

16 p2364 A72-33494

Radio sources reidentification in field of Coma Cluster of galaxies by Schmidt telescope

16 p2458 A72-33719

Pulsar radio and optical observations, discussing periods, pulse shapes at various frequencies and marching subpulses

16 p2460 A72-33925

Crystal characteristics of optical detectors for direct measurement of high power laser radiation

16 p2403 A72-33983

Optical timing of the Crab pulsar, NP 0532.

17 p2605 A72-34535

New orbital elements for moon and planets.

17 p2609 A72-35106

Laser and mercury lamp outputs spatial coherence measurement by speckle patterns produced with ground glass as random inhomogeneous medium

17 p2565 A72-35752

An optical method for the determination of constrained zones at crack-tips.

18 p2733 A72-36368

Ultrasonic velocity measurement by small power He-Ne laser visualization of standing waves in Fresnel diffraction region

18 p2697 A72-36416

New measurements of the polarization of photospheric light near the solar limb

18 p2727 A72-36739

Optical observation program for upper atmosphere and interplanetary space investigations, discussing zodiacal light, earth atmosphere composition and stratification, interplanetary dust clouds, etc

18 p2730 A72-37152

Correlation study of geodetic refraction effect on astronomical refraction anomalies for solar light source observation at large zenith distances

19 p2855 A72-37348

Measurement of three-dimensional refractive-index fields by holographic interferometry.

19 p2798 A72-37621

Two new methods to increase the contrast of track-etch neutron radiographs.

19 p2833 A72-37636

A program of wide scale pairs for determining the micrometer screw turn magnitude of the Pulkovo ZTL-180 wide-angle zenith telescope

19 p2802 A72-37979

Ground based optical astronomy developments, emphasizing faint objects positional observation, trigonometric parallaxes, data analysis and measuring techniques

19 p2865 A72-38477

Airborne optical measurement comparison with satellite observation for auroral emissions and particle precipitation at noon, suggesting electron precipitation role

19 p2868 A72-38738

Pulsed and repetitively Q switched ruby and Nd laser design characteristics for optical applications and holography

20 p2930 A72-39027

- Scatterplate, artificial hologram, moire and null lens methods for aspheric mirror testing for space astronomy and laser communication 20 p2922 A72-39033
- Optical measurement of wave front lens or mirror surface contours by laser unequal path interferometer combined with computer data reduction 20 p2922 A72-39034
- Three axis angular deviations measurement by flexure monitor system for spacecraft, using pulsed light sources, autocollimator and porro reflectors [AIAA PAPER 72-855] 20 p2951 A72-39106
- An analysis of the spectral scanning technique for determining the temperature distribution in a semi-transparent medium. 20 p2986 A72-39677
- Optical measurements in a pulsating flame. [ASME PAPER 72-HT-8] 20 p2926 A72-39679
- A new test of the second postulate of special relativity sensitive to first-order effects. 21 p3085 A72-41214

- OPTICAL PATHS**
- Electromagnetic wave line-of-sight propagation based on geometrical optics for different refractivity profiles above sea, noting earth surface reflection role 01 p0026 A72-10404
- Computer program for atmospheric effects on IR radiation, calculating transmission and radiance spectra for various remotely sensed atmospheric, path and target conditions 02 p0187 A72-11862

Atmospheric refractive index inhomogeneity statistics from interferometer measurements of distance-dependent phase fluctuations in near-ground horizontal optical propagation paths under turbulence conditions
09 p1354 A72-23696

Optical path calculation in ionosphere and troposphere, determining term due to astronomical refraction with respect to frequency
10 p1475 A72-24859

Ambiguity of radar phase measurement above sea within radio horizon, noting optimal relation between wavelength and optical paths difference of direct and reflected ray
12 p1784 A72-27799

Luminosity distribution in plane of image produced by radiation from plane parallel plate, taking into account rays real path
13 p1955 A72-28498

Beam trajectory distortions due to turbulent air refractive index fluctuations in optical transmission line
15 p2197 A72-31885

Turbulent divergence of laser beams along oblique atmospheric path for vertical refractive index distribution, using Markov coherence model
16 p2364 A72-33489

Design of an inexpensive, 30 cm diameter, long path difference interferometer.
17 p2553 A72-34640

Optical path meter for contactless measurement of body mechanical deflection
17 p2556 A72-35442

Interferometric investigation of the phase fluctuations of coherent optical emission in the atmosphere
22 p3186 A72-42661

Determination of the refractive index of air by a dispersion method based on the use of radio waves
22 p3155 A72-42722

Study of target edge response viewed through atmospheric turbulence over water.
23 p3289 A72-43896

Transmission losses in glass and plastic single mode and liquid core optic fibers for long distance data links and image transmission
24 p3380 A72-45252

OPTICAL POLARIZATION

Nonlinear photoelasticity, elastoplasticity and creep problems studies by optical polarization methods, comparing transparent model and photoelastic coating techniques
02 p0289 A72-11613

Narrow band electrically controlled interferential polarization filter with fine tuning capability for solar physical research, discussing design and operation
03 p0357 A72-13369

Stress-strain state determination for plane orthotropic bodies by optical polarization method, discussing numerical methods for stress and strain tensor components
03 p0445 A72-13580

Optical birefringent networks synthesis, describing use of building blocks of polarizers, birefringent crystals and optical compensators
04 p0548 A72-14737

Q switched high power laser pulse compression based on optical polarization change on passing through Kerr-active medium
07 p1000 A72-19038

Pulsed ruby laser mode structure effects on quartz damage, noting dependence on propagation and polarization directions with crystal
07 p1001 A72-19196

Optical resonators using lossy anisotropic metal film linear polarizer for oscillation mode selection [CLEA PAPER 6.3]
07 p1004 A72-19382

Scorpius X-1 linear optical polarization, comparing intrinsic to interstellar theories
08 p1235 A72-21390

Electro-optical Q switching of solid state laser sources without linear energy polarization in optical resonator
09 p1326 A72-23422

Polarization modes of anisotropic optical traveling wave resonator using half wave plate and Faraday rotation cell
12 p1824 A72-27870

GaAs laser array Fabry-Perot structure to produce uniform TE polarization in emitted light
12 p1827 A72-28223

Vehicle orientation degrees of freedom remote measurement with mounted passive devices and polarization-modulated light, discussing data reduction and system accuracy
15 p2267 A72-31780

Coherence narrowing during multiple scattering of resonance radiation in atomic vapor, treating polarization transfer in terms of classical tensors
15 p2281 A72-32221

Photoelasticity with stress induced optical activity analysis using Stokes parameters, discussing rotational effects in scattered light problems
15 p2277 A72-32235

LF spectrum of depolarized light scattered from liquids composed of molecules with anisotropic polarizabilities, noting sharp line spectra with VH shear doublets
16 p2429 A72-32951

Mathematical models for depolarized light scattering by particle pair in gas, noting molecular collisions effect
16 p2423 A72-32952

Radio source Oj 287 photometric and polarimetric observations, noting optical intensity and plane polarization variability
16 p2452 A72-33134

Feedback averaging procedure application to M-ary polarization modulated laser communication system, obtaining error rate improvement over systems without feedback
16 p2362 A72-33215

Optical circular polarization search in quasars, Seyfert galaxies nuclei, BL Lac and OJ 287
16 p2456 A72-33472

Bidirectional optical scattering from dielectric materials of various pigmentation and surface roughnesses, obtaining cross section data to determine angular, spectral and polarization behavior
16 p2427 A72-33839

Polarization modes and phase shifts of normal oscillation modes in anisotropic optical traveling wave resonator with Brewster winders half wave plate and Faraday rotation cell
16 p2403 A72-33979

Poincare sphere application to polarimetry and two- and three-dimensional photoelasticity by scatter light photoelastometry
18 p2691 A72-36381

Optical polarization effects in a gas laser.
18 p2697 A72-36487

Brightness matrix of a flat powdered layer with opaque particles in the single-scattering approximation
19 p2836 A72-38783

Polarization effect of attenuation of opposed-wave competition in ring lasers
20 p2932 A72-39412

The redistribution function of polarized light in the presence of collisions and of small magnetic fields - Discussion of the polarization of the solar line Ca I 4227 A.
20 p2971 A72-39756

Influence of polarization of laser fields on nonlinear interference effects
21 p3062 A72-40405

Quartz and calcite spectral emission polarization calculation from Fresnel equation, comparing results with field measurements with broadband IR radiometer
21 p3097 A72-40603

Dielectric coating effects on millimeter wave diffraction pattern of gratings, noting sharp anomalous dips in transmission intensity for P and S polarizations
21 p3031 A72-40604

Skylight intensity, polarization and airglow measurements during the total solar eclipse of 30 May 1965.
22 p3170 A72-42371

Interstellar circular polarization.
23 p3336 A72-43556

Discovery of interstellar circular polarization in the direction of the Crab Nebula.
23 p3336 A72-43557

Approximate formulae for mixed modulated coherent and partially polarized chaotic light.
24 p3425 A72-44769

Analysis of the polarization properties of TW laser emission
24 p3411 A72-45497

OPTICAL POLARIZATION

High performance aerospace vehicles transparent materials, discussing glasses, plastics and optical coatings, solar properties, refractive index, UV transmittance and radiation damage susceptibility
01 p0091 A72-10765

Fused silica optical transmittance at elevated temperatures during high energy electron bombardment, noting optical absorption at short wavelengths
01 p0103 A72-11357

Optical distortion induced by heated windows in high power laser systems, deriving figures of merit for window materials
02 p0237 A72-11470

Air holography interferometry for acrylic model materials inspection and selection for optical flatness, comparing with photoelasticity [SESA PAPER 1941]
02 p0224 A72-11516

Birefringent filter theory and optical properties, discussing transmission profile and error sources
03 p0352 A72-12947

Rocket plume contamination effect on transmitting and reflecting materials optical properties, noting predominant absorption and scattering effects [AIAA PAPER 72-56]
05 p0750 A72-16967

Thermodynamic equilibrium, transport and optical properties and quantum effects in nonideal plasmas, using Monte Carlo method
05 p0700 A72-17223

Handbook on lasers and optical technology covering gas, dye, liquid, injection and insulating crystal lasers, materials, sources, transmission, hazards and holographic recording
06 p0826 A72-17945

Inorganic photochromic and cathodochromic recording materials in single crystal and powder forms, considering color change properties during light or electron beam exposures
06 p0866 A72-17950

Hf diffusion type chemical laser fluid dynamic and optical properties, discussing computerized numerical analysis [AIAA PAPER 72-146]
07 p1001 A72-19063

Optical properties of paraboloid-hyperboloid mirror X ray telescopes evaluated by ray tracing method, noting resolution and focal plane curvature approximation
07 p0985 A72-19405

Temperature and physical state effects on rubidium optical constants at 0.3-2.4 microns
07 p1050 A72-20522

Optical transmission, reflection and absorption of thin rubidium films for parallel and perpendicularly polarized monochromatic radiation, investigating volume and surface plasma oscillations
07 p1050 A72-20523

Optical and electrical characteristics of gas discharge plasma in pulsed radiation sources as function of power dissipation
07 p1047 A72-20611

Band averaged optical constants and IR characteristics of thin plastic films with/without metal substrate, using transmittance measurements [ASME PAPER 70-WA/HT-15]
08 p1205 A72-20874

Semitransparent particle model of Martian surface for reflective power at various incidence and reflection angles, discussing packing density and optical parameters
08 p1231 A72-21126

Optical properties changes of Al alloys containing impurities, noting band structure modification and tendency toward free electron response
08 p1186 A72-21593

Brightness distribution and phase dependence measured for spheres with different colors and roughness for Mars surface optical parameters model validity
08 p1238 A72-21830

Turbulent earth atmosphere optical inhomogeneities determination from solar limb image characteristics in motion pictures of solar disk edge
09 p1305 A72-22233

Recrystallization effects on thin ZnTe film structure, electrical and optical properties
09 p1367 A72-22421

Electron phonon coupling and IR optical constants relationship to superconductivity in transition metals
09 p1369 A72-22566

Optical properties of Gd polycrystals in IR, explaining frequency dependence of complex permittivity
09 p1372 A72-23040

Optical simulation of plastic strain distribution with models prepared from organic glass, investigating birefringence effect
09 p1406 A72-23182

Optical properties of nematic and cholesteric liquid crystals, noting application for visualization and display systems
09 p1373 A72-23598

Optical properties of nuclei of normal, Seyfert and N-type galaxies and quasars from spectrographic and photometric observations
10 p1534 A72-23902

Cosmic epoch dependent evolution of radio sources with identified optical counterparts
10 p1535 A72-23912

Ground based IR astronomical telescope detectors, relating F number and optical requirements to near, far, and intermediate IR observation

10 p1481 A72-24249

Selective surfaces and coatings for solar energy conversion systems, discussing semiconductor photoconverters, white-black surfaces, cooling systems and optimal optical properties

10 p1422 A72-24315

Zinc oxide as refractory material, discussing optical, elastic and electro- and photoconductivity properties

10 p1501 A72-24732

Russian book on radar studies of moon covering lunar motion, dimensions, mass, density and surface layer thermal and optical properties

11 p1720 A72-26047

Electrostatic rocket exhaust materials deposits effects on solar cells optical, thermal and electrical performance characteristics, using optical thin film theory

[AIAA PAPER 72-447]

11 p1578 A72-26184

Dielectric and optical constants of p-type GaSb single crystals, interpreting singularities by energy bands diagram

11 p1689 A72-26485

Impact glass-like objects as evidence of meteoritic origin of Lomar Crater /India/, discussing physical, chemical and optical properties

11 p1723 A72-26521

Two dimensional characteristic and distribution functions of monomode laser radiation random processes with nonlinear optics application

11 p1651 A72-26716

Optical transparencies - Conference, London, June 1971

12 p1752 A72-27001

Optical quality requirements for aircraft transparencies, considering resolution, haze, halation, light transmission, distortion, binocular deviation, double images, scratches and inclusions

12 p1832 A72-27003

Optical qualities of aircraft windshields and direct vision windows, considering color, light transmission, faults, heating, distortion, inside reflections and double images

12 p1832 A72-27004

Piezoelectric quartz crystal microbalance for material outgassing and optical element contaminant film measurements

12 p1806 A72-27043

Solar absorptance and thermal emittance of thermal control coatings contaminated by thruster exhaust in vacuum environment

[AIAA PAPER 72-263]

12 p1846 A72-27865

Monoenergetic electrons and low energy protons radiation damage effect on Si solar cell electrical and optical properties

12 p1759 A72-28046

Statistical Coulomb potential and thermodynamic, kinetic and optical properties of nonideal dense plasma

12 p1853 A72-28173

Light propagation patterns in absorbing and scattering medium with radiation density dependent optical properties

13 p2002 A72-28510

Light scattering media optical characteristics measurement techniques and equipment

13 p1955 A72-28515

Radiation transfer equations solved in isotropic light scattering approximation, relating transfer function to motion picture film optical properties

13 p1955 A72-28519

Instrument to measure thermodynamic, electrical and optical properties of gases and liquids, describing thermostat for 83-923 K range

13 p1956 A72-28633

Experimental method to directly determine frequency-contrast and phase-frequency characteristics of optical objectives from boundary curve

13 p2003 A72-28798

Au film optical refractivity, absorptivity and transmittance in visible and UV ranges of Au-GaAs and Au-GaP photoelectric converters

14 p2141 A72-30224

Quantum kinetic equation for monatomic and molecular gases optical characteristics calculation, considering spontaneous emission spectrum of atoms

14 p2110 A72-30358

Schlieren method for qualitative study of optical inhomogeneities produced by temperature field in cylindrical solid body

14 p2106 A72-31162

Temperature dependent optical constants of Ti and W crystal surfaces cleaned by ion bombardment in ultrahigh vacuum

15 p2274 A72-31376

Heavily doped ruby optical properties review, discussing N-lines, absorption and fluorescence spectra, interactions with phonon and photon fields and ionic reactions

16 p2441 A72-33522

Influence of the transverse distribution of pumping on the energetics and the profile of thermo-optical distortions in a rhodamine 6G laser

17 p2563 A72-35302

Attachment for studying optical properties of highly cooled crystals in the vacuum ultraviolet region

17 p2555 A72-35309

Determination of the parameters of a satellite camera

17 p2556 A72-35360

Determination of the quality of the reflective properties of mirrors used in photoelectric converter assemblies

17 p2498 A72-35510

Wave-guiding properties of stripe-geometry double heterostructure injection lasers

18 p2698 A72-36981

Investigation of the optical and pyrometric behavior of surface coatings for the Helios probe

19 p2880 A72-37493

Effect of optical constants on the energy distribution in homogeneous particles illuminated by a parallel beam of light

19 p2812 A72-38216

Constitutive equations and optical yielding of anisotropic perfectly plastic dielectrics

19 p2878 A72-38799

Application of optimization techniques over flat surfaces, determining optical constants of thin films

20 p2959 A72-39052

Some optical properties of liquid crystals

20 p2961 A72-39850

Application of matrix formalisms to the specification of light polarization changing systems

20 p2928 A72-40025

Photographic material characteristics for adequate diffraction efficiency and contrast and noise levels and acceptable nonlinear distortions of holograms, noting optical transfer function optimization

21 p3052 A72-40389

Output power saturation with increasing discharge current in powerful argon CW lasers

21 p3062 A72-40404

Study of the diffusing properties of the retina - Application to the optical system of the eye

21 p3007 A72-40736

Corrugated image screens advantages over flat screens, determining light intensity per corrugation, maximum viewing angle and reflection factor

21 p3055 A72-40743

Pure and compensated Ge and Si far IR spectral properties at liquid He temperatures for bolometer detector application

21 p3013 A72-40822

Optical properties of transmission echelette high-pass filters

21 p3055 A72-40823

Space applications of Fabry-Perot modulator as alternative to mechanical devices, presenting optical and electrical performance data for different temperatures

21 p3055 A72-40824

Optical properties and structure of the Jovian atmosphere. V - Probable structure of the ammonium aerosol layer

22 p3219 A72-41914

Investigation of optical inhomogeneities in large fields by holographic methods

22 p3176 A72-42106

Change in the sign of the thermal lens of glass laser rods during variation of the thermo-optical constant of glass

23 p3296 A72-43926

Optical constants of cesium in the wavelength range from 0.3 to 2.5 microns and their dependence on temperature and state of matter

24 p3426 A72-44800

Optical properties of thin cesium films over the wavelength range from 0.3 to 0.9 microns and their electrical resistance

24 p3426 A72-44801

OPTICAL PUMPING

Two dimensional scanning electron beam pumped laser, describing production of coherent emission

01 p0079 A72-10522

Carbon dioxide laser pumping with nuclear reactions, indicating improved laser performance due to additional ionization by energetic charged particles

01 p0082 A72-11331

Laser pumped organic dye laser frequency-time characteristics, noting noncoincidence of amplification and photon density maxima

02 p0238 A72-12118

Laser pumping pulse shape effects on second harmonic emission waveform during nonlinear crystal excitation by ultrashort light pulse

03 p0366 A72-13368

Superradiative properties of high gain flashlamp-pumped dye laser amplifier, determining small signal amplification as function of pumping power and frequency

03 p0369 A72-14393

Water vapor laser pumping by upper lasing level excitation through direct electron impact, explaining mechanism by model

[AD-735585]

04 p0529 A72-14587

CW CO laser by discharging premixed carbon disulfide-oxygen flame, suggesting chemical pumping mechanism and flame laser possibility

04 p0529 A72-14589

Emission spectrum and intensity variation of organic dye solutions excited by nitrogen laser pulsed radiation

04 p0529 A72-14655

Short duration high peak power laser pulses generation and measurement, examining active and passive mode locking, chirping, pulse compression and optical pumping

04 p0530 A72-14735

Pinched vortex tube high current arc discharges for continuous pumping of ion crystal YAG-Nd lasers

06 p0825 A72-17839

Carbon dioxide laser pumping at atmospheric pressure by electron beam controlled electrical discharge, discussing measured electrical and laser properties

07 p0999 A72-18875

Optically pumped indium-gallium-arsenides laser coherent emission at room temperature, measuring total power conversion efficiency

[AD-737941]

07 p0999 A72-18882

Gaussian rf noise effect on optical detection signal fluctuations in optically pumped frequency standards

07 p0938 A72-19013

Continuously pumped repetitively Q switched Nd:yttrium-aluminum trioxide laser, discussing mode selection technique based on gain excess over hold-off loss

07 p1000 A72-19045

Flashlamp pumped dye-doped polymethyl methacrylate laser thermal and photochemical effects decrease and peak power output increase by light converter

07 p1002 A72-19206

Transient gain measurements on laser dyes of flashlamp pumped rhodamine 6G-ethanol solutions with air and nitrogen

07 p1002 A72-19208

Dye laser system with narrow linewidth oscillator, transverse mode selector, power amplifier and nitrogen pumping, noting 50 kw and 5 nsec pulse generation capability

07 p1002 A72-19208

Atmospheric pressure carbon dioxide-nitrogen-helium lasers with high output energy densities, using auxiliary discharge for volumetric excitation

07 p1003 A72-19217

Lamp pumped IR solid state laser obtaining 20 W output and 4 percent efficiency from transition of He ion in sensitized YAG

07 p1004 A72-19234

Optically pumped gas lasers with electron transitions to molecular excited state and resonant absorption lines

07 p1006 A72-19634

Optically pumped semiconductor lasers, discussing two photon absorption, emission from compounds and mixed crystals and smooth frequency variation

07 p1006 A72-20118

Ruby laser emission losses for free lasing modes and threshold and above threshold pumping

07 p1007 A72-20122

Output characteristics of Q switched liquid laser as function of pumping pulse, cavity mirror reflectivity and cavity length

07 p1008 A72-20544

Wavelength tunable dye laser pumped by dual pulse lamps with Fabry-Perot interferometer in resonator

07 p1009 A72-20614

Pulse rate and pumping power effects on emission spectra and I-V characteristics of multielement GaAs injection lasers

08 p1181 A72-20796

Ruby use for submillimeter range optically pumped quantum paramagnetic amplifier

08 p1183 A72-21770

Organic dyes molecular photodecay effect on output and power losses of laser activated by flash pumped white light

08 p1184 A72-22029

Nd glass absorption of flash pump emission energies with varying discharge parameters, Xe pressure and glass thickness

08 p1184 A72-22030

Rhodum solution laser emission pulse characteristics relation to pumping energy distribution over container end surface

08 p1184 A72-22048

Self mode locking operation of transversely excited atmospheric pressure carbon dioxide pulsed laser with helical pumping

08 p1184 A72-22075

Resonator dielectric waveguide structure in electron beam pumped semiconductor laser, noting reduction of diffraction losses and of laser action threshold

08 p1184 A72-22089

High power electron beam pumped nitrogen super-radiant laser with 60 kW output 09 p1323 A72-22624

Flashlamp and laser pumped cresyl violet laser emission characteristics between 620 and 710 nm, noting self mode locking in 3 component solution 09 p1324 A72-23048

CW Kr arc lamps for high power Nd-YAG laser pumping, testing operating life and electrical and spectral characteristics as function of design 09 p1324 A72-23080

Steady state plane wave theory of intracavity coupled parametric oscillator upconverter, obtaining efficiency, pump power transmission and optimum output coupling 09 p1325 A72-23086

Nuclear reaction-produced high energy ion beams for gas laser pumping and output enhancement 10 p1489 A72-23948

Nonlinear effects in optical pumping of Ne transition by laser line 10 p1491 A72-24109

50 MW laser amplifier at 3371 Å in molecular nitrogen via transverse electron pumping 10 p1491 A72-24225

Traveling wave mode ring laser operation, obtaining active medium polarization changes through longitudinal magnetic field excitation by capacitor discharge through spiral pump lamps 10 p1492 A72-24363

Rb87 vapor laser with optical pumping, measuring nitrogen or nitrogen argon mixture buffer gas partial pressure effect on power output 10 p1493 A72-24911

Vortex discharge in Ar as optical pumping source for ionic crystal CW lasers, comparing efficiency with YAG-Nd crystal pumping 11 p1648 A72-26331

Pumping conditions relationship to tube filling in Nd-YAG pulsed laser 11 p1649 A72-26344

Multilayer dielectric reflective coatings performance in solid state laser pumping systems 11 p1649 A72-26345

Total emitted power calculated for transversely pumped pulsed molecular nitrogen laser at 3371 Å 11 p1651 A72-26504

Laser emission in near IR by flash lamp pumped fluorescent dyes, presenting oscillograms 11 p1651 A72-26505

Laser emission intensity enhancement based on stimulated Brillouin scattering effect by raising pumping level, energy density and pulse duration 12 p1821 A72-27587

Absorption spectrum of Cr cations in magnesium aluminate spinel crystals excited by strong optical pumping 12 p1854 A72-27596

Temperature gradient and thermoelastic stresses in Nd-YAG laser active elements under continuous pumping conditions, noting refractivity radial distribution 12 p1822 A72-27614

Singly and doubly resonant pulsed optical parametric oscillators driven by time-dependent pump, deriving output power rise time by steady state analysis 12 p1792 A72-27751

Multielement electron beam pumped semiconductor laser using emitting GaAs disks with vapor deposited dielectric mirror coatings 12 p1824 A72-27876

Pumping current pulse duration effect on lasing threshold of injection lasers with diffusion junctions and heterojunctions in GaAs-AlAs system 12 p1824 A72-27877

Computer simulation of pulsed hydrofluoric acid laser pumped by chain reaction, investigating cavity and chemical parameters effects on laser pulse 12 p1826 A72-27938

Short term instability of frequency standard using AFC of quartz crystal oscillator by phase locking to optically pumped Rb 87 vapor clock 13 p1968 A72-29296

Energy conversion efficiency of xanthene dye laser pumped by mode-locked Nd-glass laser second harmonic, discussing effect of excited molecules transition to triplet state 13 p1970 A72-29686

Superradiant laser emission from organic dyes rhodamine 6G and B with coaxial flashlamp pumping source, relating input threshold energy to dye concentration 13 p1971 A72-29864

Wide tuning range organic dye laser design, using nitrogen laser line as transverse pumping source 13 p1971 A72-29869

Xenon filled coaxial pulse tube for pumping organic dye solutions, obtaining intensive light flashes 13 p1971 A72-29923

Buffer gas mixture and pumping light effects on shifts from ground state hyperfine frequency in Rb-85 maser frequency standard 14 p2109 A72-30196

Ground state and metastable atoms and ions optical pumping, presenting critical survey on pumping and relaxation mechanisms, light propagation and spin exchange 14 p2109 A72-30325

Molecular iodine photolysis in photodissociative laser due to selective pumping, noting recombination-like storage mechanism 14 p2110 A72-30354

Flashlamp pumped tunable narrowband traveling wave dye ring laser, stabilizing emission frequency by intracavity Fabry-Perot etalon 14 p2110 A72-30675

Efficiency of pulsed tubular pumping lamps made of quartz glass investigated by active element luminescence measurement, noting dependence on current density 15 p2246 A72-31425

Photon loss coefficients and gain measurement in CdS electron beam pumped lasers, noting absorption mechanism and efficiency 15 p2246 A72-31668

High power CW Nd-YAG laser efficiency improvement by optical pump wavelength, power coupling and balance factors, noting krypton arc lamp contribution 15 p2247 A72-32029

Flashlamp pumped cryptocyanine Q switched high peak power ruby lasers, noting UV radiation responsible for methanolic solution photochemical decomposition 15 p2249 A72-32156

Optically pumped magnetometer error, predicting atomic g-factor modification by nonresonant RF field 15 p2239 A72-32335

Optically pumped pulsed hydrogen fluoride gas laser, observing anisotropic ultrahigh gain emission in rotational transitions 15 p2251 A72-32531

Stimulated emission in molecular iodine vapor phase laser optically pumped by Q switched Nd-YAG laser second harmonics 15 p2251 A72-32538

Mathematical model for fast transverse glow discharges for pumping high pressure gas lasers, noting short rise time of applied voltage pulse 16 p2399 A72-33012

Short flash characteristics of spiral pumping lamp for dye laser 16 p2400 A72-33079

Pumping current pulse duration effect on lasing threshold of injection lasers with diffusion junctions and heterojunctions in GaAs-AlAs system 16 p2404 A72-33986

Resonator dielectric waveguide structure in electron beam pumped semiconductor laser, noting reduction of diffraction losses and of laser action threshold 17 p2562 A72-34660

Traveling wave mode ring laser operation, obtaining active medium polarization changes through longitudinal magnetic field excitation by capacitor discharge through spiral pump lamps 17 p2563 A72-34962

Influence of the transverse distribution of pumping on the energetics and the profile of thermo-optical distortions in a rhodamine 6G laser 17 p2563 A72-35302

Saturated absorption in optically pumped semiconductor lasers 17 p2563 A72-35303

Output fluctuations of CW-pumped Nd:YAG lasers. 17 p2564 A72-35345

Atmospheric pressure carbon dioxide pulsed IR laser to obtain 80 W peak power by optical pumping with TEA HBr laser and filter 17 p2565 A72-35816

CW optically pumped tunable dye laser wavelength ranges, linewidth, mode purity, polarization and power output characteristics 17 p2565 A72-35947

Dynamics of the optical-pumping cycle of F centers in alkali halides - Theory and application to detection of electron-spin and electron-nuclear-double-spin resonance in the relaxed-excited state. 18 p2719 A72-36709

Bandwidth and threshold calculations for angletuned parametric oscillators. 19 p2813 A72-38689

Experimental achievement of optical pumping of a carbon dioxide molecular laser 19 p2814 A72-38790

Influence of gas pressure in arc lamps on the pumping efficiency of CW garnet lasers. 20 p2933 A72-39513

Control circuit for a power supply of a laser pump lamp. 20 p2933 A72-39524

Frequency-tunable stimulated IR parametric fluorescence produced by barium sodium niobate crystal pumped with picosecond pulses from frequency-doubled mode locked Nd-glass laser 20 p2933 A72-39560

Continuously tunable dye laser to obtain output wavelength variation by changing pump laser beam incidence angle on prism lateral face 20 p2933 A72-39563

Pump laser design for an infrared upconverter. 20 p2934 A72-39873

Flash lamp optimal operating parameters determination by impedance matching to driving circuit and spectral matching to material of optically pumped solid state pulsed lasers 21 p3061 A72-40204

The effect of pump coherence on frequency conversion and parametric amplification. 21 p3014 A72-40238

The beam-plasma discharge laser 21 p3062 A72-40406

Optical elements of a laser-pumped dye laser 21 p3064 A72-41737

Exciton condensation in a momentum space under the action of optical pumping 22 p3185 A72-42161

German monograph - Amplification measurements and investigation of 'super radiation' characteristics in the case of optically pumped rubies. 22 p3187 A72-43065

Stimulated emission with pumping by a pulsed electron beam formed in a direct discharge 23 p2925 A72-43319

Dynamic thermo-optical distortions compensation in lamp pumped rhodamine 6G liquid laser by introducing auxiliary dish with dye into cavity 23 p2925 A72-43679

Evanescent-field-pumped dye laser. 23 p2926 A72-43816

Properties of a pulsed LiIO3 doubly resonant parametric oscillator. 23 p2927 A72-44187

Fluorescent organic dyes solutions for Nd:YAG laser output performance improvement 23 p2927 A72-44191

Optical signal envelopes recording and reproduction with parametric superregenerative frequency converters, noting optical pumping by continuous wave YAG laser emission 23 p2929 A72-44471

Optically pumped gas lasers with electron transitions to molecular excited state and resonant absorption lines 24 p3408 A72-44566

Theory of dispersion in relation to light shifts. 24 p3409 A72-44921

Flashlamp-pumped dye lasers for investigations of the upper atmosphere. 24 p3409 A72-44948

Wideband parametric up-conversion of infrared waves into visible region using tunable dye laser pumping. 24 p3410 A72-45286

Kinetics, spectrum, and specific loss properties of radiation emitted by rhodamine 6G in the case of pumping by a self-constricting discharge 24 p3410 A72-45417

Pulsed laser employing a rhodamine 6G solution in ethyl alcohol with an output energy of 110 J 24 p3411 A72-45498

Time dependence of the divergence of the radiation emitted by a rhodamine laser pumped by a pinched discharge. 24 p3411 A72-45612

OPTICAL PYROMETERS

Electrical conductivity of pyrographite at high temperatures along and across deposition plane, using optical pyrometer measurements 02 p0251 A72-12860

Three color optical pyrometer with microsecond resolution time based on three-wavelength double ratio method, displaying temperature/time relationship on cathode ray oscilloscope 04 p0522 A72-15476

Radiation thermometry trends, considering photodetectors, optical pyrometers and filters [ASME PAPER 71-WA/TEMP-3] 05 p0661 A72-15909

OPTICAL RADAR

Optical radar target range estimation, determining suboptimum post detection signal processing algorithms in photon counting mode 01 p0024 A72-10047

Lidar measurements of atmospheric aerosol distributions over large areas including urban haze, scattering layers, trade wind inversion and Sahara dust stream in Caribbean [AIAA PAPER 71-1055] 01 p0057 A72-10526

Laser radar application to air pollution measurement, discussing techniques and instrumentation utilizing elastic, Raman and fluorescence scattering [AIAA PAPER 71-1056] 01 p0028 A72-10527

Monostatic and bistatic lidar and solar radiometer sensing techniques for remote measuring of aerosol size distributions 01 p0066 A72-10528

FM/CW laser radar technique for smoke plume opacity remote measurement, discussing eye safety [AIAA PAPER 71-1081] 01 p0080 A72-10539

Smoke plume opacity or particulate content measurement by laser backscatter, using Q switched ruby and Nd lidars [AIAA PAPER 71-1087] 01 p0058 A72-10544

Hydrometeors linear depolarization ratios measurements by monostatic lidar, using different size water drops and ice crystal clouds

01 p0095 A72-10830

Air pollution measurements by laser radar, using coherence properties to discriminate between backscatter due to molecular atmospheric constituents and pollutant particulates

02 p0212 A72-11816

Laser station coordinate and Geos B satellite position compensation with simultaneous optical and laser observations

02 p0219 A72-12045

CAT detection by airborne laser Doppler radar and ground based ultrasensitive microwave Doppler radar methods

04 p0543 A72-14822

Raman laser radar (LIDAR) for remote probing, discussing design, construction, testing, atmospheric scattering, and intensity and polarization measurements

06 p0824 A72-17588

Low energy per pulse high repetition rate laser radar capabilities for atmospheric density measurement above 30 km

06 p0775 A72-18093

Airborne ruby lidar application to cirrus and haze layers measurements, deriving optical parameters

06 p0777 A72-18448

Air pollutant monitoring and remote analysis by Raman, fluorescence and resonance backscattering, Rayleigh scattering and absorption laser radar techniques

06 p0827 A72-18460

FM-CW radar range measurement by carbon dioxide laser, considering laser output nonlinear variation due to frequency pulling/pushing and refractivity changes

07 p0940 A72-19205

Angle scintillation in laser radar return from retroreflector, comparing measurement with theoretical derivation in terms of phase fluctuation parameter [CLEA PAPER 2.1]

07 p0942 A72-19377

Spaceborne laser radar for target acquisition and tracking in spacecraft rendezvous and docking applications

[CLEA PAPER 9.5]

07 p0943 A72-19387

Suboptimum linear quadratic algorithm for optical radar signals postdetection processing and target range estimation

07 p0943 A72-19522

Laser radar observations of mesosphere and lower thermosphere optical scattering cross section variations due to tide-caused atmospheric density fluctuations

08 p1156 A72-21100

Narrow-band pulsed laser radar photocount distribution statistics in thermal background radiation, noting detection performance dependence on signal and noise absolute level and SNR

08 p1134 A72-21420

Relation for detector-aperture size for spatially coherent detection with dependent scattering applied to realistic laser radar signal signatures

09 p1278 A72-22618

GaAs lidar reflectance of fair weather cumulus clouds at 0.903 micron from aircraft observation

09 p1280 A72-23349

CW carbon dioxide laser Doppler radar for remote measurement of atmospheric wind velocity and turbulence, obtaining Doppler signal via homodyned radiation scattered by airborne particles

09 p1315 A72-23407

Laser radar technique for invisible air pollutants remote sensing systems, comparing Raman backscattering resonance scattering and absorption schemes

10 p1489 A72-23952

Lidar application to aircraft and missile tracking and ranging, describing results obtained with ONERA experimental equipment

10 p1436 A72-24655

Tuned laser radar detection and ranging of high altitude Ba ion cloud by photon counting, discussing SNR requirement

10 p1440 A72-24963

Cloud height measurements and instrumentation, discussing rotating and fixed beam triangulation and French lidar and ruby laser ranging ceilometers

10 p1484 A72-25094

Atmospheric water vapor measurements by Raman backscatter from pulsed laser radar, comparing with meteorological tower data

11 p1680 A72-25347

Atmospheric constituents dimension, composition and dynamics from optical radar echo observation of laser light scattering

11 p1592 A72-25849

Slant range visibility measurements by lidar for aircraft landing operations under low clouds and fog at coastal region

13 p1992 A72-28847

Meteorological formations investigation with lidar, discussing laser beam interaction with clouds, fog and precipitation with allowance for multiple scattering

13 p1995 A72-29595

Gas temperature from Raman rotational line intensities generated by lidar techniques applied to inelastic Raman scattering

15 p2232 A72-31373

Aircraft laser radar measurements of atmospheric backscattering coefficients for cloud and underlying surface studies

15 p2266 A72-31908

First and second order backscattering, beam divergence, angular field of view, field size and receiver distance of water clouds illuminated by continuous lidar beam

15 p2200 A72-32154

STRADA landing trajectory recording system for real time flight path restitution during approach and landing, using computer and lidar techniques

16 p2420 A72-32895

Directivity pattern accuracy effects on angular coordinate determination by scanning active optical radars

16 p2362 A72-33188

Airport runway fog dispersal in UK, discussing cost projection for chemical seeding system combined with lidar remote sensing

16 p2418 A72-33500

Upper atmospheric trace constituents global mapping by laser radar probing from satellite, discussing feasibility and comparison with ground based system

16 p2365 A72-34074

IR carbon dioxide laser radar with heterodyne detection, measuring SNR and atmospheric scattering coefficients for various weather conditions

17 p2516 A72-35192

Remote measurements of the atmosphere using Raman scattering.

17 p2547 A72-35195

Complex index of refraction of airborne fly ash determined by laser radar and collection of particles at 13 km.

18 p2661 A72-36637

Measurement of aerosol motion and wind velocity in the lower troposphere by Doppler optical radar.

18 p2706 A72-36638

On depolarization of visible light from water clouds for a monostatic lidar.

18 p2706 A72-36646

Clear air turbulence detection possibility by optical laser radar and turbulent fluctuation correlations

23 p3264 A72-43898

Laser radar /lidar/ for mapping aerosol structure.

23 p3298 A72-44542

Rocket-borne GaAs laser radar system with scatter light detector and data processor for upper atmosphere aerosol and pollution measurements

24 p3409 A72-44778

OPTICAL RANGE FINDERS

NT LASER RANGE FINDERS

FM-CW radar range measurement by carbon dioxide laser, considering laser output nonlinear variation due to frequency pulling/pushing and refractivity changes

07 p0940 A72-19205

Lidar application to aircraft and missile tracking and ranging, describing results obtained with ONERA experimental equipment

10 p1436 A72-24655

Q switched YAG-Nd laser implementation into target designators and range finders, stressing temperature insensitive design with electronic compensation and thermal equalization

12 p1825 A72-27928

Laser ranging instrument for satellite distance measurement, discussing four-axial mounting, guiding telescope, receiving optics and performance

15 p2247 A72-31935

Timing requirements in geodetic measurements with optical and electronic equipment, considering lunar laser ranging technique for high accuracy

15 p2229 A72-32075

Laser tracking measurements of distance to light reflector mounted on Lunokhod 1, describing equipment and procedure

16 p2404 A72-33997

Laser systems.

17 p2562 A72-34567

Two channel high resolution spectrometric measurements of plasma velocity from intrinsic radiation in optical range by Doppler effect

17 p2590 A72-35133

OPTICAL REFLECTION

Goos-Hanchen nonpolarized light effect for laser beam separation into rectilinearly polarized beams during reflection

01 p0101 A72-10042

Reflection nebulae genetic relationship to illuminating stars from catalogs based on Palomar Observatory Sky Survey

02 p0284 A72-12639

Separation measurement between two distant partially reflecting parallel surfaces using Michelson interferometer

03 p0358 A72-13435

Jupiter and Venus cloudy atmosphere reflected sunlight circular polarization measurement, noting sense variations with phase angle and location on disk

03 p0439 A72-14150

Spectral analysis of light reflected from Nd laser produced deuterium plasma, observing Doppler shift

07 p1039 A72-18888

Angle scintillation in laser radar return from retroreflector, comparing measurement with theoretical derivation in terms of phase fluctuation parameter [CLEA PAPER 2.1]

07 p0942 A72-19377

Optical losses, reflectivity and transmissivity measurements of He-Ne laser Fabry-Perot resonator elements, using laser output power dependence on element losses

07 p1006 A72-19901

Semitransparent particle model of Martian surface for reflective power at various incidence and reflection angles, discussing packing density and optical parameters

08 p1231 A72-21126

Ground based Raman laser backscatter measurement of stratospheric water vapor content, noting 1 ppm accuracy

08 p1161 A72-21825

Focal length determination for on-axis parabolic mirrors by He-Ne laser reflection

09 p1315 A72-23352

Laser reflection studies of surface morphology of growing or evaporating crystals

09 p1326 A72-23409

Radiative transfer theory for passage wall surface roughness effects on light transmission and reflection [ALAA PAPER 72-303]

11 p1742 A72-25237

Measurement of light pressure-force on Echo I satellite based on satellite surface reflection and stellar magnitude as function of phase angle

11 p1718 A72-25939

Titanium dioxide thin film antireflection coating to minimize reflection losses in Si solar cells, discussing fabrication and optical and electrical characteristics

12 p1757 A72-28028

Reflectometer based on quasi-optical transmission line using conversion of incident and reflected waves into opposed circularly polarized components

13 p1954 A72-28375

High angular resolution optical system to measure light reflection from rough surfaces

13 p2002 A72-28513

Spectral changes of light reflected back from plasma during heating by mode locked Nd laser, noting equidistant lines presence

14 p2138 A72-30444

Lunar physical libration measurement from Apollo laser experiment with retroreflectors, assessing obtained data

14 p2154 A72-30516

Optical anisotropy effects in birefringent materials by reflected shadow method and extension of theory for constrained zones around cracked plates under plane stress

14 p2167 A72-30905

Circularly polarized photon echo decay measurement as function of Cr concentration in ruby, noting relationships to temperature, pulse separation and external magnetic field

15 p2295 A72-32545

Light transmission, reflection and environmental problems of hydrophilic coatings for fog and frost protection in aviation instrument window design

22 p3196 A72-42519

Sunlight scattering by double reflection on rough and absorbing surfaces, deriving fractional circular polarization from models for comparison with observation

23 p3334 A72-43254

OPTICAL RESONANCE

Gas lasers application to precise length measurements via absorbing medium resonance determined wavelength

04 p0530 A72-14734

Neon lower laser level spontaneous emission double resonance phenomena, discussing depopulation rates and resonance line profile changes

04 p0531 A72-15138

Optical resonators using lossy anisotropic metal film linear polarizer for oscillation mode selection [CLEA PAPER 6.3]

07 p1004 A72-19382

Quasar 3C 273 light variation periodicities search, noting confidence level concerning resonance periods

07 p1073 A72-19424

Diffraction losses and corrections for lower order transverse modes and resonance conditions in optical resonators with cylindrical mirrors

08 p1133 A72-21371

He-Ne laser with absorption cell, investigating high contrast power resonances due to Lamb dip at nonuniformly broadened absorption line center

11 p1649 A72-26340

Jones matrix method for polarization natural states, frequencies and mode losses calculation in anisotropic optical resonators

11 p1688 A72-26347

Power resonance and frequency stabilization of gas laser with nonlinear absorption cell, considering He-Ne laser with Fabry-Perot resonator
12 p1820 A72-27584

Singly and doubly resonant pulsed optical parametric oscillators driven by time-dependent pump, deriving output power rise time by steady state analysis
12 p1792 A72-27751

Resonant interaction and self transparency effect of coherent ultrashort light pulse passing through semiconductor
12 p1824 A72-27868

Laser resonator transverse and longitudinal mode selection techniques, considering single frequency stabilization, gain saturation theory and applications
12 p1826 A72-27964

Coherent laser light propagation in resonance media with level splitting, determining Lorentz and broadened resonance lines
13 p1969 A72-29515

Spectral line profile of optical transition spontaneous radiation during resonance with strong field on adjacent transition
14 p2110 A72-30781

Hg vapor absorptivity dependence on wave number, atomic density and temperature in 2537 A resonance line region, discussing measurement by magnetic scanning or monochromator
14 p2131 A72-30853

Spiking response of luminescent diode pumped CW Nd-YAG laser to sinusoidal modulation, showing agreement with relaxation oscillation resonance prediction
15 p2250 A72-32526

Resonant interaction and self transparency effect of coherent ultrashort light pulse passing through semiconductor
16 p2403 A72-33977

Excitation of a confocal spherical laser resonator.
19 p2810 A72-37403

Balloon-borne UV spectrophotometer observation of Mg II resonance doublet at 2795 and 2802 A in stellar spectra, comparing to Ca II line widths
20 p2965 A72-38907

Unstable resonator theory with geometrical optics and diffraction approximation, applying to laser mode selection and beam divergence reduction
20 p2932 A72-39501

Organic dye laser molecular sublevel relaxation effects on steady state pi pulse behavior and spectral hole burning from resonance radiation propagation analysis
20 p2932 A72-39503

Investigations on spectroscopy by nonlinear Zeeman-resonances of a multimode laser.
20 p2934 A72-39845

Book - Introduction to optical electronics.
23 p3295 A72-43650

3.39 micron resonance line absorption in shocked methane.
24 p3410 A72-45044

OPTICAL RESONATORS
U LASERS
OPTICAL SCANNERS
NT FLYING SPOT SCANNERS
NT MULTISPECTRAL BAND SCANNERS
Global satellite horizon-scanning monitoring technique permitting scattered solar radiation horizon profile conversion into aerosol vertical distribution
[AIAA PAPER 71-1111] 01 p0058 A72-10555

Green and blue-green algae reflectance and transmittance characteristics, selecting spectral bands for multispectrum scanning of algal suspensions in water bodies
02 p0213 A72-11857

Bulk data storage and retrieval with scanning laser and electron beams, discussing spot formation focal sensitivity, noise, beam deflection, speed and media environment
[IEEE PAPER 19,2] 03 p0368 A72-13775

Oscillating slot-and-bar and sinusoidal reticle scanners for measuring optical image velocity
03 p0326 A72-14202

German monograph on sky scanner for short term sky spectral density distribution using glass fiber bundles for spectral components simultaneous measurement
07 p0983 A72-19266

Photometer using rotating wedge interference filter as wavelength scanning element near 6300 A for high altitude sounding rocket application
07 p0985 A72-19403

Design and operation of scanning laser based on exciting electron beam directional variation, discussing laser characteristics for various operating modes
08 p1182 A72-21268

Systematic errors in scan-and-measure devices for tracking camera photographs analysis, discussing correction during measurements
08 p1209 A72-21913

Space astronomy experiments with TV scanning, discussing data from Telescope catalog of UV observations and photometric and astrometric accuracy
08 p1170 A72-21957

Laser beams cross-sectional power distribution measurement by spinning disk scanner, using dual beam oscilloscope for laser beam profile display
10 p1489 A72-23949

Optical TV scanning for wind tunnel model position detection in magnetic suspension system for sphere low density drag measurements
[ONERA, TP NO. 988] 10 p1461 A72-24764

Lick observatory image-dissector scanner for faint astronomical spectra, describing design and performance of system based on individual photon pulse counting and memory storage
11 p1631 A72-25691

Image tube scanner photon loss probability, considering effects of system gain, aperture time and sweep rate via computer simulation
11 p1631 A72-25694

Long wave radio and acoustic holograms recording by complex scanning for transmission over communication channels
11 p1636 A72-26714

Photosensor aperture shape and line scan spacing effect in reducing facsimile camera aliasing
12 p1807 A72-27408

Astronomical spectroscopy using ultravariable resolution single Fabry-Perot interferometer in tandem with echelle Hilger monochromator
12 p1811 A72-27942

High speed and resolution laser scanning by optomechanical methods, discussing theoretical bandwidth, resolution limits, position error correction measures and performance optimization
15 p2248 A72-32037

High speed facsimile transmission system based on LR70 laser scanner, presenting typical system output image
15 p2248 A72-32041

High-speed image scanning devices using acoustic surface waves and photodiode array.
18 p2658 A72-36267

Generalized multi-dimensional sampling theory and applications in optical systems.
18 p2672 A72-36333

Epipolar scanning to convert image correlation from two dimensional to one dimensional task for application to photogrammetric automation
18 p2691 A72-36492

Remotely sensed data processing by scanner/printer designed for photograph scanning, geometric correction and photographic printing of corrected image
18 p2691 A72-36495

Early data from the ultraviolet sky-scan telescope in the TD1 satellite.
19 p2857 A72-37524

A system for programmed control of the motion of the carriage of a microphotometer along two coordinates
19 p2801 A72-37966

Improvements in electro-optic circular-scan deflectors.
21 p3050 A72-40146

Pressure-scanned echelle grating plus Fabry-Perot stellar spectrophotometer.
21 p3053 A72-40609

Use of air bearings in the construction of a scanning Fabry-Perot interferometer.
21 p3054 A72-40621

Effect of the video signal shaping mechanism in a photosensitive scanistor sensor on the optical data processing accuracy
21 p3058 A72-41735

A fast opto-electronic transducer
22 p3180 A72-42944

A new approach to automatic scanning of contour maps.
22 p3174 A72-43024

Optical considerations for an acoustooptic deflector.
23 p3288 A72-43885

OPTICAL SENSORS
U OPTICAL MEASURING INSTRUMENTS
OPTICAL SIGNALS
U OPTICAL COMMUNICATION
OPTICAL SPECTRUM
U LIGHT [VISIBLE RADIATION]
OPTICAL THICKNESS
Electron energy equation and recombination radiation loss for atomic radiating optically thin plasmas, using Kramers-Unsöld approximation
01 p0106 A72-10097

Invariant imbedding theory of aerosols multiple scattering induced telephotometric errors, determining scattering coefficients relative to optical thickness by Monte Carlo method
[AIAA PAPER 71-1062] 01 p0066 A72-10531

Energy-momentum tensor for radiation and radiative viscosity in optically thick matter having Thomson scattering with photon absorption and emission processes
01 p0129 A72-10798

Optically thin radiation effects on local heat transfer in gas flow narrow duct thermal entrance region, presenting Nusselt number variations terms for uniform and parabolic velocity profiles
02 p0303 A72-12321

Martian atmosphere and surface, covering atmospheric composition, optical thickness and pressure, violet and yellow clouds, surface relief and topography
02 p0282 A72-12326

Saturn radio emission and brightness temperature measurements, determining rings optical thickness upper limit
03 p0438 A72-13977

Weak D type ionization waves stability in optically thick plasma layer behind front of interstellar gas
05 p0715 A72-16210

Radiation intensity angular distribution from optically thick plane cloud layer reflection, relating photon survival probability and scattering functions
06 p0807 A72-17939

Multilayer heat reflective coating optical thickness effect on temperature distributions, taking into account interlayer contact resistance and thermal radiation volume absorption
06 p0904 A72-18511

Total flux and polarization of solar S-component at mm wavelengths, obtaining radio source optical depth by evaluation of QL propagation based on magnetotonic theory
07 p1069 A72-19080

Atmospheric aerosols optical thickness evaluation from solar radiation integral intensity
07 p1031 A72-19855

He ionization and excitation in optically thick solar prominences, considering recombination excitation for observed triplet-level populations at 5000-10,000 K electron temperature
08 p1231 A72-21123

Scattered light coherence in optically thin vapors and ideal gases in energy level crossing experiment formulated in terms of autocorrelation function
08 p1206 A72-21294

Martian violet clouds photometric studies, determining monochromatic albedo, optical thickness and Junge parameter
08 p1237 A72-21827

Luminous filaments model of density condensations optically thick to ionizing radiation in planetary nebulae
10 p1550 A72-25197

Monte Carlo random walk methods for directional emittance of one dimensional absorbing-scattering slab with reflecting boundaries, considering refractive index, optical thickness and albedo
[AIAA PAPER 72-309] 11 p1743 A72-25243

Atmospheric carbon monoxide and nitrous oxide telluric line contours and line centers optical thickness, measuring solar radio emission transmissivity
11 p1628 A72-26881

Radiation propagation in optically thin anisotropic noncrystalline media, obtaining explicit formulas for Stokes parameters of transmitted and scattered radiation
12 p1865 A72-27052

Anisotropic light scattering layer radiation intensity dependence on optical coordinate, obtaining integral equations for seminfinte and finitely thick layers
13 p2001 A72-28502

Asymptotic and exact methods for light scattering problems in radiative transport theory, discussing finitely thick plane layer luminescence
13 p2001 A72-28503

Martian atmosphere and surface, covering atmospheric composition, optical thickness and pressure, violet and yellow clouds, surface relief and topography
13 p2039 A72-29210

Total line intensities interpretation from optically thin gases, considering matter partitioning bivariate distribution function and chemical composition
13 p2008 A72-29930

Sunspot area east-west asymmetry dependence on location in chromospheric facula or plage, considering solar atmosphere optical and geometric depth changes
15 p2318 A72-32787

Optically thick plasma temperature profile determination by extended brightness emissivity method
16 p2440 A72-34100

On the dependence of the linear velocity of solar rotation on latitude and optical depth.
17 p2607 A72-35076

Source function for radiative fields produced by uniform parallel irradiation of scattering absorbing medium of finite optical thickness, using radiative transfer linearity
19 p2834 A72-37837

Absorption line profile and equivalent line width derivation for planetary atmosphere with low and high optical thicknesses, assuming arbitrary scattering coefficients
19 p2863 A72-38071

Atmospheric carbon monoxide and nitrous oxide telluric line contours and optical thickness in line centers, measuring solar radio emission transmissivity
20 p2919 A72-39568

Asymptotic theory of an optically thick radiating gas flow past a smooth boundary at moderate radiation strength.
21 p2989 A72-40196

- Transparent film thickness, refractivity and birefringence measurements by white light interferometric gage, noting performance insensitivity to chemical composition, film temperature and haze level
21 p3053 A72-40601
- Method of calculation of the emission coefficient of a cylindrical plasma starting from the experimental profile of the intensity
21 p3092 A72-41198
- Steady radiating gas flow past a semi-infinite flat plate at a constant temperature for an optically thick case.
21 p3131 A72-41497
- Connection of the brightness indicatrices with the optical thickness of the atmosphere
22 p3200 A72-41874
- Determination of the optical thickness of polymer fracture surface layers from interference phenomena.
23 p3307 A72-44317
- Transfer effects on X-ray lines in optically thick celestial sources.
24 p3435 A72-44843
- Radiation propagation in optically thin anisotropic noncrystalline media, obtaining explicit formulas for Stokes parameters of transmitted and scattered radiation
24 p3425 A72-45705
- OPTICAL TRACKING**
- Southern radio sources optical identification by photography using fiber optics image tube
02 p0285 A72-12795
- Satellite tracking by combined optimal estimation and control techniques with Kalman filter, considering radio antenna and optical tracking systems
02 p0285 A72-12812
- Moving display visibility effect on pilot tracking performance, discussing dependence on illumination intensity and color
04 p0477 A72-14445
- Alcohol ingestion effects on tracking performance during angular acceleration, observing nystagmic eye movements and eye-hand coordination
04 p0477 A72-14474
- International Satellite Geodesy Experiment based on laser telemetry technique, discussing ground stations network and tracking cameras
04 p0520 A72-15726
- Automatic optical tracking instrumentation at rocket launching station Tanegashima, describing automatic cinephotodolite
06 p0795 A72-17432
- Horizontal and vertical eye motions temporal relations in tracking light spot, discussing saccadic system orthogonal interaction mechanism
06 p0761 A72-17601
- GEOS satellite orbit determination and prediction errors from optical tracking systems and gravity models, estimating resonant coefficients
06 p0877 A72-17653
- Moving target resolution threshold in retina, discussing visual acuity relation to target angular velocity during ocular pursuit
07 p0926 A72-19029
- Dynamic visual acuity and eye movement data for moving targets, deriving retinal target image position and velocity errors during ocular pursuit
07 p0926 A72-19030
- Moving visual stimuli apparatus with independent control over size, shape, background intensity, orientation and velocity of motion, describing cat neuronal sensitivity studies
07 p0926 A72-19032
- Afterimage apparent motion preceding smooth eye movement association with target tracking, noting unequal impairment occurrence over entire visual field
07 p0927 A72-19034
- Control optimization of pulsed laser automatic tracking system, analyzing angular and temporal distribution of signals
07 p0942 A72-19386 [CLEA PAPER 9,4]
- Satellite angular coordinates determination by laser ranging from single station, using echo recording by Schmidt telescope
07 p0947 A72-20255
- Tracking efficiency of laser telemetry on reflector carrying satellites
07 p0947 A72-20259
- Tracking efficiency calculation for laser telemetry with laser reflector on nonstabilized satellite
07 p0947 A72-20260
- Laser tracking of magnetically and gravity gradient stabilized satellites, noting latitude effect on efficiency
07 p0947 A72-20263
- Laser ranging techniques application to ground baseline measurements, discussing maximum range of satellites tracking laser system
07 p0947 A72-20264
- Lidar application to aircraft and missile tracking and ranging, describing results obtained with ONERA experimental equipment
10 p1436 A72-24655
- Rotating mirror image position sensor for high angular resolution optical tracking, discussing performance

improvement by computer generated variable density spatial filter
11 p1591 A72-25312

Laser tracking measurements of distance to light reflector mounted on Lunokhod 1, describing equipment and procedure
12 p1825 A72-27888

Circadian rhythms of visual accommodation responses and physiological correlations during target tracking, recording monocular focus state by IR optometer
12 p1767 A72-28306

Semiautomatic tracking device for satellites comprising laser telemetry equipment
13 p1939 A72-29674

Eye movements and dynamic visual acuity as function of tracking velocity, analyzing pursuit and saccadic component by electrooculography
13 p1912 A72-30043

Laser ranging instrument for satellite distance measurement, discussing four-axial mounting, guiding telescope, receiving optics and performance
15 p2247 A72-31935

Transverse wind self-induced thermal lens effects on target image quality in laser beam tracking systems
15 p2249 A72-32164

Effects of different alcohol dosages and display illumination on tracking performance during vestibular stimulation.
17 p2508 A72-34554

Laser systems.
17 p2562 A72-34567

Nonholographic coherent optical correlation for automatic stereoperception.
18 p2691 A72-36493

Investigation of the atmospheric boundary layer and clouds by the laser tracking method
18 p2698 A72-36969

Visual optical system evaluation from viewpoint of human operator target detection under field conditions in terms of resolution, transfer functions, aberration and eye movements
20 p2893 A72-39041

An assembly for studying the perceptive motor reactions of man under one-dimensional follow-up conditions
21 p3008 A72-40810

Fluid velocity measurement of oscillatory flow generated from vortex shedding by laser Doppler system, discussing frequency tracker design, continuous detection problem and application
22 p3178 A72-42677

Automatic acquisition and tracking system for laser communication.
23 p3265 A72-44176

Optoelectronic flight path tracking systems
24 p3380 A72-45274

OPTICAL TRANSITION

Gas dynamic lasers theory based on two fluid model of optically active medium, investigating medium velocity effect on lasing mechanism
01 p0081 A72-11210

Optical and inner shell X ray transitions in highly ionized Cu, Fe and Ti observed from point plasma source generated in linear vacuum discharge
09 p1360 A72-22833

Semiconductor laser threshold current dependence on doping degree and temperature based on optical transition model and energy band theory
11 p1647 A72-26327

Optical interband transition energies in Ni and Ni based alloys, measuring light conductivity at various spectral energies
13 p1976 A72-28904

Photoelectric emission usefulness for investigation of energy parameters and optical transitions of semiconductor surfaces
15 p2276 A72-31865

CW laser transitions in singly ionized Te vapor spectrum at 4843-9378 Å, indicating charge transfer as dominant excitation mechanism
16 p2401 A72-33394

Stable single frequency Ar laser radiation with coupled transitions emission
16 p2403 A72-33709

The use of known helium line cross sections for investigation of unknown transition in neon.
18 p2713 A72-36954

OPTICAL WAVEGUIDES

Optical waveguide maximum length determination based on self focusing pulse channel growth rate relationship to striction nonlinearity
12 p1823 A72-27619

Dielectric slab surrounding medium gain effects on bound modes amplification via estimation of evanescent surface wave interactions in optical waveguide by perturbation theory
21 p3062 A72-40605

Hybrid digital transmission systems based on optical fiber waveguides and analog repeaters, noting YAG laser light modulation by phase shift keyed sub-carrier
21 p3018 A72-40868

Fundamental transverse electric field /TE-sub 0/ mode selection for thin-film asymmetric light guides.
22 p3186 A72-42622

Self focusing effect on wave beam propagation in optical lens waveguides, discussing system nonlinearity
22 p3186 A72-42656

Evanescent-field-pumped dye laser.
23 p3296 A72-43816

OPTICS

Objects optical granularity in diffuse coherent light, noting similarity to image formation in diffuse incoherent light
01 p0073 A72-11313

Symmetrical three component pancreatic system with intermediate constant image plane and linear displacement of components
03 p0360 A72-13562

Isoplanatic instrument wave aberration determination, using longitudinal defocusing
03 p0360 A72-13563

Book on optics covering gas lasers, power output vs frequency, picosecond laser pulses, Q switching principles, mode locking, optical propagation through turbulent atmosphere, etc
04 p0548 A72-14733

Book on holographic technology covering fundamentals of holography and classical optics, diffraction theory, Huygens principle, lasers, illumination sources, holographic interferometry, etc
04 p0522 A72-15271

Inverse scattering by ray optics for conducting wedge, considering TE and TM edge diffracted fields
04 p0551 A72-15671

Herzberger fundamental optical invariant for rotationally symmetric systems, using partial differential equations [AD-738406]
05 p0690 A72-16672

Atmospheric heating and kinetic cooling nonlinear effects on IR carbon dioxide laser beam propagation, comparing digital simulation results with geometrical optics [CLEA PAPER 2,6]
07 p0942 A72-19381

Homogeneous isotropic Newtonian and Robertson-Walker cosmological models, discussing radiative transfer and optics
07 p1074 A72-19431

Digitized SEC vidicon detector for OSO-H satellite coronagraph, describing optics
08 p1170 A72-21959

Learning systems mathematical scheme to identify classes invariant with respect to transformation groups, realizing functionals with coherent and incoherent optics
09 p1282 A72-22218

Physical optics approximation study of gravitational waves effect on electromagnetic propagation, noting unobservability of local scintillation effect
09 p1351 A72-22683

Optical mirror method for bending strains study in welding cycles with applications to sheet metal thermal stress strain rates
09 p1318 A72-22738

Zeiss aerial photographic lens systems imaging quality characteristics in visible and near IR spectral ranges
09 p1313 A72-23311

Laser beam induced thermal blooming in absorbing gases from combined fluid dynamics and eikonal geometric optics theory, considering wind effects
09 p1352 A72-23333

Diagnostic procedures for nonhomogeneous plasma based on geometrical optics approximation, irradiating plasma by plane wave at oblique incidence
13 p2013 A72-29295

Iterative-zonal method for radiative heat transfer calculations with capability to numerically determine radiation characteristics of optically and energetically homogeneous zones
13 p2065 A72-29643

Holographic virtual image formation and magnification by classical geometrical optics laws application, deriving equivalent law of refraction
16 p2392 A72-33599

German Book - Introduction into nonlinear optics, Volume 1
19 p2813 A72-38775

Atmospheric turbulence induced optical effects due to refractive index fluctuations, solving Maxwell equations for instantaneous intensity distribution function
20 p2948 A72-39055

Unstable resonator theory with geometrical optics and diffraction approximation, applying to laser mode selection and beam divergence reduction
20 p2932 A72-39501

Geometrical optics approximation for angular error calculation of microwave antenna radome, noting boresight error proportionality to walls electrical thickness
23 p3271 A72-43837

Geometrical interpretation of Gaussian beam optics
23 p3288 A72-43877

Ray optics applications to electromagnetics and other disciplines, discussing matrix representation for wavefront curvature and field computation simplification via transformations 23 p3314 A72-44331

Future giant-aperture orbital space telescope design based on active optics and electro-optical techniques, discussing laser interferometry and precise servomechanisms roles 24 p3405 A72-45544

OPTIMAL CONTROL

NT TIME OPTIMAL CONTROL

Soviet book on reliable logic units design covering adaptive redundant and nonredundant control systems, threshold functions, optimal adaptation algorithms, restoring circuits, etc 01 p0033 A72-10296

High order optimality conditions of singular controls, considering Pontryagin maximum principle, Bellman dynamic programming and functional analysis 01 p0044 A72-10297

Optimal control algorithm for spacecraft descent in atmosphere at speed near escape velocity, using game theory 01 p0135 A72-10298

Optimal metric programmable high speed sequential decoder for convolutional code deep space channels 01 p0026 A72-10340

Optimal control of material point motion in thin spherical layer of central gravitational field, solving by approximation 01 p0127 A72-10355

Optimal flight of material point in central field of forces subject to controlled small thrust 01 p0127 A72-10356

Optimal control for thrusting rocket guidance with controllable steering angle rate during insertion into circular orbit, using flat earth approximation 01 p0097 A72-10383

Multidimensional variable structure systems synthesis for automatic optimization of inertialless technological plants in presence of constraints 01 p0045 A72-10498

Gradient method for optimization control system construction with cross couplings between channels 01 p0045 A72-10501

Closed linear systems optimal stabilization determining transfer function from Wiener Hopf equation 01 p0045 A72-10572

Minimum propellant impulsive optimal spacecraft guidance and trajectory problem, developing deterministic theory in discrete linear quadratic form with second order perturbation analysis 01 p0130 A72-10929

Step width for gradient projection method in Hilbert space for optimal linear control problems with quadratic functional 01 p0047 A72-11386

German monograph on maximum principle application to optimum control of discrete problem 02 p0197 A72-11741

Jacketed tubular chemical reactor optimal startup control, presenting distributed maximum principle for diffusional parameter system 02 p0301 A72-12093

Optimal stabilization of permanent rotation of solid body with arbitrary mass distribution by controlled gyroscope 02 p0230 A72-12337

Optimal stabilization law for ensuring gyroscope equilibrium position asymptotic stability in rms error, aperiodicity and system transient response time 02 p0230 A72-12338

Extremal system with second control loop for search signal frequency regulation to optimize primary loop operation, determining system dynamic errors under random drift 02 p0197 A72-12340

Stochastic linear-quadratic-Gaussian problem role in optimal closed loop control system design, emphasizing philosophy, modeling and problem formulation [AD-738763] 02 p0198 A72-12801

Linear and quadratic programming procedures in optimal control problems of stochastic and deterministic system design 02 p0198 A72-12807

Discrete-time linear quadratic stochastic control system with perfect measurements of state, obtaining optimal solution by dynamic programming 02 p0198 A72-12808

Satellite tracking by combined optimal estimation and control techniques with Kalman filter, considering radio antenna and optical tracking systems 02 p0285 A72-12812

Bibliography on linear-quadratic-Gaussian problems covering quadratic criteria, state estimation, stochastic control, computations and applications 02 p0198 A72-12813

Optimal control algorithm synthesized from linear sampling theory for inertial platform alignment, requiring systematic error free optimal digital computer 02 p0258 A72-12899

Linear multivariable interacting feedback control system optimal design by heuristic approach to determine input-output pairing and controller settings for satisfactory disturbance attenuation 03 p0337 A72-12905

Pulse shaped small parameter variation effects on performance index of minimum fuel control systems with initial and final manifolds 03 p0337 A72-12906

Neighboring optimal feedback control for multiinput nonlinear dynamical systems with discontinuous control, applying to minimum time satellite attitude acquisition problem solution 03 p0338 A72-13407

Weak solutions of degenerate partial differential equation of dynamic programming, investigating relation to value function of stochastic optimal control problem 03 p0382 A72-13701

Analytic solution for optimal control circular orbit escape with constant thrust rocket, using Euler-Lagrange equations and perturbation technique 03 p0347 A72-13839

Approximation method for determination of distributed parameter systems optimal control, considering state and control variable constraints 03 p0338 A72-13917

Finite memory uncertain stochastic controller, developing optimal and suboptimal algorithms 03 p0329 A72-14181

Numerical method and computerized design for feedback controller pulse transfer function in overall error criterion minimization, comparing results with sampled error method 03 p0329 A72-14355

Optimization programs for linear control systems with nonconvex constraints on phase coordinates applied to material point transfer 04 p0504 A72-14624

Closed-loop temperature distribution optimal control by heater-sensor spatial configuration design for highest steady state temperature stiffness under heat flux disturbance 04 p0504 A72-14661

Iterative procedure for computing optimal controls in distributed parameter systems described by linear parabolic differential equations, applying to metal slab temperature profile problem 04 p0504 A72-14664

Dual variational principles application to distributed parameter system suboptimal control strategy evaluation, considering control variable and feedback gain as piecewise function of time 04 p0505 A72-14665

Distributed parameter control system optimal control problems, formulating existence with minimum norm technique 04 p0505 A72-14667

Kalman type optimal filter for linear distributed-parameter systems under white Gaussian and boundary noise, obtaining Wiener-Hopf equation by calculus of variations 04 p0505 A72-14668

Linear distributed parameter system optimal boundary control by direct method using linear combination of finite number of orthonormal functions 04 p0505 A72-14670

Discrete system high order optimality sufficient conditions and methods for singular and nonsingular controls study 04 p0505 A72-14996

Control system synthesis from transient process estimates with Liapunov functions, proposing optimality criteria based on Gaussian minimum constraint principle extension 04 p0505 A72-14997

Extremal problems of natural vibration spectrum optimal control in mechanical systems with constraints, using mathematical programming methods 04 p0586 A72-15004

Suboptimal nonlinear filter performance evaluation methods based on Kolmogorov equations for Markov process transition density function 04 p0505 A72-15040

Minimal order precompensator with state feedback for decoupling linear time-invariant multivariable control system, discussing design parameters determination from linear equations 04 p0506 A72-15109

Optimal control systems with terminal state constraints, presenting algorithm based on constraint-space conjugate gradient method for function minimization 04 p0506 A72-15111

Nonlinear plant and observation models with white Gaussian noise and continuous data, obtaining state vector a posteriori probability density for optimal prediction 04 p0506 A72-15112

Large linear time invariant dynamic control system optimum simplified model based on performance index connecting feedback errors 04 p0506 A72-15113

Detection characteristics of optimal interperiod processing radar pulse systems for arbitrary correlation of signal and noise fluctuations 04 p0487 A72-15145

Optimal detection of Markov radio signals with intrapulse FM using nonlinear filtration theory 04 p0487 A72-15146

Optimal two stage signal search in frequency vs arrival time indeterminacy plane of communication system 04 p0487 A72-15148

Necessary conditions for inequality-type mixed constraint optimal control, using abstract multiplier rule for Banach space of continuous and bounded measurable functions 04 p0506 A72-15201

High speed helicopter elastic rotor blade suboptimal motion controller decreasing flapping motion and bending loads despite small control angles and vertical gusts 04 p0465 A72-15504

Electric network scattering matrix and associated incident and reflected wave variables concepts applications in linear optimal control problem 04 p0507 A72-15528

Optimal control of linear systems /continuous and discrete/, using quadratic performance criterion 04 p0507 A72-15667

Adaptive control algorithm with disturbance prediction for solution of deterministic and stochastic optimization problems of linear equation of state and quadratic performance criteria 05 p0639 A72-15759

Distributed parameter state regulator system, investigating order of spatial discretization error in finite difference approximation to optimal response, control and performance cost 05 p0639 A72-15805

Optimal digital Kalman filtering for systems with continuous input noise by autocorrelation function matching [ASME PAPER 71-WA/AUT-21] 05 p0640 A72-15952

Computational algorithm for optimal control problem with variable terminal point constrained on state space surface, using iteration technique for satisfying transversality condition [ASME PAPER 71-WA/AUT-6] 05 p0640 A72-15957

Quasi-steady continuous process adaptive optimal control, discussing algorithms and model for sensitivity matrix calculation and digital simulation for strategy 05 p0640 A72-16200

Optimal dynamic system design for maneuvers with complete statistical information applied to limited power space flight 05 p0641 A72-16313

Optimal control synthesis for linear systems with quadratic functional under random white noise 05 p0641 A72-16314

Apollo lunar roving vehicle design requirements based on environmental conditions, emphasizing wheel drive control and steering systems optimization and navigational instrumentation 05 p0643 A72-16428

Spacecraft reentry trajectory parameter selection and optimal control algorithm under random atmospheric density variation 05 p0685 A72-16429

Airborne computer programmed adaptive optimal control for subsonic vehicle automatic landing with aerodynamic performance 05 p0685 A72-16430

Nonlinear and digital synthesis of computerized optimal control systems for long-life orbital stations and laboratories 05 p0724 A72-16434

Meteorological satellite stabilization and attitude control in synchronous equatorial orbit for two years life, emphasizing nutation damper optimal dynamic characteristics 05 p0725 A72-16437

Missile trajectory stochastic optimal control systems with fuel constraint by mean path deviation optimization 05 p0725 A72-16452

Nonlinear multivariable and linear systems optimal control in aerospace field, discussing use of performance indexes for fuel consumption, process evolution time or combination 05 p0725 A72-16453

KS-transformation based regularization technique modification for minimal fuel consumption rocket trajectory control during space maneuver 05 p0726 A72-16454

Optimal control problem formulation as nonlinear two point boundary value problems, comparing linear systems and Riccati equations for solution 05 p0726 A72-16455

Optimal closed loop control of stochastic nonlinear systems by expanded cost function applied to reduced terminal error atmospheric entry problem 05 p0685 A72-16462

Hierarchically structured man machine control systems synthesis, outlining iterative procedure for optimizing functional

05 p0727 A72-16471

Optimization algorithms for jet transport aircraft inertially based flight trajectory control in turbulent atmosphere, comparing with ILS

05 p0685 A72-16472

Penalty function method validity for singular solutions to optimal trajectory control problems with state variable inequality constraints

05 p0641 A72-16531

Optimality conditions for safe time in linear pursuit problems within n-dimensional Euclidean space

05 p0683 A72-16584

Control system design computerized optimization technique based on high speed repetitive simulations and gradient minimization, considering application to reusable and expendable boost vehicles

[AIAA PAPER 72-98]

05 p0729 A72-16812

MHD Couette flow stochastic processes optimal control synthesis by dynamic programming

05 p0653 A72-17131

Optimal averaging of control in distributed random parameter system described by hyperbolic partial differential equations, considering boundary values on characteristics as control functions

05 p0683 A72-17133

Statistical solution of analytical design of optimal control system maintaining coarseness/universality/with minimum quality loss

05 p0691 A72-17135

Optimal control of system described by parabolic partial differential equations with constraints on change rate of boundary conditions

05 p0683 A72-17137

Optimal control of one dimensional physical system with delayed argument described by nonlinear first order hyperbolic partial differential equations, using maximum principle

05 p0691 A72-17138

Optimal control of systems described by stochastic differential equations with delayed argument, using Kozhevnikov mean principle

05 p0683 A72-17140

Optimal control algorithm for nonlinear stochastic systems ensuring probability-wise stability and minimum error, using Liapunov theory and dynamic programming

05 p0691 A72-17141

Minimal energy stochastic controller design for electrically driven vehicles, using dynamic programming

06 p0795 A72-17304

Adaptive control for linear discrete time stochastic systems with unknown gain parameters, considering open loop feedback optimal control using quadratic performance index

[AD-739126]

06 p0791 A72-17305

Optimally sensitive closed loop control synthesis for systems containing uncertain time varying parameters, applying to stochastic systems

06 p0792 A72-17309

Linear time-varying control system synthesis for specific input and maximum admissible error, considering various weighting functions and constraints

06 p0792 A72-17311

Suboptimal feedback control for nonlinear dynamic processes, presenting control algorithm based on linear plant optimal solution

06 p0792 A72-17314

Optimal linear multivariable control systems design with prescribed eigenvalues, presenting method for corresponding weighting matrix elements

06 p0792 A72-17315

Optimum adaptive variable step size delta modulator-demodulator producing minimum error for Markov-Gaussian source

06 p0772 A72-17404

Second variational algorithm for iterative solution of unconstrained optimal control problems, examining linearized feedback control

06 p0839 A72-17592

Extremal field properties in optimal control problem applied to aircraft flight over assigned distance with minimum fuel consumption

06 p0758 A72-17727

Regularization theorems for epsilon solutions to Bellman functions in optimal quick response problems

06 p0847 A72-17728

Control, prediction and risk optimization in scheduling problems with incomplete random information

06 p0793 A72-17729

Conjugate gradient iterative method for optimal control problems with state variable constraint, noting optimal trajectory cases

06 p0793 A72-17953

Optimal final value control systems in phase-variable canonical form, discussing feedback gain singularity structure for single and multiple input systems

06 p0793 A72-17954

Discrete stochastic differential games with quadratic payoff function, deriving deterministic, randomized and game optimal control strategies

06 p0793 A72-17956

Suboptimal security solution of linear quadratic pursuit evasion game with state dependent, control dependent and additive noises, deriving equations for state estimation

06 p0794 A72-18151

Suboptimal stochastic control strategies class based on game theory and optimin principle, investigating completeness in closed discrete-time systems

06 p0794 A72-18167

Optimal control systems synthesis with allowance for given reliability, finding extremal value of quality function with constraint on probability of fail-safe operation

06 p0794 A72-18305

Stochastic optimal control for operations of plants with pure lag and two point estimate of performance index investigating systems stability

06 p0795 A72-18662

Optimal control of hydromagnetic flow of electrically conducting fluid in equilibrium cylindrical configuration, using dynamic programming method

07 p1040 A72-18980

Optimal control of distributed parameter systems with incomplete state information by dynamic programming and Liapunov methods

07 p1034 A72-18981

Time behavior of single axis gyro platforms, considering linear and nonlinear-suboptimal control

07 p0983 A72-19169

Real time near optimal closed loop control solution to fixed time nonlinear differential game by periodically updating to two point boundary value problem

07 p1027 A72-19278

Optimal thrust reversing in pursuit evasion games between two aircraft in horizontal plane, considering cost functions and termination criteria

07 p0912 A72-19282

Multiinput and multioutput linear and nonlinear dynamic system maximum likelihood identification based on state vector formulation and optimal filter use

07 p0959 A72-19286

Aircraft optimal terminal guidance nonlinear feedback control law, deriving maximum principle by digital computer program

07 p1033 A72-19287

Approximating trajectory solution to state constrained optimal control problems, discussing convergence

07 p0959 A72-19289

Dynamic programming for optimal stochastic control problem with Gaussian shot noise involving parabolic or elliptic differential equation in unbounded domain, discussing iterative solution and quasi-linearization

07 p1027 A72-19292

Control optimization of pulsed laser automatic tracking system, analyzing angular and temporal distribution of signals

[CLEA PAPER 9.4]

07 p0942 A72-19386

Dynamic control system parameters optimization for series of maneuvers under different degrees of informability

07 p0959 A72-19652

Minimal order controller for decoupling of linear multivariable systems with low order control devices and reduced control effort

07 p0960 A72-19697

Linear dynamic control systems controllability and observability quality analysis and optimization, considering determinant, trace and maximal eigenvalue

07 p0960 A72-19699

Linear multivariable system design based on relationship between performance index parameters and optimal response in frequency domain, exemplifying gas turbine feedback controller design

07 p0961 A72-19710

Multivariable linear systems control structure via optimal control theory with quadratic criterion, permitting compensation for nonzero mean value and slowly varying perturbations

07 p0961 A72-19711

Weighting matrices effect on optimal regulator for linear time invariant multivariable systems

07 p0961 A72-19713

Eigenvalue sensitivity in optimal feedback control systems with state estimation

07 p0962 A72-19716

Optimal control on nonlinear multivariable plant with common constraint on control action, presenting linear programming algorithm

07 p0962 A72-19717

Optimal control of lumped and distributed parameter systems with time lag, considering approach with extrapolator insertion and suboptimal solution based on system dynamic equation

07 p0962 A72-19718

Optimal control of linear multivariable plants with one or more quality criteria, considering control channels and game theory

07 p0962 A72-19720

Optimal multivariable control systems theory, considering linear programming, maximum principle and differential games

07 p0963 A72-19724

Minimax optimal control problems with incomplete information, using dynamic programming and phase space location measurements

07 p0963 A72-19970

Optimal strategies conditions for game problems in conflictingly controlled system, discussing minimax technique and Bellman equation solution

07 p1028 A72-19971

Optimal alignment and calibration of gyro-stabilized platforms, using Kalman filter and minimal weighted squared errors

07 p0989 A72-20280

Self similar invariant group solutions to Bellman nonlinear partial differential equation for optimal correction problems of control systems motion with random disturbances

07 p0963 A72-20322

Integrated systems approach to computer simulation with functional modules to achieve control processor independent expansion and optimization

07 p0951 A72-20331

Optimal test conditions in magnetoscopic control by electrical system for subsurface defects detection, obtaining tangential magnetic field on carbon steel plates

07 p0991 A72-20421

External disturbance accommodation in optimal control, based on characterization of waveform modes, applying to linear-quadratic regulator problem

07 p0963 A72-20591

Operational optimization of ion traps with dc amplifiers mounted on nonoriented earth satellite, proposing control circuit

07 p0993 A72-20664

Soviet book on optimal trajectory synthesis covering second order linear control systems analysis based on Pontryagin maximum principle and Bolyanski theory

08 p1197 A72-20750

Compensated Kalman filter as suboptimal state estimator to eliminate steady state bias errors in use with mismatched asymptotic time-invariant case

08 p1144 A72-20845

Standard linear estimation and control problem with quadratic loss, optimizing information rate by minimizing total measurements number through Riccati equation singular solution

08 p1144 A72-20859

Nonlinear filter dynamics for stochastic optimal control for quadratic cost functional, evaluating performance

08 p1145 A72-20866

Electroerosion machining with optimal control of electrical parameters, number of passes and electrode wear, using nonlinear programming and critical path method

08 p1174 A72-21032

Complex erosion machining control and optimization, investigating current and tension effects

08 p1175 A72-21042

Pontryagin maximum principle application to optimal linear filtration for multivariable systems with signal processing

08 p1133 A72-21374

Optimal controllers analytic design for linear steady controlled differential equations system

08 p1145 A72-21467

Optimal stabilization of permanent rotation of solid body with arbitrary mass distribution by controlled gyroscope

08 p1168 A72-21552

Optimal stabilization law for ensuring gyroscope equilibrium position asymptotic stability in rms error, aperiodicity and system transient response time

08 p1168 A72-21553

Extremal system with second control loop for search signal frequency regulation to optimize primary loop operation, determining system dynamic errors under random drift

08 p1146 A72-21555

Sequential reliability control and analysis in low run production with plan optimization and tests number reduction

08 p1181 A72-22069

German monograph on optimal attitude control of satellites with rotors and simultaneous spin reduction, covering motion equations for stable equilibrium and circular orbit

09 p1394 A72-22330

Optimal and quasi-optimal automatic control systems synthesis by cross section method

09 p1290 A72-22489

Optimal answer-back communications systems using feedback channel for error checking

09 p1277 A72-22568

Optimal control of two shaft gas turbine engine in helicopter, using cybernetic equipment

09 p1374 A72-22862

Epsilon technique for optimal control computation in pursuit and evasion problems, reducing dynamic to nondynamic optimization problem

09 p1342 A72-23253

Digital computer prepared optimal controls setting diagrams for single loop, linear and concentrated parameter control circuit design

09 p1291 A72-23372

Numerical algorithm for optimal coefficient equations in analytical design of complex control plants
10 p1291 A72-23426

Optimal control synthesis for linear passive stationary plants with symmetrical coefficient matrices of minimized functional
10 p1291 A72-23431

Singular control problems calculation in trajectory optimization using sufficient conditions for control values set form
10 p1291 A72-23432

Algorithms for optimal adaptive control of steady motions of single channel discrete extremal systems with independent search, studying quality functional behavior
10 p1291 A72-23437

Interplanetary spacecraft midcourse guidance stochastic control, deriving algorithm for computing optimum velocity correction and execution time with allowance for correction-dependent errors
10 p1508 A72-23778

Quadratic performance index generation for optimal design of completely controllable, scalar linear system with state feedback
10 p1454 A72-23783

Optimal probing signals design for state vector parameter estimation, considering Fisher information matrix function as optimality criterion
10 p1454 A72-23786

Differential geometric methods to extend linear system theory to nonlinear classes, considering differential equations, controllability, optimal control, stochastic processes and bilinear system problems
10 p1503 A72-23788

Nonlinear programming and parameter optimization algorithms for constrained feedback control system design
10 p1441 A72-23790

Quadratic cost, nonlinear optimal adaptive stochastic control of linear plant and measurement models excited by white Gaussian noise and with unknown parameters
10 p1455 A72-23792

Nonlinear programming solution of optimal control problems, using methods of centers and feasible directions
10 p1455 A72-23797

Recursive minimum variance linear filter and controller for systems with white state-dependent noise
10 p1455 A72-23800

Optimal nonlinear estimation problem with nonlinear plant and observation models obtaining state vector a posteriori probabilities for prediction and smoothing via partition theorem
10 p1455 A72-23803

Near optimal closed loop control laws for fixed time pursuit-evasion differential game between two aircraft in vertical plane, using dynamic modeling
10 p1421 A72-23805

Stochastic projected gradient algorithm to maximize SNR subject under linear or nonlinear constraints, applying to detector antenna array processing
10 p1456 A72-23808

Adaptive optimal antenna array detection of unknown spatial location radar targets, noting tradeoff between array size and signal energy with respect to performance
10 p1434 A72-23809

Stochastic nonlinear system one-step optimal dual control instead of separation control policy for performance improvement
10 p1456 A72-23810

Optimal closed loop control of discrete stochastic nonlinear systems, considering guidance and navigation for space and terrestrial vehicles
10 p1456 A72-23811

Optimal control computation for nonlinear hyperbolic partial differential system by gradient and quasi-linearization techniques, noting MHD, fluid flow and electromagnetic wave propagation
10 p1456 A72-24453

Modified sweep variation method for optimal control programs, solving two point boundary value problem by linear perturbation technique
10 p1551 A72-24455

Sensitivity comparison of equivalent open and closed loop optimal control systems, extending performance index formulas to instantaneous and isoperimetric constraints
10 p1456 A72-24456

Minimum fuel continuous low thrust orbit transfer problem of optimal control, solving boundary value problem with Multiple Substitution Polynomials and Marquardt method
10 p1552 A72-24486

Optimal closed loop control of discrete stochastic nonlinear systems, obtaining solution by cost function in power series around deterministic trajectory
10 p1457 A72-24499

Steady state operation of automatic control system to stabilize random vibration spectra, noting maximum control accuracy at optimum loop gain
10 p1457 A72-24635

Equivalence conditions for optimal control problems for stochastic and deterministic plants in cases of nonrandomized strategies
10 p1457 A72-24637

Adjoint control transformations advantages in optimal trajectories determination by Pontryagin maximum principle
10 p1547 A72-24879

Optimal filter for narrow band stochastic signal processing, using Wiener theory
10 p1441 A72-25103

Optimal control of linear stochastic feedback systems described by functional differential equations
10 p1458 A72-25145

Linear continuous time systems optimal dual control problem solution by reduction to partial differential equation in finite domain with suitable boundary conditions
10 p1458 A72-25170

Optimal control problems characterized by nonlinear Volterra equations system, obtaining necessary conditions for extremality in maximum principle integral form
11 p1675 A72-25319

Optimality conditions for dynamic control systems, considering multidimensional singular controls and state space transformations
11 p1608 A72-25324

Extremal field properties in optimal control problem applied to aircraft flight over assigned distance with minimum fuel consumption
11 p1574 A72-25329

Control, prediction and risk optimization in scheduling problems with incomplete random information
11 p1608 A72-25331

Optimal control design for digital guidance system, conducting efficiency and reliability analyses
11 p1600 A72-25437

Pulsed perturbation and Q coupled extremal control systems with noise distortion, obtaining optimal transfer functions with Kolmogoroff-Wiener method
11 p1610 A72-25448

Linear maximization of turbine disk natural vibration frequencies combination, solving optimal control problem via Pontryagin maximum principle
11 p1734 A72-25727

Optimal dynamic system design for maneuvers with complete statistical information applied to limited power space flight
11 p1610 A72-25796

Optimal control synthesis for linear systems with quadratic functional under random white noise
11 p1610 A72-25797

Suboptimal feedback control law synthesis for nonlinear systems, using second order approximation to optimal control
11 p1610 A72-25872

Spacecraft reentry into random medium atmosphere, determining optimal control procedure for prescribed arrival region and time with simulation equation
11 p1686 A72-25930

Spacecraft interplanetary guidance trajectory correction, deriving algorithm for optimal accuracy and minimum fuel expenditure
11 p1718 A72-25931

Flight mechanics of point with limited power propulsion system and energy storage unit, investigating variational maximum payload problem with singular control optimization
11 p1727 A72-25932

Missile tracking laws for inhomogeneous linear-quadratic performance optimization
11 p1593 A72-25992

Book on sensitivity theory covering continuous and sampled data systems, linear, nonlinear and self exciting dynamic systems, optimal systems, large systems, controllability, etc
11 p1611 A72-26021

Matrix and graphic test construction methods for optimal design of logic networks in automatic control systems
11 p1612 A72-26443

Spacecraft motion stabilization about mass center and optimal angular velocity control using minimax technique
11 p1684 A72-26903

Quadratic optimal control problem solution via multipliers method, generating minimizing convergent sequence of arcs
12 p1794 A72-27509

Classical isoperimetric problem approximation via multipliers method, generating minimizing convergent sequence of arcs
12 p1836 A72-27510

Optimal allocation of tasks and resources, using asymptotic properties of stochastic approximation method
12 p1837 A72-27823

Multiple input automata with optimal response to any input set, using maximum mean gain as criteria for response selection
12 p1787 A72-27923

Flight vehicle motion described by linear differential equations with variable parameters, discussing programmed optimal control solution by functional analysis
12 p1755 A72-28128

Suboptimal controls of linear multidimensional plants with variable parameters, considering asymptotic stability
13 p1935 A72-28609

Algorithmic method in ALGOL 60 for successive approximations of optimal control problems, discussing improved convergence
13 p1935 A72-28707

Optimizing functional for combined control of dynamic control plant, synthesizing stabilization system for maximal transient damping
13 p1935 A72-28713

Optimal algorithms for analysis, synthesis and correcting filter of self adaptive control systems
13 p1936 A72-29154

Self organizing control system for optimal performance of navigation instruments, using adaptive algorithm for statistical error filtration
13 p1996 A72-29157

Two step adaptive control of multidimensional linear static system, using first and second step ratio and optimization equations
13 p1936 A72-29159

Statistical superoptimal search strategies of self optimizing systems, applying to one dimensional step type and multiextremal problems
13 p1936 A72-29160

Optimal random search noise recognition systems with Bayes teaching technique
13 p1924 A72-29162

Algorithm for optimal strategy in statistical plant control for machine parts production and assembly, discussing measuring equipment errors effects
13 p1965 A72-29168

Optimal viability of complex system with ambient medium interaction, using stochastic game theory
13 p1936 A72-29174

Dynamic programming for optimal statistical control of self adaptive systems with fixed learning experiments, noting structural constraints for suboptimality
13 p1965 A72-29178

Optimal control systems synthesis with allowance for given reliability, finding extremal value of quality function with constraint on probability of fail-safe operation
13 p1937 A72-30073

Control optimization avoiding stability problem by integrating matrix Riccati equation
13 p1937 A72-30074

Pontryagin maximum principle for optimal terminal velocity control of automatic space probe descent in Mars atmosphere
14 p2162 A72-30456

Spacecraft optimal control after transfer from hyperbolic trajectory to planetary satellite orbit by atmospheric drag, minimizing engine thrust
14 p2129 A72-30470

Optimal filter synthesis for linear time varying parameter control systems, using computer-aided solution of multidimensional Riccati equations
14 p2090 A72-31120

Quasi-conservative optimal nonlinear self excited oscillation systems theory for automatic control, telemechanics and computer applications
14 p2133 A72-31130

Linear control systems optimal synthesis using ALGOL program for digital computers minimizing error square integral
15 p2210 A72-31687

Optimal feedback controller design based on cooperative game described by quadratic cost functional under linear differential equation constraints, applying to satellite terminal rendezvous
15 p2267 A72-31789

Suboptimal feedback control for aircraft gust alleviation design, using indirect perturbation information through normal acceleration factor measurement
15 p2181 A72-32025

Optimal controller design for parabolic type second-order linear stationary systems, discussing integro-differential equation solution possibility
15 p2211 A72-32170

Infinite dimensional system optimal discrete-time feedback controller calculation by n-dimensional system approximation using recurrence relations with functional analysis
15 p2212 A72-32245

Automatic control theory trends /1950-1970/, discussing nonlinear, discontinuous and adaptive systems, optimization problems, Liapunov stability theory, etc
15 p2212 A72-32576

Flexible launch vehicle optimal and constrained-optimal control for performance index minimization, using sensors and constant feedback gains
15 p2321 A72-32585

Random vibration optimal control by transfer function estimation, using relative phase information in cross spectral density functions to sort out self noise 15 p2215 A72-32629

Optimal state space synthesis of discrete linear computer controlled systems with quadratic cost function, using Liapunov, Pontryagin, and Bellman techniques 15 p2212 A72-32765

Sensitivity design of multiple input controller for dynamic optimization applied to linear systems with quadratic performance index 15 p2212 A72-32795

Limit set configuration of optimal nonlinear feedback control scheme in n-dimensional state space 15 p2213 A72-32797

Matrix Riccati equation solution method in optimal control theory, noting boundary conditions implementation 15 p2265 A72-32803

Optimal control of observation processes, formulating solvability conditions in terms of ordinary differential equations 16 p2370 A72-32927

Discontinuity problems in optimal control of systems describable by ordinary differential equations, deriving Weierstrass optimality conditions 16 p2371 A72-32939

Optimization of noise impeding observation of dynamic system subjected to random perturbations, discussing optimal control based on least square estimate 16 p2371 A72-33090

Perturbation extremum controller with simple coincidence logic, discussing fluidic implementation and performance in simulated plant control 16 p2350 A72-33193

Optimal invariant control system synthesis for inertial plants with nonminimal phases and random perturbation compensation 16 p2371 A72-33263

Computer algorithms for adaptive optimal synthesis of complex electronic systems, using stochastic approximation and gradient search with data storage 16 p2367 A72-33265

Optimal filtering estimate of noisy nonlinear partial differential distributed parameter system, using least squares and invariant imbedding techniques 16 p2416 A72-33575

Spacecraft free fall trajectory calculation, using numerical optimization procedure based on Hamilton principle for two point boundary value problems 16 p2460 A72-34021

Perturbation method for two point boundary value problem for fluid flow applied to optimal reentry control problem 16 p2462 A72-34166

Computational difficulties reduction in optimal control and estimation problems, discussing controllability and observability 17 p2574 A72-34417

Phase locked loop model based on AGC circuitry, devising optimum control strategies 17 p2532 A72-34419

Optimal and quasi-optimal automatic control systems synthesis by cross section method 17 p2533 A72-34652

Controllability, observability and optimal feedback control of affine hereditary differential systems. 17 p2533 A72-34950

Controlled systems with discontinuous couplings and means of optimization of their control 17 p2621 A72-35035

Control function improvement method for flight dynamics variational problems solution, discussing dynamic programming, trajectories with uncontrolled elements and coordinate transformation 17 p2607 A72-35036

Optimal deterministic guidance for bounded-thrust spacecrafts. 17 p2609 A72-35101

An automated gradient projection algorithm for optimal control problems. 17 p2576 A72-35244

Russian book on numerical methods in optimal control systems theory covering functional extremum, dynamic programming, control synthesis and statistical linearization of nonlinear systems 17 p2533 A72-35458

Optimal aerodynamic attitude stabilization of near-earth satellites. 17 p2622 A72-35488

Optimal regulator inverse problem analysis for multi-input systems with integral type performance indices, using state variable canonical form 17 p2534 A72-35527

Limit-cycle bounds of a satellite attitude-control system. 17 p2622 A72-35529

Numerical solution of an optimal control problem with a probability criterion. 17 p2534 A72-35531

Reachable sets and singular arcs for minimum fuel problems based on norm-invariant systems. 17 p2534 A72-35533

Time-optimality of a class of extremal systems with statistical signal processing 17 p2518 A72-35782

Computer control of aircraft landing. 17 p2578 A72-35950

State feedback control law for linear multiinput multioutput time-invariant dynamic system under disturbance to obtain output with zero steady state error 18 p2672 A72-36054

Stochastic optimal path selection via N discrete points set, discussing probability distributions and computer requirements 18 p2672 A72-36055

Functional relationships between the conventional steady-state error characteristics and the weighting matrices in the quadratic performance index. 18 p2672 A72-36058

Optimal temperature control for microbial inactivation by composite environment of heat and gamma radiation, using quadratic technique 18 p2649 A72-36313

Optimal signal design for digital center of gravity feedback communications over white noise channels, using energy ratio functions 18 p2659 A72-36316

Parabolic switching boundaries method for optimal fuel consumption control of manned orbital space vehicles 18 p2672 A72-36325

Second order differential guidance game, formulating strategy for optimal feedback control 18 p2673 A72-36660

Minimum fuel control of second order system in n-dimensional Euclidean space, examining Pontryagin maximum principle applicability 18 p2673 A72-36696

Optimal control of plants whose transfer functions contain zeros. 18 p2673 A72-36724

Optimality conditions in a problem of heat transfer process control 18 p2741 A72-36809

Hill-climbing controller for plants with any dynamics and rapid drifts. 18 p2673 A72-36819

Optimal control with partially specified input functions. 18 p2673 A72-36821

Optimal filtering in linear distributed-parameter systems. 18 p2673 A72-36823

Computation of optimal controls by a method combining quasi-linearization and quadratic programming. 18 p2673 A72-36824

Optimal control laws for stochastic problems involving intentional errors, caution and probing 18 p2674 A72-36825

Optimal minimal-order observers for discrete-time systems - A unified theory. 18 p2674 A72-37099

Linear stochastic system optimal measurement strategy and matched Kalman type filter computation via transformation into deterministic control problem. 18 p2674 A72-37100

Modifications and extensions of the sequential gradient-restoration algorithm for optimal control theory. [AD-736265] 19 p2776 A72-37246

Optimal terminal rendezvous as a stochastic differential game problem. 19 p2869 A72-37284

Optimally sensitive adaptive control techniques for systems with unknown time-varying parameters, suggesting applicability to ATC 19 p2776 A72-37289

Sufficient conditions for two stage stochastic optimal control difference approximation by finite dimensional extremum problem sequences 19 p2777 A72-37318

Certain problems of the theory of hierarchical control systems 19 p2824 A72-37379

Optimal control of plant described by nonlinear hyperbolic equations with variable initial conditions of system, noting constraints on plant phase coordinates 19 p2777 A72-37434

French monograph - Optimal impulse corrections for near-circular orbits - Comparison of various thruster configurations 19 p2856 A72-37491

Model reference adaptive control systems design based on optimal control, parametric optimization, stability and statistical estimation theory 19 p2778 A72-37722

Optimal avoidance control to transfer dynamic system from initial to terminal state in maximum distance problem [ASME PAPER 72-AUT-D] 19 p2778 A72-37724

Homogeneous linear partial differential equation for optimal control with boundary condition formed by terminal component, noting weighting functions for linear plant 19 p2778 A72-37989

Optimization of control and observation processes in a dynamic system at random disturbances 19 p2778 A72-37991

Evaluation of the coefficients of influence of initial information and model errors on optimization results 19 p2779 A72-37996

Optimal selection of stability augmentation parameters for excellent pilot acceptance. 19 p2752 A72-38227

An optimal model-following flight control system for manual control. 19 p2753 A72-38228

Dynamic programming technique for simultaneous measurement and dynamic control optimization for stochastic systems 19 p2779 A72-38233

Pontryagin Minimum Principle application to stochastic optimal control problems formulated around linear systems with Gaussian noise and general cost criteria 19 p2779 A72-38234

Optimal decentralized control of two coupled linear stochastic systems, introducing fake plant white noise for weak coupling effects compensation 19 p2779 A72-38236

Linear control system design with parameter uncertainties, using stochastic control approach based on minimization of state vector-dependent quadratic performance index expected value 19 p2780 A72-38239

Invariant poles feedback control of flexible, highly variable spacecraft. 19 p2869 A72-38240

Suboptimal stochastic control of a class of linear distributed parameter regulators. 19 p2780 A72-38243

Discrete optimal terminal control, with application to missile guidance. 19 p2780 A72-38257

Nonlinear on-line rapid estimation scheme with application to trajectory maneuvering vehicles. 19 p2781 A72-38258

Investigation of data rate requirements for low visibility approach with a scanning beam landing guidance system. 19 p2832 A72-38259

Asymptotic series solution of optimal systems with small time-delay. 19 p2826 A72-38268

Feedback loop equations and discrete measuring point methods for synthesis of optimal control systems with location dependent controlled variables 19 p2782 A72-38311

Optimal recurrent and nonrecurrent algorithms for polynomial diverging functions of learning and recognition in form of adaptive threshold elements 19 p2769 A72-38465

Optimal control synthesis for linear passive stationary plants with symmetrical coefficient matrices of minimized functional 19 p2782 A72-38514

Singular control problems calculation in trajectory optimization using sufficient conditions for control values set form 19 p2782 A72-38515

Algorithms for optimal adaptive control of steady motions of single channel discrete extremal systems with independent search, studying quality functional behavior 19 p2782 A72-38520

Comparison of the quality of empirical and optimal adaptation algorithms in multiple-alternative choice problems 19 p2828 A72-38583

Optimal strategies for control of a semi-Markovian process by a set of observers 19 p2770 A72-38584

Optimal delay control circuit adjustment by approximate calculation with quadratic error integral and ITAE criterion dependence on loop amplification 19 p2783 A72-38643

Design of a reduced-state suboptimal filter for self-calibration of a terrestrial inertial navigation system. [AIAA PAPER 72-849] 20 p2949 A72-39080

Optimum aiding of inertial navigation systems using air data. [AIAA PAPER 72-847] 20 p2950 A72-39082

Attitude control of a spinning Skylab. [AIAA PAPER 72-889] 20 p2975 A72-39112

Problem of the analytical design of controllers for parabolic and hyperbolic equations 20 p2946 A72-39468

Coincidence of the mapping point with the slip plane in the modified differential descent method 20 p2946 A72-39470

Response of discrete linear systems to forcing functions with inequality constraints. 20 p2910 A72-39604

Book - Some aspects of the optimal control of distributed parameter systems. 20 p2946 A72-39731

Performance improvement of amplitude-constrained minimum-variance controller by minimising sum of variance. 20 p2911 A72-39772

- Solution to the encounter avoidance problem in a linear differential game 20 p2947 A72-39865
- Optimization of controlled plants sequence with stochastic process described by partial differential equations, noting hydropneumatic system of liquid fuel jet engine 20 p2947 A72-39903
- Heat flux and friction force minimization problems equivalence in optimal control of incompressible boundary layer on isothermal plate 20 p2914 A72-39918
- Minimax technique in optimal control problems with incomplete information on phase vector, using dynamic programming and system position measurement refinements 20 p2911 A72-40027
- Optimal strategies conditions for game problems in conflict controlled system, discussing minimax technique and Bellman equation solution 20 p2947 A72-40028
- Linear estimation stochastic filtering and deterministic linear optimal regulation duality concept extension to problems with inequality constraints 21 p3074 A72-40228
- Using the quasi-homogeneity of differential equations in modeling physical systems 21 p3083 A72-40377
- Optimal single stage control law applicable to linear multivariable systems based on discrete-time analysis, discussing real time simulation on hybrid computer 21 p3037 A72-40637
- A computational technique for optimal control problems having singular arcs. 21 p3037 A72-40641
- Necessary conditions for optimality in a general class of non-linear mixed boundary value control problems. 21 p3037 A72-40644
- Linear distributed parameter systems modal analysis and design for low sensitivity optimal feedback control, using linear differential operators 21 p3037 A72-40646
- Trajectory synthesis of optimal control 21 p3037 A72-40704
- Selection of an optimal control law for time-lag control systems subjected to random load disturbances 21 p3038 A72-40705
- Optimal risk equation and solution existence and uniqueness of dual control problems with unknown parameter and additive disturbances 21 p3038 A72-40706
- A method for the development and optimization of controller-models for man-machine systems. 21 p3011 A72-41420
- Book on nonhomogeneous boundary value problems for different classes of linear evolution parabolic operators, with applications to optimal control problems 21 p3076 A72-41527
- Performance optimization of satellite semipassive aerodynamic attitude controller for near-earth orbits, considering damping time and pointing error [ALAA PAPER 72-923] 21 p3082 A72-41567
- Optimal invariant conversion of information from a turbine flow meter and a capacitive fuel gauge 21 p3058 A72-41801
- An algorithm in the gradient method for synthesis of nonlinear control systems 21 p3039 A72-41804
- Necessary conditions for continuous parameter stochastic optimization problems. 22 p3198 A72-41932
- Compatible controllers for time-varying linear plants. 22 p3161 A72-41939
- Development and optimization of a nonlinear multiparameter human operator model. 22 p3149 A72-41949
- A design procedure for intermediate-order observer-estimators for linear discrete-time dynamical systems. 22 p3161 A72-41994
- Optimal controller design for parabolic type second-order linear stationary systems, discussing integro-differential equation solution possibility 22 p3162 A72-42079
- Optimizing functional for combined control of dynamic control plant, synthesizing stabilization system for maximal transient damping 22 p3162 A72-42091
- Optimal receivers for measuring time lags of pulse signals in the presence of fading 22 p3154 A72-42123
- Linear dynamic control system synthesis methods based on aggregation and suboptimal control by decomposition, considering quadratic performance criterion 22 p3162 A72-42177
- Mathematical formulation of linear programming problem, reducing vector value optimal management plan determination to quadratic programming problem 22 p3198 A72-42179
- Liapunov function method in control problems of distributed parameter systems /Survey/ 22 p3205 A72-42180
- An application of the theory of Lie groups in the optimal control problem for linear dynamic systems with time-variable coefficients 22 p3162 A72-42181
- Synthesis of statistically optimal multiloop control systems containing essentially nonlinear elements 22 p3162 A72-42182
- Synthesis problems of optimum quick-response engine control systems 22 p3216 A72-42190
- Variational method for invariance problem solution for optimal finite state of nonlinear dynamic systems under external disturbances 22 p3162 A72-42240
- Optimal control of complex time lag systems with series connected lumped and distributed parameters described by linear differential equations 22 p3162 A72-42241
- On the convergence of difference approximations in distributed parameter optimal control problems. 22 p3162 A72-42486
- Control and estimation separation in stochastic optimization, discussing Wonham observer matrix reversibility and replacement in closed and closed-open loop systems 22 p3163 A72-42740
- Optimal random disturbance intensity control of dynamic systems, minimizing error with respect to observed and controlled plant coordinates 23 p3274 A72-43221
- Approximate optimal control solution to boundary value problem for one dimensional heat conduction equation, using Fredholm linear integral and degenerate kernels 23 p3274 A72-43526
- A survey of methods of feasible directions for the solution of optimal control problems. 23 p3274 A72-43537
- Adaptive filtering algorithms for Kalman filter optimal gain estimation, discussing Bayesian, maximum likelihood, correlation and covariance matching methods relationship 23 p3274 A72-43542
- Some numerical results using Kalaba's new approach to optimal control and filtering. 23 p3274 A72-43543
- On discrete linear time-invariant systems with singular transition matrix. 23 p3275 A72-43545
- Control of jump parameter systems with discontinuous state trajectories. 23 p3275 A72-43547
- Optimization of contraction-mapping algorithm for calculating optimal controls. 23 p3275 A72-43607
- Output-feedback control law for randomly distributed multivariable system. 23 p3275 A72-43608
- Optimally sensitive control for distributed parameter systems. 23 p3275 A72-43612
- A direct method for computing optimal feedback control for linear systems. 23 p3275 A72-43613
- Stochastically optimal terminal control system synthesis for loss function dependence on finite phase coordinates of dynamic system, considering soft landing of flight vehicle 23 p3275 A72-43781
- Optimal control of stochastic systems with continuous and discontinuous random disturbances, obtaining problem solution conditions for linear system via dynamic programming 23 p3276 A72-43782
- Asilomar Conference on Circuits and Systems, 5th, Pacific Grove, Calif., November 8-10, 1971, Record. 23 p3276 A72-43851
- Regulator vector selection algorithm for largest estimate of exponential absolute control stability region based on Popov frequency condition reformulation 23 p3276 A72-43853
- Optimal, on-line linear filtering with noisy, time-delayed observations. 23 p3276 A72-43855
- Reduced order observers design for optimal control of linear discrete time stochastic systems, considering velocity-aided tracking filter 23 p3276 A72-43856
- Optimal minimax regulation of a dynamic system. 23 p3276 A72-43860
- The optimal control of merging aircraft - Implementation of the hybrid air traffic controller. 23 p3277 A72-43868
- Atmospheric density from spacecraft drag data by successive optimization of control laws, using quadratic programming 23 p3277 A72-44003
- Optimal filtration algorithms of Markov parameters of discrete time signals in digital data transmission system with background noise, using Gaussian probability density approximation 23 p3264 A72-44005
- The inverse problem of optimal process theory and the synthesis of linear optimal systems in the case of restricted phase coordinates 23 p3277 A72-44008
- Achievement of given motion by impulse correction under arbitrary disturbances /difference models/ 23 p3313 A72-44044
- Application of quadratic optimization to supersonic inlet control. 23 p3251 A72-44195
- A manifold imbedding algorithm for optimization problems. 23 p3268 A72-44197
- A learning approach to the parameter-adaptive self-organizing control problem. 23 p3277 A72-44198
- Optimal gyroresonator control in electric oscillating field by HF magnetic Lorentz force in terms of relativistic electron trajectory drifts 23 p3290 A72-44200
- Multistage rocket optimal control, deriving conditions for existence of minimum of performance index function of mass, position and velocity initial and final values 23 p3343 A72-44264
- Optimal synthesis of a two-parameter continuous controller for a jet engine with an afterburner 23 p3326 A72-44284
- Allowable region of approach height and desirable approach path of aircraft for safe landing, presenting optimal control trajectories 23 p3252 A72-44497
- A computational successive improvement scheme for adaptive optimal control processes. 23 p3268 A72-44549
- Optimum reception algorithms in communication systems with decision feedback in presence of noise in forward and return channel 24 p3379 A72-44747
- Aerodynamic solar semipassive hybrid system for continuous three dimensional attitude control of axisymmetric satellite in near-earth orbits, discussing operation, design and optimization 24 p3450 A72-45146
- Optimal three dimensional maneuvering of a rocket powered hypervelocity vehicle. 24 p3450 A72-45151
- Duality in problems of the calculus of variations and optimal control 24 p3419 A72-45390
- Maximum principle and penalty function technique for flight optimization, noting optimal control for climbing flight 24 p3369 A72-45444
- Formation of an optimizing functional in control systems 24 p3386 A72-45511
- Selection of an optimizing functional in control system synthesis 24 p3387 A72-45512
- Automatic complex control systems with digital computer application for optimal control of production systems, selecting optimality criterion from hierarchically distributed local criteria 24 p3387 A72-45513
- Parametric optimization of the equivalent transfer function of a system with the aid of the error integral 24 p3387 A72-45700
- Comparison of linear and Riccati equations used to solve optimal control problems. 24 p3420 A72-45776
- Omega-Dot law for time optimum approximation of rotating satellites wobble damping with control moment gyroscopes, calculating wobble rates by energy sink method 24 p3453 A72-45777

OPTIMIZATION

- NT FLIGHT OPTIMIZATION
- NT OPTIMAL CONTROL
- NT TIME OPTIMAL CONTROL
- NT TRAJECTORY OPTIMIZATION
- Optimal psychomotor performance in relation to thermal comfort conditions in man, using complex dual tests and subjective rating scales 01 p0016 A72-10117
- Optimum cylindrical handle size determination by muscle electromyography, considering gripping task, routine performance and fatigue test 01 p0017 A72-10119
- Airline Propulsion Team approach to DC-10 aircraft power plant design for maximum operational effectiveness [SAE PAPER 710778] 01 p0116 A72-10270
- Optimal design of logic networks in homogeneous microelectronic structures, using shortest link search and graph continuity parameters 01 p0034 A72-10300
- Optimal measurement programs for instrument controlled spacecraft trajectory sections, using maximum likelihood method 01 p0127 A72-10354
- Linear antenna array optimal power pattern synthesis by best approximation, using weighting function in man-machine iteration 01 p0029 A72-10665
- Computerized optimization procedure for microwave circuits without tuning elements, applying to high pass filter design 01 p0040 A72-10686

Clutter suppression by amplitude weighted pulse trains in coherent radar, obtaining optimum weights and signal-to-clutter gain as function of Doppler frequency

01 p0030 A72-10789

Signal flow graph theory based computer diagnosis using blocking gate approach, constructing algorithm for gates optimal locations determination for maximum faults distinguishability

02 p0184 A72-11479

Circuit theory optimization techniques in computer aided electric circuits and devices design, discussing algorithms, sequential methods, convergence speed, topologies, system responses, etc

02 p0197 A72-11688

Optimum power allocation in design of phase-coherent receiver having bandpass limiter, extending technique from single channel to two channel system

02 p0174 A72-12136

Computerized bias optimization of telemetry timing accuracy applied to Minuteman system

02 p0174 A72-12144

Optimization methods in digital data transmission systems, discussing equalization circuits for base band channel using metallic lines

02 p0182 A72-12691

Optimal synthesis for radiator coordinates and complex amplitudes of linear antenna array for given radiation pattern

02 p0196 A72-12756

Optimal radiative capacity of star shaped radiator with mirror reflecting surfaces for vacuum cooling of elongated finned bodies

02 p0304 A72-12867

Optimization algorithms synthesis models, discussing conceptual-implementable transition

03 p0327 A72-13702

Complex determinate and indeterminate structures weight minimization subject to design constraints relative to size, allowable stress, natural frequencies, etc

03 p0446 A72-13703

Analytical optimization of point to point communication above spherical ground, obtaining frequency minimizing transmission losses

03 p0325 A72-14193

Multipurpose optimal design of elastic structures with piecewise uniform cross section for load states and prescribed stiffness by energy methods

03 p0455 A72-14386

Robust delta modulator configuration with minimal mean square error from signal statistics estimates, discussing design and performance by digital simulation

04 p0486 A72-14486

Genetic code numerical structure association with logarithmic optimization rule for hierarchy of structures from molecular biology experiments

04 p0470 A72-14794

Computational efficiency of minimization algorithm for solving eigenvalue problem arising from dynamic structural analysis by finite element method

04 p0585 A72-14845

Herringbone grooved gas bearing load carrying capacity optimization, considering lubricant film thickness, groove width and length ratios and angle

04 p0527 A72-14915

Optimal nonlinear discrete filters with finite memory for polynomial signals, discussing synthesis with aid of minimax method

04 p0505 A72-14998

Random search method application to optimal design of closed circular cylindrical shells under axial compressive loading

04 p0587 A72-15020

Discrete time systems unknown parameter identification, considering unified error function minimization approach

04 p0506 A72-15106

Statically indeterminate and determinate elastic beams optimal design for maximum-minimum deflection under distributed load

04 p0590 A72-15192

Antenna arrays performance optimization, emphasizing directivity and signal to noise power ratio

04 p0499 A72-15301

Upper and lower bounds for expected value and variance of minimum material weight necessary for random resistance structure able to support assigned loads

04 p0593 A72-15648

Optimal temperature fields in locally heated orthotropic cylindrical shells, determining rigidities effect

04 p0593 A72-15655

Steepest ascent method for function optimization in arbitrary direction by selecting distance metric and scale dependency

04 p0540 A72-15683

Optimization algorithm for simultaneous solutions to bivalent 0-1 Knapsack problems with linear target function and linear restrictions, using ALGOL

05 p0632 A72-15817

Synthesis method for optimized single-stage reflection type phase shifters, determining transformation coefficient

05 p0634 A72-15831

Flow rate metering by multiple Venturi systems, discussing internal fluid mechanics for design optimization

[ASME PAPER 71-WA/FE-27] 05 p0661 A72-15926

Composite multilayer fibrous shell structural design optimization, using nonlinear mathematical programming methods

[ASME PAPER 71-WA/DE-12] 05 p0733 A72-15943

Hybrid representation for structural component by vibration modes with free or fixed connection points and boundary conditions selection to optimize accuracy

05 p0736 A72-16084

Automatic plastic minimum weight design of structural frames comparing with linear programming techniques

05 p0737 A72-16117

Optimization algorithm in measurement conditions selection for satellite thermal sounding of atmosphere in 15 micron carbon dioxide band

05 p0655 A72-16174

Direct and inverse problems of sensitivity theory, discussing solvability conditions, search optimization and applicability in automatic control

05 p0640 A72-16206

Recurrent algorithms for optimal signal detection on background of random noise, using Markov processes

05 p0627 A72-16406

Iterative method for approximate determination of local minima in fuel optimal finite thrust orbit transfer

05 p0719 A72-16541

Two parameter trajectory measurement optimal planning reduced to quadratic programming based on linear programming generalization for continuous case

05 p0721 A72-16758

Algorithms for optimal planning of trajectory measurement times during sampling several parameters

05 p0641 A72-16759

Analytical model of thermal/structural optimization for long term storage cryogenic propellant systems

[AIAA PAPER 72-142] 05 p0691 A72-16881

Optimal reversion coefficient determination for passenger aircraft engine thrust reversal

05 p0614 A72-17060

Optimal averaging of discontinuous processes with distributed parameters, taking into account random disturbances and measurement errors

05 p0683 A72-17130

Laminar flow airfoils for gliders, optimizing profiles for favorable velocity and pressure distribution

05 p0610 A72-17194

Supersynthesis antenna array design by analytical approach involving isolation and separate optimization of parameters effects on spatial frequency component sampling

06 p0771 A72-17341

CIRCAL-2 general purpose on-line circuit design computer program featuring multiple analysis, text editing, network representation and user-program interaction optimization capabilities

06 p0778 A72-17474

Computer search for optimum narrow band FM and PM systems bandpass filters, noting low index angle modulated signals

06 p0783 A72-17484

Optimal synthesis of multiparametric machine systems by LP search /determinate analog of random search/, applying to oscillatory models

06 p0821 A72-17726

Dynamic system optimal design with various degrees of maneuver parameters information, considering space flight mechanics problem of payload maximization for limited propulsive power

06 p0849 A72-18306

Broadband parametric amplifier design using computerized optimization procedure based on Gauss-Newton iteration technique

06 p0786 A72-18376

Multiplier method for discrete optimization problems with equality constraints, applying to time optimal control for V/STOL aircraft

06 p0794 A72-18387

Source permutation code optimum encoding for long block length, comparing performance with rate distortion function bound and various quantization schemes

06 p0776 A72-18391

LSA oscillators performance and control optimization, discussing multiaxis radial microwave cavity effectiveness in oscillation starting and coupling to coaxial transmission line

06 p0789 A72-18481

Resin bonded solid lubricant film thickness optimization from statistical analysis of bench and machine element test data

06 p0823 A72-18591

Optimization problems in gravitational attraction, considering homogeneous ellipsoids interaction and free particle simple harmonic motion

06 p0851 A72-18740

Inlet duct and turbofan engine compatibility without stalling and surge conditions obtained by design optimization and wind tunnel testing

07 p1052 A72-18761

Algorithm selection for optimization solutions by finite, ad hoc, conjugate, Newton and restricted step methods

07 p1025 A72-18783

Optimal rigid-plastic limit load analysis of spherical shells under nonsymmetrical loadings, using SUMT and Rosenbrock method

07 p1087 A72-18791

Optimal receiver synthesis for radio signals with differentiable components of continuous Markov processes masked by phase interference and white noise

07 p0937 A72-18847

Passive radio interference filtration analysis, obtaining SNR maximization by ambiguity function partial volume minimization

07 p0937 A72-18848

Optimal radio signal processing system on background of correlated interference, calculating detection characteristics

07 p0937 A72-18850

Rain induced flood mathematical model, optimizing parameters and applying to hydrological forecasts

07 p1029 A72-18862

Steel cutting suitability test, determining optimum cutting conditions for pure iron used in magnetic applications

07 p0994 A72-18973

Radiative heat transfer characteristics of optimal geometry radiating stainless steel fin

07 p1098 A72-18997

Optimal signal detection relative to Neumann-Pearson criterion invariant with respect to amplitude and random noise intensity in radio location

07 p0938 A72-19019

Optimality criterion for beams and frames with segmentwise constant cross sections and alternative loading exceeding plastic load carrying capacity

07 p1088 A72-19119

Signal design for coherent M-ary communication systems by stochastic gradient algorithm for minimizing error rate

07 p0959 A72-19285

Suboptimal Kalman filter design for system state estimation in presence of plant dynamics uncertainties and measurements noise, optimizing tradeoff between sensitivity and estimation error

07 p0959 A72-19302

Optimal Bayesian system synthesis for simultaneous discrimination and parameter estimation of several signals in noise background

07 p0943 A72-19516

Asymptotically optimal rank algorithms for signal resolution at phase and amplitude detectors outputs

07 p0943 A72-19518

Signal detection in noise, investigating quantiles position optimization in nonparametric test statistics

07 p0943 A72-19519

Aerospace subsystem alternate designs and cost effectiveness evaluation and optimization, considering algorithm of three functions with minimal coupling

07 p1105 A72-19552

Optimal PSK signals selection and synthesis from random sequences ensuring minimum value of maximum side peak of autocorrelation function

07 p0943 A72-19564

Optimization algorithm for minimum margin efficiency of electronic circuits, applying to IC TTL gate and transistorized bistable multivibrator /flip-flop/

07 p0944 A72-19568

Multivariable plant optimization, considering oil field operations, n-paired transeiver power loads, Laplace and Poisson equations described systems and interindustrial balance

07 p0962 A72-19722

Minimum weight design of elastic sandwich beam with segmentwise constant stiffness under displacement and stress constraints, using iterative solution and finite element analysis

07 p1092 A72-19825

Optimum exposure time for sintering in Ar flow of porous rolled product of Ti powders determined from physicochemical properties changes

07 p0996 A72-19964

Optimum lasing conditions and spectral characteristics of organic dye lasers at 3,100-11,000 Å

07 p1009 A72-20613

Estimation-correlation principle and optimal detector for incomplete a priori information signal reception on random and white noise background

08 p1131 A72-20790

Biased estimator as alternative to linear unbiased estimator for dynamic system model states and parameters optimization and regulation, noting squared errors sum

08 p1144 A72-20852

Optimal filtering for state estimation of nonlinear dynamic models observed with discrete noisy observations by retaining second order terms in series approximation

08 p1145 A72-20863

Optimization for maximum productivity of electric spark machining with vibrating electrode, noting erosion product removal difficulties 08 p1174 A72-21033

Optimization criteria for electroerosion machining, determining objective functions 08 p1175 A72-21039

Linear programming procedure for efficiency and cost optimization in aerial survey mission 08 p1165 A72-21164

Thin walled box beam optimal design, noting cross section areas and dimensions with permissible walls and flanges safety and stability 08 p1243 A72-21240

Optimality conditions for nonconvex optimization problems from linear programming solution 08 p1199 A72-21285

Optimal synthesis of four radar waveform classes with distinct resolution properties based on target environment analysis 08 p1133 A72-21403

Naval aircraft optimal repair and replacement policies determination for operation cost minimization by dynamic programming [AD-736094] 08 p1256 A72-21470

German book on control technology development covering historic periods, symbols and representations, stability, integral transformations, computers, servos, relays and multivariable systems, optimization, etc 08 p1145 A72-21478

Plastics optimal reinforcement in given stressed state by determining shortest path from stress point to strength region 08 p1244 A72-21502

Optimal design of anisotropic composite material annular plates by numerical method 08 p1246 A72-21673

Radio communication system optimization from viewpoints of global synthesis, including economics and partial synthesis based on noise stability, precision and reliability 08 p1136 A72-21845

Optimal variant of meteor wind patrol radar station for atmospheric circulation study 08 p1147 A72-21886

Sonic boom minimization, obtaining positive phase signature pressures as function of altitude, Mach number, weight and length 08 p1110 A72-21903

Optimum directive gain of circular Taylor patterns for planar aperture antenna design 08 p1143 A72-21987

Multidimensional function extremum for sectioned resonator type gyroamplifier efficiency optimization 08 p1172 A72-22050

Stochastic rule for optimum moment of preventive maintenance of redundant technological systems, predicting system reliability 08 p1180 A72-22056

Reliability of redundant schemes with quorum element, noting optimal parameters for known failure damages 08 p1180 A72-22059

Economic factors influence on reliability optimization of complex radio systems and elements 08 p1143 A72-22066

Radio system failure prediction based on parameter variation a priori or a posteriori data, determining reliability and optimal preventive maintenance intervals 08 p1143 A72-22070

Hydrodynamic models and computational schemes optimization in statistical weather forecasting 08 p1202 A72-22114

Optimal gradient minimization scheme for finite element eigenvalue and eigenvector problems, including effect of round-off errors and termination criterion 08 p1200 A72-22140

German monograph on optimal design of gyroscope using spherical static gas bearing 08 p1173 A72-22174

German monograph on optimum principle for numerical representation of surfaces, discussing association with elasticity theory extremal requirements 09 p1340 A72-22319

German monograph on optimal design of HF band-pass filters with lumped elements, covering LC coupled two- and four-circuit systems 09 p1284 A72-22328

German monograph on ring shaped continuous beams calculation, deriving optimum support under torsional stress 09 p1397 A72-22335

Optimal nomographic determination of surface gyrocompass parameters ensuring minimum period of undamped precession oscillations 09 p1307 A72-22346

Zirconia ceramics for high performance storage heaters, discussing operating conditions, optimal properties for heater design, engineering evaluation tests and in-service performance 09 p1333 A72-22383

Sigma algebra and statistics system for optimal stopping of stochastic processes for continuous time case 09 p1340 A72-22424

Two point boundary value problems solved by finite difference method using optimal sequence of nodes 09 p1341 A72-22464

Optimization of load-carrying elastic lattice structures designed on prescribed surface 09 p1402 A72-22746

Development trends in airborne man machine flight control, discussing optimal division between human pilot and machine in relation to total system performance and economic factors 09 p1270 A72-22781

Optimal solutions for apportionment between automatic and manual flight control, considering number and types of displays required 09 p1348 A72-22783

Stochastic approximation for identification of element with second order lag, noting convergence with optimum parameter 09 p1291 A72-23371

Deterministic optimization of aircraft undercarriage suspension characteristics for taxing induced vibration minimization, discussing damping and stiffness functions and hybrid computer solution 09 p1407 A72-23458

Energy transfer optimization in electromagnetic wave transmission through dispersive dielectric media 09 p1365 A72-23522

Monotonicity theorems for functionals and transformations in stochastic models of queueing, reliability and optimality problems 09 p1343 A72-23565

Minimum time duration rocket interception, calculating trajectory parameters and target orbits in Earth gravitational field 09 p1393 A72-23573

Nonlinear systems optimal design mathematical modeling, discussing synthesis, manufacturing, production, exploitation and evaluation 09 p1343 A72-23610

Hookes law formulation by multindex sequences for stereomechanical multiple system optimization 09 p1354 A72-23611

Revised algorithm for unconstrained optimization using quasi-Newton methods based on recurring factorization of approximation to Hessian matrix 10 p1502 A72-23723

German monograph on flight performance optimization of solid propellant rockets covering thrust values, burning time, rocket design and orbits within earth atmosphere 10 p1550 A72-23770

Optimum bounding filter design based on error covariance for Kalman-Bucy and Wiener filters with inaccurately known parameters, obtaining performance figure of merit 10 p1454 A72-23785

Optimal tracking filter for processing sensor data of imprecisely determined origin in surveillance system by minimizing effects of correlation uncertainties 10 p1455 A72-23787

Low speed performance and boundary layer growth in optimal annular diffuser with uniform center body diameter and conically diverging wall 10 p1415 A72-23856

Algebraic dimensional analysis developed algorithm to generate optimized dimensionless products set associated with physical phenomenon, using matrix methods 10 p1443 A72-23916

High power Nd-glass laser systems, discussing oscillator and amplifier operating parameters optimization 10 p1489 A72-23945

Multistage systems maintainability, presenting equations for optimum allocation of demonstration tests to repairable elements 10 p1443 A72-23982

Permanent state operation optimization for fluid amplifier with jet interaction 10 p1422 A72-24125

MHD generator duct external loop electric current maximization by working material resistivity tensor optimal distribution 10 p1521 A72-24434

Econometric approach to space shuttle design for optimum operational redundancy levels, using payload-cost effectiveness criterion [AIAA PAPER 72-242] 10 p1551 A72-24448

Terminal control solution in terms of finite dimensional minimization of convex function, applying to time optimal control and minimum energy problems 10 p1457 A72-24459

Optimal configuration of lifting bodies for hypersonic speeds, noting negligible effect of blunt leading edges 10 p1418 A72-24536

Electronic circuits statistical optimization with Monte Carlo procedure, discussing methods and algorithms for accelerating evolutionary modeling 10 p1452 A72-24638

Stochastic optimization of airborne laser seeker system design parameters to maximize target acquisition probability through regression analysis of data from computerized model 10 p1437 A72-24682

Weak signal turnaround transponder design for pseudonoise coded ranging systems, discussing bandwidth optimization and performance comparison between various receiver configurations 10 p1452 A72-24688

Optimum thickness variation in annular strip /curved beam/ under bending moment at constant stress based on Mises-Hencky yield criterion 10 p1558 A72-24847

Pontryagin maximum principle application to minimum deflection of cantilever beam under own weight 10 p1558 A72-24880

Modulating /multiplicative/ noise effects on output signal characteristics of receiver designed for optimal reception on background of Gaussian noise 10 p1439 A72-24906

Minimum noise coefficients of M-type microwave beam amplifiers with crossed fields, taking into account delay system distributed losses 10 p1453 A72-24913

Optimal distribution of resources in automatic systems for detection and measurement of random concentrated noises number in assigned frequency range 10 p1440 A72-24917

Statistical linearization of stochastic differential equations for optimal terms in mean square distance 10 p1506 A72-24993

Aircraft maintenance optimization, considering safety, reliability, punctuality and cost factors 10 p1422 A72-25108

Linear optimization of holographic process, investigating application to three dimensional diffusive object 11 p1629 A72-25315

Algorithm for optimal binary search tree construction with minimum weighted and restricted maximum path lengths 11 p1676 A72-25354

Automated optimization for preliminary design of supersonic aircraft wings, noting flutter, stresses and resonant frequency as dynamic constraints [AIAA PAPER 72-333] 11 p1727 A72-25368

Optimal parameters selection for natural vibrations maximum damping rate, applying method to two mass electromechanical system 11 p1686 A72-25533

Transport aircraft aerodynamic design technology application to general aviation propeller driven twin engine aircraft, discussing wing loading and aspect ratio optimization [SAE PAPER 720337] 11 p1576 A72-25595

Multiaxis radial circuits for transferred electron microwave oscillator performance optimization to obtain wideband CW amplification, discussing LSA tests 11 p1604 A72-25745

Optimum decision rule for sync word location in binary data frame, noting sum maximization of correlation and energy correction terms 11 p1592 A72-25888

Flight vehicle structures optimum design for random vibration environment, presenting formulation as nonlinear programming problem 11 p1736 A72-26003

Overall characteristics of optimal quasi-steady plasma thruster system, discussing mass, burning time and thrust variations as function of power supply and pulse duration [AIAA PAPER 72-456] 11 p1708 A72-26192

Optimization criteria for electric feeding in quasi-steady MPD thruster, discussing energy storage bank characteristics determination [AIAA PAPER 72-462] 11 p1709 A72-26197

Fiber-matrix composites overall strength optimization, emphasizing matrix and interface effects 11 p1674 A72-26231

Optimal synthesis and analysis of quasi-deterministic signal detection system with simultaneous parameter measurement on background noise 11 p1596 A72-26312

Optimal active layer thickness in heterogeneous injection lasers, estimating minimal threshold currents 11 p1649 A72-26346

Measuring information systems optimization, considering first order system with time lag 11 p1611 A72-26436

Optimization of diagnostic tests for monitoring industrial system efficiency, obtaining compromise between costs and utilization 11 p1611 A72-26441

Optimality and strategy efficiency in Gaussian elimination on sparse matrix, using graphical method 11 p1678 A72-26496

Electronic filters realization by error function minimization, discussing parameter space algorithmic search and complex plane optimization methods 11 p1606 A72-26550

Aluminum-silicon Schottky diode clamped transistor-transistor logic circuits parameters optimization for high switching speed and IC applications 11 p1606 A72-26568

Nonlinear control system optimal bang-bang controls computation, noting algorithm obtained by parameter optimization

11 p1577 A72-26666

Optimum synthesis of antenna array of slot radiators with passive elements, using nonlinear programming

11 p1597 A72-26708

Optimal sum-difference characteristics of nonseparable convex slot spherical antennas for maximum directive gain and minimum spatial sidelobe radiation

11 p1598 A72-26713

Criterion selection and minimum margin search for optimization of complex electronic circuit parameters described by mathematical models

11 p1612 A72-26736

Path connection algorithms for optimal IC layout on circuit board, using digital computer

11 p1607 A72-26784

Computer calculation of minimum weight ribbed plates under axial compression by random search method and linear programming

12 p1878 A72-27083

Probability minimization and detection of errors in computerized analysis of civil engineering frameworks, noting graphical output advantages

12 p1786 A72-27190

Metal matrix composites radiography in NDT, discussing parameters optimization and uses of microfilm, densitometers and high resolution vidicon tubes

12 p1813 A72-27199

Equation difference minimization techniques for ordinary nonlinear differential equations approximate periodic solution generation, noting error bounding procedure validity

12 p1836 A72-27240

Prager-Shield theory for optimal plastic design extended to multicomponent cost functions and load conditions, applying to fiber reinforced plate

12 p1881 A72-27243

Structural weight optimization with piecewise concave cost functionals defined on set in Euclidean space for anisotropic cylindrical shells

12 p1881 A72-27254

Modular computer program for digital transmission systems, applying to optimization of filters in multitransponder satellite and ground stations

12 p1786 A72-27323

Optical and electronic imaging systems optimization for solar system exploration, discussing effects on public support for national funding

12 p1807 A72-27346

Multistage pursuit-evasion game on circle, constructing player optimal strategies via measure theory

12 p1836 A72-27511

Analog measuring data transmission systems optimization by computers, noting improvement of dynamic response and linearity in digital systems

12 p1786 A72-27580

Lens parameters selection and prisms position optimization in light beam to avoid premature damage

12 p1808 A72-27623

Computerized antenna array design, using Automated Engineering and Scientific Optimization Program

12 p1792 A72-27735

Emission of density modulated electron flux passing over diffraction structures formed by half planes and combs with oblique teeth, discussing optimum emitted power conditions

12 p1793 A72-27858

Cocuring technique optimization for primary aircraft components composite materials, discussing mechanical and dimensional properties test data, production cost analysis and cure time

12 p1815 A72-28077

Algorithms for combinatorial problem optimal solution based on implicit enumeration method, applying to assembly line balancing

12 p1837 A72-28117

Data file optimal arrangement by programmed procedures formulated as combinatorial problem, using branch-and-bound method for solution

12 p1787 A72-28118

Binary logic circuits with interconnected repeaters and inverters, discussing signal level selection to ensure maximum noise stability

12 p1786 A72-28120

Gas turbine units with constant pressure cycle, discussing design and optimization method

12 p1862 A72-28149

Reliability requirements and optimization for complex systems, discussing method to improve component reliability of aircraft weapon system

13 p1961 A72-28353

System reliability demonstration test cost minimization for one-shot electroexplosive device

13 p2024 A72-28367

Optimal parameters of electro-optical signal processor for phased array antennas, noting optical subsystem correspondence to optoacoustical spectrum analyzer

13 p1926 A72-28374

Stages optimum selection for step rocket moving in plane gravitational field

13 p2051 A72-28384

Binary PSK signals optimized on minimax and quadratic criteria, noting design of coders and decoders on shift registers with external logic

13 p1914 A72-28415

Path arrangement optimization method for fluid distribution network with separable and concave cost function, using simplex method in nonlinear programming

13 p2053 A72-28423

Optimal design of elastic structures, emphasizing stability and response under applied static and dynamic loads

13 p2054 A72-28487

Computer program analysis of errors in mutual orientation elements on aerial photographs with different lengthwise overlaps, discussing error minimization

13 p1955 A72-28497

Optimization of monopulse antenna performance indices for specified sidelobe envelope function and/or specified pattern nulls

13 p1915 A72-28530

Random retrieval algorithms in finite set of preset movement directions, considering quadratic function minimization

13 p1924 A72-28610

Algorithm and computer program to calculate low run multiple nomenclature production process optimal parameters

13 p1962 A72-28741

Polarization method for measuring small phase difference variations in microwave range, developing rules for optimum selection of multiplication factor

13 p1928 A72-28790

Optimal matched Wiener discrete filters investigated with operator-matrix concepts

13 p1918 A72-28894

Optimal cross section selection of rectangular beams in oblique bending by nonlinear programming and learning algorithm

13 p2056 A72-28914

Optimal level of recording defects in ultrasonic flaw detection, taking into account inspection conditions and defect size probability distribution

13 p1956 A72-28924

Thermal storage type resistors design for satellite attitude control, discussing heat loss minimization

13 p2026 A72-28927

Pyramidal-horn primary element axial position effect on dual mirror Cassegrain microwave antenna main lobe pattern, obtaining optimal position

13 p1929 A72-29040

Associated system instability related to difficulties encountered in maximum principle application to optimization problems solution

13 p2003 A72-29069

Optimal design of thin walled minimum weight aircraft shell structures, using linear programming

13 p2058 A72-29143

Overestimation in optimization problems calculated by regressive equation, comparing with actual effect in static process

13 p1936 A72-29158

Two phase algorithm for selecting optimal sets of characteristics for image recognition systems

13 p1925 A72-29164

Optimal multistep sampling procedures for production quality control, discussing methods for minimization of error probabilities and total sampling volume

13 p1965 A72-29167

Fiber glass reinforced plastic structure design based on anisotropy, calculating optimum angle between reinforcement and horizontal axis

13 p2058 A72-29463

Computer method of link formation in multiple nomenclature aircraft production lines, minimizing idle time

13 p1966 A72-29464

Signal discretization frequency upper bounds determination to satisfy prescribed level of mean square error in continuous signal restoration

13 p1925 A72-30021

Microwave circuits for multiplexing applications, discussing optimal design in terms of economic, mechanical and electrical parameters

13 p1934 A72-30089

Minimum drag bodies of revolution in supersonic flow obtained by combining steepest descent method with integral flow model

14 p2069 A72-30231

Heliocentric orbit from modified Laplace and Leuschner method with optimal time interval between five successive observations

14 p2149 A72-30233

Outgoing 15 micron carbon dioxide band radiation measurement optimization for atmospheric thermal sounding by satellite

14 p2099 A72-30243

Kalman filter application to inertial navigation systems optimal alignment, discussing linear systems

representation in state space and filter algorithm recursive equations

14 p2129 A72-30330

Gravitational stabilization systems parameters determination for minimum amplitude of satellite eccentric vibrations

14 p2162 A72-30457

Pulsed motion of gravity gradient vehicle in central gravity field, presenting expressions of optimized attitude control

14 p2162 A72-30473

GaAs varactor diode design optimization based on calculation of cut-off frequency vs carrier concentration with consideration of skin effect

14 p2088 A72-30588

Operating conditions of photometers for optimum photomultiplier photon counting photometry, considering measurement precision dependence on experimental parameters

14 p2105 A72-30733

Complex systems optimization with respect to vector-valued cost function without prespecified constraints or criteria weighting, deriving algorithm for characteristic set of noninferior solutions

14 p2087 A72-30825

Liquid propellant rocket performance, stability and compatibility prediction techniques, noting effect on design time and cost

14 p2146 A72-30919

Sandwich beams structural optimization for given deflection by iterative finite element procedure

14 p2168 A72-30927

Optimal plastic design of doubly symmetric closed ring and frame structures of idealized sandwich section under uniform internal pressure

15 p2322 A72-31346

Signal distortion minimization for random waveguides with frequency-dependent optimum coupling based on transfer function covariance and impulse response time domain statistics

15 p2194 A72-31352

Coupled flexural longitudinal vibrations of circular arc girder with symmetrical cross section, discussing optimal design

15 p2324 A72-31487

Alternant theorems for characterization of minimum solutions in multidimensional Chebyshev approximation of functions connected with Markov systems

15 p2261 A72-31497

Celestial Thomson-scattering X ray polarimeter design for OSO-1, optimizing sensitivity in 4-24 keV energy range by Monte Carlo simulation computer program

15 p2234 A72-31540

Optimal segment boundaries with composite error function in piecewise approximation chosen by dynamic program in scalar state variable, noting uniqueness properties

15 p2262 A72-31634

Reflector networks analysis for optimal operation of electronic scanning antenna in illuminated grating

15 p2195 A72-31670

Computer method of optimal turbomachine disk design, using local search techniques to determine disk minimum weight

15 p2328 A72-31746

Dynamic optimization procedure for bivalent knapsack problem solution involving large number of variables

15 p2203 A72-31750

Optimization of heat pipe with wick and annulus liquid flow, investigating effect of pressure loss and recovery in vapor passage

15 p2335 A72-31767

Jointly optimal filters for fixed range radar filter-sampler-filter system, determining impulse response function forms

15 p2207 A72-31793

Single crystal scheelite material for Nd doped intermediate gain laser host substance, considering optimum growth conditions, lasing parameter and Nd concentration

15 p2292 A72-32030

Reliability-maximizing digital computer synthesis based on multiple redundant network design, discussing majority structure distribution optimization technique

15 p2203 A72-32174

Fraunhofer holograms wavelength dependent distortion reduction by system parameters optimization, applying to color holotape

15 p2239 A72-32357

Input match conditions for broadband mixer conversion loss minimization, comparing optimization procedures

15 p2208 A72-32392

Optimum nonslender bodies of revolution minimum drag in free molecular flow under integral constraints

15 p2180 A72-32395

Structural design optimization procedure based on sequence of linearizations with iterative convergence through series of least critical intermediate solutions in hyperspace

15 p2331 A72-32551

Magnetic field profile optimization for beta-limitation in minimum-B mirror confined plasma in nuclear reactor 16 p2432 A72-32805

Weight minimization for simple structures with single natural frequency constraint, solving nonlinear two point boundary value problem by variational and numerical methods 16 p2463 A72-32834

Analog simulation method for highly redundant structure optimization based on reproducing structure mechanical behavior in stabilized stress states 16 p2463 A72-32899

Structural design optimization by geometric programming, illustrating computerized technique on two bar truss and ship bulkhead problem 16 p2366 A72-32913

Optimal plane elastic trusses under alternative loads, designing for smallest total volume of bars with upper stress bound 16 p2466 A72-33017

Limit displacement or solids parameters optimization for perfectly locking bodies, presenting mathematical models based on extremum energy theorems 16 p2423 A72-33104

Algorithm for minimax parameter optimization by linear and quadratic programming with application to earth orbiting satellite orbital transfer 16 p2366 A72-33191

Iterative computational procedure for system parameter identification and optimization, using multilevel technique 16 p2371 A72-33192

Thin walled elastic structures optimization by overall and local buckling coincidence, discussing compression column design 16 p2468 A72-33200

Nondestructive monitoring techniques to optimize performance and service tests, considering penetrating radiation, electromagnetic induction, ultrasonics, holography, microwaves, acoustic emission and thermal monitoring 16 p2397 A72-33219

Photographic-oscillographic study of discharges in atmospheric pressure helium-carbon dioxide mixtures, discussing discharge paths nonuniformity and energy input maximization 16 p2435 A72-33391

Military system and equipment Level of Repair optimization for minimum life cycle costs, considering weapon systems deployment, operation level and mobility requirements 16 p2482 A72-33793

System models for R and D processes in terms of state variables and control vectors, deriving algorithm for optimization 16 p2482 A72-33864

Exact differential equation derived for optimal design of straight nonprismatic column subject to creep buckling 16 p2474 A72-34132

Optimal design of static laterally loaded fiber reinforced plates, determining optimum load-path directions at all plate points 16 p2475 A72-34174

Mixed-mode propulsion - Optimum burn profile for two-mode systems. 17 p2596 A72-34212

On behavior strategy solutions in two-person zero-sum finite extended games with imperfect information. I - A method for determination of minimally complex behavior strategy solutions. 17 p2574 A72-34343

Phase optimization of antenna array gain with constrained amplitude excitation. 17 p2513 A72-34355

A fast numerical method for determining the optimum SNR of an array subject to a Q factor constraint. 17 p2514 A72-34372

Fast computational techniques for generalized two dimensional Wiener filtering. 17 p2532 A72-34402

Linear programming procedure for efficiency and cost optimization in aerial survey mission 17 p2521 A72-34455

Optimized 100 We multicell thermionic power supply design with high reliability, noting isomite converter performance characteristics 17 p2495 A72-34583

Problem of antenna parameter optimization in the presence of random errors 17 p2529 A72-34831

Functional equations for optimal spacecraft or rocket interception by similar vehicle within limits of dense atmosphere 17 p2621 A72-35121

Multilevel hierarchical structural design optimization, proposing component by component ascent method of dynamic programming 17 p2533 A72-35171

Design of nonlinear networks with a prescribed small-signal behavior. 17 p2533 A72-35199

Two parameter trajectory measurement optimal planning reduced to quadratic programming based on linear programming generalization for continuous case 17 p2610 A72-35261

Algorithms for optimal planning of trajectory measurement times during sampling several parameters 17 p2533 A72-35262

An operations research approach to solve complex and unstructured problems illustrated for the case of cost-plus-award fee contracts. 17 p2639 A72-35341

Invariant imbedding and optimum beam design with displacement constraints. 17 p2634 A72-35406

Asymptotically optimal procedures for certain types of moments of cutoff and terminal decisions in sequential estimation 17 p2576 A72-35419

Equivalent predictions of the circle criterion and an optimum quadratic form for a second-order system. 17 p2577 A72-35534

Optimal smoothing for continuous-time systems with multiple time delays. 17 p2534 A72-35536

Optimality conditions of second and higher orders for discrete systems, discussing functional minimization and Pontryagin maximum principle limitations 17 p2534 A72-35725

Optimization of the functions of a circuit with lumped and distributed RC parameters 17 p2535 A72-35785

Techniques for generating highly reliable redundant systems. 18 p2663 A72-36309

Practical problems and solutions in modeling physical systems with time-domain input-output measurements or specifications. 18 p2663 A72-36327

Optimal distributions for semi-circular arrays of isotropic radiators. 18 p2666 A72-36330

Adaptive nonlinear optimization of the signal-to-noise ratio of an array subject to a constraint. 18 p2660 A72-36507

Quality assurance of transistor chips for the user 18 p2669 A72-37120

A finite element approach to optimal design of plastic structures in plane stress. 18 p2739 A72-37165

Natural frequencies and dynamic response constraints in optimal structural design, considering mathematical programming aspects 18 p2739 A72-37167

Electric circuits design by combined network synthesis and optimization methods, noting approximation by nonlinear programming 19 p2776 A72-37308

Minimax method of optimizing electric circuits in the absence of constraints on the variable parameters 19 p2777 A72-37309

French monograph - Contribution to the study of extremal control systems 19 p2778 A72-37487

Specific fuel consumption and specific thrust optimization methods in turbofan cycles, noting optimum fan pressure ratio increase with turbine inlet temperature 19 p2848 A72-37746

Optimization of self-acting step thrust bearings for load capacity and stiffness. 19 p2807 A72-37895

Linear programming application to the solution of some optimum problems of reliability theory 19 p2825 A72-37995

Necessary and sufficient conditions for differentiable non-scalar-valued functions to attain extrema. 19 p2826 A72-38244

Modified Ritz method to find optimum boundaries to elliptic systems governed by Laplace or Poisson equation 19 p2826 A72-38246

Linear dynamic systems parameter identification via optimal input design, noting eigenfunction dependence on positive self adjoint operator 19 p2781 A72-38271

Data file optimal arrangement for retrieval by programmed procedures formulated as combinatorial problem, using branch-and-bound method for solution 19 p2770 A72-38619

Binary logic circuits with interconnected repeaters and inverters, discussing signal level selection to ensure maximum noise stability 19 p2767 A72-38621

Experimental technique for determination of roller bearing preload to optimize dynamic characteristics and minimize operating temperature 19 p2810 A72-38650

Certain algorithms for obtaining an approximate solution of incorrect problems on a set of monotonic functions 19 p2828 A72-38846

Application of optimization techniques to the problem of determining optical constants of thin films. 20 p2959 A72-39052

Optimal synthesis for radiator coordinates and complex amplitudes of linear antenna array for given radiation pattern 20 p2907 A72-39062

Development and optimization of the SRAM guidance and control software. [AIAA PAPER 72-824] 20 p2951 A72-39102

Memory requirements and computation times for implementing reduced consensus algorithms. 20 p2905 A72-39434

Considerations regarding the choice of the number of stages in long-range or high-altitude rockets 20 p2977 A72-39596

Modified Hestenes method of Lagrange multipliers for numerical iterative solution of mathematical programming problems in function minimizing noting improved convergence 21 p3074 A72-40226

Optimization of acoustic linings in presence of wall shear layers. 21 p3083 A72-40334

Reflector optimization of backfire antennas with the aid of the theory of the Fresnel zones 21 p3031 A72-40541

Broad-band television transmitting antenna with polydirectional characteristics for the UHF-region 21 p3031 A72-40542

Existence theorems in multidimensional problems of optimization with distributed and boundary controls. 21 p3074 A72-40548

Optimum diopter value for a view-finder of photographic camera. 21 p3054 A72-40729

Optimal search in the presence of Poisson-distributed false targets. 21 p3075 A72-40837

Frequency-sampling and transversal digital filter equalizers optimal design from specified unit impulse time response, using linear programming algorithm 21 p3033 A72-40900

Network algebra simplification through computerized minimization of Boolean functions, describing FORTRAN IV program 21 p3038 A72-41001

Comparison of design procedures of vibration absorbers for systems with random excitations. 21 p3121 A72-41230

Characterization and algorithm for optimal solution of stochastic linear programming to minimize cost 21 p3075 A72-41234

Optimal compression of constant-thickness media in a plane stress state 21 p3123 A72-41391

Anthropotechnics/human engineering/ approach to man machine system optimization, discussing task allocation and adaptations of machine dynamics, displays and controls to human operator 21 p3009 A72-41403

Algorithm for solving the schedule planning problem in mass production [AD-742589] 21 p3132 A72-41790

Determining optimum burn-in and replacement times using Bayesian decision theory. 22 p3182 A72-41982

Optimal PSK signals selection and synthesis from random sequences, ensuring minimum value of maximum side peak of autocorrelation function 22 p3153 A72-42082

Optimization algorithm for minimum margin efficiency of electronic circuits, applying to IC TTL gate and transistorized bistable multivibrator /flip-flop/ 22 p3158 A72-42086

Cylindrical shells of optimal torsional stiffness 22 p3233 A72-42112

A minimization method of describing classes in pattern recognition 22 p3198 A72-42178

Integration of aerospace vehicle performance and design optimization. [AIAA PAPER 72-948] 22 p3137 A72-42355

The influence of production imperfections on design of optimum structures. 22 p3239 A72-42841

Optimum design of circular sandwich plates. 22 p3239 A72-42843

Dangerous structural failure characteristics due to idealized design optimization, discussing shell buckling instabilities 22 p3240 A72-42895

Reliability-maximizing digital computer synthesis based on redundant network design, discussing majority structure optimal allocation technique 22 p3157 A72-43008

Optimization of the range of elastic behavior of unidirectional composites by prestraining. 22 p3194 A72-43041

German monograph - A search procedure for electronic radar. 22 p3156 A72-43054

Book - Computer simulation of dynamic systems. 22 p3157 A72-43081

Minimization of finite automata 22 p3157 A72-43082

Aeroelastic optimization of a panel in high Mach number supersonic flow. 23 p3343 A72-43327

Synthesis method for phase and loss optimized single-stage reflection type phase shifters, determining transformation coefficient 23 p3268 A72-43439

Aircraft synthesis analysis program /ASAP/ for computerized aircraft design, enabling large number of trade-off studies for design optimization [SAWE PAPER 907] 23 p3250 A72-43454

Structural design optimization via area ratio method, developing shape factor design charts [SAWE PAPER 937] 23 p3344 A72-43477

Finite element method optimization of orthotropic layered shells of revolution under mechanical and thermal loadings, considering stress-strain relationships [SAWE PAPER 939] 23 p3344 A72-43479

Space subsystems cost optimization technique for minimization of total spacecraft plus boost cost, studying orbital logistics spacecraft [SAWE PAPER 941] 23 p3342 A72-43481

Local-oscillator-circuit optimisation for minimum distortion in double-balanced modulators. 23 p3270 A72-43603

Optimisation of slope of difference-mode radiation pattern in sum-and-difference-comparison monopulse radar. 23 p3264 A72-43606

Minimum weight structural design, generalizing method for deriving sufficient optimality conditions with examples for specified maximum deflection and critical nonconservative loading parameters 23 p3347 A72-43719

Optimal search with uncertain sweep width. 23 p3308 A72-43805

Design optimization of an integrated-circuit direct access memory unit 23 p3267 A72-43841

Optimal design of a class of nonlinear networks. 23 p3276 A72-43865

Equipment assembly design optimization by operational versions determination and criteria evaluation for optimal conditions, noting rotary wing design 23 p3294 A72-44024

Optimal equalization of discrete signals passed through a random channel. 23 p3265 A72-44178

Estimates of unknown parameter from quantized observations given as sequence of evenly distributed random values, noting optimal grouping equations for general distribution function 23 p3266 A72-44218

Optimal signal processing in systems with multiple reception elements /channels/ 23 p3266 A72-44219

Optimal design of indeterminate truss using geometric programming. 23 p3354 A72-44256

Dynamic programming and the optimum design of rotating disks. 23 p3356 A72-44550

Optimal cost effective sequencing model for component reliability tests, applying to complex electronic equipment 24 p3467 A72-44654

Allocating optimum time for systems malfunction search. 24 p3406 A72-44661

Mathematical model for life support system optimization in terms of reduced mass minimization as quality criteria for energy conversion and metabolic processes 24 p3375 A72-45133

Thrust-weight ratio optimization for spacecraft orbit inclination change maneuver, deriving motion kinematics via point mass gravitational model 24 p3440 A72-45167

Space shuttle design evolution for program cost minimization, discussing refurbishment, payload impact, management cost and mission specifications and objectives 24 p3450 A72-45171

The space tug optimum cost evaluation. 24 p3468 A72-45212

Minimum-time entry of space vehicles into a planetary atmosphere 24 p3452 A72-45442

Optimization of spacecraft reentry into a planetary atmosphere 24 p3453 A72-45597

Computer algorithm for breakpoints and forcing functions determination for optimal curve fitting by piecewise differential approximation 24 p3419 A72-45632

Axisymmetric nozzles shape for thrust optimization, comparing maximum thrust circular arc and conical nozzles performances 24 p3365 A72-45784

OPTIMUM CONTROL

U OPTIMAL CONTROL

OPTIMUM THRUST PROGRAMMING

U THRUST PROGRAMMING

OPTOMETRY

Head mounted monkey eye orientation measuring system for performance of brightness discrimination tasks 03 p0318 A72-13073

Visual acuity measurement methods, comparing angular acuity by Beyne optometer and morphoscopic acuity by Mercier optometric scale 07 p0927 A72-19246

Visual acuity measurement by dynamic and static tests as function of target velocity and exposure time 13 p1911 A72-30042

OR-GATES

U GATES [CIRCUITS]

ORBIT CALCULATION

Autonomous Hamiltonian system with two degrees of freedom, investigating origin and periodic orbits stability with two time variable method 01 p0123 A72-10030

Crater 9 meteorite /Argentina/ entry trajectory and orbital calculations, determining masses and velocities from dynamic conditions at impact 02 p0275 A72-11599

Satellite orbit determination accuracy from radio interferometer tracking data containing systematic errors, using digital computer techniques on Symphonie transfer orbit [DFVLR-SONDDR-212] 02 p0182 A72-12744

Relative stellar orbit determination in clusters NGC 5460, 5617, 6067, 6405 and 6494, presenting gravitational potential, orbital elements and anomalistic period 03 p0434 A72-13495

Orbit distributions of hypothetical comets from Jovian surface eruptions, calculating orbital elements with computer 03 p0439 A72-14240

Book on orbit determination, space navigation and celestial mechanics covering two body problem integration, units and constants, perturbation theory, orbit correction, etc 05 p0712 A72-15862

Artificial earth satellites orbit plane determination accuracy in terms of local vertical sensor errors and gyroscope drift 05 p0717 A72-16441

Error covariance matrix square root calculation in orbit determination from ground based observations 05 p0720 A72-16752

Error covariance matrix evaluation at end of orbit extrapolation in terms of state vectors at measurement, discussing computation and interpretation 05 p0720 A72-16753

Book on orbital mechanics covering perturbation theory, many body problem, conic sections, orbit determination, canonical transformations and Hansen methods, moving coordinates, etc 06 p0879 A72-17820

Orbit determination using Kalman-Bucy filter to estimate state and unmodeled acceleration approximated as first order stationary Gauss-Markov process 08 p1145 A72-20867

Hill variable modification of Brouwer satellite theory algorithm for simplified orbital element and perturbation calculations and orbital eccentricity generalization 08 p1237 A72-21749

Visual binary star investigations, considering parallaxes, masses, absolute magnitudes and orbit computation 09 p1390 A72-23502

Satellite coordinates calculation for arbitrary inclinations and orbit eccentricity below Laplace limit 10 p1543 A72-24633

Nonlinear filtering for random signals in statistically unknown noise, noting application to satellite orbit determination, aircraft navigation and missile tracking 11 p1611 A72-25986

Near circular orbit elements determination as functions of satellite initial speed and coordinates deviation by mathematical expectation procedure 11 p1724 A72-26912

Minor planets orbital elements determination accuracy from planets coincident optical observations 13 p2035 A72-28439

Earth shadow effects on light artificial satellite orbital motion 13 p2051 A72-28440

Trans-Plutonian planet effect on Halley comet, considering perihelion errors and comet residuals 13 p2038 A72-29012

Earth-moon system periodic orbits calculation by modified quasi-linearization combined with particular solutions method, using restricted three body model 14 p2149 A72-30232

Heliocentric orbit from modified Laplace and Leuschner method with optimal time interval between five successive observations 14 p2149 A72-30233

Geostationary artificial satellite orbital parameters calculation, taking into account lunar, solar and light pressure perturbations 14 p2150 A72-30451

Optimum elliptic orbit characteristics of planetary artificial satellite based on earth-planet-earth flight 14 p2151 A72-30472

Computer calculation of artificial satellite ephemerides from Smithsonian mean orbital elements, comparing observed and computed topocentric equatorial coordinates 14 p2087 A72-30480

Spectroscopic binary orbital elements calculated by FORTRAN IV computer programs, considering period, radial velocity Fourier coefficients and element improvement by least squares method 14 p2159 A72-30736

Direct periodic orbits in planar restricted barycentric three body problem, using Poincare variables and Hamiltonian function 15 p2307 A72-31763

Orbit determination strategy, detailing optimization criterion correlation with measurement errors 15 p2307 A72-31817

Skyнет 1 synchronous satellite orbit determinations and longitude acceleration due to tesseral harmonics of earth gravity, using tracking station range data 15 p2321 A72-31949

The orbit of Cosmos 307 rocket and its use in atmospheric research. 17 p2545 A72-34632

Russian book - Mathematical methods of modeling in space studies 17 p2607 A72-35026

New orbital elements for moon and planets. 17 p2609 A72-35106

Existence proof and boundary regions for multiple solutions in minor planets circular orbits determination 18 p2723 A72-36085

Accuracy of outer-planet ephemerides. 19 p2857 A72-37683

Relativity gyroscope experiment at arbitrary orbit inclinations. 20 p2972 A72-39870

Collision periodic orbits calculation in restricted three body problem 20 p2973 A72-39885

New method of calculating disturbed ephemeris of minor planets 21 p3102 A72-40095

Representation of the coordinates of a satellite of a spheroidal planet with the aid of series expansions 21 p3102 A72-40099

Russian book - Algorithms for calculation of navigation data on spacecraft position. 21 p3103 A72-40460

Satellite orbit computations using gravity anomalies. 21 p3104 A72-40493

Invalidity of Neptune predicted position derivation from perturbations on Uranus via method neglecting eccentricity 21 p3111 A72-41474

First order theory of satellite orbit determination with time difference data for synchronous equatorial spacecraft, applying to VLBI experiments with ATS-3 [AIAA PAPER 72-924] 21 p3112 A72-41568

Orbit prediction for artificial satellites via numerical averaging technique, presenting algorithm for planetary equations solution [AIAA PAPER 72-934] 21 p3112 A72-41572

Long-term orbit prediction using two-variable asymptotic expansions and the automated manipulation capabilities of the FORMAC language. [AIAA PAPER 72-938] 21 p3113 A72-41576

Orbit of the visual double star ADS 7896 equals JDS 2052 equals A 2768 21 p3114 A72-41848

Terminal orbit of comet 1937 V /Finisler/ 22 p3220 A72-41917

Equations for 15th-order geopotential coefficients from the orbit of Transit 1B. 22 p3169 A72-42009

Least squares method for satellite motion parameters determination in orbital plane, using altimeter distance to planet surface measurements 22 p3223 A72-42202

Transcendental equations solution for satellite Kepler orbit determination from coordinates, velocity and time components, using Lambert-Euler relation 22 p3223 A72-42204

Velocity space maps and transforms of tracking observations, for orbital trajectory state analysis. 24 p3440 A72-45135

Thrust-weight ratio optimization for spacecraft orbit inclination change maneuver, deriving motion kinematics via point mass gravitational model 24 p3440 A72-45167

The estimation of accuracy of short-term atmosphere density prediction. 24 p3398 A72-45173

Discrepancy between Brown theory and Griffith values for lunar perigee and node mean motions partial derivatives with respect to moon mean motion 24 p3442 A72-45241

Application of advanced filtering methods to the determination of the interplanetary orbit of Mariner '71. [AIAA PAPER 72-906] 24 p3443 A72-45427

Spacecraft navigation systems for Mariner Jupiter-Saturn 1977 Project, considering maneuvers, orbit determination and data requirements
[AIAA PAPER 72-926] 24 p3423 A72-45432

Mariner 9 Mars orbital trajectory analysis from earth based radio data, considering gravity field, n-body perturbation and solar radiation pressure effects
[AIAA PAPER 72-928] 24 p3443 A72-45434

ORBIT DECAY

Atmospheric density near 150 km altitude from Cosmos 316 orbital decay, noting density increases during geomagnetic storms
05 p0655 A72-16070

Gas-surface interaction parameters and atmospheric density determination from satellite drag induced orbital decay measurements
07 p0910 A72-20116

Geopotential harmonics of fifteenth order obtained from decaying satellite orbits analysis
15 p2311 A72-32001

Long term stability of earth and lunar orbiters - Theory and analysis.
[AIAA PAPER 72-936] 21 p3112 A72-41574

A thermospheric model from satellite orbital decay densities and incoherent scatter temperatures.
24 p3400 A72-45595

ORBIT EQUATIONS

U ORBITAL MECHANICS

ORBIT PERTURBATION

NT SATELLITE PERTURBATION

Satellite in eccentric Keplerian orbit transgressing Roche limit about rigid sphere, considering time dependent evolution problem with various centrifugal and tidal forces
01 p0134 A72-11145

Draconitic-sidereal orbital period difference estimation formula for near-circular orbit satellites with air drag
02 p0279 A72-12048

Gravity model for spacecraft orbit prediction with gravitational anomalies, discussing gravity dipoles and disturbing acceleration tangential component
[AAS PAPER 71-375] 02 p0283 A72-12424

Numerical integration of element T /transit time through perihelion/ in perturbations of near parabolic comet orbits
03 p0436 A72-13829

Rotating earth oblateness and equator ellipticity influence on near-equatorial synchronous satellite behavior, using nonlinear mechanics asymptotic method
03 p0436 A72-13835

Jupiter-induced perturbations in orbital elements of Callisto artificial satellite, noting correction requirement due to Jupiter polar flattening
04 p0572 A72-14634

Long period perturbations arising in orbits of artificial satellites with large surface to mass ratio under solar radiation pressure and earth oblateness effects
04 p0572 A72-14637

General perturbations theory for canonical systems extended to noncanonical systems, applying to perturbed Kepler motion
04 p0573 A72-14875

Earth motion nutations, considering external forces effects from sun and moon
04 p0575 A72-15030

Book on orbital mechanics covering perturbation theory, many body problem, conic sections, orbit determination, canonical transformations and Hansen methods, moving coordinates, etc
06 p0879 A72-17820

Earth gravitational field determination based on long periodic perturbations in orbital motion of satellites, estimating tesseral coefficients errors
07 p0976 A72-19817

Stellar perturbations of eccentric orbits of long period comets
07 p1081 A72-20232

Planetary perturbation of orbits of long period comets with large perihelion distances
07 p1081 A72-20236

Outer planet mass determination limitations from mutual motion perturbations
08 p1236 A72-21636

Stability solutions of collective oscillations of spherical star cluster rotating in near circular orbits in self consistent field
08 p1239 A72-22180

Dynamic system motion stability estimation with Liapunov function in quadratic form, applying to circular satellite orbit stability in axisymmetric gravitational field
14 p2161 A72-31079

Asteroids and comets orbit perturbation equations for small eccentricity values
14 p2161 A72-31080

Upper atmosphere density from orbital drag on Cannon Ball II and Musket Ball satellites
15 p2227 A72-31963

Pagcos balloon satellite orbital perturbations due to erratic solar radiation pressure induced accelerations, comparing modified Smith perturbation model calculations with photometric observations
15 p2228 A72-31975

Secular and long term periodic perturbation effects of third body upon particle motion in three body problem, discussing mass motion in Jovian gravitational field
15 p2312 A72-32120

Earth gravitational field determination based on long periodic perturbations in orbital motion of synchronous satellites, estimating tesseral coefficients errors
17 p2550 A72-35742

Stability solutions of collective oscillations of spherical star cluster rotating in near circular orbits in self consistent field
18 p2724 A72-36236

Interaction between attitude libration and orbital motion of a rigid body in a near Keplerian orbit of low eccentricity.
20 p2968 A72-39197

Cometary parent bodies transfer to short period orbits by Jupiter caused gravitational disturbances, noting qualitative analysis of orbits evolution
22 p3219 A72-41913

Correction of the orbits of 161 minor planets
24 p3437 A72-44763

ORBITAL ELEMENTS

Orbital elements and onboard transmitter frequency drift of active satellite from Doppler and angle data recorded at single receiving station
02 p0171 A72-11664

Draconitic-sidereal orbital period difference estimation formula for near-circular orbit satellites with air drag
02 p0279 A72-12048

Sporadic meteor orbital parameters measurement by continuous radar, determining out-of-atmosphere rate
02 p0283 A72-12524

Relative stellar orbit determination in clusters NGC 5460, 5617, 6067, 6405 and 6494, presenting gravitational potential, orbital elements and anomalistic period
03 p0434 A72-13495

Numerical integration of element T /transit time through perihelion/ in perturbations of near parabolic comet orbits
03 p0436 A72-13829

Orbit distributions of hypothetical comets from Jovian surface eruptions, calculating orbital elements with computer
03 p0439 A72-14240

Comet orbits with perihelion distances and inclinations from Jupiter, calculating osculating orbital elements and distributions
03 p0439 A72-14241

Jupiter-induced perturbations in orbital elements of Callisto artificial satellite, noting correction requirement due to Jupiter polar flattening
04 p0572 A72-14634

Astronomical constants - IAU Conference, Heidelberg, August 1970
04 p0574 A72-15025

Planetary mass errors effects on orbit determinations, discussing Ceres mass from influence on Pallas orbit
04 p0575 A72-15035

Lunar elements and fundamental constants corrections from meridian observations for nodal period, determining corrections to solar mean anomaly and eccentricity
06 p0875 A72-17298

Jacobian matrix partial derivatives for orbital motion representation by time step power series
06 p0877 A72-17651

Soviet book on geometrical space geodesy covering satellite observation, Keplerian laws, two body problem and orbit element determination
06 p0879 A72-17817

Periodic comets orbital elements and nongravitational parameters, discussing mass loss rates, time effects and nuclear core-mantle model
06 p0880 A72-17863

Computer program for photometric orbital elements determination of eclipsing binary stars
06 p0883 A72-18022

Restricted two body problem anomalistic and sidereal orbital periods in coordinate and proper time, noting cosmological constant
06 p0884 A72-18035

Orbital elements from radial velocity measurements for single line K giant binary star 4 Ursae Minoris
07 p1071 A72-19337

Statistical and probabilistic analyses of comet groups existence with similar orbital elements, considering gravitational capture by trans-Neptunian planets
07 p1075 A72-19559

Secular perturbations of artificial earth satellites Keplerian orbital elements from arbitrary-order zonal harmonics in geopotential series expansion
07 p1078 A72-19982

Evolutionary processes /tidal dissipation, close approach and collision/ responsibility for commensurability relations between orbital periods and orbital-spin periods in solar system
07 p1083 A72-20465

Comets heliographic coordinates and angles quadrants from orbital elements
08 p1229 A72-20832

Longitude dependent perturbation inducing portion of geopotential as function of artificial earth satellite orbital elements
08 p1158 A72-21160

Orbital elements evolution for two body problem with decreasing mass according to Jeans mode
08 p1236 A72-21638

Satellite orbital inclination change due to rotating upper atmosphere with day-to-night density variation, deriving resonance conditions
08 p1241 A72-21640

Hill variable modification of Brouwer satellite theory algorithm for simplified orbital element and perturbation calculations and orbital eccentricity generalization
08 p1237 A72-21749

Near earth satellite orbit parameters correction, discussing least squares approach
09 p1387 A72-22770

Lunar limb charts comparison, computing corrections to orbital elements and systematic and random errors
09 p1388 A72-23056

Venus and Mars visible geocentric declinations from daytime observations with Wanschaff vertical circle compared to nighttime results
09 p1388 A72-23065

Pallada, Vesta, Irida and Harmony asteroids positions computed from observations with 400 mm photographic telescope
09 p1389 A72-23066

Secular and periodic variations of orbital elements of Mars satellites due to oblateness and solar attraction
10 p1541 A72-24471

Solar radiation pressure effects on orbital evolutions of light artificial earth satellites
10 p1543 A72-24632

Computer program for photometric orbital elements determination of eclipsing binary stars
11 p1718 A72-25958

Restricted two body problem anomalistic and sidereal orbital periods in general relativistic coordinate and proper time, noting cosmological constant
11 p1719 A72-25971

Near circular orbit elements determination as functions of satellite initial speed and coordinates deviation by mathematical expectation procedure
11 p1724 A72-26912

Minor planets orbital elements determination accuracy from planets coincident optical observations
13 p2035 A72-28439

Sub-Mercurial planet Vulcan observation data, calculating orbital elements, angular size and velocity radial distance and object diameter
14 p2149 A72-30234

Statistical data processing method for accuracy evaluation of satellite orbits parameters obtained from onboard measurements of two stars angular positions
14 p2151 A72-30454

Data processing method for optimal prediction of spacecraft orbital elements, using dynamic and quadratic programming
14 p2151 A72-30455

Spectroscopic binary orbital elements calculated by FORTRAN IV computer programs, considering period, radial velocity Fourier coefficients and element improvement by least squares method
14 p2159 A72-30736

Phobos and Deimos orbital characteristics, noting related Martian physical properties determination
15 p2302 A72-31277

Comets formation from Jupiter satellite Io surface eruption using particle trajectory analysis and comet orbital elements calculation
15 p2305 A72-31391

Earth satellite orbit motion in terms of probability densities and distributions for large populations and single satellites
15 p2307 A72-31692

Program for orbital determination and prediction of satellite positions from observations at one station
15 p2268 A72-31941

Radio meteor orbit inclination angle dispersions for semimajor axis intervals compared with photographic meteors
16 p2456 A72-33514

Relative orbit inclination dispersions of minor planets, fireballs and photographic and radio meteors, indicating common origin
16 p2456 A72-33515

Atmospheric absorption height determination from orbital elements during solar radiation satellite observation
16 p2386 A72-33603

Solar radiation pressure effects on balloon satellite behavior, noting orbital eccentricity variations
16 p2463 A72-34182

Ephemeris time, lunar orbital elements and FK4 equinox correction from the observations of the moon by the method of equal altitudes.
17 p2603 A72-34274

Longitude dependent perturbation inducing portion of geopotential as function of artificial earth satellite orbital elements

17 p2545 A72-34451

The orbit of Cosmos 307 rocket and its use in atmospheric research.

17 p2545 A72-34632

Equinoctial orbit elements position and velocity vectors partial derivatives matrices for two body problem, discussing application to general and special perturbations

17 p2609 A72-35104

New orbital elements for moon and planets.

17 p2609 A72-35106

Secular variations of the first order of elements for the four major planets - Comparison with Le Verrier and Gailliot

18 p2727 A72-36734

On the effects of gravitational absorption on orbits of artificial earth satellites.

18 p2728 A72-36761

Meteoroid bodies particle density from basal photographs, noting dependence on orbital parameters

20 p2969 A72-39395

Determination of the orbits of artificial satellites by the integrated Doppler effect method

20 p2974 A72-40023

Equinoctial orbit elements - Application to artificial satellite orbits.

[AIAA PAPER 72-937]

21 p3112 A72-41575

Secular perturbations in the motion of artificial earth satellites

21 p3114 A72-41770

Orbit of the visual double star ADS 7896 equals JDS 2052 equals A 2768

21 p3114 A72-41848

An isotopic criterion for estimating the length of meteorite orbits

22 p3223 A72-42160

The dependence on inclination of the planetary perturbations of the orbits of long-period comets.

22 p3224 A72-42378

The estimation of masses of individual galaxies in clusters of galaxies.

22 p3227 A72-42551

Discrepancy between Brown theory and Griffith values for lunar perigee and node mean motions partial derivatives with respect to moon mean motion

24 p3442 A72-45241

Meteor streams orbital elements dispersion from photographic data, and asteroid stream percentage variation with concentration of orbits to ecliptic plane

24 p3445 A72-45462

Observation and feature variations of comet 1969e before and during the perihelion passage.

24 p3445 A72-45465

On the existence of a resonance-captured 'quasi-satellite' of the earth.

24 p3446 A72-45471

ORBITAL LAUNCHING

Extending the utility of the Space Shuttle as a space rescue vehicle.

24 p3449 A72-45130

Study of shuttle-based systems for high-energy planetary missions.

24 p3441 A72-45189

ORBITAL MECHANICS

NT KEPLER LAWS

Consecutive collision orbits characterized by particle ejection from mass along x axis in restricted three body problem

01 p0122 A72-10006

Critique of Brown lunar theory, discussing planetary orbits, earth and moon figure effects and second order terms

01 p0122 A72-10009

Recurrence relation derived for homogeneous normalized satellite inclination function with three parameters in series expansion for geogravitational potential

01 p0123 A72-10012

Periodic orbit families emanating from Lagrange triangular point L4 in restricted three body problem with mass ratio parameter equal to Routh critical mass ratio

01 p0123 A72-10013

Hori perturbation theory equivalence to von Zeipel theory established to third order approximations in perturbed elliptic motions

01 p0129 A72-10796

Motion stability of sphere and homogeneous semi-infinite rotating cylinder in circular orbits and monoenergetic streams, integrating by trajectories

02 p0285 A72-12832

Liapunov stability of rigorous particular solutions /corresponding to libration points/ of three body problem, determining motions of satellite influenced by two spherical bodies

03 p0436 A72-13823

Comet hypotheses, examining orbit axes and perihelions spatial distribution as possible interstellar origin

03 p0438 A72-13978

Conditionally periodic motions of particle in gravitational field of axisymmetric oblate planet, describing

canonical transformations for Hamiltonian function reduction to normal form

04 p0572 A72-14638

Spatial motion of two thread-coupled bodies along satellite circular orbit, discussing system equilibrium position stability and phase trajectories

04 p0582 A72-15003

German monograph on Poincare orbit stability in restricted three body problem, using canonical mappings of annulus and perturbation method

05 p0689 A72-16044

Collisionless stellar dynamics, considering Lin wave interactions for orbital theory

05 p0713 A72-16053

GEOS satellite orbit determination and prediction errors from optical tracking systems and gravity models, estimating resonant coefficients

06 p0877 A72-17653

Book on orbital mechanics covering perturbation theory, many body problem, conic sections, orbit determination, canonical transformations and Hansen methods, moving coordinates, etc

06 p0879 A72-17820

Hamilton-Jacobi equation for bounded plane circular three body problem with construction of algebraic partial integrals and periodic orbits

06 p0850 A72-18709

Short period comets orbital evolution and major planets gravitational effects, discussing cometary cloud formation, diffusion, motion and discovery

07 p1078 A72-19981

Gravitational system dynamics, discussing massive-light star mixtures with collisions and systems with equal mass objects

08 p1231 A72-21121

Flexibly stabilized satellite orientation determination by stellar sensors and magnetic damping of rotation

08 p1240 A72-21139

Librational transverse oscillations boundary value problems of heavy thread on orbiting satellite, determining equilibrium and eigenfunctions

08 p1240 A72-21142

Aerodynamic and gravitational effects on relative motion of two orbiting point masses connected by flexible nonexpandable thread

08 p1240 A72-21143

Planar restricted three body problem periodic solutions with bridges connecting direct and retrograde circular orbits

11 p1721 A72-26153

Infinitesimal mass revolution around smallest primary of restricted four body problem, discussing element perturbation

14 p2161 A72-30913

Orbital correction problems for vehicle around spherical planet, considering velocity, fuel consumption and trajectory optimization

15 p2308 A72-31819

Fourier analysis for geopotential resonance effect on satellite orbits, calculating 13th harmonic influence on GEOS 2 and BE-C mean longitude

15 p2309 A72-31939

Aerodynamic drag at high latitudes observed from Molniya satellites orbit analysis, suggesting upper atmosphere density change

15 p2229 A72-31989

Singularity of noncircular cross section zero velocity torus circumscribing area with three dimensional orbit of stationary stellar system star

16 p2460 A72-34014

Further periodic solutions of the three-dimensional restricted problem. II.

17 p2604 A72-34444

Long-term prediction of artificial satellite motion along almost circular orbits allowing for a random number of zonal harmonics

17 p2607 A72-35033

The determination of zonal harmonic coefficients of the terrestrial potential

19 p2790 A72-38173

Terrestrial and lunar orbital and rotational motion behavior, discussing kinematic theory and ground and space vehicle based observation techniques

19 p2865 A72-38479

Three body problem second kind periodic orbit existence proof based on Weinstein theorem

19 p2867 A72-38553

Book - Astrodynamics: Orbit correction, perturbation theory, integration

19 p2868 A72-38723

Loosely stabilized satellite orientation determination by stellar sensors and magnetic damping of rotation

20 p2976 A72-39244

Librational transverse oscillations boundary value problems of heavy thread on orbiting satellite, determining equilibrium and eigenfunctions

20 p2977 A72-39247

Aerodynamic and gravitational effects on relative motion of two orbiting point masses connected by flexible nonexpandable thread

20 p2977 A72-39248

Near parabolic orbit and short periodic comets motion, discussing circumsolar cloud and nongravitational disturbances

20 p2974 A72-40068

Comparison of the classical and the global solutions of the ideal resonance problem.

21 p3085 A72-41047

A two-parameter survey of periodic orbits in the restricted problem of three bodies.

21 p3106 A72-41049

The concept of reference loci applied to four-body dynamics.

24 p3440 A72-45137

Critical inclinations and eccentricities concepts for N planet problem, applying results to general three body problem

24 p3442 A72-45239

ORBITAL MOTION

U ORBITS

ORBITAL POSITION ESTIMATION

Geodetic latitude and altitude from geocentric coordinates.

17 p2547 A72-35103

Equinoctial orbit elements position and velocity vectors partial derivatives matrices for two body problem, discussing application to general and special perturbations

17 p2609 A72-35104

Photographic observation of artificial earth satellites without the aid of time recording devices. II

17 p2517 A72-35384

Least squares method for satellite motion parameters determination in orbital plane, using altimeter distance to planet surface measurements

22 p3223 A72-42202

On application of Kalman filtering technique to on-line orbit estimation of a launching vehicle.

22 p3203 A72-43142

ORBITAL RENDEZVOUS

NT EARTH ORBITAL RENDEZVOUS

Nonlinear programming iteration scheme for fuel-time optimization of satellite orbital rendezvous terminal phase

03 p0437 A72-13838

European reusable space tug, discussing computer controlled attitude stabilization and maneuvering system design for orbital rendezvous and docking

05 p0725 A72-16446

Relative motion of active interceptor spacecraft approaching passive craft in central gravitational field using dimensionless differential equations similarity coefficients method

05 p0728 A72-16592

Spacecraft soft orbital rendezvous guidance involving orbital transfer maneuver for velocity vector directional coincidence to reduce terminal relative velocity

05 p0729 A72-16757

Elliptical orbiting spacecraft minimum fuel consumption rendezvous maneuver, formulating variational extremum problem with constraints

14 p2150 A72-30329

Optimal feedback controller design based on cooperative game described by quadratic cost functional under linear differential equation constraints, applying to satellite terminal rendezvous

15 p2267 A72-31789

Spacecraft soft orbital rendezvous guidance involving orbital transfer maneuver for velocity vector directional coincidence to reduce terminal relative velocity

17 p2622 A72-35260

Relative motion of active interceptor spacecraft approaching passive craft in central gravitational field, using dimensionless differential equations similarity coefficients method

19 p2869 A72-37564

The space tug orbital operations.

24 p3451 A72-45196

ORBITAL SHOTS

Titan 3 family systems analysis for delivering multiple communication satellites to geostationary orbits [AIAA PAPER 72-570]

12 p1870 A72-27378

ORBITAL SIMULATORS

U SPACE SIMULATORS

ORBITAL SPACE STATIONS

NT EOSS

NT HALO ORBIT SPACE STATION

NT ORBITAL WORKSHOPS

NT SALYUT SPACE STATION

Nonlinear and digital synthesis of computerized optimal control systems for long-life orbital stations and laboratories

05 p0724 A72-16434

Space shuttle, tug and orbital station transportation system benefits and applications, noting European economic implications

08 p1229 A72-20977

NASA research and applications module /RAM/ for interim space station development and possible missions with space shuttle

08 p1240 A72-20978

NASA space programs, discussing future Apollo, Skylab, orbiting space station, space shuttle and deep space projects

Human role in space shuttle on-orbit maintenance vs space station modules earth return, considering feasibility and cost effectiveness
[AIAA PAPER 72-229]

Space tools and support equipment for earth orbital systems maintenance, replacement and repair, discussing Skylab requirements and teleoperator applications
[AIAA PAPER 72-230]

Report to COSPAR on 1971 Soviet space programs, discussing moon, planets, cosmic radiation, interplanetary medium, magnetosphere, upper atmosphere, meteorological, orbital station and biomedical studies

Astronomical observations from astrophysical observatory onboard orbital space station controlled by astronaut, discussing telescope orientation outside of spacecraft

Parabolic switching boundaries method for optimal fuel consumption control of manned orbital space vehicles

Theory of an experiment in an orbiting space laboratory to determine the gravitational constant.

The Space Station Prototype Program - The development of a regenerative life support system for extended-duration missions.

The space tug orbital operations.

Astronomy from a space platform; Proceedings of the Symposium, Philadelphia, Pa., December 27, 28, 1971.

Space astronomical observatory mission planning, analysis and operation and data utilization in terms of space and ground facility instruments and support subsystems

Electronic imaging devices for astronomy from a space platform.

Future giant-aperture orbital space telescope design based on active optics and electro-optical techniques, discussing laser interferometry and precise servomechanisms roles

Orbital transfer

U TRANSFER ORBITS

ORBITAL VELOCITY

Minimum velocity change noncoplanar two and three impulse orbital transfer from regressing oblate earth assembly parking ellipse into flyby trans-Martian asymptotic velocity vector

Orbital correction problems for vehicle around spherical planet, considering velocity, fuel consumption and trajectory optimization

Equinoctial orbit elements position and velocity vectors partial derivatives matrices for two body problem, discussing application to general and special perturbations

ORBITAL WORKERS

MORL and Orbital Biomedical Laboratory projects, reviewing crew accommodation, spacecraft and booster requirements and biomedical measurements

Human role in space shuttle on-orbit maintenance vs space station modules earth return, considering feasibility and cost effectiveness

[AIAA PAPER 72-229]

ORBITAL WORKSHOPS

In orbit servicing of spacecraft.

[AIAA PAPER 72-731]

ORBITALS

NT ELECTRON ORBITALS

NT MOLECULAR ORBITALS

NT SLATER ORBITALS

Surface potential effects on splitting of p- and d-orbitals of atoms and ions approaching bcc and fcc substrates

High energy particle and photon orbital and vortical motions in Kerr metric outside equatorial plane in gravitational field

Resonant diffusion in the presence of strong plasma turbulence.

ORBITER PROJECT

Outer planet low thrust orbiter missions, comparing three body numerical results with two methods of patching together two body solutions

ORBITING ASTRONOMICAL OBSERVATORY

NT TROJAN ORBITS

NT TWENTY-FOUR HOUR ORBITS

Collision periodic orbits calculation in restricted three body problem

20 p2973 A72-39885

ORDER-DISORDER TRANSFORMATIONS

Cation distribution observation over nonequivalent lattice sites in shocked orthopyroxene, noting Mg and Fe order-disorder

Order-disorder transition cooling effects on V carbide superlattice domain structure, using electron and optical microscopy

Alloying and heat treatment ordering effect on hydrogen diffusion coefficients, penetrability and solubility in Pd-Al alloys

Short range order and nucleation of long range order in Ni-rich Ni-Nb alloys, observing electrical resistivity changes dependence on solute concentration

Order-disorder reaction in Ni-V, Ni-V-Nb and Ni-V-Ta alloys, estimating critical temperature

Laser pulse heating inability to quench in disorder in Fe-Al alloy

Neutron irradiation produced lattice disorder in Li doped float zone melted n-p type Si solar cells

Soviet monograph on thermoplastic hardening of high strength martensitic steels and Ti alloys by ordering dislocation structure

Order-disorder transition in metastable splat cooled Ti-rich Ti-Fe alloys from phase formation, constitution and crystal chemistry viewpoint

Electron bombardment disordering of ordered Ni-Mn alloy along different crystallographic directions

Epitaxy and vacancy structure of TiSe with type B8 ordering

Ordering degree effect on elementary excitation spectrum gaps in nonideally ordered solid systems, obtaining Green functions for valence and conduction electrons calculations

X ray analysis of internal friction strains in nickel molybdenide during ordering process at 650-700 C, using torsional pendulum method for friction measurements

Ordered crystallization casting of Ni superalloys for turbine blades, using power down and high rate solidification processes

Ordered growth and etching of uranium and zirconium oxide-tungsten fiber refractory composites, using X ray diffraction and scanning electron microscopy

Hydrostatic pressure effect on itinerant antiferromagnetic ordering in Cr-Fe alloys with Ru and Mn additions

Lattice disorder effects in ion implanted Si and compound semiconductors, using IR and EPR measurements

Ordering in fcc lattice ternary alloys with allowance for atoms interactions, noting phase transformation critical temperature and superlattices existence

12 p1828 A72-27432

12 p1859 A72-28074

13 p1976 A72-28691

Temperature dependent electron density of state and dc resistivity of disordered binary alloys, using single band thermal disorder model

Electron microscopic and X ray analyses of ordering kinetics in Ni-Mo alloys, noting lattice type change and complex domain structure formation causes

Heterogeneous order-disorder transformation in Ni-Mo alloy at 78 K after annealing, using ion field emission microscopy

Model with lamellae and tie molecules disordered alignments to explain relation between stress-strain behavior and bond fracture in highly oriented polymer fibers

Solid-state phase transformations.

In vitro of the mechanism of radiative recombination in study of monocrystalline arsenic selenide.

Domain structures in metal crystals, investigating ordering in Ni-Mo alloys

Calorimetric investigation of atom ordering effects in a Ni2Cr alloy

Influence of alloying elements on ordering in alloys of the nickel-molybdenum system

Contribution to the study of phenomena of ordering of defects in single crystals of alumina- or zirconia-base refractory materials

23 p3302 A72-44000

ORDINATES

U COORDINATES

ORDNANCE

Titanium powder metallurgy in ordnance applications, discussing hardware, weight economies and market development

Minuteman HERO /hazards of electromagnetic radiation to ordnance/ preflight testing, describing ordnance monitoring system based on fiber optic data links

Flight mechanics of spin stabilized rotating disks for special ordnance delivery, considering aerodynamic parameters relation to dynamic stability and orientation

[AIAA PAPER 72-982]

ORGAN WEIGHT

Elastic lung shaped model for distribution analysis of weight induced stresses, strains and surface pressures in lung

Adrenal morphology changes in rats subjected to hypokinesia

23 p3255 A72-43905

ORGANIC CHEMISTRY

Organic cosmochemistry evolution, discussing radio astronomical observations, lunar soil samples, meteorite analysis and interstellar gas cloud molecules

Carbon chemistry of Apollo 14 size-fractionated fines, noting solar wind activity effect

Simulation study of lunar carbon chemistry, noting hydrocarbon production by solar wind interaction with fines

Chemical evolution in microenvironment reactions system due to dominant energy or mass parameter, discussing complex organic molecule synthesis

Life beyond solar system, discussing planetary formation and prebiological organic chemistry developments and interstellar communication

Life origin and primordial organic chemistry, considering Darwinian evolution, spontaneous generation, primitive atmospheres, interstellar matter, energy sources, macromolecular synthesis, moon and Jupiter

Atmospheric organic vapor effects on electric contact erosion, deriving showering arc duration, gap breakdown, arc number and energy

Chemical evolution and the origin of life - Bibliography supplement 1970.

Complex organic molecules in interstellar space, discussing molecular identification reliability, prebiological organic synthesis, interstellar and planetary biology and UV natural selection

Quantum-chemical model of organic ring-shaped molecule with persistent magnetization at microscopic level

22 p3150 A72-42318

ORGANIC COMPOUNDS

NT ADENINES

NT ADENOSINE DIPHOSPHATE [ADP]

NT ADENOSINE TRIPHOSPHATE [ATP]

NT ADENOSINES
 NT AMINO ACIDS
 NT CARBON TETRAFLUORIDE
 NT FATTY ACIDS
 NT FLUOROCARBONS
 NT FLUOROXYHYDROCARBONS
 NT GLUTATHIONE
 NT LEUCINE
 NT METHIONINE
 NT NUCLEOTIDES
 NT OLEIC ACID
 NT ORGANIC LIQUIDS
 NT OXIDASE
 NT PEPTIDES
 NT PROTOPROTEINS
 NT SEROTONIN
 NT THYROXINE
 NT TRYPTOPHAN

Gas bubble damage centers in organic glass produced by quasi-steady ruby laser pulse induced high temperature heating, using high speed photography 01 p0079 A72-10373

Apollo 12 retrieved Surveyor 3 TV camera mirror surface and camera-shroud organic contamination attributed to spacecraft outgassing and engine exhaust products 03 p0415 A72-12948

Martian atmospheric volatiles history, noting initial chemical conditions favorable to abiotic organic synthesis 04 p0569 A72-14503

Shock wave contributions from micrometeorites, meteors, meteorites and thunder to organic compounds formation in primeval atmosphere 04 p0572 A72-14760

Comet collisions in planetary nebulae as source of organic compounds in universe in preplanetary era, noting nucleic acid bases in carbonaceous meteorites 04 p0471 A72-14802

Chemical evolution of carbonaceous chondrite organic compounds, discussing similarity to terrestrial abiogenic material 04 p0484 A72-14804

Organic materials detection on planetary surfaces with in situ gas chromatography and mass spectrometry 04 p0573 A72-14808

Ionizing radiation as effective energy in primordial organic synthesis, discussing small molecule formation and subsequent condensation into polypeptides and polynucleotides 05 p0617 A72-16127

Burning rates dependence on pressure in mixtures of ammonium perchlorate with succinic, glutaric, adipic, azelaic, sebacic, fumaric and aminosuccinic acids 06 p0867 A72-18210

Organic origin of meteoritic hydrocarbons in early solar system related to Fischer-Tropsch reaction 07 p1076 A72-19590

Polyethylene oxidative degradation study with gas chromatographic techniques, obtaining aliphatic and organic compounds at 75-200 C in varying oxygen concentrations 08 p1128 A72-21425

Cosmic sources of organic compounds from chemical evolution viewpoint, discussing comets, interstellar space, prestellar nebulae and cool stellar atmospheres 08 p1120 A72-22014

Viking Lander mass spectroscopic analysis of organic compounds, water and volatile constituents of Martian atmosphere and surface 10 p1540 A72-24383

Nd laser second harmonic generation by organic crystalline powders, noting suitability of benzophenone, xanthone, benzimidazole and resorcin 12 p1823 A72-27854

Vapor-liquid equilibrium analysis of water soluble volatile organic compounds in closed airtight systems by gas chromatography 13 p1910 A72-29326

Urease-active colloidal organo-complex extraction from Dublin clay loam soil, describing filtration procedure 13 p1913 A72-29399

Abiotic origin of organic compounds in carbonaceous chondrites, analysing Murchison and Murray meteorites by combined gas chromatography-mass spectroscopy technique 15 p2306 A72-31625

Rhodamine 6G photodegradation resistance improvement in cooled solid matrices of polymethylmethacrylate, investigating time and temperature dependence of bleaching by linearly polarized lasers 16 p2401 A72-33386

Electrochemical development of high energy batteries using organic solvents, organic cathode depolarizers and fused salts 16 p2351 A72-33888

Quinones as reversible redox couples for rechargeable cathodes, noting air regeneration capacity in organic electrolytes 16 p2352 A72-33898

Transition metal complex organic dye solution for Nd-glass laser Q-switching and mode locking, noting high photochemical stability 21 p3062 A72-40244

ORGANIC LASERS

Laser generator research, discussing metallic vapor, heterojunction semiconductor, liquid, neodymium and organic colorant types 02 p0237 A72-11696

Aqueous solutions specular reflectance measurement, using organic dye laser spectrophotometer at 360-650 nm and reflectometer equipped spectrophotometer at 0.2-20 micron wavelengths 02 p0226 A72-11831

Laser pumped organic dye laser frequency-time characteristics, noting noncoincidence of amplification and photon density maxima 02 p0238 A72-12118

Tunable multiple wavelength organic dye laser using optical feedback through partially transparent mirrors 03 p0367 A72-13443

Passively mode locked Rhodamine 6G dye laser, obtaining frequency tuning with intracavity Fabry-Perot filter and transform limited duration picosecond pulses 03 p0368 A72-13605

Superradiative properties of high gain flashlamp-pumped dye laser amplifier, determining small signal amplification as function of pumping power and frequency 03 p0369 A72-14393

Emission spectrum and intensity variation of organic dye solutions excited by nitrogen laser pulsed radiation 04 p0529 A72-14655

Dye laser monochromatic coherent light wavelength tuning with minimized optical cavity degradation and without external optics 04 p0531 A72-15502

Organic dye lasers radiation nonlinear interaction with alkali metals spark discharge plasma, showing angular and spectral broadening 04 p0532 A72-15573

Rhodamine 6G dye laser tuning by variable birefringence filter using lead lanthanum zirconate titanate electrooptic ceramics for wavelength selection 07 p1002 A72-19203

Flashlamp pumped dye-doped polymethyl methacrylate laser thermal and photochemical effects decrease and peak power output increase by light converter 07 p1002 A72-19206

Transient gain measurements on laser dyes of flashlamp pumped rhodamine 6G-ethanol solutions with air and nitrogen 07 p1002 A72-19208

Dye laser system with narrow linewidth oscillator, transverse mode selector, power amplifier and nitrogen pumping, noting 50 kw and 5 nsec pulse generation capability 07 p1002 A72-19209

Pulsed dye lasers logarithmic detector circuit with two ultrafast photodiodes, eliminating intensity variations problem 07 p1005 A72-19415

Repetitive dye laser with monochromatic beam of tunable wavelength, noting spectroscopic applications 07 p1009 A72-20588

Optimum lasing conditions and spectral characteristics of organic dye lasers at 3,100-11,000 Å 07 p1009 A72-20613

Wavelength tunable dye laser pumped by dual pulse lamps with Fabry-Perot interferometer in resonator 07 p1009 A72-20614

Organic dyes molecular photodecay effect on output and power losses of laser activated by flash pump white light 08 p1184 A72-22029

Rhodium solution laser emission pulse characteristics relation to pumping energy distribution over container end surface 08 p1184 A72-22048

Absorption spectra and detection sensitivity enhancement by organic dye laser quenching with broadband cavity 09 p1323 A72-22601

Tunable dye laser system with narrow band filter for Raman spectroscopy of gases 09 p1326 A72-23351

Fast coaxial flash lamp pumped liquid dye laser /LDL for photolysis and biophysical and biochemical applications 09 p1326 A72-23406

Four-photon parametric frequency selection within broad stimulated emission lines during coherent light interaction, considering dye solution laser pumping 11 p1648 A72-26335

Quasi-stationary supersonic plasma flare generation by lamp-pumped rhodamine laser, studying shock wave structure by high speed cinematography 12 p1825 A72-27882

Effect of pumping radiation absorption by electron-excited molecules on organic compounds lasing efficiency 12 p1825 A72-27883

Picosecond pulse efficient second harmonic generation by crystals inside high power dye mode locked Nd-glass laser folded cavity 12 p1826 A72-28220

Plasma spectral absorption coefficients determination by organic dye laser with tunable radiation frequency 13 p2015 A72-29504

Electron transfer frequencies and triplet-triplet transition spectra of polyphenyl compound molecule scintillators for UV lasers, using chaotic phase method 13 p1968 A72-29509

Energy conversion efficiency of xanthene dye laser pumped by mode-locked Nd-glass laser second harmonic, discussing effect of excited molecules transition to triplet state 13 p1970 A72-29686

Superradiant laser emission from organic dyes rhodamine 6G and B with coaxial flashlamp pumping source, relating input threshold energy to dye concentration 13 p1971 A72-29864

Wide tuning range organic dye laser design, using nitrogen laser line as transverse pumping source 13 p1971 A72-29869

Small spectral width emission from dye laser with interference filter and quartz plate Fabry-Perot interferometer for spectroscopic investigations 14 p2110 A72-30674

Flashlamp pumped tunable narrowband traveling wave dye ring laser, stabilizing emission frequency by intracavity Fabry-Perot etalon 14 p2110 A72-30675

Optical PCM communication system with megabits/sec information rate based on dye laser with combined frequency-time division multiplexing 15 p2198 A72-32060

Electrical pumping discharge confined by liquid wall of vortex channel in dye laser solution 15 p2251 A72-32528

Short flash characteristics of spiral pumping lamp for dye laser 16 p2400 A72-33079

CW dye laser output tuning by mirror-grating combination with interspersed output coupling element, noting orders of magnitude reduction of fluorescence background intensity 16 p2401 A72-33388

Rhodamine laser radiation effects on absorbing materials investigated by high speed cinematography and shock wave structure 16 p2404 A72-33991

Effect of pumping radiation absorption by electron-excited molecules on organic compounds lasing efficiency 16 p2404 A72-33992

Influence of the transverse distribution of pumping on the energetics and the profile of thermo-optical distortions in a rhodamine 6G laser 17 p2563 A72-35302

Tunable output dye and semiconductor lasers application to absorption spectroscopy and air pollution monitoring 17 p2564 A72-35381

CW optically pumped tunable dye laser wavelength ranges, linewidth, mode purity, polarization and power output characteristics 17 p2565 A72-35947

Wavelength tunable UV dye laser pumped by the fourth harmonic of Nd:YAG laser. 19 p2810 A72-37407

Organic dye laser molecular sublevel relaxation effects on steady state pi pulse behavior and spectral hole burning from resonance radiation propagation analysis 20 p2932 A72-39503

Energy characteristics of the laser action in rhodamine 6G pumped by a pinched discharge. 20 p2933 A72-39512

Continuously tunable dye laser to obtain output wavelength variation by changing pump laser beam incidence angle on prism lateral face 20 p2933 A72-39563

Pulsed monochromatic laser with toluene, xylene, ethanol, isoamyl alcohol and dimethylformamide solutions of organic dyes, discussing wavelength variations and power outputs 21 p3064 A72-41736

Optical elements of a laser-pumped dye laser 21 p3064 A72-41737

Investigation of amplification spectra and triplet-triplet absorption in a laser with a rhodamine 6G solution 21 p3064 A72-41743

Wavelength tuning of an intracavity pumped CW mode-locked dye laser. 22 p3184 A72-41989

Effects of thermo-optical distortion on the radiation loss magnitude and spatial-angular radiation characteristics for a lamp-pumped rhodamine-6G laser 22 p3185 A72-42173

A new optical PCM communication system 22 p3186 A72-42939

Use of light transformers in organic dye lasers 23 p3295 A72-43413

Dynamic thermo-optical distortions compensation in lamp pumped rhodamine 6G liquid laser by introducing auxiliary dish with dye into cavity
23 p3295 A72-43679

Evanescent-field-pumped dye laser.
23 p3296 A72-43816

Ultrasensitive response of a CW dye laser to selective extinction.
23 p3297 A72-44186

Fluorescent organic dyes solutions for Nd:YAG laser output performance improvement
23 p3297 A72-44191

The efficient generation of coherent radiation continuously tunable from 2500 Å to 3250 Å.
24 p3409 A72-44803

Flashlamp-pumped dye lasers for investigations of the upper atmosphere.
24 p3409 A72-44948

Wideband parametric up-conversion of infrared waves into visible region using tunable dye laser pumping.
24 p3410 A72-45286

Kinetics, spectrum, and specific loss properties of radiation emitted by rhodamine 6G in the case of pumping by a self-constricting discharge
24 p3410 A72-45417

Rhodamine laser emission spectral band control by plane parallel plates and polarizing prisms, noting band widening by resonator loss modulation with Fabry-Perot interferometer
24 p3410 A72-45418

Pulsed laser employing a rhodamine 6G solution in ethyl alcohol with an output energy of 110 J
24 p3411 A72-45498

Time dependence of the divergence of the radiation emitted by a rhodamine laser pumped by a pinched discharge.
24 p3411 A72-45612

ORGANIC LIQUIDS
Room temperature nonaqueous organic solvent electrochemical cell, producing open-circuit potential of 4.5 V
03 p0311 A72-12924

ORGANIC LITHIUM COMPOUNDS
IR-spectroscopic investigation of the effectiveness of oxidation inhibitors in lubricants
19 p2823 A72-38092

ORGANIC MATERIALS
High transition temperature alloys, layered intermetallic and organic superconductors development and properties
01 p0113 A72-10163

Thermally stable organic polymer fiber production methods and performance evaluation in high temperature environments, discussing structure types, flammability and tensile properties
02 p0248 A72-11771

Multispectral scanner data training sets size effect on correlation between soil reflectance and organic matter content obtained from ground truth
02 p0227 A72-11845

Carbon isotopic studies of organic matter in Precambrian rocks
09 p1304 A72-23496

Organic matrices in structural composites, considering mechanical behavior, processability and properties in adverse environments
11 p1674 A72-26230

Organic and metal matrix composites physical and mechanical properties and application to spacecraft and missile components, considering cost effectiveness
11 p1674 A72-26233

Fiberglass replacement by organic fiber for L-1011 interior sandwich panels and laminates, considering Nomex fiber in woven fabric
12 p1835 A72-28099

Weld solidification synthesis with crystalline organic materials, investigating substructure size, growth rate and thermal gradients
13 p1966 A72-29424

Ruby laser emission second harmonic generation effectiveness in organic polycrystals from comparison to lithium niobate
13 p1970 A72-29689

Xenon filled coaxial pulse tube for pumping organic dye solutions, obtaining intensive light flashes
13 p1971 A72-29923

Book - Solid lubricants and self-lubricating solids.
21 p3073 A72-41529

Variation of the output of radioluminescence of organic scintillators with energy loss and the number of charges of ionizing particles
22 p3180 A72-42938

ORGANIC NITRATES
NT CELLULOSE NITRATE
NT NITROGLYCERIN

ORGANIC PHOSPHORUS COMPOUNDS
Organophosphorus antiwear additives in neopentyl polyol ester lubricants on 440C stainless steel surfaces, using four ball wear test machine [AD-740055]
02 p0250 A72-12849

Inorganic phosphates-nucleoside hypohydrous thermal reaction mechanism, discussing thermal

polymerization of orthophosphates for phosphorylation and condensing agents in primordial synthesis
04 p0483 A72-14770

Physiological effects of transfusing 2,3-diphosphoglycerate (DPG)/depleted red cells with high oxygen affinity in anemic hypoxic patients
04 p0473 A72-15211

Kinetics of heat inactivation of phosphoglycerate kinase in soluble fraction from hydrogenomonas facilis
07 p0922 A72-20237

Red blood cell metabolite 1,3 diphosphoglycerate determination method by rapid deprotonization, concentration by precipitation and enzymatic reaction
15 p2190 A72-32488

Structure-property relationships in flame retardant systems - Relative effects of alkyl phosphates, phosphonates and phosphites on cellulose flammability.
20 p2987 A72-39698

Cortical effects mechanisms in animal vegetative systems, noting biological oxidation and organic phosphorus compound studies
21 p3000 A72-40759

ORGANIC SEMICONDUCTORS
Impurity, surrounding gas and pressure effects on organic semiconducting material electrical conductivity, discussing carrier origin and number, and measurement techniques
01 p0113 A72-10125

Organic semiconductor developments in chemistry and physicochemistry of multiconjugate systems and polymer complexes with charge transfer
01 p0114 A72-11074

Microwave photoconductivity and photodiode effect in organic semiconductors
04 p0561 A72-15083

Space charge limited current theory of thin film organic semiconductor systems, investigating energy spectrum of traps and free carrier capture kinetics
11 p1700 A72-25783

Charge carrier photoproduction and energy structure of trans-bis-indonylene (TBB)/semiconductor thin films
11 p1700 A72-25784

Photoemission from tetracene organic semiconductor due to electron capture defect ionization by excitons
11 p1700 A72-25785

Organic semiconductors for photovoltaic cell applications, discussing structural characteristics, improved charge transfer and crystallographic conductivity mechanisms
12 p1856 A72-28015

Semiconductor properties of iodine and bromine molecular complexes of /1-phenyl-3-isindolyl-/ /1-phenyl-3-pseudoisindolylidene-/ phenylmethane and /1-p-tolyl-3-isindolyl-/ /1-p-tolyl-3-pseudoisindolylidene-/ phenylmethane.
19 p2847 A72-38641

ORGANIC SILICON COMPOUNDS
Thin organosilicon films for integrated optical circuits and devices, discussing transparency and loss characteristics and refractive index control
09 p1314 A72-23339

Electrical measurement of moisture effects on adhesive bond strength, insulation resistance and hydrophilicity of cast epoxy and organosilicon adhesives
12 p1833 A72-27449

ORGANISMS
Gravitational biology theory problems, discussing possibility of applying relativistic phenomena to living organisms in inertial or inertialess systems
02 p0160 A72-12016

Foresight, forecast and prognosis concepts in physiology, discussing intuition role and relation between molecular and cellular processes and organism activity
02 p0163 A72-12346

Flavin photoreceptor participation in contemporary organism metabolic systems
04 p0469 A72-14781

Biochemical functions of organisms in evolution of biosphere, discussing redox reactions, elementary compositions and metal compounds role in photosynthesis
04 p0470 A72-14796

ORGANIZATIONS
Book on IATA organization and functions, discussing international aviation history, conference machinery, enforcement of conference resolutions, air transportation economics, public corporations, etc
10 p1564 A72-23846

ORGANIZING
Organizational changes due to electronic data processing /EDP/ introduction into INTERFLUG material-technical supply
12 p1890 A72-27273

ORGANOMETALLIC COMPOUNDS
NT CARBOXYHEMOGLOBIN
NT CHLOROPHYLLS
NT FERROCENES
NT HEMOGLOBIN
NT ORGANIC LITHIUM COMPOUNDS
NT OXYHEMOGLOBIN

NT PORPHINES

Lattice expansion of metal chalcogenide superconducting organometallic structures with aromatic or aliphatic Lewis bases sandwiched into van der Waal gap
08 p1216 A72-21214

Dispersed phase nickel-thoria alloy production method based on organometallic compounds, avoiding high temperature and solvent elimination difficulties
11 p1664 A72-26849

Qualitative determination of organometallic substances in solid propellants by thin layer chromatography
23 p3262 A72-43598

ORGANOMETALLIC POLYMERS
Metal polymer interface synthesis based on linearly cyclic organoelementary high molecule compounds, analyzing heat and thermal oxidation resistances
05 p0680 A72-16202

ORGANS
NT BLADDER
NT KIDNEYS
NT LIVER
NT LUNGS
NT PITUITARY GLAND
NT SPLEEN
NT TESTES

A new model for estimating space proton dose to body organs.
17 p2508 A72-35354

Modifications of the rate of renewal of norepinephrine in various peripheral organs of the rat during exposure and acclimatization to cold
23 p3258 A72-44244

Quantitative evaluation of the kinetics of free-radical processes in animal organs under hypoxic conditions
24 p3371 A72-44596

ORIGINE METEORITE
Magnetite forms in Orgueil meteorite, observing platelets, stackings and framboids by scanning electron microscope
04 p0569 A72-14506

Extraterrestrial abiogenic organic hollow spheres of Orgueil meteorite evaluated according to intrinsic and extrinsic criteria
09 p1385 A72-22640

Orgueil meteorite examination by mass spectroscopy and gas chromatography, identifying amino acids of extraterrestrial origin
09 p1393 A72-23549

ORIENTATION
Magnesium alloys torsional vibration damping correlation with texture orientation resulting from fabrication method
03 p0375 A72-13930

Nonlinear control systems of vehicles angular orientation, investigating dynamic properties by method of harmonic linearization
05 p0727 A72-16474

Reaction time to visual orientation change, obtaining aftereffects as function of orientation specific adaptation duration and separation angle between inspection and test lines
08 p1124 A72-20986

Adjustment to subjective horizontal, vertical and 45 deg tilt in dark as function of age in 3-20 year old subjects
08 p1124 A72-20989

Moving and inertial trihedron orientation determination from absolute angular velocity vector, solving Poisson equations system
08 p1205 A72-21802

Aerial stereopair photograph orientation for geodetic coordinate adjustment in terms of collinearity, coplanarity and scaling
09 p1308 A72-22486

Spacecraft orientation angle measurement by inertial sensors, analyzing equipment kinematic efficiency and limitations
11 p1684 A72-26913

Inertial crosscouplings effect on orientation process dynamics of solid body investigated by nonlinear mechanics, noting centrifugal moments of inertia effects
15 p2275 A72-31730

Carbon monoxide adsorption on nickel surface, determining preferential orientation by extended Huckel calculations
15 p2276 A72-31867

Stabilized retinal image techniques to examine functional relationships between nonstabilized grating pattern orientation adaptation and stabilized line stimuli fading rates
16 p2358 A72-33646

Orientation dependence of slip in tantalum single crystals.
17 p2567 A72-34748

Vestibular and optical stimuli interaction in human orientation, testing via Barany chair on rotating platform surrounded by optokinetic drum
21 p3007 A72-40751

Body orientation under vertical sinusoidal vibration.
21 p3008 A72-41019

Signal detection analysis of meridional variations to vertical and horizontal gratings. 23 p3259 A72-44389

ORIFICE FLOW

Navier-Stokes equations numerical solution by computerized simulation for viscous channel flow with diaphragm orifice reducing cross section 04 p0513 A72-15644

Mean and fluctuating temperature dependence of gas discharging from orifice to atmosphere on pressure vessel wall heat transfer [ASME PAPER 71-WA/HT-32] 05 p0745 A72-15884

Flow field quantities for nearly free axisymmetric steady molecular gas flow through circular orifice from high pressure region into vacuum 06 p0800 A72-18118

Numerical determination of particle number and mass flux density in monatomic rarefied gas flow through circular orifice at finite pressure ratio 07 p0972 A72-20107

Hydraulic servomechanism spool type control valve orifice flow characteristics, measuring mass flow for various spool determined port shapes 07 p0915 A72-20533

Reference transfer method for *in situ* calibration of ionization gages, determining pressure ratio of molecular gas flow through fixed orifices 10 p1480 A72-24147

Analytical models for potential flow through smooth edged orifice, comparing acoustical inductance predicted and experimental values 13 p2006 A72-29770

Core axial density distribution in gas jets freely expanding into vacuum from double concentric orifices, using electron beam fluorescence technique 15 p2218 A72-32150

Computer simulation by Monte Carlo technique of particulate fluxes in divergent conical Knudsen cell orifices, considering specular reflection and surface diffusion effects 15 p2218 A72-32380

Three-dimensional wall jet originating from a circular orifice. 19 p2747 A72-38811

Study of the flow of a heavy fluid with free surface from a symmetrical tank 20 p2913 A72-39417

Turbulent interaction of air jets issuing from perforated surfaces into free space, determining three dimensional flow field via Reichardt free turbulence theory 23 p3248 A72-43625

Boundary layer flow on a circular cylinder moving in a fluid at rest. 23 p3248 A72-43715

Temperature freezing in spherical or cylindrical expansion into a vacuum. 23 p3357 A72-44498

ORIFICES

Stress concentration near elliptic and square orifices in plates with nonlinear viscoelastic hereditary creep properties 08 p1244 A72-21242

ORION CONSTELLATION

Orion A and M17 radio recombination line width increases, discussing Stark broadening functional dependence on principal quantum number 01 p0131 A72-11010

Galactic IR astronomy, discussing findings on emission from H II regions of Orion Nebula and late and early type stars 02 p0276 A72-11643

Dust continuous spectrum and Balmer line intensity ratio in Orion Nebula from slit spectroscopy observations [AD-745076] 02 p0284 A72-12631

Stellar systems existence with positive total energy, using numerical integration of equations of motion for members of Orion Trapezium 03 p0435 A72-13808

Cas A, Tau A, Cyg A and Orion Nebula absolute flux density measurements at centimeter wavelengths 04 p0578 A72-15313

Orion and planetary gaseous nebula helium atoms metastable triplet states population calculations 04 p0578 A72-15314

Zeta Orionis spectra at 922-1453 A from rocket spectroscopy, matching lines with stellar atmosphere models 07 p1072 A72-19346

Far UV view of Orion from Aerobee rocket-borne electromagnetic camera photographs of Orion-Monoceros-Canis Major region 08 p1164 A72-20994

ORIONID METEORIDS

Orionid meteor head echoes variations with diurnal radiant motion compared to Perseid meteors 09 p1389 A72-23395

ORLICZ SPACE

Solvability of the first boundary value problem of higher-order elliptic quasi-linear equations with discontinuous and rapidly increasing Orlicz-class coefficients 17 p2577 A72-35842

ORNITHOPTER AIRCRAFT
U RESEARCH AIRCRAFT
OROGRAPHY

Long wave radiation and surface friction effects on midlatitude cyclone development in eight-level primitive equation orographic model 03 p0385 A72-14229

Mountain barrier and convective area minimum size determination for numerical forecasting models, reducing primitive equations system to advection difference equation 04 p0544 A72-15459

Major and trace element abundances in orogenic area volcanic rocks, considering geographic and stratigraphic relations and composition 05 p0658 A72-16721

Numerical forecasting model with precipitation as function of vertical velocity and humidity distribution, noting orographic influence and atmosphere static stability 08 p1200 A72-21796

Numerical shallow fluid model for air flow across orographic variable grid barrier, using idealized Andes Mountains range 12 p1838 A72-27023

Response of the tropical atmosphere to local, steady forcing. 21 p3077 A72-40248

Allowance for the influence of orography in a dual-layer model of the atmosphere 23 p3310 A72-43343

Incorporation of steep mountains into numerical forecasting models. 24 p3421 A72-45486

ORRERIES

U ASTRONOMICAL MODELS

ORTHICONS

NT IMAGE ORTHICONS

A fast opto-electronic transducer 22 p3180 A72-42944

ORTHOGONAL FUNCTIONS

NT WALSH FUNCTION

Time and frequency domain properties of orthogonal nonrecursive binomial sequences, discussing digital filters synthesis 03 p0381 A72-13408

Spatial transformation in geodesy, considering point in space as position function for orthogonal and curvilinear coordinates 03 p0351 A72-14329

Orthogonal polynomials in several variables relation to approximate multiple integration, extending Stroud theorem for two-dimensional regions cubature formulas to n-dimension 04 p0539 A72-14731

Orthogonal expansion of estimators and estimands in Hermite series for Monte Carlo computation 04 p0540 A72-15631

Antenna synthesis problems approximate solution with reactive factor /supergain ratio/, involving radiation pattern and aperture current expansion as orthogonal functions 05 p0634 A72-15819

Orthogonal functions representation of received signals in ideal signal sequences transmission in linear systems with matched filters and frequency band limitation 08 p1132 A72-21326

Orthonormalized exponential functions use in hydrometeorology 08 p1202 A72-22119

Statistical analysis of temperature characteristics based on natural orthogonal components expansion for weather forecasting application 08 p1203 A72-22120

Multichannel signal processing system for optical filters synthesized by orthogonal functions 09 p1314 A72-23342

Atmospheric optics inverse problem solution, comparing orthogonal functions series expansion and regularization method algorithms 12 p1841 A72-27992

Orthogonalization method application to problems of diffraction on several bodies through reduction to integral equations 13 p1920 A72-29278

Orthogonal projection method for nonstationary heat conduction boundary value problem with thermal conductivity and specific heat as prescribed functions of position 14 p2126 A72-31049

Relations between Haar and Walsh/Hadamard transforms to yield orthogonal transforms with common fast algorithm 15 p2264 A72-32081

Global meteorological data analysis using Gram-Schmidt generated orthogonal polynomial base functions 15 p2266 A72-32719

Orthogonal functions application to flexible rotors balance, expressing deflections vs angular velocity as sum of eigenvectors 18 p2731 A72-36066

Correlator with orthogonal filters for acoustic diagnostics, noting Laguerre functions variations in signal pairs autocorrelation 22 p3176 A72-42133

Atmospheric optics inverse problem solution, comparing orthogonal functions series expansion and statistical regularization method algorithms 22 p3202 A72-43006

Antenna synthesis problems approximate solution with reactive factor /supergain ratio/, involving radiation pattern and aperture current expansion as orthogonal functions 23 p3268 A72-43427

Schauder bases in certain spaces of holomorphic functions 24 p3418 A72-44826

ORTHOGONAL MULTIPLEXING THEORY

Error probabilities estimates for communication systems using orthogonal multiposition signals in information transmission, noting techniques applicability to diversity reception systems with self selection 13 p1918 A72-28893

Performance characterization for L-orthogonal signal transmission and detection, discussing tradeoffs between error probability, SNR and bandwidth by numerical evaluation 23 p3265 A72-44180

ORTHOGONALITY

Radio wave polarization orthogonality recovery by using differential phase shifter and attenuator in radio communication systems 02 p0183 A72-12799

Geomagnetic field-hf sky wave orthogonality conditions, discussing ray tracing for signals reflected in ionosphere 05 p0630 A72-16619

Orthogonality conditions for VLF height gains in vertically inhomogeneous anisotropic earth ionosphere waveguide 09 p1282 A72-23517

Pi-theorem alternative formulation, defining independent dimensionless products in terms of universal constants, governing equations and initially and additionally specified physical quantities 10 p1503 A72-23920

Axisymmetric shock wave propagation in continuous inhomogeneous medium, taking into account shock geometry orthogonality conditions and flow hydrodynamics behind shock 11 p1616 A72-25864

Free and forced vibrations of circular plates with associated rigidities and masses, obtaining orthogonality condition for natural vibration modes 13 p2059 A72-29501

Orthogonality condition application to continuum mechanics systems with zero free energy, viscoelastic materials and chemical problems 14 p2130 A72-30419

Time dependent orthogonal coordinate system rotation by unit vector along effective axis, obtaining angular velocity and effective angle interpretation 15 p2275 A72-31590

Orthogonal vibration damping matrix numerical evaluation, comparing Caughey series and direct approaches 15 p2326 A72-31711

Poisson equations solution in orthogonal curvilinear coordinate systems to allow Laplace and Helmholtz equations separability, applying to hydrodynamic, electrostatic, electromagnetic and MHD problems 15 p2278 A72-32249

Exponential representation of isotropy groups of simple solids, noting conditions for conjugation of unimodular to orthogonal group subgroups 16 p2423 A72-33111

Piezoelectric waveguide generalized treatment via field representation by sum of normal mode waves, using modified orthogonality relation 16 p2369 A72-33761

Analysis of discrete automatic control systems with variable parameters by the method of orthogonal expansions. I, II 19 p2778 A72-37438

ORTHONORMAL FUNCTIONS

Linear distributed parameter system optimal boundary control by direct method using linear combination of finite number of orthonormal functions 04 p0505 A72-14670

Radio signal parameters with unknown envelope approximated by orthonormal function series during white noise background reception 05 p0625 A72-15823

Incompressible laminar flow in conduit with arbitrary cross section, time varying pressure gradient and initial velocity, constructing finite series solution by orthonormalizing procedure [ASME PAPER 71-WA/FE-22] 05 p0646 A72-15927

Radio signal parameters with unknown envelope approximated by orthonormal function series during white noise background reception 23 p3263 A72-43431

ORTHOPHOTOGRAPHY

An orthographic photomap of the South Pole of Mars from Mariner 7. 21 p3110 A72-41455

ORTHOSTATIC TOLERANCE

Human tilt tolerance relation to aerobic capacity, weight, height and physical fitness, determining correlation coefficient between heart rate and orthostatic response

10 p1428 A72-23733

Prolonged water immersion effects on renal function and plasma volume in trained and untrained subjects, noting deleterious effect on orthostatic tolerance and work capacity

10 p1428 A72-23738

Tilt table tests for orthostatic tolerance, measuring heart rate, blood pressure and responses of fainters and nonfainters

21 p3008 A72-41020

Lower-body negative pressure as a method of preventing shifts associated with changes in the hydrostatic pressure of blood

23 p3256 A72-43919

Comparative study of regional hemodynamics during tilt test and lower body negative pressure exposure

24 p3373 A72-45131

Induction of hemodynamic deterioration by the hypogravic state - An evaluation of mechanisms and prevention

24 p3373 A72-45199

Response to daily lower body negative pressure (LBNP) exposure 1-70mm Hg, with emphasis on plasma renin activity, sodium and potassium excretion

24 p3377 A72-45658

ORTHOTROPIC CYLINDERS

Time operator method in creep theory for orthotropic bodies, obtaining asymptotic solutions for laminar orthotropic rod and elastic plate vibration problems

02 p0289 A72-11617

Orthotropicity orientation effect on supersonic flutter of infinite-length thin heterogeneous circular cylindrical structures in axisymmetric gas flow

04 p0584 A72-14520

Saint Venant problem for orthotropic almost cylindrical beams, investigating elongation, bending due to couple and transversal loads and torsion due to torque

04 p0594 A72-15747

Stress functions for anisotropic elastic body with uniformly propagating circumferential crack, considering axially orthotropic cylinder

10 p1553 A72-23744

Radial and circular thermal stresses in free and end-constrained orthotropic cylinders with axisymmetric temperature distributions, determining relation between temperature and thermoelastic coefficients

13 p2055 A72-28561

Three dimensional axisymmetric problem for stressed state of elastic homogeneous cylindrical orthotropic bodies of revolution, using method based on small parameters

13 p2062 A72-29948

Thermal circular and radial stresses in elastic orthotropic cylinders with anisotropic expansion coefficients

19 p2872 A72-37535

Three-dimensional vibrations of orthotropic cylinders

19 p2873 A72-37693

Stability of a twisted orthotropic cylindrical shell with a jump-wise variable wall rigidity

21 p3118 A72-40815

ORTHOTROPIC PLATES

Laminated orthotropic plates and shallow shells structural analysis using finite element program

01 p0140 A72-10984

Time operator method in creep theory for orthotropic bodies, obtaining asymptotic solutions for laminar orthotropic rod and elastic plate vibration problems

02 p0289 A72-11617

Stress-strain characteristics of stochastically reinforced materials of high rigidity orthotropic elastic layers alternating with isotropic elastic or viscoelastic layers

02 p0248 A72-11623

Flexible viscoelastic orthotropic plates and shells obeying linear heredity relations, solving stability and bending problems by Laplace transform

02 p0290 A72-11625

Thick orthotropic off-axis laminated plates vibration equations solution, presenting natural frequencies spectra and modal functions

02 p0249 A72-11988

Elastoplastic problem of stress concentration in orthotropic plate with circular hole under balanced biaxial tension of infinity

02 p0293 A72-12428

Square orthotropic and isotropic plates stability with square hole under uniformly distributed load

02 p0299 A72-12685

Stresses due to initial elastic deformations in orthotropic thin plate strip, expressing Dirac function by Fourier series and integral

03 p0444 A72-13505

Stress-strain state determination for plane orthotropic bodies by optical polarization method, discussing numerical methods for stress and strain tensor components

03 p0445 A72-13580

Thermal stress concentration at heat insulated holes in orthotropic plate, assuming external-load free contour

03 p0452 A72-14134

Free vibration and buckling of orthotropic skew plates with different edge conditions, using Ritz variational method

04 p0584 A72-14508

Thickness function corresponding to constant velocity loading condition for orthotropic annular circular plate with uniform stress

04 p0591 A72-15279

Elasticity theory equations for orthotropic plate bending, derived from combination variational and difference-differential procedures

05 p0741 A72-17144

Frequency analysis of tapered rectangular orthotropic plates, determining bounds

07 p1092 A72-19945

Elastic properties of bonded orthotropic layer plates, finding good agreement with fiberglass reinforced plastic laminates

07 p1097 A72-20596

Central crack in plane orthotropic rectangular sheet under tension, showing stress intensity factors dependence on geometric and elastic constants

09 p1404 A72-22915

Microelastic stress mechanics of thinly laminated orthotropic multilayered plates, taking into account skin effect

09 p1405 A72-22994

Three dimensional dynamic analysis of multilayered orthotropic viscoelastic plates, taking into account skin effect

09 p1405 A72-22995

Piston exerting pressure on liquid filled cylinder, determining deformation state based on thin elastic orthotropic plate theory

10 p1556 A72-24266

Orthotropic point-supported rectangular panel vibration and flutter analysis for natural frequencies land flutter boundaries, applying to space shuttle design

11 p1728 A72-25379

[AIAA PAPER 72-350] Stress concentrations around circular openings and failure criteria for orthotropic and anisotropic composite laminated plates subjected to uniaxial, biaxial and shear loading

11 p1732 A72-25474

Flexural vibration of rectangular orthotropic plates with clamped, simply supported and/or free edges, presenting solution method for coupled characteristic equation pairs

11 p1735 A72-25737

Thermal stress distribution in orthotropic plates with variable heat transfer coefficient, using Fourier and Laplace transforms

12 p1878 A72-27084

Stress calculation in inflexible overlapping cemented joint of orthotropic layers, taking into account joining geometry and elastic properties anisotropy

13 p1962 A72-28396

Two dimensional reinforced plastic material anisotropic creep derivation from orthotropic plate time functions and stress tensor invariants

13 p2034 A72-28437

Boundary values for bending of plates with weak orthotropy from Vekua plate theory

13 p2062 A72-29951

Bending deflections of rectangular plates with laminated orthotropic layers analysis by finite element displacement, comparing with carbon fiber reinforced plastic structures

14 p2167 A72-30905

Elastic bending of rectangular continuous orthotropic plate with variable rigidities and elastic foundation coefficients for discontinuous boundary conditions along one edge

16 p2467 A72-33118

Stress-strain diagrams for orthotropic glass fiber reinforced plastic plates with circular hole under uniaxial tensile load

16 p2471 A72-33681

Elastic sandwich plates analysis with core layer as orthotropic Cosserat surface supporting force and moment stresses

16 p2471 A72-33787

Transverse vibration frequencies and mode shapes of clamped or supported orthotropic plates by energy method, using Rayleigh-Ritz technique

17 p2626 A72-34327

On natural vibrations and waves in laminated orthotropic plates

17 p2581 A72-34803

[ASME PAPER 72-APM-14] Shear deformation in heterogeneous anisotropic plates

17 p2633 A72-35294

Buckling of orthotropic, curved, sandwich panels subjected to edge shear loads

18 p2735 A72-36770

The dynamic characteristics of clamped rectangular plates of orthotropic material

18 p2737 A72-37067

Analysis of an inclined crack centrally placed in an orthotropic rectangular plate

19 p2870 A72-37221

Book - Analysis of plates.

21 p3125 A72-41530

Stability of orthotropic stiffened composite plates.

23 p3352 A72-44109

Large deflection of rectangular orthotropic plates.

23 p3352 A72-44111

Non-linear flexural vibration of orthotropic skew plates.

23 p3355 A72-44375

Vibration frequencies and modes determination for clamped rectangular plates of orthotropic material, using weighted residual technique and polynomial approximation

24 p3455 A72-44683

On the use of a coordinate transformation for analysis of axisymmetric vibration of polar orthotropic annular plates.

24 p3457 A72-44883

ORTHOTROPIC SHELLS

NT CYLINDRICAL SHELLS

Laminated orthotropic plates and shallow shells structural analysis using finite element program

01 p0140 A72-10984

Natural vibrations of closed crosswise reinforced orthotropic circular cylindrical shells, using digital computer solution

01 p0142 A72-11363

Flexible viscoelastic orthotropic plates and shells obeying linear heredity relations, solving stability and bending problems by Laplace transform

02 p0290 A72-11625

Elastic equilibrium in circular conical orthotropic shells of linearly variable thickness, investigating stresses under arbitrary loads

02 p0297 A72-12615

Infinitely long orthotropic cylindrical shell partially filled with elastic media under compression load, determining local stability

02 p0299 A72-12688

Computer program for buckling loads of shallow stiffened eccentrically orthotropic sandwich shells

02 p0299 A72-12703

[DGLR PAPER 71-109] Rupture induced perturbation loads in pressurized orthotropic circular cylindrical shells

02 p0299 A72-12704

Anisotropic shell supercritical deformation, deriving formula for lower critical load for shallow orthotropic spherical segment under external pressure

03 p0447 A72-13729

Critical load and stability analysis for three layer orthotropic cylindrical shell with filler under nonuniform external pressure

03 p0448 A72-13906

Optimal temperature fields and stress-strain state in orthotropic conical and cylindrical shells subject to local heating

04 p0588 A72-15051

Critical load limit and stability of elastic isotropic and orthotropic cylindrical shells, using net-point method for end conditions

04 p0588 A72-15053

Thermoelasticity theory coupled linear equations for thin orthotropic shells, taking into account rotatory inertia and lateral shear

04 p0588 A72-15060

Optimal temperature fields in locally heated orthotropic cylindrical shells, determining rigidities effect

04 p0593 A72-15655

Elastic equilibrium of circular conical orthotropic shells with linearly varying thickness, determining real and complex roots of stress state characteristic equation

04 p0594 A72-15710

Circular conical orthotropic shells of linearly variable thickness loaded by distributed and concentrated forces and moments, analyzing stress-strain state by numerical methods

04 p0594 A72-15749

Approximative buckling load of orthotropic hyperbolic paraboloid metal shells, using energy approach

06 p0897 A72-17970

Orthotropic hinged cylindrical shell stability under uniform external pressure, deriving linearized three dimensional differential equations

08 p1246 A72-21711

Orthotropic circular cylindrical elastic shell vibration mode shape analysis by Vlasov equations, using asymptotic method

08 p1247 A72-21813

Elastic shell geometry and rigidity effects on critical load in pure bending within structurally orthotropic theory, taking into account reinforcing rib eccentricity

08 p1247 A72-21816

Stress-strain state produced by asymmetric physical and thermal loads in thin orthotropic viscoelastic shells of revolution

09 p1399 A72-22702

Thermoelastic problem of open orthotropic multilayer shell of revolution, obtaining one dimensional boundary value problem solutions by numerical orthogonalization method

09 p1400 A72-22712

Thermal stress distribution in orthotropic cylindrical shell weakened by circular hole, obtaining general solution by small parameter method

09 p1400 A72-22715

Torsional behavior of twisted elastic orthotropic cylindrical shells after stability loss, using energy method

09 p1404 A72-22771

Bubnov-Galerkin method for dynamic stability of closed thin walled orthotropic cylindrical shell loaded by variable external pressure

11 p1739 A72-26977

Shallow isotropic and orthotropic shells vibration, investigating dynamic rigidity for concentrated mass

12 p1878 A72-27079

Linearized elastic equilibrium stability equations for orthotropic cylindrical shell under critical axial compression

12 p1885 A72-27970

Proximate equations of two dimensional orthotropic shell theory obtained by asymptotic integration method, examining anisotropy effect

13 p2053 A72-28391

Static deformation of laminar orthotropic shells of revolution with variable rigidity, using integral correlation method

13 p2061 A72-29795

Truncated orthotropic conical shells thermostability at different temperature gradients, using Ritz method

14 p2163 A72-30193

Differential equations for shallow orthotropic shells with variable thickness obtained by Bubnov-Galerkin variational method, presenting error assessment

14 p2163 A72-30195

Schaefer equilibrium and compatibility equations and Reissner constitutive equations for orthotropic cylindrical shells reduction to four simultaneous third-order equations

16 p2466 A72-33023

On a laminated orthotropic shell theory including transverse shear deformation.

17 p2629 A72-34807

Buckling and vibration analysis for stiffened orthotropic shells of revolution.

17 p2632 A72-35242

Heat-conduction equations for multilayer shells

19 p2881 A72-38158

Torsional vibration of an orthotropic cylindrical shell.

22 p3240 A72-42881

Finite element method optimization of orthotropic layered shells of revolution under mechanical and thermal loadings, considering stress-strain relationships

23 p3344 A72-43479

ORTHOTROPISM

Viscoelastic parameters calculation for orthotropic composite materials reinforced by unidirectional fibers, giving time dependence of relaxation functions

01 p0142 A72-11177

Distortional energy theory for predicting failure of orthotropic materials exposed to three dimensional stress state

05 p0732 A72-15942

Plane harmonic waves propagation in stressed polycrystalline bodies with slight orthotropy in unstressed state, substantiating theory for initial stress determination by ultrasonic technique

07 p1090 A72-19753

Extremal mechanical properties directions in orthotropic glass fiber reinforced plastics symmetry planes

08 p1196 A72-21866

Plane stress solution for thin walled cantilever beam with end load extended for beam width effects in composite orthotropic beam bending

16 p2463 A72-32841

Rheological characteristics of orthotropically reinforced polymer materials

19 p2822 A72-37531

On the solution of plane, orthotropic elasticity problems by an integral method.

23 p3350 A72-44056

Acceleration waves in orthotropic elastic materials.

23 p3354 A72-44342

Orthotropic photoelasticity methods application to concentrated force on half plane edge and to stress distribution on elliptical hole boundary in tensile strip

24 p3455 A72-44790

Linear fracture mechanics in orthotropic materials.

24 p3457 A72-44818

OSCILLATING CYLINDERS

Unsteady supersonic aerodynamic forces on oscillating circular cylindrical shell calculated using linearized equation of potential flow

02 p0151 A72-12256

Equations of motion for oscillating heavy symmetrical gyroscope with cylindrical cavity partially filled with inviscid incompressible liquid

05 p0664 A72-17145

Flow stability of viscous fluid in annular space between rotating inner and axially oscillating coaxial outer cylinder, using perturbation method

07 p0971 A72-20089

Damping measurements of hydrodynamic vibrations of cylinder excited by random pressure field of liquid flow

10 p1465 A72-24073

Non-Newtonian Reiner-Rivlin fluid flow between two coaxial porous cylinders with longitudinal pulses applied to inner cylinder at finite time intervals

10 p1468 A72-24402

Coupled electroelastic vibrations of piezoceramic cylinders from polycrystalline electrostriction theory, taking into account mechanical and dielectric losses

14 p2132 A72-31117

Partial differential equations of motion for nonlinear mechanical systems solved by Lanczos formula, discussing prismatic cylinder oscillations under uniformly distributed transverse load

15 p2275 A72-31729

Linearized supersonic flow past harmonically vibrating cylindrical body, solving boundary value problem by cylindrical integral transformation

16 p2342 A72-32878

Heat generation in oscillating torsional spring modeled by viscoelastic hollow cylinder subjected to sinusoidal shear stresses, calculating stress and temperature distribution and displacement

17 p2635 A72-34232

Composite sphere and cylinder vibrations, considering radial and rotatory/torsional vibrations

18 p2735 A72-36756

Three-dimensional vibrations of orthotropic cylinders.

19 p2873 A72-37693

Comet tail wave motion explanation via consideration as plasma cylinder with free boundary tangential discontinuity surface immersed in interplanetary plasma

22 p3221 A72-42011

OSCILLATING FLOW

Ion oscillation theory for electrodynamic channel Poiseuille and Hagen-Poiseuille type flows, using transport and dispersion equations in various ionized media

01 p0111 A72-11214

Gas flow fluctuations near stagnation point on hot wall, taking into account laminar boundary layer compressibility effects

04 p0462 A72-15178

Oscillating torus shaped crucible viscometer, discussing oscillating viscous liquid fluid dynamic problem

04 p0522 A72-15480

Free oscillations of liquid masses contained in tanks, analyzing variational and Ritz methods

04 p0513 A72-15557

Nonlinear oscillations of liquid in movable conical containers, presenting approximate procedures for solving weight boundary value problem of eigenvalues

07 p0972 A72-20211

Fluid oscillator temperature sensor, noting fast dynamic response and application in high temperature environments

08 p1164 A72-20926

Viscous incompressible flow past circular cylinder at Reynolds numbers 100-1000, obtaining oscillatory drag, lift and torque by governing equations numerical solution

08 p1107 A72-21251

Gas flow effect on undulating flow of viscous fluid film down vertical wall, using Fourier series

10 p1469 A72-24532

Oscillation periods of rotating perfectly conducting liquid column in presence of axial magnetic field and uniform current

12 p1851 A72-27534

Coordinate perturbation and multiple scale techniques application to supersonic flow field around two dimensional wing and oscillations in closed tube

16 p2379 A72-33576

Oscillating flapped vane system for large amplitude uniform sinusoidal lateral gust generation in semiopen jet wind tunnel

16 p2374 A72-33699

Evaluation of Reissner's correction for finite span aerodynamic effects.

18 p2736 A72-36774

Fluid oscillations in a partially filled cylindrical tank with a spring supported elastic floor.

18 p2684 A72-37062

Oscillatory flow of a viscous fluid in a flexible walled two dimensional channel.

18 p2684 A72-37064

Visualization study of flow near the trailing edge of an oscillating airfoil.

20 p2886 A72-40067

A similarity solution for viscous internal waves.

21 p3044 A72-40118

Investigation of the self-oscillations of a continuous medium arising at a stability loss in operation steadiness

22 p3164 A72-41907

Time-periodic solutions of boundary layer equation systems

22 p3164 A72-41908

Fluid velocity measurement of oscillatory flow generated from vortex shedding by laser Doppler system, discussing frequency tracker design, continuous detection problem and application

22 p3178 A72-42677

Transverse oscillations of a jet in a jet-splitter system.

[ASME PAPER 72-FLCS-1] 23 p3281 A72-44065

Tidal waves of a two-layer liquid in a cylindrical basin of revolution rotating about its axis

24 p3392 A72-45073

Effects of upstream unsteadiness on hypersonic flow past a wedge.

24 p3364 A72-45565

OSCILLATION DAMPERS

Energy-phase time transformations of damped Liapunov system applied to nonlinear spring pendulum and betatron transient oscillations

01 p0103 A72-11387

Meteorological satellite stabilization and attitude control in synchronous equatorial orbit for two years life, emphasizing nutation damper optimal dynamic characteristics

05 p0725 A72-16437

Magnetic damper for gravity gradient stabilized satellite rotational and librational motions, deriving formula for calculating damping coefficients

05 p0726 A72-16463

Combined rotational motions of free solid and coupled elastic bodies oscillations around center of mass with nutation passive dampers

06 p0850 A72-18707

Gunn domain oscillations suppression by dielectric surface loading of transversely thin GaAs diodes

10 p1526 A72-24305

Linear oscillatory system, investigating effects of pulsed dynamic damper with mass vibrations bounded by limiters

12 p1887 A72-28235

Small amplitude libration stability and damping system for gravitationally stabilized tethered orbiting radio interferometer satellite system

16 p2462 A72-34020

Optimum design parameters for a spin-stabilized spacecraft nutation damper.

17 p2619 A72-34208

Synthesis of a resin-metal damper whose characteristic shows minimum deviation from a constant-frequency response

19 p2806 A72-37429

Attitude stability and performance of a dual-spin satellite with nutation damping.

19 p2862 A72-38022

Pupil size spontaneous oscillation /Hippus/, discussing development by repeated light step and accommodation and disappearance due to mental activity

02 p0164 A72-12490

Oscillation periods of single degree of freedom variable mass point, using stiffening hypothesis

03 p0390 A72-14220

Nonlinear oscillations stochastic instability in dynamic systems, discussing nonequilibrium statistical mechanics

03 p0390 A72-14316

Toroidal oscillations of spherical planetary models, presenting regular eigenfunction form near center

03 p0352 A72-14381

Plane periodic oscillations of solid body on elliptic orbit, characterizing stability of motion equations periodic solutions

04 p0582 A72-14632

Polytropic masses oscillations under rapid uniform rotation, using variational principle

04 p0579 A72-15320

Nonlinear oscillations in mechanics - Conference, Kiev, U.S.S.R., August 1969

06 p0849 A72-18692

Elastic systems nonlinear oscillations with moving inertial loads, noting standing waves superposition

06 p0901 A72-18706

Oscillations and acoustic emission by interacting elastic shells in connecting medium, using quadratures with Green function

07 p1034 A72-18922

Hologram interference fringe relationship to nonlinearity of simple oscillations

07 p0987 A72-19836

Lf convective oscillations in polytropic atmospheres within strong magnetic field, considering stability of quasi-adiabatic and quasi-isothermal motions 07 p1082 A72-20376

Asymptotic approximation method for damping force as function of velocity from successive oscillations amplitudes measurement 07 p1096 A72-20474

Krylov-Bogoliubov asymptotic method for oscillation analysis in time lag systems under pulse inputs 08 p1206 A72-20970

Autonomous linear second order equations system reduction to Poincare normal form in oscillations theory 08 p1206 A72-21169

Stability solutions of collective oscillations of spherical star cluster rotating in near circular orbits in self consistent field 08 p1239 A72-22180

Avalanche diode background noise in linear and nonlinear regimes, emphasizing source dependence on oscillation level 09 p1287 A72-23117

Prolate and oblate spheroids flow field generated by axial translatory oscillations in still incompressible viscous fluid from Stokes linearized equations, deriving formulas for drag 10 p1418 A72-24462

Oscillation criteria for fourth order differential equation conjugate point location relationship in terms of existence of solution with two double zeros 11 p1678 A72-26159

Static deflection effect on nonlinear spring mass system step function response, considering approximate calculation of oscillation period 11 p1688 A72-26372

Inhomogeneous strings oscillations determination in nonstationary inverse boundary value problems with integral equations 11 p1689 A72-26381

Oscillating membrane pressure gage for direct electrical measurements of fast and large pressure variations, noting insensitivity to interference 11 p1636 A72-26700

Varied states superimposed on finite elements in discrete elasticity, noting small oscillations superposition on arbitrary motion of elastic system 12 p1845 A72-27393

Oscillations excitation, proposing models for percussive rotational action machines operation and dog tooth clutches processes 13 p1954 A72-28386

Equations of motion and phase trajectory analysis for resonant oscillations of beam-pendulum system 13 p2003 A72-28721

Stability criteria for limiting oscillatory motion of coasting sounding rocket exiting atmosphere 13 p2051 A72-28886

Nonlinear oscillations amplitude, frequency and instability regions of moving belt as function of longitudinal velocity 13 p1964 A72-29150

Oscillations and acoustic emission by interacting elastic shells in connecting medium, using quadratures with Green function 13 p2004 A72-29208

Impulsive pulsations /Pi 2/ identification as geomagnetic field distension coincident with oscillatory component from high resolution Rb vapor magnetometer recordings 13 p1951 A72-29656

Gradient catastrophe /solution derivative discontinuity/ occurrence time for quasi-linear hyperbolic differential equations describing elastic string oscillations 14 p2130 A72-30194

Nonlinear oscillations theory application to electronics and electrical engineering - Conference, Kiev, August-September 1969 14 p2089 A72-31101

Oscillations in ferromagnetic resonant circuit of parametric amplifier with constant capacitance and periodically variable inductance modulated by input signal 14 p2089 A72-31107

Quasi-conservative optimal nonlinear self excited oscillation systems theory for automatic control, telematics and computer applications 14 p2133 A72-31130

Coupled oscillations of inviscid homogeneous liquid with free surface under vacuum or gas filled space in elastic cylindrical container 15 p2217 A72-31472

Second order delay differential equations, investigating oscillatory behavior of stable and unstable equations solutions and nonoscillatory solution existence 15 p2264 A72-31765

Nonlinear system consisting of gas filled tube with pressure sensitive heat source, noting oscillation evolution due to equilibrium perturbation [ASME PAPER 72-APM-21] 17 p2580 A72-34796

Spacecraft oscillatory motion as function of attitude control impulse and slave mechanism efficiency 17 p2622 A72-35205

Exact solution for dynamic oscillations of re-entry bodies. 17 p2622 A72-35231

Stability solutions of collective oscillations of spherical star cluster rotating in near circular orbits in self consistent field 18 p2724 A72-36236

Nonlinear oscillations stochastic instability in dynamic systems, discussing nonequilibrium statistical mechanics 19 p2836 A72-38814

Steady solutions of generalized Korteweg-de Vries equation for oscillatory solitary waves in dispersive media 21 p3089 A72-40197

Scattering cross section glory undulations relationship to potential energy of interaction of two molecules with minimum containing one or more bound states 21 p3087 A72-40561

Periodic wave of oscillating and stationary two dimensional bodies immersed in uniform incompressible stream, investigating semiinfinite vortex trails relationship to oscillating airfoils 21 p2989 A72-40651

Velocity oscillations in the solar atmosphere. 21 p3107 A72-41278

Comparison of three oscillatory techniques for comets at incidence. 21 p3042 A72-41595

A new method for the evaluation of slotted wind tunnel interference parameters applicable to subsonic oscillatory tests. 21 p3043 A72-41642

The parameters of a two-mass oscillatory system in which one of the masses is acted upon by a complex working resistance 23 p3312 A72-43352

Motion of a solid with a nonholonomic constraint around a fixed point in a conservative force field 23 p3313 A72-43800

Problems of interference between oscillating surfaces in subsonic flow 23 p3248 A72-43809

Buildup of oscillations in crossed-field backward-wave oscillators. 24 p3385 A72-44973

On zeros of solutions of the second-order linear differential equation with retardation. 24 p3419 A72-45577

RF intrinsic and up or down-converted modulation noise mutual relationship with application to IMPATT diode oscillators 01 p0035 A72-10114

High Q oscillator with simulated inductor circuit consisting of negative immittance converter and RC elements 01 p0035 A72-10127

High stability and power IMPATT oscillator design for line-of-sight communication links, avoiding spurious resonances and mode jumping 01 p0037 A72-10645

Physical interpretations of physiological control, covering history, biochemical oscillator viewpoint of life and conferences 02 p0160 A72-12039

Stability and perturbation of oscillator system with frequency fixed by all pass ring transmission function with delayed amplitude regulation 03 p0331 A72-13410

Tunnel diode quartz oscillator frequency stability improvement and dc power requirement reduction using nonlinear feed circuits 03 p0331 A72-13555

Nonlinear differential second order equation system development for gyroscopic coupling of forced nonlinear oscillators 03 p0389 A72-13631

Book on transistors in pulse circuits covering switching diodes and circuits, multivibrators, blocking oscillators, etc 05 p0640 A72-16288

Electron tube present and future applications as oscillators, high power and hf amplifiers and optoelectronic converters 06 p0784 A72-17775

Millimeter wave GaAs avalanche diode oscillator processing on plated Cu heat sinking block resulting in epitaxially grown p-n junctions 06 p0788 A72-18467

Magnetic-transistor master oscillator with digital analog converter as programmer for needed output voltage frequency shifts 07 p0946 A72-19959

LF originated background noise in Gunn oscillators, developing evolution equation for oscillator weakly perturbed by noise 09 p1288 A72-23121

High power Nd-glass laser systems, discussing oscillator and amplifier operating parameters optimization 10 p1489 A72-23945

Spectral density of frequency deviating process for performance predictions from oscillator testing and frequency noise calibration, discussing sample averages convergence to statistical values 11 p1593 A72-25892

Absorption spectrum of molecular nitrogen in 730-980 A band, investigating absorption cross sections and optical oscillator strengths 12 p1848 A72-27853

FM distortion in injection phase locked oscillator amplifiers from generalized Alder equation 12 p1793 A72-27965

Self excited oscillator using emitter follower circuit and distributed active RC phase shifter network 13 p1927 A72-28404

Transit time, retarded domain and suppressed domain mode simulation of Gunn oscillator, using LF analog 13 p1927 A72-28405

Single frequency generation stability of one dimensional model of traveling wave laser using inhomogeneously broadened active material 13 p1967 A72-28470

Averaging technique for nonlinear viscoelastic dynamic problems, considering forced oscillations of oscillator with weakly nonlinear hereditary elastic characteristics 13 p2054 A72-28551

Method to obtain optimal efficiency gyroamplifier circuits with short waveguide selector by prior grouping of electronic oscillators 13 p1928 A72-28799

Spurious oscillations in external excitation oscillators due to internal feedback in transistor, investigating frequency dependence of stability coefficient in cascade with common emitter 13 p1929 A72-28896

Transistorized oscillators for variable-frequency generators designed to feed synchronous motor drives of equatorial telescopes 14 p2073 A72-30683

Stability conditions for damped single degree of freedom oscillator system under stationary narrow-band random excitation, obtaining approximate solution by perturbation method 14 p2131 A72-30718

Nonlinear coupled cyclotron oscillators excitation by external sine wave force, analyzing amplitude/phase variation and negative absorption 14 p2132 A72-31115

Nonlinear approximation of slowly changing standing waves in self excited parametric oscillators with distributed and bulk structures 14 p2090 A72-31131

Minimum values estimation of amplitude fluctuations dispersion and spectral line width for conventional and quartz crystal controlled oscillators 15 p2210 A72-32735

Theoretical model for computer calculation of transients in oscillator consisting of nonlinear amplifier with feedback through sequence of matched LC circuits 16 p2371 A72-33280

Nonlinear and phase delay distortion of FM modulation in tuned and detuned injection phase-locked oscillator-amplifiers 16 p2369 A72-33760

Improved geometry for a semiconductor surface-wave oscillator. 18 p2667 A72-36685

A thermal oscillator using the thermo-electric /Seebeck/ effect in silicon. 18 p2667 A72-36978

Switching curves and lobesweeping in origin seeking time optimal control for Duffing oscillator, using Pontryagin maximum principle 19 p2777 A72-37373

Approximate calculation of the maximum efficiency of an O-type oscillator with a resonance delay system in the presence of losses 19 p2774 A72-38412

Oscillatory circuits synthesis by wave resistance determination of homogeneous line segments for given resonant frequencies spectrum 19 p2768 A72-38660

Self excited LC and RC oscillator networks based on FETs, discussing frequency tuning and FM methods 20 p2906 A72-38899

Oscillator strength for sulfur monoxide transition band systems calculated from radiative lifetime with Franck-Condon factors

20 p2966 A72-38916

The detection of gravitational waves by electromagnetic oscillators.

20 p2974 A72-40024

Possibility of employing a transistorized self-excited oscillator with a thermistor as radio sensor of temperature

21 p3058 A72-41792

Influence of instantaneous and prolonged pulses on the oscillations of timing-device oscillators

21 p3059 A72-41815

Radiation of an oscillator moving parallel with the interface of two media

21 p3036 A72-41843

Radiation of an oscillating charge in a three-dimensional periodically inhomogeneous medium

21 p3023 A72-41844

Investigation of electrical processes in high frequency condensed-spark generators

22 p3139 A72-42169

German monograph - Stability conditions for a linear homogeneous ordinary differential equation of second order with stochastic parameter excitation.

22 p3199 A72-43055

Computation of the maximum oscillation frequency of bipolar transistors

23 p3269 A72-43448

Application of logarithmic characteristics to calculate wideband load matching of an oscillator

23 p3271 A72-43836

Multiloop LC oscillators with negative resistance and nonlinear capacitances

23 p3271 A72-43838

Excitation of oscillations in transistor oscillators

23 p3271 A72-43840

Master oscillator/power amplifier laser systems output beam divergence and far field brightness, comparing to Gaussian plane waves

23 p3296 A72-43901

OSCILLOGRAMS

U OSCILLOGRAPHIS

OSCILLOGRAPHIS

Cu electrical resistance and heat content oscillographic measurement, using high voltage pulse method

07 p0981 A72-18804

Multichannel oscillograph for real time biomedical studies of LF physiological processes

09 p1270 A72-22881

Two coordinate oscillograph recording device with automatic reversing for stress-strain tests under static and cyclic loads

11 p1637 A72-26814

Cast Al alloys tendency to brittle failure in percussive bending tests estimated from force strain oscillograms

14 p2124 A72-31035

Techniques and procedure for differential ballistooscillography of extremities.

20 p2897 A72-39325

OSCILLOSCOPES

Storage oscilloscope interface for small computers, describing graphic display characteristics and line cursor and character generators

03 p0329 A72-14177

Three color optical pyrometer with microsecond resolution time based on three-wavelength double ratio method, displaying temperature/time relationship on cathode ray oscilloscope

04 p0522 A72-15476

Display device for engine rotational speed nonuniformity parameters indication on oscilloscope without supplementary computation

05 p0662 A72-16125

Cardiac cycle intervals measurement with multibeam cathode oscilloscope synchronized with multichannel polycardiographic automatic recording machine

09 p1272 A72-23192

High tension exciter output voltage measurement based on cathode ray oscilloscope and high voltage probe, stressing calibration procedure [SAE AIR 1092]

11 p1604 A72-26028

Noise suppression by time exposure oscilloscope photography to enhance repetitive electric signals obscured by noise of equal amplitude

13 p1959 A72-29754

Automatic digitizing and recording of analog information from oscilloscope photographs

13 p1959 A72-29755

Registers and digital circuits with FETs and integrated operational amplifiers to permit analog measurements storage for display on CRT oscilloscope

15 p2204 A72-32499

Optical design and production of low cost oscilloscope camera incorporating reliable setting for correct exposure and focus

20 p2921 A72-39031

The random-sampling procedure in oscilloscope technology

23 p3273 A72-44348

OSCULATORY INTERPOLATION

U ORBIT CALCULATION

U ORBIT PERTURBATION

OSEEN APPROXIMATION

Laminar viscous flow past semiinfinite flat plate at zero incidence, using Oseen approximation in matching leading edge and potential flow regions

11 p1615 A72-25522

Third order extension of perturbation method to solve Oseen equations for two dimensional steady viscous flow past cylindrical body at low Reynolds number

14 p2095 A72-30722

OSMIUM COMPOUNDS

Erichmanite /natural osmium disulfide/ chemical analysis and X ray data, noting osmium abundance

03 p0351 A72-14369

Passive Q factor modulation in carbon dioxide laser by resonance absorption saturation in osmium tetroxide vapors, noting vapor pressure effects

11 p1650 A72-26355

Passive Q factor modulation in carbon dioxide laser by resonance absorption saturation in osmium tetroxide vapors, noting vapor pressure effects

16 p2402 A72-33708

The distribution of the long wave photoreceptors in the compound eye of the honey bee as revealed by selective osmic staining.

17 p2500 A72-34877

Osarsite, a new osmium-ruthenium sulfarsenide from California.

22 p3172 A72-42450

OSMOSIS

Early diagnostics of cerebral arteriosclerosis in flying personnel, investigating hypertension, neurocirculatory dystonia and myocarditic cardiocirculatory effects on flight performance

06 p0765 A72-18198

Improperly controlled learning processes relationship to hypertonic blood pressure irregularities pathogenesis in rats, investigating negative emotional reactions effects

07 p0925 A72-20659

Sex differences of chronic effect of environmental stress on blood pressure and information processing in rats, observing neurotic hypertonic blood pressure irregularity

07 p0925 A72-20660

Radial diffusion and convection capillary model for analysis of tissue protein concentration and colloidal osmotic pressure changes during transcapillary fluid movement

08 p1114 A72-20896

Influence of hyperosmolality on left ventricular stiffness.

17 p2499 A72-34727

Influence of thermal, osmotic, and chemical stimulations on food and water intake

17 p2504 A72-35016

Gas induced osmosis as factor in pulmonary homeostasis, showing differential water retention in lungs ventilated with normoxic nitrous oxide compared with air

17 p2506 A72-35970

Electro-osmotic energy conversion in the glass/n-propanol system.

21 p2997 A72-41384

OSMOTIC PRESSURE

U OSMOSIS

OSO

Solar observation survey, considering sounding rockets, OSO, balloons, orbiting observatories, spectral resolution, spectral features and solar flare

03 p0409 A72-13050

Real time ground control optimization of data acquisition of solar spectra scans from OSO 6

03 p0417 A72-13060

Space environment and astronomical studies with sounding rockets, satellites and orbiting solar observations

10 p1548 A72-24974

Description and in-orbit performance of the Orbiting Solar Observatory control system.

[AIAA PAPER 72-852]

20 p2975 A72-39077

Zodiacal light, airglow and lightning monitoring by wide field broad bandpass OSO-5 experiment, obtaining height profile, cell size and intensity variations of nightglow

21 p3054 A72-40619

Star scanner attitude determination for the OSO-7 spacecraft.

[AIAA PAPER 72-922]

21 p3082 A72-41566

OSO pointing accuracy improvement through dual spin stabilization, discussing OSO design evolution 1962-72

24 p3449 A72-45145

OSO and Skylab astronomical instruments technology, emphasizing precision pointing, spatial and spectral resolution and photometric efficiency problems

24 p3405 A72-45545

OSO-E

High energy solar and celestial X ray experiment with OSO 5, measuring spectrum as function of time, intensity and spatial distribution

03 p0353 A72-13044

OSO-G

OSO-G satellite spectroheliograms of chromospheric, transition zone and coronal lines, indicating magnetic field spread with height

03 p0432 A72-13351

Gamma ray spectrometer with antiCompton shield for OSO-7 spacecraft

08 p1167 A72-21515

OSO-H

OSO-H solar X ray instrument for solar flares energy release investigation via thermal and nonthermal electrons X ray emission

08 p1167 A72-21514

Optimal pulse height analyzer with quadratic transfer function for gamma ray spectrometer on OSO-H

08 p1167 A72-21516

Digitized SEC vidicon detector for OSO-H satellite coronagraph, describing optics

08 p1170 A72-21959

OSO-1

Celestial Thomson-scattering X ray polarimeter design for OSO-1, optimizing sensitivity in 4-24 keV energy range by Monte Carlo simulation computer program

15 p2234 A72-31540

OSO-3

Multiplicative factors for energy scale corrections of OSO-3 ion chamber for solar X-ray monitoring

13 p1033 A72-29748

OTOLARYNGOLOGY

Prophylactic otolaryngological investigation of vestibular analyzer function in aviation medicine

15 p2186 A72-31769

Otorhinolaryngological organ response during hypokinetic antiorthostatic bed rest for control, exercising and muscular electric-stimulated groups

23 p3256 A72-43917

OTOLITH ORGANS

Sjoberg hypothesis for zero gravity produced inversion illusion mechanism in aircraft parabolic flight, noting otolith membrane deflection result of force on maculae

02 p0167 A72-11710

Human centrifuge tests for gravito-inertial force effect on ocular counterrolling in normal and deaf subjects

02 p0159 A72-11956

Neck proprioception effects and otolith organ activity in perceived visual target elevation under centrifuging stress

12 p1776 A72-28305

The vestibular apparatus. I - The physics and physiology of the otoliths and the semicircular canals

22 p3146 A72-42787

OTTO CYCLE

Flow characteristics of pin type nozzles in constant pressure carburetors of Otto cycle engines

02 p0206 A72-12853

OUTCROPS

Tectonic dewatering and strain in the Michigamme Slate, Michigan.

18 p2686 A72-36223

OUTER PLANET MISSIONS

U GRAND TOURS

OUTER PLANET SPACECRAFT

U OUTER PLANETS EXPLORERS

OUTER PLANETS EXPLORERS

STAR self testing and repairing fault tolerant digital computer for outerplanet exploration spacecraft, discussing architecture, reliability analysis, software and peripheral system automatic maintenance

02 p0184 A72-11482

Outer planets Grand Tour trajectory correction requirements, examining combined radio/onboard navigation system and delta V estimates [AIAA PAPER 72-54]

07 p1068 A72-18947

Comet rendezvous and outer planet exploration mission operations by unmanned nuclear electric propulsion /NEP/ system with inciner thermionic reactors for electric power generation

[AIAA PAPER 72-428]

11 p1722 A72-26173

Outer Planet Grand Tours Missions radio science experiments for planetary and satellite atmospheres and surfaces, celestial mechanics, relativity, interplanetary medium and solar corona

12 p1870 A72-27347

Trajectory shaping advantages for outer planet orbiter solar electric propulsion, considering radiation belt constraints, dual launch and target orbit geometries

[AIAA PAPER 72-423]

13 p2036 A72-28938

Mission operations for unmanned nuclear electric propulsion outer planet exploration with a thermionic reactor spacecraft.

17 p2606 A72-34578

High accuracy approach guidance system for outer planet exploration.

[AIAA PAPER 72-867]

20 p2951 A72-39132

Earth-based navigation capabilities for outer planet missions.

[AIAA PAPER 72-925]

24 p3423 A72-45430

- Spacecraft navigation systems for Mariner Jupiter-Saturn 1977 Project, considering maneuvers, orbit determination and data requirements [AIAA PAPER 72-926] 24 p3423 A72-45432
- The possibility of a trans-Saturnian belt of particulate matter. 24 p3446 A72-45472

- Samaria distribution effect on Ni-Cr alloy oxidation rate for various oxygen pressures, discussing behavior of electroplated and bulk specimens 09 p1332 A72-23585
- High C 13 content in carbonaceous phases of carbonaceous chondrites accounted for by Rayleigh distillation with oxidized and reduced forms of carbon 10 p1547 A72-24951
- Space shuttle orbiter thermal protection system metal interaction with chemical environment during reentry, emphasizing degradation in dissociated oxygen [AIAA PAPER 72-262] 11 p1590 A72-25206
- Fe-Cr-Mn alloys structural changes during high temperature oxidation, noting subscale layer thickening and alpha phase detection after heat treatment 11 p1655 A72-25498
- Bending stress in oxygen presaturated Nb during oxidation, cooling, dissolution and annealing, using thin film model 11 p1658 A72-25853
- Tensile stress effect on formation of suboxide needles, microcracks and oxide wedges during low temperature Nb oxidation 11 p1658 A72-25854
- Temperature, oxygen pressure and exposure time effects on oxidation characteristics of molybdenum-zirconium oxide cermets 11 p1665 A72-26865
- Fusion silicide protective coatings performance for Ta alloys under simulated reentry conditions, noting oxidation rate, ductile brittle bead transition temperature and mechanical properties [ASM PAPER W 72-13,6] 12 p1835 A72-28162

Physicochemical processes in metal surface layers subjected to contact friction with aircraft fuels presence, noting secondary compounds and thermal oxidation acceleration

12 p1817 A72-28183

Reclaimed surface, ground and sewage water oxidizability measurement, studying oxidation kinetics of potassium bichromate distilled urine condensate admixtures

13 p1910 A72-29313

High purity aluminum-aluminum oxide reversible oxidation, discussing mechanism based on electron charging due to beam

13 p1980 A72-29827

TiC high temperature oxidation and thermodynamic equilibria in air, using metallographic and X ray analyses

14 p2112 A72-30155

Lower oxide mechanism in reduction-oxidation reactions during Ti steels electrosmelting with slag and gas phases

14 p2112 A72-30158

Zr oxidation kinetics at 440-850 C for 3 min maximum exposure time, observing type oxide change relationship to activation energy

14 p2113 A72-30247

Creep rate dependence on high temperature oxidation in austenitic steel, noting preformed oxide layer and environment cycling effects

14 p2117 A72-30537

Stress relieving heat treatment for service failure prevention of stressed austenitic stainless steel components of high temperatures, noting cracking regulation by oxidation mechanism

14 p2117 A72-30538

Co-Cr alloy high temperature oxidation kinetics reduction by Y addition, presenting metallographic study

14 p2118 A72-30543

Disilicide coated Ta-W alloy system oxidation behavior at 927-1482 C, using thermogravimetric, X ray diffraction and electron microprobe analyses

14 p2121 A72-30771

Octahedral TiC single crystals oxidation at high temperature in oxygen, carbon dioxide and mixtures, investigating oxygen partial pressure effects on kinetics

14 p2121 A72-30772

Zirconium diboride oxidation processes at temperatures above 520 C, noting zirconium oxide formation

14 p2121 A72-30850

Y and La action on oxidation rates of Cr and Mo at high temperature in air

15 p2252 A72-31191

Refractory steels heat resistance improvement by surface saturation with Be and subsequent oxidation in air at 900-1000 C, comparing with aluminized steels

15 p2255 A72-31574

Low energy electron spectroscopy measurement of thin oxide layer growth on Al surface, noting oxidation uniformity dependence on residual gas water content

15 p2276 A72-31859

Clean Ge crystal surface oxidation process investigation by LEED and conductivity measurements

15 p2292 A72-31868

Edge and surface modification of Nb alloys prior to coating with fused silicide for oxidation life extension

15 p2244 A72-32134

Reaction rate and activation energy of low temperature oxidation of Mg particles in nitrous oxide

16 p2476 A72-33253

Carbon monoxide oxidation reactions temperature dependence, correlating high to low temperature results via transition state theory

16 p2360 A72-33511

Ternary Ni-Cr-Al superalloys oxidation at 800-1300 C as function of composition, temperature, oxygen pressure and reaction time

16 p2410 A72-33811

Quinones as reversible redox couples for rechargeable cathodes, noting air regeneration capacity in organic electrolytes

16 p2352 A72-33898

The formation of metal-oxygen compounds for additive thermionic converters.

17 p2595 A72-34600

High temperature oxidation of ammonia.

17 p2511 A72-34904

Comments upon shock-initiated oxidations by nitrous oxide.

17 p2511 A72-34905

IR-spectroscopic investigation of the effectiveness of oxidation inhibitors in lubricants

19 p2823 A72-38092

Formation of hydrogen from amine oxidation and pyrolysis.

19 p2883 A72-38874

Development of a spacecraft wet oxidation waste processing system.

[ASME PAPER 72-ENAV-3] 20 p2896 A72-39174

The mechanism of oxidation of Ni-Cr-Al alloys.

20 p2937 A72-39214

The internal oxidation of Ni-Cr-Al alloys.

20 p2937 A72-39215

Internal oxidation in carburized layers of alloyed steels

20 p2929 A72-39584

Induction period, particle size distribution and medium temperature effects on thermal ignition of metal particles under exothermal oxidation reaction on surface

20 p2987 A72-40040

Detonation shock wave study of liquid fuel droplets in gaseous oxidizing agent flow, using schlieren and scanning photography

20 p2962 A72-40044

Reversible changes in polyethylene coating adhesion due to thermo-oxidative destruction of polyethylene

21 p3072 A72-40082

Vapor phase formation during high temperature oxidation.

21 p3066 A72-40551

Cortical effects mechanisms in animal vegetative systems, noting biological oxidation and organic phosphorus compound studies

21 p3000 A72-40759

Strengthening of tungsten by powder metallurgical internal oxidation.

21 p3067 A72-40833

Effects of scale porosity, second-phase oxides, and doping in the high-temperature oxidation of cobalt and dilute cobalt-chromium alloys.

21 p3067 A72-40845

Effect of cold work on the oxidation of nickel at high temperature.

21 p3067 A72-40846

Auger spectroscopic observation of Si-Au mixed-phase formation at low temperatures.

22 p3178 A72-42616

Respiratory chain components correlation to tension production at various oxygen pressures in guinea pig ductus arteriosus, investigating light absorption changes

22 p3144 A72-42670

Oxidation rate anisotropy investigation on coupon specimen of Ta-Mo alloy at 950 C

22 p3190 A72-42770

German monograph - Gas-phase precipitation and high-temperature oxidation of titanium carbide.

22 p3194 A72-43053

Production and properties of materials of the Si3N4-Cr2O3 system

23 p3298 A72-43283

Influence of the oxidation of finely dispersed graphite powders on their compactibility

23 p3307 A72-44018

Alpha aluminum whiskers growth in multilayer ceramic composition following vapor-liquid-solid phase

23 p3303 A72-44152

Oxidation of W(110)/ I - LEED study of the oxide formation at 1000 K.

24 p3378 A72-44952

Field repair of fused slurry silicide coating for oxidation protection of Nb alloys in space shuttle environment

01 p0075 A72-10759

Oxidation screening at 2200 F of Ni, Fe and Co wrought alloys for space shuttle thermal protection system, noting microstructural changes

01 p0085 A72-10781

Space shuttle thermal protection system, discussing oxidation resistant coatings, refractory metals, heat shield technology, ballistic reentry programs, weight and cost

01 p0135 A72-10935

Ni-Cr-Al-Si and Fe-Cr-Al-Y oxidation resistant claddings for superalloys, comparing to commercial aluminide coatings by cyclic furnace and high velocity burner rig tests

04 p0533 A72-14700

Metal polymer interface synthesis based on linearly cyclic organoelementary high molecule compounds, analyzing heat and thermal oxidation resistances

05 p0680 A72-16202

Nb alloy oxidation behavior dependence on temperature in 550-1316 C range

05 p0676 A72-16732

Gas turbine superalloys high temperature oxidation resistance by fiber strengthening, rare earth alloying, precipitation hardening and intermetallic compounds

06 p0828 A72-17611

Oxidation and hot corrosion tests of coated Ta and Ta based alloys between 800 and 1500 C in still air and in oxidizing gas stream

06 p0828 A72-17614

Oxidation resistant solid lubricants for high temperature air and gaseous environments applications, considering oxide and fluoride coatings with silicate additives for wear life improvement

06 p0837 A72-18600

Metals and alloys for aerospace applications, emphasizing creep and fatigue properties and oxidation resistance at high temperatures

08 p1185 A72-21171

Thermodynamics of ceramic oxide corrosion by sulphur and oxygen bearing atmospheres, considering

formation products and furnace refractory materials choice

09 p1333 A72-22377

Hot pressed baron nitride and composite oxidation tests in atmospheric arc jet, noting fabrication and composition effects on thermal shock and oxidation resistance

09 p1333 A72-22379

High temperature tests of graphite composites in air, determining material loss time dependence and correlation with observed strength data after oxidation

09 p1333 A72-22381

Vehicle components oxidation in thermal control coatings, investigating resistance to oxidation by UV photoproduct ZnO electronic holes

[AIAA PAPER 72-264] 11 p1699 A72-25207

Al addition effect on thermal and mechanical stability, forgeability, cold workability, aging and oxidation resistance of Ti-Mo beta alloys

11 p1656 A72-25516

Hot pressed silicon nitride with high strength and good oxidation and thermal shock resistance for gas turbine applications

[ASME PAPER 72-GT-19] 11 p1673 A72-25618

Transition metals silicides additions effect on sintering and oxidation resistance at high temperatures of Ti and Zr diborides

11 p1665 A72-26874

Molybdenum disulfide addition effect on compounded model greases lubricating performance, determining oxidation stability, rust preventive behavior and consistency

12 p1832 A72-27047

Aromatic polyimide binder for compression moldable high performance composites preparation with thermal curing to obtain good thermal-oxidative stability and toughness

12 p1834 A72-28090

Al inhibitive of Ti oxidation at 800-1000 C due to interatomic bonds, lower oxygen solubility and diffusion rates

14 p2113 A72-30166

Thin oxidation resistant alloy claddings for superalloys, comparing performance with aluminide coatings by cyclic furnace and high velocity burner rig tests

14 p2113 A72-30271

Ni additions effect on Fe-Cr alloys oxidation behavior at high temperatures during varied exposure time periods, noting dichromium trioxide scale formation

14 p2118 A72-30545

W and Nb effect on Ta base alloys high temperature oxidation behavior

14 p2118 A72-30547

High temperature oxidation resistance and mechanical properties of Fe-Al-Cr alloys with Ti and Mo additions

15 p2253 A72-31520

Apiezone lubricants physicochemical properties comparison, noting aromatic hydrocarbons effect on thermo-oxidation stability and polyisoprene rubber type polymer additive effect on adhesiveness

16 p2413 A72-33171

Thermosetting polybutadienes as co-curing plasticizers for thermoplastics reinforcement, noting oxidation resistance at room and moderately elevated temperatures

16 p2415 A72-33416

Oxidizability of boron-carbon compounds at high temperatures, determining chemical composition effect on oxidation resistance

18 p2703 A72-36095

Oxidation resistance at high temperatures of refractory materials based on silicon nitride and carbide in various concentrations, showing time and temperature dependence

18 p2703 A72-36096

German monograph - The effect of alloying elements on the dry high temperature oxidation of cobalt in the temperature range from 800 C to 1000 C in air and pure oxygen

19 p2816 A72-37656

Creep of porous nickel in oxidizing and neutral media

19 p2819 A72-38287

Inconel alloy 617 - A new high-temperature alloy.

19 p2821 A72-38388

Multi-cycle plasma arc evaluation of oxidation inhibited carbon-carbon material for shuttle leading edges.

[ASME PAPER 72-ENAV-26] 20 p2894 A72-39151

On some aspects of low-temperature and anodic oxidation of metals and semiconductors.

21 p3067 A72-40914

Oxidation of TD nickel at 1050 and 1200 C as compared to three grades of nickel of different purity.

21 p3067 A72-40915

Oxidation protection of tantalum and tantalum alloys at up to 1500 C

22 p3188 A72-41973

Aluminized thorium dispersed NiCr and Ni-20Cr alloys with protective alumina scales from pack diffusion, observing oxidation resistance by isothermal and cyclic oxidation tests

22 p3193 A72-43030

Effect of oxygen on the scale resistance of titanium-tin alloys 23 p3300 A72-43592

Corrosion and electrochemical properties of Kh15N5D2T and Kh15N4AM3 oxidized steels 23 p3303 A72-44099

Oxygen effect on dynamic elastic modulus of titanium-oxygen alloys by density and longitudinal ultrasonic wave velocity measurements 01 p0083 A72-10393

Pulmonary functional inhomogeneities effects on steady state oxygen and CO diffusing capacity estimates in gas transfer resistances terms 01 p0014 A72-10847

Upper atmosphere neutral oxygen density diurnal variations from incoherent scatter and satellite drag data, noting deviations from Jacchia static diffusion model predictions 01 p0062 A72-10911

Oxygen content and stoichiometry effects on metal carbides grain growth in liquid phase sintering, discussing carbide-metal interface solution reaction as rate controlling mechanism 02 p0240 A72-11434

Stratospheric and lower mesospheric temperature measurement by ground based passive microwave sensing, calculating oxygen absorption band lines brightness temperature emission spectra 02 p0213 A72-11861

Supersonic oxygen molecules nozzle beam reactive scattering on barium atoms, detailing exothermic reaction energy in barium oxide formation 02 p0170 A72-11912

Atomic oxygen layer height and peak concentration in earth upper atmosphere, considering solar dissociative radiation and turbulent diffusion for equinox conditions 02 p0217 A72-11924

Partial molar enthalpy measurement of oxygen mixture in substoichiometric Zr at 1300 C, using Tian-Calvet microcalorimeter 02 p0170 A72-12167

Continuum UV radiation absorption by vibrationally excited molecular oxygen in Schumann-Runge system 02 p0221 A72-12457

Oxygen determination in cemented carbides, metal powders and presintered and finished sintered products by vacuum fusion method, comparing with neutron activation method 02 p0245 A72-12548

Stress induced oxygen diffusion in alpha Zr, attributing temperature dependent internal friction peak to oxygen-titanium interactions 02 p0247 A72-12818

Niobium-oxygen-nitrogen system solid solution, noting gas composition effects on hardness and electrical resistivity 03 p0369 A72-12958

Altitude, photon wavelength and solar activity effects on photoionization yield of ionospheric monatomic and diatomic oxygen and nitrogen via Monte Carlo simulation 03 p0345 A72-12983

Oxygen, hydrogen and nitrogen constituents in mesosphere, investigating ionization process in D region at midlatitudes 03 p0346 A72-13379

Molecular oxygen photodissociation in Schumann-Runge bands, discussing determination of solar radiation penetration depth into chemosphere 03 p0412 A72-13386

Resonance electron spectroscopy experiments on electron collisions involving vibrational excitation, deactivation and attachment in molecular oxygen 03 p0347 A72-13391

Quantum yield observations for photochemistry of ozone and singlet molecular oxygen in atmosphere 03 p0347 A72-13393

Oxygen determination in Nb with reduction fusion, determining metallic bath temperature, nature and composition effects on extraction efficiency 03 p0374 A72-13674

Quenching rate of vibrationally excited hydroxyl with molecular oxygen in fast flows for airglow studies in upper atmosphere 03 p0321 A72-13899

Oxygen and oxygen-nitrogen mixtures dc and hf discharges, evaluating traveling low field domains in positive column 03 p0400 A72-14350

Oxygen hazards, mishaps and safety programs in NASA operations, considering material, design, cleaning and procedural deficiencies and failures 04 p0564 A72-14436

Molecular oxygen photoelectron spectra at autoionizing resonance frequencies, comparing with Franck-Condon calculations 04 p0552 A72-14892

Intensity-height profiles for molecular oxygen first and second negative bands in F region, using equilibrium velocity distribution of photoelectrons 04 p0518 A72-14963

Crack corrosion in metals and metal alloys, considering electrochemical reaction kinetics as function of oxygen concentration and pH 04 p0536 A72-15738

Dissolved oxygen effect on structure and toughness of nonalloyed extramild steels, observing austenite recrystallization kinetics retardation after hot plastic deformation 05 p0672 A72-16143

Vibrationally excited oxygen molecules formation and decomposition in upper atmosphere, calculating day and night equilibrium concentrations 05 p0657 A72-16252

Oxygen ions vertical flux altitude distribution in F layer from incoherent scatter radar measurements, noting existence in protonosphere during daytime [AD-737929] 05 p0629 A72-16616

Nb-O and Nb-N alloys, investigating oxygen and nitrogen solute-hardening effects on room temperature flow stress 05 p0675 A72-16729

Oxygen and/or nitrogen interstitial solute pick-up effects on yield stress during Nb annealing, discussing Hall-Petch plot parameter values 05 p0676 A72-16730

Molecular oxygen dissociation rate constant determination during interaction with He atoms in cylindrical shock tube 06 p0852 A72-17686

Linear four step model for photosynthetic molecular oxygen evolution, discussing oxidation states, flash yield oscillation damping and deactivation 06 p0770 A72-18424

Polybenzimidazole fabric treatment for flammability reduction in oxygen atmospheres 07 p1023 A72-19055

Oxygen effect on structure and mechanical, technological and corrosive properties of stainless steel melted in open and vacuum furnaces 07 p1013 A72-19739

Kinetic data analysis of internal oxidation in dilute Ni-Be alloys, deriving activation energy and diffusivity of oxygen in Ni 07 p1021 A72-20435

Self diffusion coefficients of carbon and oxygen in dolomite 07 p0937 A72-20520

Absorbed oxygen concentration variation with depth in Nb during oxidation 07 p1022 A72-20555

Electron microscopic investigation of niobium-oxygen alloys with Zr and Hf additions, measuring oxygen solubility 08 p1187 A72-21787

Temperature dependence of scattering cross sections for cold and hot neutrons colliding with oxygen and deuterium molecules 08 p1211 A72-21872

Diatomic oxygen and carbon dioxide density profiles effects on photoionization rates in D region [AD-741091] 09 p1274 A72-22356

Embryogenesis of fertile chicken eggs in pure oxygen at reduced pressure 09 p1265 A72-22642

Methane, hydrogen and oxygen adsorption and displacement on crystal surface of W investigated by thermal desorption and work function changes 09 p1276 A72-22807

Microorganisms effects on oxygen and compounds cycles, leading to changes in oxygen distribution in earth crust, hydrosphere, atmosphere and biomass 09 p1267 A72-23592

Oxygen jet-carbon dioxide laser beam cutting in mild and stainless steels, noting speed and material thickness limitations 09 p1321 A72-23639

Steady state model for Venus atmosphere water vapor loss, noting hydrogen and oxygen escape due to dynamic outflow of constituents from upper region 09 p1393 A72-23657

Al and oxygen effects on commercially pure Ti microhardness and microstructure, noting interstitial and substitutional atom inclusions effects on hexagonal cell dimensions 10 p1494 A72-23831

Chemisorbed oxygen effect on electrical properties of monocrystalline cadmium sulfide thin plates with high resistivity 10 p1525 A72-24211

Oxygen adsorption effects on Mo orientation contrasts and emission image under electron microscope 10 p1513 A72-24875

Oxygen chemisorption surface states effects on electrical conductivity of CdS single crystals and evaporated films 11 p1701 A72-25855

Carbon and oxygen distribution and content effects on Mo mechanical properties and embrittlement 11 p1666 A72-26878

Electron impact excitation spectrum of molecular oxygen, investigating angular behavior of differential scattering cross sections and energy dissipation 12 p1848 A72-27851

Gaseous buffering for oxygen fugacity control in high temperature gas systems at one atmosphere 12 p1778 A72-28104

Ear oximeter design for human subject blood oxygen saturation estimation during increased g-loads 12 p1774 A72-28278

Statistical adsorption kinetics model with electron desorption of oxygen on polycrystalline W, noting sticking coefficients 13 p1912 A72-28523

Atmospheric oxygen concentration latitudinal and diurnal variations from incoherent scatter and satellite drag data, noting compatibility with Jacchia model 13 p1951 A72-29389

Combustion products thermodynamic parameters for natural gas burning in oxygen atmosphere, plotting gas temperature and flow rates against pressure and excess oxidant ratio 13 p2065 A72-29451

Mechanical strength of interstitial solid tantalum-oxygen solutions obtained by electron beam fusion, thermal cycling and saturation as function of temperature and oxygen contents 14 p2112 A72-30163

Co-Cr alloy oxidation as function of temperature and oxygen partial pressure, discussing solid state diffusion 14 p2118 A72-30544

Ta-W-Hf alloy mechanical properties impairment from oxygen contamination, noting hafnium dioxide precipitate in reaction zone 14 p2121 A72-30769

Phase composition of Nb-O-Hf and Nb-O-Zr ternary alloys, noting O solubility decrease 14 p2122 A72-30980

Oxygen monolayer amounts adsorption on yttrium films and molybdenum foil investigated by Auger electron spectroscopy, observing growth of shifted peaks 15 p2292 A72-31860

Ionospheric molecular oxygen density measurements during solar grazing ray absorption experiment on Ariel 3 satellite 15 p2226 A72-31950

Decarburization kinetics of Nb wires with dissolved carbon in high temperature oxygen flow, monitoring electrical resistivity and CO partial pressure 15 p2244 A72-32113

Lateral diffusion measurement for mass identified positive ions in oxygen, noting spiralling, charge exchange and collisions effects on ion-molecule system 15 p2281 A72-32224

Molecular oxygen concentrations from solar Lyman alpha radiation absorption profile in mesosphere, using rocket-borne nitric oxide filled ion chamber 15 p2230 A72-32264

Oxygen molecule parameters from frequency data in microwave, submillimeter and IR spectroscopy 15 p2283 A72-32654

Potential energy curves for exothermic reaction between oxygen cations and nitrogen molecules to form nitric oxide and atomic nitrogen 16 p2360 A72-32921

Solar radiation induced molecular oxygen photodissociation rate as function of column density and temperature in mesosphere and lower thermosphere 16 p2383 A72-32967

Solar radiation absorption measurements in 2150 A region as function of altitude to obtain oxygen and ozone densities 16 p2384 A72-32975

Metal-air batteries with alternately polarizable oxygen electrodes, discussing current state of technology 16 p2350 A72-33670

Cubic sodium tungsten bronze electrocatalytic activity increase for oxygen reduction by traces of Pt 16 p2361 A72-33883

Organic catalysts for oxygen reduction, discussing phthalocyanines, Pfeiffer complexes and porphyrins 16 p2361 A72-33884

Electrodes converting hydrogen, methanol or oxygen for use in fuel cells with alkaline electrolyte, using Ag-Pd, Ni, Si and C catalysts 16 p2351 A72-33885

Oxygen molecule electron affinity role in ion chemistry of lower ionosphere, noting binding energy of ground state 17 p2585 A72-34260

Oxygen adsorption effect in Cs-W thermionic converter system, comparing statistical-mechanical model analytical results with Alleau-Bacal experimental data 17 p2496 A72-34597

Measurements of molecular oxygen in the thermosphere. 17 p2546 A72-34694

High temperature solid-solubility limit and phase studies in the system tantalum-oxygen. 17 p2567 A72-34731

Thermospheric molecular oxygen from solar extreme-ultraviolet occultation measurements. 17 p2614 A72-35602

W/100% work function change during adsorption of oxygen, cesium, and oxygen-cesium co-adsorption 18 p2656 A72-36128

Thermionic converter I-V performance improvement via oxygen addition, examining feasibility of cesium oxide-cesium solution as source 18 p2647 A72-36204

Effect of low-pressure oxygen on the creep properties of W-25 pct Re. 18 p2700 A72-36581

Hydrostatic oxygen burning in stars. II. 19 p2854 A72-37236

Ion mobilities and ion-molecule reaction rates in oxygen. 19 p2836 A72-37457

Oxygen diffusion coefficient variation with temperature observed during dissolution in alpha-zirconium, noting oxygen content effect on oxygen atom elementary jump length 19 p2817 A72-37795

Environmental acceleration of fatigue-crack growth in a high-strength steel. 20 p2935 A72-39140

Electronic and nuclear magnetic resonances of the oxygen and hydrogen labile negative molecular ions. 20 p2956 A72-39189

The effect of oxygen on tantalum-sodium compatibility. 20 p2938 A72-39297

Conditions and mechanism of formation of suboxide phases in the niobium-oxygen system 21 p3066 A72-40381

Detection of molecular oxygen in the Martian atmosphere. 21 p3103 A72-40451

Cross sections calculations for electron-oxygen scattering using the polarized orbital close coupling theory. 21 p3087 A72-40472

Excess metal buildup kinetics and work function of oxide thermionic cathode activated by emission current, noting effect of metal and oxygen concentrations 21 p2997 A72-40789

The nature of solid solutions of the titanium-vanadium-oxygen and titanium-vanadium-aluminum-oxygen systems 21 p3068 A72-40962

Optimum design of MHD generator combustion chamber, noting effects of heating temperature, oxygen enrichment degree and flow velocities 21 p2997 A72-41065

Detection of molecular oxygen on Mars. 22 p3224 A72-42293

Rocket radiometers measurement of oxygen IR atmospheric system altitude profile at night, noting auroral enhancement possibility 22 p3170 A72-42365

Equimolar oxyhydrogen detonation wave behavior near pressure limit, considering unsteadiness caused by tube length 22 p3244 A72-42485

Laser magnetic resonance of the O₂ molecule using the 337-micron HCN laser. 22 p3209 A72-42895

Drift velocities, diffusion coefficients, and temperatures of photoions in argon, nitrogen, and oxygen 22 p3209 A72-42926

German monograph - Ionization of nitrogen-oxygen gas mixtures by shock waves. 22 p3209 A72-43073

Flow direction and velocity effects on metal burning rates of low carbon and Ni-Cr steels in pure oxygen, using diffusion model 22 p3245 A72-43185

Adsorbed oxygen inhibition of reactions of hydrogen with tungsten. 23 p3298 A72-43270

Electronic excitation of N₂ and dissociative excitation of O₂ by proton impact. 23 p3317 A72-44520

On the use of a Fabry-Perot interferometer for the study of Raman spectra of gases under high resolution. 24 p3426 A72-44904

The kinetics of the reaction between oxygen and sulfur on a Ni(111) surface. 24 p3378 A72-44951

Influence of oxygen and hydrogen on the strength of titanium alloys 24 p3414 A72-45379

V and Al addition effects on mechanical properties of oxygen rich Ti alloys 24 p3416 A72-45745

OXYGEN AFTERGLOW

Low-temperature measurements of the three-body electron-attachment coefficient in O₂. 19 p2837 A72-37545

Formation and loss of O₂⁺/+ and O₄⁺/+ ions in krypton-oxygen afterglow plasmas. 23 p3316 A72-44345

OXYGEN ANALYZERS

Semiautomatic measurement of human oxygen uptake, discussing apparatus and accuracy 10 p1432 A72-24991

Aviator breathing oxygen contaminant detector using gas chromatography and portable IR analyzer 12 p1773 A72-28253

A simple combination mass spectrometer inlet and oxygen electrode chamber for sampling gases dissolved in liquids. 19 p2762 A72-38146

Determination of oxygen consumption by use of the paramagnetic oxygen analyzer. 21 p3006 A72-40429

A critical assessment of an open circuit technique for measuring oxygen consumption. 23 p3260 A72-43937

Acrylamide polymerization - New method for determining the oxygen content in blood. 24 p3376 A72-45376

OXYGEN ATOMS

Seasonal variation in lower thermosphere atomic oxygen concentration deduced from static diffusion models, using incoherent scatter and orbital decay temperature measurements 01 p0062 A72-10907

Nighttime ionosphere dynamical behavior, discussing motions effect on OI emission intensity 01 p0063 A72-10919

Atomic/molecular oxygen concentration ratio semi-annual variation at 130 km altitude from mass spectroscopic data analysis 02 p0218 A72-11947

Atomic oxygen coupled electron excitation and ionization by electron-atom and atom-atom collisions in nonequilibrium relaxation zone behind shock wave 02 p0207 A72-12896

Oxygen and hydrogen atoms production in atmosphere by photodissociation, investigating terrestrial hydrogen escape efficiency 03 p0346 A72-13381

Nitrogen dioxide producing chemiluminescent radiative and three-body recombination reaction at low pressures, determining airglow and oxygen atoms decay time by resonance fluorescence method 03 p0347 A72-13395

Forbidden O I and molecular nitrogen ions emission lines rate variation with height in aurora 03 p0352 A72-14382

Energetic electrons absorption cross sections in weakly ionized atomic oxygen gas, showing energy losses through excitation 05 p0655 A72-16071

Intensity ratio and effective lifetime of excited oxygen atoms in pulsating aurora from auroral intensity and absorption observations, noting diurnal variations 07 p0974 A72-18897

Scattering cross section for excited oxygen atoms produced by electron impact dissociation of molecular oxygen 07 p1037 A72-18964

Extreme UV absorption cross sections ratios for atomic oxygen in upper atmosphere, observing solar radiation attenuation with satellite instruments 09 p1297 A72-22578

Phase angle measurements of frequency-oxygen atom lifetime relationship in pulsating auroras 09 p1298 A72-22589

Neutral atmosphere effects on lower ionosphere, considering D region atomic oxygen, nitric oxide and water vapor and electron density distributions 10 p1474 A72-24712

Space shuttle orbiter thermal protection system metal interaction with chemical environment during reentry, emphasizing degradation in dissociated oxygen [AIAA PAPER 72-262] 11 p1590 A72-25206

Heat conduction and radiative transfer equations of IR cooling by atomic O in thermosphere 11 p1622 A72-25848

Rocket-borne mass spectrometer tested in high velocity molecular beam facility for thermospheric atomic oxygen density measurement 11 p1634 A72-26422

Upper atmosphere atomic oxygen distribution calculated for D and E region aeronomy problems solution 13 p1947 A72-28604

Atomic oxygen layer height and peak concentration in earth upper atmosphere, considering solar dissociative radiation and turbulent diffusion for equinox conditions 13 p1948 A72-29236

Atomic/molecular oxygen concentration ratio semi-annual variation at 130 km altitude from mass spectroscopic data analysis 13 p1949 A72-29259

Ionospheric oxygen ions loss rate in charge exchange reactions with hydrogen, molecular nitrogen and oxygen and atomic oxygen photoionization rate 13 p1953 A72-29811

Auroral spectroscopic and excitation processes, discussing atomic oxygen production, emission ratios and electron energy spectrum, UV and IR emissions, composition and temperature measurements 14 p2098 A72-30138

Nitric oxide gas release by rocket in auroral glow to determine atomic oxygen densities in ionosphere via observation of auroral light emission 15 p2226 A72-31936

Oxygen atom electron affinity calculation by symmetry-adapted pair correlation approximation, using pseudonatural orbitals (PSNO) technique 15 p2282 A72-32644

Sensor design and principles for atomic oxygen concentration measurement in dissociated gases, using Ag thin film electrical resistance change during oxidation 16 p2390 A72-33162

Oxygen and nitrogen atoms effect on defects recovery in cold rolled Nb during annealing 16 p2406 A72-33208

Decay rate coefficients at 250-370 K for three-body recombination kinetics of O and CO, considering CO, carbon dioxide and nitrogen as third body 17 p2511 A72-34736

Determination of the quenching of O(1D) by molecular nitrogen using the ionospheric modification experiment 18 p2685 A72-35991

An atomic oxygen beam system for the investigation of mass spectrometer response in the upper atmosphere 19 p2795 A72-37515

Atomic oxygen-ozone gas phase reaction rate constant direct measurement in steady state flow system at 269-409 K under excess ozone conditions 19 p2762 A72-38221

Metastable atomic oxygen deactivation in upper atmosphere by inelastic collisions and by spontaneous irradiation, noting airglow intensity dependence on red lines irradiation 19 p2792 A72-38633

Martian atmosphere atomic oxygen concentration estimation from Mariner 6 and 7 O I 1304 and 1356 A data analysis 19 p2868 A72-38734

Utilization of photorecombination of radicals and atoms in continuous-wave lasers 20 p2932 A72-39508

Thermospheric atomic oxygen and molecular nitrogen densities fromOGO 6 neutral atmospheric composition experiment, comparing with prediction by Jacchia models 22 p3172 A72-42431

Determination of the detonation velocity of isoatomic mixtures 24 p3462 A72-45032

Upper atmosphere atomic oxygen distribution calculated for D and E region aeronomy problems solution 24 p3398 A72-45104

Mass spectra stimulated by O+ and Ar+ interacting with a surface. 24 p3378 A72-45312

OXYGEN BREATHING

Human mental and psychomotor performance measurements in compressed oxygen-helium atmosphere pressure chamber for dive between 100 and 1500 feet 02 p0166 A72-11701

Human blood carboxyhemoglobin saturation relation to inspired air oxygen and CO concentrations from small closed rebreathing system tests [AD-740929] 04 p0472 A72-14863

Respiratory adaptation to pure oxygen excess pressure after cockpit depressurization from flight simulator tests with pressure-suited pilots, presenting ECG reactions 05 p0623 A72-16749

Hypoxia pretreatment for decreased pulmonary oxygen toxicity during high pressure oxygen breathing in rats 07 p0917 A72-19328

Inhaled oxygen pressure variation effects on adenosines, glucose, lactate and pyruvate levels in rat brains, noting anoxic limit value relation to age 07 p0924 A72-20658

Oxygen intake and cardiac output measurements during various treadmill and bicycle ergometer exercises, relating exercise type to heart rate and arteriovenous oxygen differences 08 p1123 A72-20885

Hyperbaric chamber tests for hemodynamic response to oxygen inhalation at 1 and 2 atm pressure for myocardial infarction treatment assessment 08 p1114 A72-20891

Respiration control during hyperoxia, discussing chemoreceptor significance in minute volume respiration rate reduction mechanism from Pamir mountain aborigines oxygen breathing reaction studies 08 p1120 A72-22076

Pure oxygen atmosphere effects at 450 and 600 mm Hg on rats in vitro liver and adipose tissue lipid synthesis, measuring food intake and plasma components 10 p1424 A72-23739

Cardiovascular responses to positive pressure oxygen breathing from blood pressure and heart and respiratory rate measurements 11 p1584 A72-26017

Hyperoxia effect on human airways resistance during high pressure oxygen breathing 11 p1586 A72-26614

Short sleep period and oxygen breathing effects on arousal level of air traffic controller during detection task performance 11 p1588 A72-26686

Arterial blood gas tensions, using sequential phased dilution for pilot oxygen delivery 12 p1764 A72-28255

Suppression effects of hyperoxic breathing gases on red blood cell and erythropoietin hormone production following blood loss 12 p1766 A72-28298

High altitude natives cerebral arterial-venous oxygen difference measurement during ambient air and oxygen breathing, showing chronic hypoxia effect on cerebral blood flow 14 p2079 A72-30704

Hemodynamic changes in man during immersion with the head above water. 17 p2507 A72-34543

Effects of in vivo inhalation of 100% oxygen at reduced pressure on serum and red cell lipids. [AD-746090] 17 p2508 A72-34553

USAF custom fit oxygen mask program. 17 p2508 A72-34559

Hypercapnia with relief of hypoxia in normal individuals with increased work of breathing. 21 p3005 A72-40420

OXYGEN COMPOUNDS

Meridional model of oxygen and hydrogen compounds reactions in mesosphere and lower thermosphere, determining diurnal variations and vertical profiles 03 p0346 A72-13378

IR emission of oxygen reaction with carbon oxysulfide, investigating molecular vibrational transitions 10 p1510 A72-24133

Fluorescence and absorption spectra from oxygen sulfur dichloride photodissociation in vacuum UV, discussing So formation 11 p1590 A72-26012

Russian book - Water in the universe 19 p2789 A72-37743

OXYGEN CONSUMPTION

Hypophysectomy in rats, resulting in prolonged red blood cell survival due to oxygen consumption decrease and altered erythrocyte enzymatic processes 01 p0010 A72-10075

Human exercise capacity assessment from maximal oxygen intake estimates and Harvard step test 01 p0016 A72-10116

Coronary blood flow measurement in various hemodynamic conditions by argon technique, determining oxygen consumption and coronary vascular resistance 03 p0315 A72-13183

Training effect on oxygen consumption in negative muscular work, considering connective tissue strengthening and muscle viscosity changes 03 p0315 A72-13676

Serum enzyme activity changes response to constant test exercise, discussing relation to maximum oxygen uptake 04 p0472 A72-14897

Physiological effects of transfusing 2,3-diphosphoglycerate (DPG) depleted red cells with high oxygen affinity in anemic hypoxic patients 04 p0473 A72-15211

Hemodynamic and blood oxygen parameter changes comparison in dogs during hypoxia at rest and muscle activity in various oxygen concentrations 04 p0474 A72-15232

Pilots oxygen uptake vs flight time and altitude as indicator of physical condition, noting large fluctuations and differences for individual pilots and different flights 05 p0623 A72-16748

Maximum aerobic power response and oxygen consumption to training stimulus intensity, duration and frequency, using bicycle ergometer exercise 07 p0916 A72-18965

Maximal oxygen intake prediction in acute moderate hypoxia during exercise, showing heart rate linearity with work load 07 p0916 A72-18966

Maximum oxygen intake during exercise on treadmill compared with bicycle ergometer, analyzing circulatory dynamic factors and cardiac output relation to oxygen transport capacity 07 p0922 A72-20251

Muscle blood flow relation to oxygen consumption from measurements during bicycle ergometer exercises, using Xe 133 clearance method 08 p1123 A72-20888

Beta-adrenergic inhibitors effects on coronary blood flow and myocardial oxygen consumption of normal and coronary artery disease patients 08 p1118 A72-21549

Hypoxic and normoxic gas mixture breathing during intense muscular activity, relating oxygen consumption and carbon dioxide elimination magnitudes and motor performance 08 p1121 A72-22081

Aerobic work capacity indices of gas exchange pulse rate, pulmonary ventilation and acid base balance in runners, determining maximum oxygen utilization 09 p1268 A72-23596

Oxygen consumption and body temperature in anesthetized, paralyzed and artificially ventilated dogs cooled in water bath at 34 C, measuring hypercapnia and beta-adrenergic blockade effects [AD-740991] 10 p1424 A72-23735

Semiautomatic measurement of human oxygen uptake, discussing apparatus and accuracy 10 p1432 A72-24991

Physical work capacity comparison during bicycle ergometry and treadmill walking tests, measuring oxygen uptake, ventilatory parameters and excess carbon dioxide production 11 p1579 A72-26095

Maximal oxygen uptake and heart rate during ladder climbing, inclined treadmill running and cycling ergometer tests 11 p1586 A72-26612

Hemodynamic variables relation to coronary blood flow and myocardial oxygen consumption during upright bicycle exercise 11 p1587 A72-26618

Isotopic labeled microspheres for cat uveal and retinal blood flow and oxygen consumption determination, studying increased intraocular pressure and carbon dioxide tension effects 12 p1763 A72-27841

Crowding phenomenon effect on blood cell oxygen consumption, using Cartesian diver technique for polymorphonuclear leukocyte, lymphocyte and platelet measurements 12 p1763 A72-27842

Cold adaptation effects on rat skeletal muscle tissue Vant-Hoff coefficient, considering phosphorylation and oxidation rate, P/O and mitochondrial ATP-ase activity 13 p1905 A72-29324

Pulmonary oxygen transport dynamic model representing lung gas-side airway and alveolar regions and blood-side capillary bed 13 p1909 A72-28996

Six day bed rest effect on external respiration and subcutaneous tissue oxygen metabolism, noting oxygen consumption decline 13 p1905 A72-29324

Gas mask-caused air flow resistance effects on respiratory and circulatory response to exercise, assessing maximal oxygen uptake 13 p1906 A72-29818

- Work capacity evaluation from fatigue, biological rhythm, tissue respiration and oxygen consumption studies, discussing pharmacological stimulation effects
14 p2078 A72-30376
- Sweating relation to body temperature after exhaustive exercise for various oxygen uptakes and ambient temperatures
14 p2079 A72-30702
- High altitude natives cerebral arterial-venous oxygen difference measurement during ambient air and oxygen breathing, showing chronic hypoxia effect on cerebral blood flow
14 p2079 A72-30704
- Muscle cell ATP, creatine phosphate and lactate concentration changes relation to oxygen uptake during and after exercise
14 p2080 A72-30705
- Energy cost [oxygen consumption] prediction for treadmill and various levels terrain walking at two speeds under three different pack loads
14 p2080 A72-30706
- Mountain inhabitants cardiocirculatory adaptation to chronic hypoxia, studying coronary flow and myocardial oxygen consumption and efficiency
15 p2187 A72-32498
- Regression analysis for steady state N2 inequality in O2 consumption calculations.
17 p2507 A72-34542
- Cell proliferation in lungs of mice exposed to elevated concentrations of oxygen.
17 p2499 A72-34548
- Thermal neutral temperature of rats in helium-oxygen, argon-oxygen, and air.
17 p2500 A72-34728
- Ion alterations during myocardial ischemia.

16 p2447 A72-33735
- Energy difference measurement between 2S and 2P levels of multiply charged O 16 positive ion, using Stark quenching technique
16 p2432 A72-33768
- OXYGEN MASKS**
Custom fit oxygen mask for life support of crew members
08 p1126 A72-21567
- Physiological evaluation of modified jet transport passenger oxygen mask from altitude chamber experiments
08 p1126 A72-21571
- Disposable emergency oxygen mask for air passengers based on continuous flow, phase dilution principle, describing altitude chamber tests with human subjects to study physiological responses
13 p1908 A72-28702
- USAF custom fit oxygen mask program.
17 p2508 A72-34559
- Continuous flow general aviation oxygen masks.
18 p2653 A72-36536
- OXYGEN METABOLISM**
Ventilatory and metabolic responses of unanesthetized dogs exposed to various carbon dioxide concentrations at 2 and 18 C, discussing oxygen uptake relation to cold
02 p0159 A72-11954
- Hypoxia, hyperoxia and hypercapnia short period effect on rat brain oxygen supply, measuring blood gas values, tissue oxygen partial pressure time variations, etc
02 p0159 A72-11957
- External respiration gas metabolism and energy consumption measurements for test pilots during parabolic trajectory flights in weightlessness simulation experiments
02 p0163 A72-12347
- Free oxygen content and diffusion coefficient in adrenalectomized rat skeletal muscles after physical strain
03 p0317 A72-13991
- Manganese catalyst photoactivation process for oxygen photosynthetic evolution investigated in Mn-deficient *Anacystis nidulans* cells
05 p0624 A72-15811
- Human breathing metabolic simulation device for evaluating respiratory diagnostic, monitoring, support and resuscitation equipment
06 p0769 A72-18618
- CO hypoxia effect on oxygen transport during exercise, discussing changes in cardiac and respiratory functions and work capacity
08 p1114 A72-20893
- Cardiorespiratory functions in child swimmers and nonathletes during growth, relating training to oxygen transport system dimensions
08 p1123 A72-20894
- Laughing gull metabolism dependence on flight speed and angle during wind tunnel tests from oxygen consumption, carbon dioxide production and aerodynamic forces analyses
08 p1115 A72-21080
- Endurance exercise effect on respiratory capacity in white, red and intermediate muscles in rats, relating fiber type to oxidative capacity
08 p1115 A72-21083
- Stepwise adaptation to high mountain conditions effect on brain and sural muscle oxidation processes in rats
08 p1121 A72-22085
- Human oxygen intake and blood lactic acid removal kinetics during recovery from mild steady work on bicycle ergometer
10 p1426 A72-24989
- Six day bed rest effect on external respiration and subcutaneous tissue oxygen metabolism, noting oxygen consumption decline
13 p1905 A72-29324

- High gravity, cold and starvation space stress effects on oxidative metabolism of ethylmorphine, aniline and p-nitroanisole in male rat liver
15 p2185 A72-31700
- Myocardial metabolic changes in chronic hypoxia.
17 p2502 A72-34989
- Blood oxygenating ability of helium- and argon-oxygen environments relative to air, using alveolar gas equation to predict arterial oxygen pressure
18 p2649 A72-36438
- Hypoxic theory for atherosclerosis formation, noting blood plasma protein concentration effects on oxygen diffusion
18 p2651 A72-37030
- Lack of effect of high altitude on hemoglobin oxygen affinity.
21 p3006 A72-40443
- Human plasma free fatty acids relation to lactic acid concentration and maximum aerobic power, noting carbohydrate availability as exercise capacity limiter
21 p3003 A72-41520
- Coronary blood flow and myocardial metabolism in man at high altitude.
22 p3144 A72-42593
- Blood flow, oxygen uptake, and capillary filtration in resting skeletal muscle.
22 p3150 A72-42668
- Effect of activity and temperature on metabolism and water loss in snakes.
22 p3144 A72-42669
- Physiologic effects of passive hyperventilation on oxygen delivery and consumption.
23 p3258 A72-44365
- Gas exchange mechanism in lung alveoles and capillaries, discussing cell metabolism for oxygen uptake and carbon dioxide formation
24 p3371 A72-44599
- OXYGEN PLASMA**
Multimode cavity for simultaneous oxygen/argon plasma excitation and electron density measurements, noting gas pressure effect
08 p1213 A72-21323
- Semiconductor materials etching and surface coating with protective silicon dioxide film in low temperature oxygen plasma
11 p1700 A72-25777
- HF absorption of electromagnetic field in ionized oxygen plasma as function of dc discharge current
20 p2958 A72-39969
- OXYGEN PRODUCTION**
Chlorate based oxygen generator assembly, discussing tests, advantages and applications
04 p0482 A72-14566
- Molecular oxygen evolution Mn catalyst photocatalysis as two-quantum process, discussing kinetic model computer simulation
04 p0484 A72-15740
- Closed loop life support systems, discussing manned ninety day test in space station simulator, Soviet experiments and water and oxygen regeneration
10 p1432 A72-24973
- Bioengineering models of energy and mass exchange of algae under varying ambient conditions, noting mass cultivation possibility for oxygen regeneration in closed environments
20 p2893 A72-38959
- Bosch carbon dioxide reduction process for manned spacecraft oxygen recovery, analyzing carbon and water forming reactions with iron as catalyst
[ASME PAPER 72-ENAV-9] 20 p2896 A72-39168
- Six-month test program of two water electrolysis systems for spacecraft cabin oxygen generation.
[ASME PAPER 72-ENAV-5] 20 p2896 A72-39172
- Regeneration of oxygen from carbon dioxide and water.
24 p3375 A72-45183
- System design of a near-self-supporting lunar colony.
24 p3388 A72-45192
- OXYGEN RECOMBINATION**
Oxygen ionization and ion mobility measurements in air by open proportional counting chamber with electron counter and exoelectron emitter
09 p1305 A72-22203
- OXYGEN REGULATORS**
Proportional-integral control of reactants supply for hydrazine-oxygen fuel cells with pulse controlled solenoids
06 p0867 A72-18290
- OXYGEN SENSORS**
U OXYGEN ANALYZERS
OXYGEN SPECTRA
Meridional thermospheric wind effect on auroral atomic oxygen red line profile, noting inadequacy of diffusion hypothesis
01 p0052 A72-10079
- UV airglow in 1304 A line of oxygen from Cosmos 215 satellite
01 p0053 A72-10362
- Atomic/molecular oxygen concentration ratio semi-annual variation at 130 km altitude from mass spectroscopic data analysis
02 p0218 A72-11947

Ozone photolysis in UV region, determining primary products from oxygen optical emission detection using time-resolved flow system

03 p0320 A72-13394

Late twilight airglow vacuum UV spectra from sounding rocket observation, noting conjugate-point electron excitation role in O I emissions

03 p0350 A72-13525

Mars atmosphere diatomic oxygen upper limit abundance, using high dispersion spectroscopic data from 1969 apparition

04 p0569 A72-14498

F2 layer 6300 A night airglow emission photometric data on 31 January 1968, showing large electron content and movements

04 p0517 A72-14958

Lower ionosphere 5577 and 5893 A and hydroxyl band emissions interrelationships, observing atomic O and vertical eddy transport effects

04 p0518 A72-14961

Twilight atmospheric sounding in oxygen absorption bands to reduce noise level in secondary light scattering

06 p0807 A72-17943

Oxygen telluric lines contours shape analysis, allowing for atmospheric nonisothermicity and inhomogeneity

06 p0852 A72-18050

Oxygen Herzberg bands excitation in nightglow, obtaining quenching reaction rate coefficients

07 p0976 A72-19579

Auroral F region electron density enhancement relation to sporadic F2 and red oxygen emission

08 p1226 A72-21111

Atmospheric vertical temperature profile inference from ground based measurement of microwave thermal emission spectrum from atmospheric oxygen

08 p1161 A72-21824

Upper atmospheric oxygen red line diurnal variations and midnight minimum, noting emission relation to kinetic temperature in magnetic storm

09 p1296 A72-22234

Chemical bond effect on K emission spectrum of oxygen and fluorine

09 p1275 A72-22522

Line intensity variation simulation in Raman spectrum of oxygen with allowance for spin splitting of rotational levels

09 p1358 A72-23049

Forbidden O I lines brightness and shadow bands properties during 7 March 1970 solar eclipse, comparing with rocket measurements

12 p1800 A72-27143

Atomic/molecular oxygen concentration ratio semi-annual variation at 130 km altitude from mass spectroscopic data analysis

13 p1949 A72-29259

Seasonal features of nocturnal 6300 A emission variation and decay coefficient in nightglow related to recombination coefficient for F layer ionization

14 p2097 A72-30132

Nightglow small scale intensity fluctuations of 5777 A atomic oxygen emission due to turbulent transport of horizontal wind observed with photometers

14 p2098 A72-30143

Airglow and auroral OI and NI allowed and spin forbidden transitions for above 9 eV excitation potential lines

14 p2098 A72-30145

Infrasonic excitation of red oxygen emission at 6300 A during geomagnetic storms at middle latitudes

14 p2098 A72-30146

Incoherent scatter and filter photometer search for 6300 A predawn enhancement by magnetically conjugate photoelectron impact excitation, comparing with ionospheric electron density

14 p2098 A72-30148

IR absorption coefficients of oxygen atom and molecule fields due to free-free electron transfers at specific elastic scattering cross sections

15 p2274 A72-31409

Semidiurnal variation in O I 5777 A nightglow due to lunar tidal dynamics effect in E and F regions

16 p2383 A72-32971

Atmospheric transmittance calculation from 0.76-micron oxygen band fine structure parameters

16 p2417 A72-33289

Twilight atmospheric sounding in oxygen absorption bands to reduce noise level in secondary light scattering

16 p2386 A72-33784

Atomic oxygen green line emission in nightglow from OGO-F photometer observations, calculating tropical F region electron density spatial distribution

17 p2549 A72-35604

Absorption of the 4- to 6-millimeter wavelength band in the atmosphere.

18 p2689 A72-36961

French monograph - Determination of the absolute value of the absorption in the bands of the Schumann-Runge system of molecular oxygen

19 p2836 A72-37476

Nocturnal and semiannual variations of the intensity of 5777 A emission of atomic oxygen.

19 p2789 A72-37511

Measurement of the equivalent widths of oxygen A-band absorption lines at different pressures

19 p2837 A72-37959

Nightglow observations and ionospheric soundings for red oxygen line intensity relation to F region parameters

19 p2792 A72-38638

Martian atmosphere atomic oxygen concentration estimation from Mariner 6 and 7 O I 1304 and 1356 A data analysis

19 p2868 A72-38734

Oxygen abundances of three population II horizontal-branch stars.

21 p3109 A72-41330

OI 6300 and 5577 A, NI 5200 A and H beta 4861 A emission line measurement during 8-9 March 1970 auroral arc event

22 p3169 A72-42018

Airglow observations with a Hadamard photometer.

22 p3169 A72-42023

Theoretical calculations of the F-region tropical ultraviolet airglow intensity.

22 p3171 A72-42418

Rocket measurement after sunset for altitude distribution of 1.27 micron band nightglow emission from diatomic oxygen molecules

22 p3172 A72-42435

Photochemistry of the airglow continuum.

22 p3153 A72-42889

Tilting-filter measurements in dayglow rocket photometry.

23 p3289 A72-43893

Ground-based sensing of temperature profiles from angular and multi-spectral microwave emission measurements.

23 p3285 A72-44147

Microwave spectrum of compressed O2-foreign gas mixtures in the 48-81 GHz region.

24 p3378 A72-44871

OXYGEN SUPPLY EQUIPMENT

NT OXYGEN MASKS
Soviet book on civil aircraft high altitude equipment covering air conditioning systems, oxygen equipment and cabin pressurization

02 p0156 A72-12295

Extravehicular life support systems for shuttle, space station, lunar base and Mars missions, considering thermal control, carbon dioxide control and oxygen supply subsystems

10 p1430 A72-24441

LOX supply systems installation for civil transport aircraft crew and/or passenger breathing oxygen

11 p1584 A72-26030

Contaminant analysis in gaseous oxygen generated by chlorate candle combustion, using Draeger tubes

12 p1779 A72-28254

Integrated water vapor electrolysis oxygen generator and hydrogen depolarized carbon dioxide concentrator development.

20 p2896 A72-39170

Six-month test program of two water electrolysis systems for spacecraft cabin oxygen generation.

20 p2896 A72-39172

Calculation procedures for some parameters of space suit gas medium supply systems

21 p3006 A72-40449

OXYGEN SYSTEMS

U OXYGEN SUPPLY EQUIPMENT
OXYGEN TENSION
NT HYPOXEMIA
Oxygen distribution in human brain under counter-current capillary blood flow conditions, presenting mathematical simulation for transport in Krogh system

02 p0168 A72-12037

Epinephrine and norepinephrine effects on cerebral blood circulation volume and oxygen tension in tissues

02 p0165 A72-12517

Free oxygen content and diffusion coefficient in adrenalectomized rat skeletal muscles after physical strain

03 p0317 A72-13991

Inhaled oxygen pressure variation effects on adenosines, glucose, lactate and pyruvate levels in rat brains, noting anoxic limit value relation to age

07 p0924 A72-20658

Rebreathing technique to estimate human mixed venous oxygen and carbon dioxide tension changes at start of exercise under respiratory stress and natural conditions

08 p1122 A72-20883

In vitro measurements of oxygen tension effect on teleost and amphibian retinal lactate dehydrogenase activity, discussing acetazolamide produced hypoxia effects

10 p1424 A72-23729

Pressure sensitivity of Na-K-Mg ATPase activity from rat intestine, investigating inhibiting effects of oxygen, nitrogen and helium tension increases

10 p1424 A72-23731

High altitude acclimatization effects on human lung diffusing capacity for carbon monoxide at different oxygen tensions

10 p1425 A72-24476

Pathological significance of high oxygen tension exposure effects on acid soluble collagen extracted from mouse skin

12 p1760 A72-27483

Carbon monoxide laser output power variation as function of oxygen tension

12 p1823 A72-27755

Irreversibility mechanism in postpartum ductus arteriosus closure in guinea pigs, studying vessel cellular changes and smooth muscle response to oxygen pressure

12 p1762 A72-27826

Arterial blood gas tensions, using sequential phased dilution for pilot oxygen delivery

12 p1764 A72-28255

Human centrifuge studies of high positive acceleration effects on blood oxygenation and arterial oxygen and carbon dioxide tension

12 p1766 A72-28287

Solid combustibles flame spread rates in compressed atmospheres, noting dependence on oxygen concentration

14 p2170 A72-30340

The intramyocardial oxygen pressure at normoxia and hypoxia.

17 p2501 A72-34986

Interaction of chronic hypoxia and hypercapnia upon blood gases and acid base status.

17 p2504 A72-35166

Respiratory frequency and alveolar oxygen and carbon dioxide tension relationship to hypercapnia in man

17 p2506 A72-35965

Effects of diffusion impairment on O2 and CO2 time courses in pulmonary capillaries.

17 p2506 A72-35967

Blood oxygenating ability of helium- and argon-oxygen environments relative to air, using alveolar gas equation to predict arterial oxygen pressure

18 p2649 A72-36438

Pulmonary gas exchange in Andean natives at high altitude.

18 p2650 A72-36570

Hypoxic pulmonary steady-state diffusing capacity for CO and alveolar-arterial O2 pressure differences in growing rats after adaptation to a simulated altitude of 3500 m.

21 p3003 A72-41622

Oxygen consumption in liquid breathing mice.

22 p3142 A72-42488

Morphometric evaluation of changes in lung structure due to high altitude.

22 p3143 A72-42585

Respiratory chain components correlation to tension production at various oxygen pressures in guinea pig ductus arteriosus, investigating light absorption changes

22 p3144 A72-42670

Influence of elevated partial oxygen pressure on the sympathetic-adrenal and acetylcholine systems

24 p3371 A72-44595

Experimental studies on the alkali-acid equilibrium in the blood gases under the chronic action of low concentrations of lead.

24 p3374 A72-44824

In vivo hemolysis due to hyperoxia - Role of H2O2 accumulation.

24 p3374 A72-45651

OXYGEN TOXICITY

U HYPEROXIA

OXYGEN 18

Beam maser spectrometric measurements of normal, C-13 and O-18 formaldehyde transitions, determining coupling constants for all rotational transitions hyperfine structure

16 p2431 A72-33132

OXYGENATION

Regional myocardial contraction mechanics during transient ischemia and reoxygenation in anesthetized dogs

04 p0476 A72-15719

Human centrifuge studies of high positive acceleration effects on blood oxygenation and arterial oxygen and carbon dioxide tension

12 p1766 A72-28287

Hemoglobin-facilitated diffusion of oxygen - Interfacial and thickness effects.

18 p2650 A72-36569

OXYHEMOGLOBIN

Prolonged muscular work effects on erythrocyte 2,3-DPG generation relation to oxyhemoglobin affinity

04 p0472 A72-14898

Volumetric analysis of blood oxygen and CO, showing combination with hemoglobin without significant molecular volume increase

05 p0619 A72-16786

Immunochemical properties of human oxyhemoglobin comparison with complex of dog hapto-globin and human hemoglobin reactions in anti-hemoglobin serum

09 p1268 A72-23695

Physiologic effects of passive hyperventilation on oxygen delivery and consumption.

23 p3258 A72-44365

OZONE

Vertical ozone distribution model using four variable parameters for stratospheric studies, climatology, scattering or radiometric measurements from ground or satellite
 01 p0059 A72-10834

Nimbus 4 vertical atmospheric sounding techniques, obtaining temperature, water vapor and ozone profiles with Michelson IR interferometer
 01 p0095 A72-10957

Inhaled ozone effect on chromosome aberrations break frequencies in circulating blood lymphocytes of irradiated Chinese hamsters
 01 p0015 A72-11149

Gas flow visualization technique using fluorescent plate with UV irradiated ozone tracer, noting application to wall attachment fluidic elements
 01 p0072 A72-11198

Total ozone estimation by interpolation from Nimbus 4 satellite data on backscattered UV earth radiance attenuation
 01 p0096 A72-11285

Atmospheric ozone pressure variations in high altitude cyclones, anticyclones, troughs and crests at low pressure levels
 02 p0207 A72-11734

Cosmos 65 global ozone contour data similarity with geomagnetic L shells configuration, discussing South Pacific region depletion area
 02 p0221 A72-12466

Upper atmosphere ozone, aerosol and neutral constituent density profiles estimation by recursive filtering algorithm for satellite observation data
 02 p0222 A72-12811

Quantum yield observations for photochemistry of ozone and singlet molecular oxygen in atmosphere
 03 p0347 A72-13393

Ozone photolysis in UV region, determining primary products from oxygen optical emission detection using time-resolved flow system
 03 p0320 A72-13394

Low inertia instrument for ozone density measurement in atmosphere near ground
 04 p0525 A72-15624

French monograph on atmospheric ozone utilization as tracer for troposphere-stratosphere exchanges covering investigations at various locations
 05 p0654 A72-15799

Ozone content and vertical distribution variations as causes of winter stratospheric warmings in Northern Hemisphere
 07 p0973 A72-18861

Atmospheric ozone photochemistry, discussing pure oxygen and moist atmospheres, NO mechanism, tracer applications, stratospheric dynamics and Umkehr observations
 07 p0979 A72-20228

Environmental chamber tests for ozone exposure effects on human pulmonary function at rest and during bicycle exercise
 08 p1122 A72-20884

Vertical ozone distribution observed by Umkehr and IR methods
 08 p1159 A72-21226

Mesospheric ozone measurement for altitude profiles, comparing rocket and ground based observations of 1.27 micron emission band at twilight
 09 p1296 A72-22355

Mesosphere ozone number densities from rocket photometric measurement of lunar UV radiation absorption
 09 p1385 A72-22583

Stratospheric ozone photochemistry through nitrogen oxides and hydrogen compounds reactions, noting controlling effect of water vapor
 09 p1298 A72-22674

Horizontal ozone distribution in middle stratospheric macrosynoptic situations, considering anticyclonic side and jet stream delta region
 09 p1301 A72-23194

IR absorption spectrum of gaseous ozone, obtaining mechanical anharmonicity coefficients and zero order wave numbers
 10 p1511 A72-24226

Spectrophotometric measurements of sky radiance distribution to determine atmospheric pollution, ozone content and radiation attenuation by clouds
 10 p1476 A72-25085

Rocket sounding of ozone diurnal variations in upper stratosphere and lower mesosphere
 13 p1947 A72-28831

Turbulence effects on electron, ion, aerosol, water vapor and ozone concentration in atmospheric layers
 15 p2222 A72-31395

Tropospheric meridional ozone profiles between Europe and South Africa from measurements aboard commercial airliners, noting seasonal variations
 16 p2382 A72-32889

Solar radiation absorption measurements in 2150 Å region as function of altitude to obtain oxygen and ozone densities
 16 p2384 A72-32975

Stratospheric pollution by SST exhaust gases, discussing water vapor and nitrogen oxides effects on ozone concentration
 17 p2597 A72-35327

Atomic oxygen-ozone gas phase reaction rate constant direct measurement in steady state flow system at 269-409 K under excess ozone conditions
 19 p2762 A72-38221

Nitrous oxide production from ozone photolysis reaction with molecular nitrogen
 19 p2762 A72-38753

Modified Dobson ozone spectrophotometer with revised electronic design circuitry, considering high voltage power supply, photomultiplier tube circuit, amplifier and electromechanical phase sensitive rectifier
 20 p2921 A72-38968

A rocket measurement of the vertical distribution of atmospheric ozone.
 23 p3285 A72-44242

OZONOMETRY

Ozone observation and daily and seasonal variations at Cologne, noting longitudinal variations for monthly means
 06 p0808 A72-18146

Total ozone measurements by selective transmission filter ozoneometer comparable to Dobson spectrophotometer
 09 p1307 A72-22453

Atmospheric ozone inference from satellite IR horizon radiance measurements
 12 p1799 A72-27030

Ozone photochemical reactions measurements for quantum yield of UV photolysis in strong Hartley band with water vapor chain decomposition effects
 14 p2083 A72-30134

Distribution of total ozone content in the atmosphere according to spacecraft observations
 21 p3050 A72-41797

Ozone measurements in the mesosphere during the solar proton event of 2 November 1969.
 22 p3173 A72-42509

OZONOSPHERE

Midlatitude D layer observations during sunspot minimum, emphasizing atmospheric ionization and ozonospheric parameters
 01 p0055 A72-10433

Two dimensional meridional ozone model for seasonal ozone concentration behavior at 15-45 km, taking into account advective and turbulent effects
 03 p0351 A72-14360

Atmospheric ozone and the history of life.
 18 p2686 A72-36626

A rocket measurement of the vertical distribution of atmospheric ozone.
 23 p3285 A72-44242

P

P WAVES

Elastic singlet p wave phase shift calculation for electron scattering by H atom and He cation, using time dependent Hartree-Fock perturbation theory
 09 p1355 A72-22786

Many electron pseudopotential method for electron-atom scattering, calculating singlet s wave and p wave phase shifts
 12 p1848 A72-27429

Elastic wave diffraction by rigid ellipsoid, deriving scattering cross section for incident P wave from integral equation solution
 16 p2426 A72-33659

P-I-N DIODES

U DIODES

U P-I-N JUNCTIONS

P-I-N JUNCTIONS

Low driving power resistive gate MOSFET microwave switch with performance approaching P-I-N diode
 01 p0038 A72-10658

REDAP 31 network analysis program for design of S-band phase shifter with P-I-N diodes for phase array antennas
 01 p0040 A72-10689

P-I-N diodes power handling characteristics in high power solid state TR switches
 01 p0042 A72-10708

Solid state components for millimeter wave systems, including IMPATT diode power sources and amplifiers, P-I-N diode modulators and switches and Schottky barrier mixers
 02 p0192 A72-12183

Book on microwave semiconductor devices, considering point contact crystal, varactor, Schottky-barrier, tunnel, backward and p-i-n diodes, transistors, Gunn effect devices and integrated circuits
 03 p0333 A72-13845

Gaussian envelope microwave pulse generation using absorption p-i-n diode modulator, predicting performance by digital simulation
 04 p0498 A72-14718

Digital loaded-line phase shifters for phased array antennas, discussing lossy microstrips effects and P-I-N diode switching shortcomings in design requirements
 07 p0954 A72-19048

High microwave voltage effects on p-i-n junction conductance under inverse dc bias, noting role of hole generation and accumulation by impact ionization
 15 p2206 A72-31643

X- and Ku-band microelectronic phase shifters
 17 p2531 A72-35767

The use of semiconductor diodes to protect a radar receiver
 18 p2663 A72-37217

S-band high power microstrip switches with p-i-n diodes for spacecraft radio systems
 19 p2770 A72-3725

P-i-n variable attenuator with low phase shift.
 19 p2773 A72-38294

Digital p-i-n diode microwave drive amplifier design guidelines, discussing sharp switching pulses and short circuit protection features
 20 p2904 A72-39734

Semiconductor diodes for microwave power control
 21 p3033 A72-40939

P-N JUNCTIONS

Fluorinated ethylene propylene encapsulated N/P Si solar cells, investigating simulated micrometeoroid exposure effects on I-V performance in shock tube
 01 p0006 A72-10381

Mode guiding improvement in p-n junction of symmetrical AlGaAs-GaAs heterojunction laser diode with narrow active region, obtaining low room temperature threshold current
 01 p0080 A72-10788

Dc flow through p-n junction by modified Melehy force field method, discussing space charge variation in depletion layer
 03 p0338 A72-13866

N-p silicon solar cells damage at room temperature by proton and deuteron irradiation, considering particle mass and energy functions and illuminating light wavelength effects
 04 p0561 A72-14574

Avalanche breakdown voltage of Gaussian Si planar p-n junctions for design and impurity diffusion evaluation
 04 p0562 A72-15126

Space charge recombination in forward biased diffused p-n junction silicon diodes
 04 p0562 A72-1512

Millimeter wave GaAs avalanche diode oscillator processing on plated Cu heat sinking block resulting in epitaxially grown p-n junctions
 06 p0788 A72-1846

Semiconductor device physical behavior, discussing energy levels, impurity conduction, p-n junction capacitance and bipolar and unipolar transistor I-V characteristics
 06 p0790 A72-18575

Cadmium mercury telluride photovoltaic cell features, noting gigahertz range frequency response, heterodyne sensitivity, operating temperature and nonstoichiometric p-n junction preparation
 07 p1003 A72-19224

Electrical breakdown in reverse biased semiconductor p-n junctions involving Zener effect and avalanche mechanisms
 07 p1048 A72-19821

IMPATT diode thermal resistance measurement from heat diffusion effect on small signal impedance of p-n junction
 07 p0958 A72-20684

Physical and operational characteristics of Si and Ge photoelectric semiconductor devices with p-n junctions, discussing photodiodes, phototransistors, mosaic arrays and coordinate sensitive structures
 08 p1139 A72-21055

Flow graph analysis of optimal operation of frequency multipliers with idler circuits using nonlinear n-p junction capacitance
 08 p1140 A72-21061

Reverse biased p-n diffused junction design with two impurities in nonhomogeneous semiconductors, calculating depleted space charge region thickness
 08 p1140 A72-21062

Barrier capacitance effect on transient characteristics of light diodes, obtaining time dependence of p-n junction volume charge voltage and recombination emission intensity
 09 p1284 A72-22211

Avalanche carrier multiplication influence on semiconductor device p-n junction quality, discussing current distribution and I-V characteristics during avalanche breakdown
 10 p1446 A72-23849

Lead tin telluride photovoltaic p-n junction diode and lasers, discussing n-type layer fabrication by proton bombardment
 10 p1450 A72-24552

Width of space charge layer of reverse-biased p-n junction in p-n-p structure effect on current density, mobile charge carriers and constituent transistors gain coefficients
 10 p1526 A72-24584

Electrical properties of Te/p-Si/N heterodiodes at room and liquid air temperatures
10 p1527 A72-24937

Book on semiconductors covering electrical properties, energy band structure, impurities, epitaxial growth, silicon dioxide, surface properties, p-n junctions and measurement techniques
10 p1528 A72-25123

Si Pd-n-p/plus/ transit time diode microwave oscillator, discussing fabrication, FM noise spectrum and bias current fluctuation
11 p1604 A72-25748

Time dependent light emission from mesoplasmas in Si p-n junctions in pulse mode, showing carrier heating effect
11 p1700 A72-25780

Heterojunction p-GaAs-n-ZnSe diodes electrical and photovoltaic properties, showing space charge limited current effects
11 p1606 A72-26624

P-n junction diodes fabricated by ion implantation doping, calculating I-V characteristics for comparison with measured breakdown voltages
12 p1789 A72-27312

Internal parameters of injection lasers based on diffusion and epitaxial p-n junctions and heterojunctions in GaAs-AlAs system at 300 K
12 p1825 A72-27878

Photovoltaic effects in solar cell p-n homojunctions and heterojunctions at low and high excitation levels
12 p1855 A72-28006

P-n thin film solar cell based on thermally and electrochemically stable II-IV semiconductors with graded energy gaps
12 p1756 A72-28013

Pulsed Si p-n junction mesoplasma dynamic I-V characteristics explained by mechanism based on hot carrier annihilation
12 p1853 A72-28113

Varactor broken voltage-capacitance curve due to uncompensated impurities concentration change at p-n junction
13 p1926 A72-28379

P-n-p-n junction thyristor turnoff process under reverse anode voltage at high injection level, examining current voltage curve and switching time constant
13 p1932 A72-29293

Forward voltage vs temperature characteristics for Si planar p-n junction diodes, determining zero temperature energy gaps for silicon, germanium and GaAs
13 p1933 A72-29824

N region capture centers effects on small signal impedance in p-n-n diode structure during passage of strong dc current
13 p1933 A72-29977

S-type negative resistance segment formation on rectilinear branch of I-V characteristics of p-n structure
14 p2089 A72-30969

Regenerative semiconductor parametric amplifier under dc through p-n junction, analyzing nonlinear phenomena
14 p2090 A72-31124

Avalanche photodiode with n-p-pi double diffused reach-through structure for visible and near-IR regions, noting high efficiency, low noise and gain stability
15 p2248 A72-32036

Near junction doping characteristics of p-n GaP red emitting diodes by scanning electron microscope correlated with electrical and electroluminescent measurements
15 p2208 A72-32521

Internal parameters of injection lasers based on diffusion and epitaxial p-n junctions and heterojunctions in GaAs-AlAs system at 300 K
16 p2404 A72-33987

Si p-n junction solar cell fill factor for electric power available to load, noting discrepancy between calculated and measured values due to recombination
17 p2494 A72-34264

Effects of junction depth on the radiation damage of silicon solar cells.
17 p2594 A72-34388

Forced oscillations in a circuit with a nonlinear p-n junction capacitance
17 p2533 A72-34756

Parametric resonance in an oscillatory circuit with a nonlinear p-n junction capacitance
17 p2533 A72-34757

Preparation and properties of nonheat-treated single crystal Cu₂S-CdS heterojunctions.
17 p2595 A72-35331

Determination of the parameters of minority carriers in semiconductor photocells from a spectral sensitivity curve
17 p2498 A72-35512

The capacitances of aniso-type heterojunctions with continuously varying energy band gap and electron affinity in the transition region.
18 p2719 A72-36944

Effect of a junction capacitance nonlinearity on the spectral characteristics of a tunnel diode current
20 p2906 A72-38897

Effects of impurities on gamma-irradiated silicon crystal examined by photovoltaic effect of p-n junction diode.
21 p3097 A72-40693

A theoretical investigation on the generation current in silicon p-n junctions under reverse bias.
21 p3097 A72-40703

Electrical fluctuations in ideal straight-staggered nondegenerate diodes
21 p3033 A72-40945

GaP /Zn-O/ diodes light emission efficiency increase by forward bias, relating to precipitation in n and p layers
22 p3159 A72-42613

General transport theory of noise in pn junction-like devices. I Three-dimensional Green's function formulation.
22 p3160 A72-43083

General transport theory of noise in pn junction-like devices. II - Carrier correlations and fluctuations for high injection.
22 p3160 A72-43084

Frequency dependent deep level trap admittance and field effect transcapacitance of p-n junctions calculated by truncated space charge approximation
22 p3161 A72-43086

Linear theory of a microwave distributed amplifier based on an avalanche transit-time diode
23 p3271 A72-43776

X-band silicon double-drift IMPATT diodes using multiple epitaxy.
23 p3273 A72-44334

P-N-P JUNCTIONS

Large-signal IC equivalent circuit model for DC, linear and nonlinear transient time circuit analysis of lateral p-n-p transistors, including isolation junction interactions
01 p0044 A72-10126

Static I-V characteristics and gain properties of lateral p-n-p transistors, using multijunction analysis
02 p0189 A72-11522

Si p-n-p and Cr-n-p junction transit time diode oscillators microwave and dc characteristics comparison, noting similarity
04 p0499 A72-15206

Si p-n-p punchthrough X band oscillator, discussing wideband tuning and low noise properties and applications
07 p0955 A72-19252

Ion implantation for varicaps and p-n-p bipolar transistors fabrication, examining implanted impurities profiles
10 p1449 A72-24285

Alloy p-n-p junction transistor diffusion capacity variation with emitter current as function of temperature at 80-320 K
10 p1451 A72-24558

Complementary monolithic IC n-p-n and p-n-p transistor circuit structure with high sheet and low saturation resistance
11 p1606 A72-26567

IC lateral p-n-p multijunction transistor frequency characteristics analysis, noting parasitic effects, cutoff frequencies and power gain
12 p1788 A72-27311

Electro-optical regenerative assembly with p-n-p structure, emphasizing positive feedback and I-V characteristics
13 p1933 A72-29976

Properties of a composite transistor
17 p2530 A72-35066

Multivibrator with p-n-p and n-p-n transistors, noting circuit diagram, operation and power dissipation
20 p2906 A72-38898

P-n-p and p-n-p-n transistors and thyristors with lateral structure geometry, discussing operational characteristics and effects of structural modification on semiconductor parameters
23 p3271 A72-43835

P-N-P-N JUNCTIONS

Thyristors junction area current rise time extension, discussing emitter field regional delay times as function of p-n-p-n structural properties
08 p1140 A72-21266

Hybrid neuristor transmission lines with planar p-n-p-n semiconductor structures, discussing development, testing and electrical parameters
10 p1448 A72-24281

Static and impedance characteristics and equivalent circuit of p-n-p-n inductance diode, using ambipolar diffusion length
12 p1790 A72-27499

The static current-voltage characteristic of four-layer structures in two-collector operation at a low injection level
19 p2846 A72-38573

P-n-p and p-n-p-n transistors and thyristors with lateral structure geometry, discussing operational characteristics and effects of structural modification on semiconductor parameters
23 p3271 A72-43835

P-TYPE SEMICONDUCTORS

Density waves propagation and amplification in p-InSb electron-hole plasmas, investigating dependence on frequency and injection level
04 p0561 A72-14851

N- and p-type semiconductors energy band structure bending near interface
05 p0702 A72-16197

Hysteresis loops during breakdown in reverse bias segment of p-PbS point contact diodes I-V curves
05 p0638 A72-17177

IR luminescence and photoconductivity in p-type GaSe single crystals alloyed with Sn and Ge impurities
08 p1216 A72-21069

Thermally stimulated autophotocurrent emission from Cr-alloyed p-type GaAs electrode, determining spectral distribution and light and electric field effects on current
08 p1216 A72-21071

Temperature dependence of intrinsic light absorption band edge characteristics in p-type InSb
09 p1366 A72-22213

Electron and hole recombination at deep impurity centers during nonequilibrium current carriers excitation by Nd-glass laser light in p- and n-type germanium
09 p1322 A72-22214

Au-Si n and Al-Si p diodes noise operating in avalanche with charges injected by radiation
09 p1287 A72-23113

Solid state sinusoidal signal generator based on current density oscillation effect in high resistivity p-type InSb with transmutation doping
09 p1288 A72-23191

Be and Mg ion generation and p-type layer electrical properties production by implantation in GaAs substrates
09 p1372 A72-23245

Internal Q switching and long time delay emission in electron beam excited p-type and n-type GaAs lasers, indicating optical absorption traps
10 p1489 A72-23947

Emitter conduction bands with negative electron affinity energy from surface barrier lowering of Cs p-type semiconductors
10 p1526 A72-24351

Microwave diagnostics of P doped Si semiconductor crystal prism determining relation between complex permittivity and reflection factor by variational method
10 p1450 A72-24404

Temperature dependence of internal quantum efficiency of spontaneous emission as function of beam voltage in electron beam excited p-type GaAs
10 p1526 A72-24559

Thin film tunnel triode using p-type amorphous semiconductors to achieve injected current amplification
10 p1451 A72-24624

Dielectric and optical constants of p-type GaSb single crystals, interpreting singularities by energy bands diagram
11 p1689 A72-26485

Annealing effects on gamma ray irradiated Li compensated p-type B doped Si semiconductor
12 p1858 A72-28065

Carrier concentration Hall mobility and photoconductivity in n- and p-type CdTe after neutron and electron bombardment
12 p1859 A72-28072

Room temperature negative photoconductivity of p-type ZnTe-CdTe solid solutions mixed crystals within model with electron and hole capture levels
14 p2141 A72-30173

Zr oxidation kinetics at 440-850 C for 3 min maximum exposure time, observing type oxide change relationship to activation energy
14 p2113 A72-30247

Be doped p-type Si piezoresistance and hole transport properties dependence on temperature, crystal orientation and doping concentration
16 p2442 A72-33834

Theory of photon-induced hopping on acceptors in p-type germanium.
17 p2595 A72-34750

Emitter conduction bands with negative electron affinity energy from surface barrier lowering of Cs p-type semiconductors
17 p2595 A72-34952

Normal mode formulation of spin wave-helicon wave interactions in ferromagnetic semiconductors.
18 p2718 A72-36452

Properties of 1 MeV electron-irradiated defect centers in p-type silicon.
19 p2844 A72-37687

Photoluminescence and photoconductivity of hole-type cadmium telluride single crystal films
19 p2845 A72-38403

Variations as a function of the temperature of the moduli of elasticity of monocrystalline P-type GaSb
19 p2846 A72-38542

Subthreshold radiation effect in silicon
20 p2959 A72-38953

Boron p-type region impurity concentration calculation technique to establish anomalous base profile in n-p-n bipolar transistors

20 p2908 A72-39567

Magneto-microwave free-carrier absorption in germanium in the Faraday configuration.

21 p3097 A72-41379

Influence of a surface space charge on certain photoelectric properties of p-type gallium arsenide

21 p3098 A72-41684

Influence of irradiation by 1.2-MeV electrons on the electrophysical properties of p-Si single crystals grown in a hydrogen atmosphere

21 p3098 A72-41686

I-V, spectral and temperature characteristics of autophotocathode emission in p-type silicon cathodes with varying acceptor concentrations

21 p3098 A72-41692

Electroconductivity anisotropy effect on transverse Denber effect angular dependence and spectral distribution in p-type CdSb lattice

21 p3098 A72-41693

Effect of increasing beam voltage on the internal quantum efficiency of spontaneous emission in electron-beam-excited p-type GaAs.

22 p3185 A72-42308

Pulsed room temperature laser action of Si-doped double heterostructure GaAs p type diodes within 9100-9500 A wavelengths, discussing threshold current densities and power efficiency

22 p3186 A72-42621

Characteristics of P-channel MOS field effect transistors with ion-implanted channels.

24 p3385 A72-44981

P-3 AIRCRAFT

OMEGA receiver integration into Navy P-3C airborne computerized navigation system, describing flight test, maintainability and laboratory simulation programs

13 p1999 A72-29202

P-1127 AIRCRAFT

Flying experience with the SC1 research aircraft and the P1127 prototype at the Royal Aircraft Establishment, Bedford, England.

22 p3136 A72-42324

PACIFIC ISLANDS

NT JAPAN

PACIFIC OCEAN

Tropospheric wind estimation from ATS 1 satellite cloud motions over equatorial Pacific

01 p0060 A72-10856

Wind, pressure and temperature diurnal and semidiurnal variations to 30 km altitude over tropical western Pacific, considering atmospheric model based on linearized equations of motion

07 p1029 A72-19099

Time-spectral characteristics and geographic variations of large scale cloud activity in tropical Pacific

12 p1837 A72-27018

Pacific Ocean meteorological data collection from military and civil aircraft in-flight reports, discussing computer processing for daily analysis and monthly and seasonal means

13 p1994 A72-28874

PACKAGES

NT APOLLO LUNAR SURFACE EXPERIMENTS PACKAGE

NT EASEP

NT INSTRUMENT PACKAGES

PACKAGING

NT ELECTRONIC PACKAGING

Air cargo intermodal and interline containers handling in warehouse storage, transportation and distribution, considering total pack and interlock requirements

16 p2372 A72-33174

PACKING DENSITY

MnBi magnetic film optical memory system characteristics evaluation, considering laser power requirement, bit packing density and SNR [IEEE PAPER 3.4]

03 p0332 A72-13754

Holographic optical techniques application to bulk magnetic storage for high information density and memory capacity and fast random access [IEEE PAPER 19.4]

03 p0361 A72-13776

Temperature and compression rate effects on metal powder packing density, obtaining activation energy from Boltzmann equation

05 p0665 A72-16089

Transition metals and alloys electron structure and packing defect energy theory, discussing crystal atomic interactions and brittle breakdown

07 p1049 A72-20148

Semitransparent particle model of Martian surface for reflective power at various incidence and reflection angles, discussing packing density and optical parameters

08 p1231 A72-21126

Small impurity amounts effect on packing defect density and deformation energy in Ni

08 p1188 A72-21791

Fast IC signal delay time reduction by high packing density, discussing yield, power dissipation and cost problems

09 p1290 A72-22820

Limitations in microelectronics. II - Bipolar technology.

18 p2667 A72-36980

Advanced optical storage techniques for computers.

23 p3288 A72-43876

PACKINGS (SEALS)

Thermocrazing and thermal stresses in packing rings of face-type mechanical seals under dry friction

08 p1177 A72-21927

PADE APPROXIMATION

Ground state energy of interacting electrons for entire density range from two-point Pade approximation

04 p0549 A72-15229

Pade table for formal power series with notation for extension to Laurent series, relating algebraic theory to bigradient determinants and numerical analysis algorithms

11 p1676 A72-25501

Approximate representation of a type of transcendental polynomials describing wave systems with fractional rational functions

19 p2834 A72-37751

PAGEOS SATELLITE

Europe-Africa geodetic link in spatial triangulation of passive Pageos satellite, discussing laser telemetry operation

04 p0520 A72-15725

Pageos balloon satellite orbital perturbations due to erratic solar radiation pressure induced accelerations, comparing modified Smith perturbation model calculations with photometric observations

15 p2228 A72-31975

PAIN

Negative /painful/ stimulus cessation relation to emotionally positive zone activation in rat brain during self stimulation experiments

20 p2892 A72-39410

PAIN SENSITIVITY

Nociceptive chemical action in cat skin vessels, showing fiber types for impulse transmission

02 p0164 A72-12511

Analgesic electrical stimulation in rat brainstem with other sensory modes unaffected

04 p0475 A72-15361

Cardiac membrane pain sensitivity in vagotomized cats under sensitizing acetylcholine influence during reduced cholinesterase activity

13 p1905 A72-29329

Microwave induced cutaneous heat and pain perception thresholds, noting usefulness as possible radiation hazard warning

15 p2188 A72-31506

Vicarious influence effect on eliciting pain in individuals subjected to previously reported nonpainful electric shocks

18 p2654 A72-36916

Pain perception anatomical and neurophysiological mechanism, discussing human response to mechanical, thermal and chemical pain inducing stimuli

22 p3146 A72-42780

PAINTS

Paint coatings aging effect on D16T type alloy corrosion fatigue in NaCl solution, noting protective efficiency decrease

13 p1984 A72-29486

Factors affecting phase-change paint heat-transfer data reduction with emphasis on wall temperatures approaching adiabatic conditions. [ALAA PAPER 72-1030]

24 p3389 A72-45407

PAIR PRODUCTION

Electron emission in strong electromagnetic waves within quantum electrodynamics, discussing energy losses and electron pair production

03 p0415 A72-13003

Vacuum UV irradiation of silicon dioxide, discussing positive charging for photon energies above threshold for electron-hole pair creation

03 p0403 A72-14080

High energy hadrons time structure in extensive air showers, considering production of nucleon-antinucleon pairs in particle interactions

07 p1067 A72-20687

Nonthermal ultrarelativistic plasmas covariant analysis with quantum electrodynamics and Green function theory of nonequilibrium statistical mechanics, discussing electron-positron pair production and annihilation

10 p1525 A72-25100

Ion pair production rate and electron number density in ionospheric D region from ground based and rocket measurements, discussing two ion model

15 p2229 A72-32252

Oxygen atom electron affinity calculation by symmetry-adapted pair correlation approximation, using pseudonatural orbitals /PSNO/ technique

15 p2282 A72-32644

Pulsar properties correlation with radially oscillating coherent plasma of electron-positron pair production by strong electric field around central object

19 p2859 A72-37892

Stellar energy-loss rates in a convergent theory of weak and electromagnetic interactions.

20 p2972 A72-39868

Particle production in inelastic high energy interactions, noting correlation between particle pairs and groups

23 p3330 A72-44407

PALEOMAGNETISM

Geomagnetism, discussing world field distribution, secular variation, paleomagnetism, archaeomagnetism, origin, magnetic anomaly and earth electromagnetic induction

01 p0053 A72-10168

Magnetic properties and paleomagnetic data of Permian Cutler and Elephant Canyon formations in Utah, discussing thermal demagnetization and origin of stable magnetization

09 p1305 A72-23668

Changes in total magnetic energy stored outside earth core accompanying earth dipole field decreases over 60 years period from paleomagnetic measurement

11 p1623 A72-26108

Abridged version of 1970 Soviet conference on constant geomagnetic field and paleomagnetism, reviewing secular variation data

13 p1946 A72-28588

On the applicability of lunar breccias for paleomagnetic interpretations.

22 p3226 A72-42532

Magnetism of meteorites - A review of Russian studies.

23 p3339 A72-44129

Abridged version of 1970 Soviet conference on constant geomagnetic field and paleomagnetism, reviewing secular variation data

24 p3397 A72-45088

PALEONTOLOGY

Molecular paleontology of fossil organic remnants in Molluscan shell proteins

04 p0467 A72-14753

Monograph on Jurassic and Cretaceous Hagiastriidae from Blake-Bahama Basin and Great Valley Sequence in California

04 p0519 A72-15255

Paleomicrobiological analysis of northwest Scotland Stoor Formation black shale pre-Paleozoic spheroidal unicellular fossils as probable form of marine phytoplankton

05 p0655 A72-16042

Precambrian paleobiological history from fossil records, discussing heterotrophic living systems and eucaryote emergence in evolutionary organization development

08 p1162 A72-22000

Ultrastructure and geologic relations of some two-aeon old Nostocacean algae from northeastern Minnesota.

17 p2544 A72-34336

PALLADIUM

Electron probe microanalysis of Mo-Pd system diffusion at 1000-1600 C, measuring chemical diffusion coefficient as function of temperature, concentration and activation energy

13 p1978 A72-29221

Thermodynamic properties of liquid Co and Pd metals by levitation calorimetry, including specific heat, heats of fusion and surface emissivities

16 p2480 A72-34025

PALLADIUM ALLOYS

Alloying and heat treatment ordering effect on hydrogen diffusion coefficients, penetrability and solubility in Pd-Ag alloys

03 p0376 A72-14016

Soft X ray emission spectra from Al-Nb and Al-Pd alloys, deducing electron state density near Al ions

09 p1371 A72-22848

Diffusion measurements during annealing of Pd-V, Pd-Ti and metal-ceramic systems by microprobe

11 p1664 A72-26853

Interdiffusion in nickel-molybdenum and palladium-molybdenum systems

20 p2939 A72-39315

Phase diagrams, solubility and alloying of Pt, Pd, Ru, Ir and Rh with noble, alkali earth, rare earth and transition metals

22 p3191 A72-42810

PALLADIUM COMPOUNDS

Phase diagram of Ti-Pd system, using metallographic, X ray and differential thermal analyses

13 p1982 A72-30116

Pd-Al intermetallic compound contact materials.

18 p2698 A72-35985

PALMAR SWEAT INDEX

Galvanic skin response techniques for palmar and dorsal sweat detection during motion sickness by vestibular stimulation, comparing arousal and thermal sweat response

07 p0933 A72-20185

PAM (MODULATION)

U PULSE AMPLITUDE MODULATION

PANCREAS

Parenterally introduced protein hydrolyzates and aminopeptides influence on human pancreas enzyme secretion activity

09 p1268 A72-23595

Noninvasive polygraphic technique to assess cardiovascular responses to intravenous glucagon injection 13 p1901 A72-28570

Pancreas insular apparatus biosynthesis of neurohumoral mechanism compounds stimulating coronary ectasia hormones discharge from brain into blood in cats with alloxan diabetes 14 p2077 A72-30973

PANEL FLUTTER

Rigid boundary effect on thin panel flutter speed, determining aerodynamic forces via linearized potential theory 03 p0443 A72-13402

Flutter of thin homogeneous isotropic cylindrical panels from analog computer study 04 p0593 A72-15646

Minimum weight panel designs subject to supersonic flutter constraint, approximating governing differential equations by difference equations [AIAA PAPER 72-170] 05 p0741 A72-16908

Nonlinear mode coupling in equations of motion for thin panel vibration as function of membrane stretching-bending energy ratio 09 p1408 A72-23465

Hypersonic nonlinear aerodynamic loading effect on panel flutter, examining stability for various initial conditions [AIAA PAPER 72-345] 11 p1728 A72-25374

Orthotropic point-supported rectangular panel vibration and flutter analysis for natural frequencies and flutter boundaries, applying to space shuttle design [AIAA PAPER 72-350] 11 p1728 A72-25379

Computerization of panel flutter boundary calculations with aerodynamic forces derived from linear three dimensional unsteady potential flow theory [AIAA PAPER 72-403] 11 p1731 A72-25424

Cylindrical panel natural vibrations, describing motion of base with dynamic elasticity equations 11 p1733 A72-25539

Pressure law for flow between two parallel plates describing medium action on plates, noting plate flutter analogy to buckling 13 p2056 A72-29002

Panel-flutter analysis of a thermal protection-shield concept for the space shuttle. 20 p2980 A72-39623

Nonlinear natural vibrations of rectangular plates and cylindrical panels 22 p3242 A72-43134

Aeroelastic optimization of a panel in high Mach number supersonic flow. 23 p3343 A72-43327

Supersonic flutter of plane, rectangular, anisotropic, heterogeneous structures 24 p3459 A72-45440

PANELS

NT CURVED PANELS

NT RECTANGULAR PANELS

NT WING PANELS

Ti alloy honeycomb core sandwich panels fabricated by brazing or spot diffusion bonding, investigating elevated temperature effects on mechanical properties [ASM PAPER W 71-23,3] 01 p0086 A72-10875

Circular cylindrical sandwich panel and rectangular sandwich plates dynamic stability under periodic external loads derived from mathematical model 02 p0298 A72-12664

Dynamic buckling of shallow circular cylindrical hinged panel under axial compression 08 p1249 A72-22087

Vibration characteristics of unidirectional filamentary boron-epoxy composite panels, obtaining nodal patterns, natural frequencies and damping coefficients 11 p1732 A72-25477

Dynamic buckling of shallow circular cylindrical hinged panel under axial compression 17 p2626 A72-34665

Buckling of plates and cylindrical panels under the action of axial dynamic compression 22 p3232 A72-41923

Diffusion bonded columbium panels for the shuttle heat shield. 24 p3406 A72-44889

PANORAMIC CAMERAS

Panoramic aerial cameras with revolving objective or mirror, presenting formulas for photoimage plots geometric characteristics 09 p1308 A72-22487

Cartographic and environmental surveys by Skylab orbiting stations and ERTS satellite using panoramic and mapping cameras and laser altimeter 15 p2232 A72-31247

Central band-type wide angle camera shutter design, noting stress examination in machine parts by optical method 21 p3052 A72-40306

PANORAMIC SCANNING

Photogrammetric coordinate relation of points on lunar surface and stereo panoramas of scanning photographs by Luna 9 and 13 orbiters 05 p0660 A72-15832

PAPILLAE

Human taste papillae sensitivity to chemical stimuli, showing stable quality and intensity response patterns 05 p0620 A72-17129

Force-velocity relations in cat papillary muscles isotonic relaxation, discussing effects of preloads and afterloads, temperature and stimulation frequency 09 p1265 A72-22864

PARABOLIC ANTENNAS

Radio telescopes quality criteria, noting performance dependence on antennas dimensions and distribution 01 p0047 A72-10194

FM radio link superposed parabolic antenna systems adjustment for space diversity reception for scatter propagation and broadband multichannel transmission in 1.9 GHz range 01 p0027 A72-10410

Radome enclosed Haystack parabolic antenna characteristics as radio astronomical instrument, discussing gain, polarization, interference susceptibility and noise temperature [AD-737166] 01 p0032 A72-11233

Prime focus paraboloid antenna performance with cylindrical hybrid mode feeds, detailing radiation patterns and distribution 02 p0173 A72-12110

ATS F and G ground station mobile terminal, discussing system flexibility, utility and reliability features and parabolic antenna design 04 p0485 A72-14478

Frequency characteristics of selectively reflecting screens in multichannel parabolic mirror antennas and determination of Fresnel coefficients dependence on polarized plane wave incidence angle 04 p0499 A72-15241

Radiation pattern of radio astronomical paraboloidal reflector antenna in Dwingeloo, Netherlands, determining directivity and beam efficiency 04 p0501 A72-15423

Optimal design of directive dielectric loaded circular waveguide antenna for parabolic reflectors and radar detection 06 p0782 A72-17356

Interferometric measurement at 1415 MHz of radio telescope paraboloidal antenna radiation pattern, using cosmic radio sources with known flux density as signal source 07 p0945 A72-19789

Parabolic antenna instantaneous phase center calculations, using radiation patterns from aperture field and current distribution methods 08 p1138 A72-20744

Aperture filtering effects on amplitude scintillation power spectra of paraboloid radio telescope over millimeter wave propagation path 08 p1136 A72-21982

Hoghorn parabolic antenna design, presenting relations for dimensions, aperture field and radiation patterns calculation by computer 09 p1284 A72-22242

Radiation pattern determination parabolic Cassegrain radio telescope reflector antennas from Fresnel zone emission source, using holographic technique 10 p1482 A72-24783

Earth station parabolic antenna gain-noise temperature ratio measurement using radio star and Applications Technology Satellite technique [AIAA PAPER 72-528] 12 p1779 A72-27354

Directional and mode characteristics of coaxial exciter for high area utilization and low halation paraboloid antennas 12 p1793 A72-27812

Electromagnetic cylindrical wave diffraction by linear emitter in parabolic cylinder with slots 13 p1917 A72-28709

Design of parabolic reflector antenna with pyramidal horn radiator closed by quadratic waveguide, calculating radiation pattern 13 p1929 A72-29039

Parabolic, Cassegrain, spherical and horn-parabolic axisymmetric mirror antennas, calculating primary radiating element orientation effects on radiation polarization characteristics 13 p1931 A72-29277

Radiation pattern reconstruction of radio telescope parabolic Cassegrain reflector antennas from Fresnel zone emission source, using holography and optical processing 14 p2103 A72-30221

A new project of 8-cm radioheliograph. 18 p2691 A72-36434

Coaxial exciter for parabolic antennas with high area efficiency and small halation 21 p3029 A72-40514

Combination of sum and difference diagrams of a dipole group in front of a parabolic reflector for a two-plane monopulse method 21 p3029 A72-40517

Near-field Cassegrain antennas of high surface efficiency for satellite communication links 21 p3029 A72-40520

Focus field and horn exciter regarding parabolic antennas with small f/D-relation 21 p3029 A72-40523

Low noise receiver for satellite broadcasting. 21 p3019 A72-40886

A dual frequency, dual polarized feed for radioastronomical applications. 21 p3034 A72-41400

PARABOLIC BODIES

Navier-Stokes equations numerical solution for laminar incompressible flow past paraboloid of revolution at zero angle of attack 05 p0604 A72-16818

Steady two dimensional symmetric viscous flow past parabolic cylinder in uniform stream, correlating calculated nose skin friction with boundary layer theory 05 p0610 A72-17012

Navier-Stokes equation solution for laminar incompressible flow past parabolic cylinder, investigating skin friction and pressure drag 06 p0798 A72-17782

Equilibrium equations for thin walled shallow paraboloid shell of revolution, solving boundary value problem for edge fastened loaded circular planform region 07 p1091 A72-19757

Navier-Stokes equations numerical solution for symmetric laminar incompressible flow past parabolic cylinder, presenting surface pressure, friction and pressure drag results 10 p1465 A72-24291

Numerical calculation of the supersonic flow of a viscous fluid about a parabolic obstacle 17 p2484 A72-34887

PARABOLIC DIFFERENTIAL EQUATIONS

Elliptic and parabolic partial differential difference equations solution using modified random walk Monte Carlo technique 01 p0093 A72-10858

Monte Carlo methods for hybrid computer solution of nonlinear parabolic partial differential equations with two spatial dimensions 02 p0186 A72-11657

Markov chain successive approximation method for electromagnetic wave propagation in medium with random large discontinuities, using scalar parabolic equation 02 p0181 A72-12588

Hybrid computer for solving complex problems in distributed parameter systems in terms of parabolic differential equations 02 p0188 A72-12655

Quasi-linear parabolic equations, investigating conditions for Cauchy-Dirichlet problem solution 03 p0383 A72-14380

Second order parabolic equations C auchy problem solution with dissipation level, using maximum principle 04 p0538 A72-14626

Iterative procedure for computing optimal controls in distributed parameter systems described by linear parabolic differential equations, applying to metal slab temperature profile problem 04 p0504 A72-14664

Hyperbolic and parabolic partial differential equations behavior comparison by studying point-to-point time optimal control for heat conduction and vibrating string motion 04 p0505 A72-14673

Quasi-linear parabolic equations loaded system first boundary value problem for heat and mass transfer equations inverse problems 04 p0540 A72-15545

Similarity and finite difference solutions of parabolic differential equations, exemplifying by heat conduction and boundary layer equations [ASME PAPER 71-WA/APM-6] 05 p0682 A72-16151

Optimal control of system described by parabolic partial differential equations with constraints on change rate of boundary conditions 05 p0683 A72-17137

Regularity of nonunique solutions of degenerate elliptic-parabolic partial differential equations systems without compactness requirement for associated differential quadratic form 06 p0839 A72-17627

Validity proof of asymptotic methods in oscillation theory of one dimensional nonlinear dynamic systems described by hyperbolic and parabolic differential equations 06 p0839 A72-17681

Large deformations of incompressible isotropic materials with parabolic stress-strain relations, deriving constitutive equation from strain energy function 06 p0848 A72-17919

Dynamic programming for optimal stochastic control problem with Gaussian shot noise involving parabolic or elliptic differential equation in unbounded domain, discussing iterative solution and quasi-linearization 07 p1027 A72-19292

Parabolic differential equation system for boundary layer behavior of steady plane gas flow 08 p1107 A72-20911

Convergence and stability criteria of monotonic difference schemes for linear parabolic differential equations with interface boundary conditions

08 p1199 A72-21286

Boundary value problem for degenerate quasi-linear parabolic differential equation, showing solution existence and smoothness dependence on region width

09 p1342 A72-23485

Total variation of parabolic equations solutions, noting upper bound and explicit results for Cauchy and mixed problems

09 p1343 A72-23587

Finite amplitude disturbances effect on plane Poiseuille flow hydrodynamic stability, presenting numerical method for solving parabolic partial differential equations derived from Navier-Stokes equation

10 p1468 A72-24422

Generalized Fourier transformation method for mixed boundary value problems of second order parabolic differential equation in unbounded region, noting singular differential operator

12 p1837 A72-27998

Hybrid computer Monte Carlo solution algorithm for parabolic partial differential equations with time varying boundary conditions, applying to ferromagnetic rod magnetization problem

12 p1787 A72-28119

Successive approximation for solving parabolic equation with abstract function, using Chaplygin method for Cauchy boundary value problem in Banach space

13 p1987 A72-29646

Many-term formulas for parabolic differential equations solution in boundary layer theory, using linearized second order ordinary differential equations

15 p2216 A72-31467

Optimal controller design for parabolic type second-order linear stationary systems, discussing integro-differential equation solution possibility

15 p2211 A72-32170

Parabolic differential equations to define exponential spatial decay of heat equation solutions, replacing Edelstein energy estimate by time-independent estimate

16 p2475 A72-33005

The approximate solution of parabolic initial-boundary value problems by weighted least-squares methods.

17 p2573 A72-34217

A priori estimates and nonlinear parabolic equations of arbitrary order.

17 p2577 A72-35796

Approximation by fractional steps of control problems governed by parabolic equations and with boundary control

19 p2825 A72-37786

Investigation of generalized and classical solutions of a mixed boundary value problem in a finite domain for one class of nonlinear second-order parabolic equations

19 p2827 A72-38448

Hybrid computer Monte Carlo solution algorithm for parabolic partial differential equations with time varying boundary conditions, applying to ferromagnetic rod magnetization problem

19 p2770 A72-38620

A boundary value problem for a mixed-type equation with two perpendicular parabolic-degeneration lines

19 p2828 A72-38630

A table of solutions of the one-dimensional Burgers equation.

19 p2828 A72-38717

Fractional steps method of difference schemes for approximate numerical solution of parabolic and elliptic initial boundary value problems

20 p2945 A72-39327

Problem of the analytical design of controllers for parabolic and hyperbolic equations

20 p2946 A72-39468

A method for determining the motion in a laminar boundary layer.

21 p3045 A72-40813

Book on nonhomogeneous boundary value problems for different classes of linear evolution parabolic operators, with applications to optimal control problems

21 p3076 A72-41527

Steady state or periodic solution to initial-boundary value problems for heat conduction equation with nonlinear terms and boundary conditions

21 p3131 A72-41667

Asymptotic representation of the solution of a boundary value problem for a biharmonic equation degenerating into a fourth-order parabolic equation

22 p3198 A72-41899

A calculation procedure for heat, mass and momentum transfer in three-dimensional parabolic flows.

22 p3243 A72-41954

Optimal controller design for parabolic type second-order linear stationary systems, discussing integro-differential equation solution possibility

22 p3162 A72-42079

A priori estimates and Harnack's inequality for general solutions of second-order degenerate quasilinear parabolic equations

22 p3198 A72-42159

Book - The method of fractional steps: The solution of problems of mathematical physics in several variables

22 p3208 A72-43200

Asymptotic behavior of solutions of nonlinear parabolic equations.

23 p3309 A72-43979

The first initial-boundary value problem for a nonuniform parabolic equation.

24 p3419 A72-45631

Straightforward difference scheme for nonlinear parabolic equations in polar coordinates

24 p3420 A72-45649

PARABOLIC FLIGHT

Sjoberg hypothesis for zero gravity produced inversion illusion mechanism in aircraft parabolic flight, noting otolithic membrane deflection result of force on maculae

02 p0167 A72-11710

Two step spacecraft reentry guidance involving skip trajectory at parabolic speeds, proposing algorithm for running coordinate and speed vector components values

11 p1684 A72-26896

Spacecraft roll stabilization during parabolic earth atmosphere reentry, developing single parameter multistep algorithm

11 p1684 A72-26897

Parabolic velocity atmospheric reentry navigation algorithm for spacecraft control, demonstrating guidance accuracy to landing point

11 p1684 A72-26899

PARABOLIC REFLECTORS

NT PARABOLOID MIRRORS

Feed requirements and design of Effelsberg radio telescope with parabolic reflector operating down to 1 cm wavelengths

01 p0040 A72-10676

Metrology and radio performance of steerable antenna paraboloidal reflector, considering profile measurements by optical range finder and laser methods

04 p0493 A72-15518

Radio telescope for cosmic radio emission reception at 50-2 cm wavelengths, describing parabolic and auxiliary reflectors

07 p0965 A72-20299

Conical scalar horn for paraboloidal reflector illumination, discussing half flare angle calculation for prescribed sidelobe realization

10 p1435 A72-24302

Arecibo Observatory radio-radar telescope design and operation, discussing reflector wire mesh surface, computer control and data acquisition, ionosphere and pulsar studies and interferometry

10 p1459 A72-24310

Isolation between two orthogonally polarized beams radiated by single paraboloidal reflector, discussing polarization coupling to earth receiving antenna

12 p1789 A72-27356

Waveguides for primary and hybrid mode horns for secondary feeders of deep paraboloid reflector radio telescope in Effelsberg, West Germany

12 p1793 A72-27811

Design of parabolic reflector antenna with pyramidal horn radiator closed by quadratic waveguide, calculating radiation pattern

13 p1929 A72-29039

Parabolic reflector fed by log-periodic dipole antenna array, predicting combined effects of feed phase center lateral and axial displacement on secondary performance

15 p2205 A72-31541

The analysis of deployable umbrella parabolic reflectors.

17 p2524 A72-34351

Technique for compensating for reflector-antenna-surface errors with long correlation lengths.

18 p2667 A72-36691

Cross polarizing effects of a water film on a paraboloid reflector at microwave frequencies.

21 p3027 A72-40375

Combination of sum and difference diagrams of a dipole group in front of a parabolic reflector for a two-plane monopulse method

21 p3029 A72-40517

Spherical reflector as possible antenna for millimeter wave astronomy, discussing feed design for spherical aberration corrections

21 p3029 A72-40519

A 3-meter Cassegrain antenna for the frequency range from 2.1 to 2.3 GHz

21 p3029 A72-40521

A polydirectional antenna in polygon reflector design with cosecant-type elevation directional diagram for providing television in the 12-GHz frequency range

21 p3029 A72-40524

Main-reflector-rim diffraction in back direction.

21 p3032 A72-40632

German monograph - Electromagnetic wave propagation inside a paraboloid of revolution subjected to different types of excitation.

22 p3156 A72-43070

Simple small primary feed for large opening angles and high aperture efficiency.

24 p3385 A72-44961

PARABOLIC VELOCITY U ESCAPE VELOCITY PARABOLOID MIRRORS

Long wavelength focusing collector for X ray astronomy with effective bandpass of 100-280 eV determined by low energy transmitting contour windows and paraboloid mirror reflectivity

03 p0353 A72-13040

Optical properties of paraboloid-hyperboloid mirror X ray telescopes evaluated by ray tracing method, noting resolution and focal plane curvature approximation

07 p0985 A72-19405

Focal length determination for on-axis parabolic mirrors by He-Ne laser reflection

09 p1315 A72-23352

Paraboloid and elliptical mirrors in 100 m radio telescope for Helios space probe signals reception, noting device compatibility for data exchange with NASA

13 p1939 A72-28964

Spacecraft onboard compact low-power coherent optical data processing system, using GaAs laser and paraboloid mirror segments

15 p2248 A72-32052

Book on Soviet astronomical reflecting telescopes, paraboloid mirrors, computer control, microphotometers and image converters

17 p2553 A72-34623

Design of an inexpensive, 30 cm diameter, long path difference interferometer.

17 p2553 A72-34640

PARABOLOIDS U PARABOLIC BODIES PARACHUTE DESCENT

Paratroop type parachutes breathing oscillations and stability characteristics, using high speed cinematography and kinetheodolites to track during steady state descent

01 p0004 A72-10307

Parachutes flow characteristics in low speed free descent, discussing glide angle effect on total drag and water channel flow pattern studies

01 p0004 A72-10309

Parachute opening shock and filling time calculation based on aerodynamic drag, air mass and effective porosity time functions, using momentum and continuity equations

01 p0004 A72-10310

Parachute inflation loads and times, presenting calculation method based on unsteady pressure distribution on decelerating inflating parabolic shell of revolution with unsteady starting vortex

01 p0004 A72-10311

Heart and respiration rates response to free fall parachuting, using FM/FM telemetry

02 p0167 A72-11709

Parachuting and aerial towing physiological and force data FM telemetry for biomedical response assessment leading to human engineered equipment improvement and midair retrieval system development

02 p0168 A72-12138

Human coagulating and anticoagulating blood system changes due to emotional stress during parachute jumps, noting plasma recalcification time increase

04 p0474 A72-15233

Thermodynamic parameters correlation of planetary atmosphere with planetary probe parachute descent rate applied to Venera 5 and 6 data

05 p0721 A72-16769

Parachute design for very high altitude sounding rockets, discussing stability and descent velocity requirements and test methods

07 p1085 A72-19604

Boron/potassium nitrate parachute mortar design for aircraft and spacecraft applications, comparing with high-low propellant

08 p1221 A72-20783

Emergency systems for helicopter crew and passenger survivability improvement, discussing use of ejection seats, extraction systems parachute bail-out and shaped explosive charges

08 p1109 A72-21581

Physiological index changes in parachutists of various ages, considering plasma recalcification, blood prothrombin, heparin time, fibrinolytic activity, pressure and heart beat

11 p1590 A72-26988

Pulse-sounding position finding device for light parachute probes conducting ionospheric studies, discussing design features

13 p1922 A72-29350

Planetary atmosphere thermodynamic parameters correlation between spacecraft parachute descent rate and measured data, noting Venera spacecraft example

17 p2610 A72-35272

Investigation of the parachute inflation aid utilizing liquid vapor pressure. 22 p3139 A72-43141

PARACHUTE FABRICS
Ground test determination of design data for low supersonic high density air deployable deceleration systems, considering high strain rate effects on parachute materials 01 p0005 A72-10313
Parachute canopy fabrics and rigging lines cordage properties requirements, considering nylon, polypropylene, silk, cotton and nonwoven scrim-reinforced fabrics 01 p0005 A72-10314
Nylon parachute materials failure mechanics, considering friction, light, chemical and thermal effects 01 p0005 A72-10316
Statistical methods application to parachute materials evaluation, using factorial experiments for multiple variables simultaneous effects analysis 01 p0005 A72-10317

PARACHUTES
NT DRAG CHUTES
NT RECOVERY PARACHUTES
NT RIBBON PARACHUTES
Parachutes and related technologies - Conference, London, September 1971 01 p0003 A72-10301
Parachute designs and applications to escape systems, paratrooping, supply dropping, aircraft braking, weapons systems stabilization, flight testing aids and sport 01 p0003 A72-10302
Nonporous rigid parachute models three component measurements, using low speed wind tunnel for testing skirt length effects on aerodynamic characteristics 01 p0003 A72-10303
Industrial parachute R and D in UK, discussing management, technical staff requirements and government/industry liaison 01 p0004 A72-10304
Axial cords effects on parachute drag and stability characteristics and opening time, discussing wind tunnel and balloon drop tests results 01 p0004 A72-10306
Ionospheric ion mobilities and densities measurements over Sardinia, using parachute mesosphere probe 01 p0055 A72-10436
Lower D region ion density measurement with parachuted blunt probe consisting of disk-shaped collector with guard ring at bottom 03 p0347 A72-13398
Parachute design for very high altitude sounding rockets, discussing stability and descent velocity requirements and test methods 07 p1085 A72-19604
Pneumatically assisted parachute deployment at high altitudes with low accelerations 10 p1421 A72-24273
Incompressible potential flow model of porous parachute canopy flow field, using Stokes stream function for axisymmetric vortex sheet in uniform steady stream 12 p1755 A72-28123

PARACHUTING
U PARACHUTE DESCENT
PARACHUTING INJURY
Chin-sternum-heart syndrome from partial parachute failure, with close reference to atrial endocardial and myocardial lacerations 02 p0167 A72-11711

PARADOXES
Heat conduction in infinite incompressible fluid with turbulent velocity field, deriving physically impossible growth in time of long-wavelength modes of average temperature 16 p2424 A72-33127

PARAFFINS
Acoustic measurement of solid-liquid interface motion and solidification during freezing of Hg and paraffins 10 p1563 A72-25044

PARAGLIDERS
NT FLEXIBLE WINGS
NT PARAWINGS

PARALLAX
RR Lyrae stars absolute magnitude determination by statistical parallaxes method 03 p0421 A72-13139
Three dimensional hologram synthesis from two dimensional pictures with parallax preservation [AD-736057] 03 p0359 A72-13448
Pinhole, fly-eye and holographic stereogram methods, examining resolution relationships, horizontal and vertical parallax and aberrations 05 p0663 A72-16673
Visual binary star investigations, considering parallaxes, masses, absolute magnitudes and orbit computation 09 p1390 A72-23502
Extragalactic eclipsing binaries parallax determination by Gaposchkin method, noting application to distance determination of nearby galaxies 10 p1549 A72-25057

Visual depth perception response functions for sine and square wave modulated binocular parallax 17 p2498 A72-34293
Ground based optical astronomy developments, emphasizing faint objects positional observation, trigonometric parallaxes, data analysis and measuring techniques 19 p2865 A72-38477
Visual stimuli distance estimation with head stationary or moving, discussing performance after monocular motion parallax training 24 p3374 A72-44557

PARALLEL PLATES
Temperature dependent gas internal diatomic laminar heat transfer, investigating continuity, energy, momentum for two dimensional flow between heated parallel plates [ASME PAPER 71-HT-N] 02 p0302 A72-12317
MHD flow development in parallel plate channel entrance region, obtaining numerical solution for velocity distribution, pressure drop and length at different Hartmann numbers 02 p0266 A72-12493
Velocity and temperature distributions for unsteady plane Poiseuille flow of viscous incompressible fluid between two parallel plates 03 p0340 A72-13000
Radiation pattern from open ended parallel plate waveguide with arbitrary electric or magnetic aperture field distribution, using Wiener Hopf technique 03 p0331 A72-13409
Separation measurement between two distant partially reflecting parallel surfaces using Michelson interferometer 03 p0358 A72-13435
Rarefied gas heat transfer problem between two parallel plates of different temperatures, evaluating nonlinear Boltzmann equation with Monte Carlo techniques 04 p0595 A72-14599
Lens waveguides characteristics, analyzing Gaussian beams propagation through periodic system of thin plane-parallel nonlinear dielectric plates 04 p0489 A72-15389
Confined laminar jet mixing of two uniform streams flowing in parallel plate channel, obtaining velocity field from linearized governing equation [ASME PAPER 71-WA/APM-2] 05 p0647 A72-15973
MHD squeeze film lubrication between electrically conducting parallel plates, showing graphically approach time under magnetic field in free space 05 p0665 A72-16031
Plane Couette flow of incompressible non-Newtonian viscous fluid between parallel plates, using minimum entropy production variational principle 06 p0798 A72-17779
Parallel plate waveguide radiation into dielectric or plasma layer, using Hilbert formulation 06 p0791 A72-18734
Heat transfer in thermal entrance region with turbulent flow between parallel plates, solving energy equation by difference methods 07 p1099 A72-19622
Open ended parallel plate waveguide, calculating radiation pattern variation with diaphragm dimension 07 p0945 A72-19663
Tensile load elastostatic transfer from rectangular cross section web to two infinite parallel sheets, deriving Cauchy type integral equation for adhesive bond force density 07 p1095 A72-20241
Al alloys welding with Pb sheathed linear ribbon RDX explosives by parallel plate process, achieving high weld strength 08 p1173 A72-20779
Induced nonuniform magnetic field effects on MHD channel flow between two infinite parallel plates, obtaining solution by perturbation theory 08 p1214 A72-21427
Steady state and temperature relaxation of rarefied gas between two plane parallel plates 08 p1211 A72-21871
Ruby laser power output losses at 80 K with spectral line suppression dependence on surface reflection coefficient of plane parallel plate in resonator 08 p1183 A72-22026
German monograph on radiation characteristics of planar systems in aperture plane of parallel plate waveguide, obtaining relationship between electric and magnetic fields 10 p1434 A72-23775
Computer storage array of isolated electrodes imbedded between capacitor parallel plates, discussing read-write cycle time, expected performance and experimental techniques 10 p1443 A72-23933
Heat transfer between alternating hot and cold parallel plates of constant temperature situated in low density gas 10 p1562 A72-24537
Kinetic model for polyatomic gas heat transfer between parallel plates, considering boundary value problem with arbitrary accommodation coefficients 11 p1744 A72-25559

Diffusion with convection for parallel wall Couette flow, using Airy functions 11 p1618 A72-26591
Luminosity distribution in plane of image produced by radiation from plane parallel plate, taking into account rays real path 13 p1955 A72-28498
Nonuniform inlet velocity profile effect on laminar flow development between parallel plates, solving equations by finite difference method 13 p1941 A72-28706
Uniform suction effect at stationary plate on longitudinal and transverse velocities of plane Couette flow between parallel plates 13 p1941 A72-28884
Pressure law for flow between two parallel plates describing medium action on plates, noting plate flutter analogy to buckling 13 p2056 A72-29002
Scattering matrix derivation for parallel plate waveguide array terminated in infinite plane, determining neighboring guides TEM modes mutual coupling 13 p1921 A72-29345
Numerical integration of boundary layer equations through region of reverse flow past parallel flat plate with negative surface velocity 13 p1944 A72-30033
Interferometric investigation of temperature fields and heat transfer in air layers between vertical, inclined and horizontal parallel walls 14 p2170 A72-30251
German monograph on optical transmission measurement interferometer with plane-parallel birefringent crystal plates covering plate combination selection based on interference pattern mathematics 15 p2233 A72-31525
Convective heat transfer in fully developed MHD channel flow between two parallel electrically conducting plates 15 p2335 A72-31636
Steady state electron mean energy variation between parallel plates in Ar and He calculated by Monte Carlo simulation for comparison 15 p2285 A72-32222
Flow theory improvement for laminar radial flow between parallel plates, considering inertial effects 15 p2219 A72-32479
Time behavior of two dimensional laminar free convection flow between heated vertical parallel plates, calculating temperature and velocity distributions as function of Grashof number 16 p2477 A72-33426
On the behavior of thin-wire antennas and scatterers arbitrarily located within a parallel-plate region 17 p2513 A72-34365
Certain motions of micropolar fluids 17 p2538 A72-34771
Unsteady temperature distribution for laminar flow in a porous straight channel 17 p2541 A72-35434
Hydromagnetic flow between two rotating disks with noncoincident parallel axes of rotation 19 p2841 A72-38436
Radiation heat transfer between closely spaced metal surfaces at low temperature - The impact of discrete modes of the radiation field. 20 p2983 A72-39483
Subharmonic generation in plane-parallel plate for light wave propagation perpendicularly to plate, noting frequency division near multiplicative resonance 23 p3295 A72-43408

PARALLEL PROCESSING [COMPUTERS]
Parallel digital computer application to radar tracking data processing, discussing system design for efficiency maximization and performance, desensitization in traffic level fluctuation 15 p2203 A72-31781
Array processor design for massive computation, discussing special purpose satellite computer for communication with main memory through multiple module access units 16 p2366 A72-33242
Univac 1832 multiprocessor avionics computer for airborne ASW, discussing input/output controllers and interfaces and IC design features 16 p2367 A72-33245
Solution of the problem of a fast Fourier transform in a homogeneous associative parallel processor 19 p2779 A72-37993
Future trends of airborne computers. 20 p2905 A72-39109
Digital computer hierarchical structure based on tree model using request/service resources as nodes, examining parallelor multiple-stream organizations effectiveness 20 p2906 A72-39735
Microminiaturization, microprogramming, multiprocessing, and processing and memory module design technology of aerospace computers in different size ranges 21 p3025 A72-41113
Digital data system with real time displays and multiprocessing capability for multitest of aircraft struc-

ture with operational manpower reduction, assessing performance 22 p3163 A72-42696

Parallelized algorithms for computer solution of spanning tree, distance and path problems on cellular array of identical modules containing memory and combinational logic 22 p3157 A72-43023

German monograph - Iterative algorithms for ordinary differential equations and their suitability for parallel processing by means of symbol manipulation. 22 p3200 A72-43063

Parallel Element Processing Ensemble (PEPE)/digital computer for real time radar data processing and control, discussing system design and applications 24 p3383 A72-45666

Parallel processing of ballistic missile defense radar data with PEPE. 24 p3383 A72-45667

PARALLELEPIPEDS

Stress-strain state determination in elastic parallelepiped by net point method and matrix filtering 07 p1091 A72-19754

Unsteady heat conductivity equation for finite dimensions parallelepiped, noting temperature dependence of specific heat and thermal conductivity 08 p1252 A72-21321

Solid deformable body mean stress determination by statistical summation of stress squares on faces of parallelepiped rotated within Euler angle limits 12 p1887 A72-28233

Castiglione variational theorem for algebraic equation solution of thermal stresses determination in elastic parallelepiped, using Maxwell stress functions as cosine binomial series 24 p3459 A72-45267

PARALLELOGRAMS

Linear uncoupled quasi-static thermoelasticity theory for thermal bending of nonuniformly heated parallelogram-shaped plates 09 p1400 A72-22710

Thermal buckling of parallelogram shaped plate under stationary temperature field and uniformly distributed forces, deriving critical load 09 p1402 A72-22733

PARAMAGNETIC AMPLIFIERS

U MASERS

PARAMAGNETIC RESONANCE

NT ELECTRON

Low-temperature part of a spectrometer for gigahertz-ultrasonics and ultrasonic paramagnetic resonance. 21 p3051 A72-40215

PARAMAGNETISM

Niobium trifluoride synthesis, noting semiconductor and paramagnetic properties 02 p0243 A72-12170

Russian book on transition metals and alloys electron structure and electronic properties covering paramagnetism, positron annihilation, magnetic transformations and electron heat capacity 11 p1659 A72-26069

Paramagnetic phase induced moment system containing substitutional impurities, calculating mode energies by Green function method in random phase approximation 15 p2295 A72-32546

Surface effects on paramagnetic metals spin susceptibility models, including random-phase-approximation equation derivation and induced magnetic moment calculation 15 p2295 A72-32549

Low field magnetization measurements at 4.2 K on bulk and thin film niobium nitride, discussing Pauli spin paramagnetism and spin-orbit scattering 16 p2442 A72-33843

PARAMETERIZATION

Stability theorems reformulation with one-parameter families of Liapunov functions, discussing applications to Matrosov and Rouche asymptotic stability theorems 02 p0251 A72-11495

Discrete time systems unknown parameter identification, considering unified error function minimization approach 04 p0506 A72-15106

Prandtl layer turbulence spectra parameterization from wind vector data, considering functional dependence on mean wind velocity, height and thermal stratification 04 p0544 A72-15623

Loitsiankii parametric method application to universalize isothermal laminar boundary layer partial differential equations in Crocco variables 05 p0649 A72-16221

Small parameter method solution of two dimensional incompressible flow Navier-Stokes equations, exemplifying application to viscous incompressible flow past semiinfinite plate 06 p0801 A72-18127

Parametric solution of Brans-Dicke cosmological equations for flat Friedmann type expanding universe for time, density, expansion parameter and scalar field 07 p1074 A72-19525

Computed and observed color indices of intermediate band UPXYZVS and wideband UVB photometric systems, evaluating response curve validity for parameter determination 11 p1715 A72-25295

Optimal parameters selection for natural vibrations maximum damping rate, applying method to two mass electromechanical system 11 p1686 A72-25533

Earth atmosphere general circulation model based on planetary boundary layer parameterization, considering surface stress and heat and moisture flux 13 p1988 A72-28442

Parameterized daily profile characterization of global atmospheric conditions to minimize computer storage, discussing mathematical representations, wind, density and temperature profiles 13 p1989 A72-28806

Thermal stress distribution determination in isotropic plate with rigid circular insert, using small parameter technique 13 p2056 A72-28913

Rectangular plate nonlinear lumped-parameter model for large displacement amplitudes, deriving differential equations of motion via Hamilton principle and Euler equations 14 p2169 A72-31148

Iterative computational procedure for system parameter identification and optimization, using multilevel technique 16 p2371 A72-33192

Parametric cost estimating aids DOD in systems acquisition decisions. 17 p2639 A72-34461

Analysis of discrete automatic control systems with variable parameters by the method of orthogonal expansions. I, II 19 p2778 A72-37438

PARAMETERS

U INDEPENDENT VARIABLES

PARAMETRIC AMPLIFIERS

Parametric amplification of laser waves with amplitude and phase modulation under exponential signal growth applied to Raman scattering picosecond pulse field 01 p0079 A72-10346

Wideband microwave parametric amplifier using balanced circuits to relax isolation requirements between signal, idler and pump circuits 01 p0038 A72-10655

Gain vs bandwidth characteristics of broadband microwave parametric amplifiers 01 p0038 A72-10656

Varactor diode microwave parametric amplifiers for radio astronomy interferometer, discussing system design features for gain and phase stabilities 02 p0192 A72-12043

Inhomogeneous plasmas parametric instabilities excitation, observing threshold electric field power requirement 02 p0266 A72-12370

Computer aided design of single tuned parametric amplifiers, stressing voltage gain-bandwidth product 04 p0497 A72-14715

Papers on microwave engineering covering surface finish importance for waveguide propagation, parametric amplifiers and voltage breakdown of microwave antennas 06 p0783 A72-17737

Ultralow noise microwave parametric amplifiers in communication satellite earth terminals, discussing technology basis of millimeter wave paramps 06 p0784 A72-17741

Broadband parametric amplifier design using computerized optimization procedure based on Gauss-Newton iteration technique 06 p0786 A72-18376

IMPATT driven pumps replacement of klystron for parametric amplifiers producing over 100 mW at 38-40 GHz with good stability and noise performance 06 p0788 A72-18470

Microwave parametric amplification and conversion in circuits with Josephson junctions, describing stable oscillation measurements 06 p0866 A72-18477

Miniature modular wideband parametric amplifier for centimeter range, using IC optimal coupled circuit with passband dependent on diode time constant 07 p0956 A72-19570

Parametric oscillations of nonlinear systems prone to self excitation, using asymptotic method 08 p1206 A72-21243

Uniform plane wave theory of internal upconversion and frequency doubling in optical parametric oscillators 09 p1324 A72-23079

Steady state plane wave theory of intracavity coupled parametric oscillator upconverter, obtaining efficiency, pump power transmission and optimum output coupling 09 p1325 A72-23086

Millimeter wave pumped X band balanced diode type parametric amplifier using GaAs Schottky barrier varactors for operation at room temperature 09 p1289 A72-23417

High quality GaAs varactor diodes for double diode low noise wideband parametric amplifiers at idler frequencies up to 43 GHz without refrigeration 12 p1788 A72-27174

Singly and doubly resonant pulsed optical parametric oscillators driven by time-dependent pump, deriving output power rise time by steady state analysis 12 p1792 A72-27751

Optimal design of broad passband in unilateral parametric balance amplifier 13 p1928 A72-28789

Parametric regeneration in Josephson superconducting point contacts for combination frequency signal amplification and conversion in microwave application 13 p1932 A72-29296

Parametric resonance suppression in annular laser by steady noise perturbation, discussing beat signal spectrum 13 p1968 A72-29505

Alfven waves parametric amplification in magnetized plasma, showing dependence on wave frequency and phase and perturbation field strength 14 p2137 A72-30396

Oscillations in ferromagnetic resonant circuit of parametric amplifier with constant capacitance and periodically variable inductance modulated by input signal 14 p2089 A72-31107

Gravity waves parametric generation on liquid surface, presenting threshold values for space distribution of amplitudes and phases 14 p2097 A72-31111

Short signal pulse shaping based on phase and amplitude selective properties of distributed parametric amplifiers operating under nonlinear conditions 14 p2090 A72-31112

Regenerative semiconductor parametric amplifier under dc through p-n junction, analyzing nonlinear phenomena 14 p2090 A72-31124

Nonlinear approximation of slowly changing standing waves in self excited parametric oscillators with distributed and bulk structures 14 p2090 A72-31131

Van der Pol and nonlinear parametric oscillators fluctuations due to random noises analyzed by averaging method and discrete Markov processes 14 p2133 A72-31134

Three-frequency parametric traveling wave amplifier gain and conversion factors calculation by numerical method with allowance for fast and slow space charge wave effects 15 p2206 A72-31661

Parametric amplifiers for satellite microwave communication systems, discussing frequency stability, noise temperature and gain relationships 16 p2369 A72-33520

Optical second harmonic generation and parametric oscillation. 17 p2594 A72-34566

Spaceflight-qualified tunable C-band parametric amplifier system. 19 p2770 A72-37253

18 GHz paramps with both liquid helium and room temperature operations and with triple-tuned gain characteristics. 19 p2770 A72-37254

An X-band paramp with 0.85 dB noise figure /uncooled/ and 500 MHz bandwidth. 19 p2770 A72-37258

German monograph - Multiple tuning of cooled parametric amplifiers 19 p2772 A72-37651

Parametric amplification and frequency conversion in a dual section TWT 19 p2774 A72-38411

Self-excited parametric oscillations at the second harmonic in a parametric system with a triple-post ferromagnetic core 19 p2774 A72-38586

Combinational distortions and cross distortions in parametric microwave systems 19 p2768 A72-38665

Bandwidth and threshold calculations for angle-tuned parametric oscillators. 19 p2813 A72-38689

Microwave low noise amplifiers for use in radar systems. 20 p2907 A72-39220

The effect of pump coherence on frequency conversion and parametric amplification. 21 p3014 A72-40238

Low-noise parametric amplifiers for radio astronomical observations at 18 to 21 cm wavelengths 21 p3025 A72-40303

Low noise microwave parametric amplifier design for space communication receivers, using inverted diode balanced mixers 21 p3025 A72-40304

Optical communication channel optimization with binary signals preamplified in optical parametric amplifier, noting amplifier gain and SNR 21 p3016 A72-40783

Low noise receiver for satellite broadcasting.
21 p3019 A72-40886

OH maser sources parametric down-conversion, deriving nonlinear current densities, electron cyclotron wave damping and parametric gain coefficient
21 p3064 A72-41030

Miniature modular wideband parametric amplifier for centimeter range, using Q optimal coupled circuit with passband dependent on diode time constant
22 p3158 A72-42088

Properties of a pulsed LiIO₃ doubly resonant parametric oscillator.
23 p3297 A72-44187

Theory of pulsed internal optical parametric oscillators.
24 p3409 A72-44714

Analysis of a single-loop parametric amplifier by the phase plane method
24 p3384 A72-44893

Parametric preamplifiers for transistorized nuclear-emission detectors and their capabilities
24 p3402 A72-44894

PARAMETRIC DIODES
Optoelectronic elements for information system applications, discussing photomultipliers, photodiodes, photoresistors, avalanche and photoparametric diodes response and bandwidth characteristics
08 p1169 A72-21844

PARAMETRIC FREQUENCY CONVERTERS
Microwave parametric amplification and conversion in circuits with Josephson junctions, describing stable oscillation measurements
06 p0866 A72-18477

Parametric converter mixers with FM and AM signal and pump oscillator, investigating SNR behavior
07 p0956 A72-19658

Statistical characteristics of IR receivers with parametric carrier frequency conversion, describing noise index minimization technique
12 p1846 A72-27889

Parametric regeneration in Josephson superconducting point contacts for combination frequency signal amplification and conversion in microwave application
13 p1932 A72-29298

Controllable matched filter model for single circuit and twin circuit parametric converters
15 p2207 A72-31886

Statistical characteristics of IR receivers with parametric carrier frequency conversion, describing noise index minimization technique
16 p2427 A72-33998

Calculation of the transmission factor of a parametric microwave transistor multiplier
19 p2774 A72-38423

Optical signal envelopes recording and reproduction with parametric superregenerative frequency converters, noting optical pumping by continuous wave YAG laser emission
23 p3292 A72-44471

Wideband parametric up-conversion of infrared waves into visible region using tunable dye laser pumping.
24 p3410 A72-45286

PARAMETRIC OSCILLATORS
U PARAMETRIC AMPLIFIERS
PARAMETRONS
Calculation of transient processes in a capacitance parametron by the phase approximation method
23 p3312 A72-43351

PARANASAL SINUSES
Case report on dive decompression induced maxillary sinus barotrauma due to sinus pressure buildup caused by ostium blockage
22 p3150 A72-42497

Paranasal sinus barotrauma in military flying personnel, discussing radiographic diagnostic methods and hypobaric test procedures for flight status restoration time determination
24 p3378 A72-45664

PARAPSYCHOLOGY
U EXTRASENSORY PERCEPTION
PARATHYROID GLAND
Radioimmunoassay and gel filtration determination of molecular size and immunochemical reactivity of parathyroid hormone in gland extracts, peripheral circulation and parathyroid effluent blood
04 p0473 A72-15228

PARAWINGS
Buoyancy systems and parawings application in short haul passenger transportation, discussing VTOL and STOL operations
16 p2348 A72-33183

PARKING ORBITS
Minimum velocity change noncoplanar two and three impulse orbital transfer from regressing oblate earth assembly parking ellipse into flyby trans-Martian asymptotic velocity vector
03 p0434 A72-13634

PARKINSON DISEASE
Cerebral neurons population electric stimulation effect on deep sleep duration in Parkinsonism patients
04 p0476 A72-15585

PARTIAL DIFFERENTIAL EQUATIONS

NT BIHARMONIC EQUATIONS
NT BURGER EQUATION
NT ELLIPTIC DIFFERENTIAL EQUATIONS
NT FOKKER-PLANCK EQUATION
NT GAUSS EQUATION
NT LIOUVILLE EQUATIONS
NT PARABOLIC DIFFERENTIAL EQUATIONS
NT VLASOV EQUATIONS
Invariant imbedding technique application to linear partial differential equations boundary value problems conversion to Cauchy problem via generalized Riccati transformations
01 p0093 A72-11116

Associative array digital processors application to numerical solution of partial differential equations, illustrating methodology on weather forecasting equations
02 p0186 A72-11658

Axisymmetric circular membranes large deflections, solving nonlinear partial differential equations by iterative method in conjunction with finite difference approximations
02 p0296 A72-12526

Hyperbolic partial differential equations solution by hybrid computer, simulating wave propagation by track hold circuits
02 p0188 A72-12656

Weak solutions of degenerate partial differential equation of dynamic programming, investigating relation to value function of stochastic optimal control problem
03 p0382 A72-13701

Hsu-Howe iterative hybrid method for partial differential equations solution by time sharing analog components, using dynamic scaling and incremental formulations for reduced sensitivity
04 p0495 A72-14418

Two dimensional solar cell model with partial differential equation relating arbitrary point potential to cell parameters for I-V characteristics prediction
04 p0465 A72-14480

Sequential interpolating estimation algorithm derivation for distributed-parameter noisy dynamic systems described by nonlinear partial differential equations
04 p0538 A72-14669

Liapunov functionals synthesis for continuous system stability study, discussing linear combinations of moments of governing partial differential operators
04 p0538 A72-14671

Distributed systems modeled by partial differential equations, identifying unknown parameters by Galerkin method using steepest descent method and nonlinear filter
04 p0505 A72-14674

Lagrange method extended to method of characteristics for solving first order hyperbolic partial differential equations, applying to ionospheric ion density distribution
04 p0539 A72-14885

Pressure and convective heat transfer distribution at air inlet central body surface, reducing Navier-Stokes equations to partial differential equations with similar solutions
04 p0596 A72-14971

Continuous media stationary motion stability using initial boundary value problem of partial differential equations in perturbations
[ASME PAPER 71-WA/APM-17]
05 p0647 A72-15963

Loitsiankii parametric method application to universalize isothermal laminar boundary layer partial differential equations in Crocco variables
05 p0649 A72-16221

Discrete elasticity theory constitutive and motion equations, considering finite difference and partial differential equations
05 p0737 A72-16297

Rectangular variable thickness plate deflection under uniform lateral pressure, solving nonlinear partial differential equations with variable coefficients by iterative procedure
05 p0738 A72-16533

Herzberger fundamental optical invariant for rotationally symmetric systems, using partial differential equations
[AD-738406]
05 p0690 A72-16672

Finite element algorithm derived for partial differential equation system governing laminar three dimensional boundary layer flow of multicomponent compressible fluid
[AIAA PAPER 72-108]
05 p0604 A72-16817

Transient compressible heat and mass transfer in porous media, solving coupled nonlinear partial differential equations in finite difference form by iterative technique
[AIAA PAPER 72-23]
05 p0749 A72-16914

Group velocity and numerical error propagation in partial differential and finite difference equations of gas dynamics
[AIAA PAPER 72-153]
05 p0652 A72-16952

Optimal averaging of control in distributed random parameter system described by hyperbolic partial differential equations, considering boundary values on characteristics as control functions
05 p0683 A72-17133

Optimal control of one dimensional physical system with delayed argument described by nonlinear first order hyperbolic partial differential equations, using maximum principle
05 p0691 A72-17138

Hybrid computer solution of partial differential equations by invariant imbedding application to serial method
06 p0839 A72-17631

Jacobian matrix partial derivatives for orbital motion representation by time step power series
06 p0877 A72-17651

Mixed boundary value problem of partial differential equations describing nonlinear viscoelastic vibration of clamped rods, examining asymptotic solution stability
06 p0901 A72-18716

Power series method with Cauchy formula for nonlinear partial differential equations solution in unsteady periodic temperature oscillations
06 p0905 A72-18727

Multidimensional Fourier transforms application to theoretical physics partial differential equations, using singular delta function for homogeneous equations general integral
07 p1027 A72-19436

Sufficient conditions definition for existence of solution for heat conduction equation coupling to telegrapher equation
07 p1028 A72-19897

Wave diffusion related to phenomena governed by linear hyperbolic partial differential equations of second order, presenting Cauchy problem solution
07 p1035 A72-20090

Gas dynamics K-wave interaction in nonlinear media described by nonlinear partial differential equations
07 p0972 A72-21013

Iteration procedure for approximate integration of nonlinear system of partial differential equations with time lag, presenting upper and lower estimates
07 p1028 A72-20209

Elastic body dynamics partial differential equations transformation into boundary value problem for Monge-Ampere equation
07 p1095 A72-20218

Self similar invariant group solutions to Bellman nonlinear partial differential equation for optimal correction problems of control systems motion with random disturbances
07 p0963 A72-20322

Partial differential equation language (PDEL/ for batch and interactive digital simulation of PDE models
07 p0951 A72-20327

Truncation error correction based on Richardson extrapolation in finite difference approximation of nonlinear partial differential operators
07 p1101 A72-20328

Computer interactive graphics for digital simulation of engineering fields modeled by partial differential equations boundary value problems
07 p0951 A72-20337

Iterative solution of Cauchy problem of partial differential equations nonlinear system with time lag, formulating uniqueness theorem
08 p1198 A72-20904

Liapunov theorem for polynomial solution existence for first order inhomogeneous system of linear partial differential equations
08 p1205 A72-20958

Bergman operators construction for second order linear partial differential equations
08 p1199 A72-21288

Hybrid Monte Carlo techniques with digital and analog computers and minimal interface, simulating random walks for partial differential equations solution
08 p1138 A72-21602

Geometrical characterization of steady nondissipative compressible fluid flow described by first order partial differential equations system
09 p1295 A72-23366

Coupling of interstitial liquid and porous elastic medium deformation, calculating solidification by numerical integration of partial differential equations system of Lamé type
10 p1465 A72-24116

Algorithms for spatially varying parameters estimation in nonlinear partial differential equations from noisy observations, noting diffusivity in heat equation
10 p1506 A72-24457

Partial differential equation for thin walled circular cylindrical shells, deriving solutions for displacement and stresses in terms of surface coordinates low degree polynomials
10 p1557 A72-24560

Linear continuous time systems optimal dual control problem solution by reduction to partial differential equation in finite domain with suitable boundary conditions
10 p1458 A72-25170

ferential equations, considering boundary values on characteristics as control functions
05 p0683 A72-17133

Optimal control of one dimensional physical system with delayed argument described by nonlinear first order hyperbolic partial differential equations, using maximum principle
05 p0691 A72-17138

Hybrid computer solution of partial differential equations by invariant imbedding application to serial method
06 p0839 A72-17631

Jacobian matrix partial derivatives for orbital motion representation by time step power series
06 p0877 A72-17651

Mixed boundary value problem of partial differential equations describing nonlinear viscoelastic vibration of clamped rods, examining asymptotic solution stability
06 p0901 A72-18716

Power series method with Cauchy formula for nonlinear partial differential equations solution in unsteady periodic temperature oscillations
06 p0905 A72-18727

Multidimensional Fourier transforms application to theoretical physics partial differential equations, using singular delta function for homogeneous equations general integral
07 p1027 A72-19436

Sufficient conditions definition for existence of solution for heat conduction equation coupling to telegrapher equation
07 p1028 A72-19897

Wave diffusion related to phenomena governed by linear hyperbolic partial differential equations of second order, presenting Cauchy problem solution
07 p1035 A72-20090

Gas dynamics K-wave interaction in nonlinear media described by nonlinear partial differential equations
07 p0972 A72-21013

Iteration procedure for approximate integration of nonlinear system of partial differential equations with time lag, presenting upper and lower estimates
07 p1028 A72-20209

Elastic body dynamics partial differential equations transformation into boundary value problem for Monge-Ampere equation
07 p1095 A72-20218

Self similar invariant group solutions to Bellman nonlinear partial differential equation for optimal correction problems of control systems motion with random disturbances
07 p0963 A72-20322

Partial differential equation language (PDEL/ for batch and interactive digital simulation of PDE models
07 p0951 A72-20327

Truncation error correction based on Richardson extrapolation in finite difference approximation of nonlinear partial differential operators
07 p1101 A72-20328

Computer interactive graphics for digital simulation of engineering fields modeled by partial differential equations boundary value problems
07 p0951 A72-20337

Iterative solution of Cauchy problem of partial differential equations nonlinear system with time lag, formulating uniqueness theorem
08 p1198 A72-20904

Liapunov theorem for polynomial solution existence for first order inhomogeneous system of linear partial differential equations
08 p1205 A72-20958

Bergman operators construction for second order linear partial differential equations
08 p1199 A72-21288

Hybrid Monte Carlo techniques with digital and analog computers and minimal interface, simulating random walks for partial differential equations solution
08 p1138 A72-21602

Geometrical characterization of steady nondissipative compressible fluid flow described by first order partial differential equations system
09 p1295 A72-23366

Coupling of interstitial liquid and porous elastic medium deformation, calculating solidification by numerical integration of partial differential equations system of Lamé type
10 p1465 A72-24116

Algorithms for spatially varying parameters estimation in nonlinear partial differential equations from noisy observations, noting diffusivity in heat equation
10 p1506 A72-24457

Partial differential equation for thin walled circular cylindrical shells, deriving solutions for displacement and stresses in terms of surface coordinates low degree polynomials
10 p1557 A72-24560

Linear continuous time systems optimal dual control problem solution by reduction to partial differential equation in finite domain with suitable boundary conditions
10 p1458 A72-25170

Satellite orbit tracking data accuracy estimation by partial differentiation, using Doppler and interferometric methods

11 p1593 A72-26097

Method of characteristics for solution of quasi-linear hyperbolic partial differential equations, analyzing frequency response

11 p1678 A72-26551

Representational method for evolution type partial differential equations numerical solution, noting relationship to finite element method

11 p1679 A72-26961

Nonlinear stochastic partial differential equations solution by graph technique, calculating correlation function and phase change spectrum in phase locked circuit

12 p1837 A72-27575

Russian papers on functional analysis covering approximate solution of linear integral equations, averaging principle for partial differential equations and boundary value problems

12 p1837 A72-27994

Asymptotic approximation methods for boundary layers in singular perturbation theory for linear elliptic partial differential equations in two independent variables

13 p1940 A72-28425

Liapunov direct stability method extension to partial differential equations, using functional analysis and wave equation example

13 p1985 A72-28483

Asymptotically bilateral solutions to partial differential equations, using fictitious regions and auxiliary unsteady problem methods

13 p1987 A72-29472

Partial differential equations for longitudinal, torsional and transverse vibrations of bars with variable composition

13 p2006 A72-29885

Linear functional equations with constant coefficients for generalized partial derivative operators introduced in certain spaces of functions of many complex variables

13 p1987 A72-30083

Delayed argument linear partial differential equations system integration, constructing asymptotic solution in nonresonant case

13 p1988 A72-30084

Partial differential equations of motion for nonlinear mechanical systems solved by Lanczos formula, discussing prismatic cylinder oscillations under uniformly distributed transverse load

15 p2275 A72-31729

Dissipative systems of ordinary differential equations concepts extension to functional and partial differential equations

15 p2263 A72-31754

Control theory of second order linear hyperbolic partial differential equations, discussing relation to harmonic and spectral analysis

15 p2263 A72-31757

Complex conjugate fourth order partial differential equations for circular cylindrical shells deformation, comparing accuracy with Fluegge, Morley and Novozhilov equations

15 p2331 A72-32559

First eigenvalue and first eigenfunction properties of linear elliptic partial differential equation in variational form with discontinuous coefficients, considering Dirichlet problem

16 p2416 A72-33502

Optimal filtering estimate of noisy nonlinear partial differential distributed parameter system, using least squares and invariant imbedding techniques

16 p2416 A72-33575

Turbulent solutions of certain linear and nonlinear partial differential equations

17 p2537 A72-34194

A method of solving partial differential equations for boundary layers

17 p2537 A72-34195

Finite element method matrices in least squares approximation and elliptic partial differential equations, discussing numerical stability properties

17 p2573 A72-34219

Search density function optimality for randomly moving target in n dimensional space with location probability density function satisfying given partial differential equation

17 p2574 A72-34340

Asymptotic solutions of inhomogeneous initial boundary value problems for weakly nonlinear partial differential equations.

17 p2574 A72-34342

Use of fast Fourier transforms for solving partial differential equations in physics.

17 p2575 A72-34645

Conditions for the uniqueness of the solution to the Cauchy problem for special systems of equations with variable coefficients

17 p2575 A72-34775

Approximate solutions of problems involving simultaneous multifunctional nonlinear partial differential

equations, noting rectangular plate deflection under lateral pressure

[ASME PAPER 72-APM-47] 17 p2627 A72-34780

Dissipative periodic process theory for application to elasticity and distributed parameter and hereditary systems defined by partial and functional differential equations

17 p2575 A72-34867

Three-dimensional small-signal analysis of bipolar transistors.

17 p2530 A72-35099

Book - Nonlinear partial differential equations in engineering, Volume 2

17 p2576 A72-35449

Means of converting the solutions of partial differential equations, obtained in operator form, to solutions of conventional form when the differential operators are expressed in general form

17 p2577 A72-35789

Hopscotch algorithm for numerical integration of nonlinear hyperbolic partial differential equation systems based on finite difference method

18 p2705 A72-37020

Optimal control of plant described by nonlinear hyperbolic equations with variable initial conditions of system, noting constraints on plant phase coordinates

19 p2777 A72-37434

Linear partial differential equations with random forcing.

19 p2825 A72-37573

Homogeneous linear partial differential equation for optimal control with boundary condition formed by terminal component, noting weighting functions for linear plant

19 p2778 A72-37989

Solution of certain systems of partial differential equations in linear commutative differential operators

19 p2825 A72-38183

Identification of parameters in nonlinear boundary conditions of distributed systems with linear fields.

19 p2780 A72-38245

Distributed parameter linear and nonlinear systems analysis, deriving theorem for solution stability of linear partial differential equations

19 p2826 A72-38247

Certain properties of differential operators with variable coefficients dependent on the domain format.

20 p2946 A72-39465

Optimization of controlled plants sequence with stochastic process described by partial differential equations, noting hydropneumatic system of liquid fuel jet engine

20 p2947 A72-39903

Numerical solution of quasi-conservative hyperbolic systems - The cylindrical shock problem.

21 p3043 A72-40101

Decomposition of multidimensional nonlinear equations of heat-conduction type and construction of nonlinear electrical integrators

21 p3128 A72-40181

Classes of uniqueness of solutions to the Cauchy problem

21 p3074 A72-40255

Limiting equation for solving a boundary value problem in a multilayer domain

21 p3074 A72-40258

Partial derivatives of dispersion curves for higher modes of Love waves in a single-layered medium.

21 p3084 A72-40496

A method for determining the motion in a laminar boundary layer.

21 p3045 A72-40813

Partial differential equation solution for plane electromagnetic wave diffraction by infinite dielectric cylinder of arbitrary cross section

21 p3085 A72-41199

A system of linear equations with partial derivatives

21 p3077 A72-41822

Solution method for some boundary problems of nonlinear hyperbolic-type equations and propagation of weak shock waves

22 p3164 A72-41904

Discontinuities propagation in quasi-linear hyperbolic partial differential equation systems, noting MHD flow and crystal optics equations

22 p3204 A72-41905

Certain necessary conditions for the local solvability of first-order differential equations with infinitely differentiable coefficients

22 p3198 A72-42158

On the perturbation method in the stability analysis of continuous systems.

22 p3206 A72-42842

Equilibrium equations and deformation of elastoplastic thin isotropic cylindrical shell with circular hole, noting nonlinear partial differential equations for plate displacements

23 p3345 A72-43587

Optimally sensitive control for distributed parameter systems.

23 p3275 A72-43612

Boundary value problems for a mixed-composite type of equation in an unbounded domain

23 p3308 A72-43628

Asymptotic behavior of solutions of systems of conservative differential equations

23 p3308 A72-43693

Equivalence conditions for classes of linear and non-linear distributed parameter systems.

23 p3277 A72-44369

Partial differential heat conduction equation for temperature distribution in rectangular plate, comparing with finite difference solution

24 p3465 A72-45268

PARTIAL PRESSURE

NT HYPOXEMIA

NT OXYGEN TENSION

Upper atmosphere neutral oxygen density diurnal variations from incoherent scatter and satellite drag data, noting deviations from Jacchia static diffusion model predictions

01 p0062 A72-10911

Vagal control of ventilation and respiratory muscles during elevated pressures in cats

07 p0917 A72-19446

Carbon dioxide-air-helium molecular systems population excitation rates with current, gas composition and partial pressures dependence

08 p1183 A72-22028

German monograph on electron beam focusing in partial pressure analyzer with two compartment ion source, eliminating residual gas-filament interaction

09 p1306 A72-22318

Direct single electrode measurement of carbon dioxide partial pressure in liquids and gases, using pH changes due to gas diffusion

09 p1317 A72-23671

Co-Cr alloy oxidation as function of temperature and oxygen partial pressure, discussing solid state diffusion

14 p2118 A72-30544

Transversely excited pulsed carbon dioxide-nitrogen-helium laser with electrical discharge determined optimum partial pressure

15 p2249 A72-32236

The measurement of partial pressure in vacuum technology and vacuum physics

18 p2692 A72-36836

PARTICLE ACCELERATION

Extragalactic cosmic ray hypothesis plausibility from viewpoints of energy supply, acceleration process efficiency, galactic nucleus activity and intergalactic space

01 p0122 A72-11260

Quasi-linear theory of relativistic particle acceleration by hydromagnetic turbulence for small gyroradius expansion, using Vlasov equation

02 p0265 A72-12307

Acceleration phase of solar cosmic rays and relativistic electrons in solar flare of 7 July 1966 discussing MHD shock waves generation

03 p0407 A72-12941

Neutron star surface structure and cooling calculations for pulsar cosmic ray production through surface material acceleration

03 p0421 A72-13136

Ions acceleration during current passage through plasma, discussing maximum energies, threshold current and electron beam flux density

03 p0396 A72-13661

Heavy nuclei enrichment in solar accelerated particles, discussing differential energy spectra, photospheric and coronal abundances, satellite observation and agreement with galactic cosmic rays

04 p0568 A72-15366

Charged particle acceleration by nonstationary sinusoidal electric fields in earth magnetosphere based on mathematical model

05 p0709 A72-16256

Magnetospheric plasma sources, discussing wave-particle interactions and acceleration mechanisms

06 p0810 A72-18281

Cosmic rays generation by charged particles acceleration in electromagnetic constant crossed fields during magnetic stars contraction to neutron star dimensions

07 p1056 A72-19042

Active region sources of solar proton streams, discussing 27-day recurrence, acceleration and confinement in interplanetary space

07 p1060 A72-20010

Solar discrete particle events classification and emission and acceleration mechanisms in relation to flare development

07 p1060 A72-20011

Particle acceleration and plasma ejection in solar flares, using model of nonstationary cumulative flow near magnetic neutral line

07 p1060 A72-20014

Magnetospheric and polar substorms model for auroral particles acceleration and geomagnetic tail current diversion to auroral oval night side

07 p0977 A72-20029

Magnetospheric trapped particle diffusion coefficients and acceleration in earth radiation belts

07 p1062 A72-20035

Solar cosmic ray heavy nuclei acceleration independence from solar activity phenomena, based on Elektron 4 satellite observation

07 p1064 A72-20632

Auroral ionosphere radio self emission at supercritical frequencies from accelerated protons charge exchange effects, comprising radio bursts, storms and amplifications

08 p1153 A72-20713

Plasma emitter shape determination in accelerating electric field for charged particle flux production

09 p1358 A72-22490

Low energy ions and negative particle fluxes simultaneous enhancements due to Apollo 14 lunar module impact, suggesting solar wind and gas cloud interaction as acceleration mechanism

09 p1388 A72-23018

Micrometeoroid simulation by accelerated microparticles bombardment of metal targets, discussing energy partition as function of impact velocity

09 p1409 A72-23667

Galactic and universal theories of cosmic ray source mechanisms, energy requirements, particle composition, propagation through interstellar matter and acceleration in supernovae remnants

10 p1533 A72-23889

Ion acceleration by relativistic electron-beam-formed plasma, explaining ion energy dependence on neutral gas pressure by potential well model

10 p1518 A72-23961

Van Allen proton belt model, considering ionosphere particle acceleration by stochastic interaction with hydromagnetic waves due to solar wind at magnetosphere shock front

10 p1529 A72-24245

Sunspots contact region charged particles acceleration by plasma flow induced electric field, noting Fermi type mechanism

11 p1695 A72-26107

Ionization and associated energy loss effects on particles acceleration in solar atmosphere, emphasizing Fermi mechanisms

12 p1863 A72-27303

Near field effects on pulsar particle acceleration, relating electric and magnetic field magnitudes

14 p2156 A72-30568

Approximate analytical solution for spherical particle acceleration in uniform gas flow, examining nozzle geometry and particle size effects

14 p2095 A72-30924

Acceleration and recombination effects on ion energy spectra, discussing energy distributions of hydrogen, zirconium, lithium, and deuterium ions in laser plasmas

16 p2428 A72-32910

Solar radio bursts time sequence and positions observation during 24 January 1971 proton event, noting relation to relativistic particles acceleration into interplanetary field

16 p2445 A72-33045

Low energy cosmic ray deuteron and He 3 source spectra observation implications for adiabatic deceleration in solar cavity, discussing interstellar propagation

16 p2448 A72-33743

Neutron star acceleration of He, Fe and supernova debris into cosmic ray flux throughout Galaxy, discussing magnetic and superfluidity effects

16 p2448 A72-33745

Electromagnetic wave propagation in uniform and nonuniform plasmas with enough strength to cause relativistic electron velocities, considering linear polarization and nonlinear penetration effects

16 p2438 A72-33926

Fermi acceleration effects in low energy particle transport in interplanetary space, assuming kinetic energy contained in Alfvén and bidirectional traveling waves

16 p2460 A72-33938

Plasma emitter shape determination in accelerating electric field for charged particle flux production

17 p2588 A72-34653

Magnetospheric convection induced longitudinal or Fermi acceleration role in nighttime auroral particle flux production mechanism

17 p2601 A72-35592

Auroral electron acceleration by longitudinal electric field due to protons defreezing above ionosphere

17 p2550 A72-35852

Electron and proton acceleration in the outer magnetosphere regions during polar substorms

18 p2688 A72-36866

Equations of motion in the linear approximation.

19 p2835 A72-38174

Auroral ionosphere radio self emission at supercritical frequencies from accelerated protons charge exchange effects, comprising radio noise bursts, storms and amplifications

19 p2790 A72-38341

On the acceleration of charged particles to cosmic ray energies.

19 p2852 A72-38483

On the acceleration time of particles in the solar atmosphere.

19 p2852 A72-38634

Energy spectrum and composition of pulsar-accelerated cosmic rays.

20 p2964 A72-39343

Single-cycle electron acceleration in focused laser fields.

20 p2934 A72-39720

Exact solutions of the Einstein-Maxwell equations for an accelerated charge.

20 p2955 A72-40008

Formation of intense charged particle beams in a current-carrying plasma.

21 p3092 A72-40834

Solar soft X-rays and solar activity. II - Observational assessment of the role of the type III acceleration mechanism in establishment of the soft X-ray source volume.

21 p3101 A72-41294

Solar flare associated relativistic electron acceleration relationship to cosmic ray and type 4 radio burst production

22 p3217 A72-42010

Electron and plasma particle acceleration by moving pulsed laser, noting appearance of fast particles, hard radiation and neutrons

23 p3295 A72-43312

Some characteristics of microwave type IV radio bursts and the acceleration of solar cosmic rays.

23 p3328 A72-43616

Ion acceleration during expansion of a rarefied plasma

23 p3322 A72-44482

PARTICLE ACCELERATOR TARGETS

Multiple meson production in 250 GeV nucleon-nucleon collisions in LiH targets, noting 40 per cent formation of heavy meson cluster fireballs

06 p0868 A72-17259

Micrometeoroid simulation by accelerated microparticles bombardment of metal targets, discussing energy partition as function of impact velocity

09 p1409 A72-23667

Inclusive isotope spectra of secondary nuclei produced by Bevatron heavy ion fragmentation in carbon and polyethylene targets, noting partial differential cross sections

10 p1517 A72-25144

PARTICLE ACCELERATORS

NT BETATRONS

NT BEVATRON

NT CYCLOTRONS

NT ELECTRON ACCELERATORS

NT ION ACCELERATORS

NT LINEAR ACCELERATORS

NT VAN DE GRAAFF ACCELERATORS

Spark calorimeter calibration by particle accelerator induced high energy pions, noting neutral and charged particles track detectors high geometric resolution

06 p0811 A72-17292

Collective self fields generated from intense electron beams for high energy positive particle acceleration and Astron hot plasma confinement for fusion control

10 p1523 A72-24788

Dished accelerator grids design, fabrication and operation in electron bombardment ion thruster, studying ion extraction capability and discharge chamber performance

[AIAA PAPER 72-486]

11 p1710 A72-26212

PARTICLE BEAMS

NT ATOMIC BEAMS

NT ELECTRON BEAMS

NT ION BEAMS

NT MOLECULAR BEAMS

NT NEUTRAL BEAMS

NT NEUTRON BEAMS

NT PION BEAMS

NT PROTON BEAMS

Transit tube manometric system with fast particle beam ionization of residual gas molecules for vacuum measurements

09 p1364 A72-23226

Picoampere charged particle beam symmetry and magnitude monitor consisting of four transmission ion chambers

09 p1315 A72-23405

Beam-foil-gas spectroscopy and relative cross section measurements for studying steady state nonequilibrium processes

10 p1434 A72-24325

Converging or diverging high intensity charged particle beams arbitrary profile shaping, obtaining solution via Laplace equation through reduction to Cauchy problem

10 p1521 A72-24362

Quasi-linear approximation equations for relativistic charged particles beam dissipative instability in collisional plasma, noting electrons heating at high collision frequencies

12 p1852 A72-27860

Charged particle beams focusing in combined dual spiral system with homogeneous magnetic field along axis

13 p1932 A72-29292

Nonlinear theory of interaction between restricted relativistic particle beam and plasma, determining field amplitudes and beam radii

13 p2019 A72-29989

Spectrometer entrance slit diffraction effects on observed fast beam spectral line width

15 p2280 A72-31383

Converging or diverging high intensity charged particle beams arbitrary profile shaping, obtaining solution via Laplace equation through reduction to Cauchy problem

17 p2589 A72-34961

Short- and long-range terrestrial telecommunication using energetic collimated beams of muons

17 p2519 A72-35837

Formation of intense charged particle beams in a current-carrying plasma.

21 p3092 A72-40834

PARTICLE CHARGING

Frictional electrification from supersonic particle impact, determining particle charge and concentration, body intercepting area and velocity variations with speed

02 p0261 A72-12555

Powder concentration effects on corona particle charging efficiency of aerosols for electrogasdynamic generators

06 p0760 A72-18335

PARTICLE CLOUDS

U CLOUDS

PARTICLE COLLISIONS

Ordinary electromagnetic waves propagating in plasma, calculating thermal and particle collisional corrections with moment approach

01 p0107 A72-10140

Reactive and nonreactive channels full particle scattering amplitudes using coupled integral equations

02 p0262 A72-11910

Frictional electrification from supersonic particle impact, determining particle charge and concentration, body intercepting area and velocity variations with speed

02 p0261 A72-12555

Collision integral for classical electron plasma, concerning Born-Bogoliubov-Green-Kirkwood-Yvon equations for long range interaction potential and motions of multiple particles

03 p0399 A72-14069

Collisional radiative recombination applicability to time dependent electron density decay in helium afterglow before reaching quasi-steady state

04 p0555 A72-14579

Vibrationally inelastic scattering of CO cations by Ar collision, measuring ion energy, mass and angular distribution with high resolution ion beam apparatus

05 p0693 A72-17169

Single collision beam experiments, swarms, Townsend current and capture processes in negative ions

05 p0693 A72-17219

Cosmic ray hadrons inelastic collision cross sections and partial K-neutral pion inelasticity factor in ionization calorimeter

06 p0868 A72-17262

Multiple production processes hydrodynamic-type models validated by high energy particle collision collective interactions

06 p0869 A72-17265

Coupled equations for collision amplitudes in three body system involving particle redistribution

06 p0851 A72-17391

Hydrogen atom emission spectrum calculation in uniform rotating electric field, applying to charged particles collisions and Stark broadening of plasma H lines

10 p1514 A72-24039

Linear analysis of gravitational perturbations in strongly collisional initially homogeneous and Maxwellian medium

10 p1536 A72-24138

Electron-neutral collisions effects on wavelength and damping of electrostatic waves propagation in Ar and He plasmas

10 p1525 A72-25143

Numerical solution of two massive rigid bodies impact with variable slipping direction using Routh momentum change theorem

11 p1735 A72-25769

Collisional distributions in mirror plasmas, using successive approximation technique for Fokker-Planck equation lowest eigenvalue and eigenmode

11 p1694 A72-25792

Charged particle thermodynamics in ionosphere, considering energy exchange due to collisions or thermal conductivity

11 p1621 A72-25837

Interstellar anomalous 6 centimeter formaldehyde absorption in diffuse dark nebulae, discussing quantum mechanics of collisional pumping process

11 p1720 A72-26112

Electron temperature determination from rate of ionization due to collisions between electrons and neutral particles in plasma

11 p1697 A72-26586

Galactic disk systems relaxation time due to particle encounters, discussing validity of Boltzmann-Vlasov equation

12 p1872 A72-27894

Relaxation processes enhancement by collective particle collisions effects in plasma, stressing application to stellar dynamics

12 p1853 A72-27915

Disturbed ionospheric electron and ion kinetics, detailing dissociative recombination as regulating process for temporal evolution

14 p2102 A72-30654

Cross section determination of proton production in collisions of electrons and hydrogen ions

14 p2134 A72-30801

High momentum transfer collisions importance for anisotropic part of distribution function in Lorentz and single component plasmas

14 p2134 A72-30802

Mass spectrometric techniques for collision processes in decaying nitrogen-helium and nitrogen-neon plasmas, obtaining ambipolar diffusion coefficients and reaction rate constants

15 p2283 A72-31299

Collisions role in nonlinear mode coupling and harmonic generation associated with electromagnetic wave in plasma, describing plasma electron distribution function by kinetic equation

15 p2195 A72-31679

Sound velocity and ultrasonic attenuation in anharmonic metal for collision dominated regime

15 p2277 A72-31889

Anisothermal magnetoplasma with non-Maxwellian particle distribution function, calculating electrical conductivity collisional factor from convergent classical kinetic equation

15 p2287 A72-32410

Multispecies magnetoplasma as electrical conductivity tensor collisional factor from quantum mechanical convergent kinetic equation

15 p2287 A72-32411

Ionization energy loss of relativistic heavy nuclei for close collisions as function of charge, computing Born approximation corrections via Mott exact cross section

15 p2282 A72-32647

Stable mirror plasma machine, determining particle distribution near loss cone by asymptotic analysis based on transit to mean collision times ratio

16 p2432 A72-32808

Charged particle energy dissipation in cold collisional plasma, discussing collisions effect on power spectrum

16 p2436 A72-33651

Rotating plasma-neutral gas collision interaction studies, determining particle energy and velocity in partially ionized plasmas

16 p2438 A72-33916

Particle scattering due to Rosenbluth-Post convective plasma loss-cone instability distribution function

17 p2587 A72-34189

Rotational excitation of rigid rotor in argon-nitrogen system, measuring energy transfer moments by particle-body and perturbation technique

17 p2585 A72-34740

A review of the unified theory of relaxations in plasmas.

17 p2590 A72-35159

Soft collision plasma scattering function, conductivity and particle energy loss from simplified Fokker-Planck collision model

17 p2592 A72-35621

Growth rate and frequency dispersion characteristics of drift waves in an RF collisional plasma.

18 p2716 A72-36924

A technique for position sensing and improved momentum evaluation of microparticle impacts in space.

19 p2795 A72-37518

Metastable atomic oxygen deactivation in upper atmosphere by inelastic collisions and by spontaneous irradiation, noting airglow intensity dependence on red lines irradiation

19 p2792 A72-38633

Particle charging behind shock waves in suspensions.

20 p2914 A72-39627

Collision periodic orbits calculation in restricted three body problem

20 p2973 A72-39885

Possibilities of determining complex form factors from experiments with polarized particles

21 p3086 A72-40100

A comparison of some particle-in-cell plasma simulation methods.

21 p3089 A72-40105

Determination of the characteristics of the averaged motion of the carrier medium in turbulent gas flow with suspended particles

21 p3044 A72-40126

Transition probabilities and collision-induced transitions in excited levels of neon.

21 p3061 A72-40136

Lateral deviation of radio waves reflected from ionosphere.

21 p3022 A72-41321

Book - Excitation in heavy particle collisions.

21 p3088 A72-41525

Particle collisions integral in Boltzmann equation for arbitrary distribution function, with particular attention to two dimensional flows

22 p3205 A72-42266

Long wave oscillations attenuation by charged particle collisions in one- and two-component hot and cold Boltzmann plasma, using kinetic and polarization vector equations

23 p3318 A72-43325

Characteristics and constants of motion method for collisional kinetic equations.

24 p3426 A72-44984

NT PROTON DENSITY [CONCENTRATION]

Concentration distribution in turbulent flow as function of velocity field, deriving differential equations from characteristic functionals to describe diffusion process

01 p0049 A72-10190

Mesospheric OH volume density profile measurements by rocket-borne high resolution polarized Ebert-Fastie spectrometer

01 p0062 A72-10912

Solid particle influence on underexpanded gas jet shock structures, using schlieren photographs

03 p0342 A72-13840

Self consistent kinetic equations for evolution of particle distribution functions and wave intensity spectra of relativistic spatially homogeneous multispecies plasma in ambient magnetic field

04 p0553 A72-14401

Vertical extensive air showers at aircraft heights, constructing integral spectrum based on particle number

06 p0870 A72-17280

Numerical determination of particle number and mass flux density in monatomic rarefied gas flow through circular orifice at finite pressure ratio

07 p0972 A72-20107

Extraterrestrial magnetic spheroid concentrations observed in October 1967 and 1969 proposing relationship to rainfall frequency

08 p1226 A72-21109

Solar wind tangential discontinuities and shock waves determination from flux velocity vector, magnetic field and particle density measurements

08 p1227 A72-21154

Solar wind properties and discontinuity characteristics, describing particle densities, wind speed, magnetic field level and near earth electron and ion temperatures

09 p1377 A72-22756

Gas discharge plasma detection characteristics, examining electron and ion densities and collision rates dependence on electromagnetic field frequency and amplitude

09 p1361 A72-22956

Target jet density variations effect on vacuum in neutral atom beam ionization region of fast neutral particle magnetic trap

09 p1363 A72-23223

Equations of state for ultrahigh densities, obtaining relativistic statistical thermodynamics description of hadronic interactions

10 p1533 A72-23891

Deionization mechanism of expanding plasma cloud produced by arc burning in vacuum, discussing charged particle concentration and ion thermal velocity

10 p1521 A72-24356

Real time measurements of ground level and airborne particle concentrations and diffusion in 10-100 km range

11 p1681 A72-26081

Nonideal dense plasma properties, discussing electrostatic shielding, many particle clusters, phase transitions, metallization and electrical conductivity [AIAA PAPER 72-414]

11 p1695 A72-26164

Neutral gas velocity distribution, transverse drift velocity, particle and energy densities in column under free fall conditions, considering wastage by ionization processes

11 p1698 A72-26645

Thermospheric ion, electron and neutral particle concentration, composition and temperature changes during 7 March 1970 solar eclipse from rocket measurements

12 p1778 A72-27152

Nature and requirements of electrostatic inertial plasma confinement, deriving potential and particle densities as function of radius, grid voltage and current

12 p1850 A72-27281

Number density, particle, momentum and energy fluxes in model ion-exosphere with open magnetic field and asymmetric Maxwellian velocity distribution

13 p1948 A72-29115

Homogeneous plasma column generation by HF generator, probing for electron temperature and charged particle concentration

13 p2015 A72-29507

Positively and negatively charged plasma components thermodynamic density fluctuations effect on ionospheric and magnetospheric slowly varying electric fields measurement

13 p1953 A72-29810

Three layer atmospheric model for neutral gas motion-produced ionosphere and magnetosphere currents, electromagnetic field and charged particle concentration perturbations

14 p2100 A72-30632

Turbulence effects on electron, ion, aerosol, water vapor and ozone concentration in atmospheric layers

15 p2222 A72-31395

Atmospheric desorbed water molecules and ions number density vertical distribution in lower ionosphere and thermosphere

15 p2225 A72-31913

Anisothermal magnetoplasma with non-Maxwellian particle distribution function, calculating electrical conductivity collisional factor from convergent classical kinetic equation

15 p2287 A72-32410

Giant hygroscopic atmospheric dust particle concentration variations measured with light scattering monitor, noting frontal passage dependence on prefrontal concentration

16 p2386 A72-33604

Deionization mechanism of expanding plasma cloud produced by arc burning in vacuum, discussing charged particle concentration and ion thermal velocity

17 p2589 A72-34955

Statistical mechanics of magneto-active plasma.

17 p2590 A72-35144

Effect of a distributed sand roughness on the spectrum of wall pressure pulsations in a turbulent flow in a tube

17 p2541 A72-35542

Gas discharge plasma detection characteristics, examining electron and ion densities and collision rates dependence on electromagnetic field frequency and amplitude

17 p2593 A72-35885

Method for calibration and verification of automatic liquidborne particle counter/light method. [SAE ARP 1192]

18 p2692 A72-36533

Complex index of refraction of airborne fly ash determined by laser radar and collection of particles at 13 km.

18 p2661 A72-36637

Ignition moment of solid propellant particles monodisperse aggregate uniformly distributed in gaseous oxidizer

19 p2879 A72-37359

Solar wind tangential discontinuities and shock waves determination from flux velocity vector, magnetic field and particle density measurements

20 p2964 A72-39259

The muon flux of cosmic rays at sea level.

20 p2964 A72-39349

Meteoroid bodies particle density from basal photographs, noting dependence on orbital parameters

20 p2969 A72-39395

Angular distribution of interstellar atomic hydrogen.

23 p3315 A72-38334

Investigation of the angular distribution of particles on the basis of Cosmos-219 satellite data

23 p3343 A72-44174

Determination of the physical properties of atmospheric aerosol particles above the Atlantic

24 p3420 A72-44757

Steady-state distribution of the charged and neutral particle concentration in a bounded high-temperature turbulent plasma

24 p3429 A72-45493

NT ELECTRON DIFFUSION

NT IONIC DIFFUSION

Metal powders sintering activation mechanism, considering heterogeneous metals particles diffusion flow, mutual solubility and crystal lattices distortion

02 p0232 A72-11432

Astronomical model for solar cosmic ray bursts propagation including anisotropic particle diffusion along interplanetary magnetic field

03 p0407 A72-12944

- High temperature creep activation energies relationship to diffusion in TiC, ZrC and UC
03 p0371 A72-13461
- Turbulent particle diffusion statistical mechanical model, using random walk
03 p0344 A72-14331
- Trapped particles induced by fluctuating magnetospheric electric and magnetic fields, calculating radial diffusion and energy distribution and time variations
04 p0566 A72-14723
- Diffusion and fallout of polluting particulates emitted by aircraft engines, discussing effect of wing-tip vortices, plume visibility and monitoring, simulation and modeling
[ASME PAPER 71-WA/AV-2] 05 p0704 A72-15950
- Brownian particle sedimentation rate and diffusion coefficient determination by holographic double exposure interferometry
06 p0816 A72-17982
- Diffusion models of energetic solar particles in interplanetary medium, considering impulsive emission from solar flares
07 p1061 A72-20023
- Magnetospheric trapped particle diffusion coefficients and acceleration in earth radiation belts
07 p1062 A72-20035
- Upper atmosphere minor component distribution rearrangement, investigating transition time to diffusion equilibrium
08 p1155 A72-20803
- Solar cosmic ray diffusion in interplanetary medium, describing solar flare proton and heavy nuclei propagation in terms of time of arrival measurements
08 p1227 A72-21157
- One dimensional atmospheric turbulent diffusion model and semiempirical equation, considering jumplike changes in particle velocity
08 p1201 A72-21999
- Nonlinear initial boundary value problem for time dependent convection-diffusion equation with ionization and recombination reactions
09 p1341 A72-22472
- Approximate expression for charge exchange spreading of proton beam precipitating into atmosphere, showing dependence on atmospheric structure, collision data and primary particle energy
09 p1377 A72-22591
- Real time measurements of ground level and airborne particle concentrations and diffusion in 10-100 km range
11 p1681 A72-26081
- Recombination diffusion length of minority carriers in thin layer cuprous sulfide solar cells
12 p1856 A72-28011
- Combined photon and particle diffusion of two level system with ground and excited atomic states and photon emission-formed radiation field
13 p2001 A72-28509
- Cosmic ray diffusion in radial divergent flow of magnetic discontinuities in interplanetary plasma, discussing isotropy in presence of regular magnetic field
13 p2029 A72-28591
- Galactic cosmic ray anisotropy due to radial and diffusive streaming in direction of interplanetary magnetic field, using neutron monitor data
13 p1033 A72-29747
- Transverse particle diffusion across external homogeneous magnetic field under random isotropic large scale hydromagnetic turbulence
14 p2102 A72-30650
- Oxide inclusions induced reductions in Nabarro-Herring creep and sintering rates of metals, discussing effect of inclusions diffusional mobility in metal matrix
15 p2257 A72-32112
- Microscopic theory of weakly ionized plasma conductivity, showing particle diffusion function or transition probability description by linear Boltzmann equation
15 p2287 A72-32412
- Quantum mechanics variational methods reformulation for turbulent diffusion of marked particles
16 p2379 A72-33570
- Diffusion propagation and source distribution effects on cosmic ray charge composition and anisotropy in galactic disk, considering nuclear fragmentation
16 p2448 A72-33742
- Spatial diffusion dynamics, spin, and the Pauli equation
17 p2573 A72-34193
- Geomagnetically trapped alpha particles. I - Off-equator particles in the outer zone.
17 p2548 A72-35595
- Influence of carrier diffusion on the intrinsic response time of semiconductor avalanches.
18 p2717 A72-36083
- Propagation of an impurity in a laminar flow in a circular tube
18 p2682 A72-36892
- Motion and diffusion of energetic particles in the outer zone.
20 p2916 A72-39231
- Solar cosmic ray diffusion in interplanetary medium, describing solar flare proton and heavy nuclei propagation in terms of time of arrival measurements
20 p2964 A72-39262
- Determination of the duration of the diffusional motion of charges in a plasma with allowance for bulk ionization
22 p3213 A72-43116
- Parasitic pitch angle diffusion of radiation belt particles by ion cyclotron waves.
23 p3333 A72-44527
- High temperature creep activation energies relationship to diffusion in TiC, ZrC and UC
24 p3413 A72-44936
- Cosmic ray diffusion in radial divergent flow of magnetic discontinuities in interplanetary plasma, discussing isotropy in presence of regular magnetic field
24 p3435 A72-45091
- Steady-state distribution of the charged and neutral particle concentration in a bounded high-temperature turbulent plasma
24 p3429 A72-45493
- Wave growth in a strongly turbulent plasma.
24 p3430 A72-45568
- PARTICLE EMISSION**
NT ELECTRON EMISSION
NT FIELD EMISSION
NT ION EMISSION
NT NEUTRON EMISSION
NT PHOTOELECTRIC EMISSION
NT SECONDARY EMISSION
NT THERMIONIC EMISSION
- Smoke plume opacity or particulate content measurement by laser backscatter, using Q switched ruby and Nd lidars
[AIAA PAPER 71-1087] 01 p0058 A72-10544
- Spectral and polarization characteristics of type 4 bursts with respect to energetic particle emission and solar-terrestrial phenomena
03 p0407 A72-12938
- Neutrino emission process effects on solar C-N-O cycle energy generation and C 12/C 13 abundance ratio
04 p0567 A72-14911
- Azur satellite for investigating polar regions, inner radiation belt and solar particle emission
05 p0715 A72-16135
- Fast electron gun with subnanosecond switching times and 100 mA peak beam current for delayed coincidence studies of atomic decays
13 p1933 A72-29761
- Measurements of radon emanation from Apollo 11, 12, and 14 fines.
18 p2728 A72-36970
- Variation of evolved blue/red ratio for supergiants as function of stellar mass, discussing status of astrophysical test for neutrino emission
19 p2854 A72-37235
- PARTICLE ENERGY**
NT ELECTRON ENERGY
NT ELECTRON STATES
NT PROTON ENERGY
- Cosmic ray energetic spectrum variation from observed latitudinal effects during 1954-1962 solar activity cycle
01 p0119 A72-10607
- Parallel electric field evidence near auroral ionosphere deduced from low energy particles, energy spectra and angular distribution
01 p0061 A72-10895
- High energy nucleon tissue doses calculation based on averaged characteristics of nuclear interactions
[CERN-71-16] 02 p0162 A72-12067
- Depth-dose experiments with monodirectional 14 MeV neutrons in low scatter environment, describing test facility
[CERN-71-16] 02 p0162 A72-12068
- Induction heated low density supersonic free plasma jet diagnosis, determining velocities and heavy particle temperatures
02 p0265 A72-12361
- Electrostatic analyzer for very low energy particles, calculating trajectories
03 p0392 A72-14055
- Solar effects contradictory relationships with earth atmosphere, discussing geomagnetic disturbance, annual variations, stratospheric transport and high energy particles
05 p0656 A72-16233
- Polar cap absorption event, investigating solar high energy protons precipitation effects
05 p0709 A72-16239
- Energetic solar flare particles release from sun, describing satellite observations of solar electromagnetic radiation
05 p0710 A72-16522
- Correlation energy calculation for system of fermions by means of variational method
05 p0702 A72-16785
- Energetic charged particles penetration into magnetosphere by auroral simulation experiments with artificial solar wind, observing magnetic field microfluctuations behind collisionless shock front
06 p0805 A72-17469
- Boltzmann integrals for inelastic collisions and radiative processes in stationary monatomic plasma, using Grad 8-moment approximation of particles momentum distribution functions
06 p0861 A72-18174
- Electron photon cascade energy measurement by photometering blackened spots on X ray films
07 p0988 A72-19870
- Ionization loss effects on cosmic ray lifetime in galactic interstellar medium, noting dependence on particle energy
07 p1064 A72-20637
- Quarter thickness variation and particle temperature dependence on height and frequency in summer daytime F region
08 p1155 A72-20815
- Emission energy of positrons thermalized in moderators and coated with Au, suggesting Au negative work function existence
08 p1217 A72-21339
- Particle detector assembly for low energy heavy mass cosmic ray nuclei identification
08 p1167 A72-21508
- High energy cosmic ray hadrons energy measurement using glass scintillator ionization spectrometer
09 p1309 A72-22523
- Solar atmosphere low energy positron production by solar particle fluxes demodulated according to cosmic ray transport equations
09 p1378 A72-23022
- Target jet density variations effect on vacuum in neutral atom beam ionization region of fast neutral particle magnetic trap
09 p1363 A72-23223
- Scaling of energy spectrum of particles emitted in high energy nucleon-nucleon collisions
10 p1529 A72-24527
- Neutron flux and energy spectra from crossed field acceleration model of plasma focus and z-pinch discharges
11 p1693 A72-25565
- Elastic, inelastic and reactive scattering experiments with low, high and intermediate energy molecular beams
11 p1691 A72-25675
- Fast charged particle flux measurement in inner radiation belt by Cosmos 137 satellite in January-February 1967
11 p1713 A72-25947
- Craters produced by high speed hardened spherical particles, investigating depth and diameter relationship to impact speed
11 p1738 A72-26919
- Number density, particle, momentum and energy fluxes in model ion-exosphere with open magnetic field and asymmetric Maxwellian velocity distribution
13 p1948 A72-29115
- Time evolution of chromosphere layer heated by energetic particle stream during solar flare, noting cooling by Lyman continuum radiation transfer
13 p2032 A72-29721
- Energetic particle flux observation at very low altitudes near geomagnetic equator, noting narrow distribution around 90-deg pitch angle
13 p2034 A72-30122
- Microscopic processes within high energy ion acceleration in laser-produced plasmas, discussing transient electric field role
14 p2136 A72-30178
- Nonlinear interaction between oscillations produced by monoenergetic particles beam passing through plasma
14 p2136 A72-30306
- Maximum ion energy dependence on radiation density in laser plasma
14 p2137 A72-30315
- Magnetospheric geometry derivation from ISIS-1 observations of soft particles penetration into polar cap and auroral regions, discussing entry and energization mechanisms
15 p2227 A72-31953
- Stellar winds and breezes classification using energy flux and particles kinetic and thermal energies for criteria, noting coronal temperature effects
15 p2313 A72-32298
- The geometric factor of a cylindrical plate electrostatic analyzer.
17 p2553 A72-34639
- An improved measurement of the charge ratio of cosmic ray muons in the range 10-300 GeV/c.
17 p2599 A72-34920
- Investigation of energetic charged particles and VLF emissions on the 'Interkosmos-3' satellite
17 p2600 A72-35209
- Evidence for solar particle production above approximately 75 GeV.
17 p2600 A72-35365
- Black hole rotational energy extraction by super-radiant scattering with impinging wave amplification and by floating particle orbits with zero net radiation reaction
19 p2857 A72-37720

Effect of optical constants on the energy distribution in homogeneous particles illuminated by a parallel beam of light

19 p2812 A72-38216

On the acceleration time of particles in the solar atmosphere.

19 p2852 A72-38634

Coordinate system for use with high-latitude energetic-particle phenomena.

19 p2853 A72-38729

Properties of low energy particle impacts in the polar domain in the dawn and dayside hours.

20 p2964 A72-39541

Composition of cosmic-ray nuclei at high energies.

20 p2965 A72-39716

Change of solar flare proton to alpha ratios during an energetic storm particle event.

21 p3101 A72-41297

Experimental determination of some optical characteristics of a double magnetic prism-electrostatic mirror system

22 p3180 A72-42937

Nonlinear interaction between oscillations produced by monoenergetic particles beam passing through plasma

23 p3317 A72-43208

Maximum ion energy dependence on radiation density in laser plasma

23 p3318 A72-43218

High energy inelastic interactions in cosmic ray showers from Wilson chamber and ionization calorimeter observations, noting secondary particles occurrence dependence on primary energy

23 p3330 A72-44406

EAS Cerenkov glow and the relation of shower strength to the primary-particle energy

23 p3330 A72-44419

Low-energy nucleons in extensive air showers

23 p3331 A72-44424

Energy spectra and angular distributions of cosmic ray muons with an energy of 2 to 10 TeV

23 p3331 A72-44428

Angular distribution of high-energy cosmic-ray muons

23 p3331 A72-44434

Energy measurement of primary particles from shower formation in solids, discussing ultrasonic waves generation in metal plates and electromagnetic waves excitation in ferrites

23 p3291 A72-44437

Coherent cross section effects on primary particle energy in inelastic proton interaction with carbon nuclei at 20-600 GeV

23 p3332 A72-44439

Relationship between the energies of charged and neutral particles generated in the energy region above 100 GeV

23 p3332 A72-44447

Influence of the polarization of incident radiation on the distribution of the energy absorbed in a particle

24 p3424 A72-44621

Degenerate electron gas self energy approximation by dielectric function, calculating quasi-particle and plasmaron properties

24 p3428 A72-44797

PARTICLE FLUX

U FLUX (RATE)

PARTICLE FLUX DENSITY

NT ELECTRON FLUX DENSITY

NT NEUTRON FLUX DENSITY

NT PROTON FLUX DENSITY

Longitudinal variations of inner radiation belt particle flux density at low altitudes from Proton 2 satellite data

01 p0119 A72-10604

Rocket-borne measurement of particle fluxes and currents in auroral arc, determining pitch-angle distribution of electron and proton energies

01 p0120 A72-10897

Polar cap region solar particle fluxes from Esro 1/Aurorae satellite recordings, noting north-south asymmetry

03 p0348 A72-13506

Lunar ejecta and meteorites experiment, determining speed, direction, mass and flux density of cosmic dust particles

04 p0509 A72-15102

Cascade nozzle gas particle flow properties, discussing flow pressure experiments and theory at different streamlines

05 p0602 A72-16490

Inelasticity factor dependence on particle energy spectra to explain nucleon flux calculations and Proton satellite data, considering scattering cross sections

06 p0869 A72-17264

Muon densities in penetrating high energy particles, comparing with extensive atmospheric showers

06 p0871 A72-17289

Light generator aided autonomous calibration of Cerenkov spectrometer for continuous primary cosmic nuclear flux measurements

06 p0815 A72-17832

Scintillation crystal light yield dependence on emission energy in particle flux measurements with semiconductor spectrometer

06 p0816 A72-17835

Cosmic ray nuclei intensity and energy spectrum measurement in nuclear emulsions stack, noting no charge dependence in solar modulation process

07 p1059 A72-19582

Multichannel modular spectrometer with electrostatic analyzers for low energy electron and proton flux measurement

07 p0988 A72-19954

Spectrometers with electrostatic analyzers alternating with shielding and suppressing gratings for low energy electron flux measurement

07 p0988 A72-19955

Plasma sheet distribution in magnetosphere from low energy particle observations in equatorial region of magnetotail

07 p0977 A72-20031

Pulsar production rate relationship to high energy cosmic ray origin and number density

07 p1081 A72-20059

Geomagnetically trapped protons, electrons and alpha particles verification and measurements in inner and outer radiation belts

07 p1062 A72-20227

Primary cosmic rays alpha particles and protons energy spectra similarity and intensity difference at .05 to 1.6 TeV, using Proton satellites data

07 p1064 A72-20631

Meteorological effects on cosmic rays, deriving muon and pion intensity and meteorological coefficient formulas and computer calculation scheme

07 p1066 A72-20654

Probabilistic integral multiplicity of generation of primary cosmic ray particles from count rate and primary spectrum relationship, using definition for neutron component calculations

07 p1067 A72-20656

Primary cosmic ray high energy gamma quanta flux measurements on Cosmos 208 satellite-borne instruments

08 p1225 A72-20798

Visual aurora and Explorer 40 satellite simultaneous observations of VLF radio noise, noting hiss associated with light emissions and associated charged particle flux

[AD-740047]

09 p1299 A72-23006

Energetic particle flux measurement on spacecraft based on statistics of overflowing register counting Poisson process

09 p1312 A72-23261

Fast auroral hydromagnetic wave occurrence relation to substorm activity, suggesting role of enhanced particle population in magnetospheric region

10 p1476 A72-24962

Fast charged particle flux measurement in inner radiation belt by Cosmos 137 satellite in January-February 1967

11 p1713 A72-25947

Heavy ions from interplanetary dust, estimating contribution to solar wind flux

11 p1713 A72-26393

Simultaneous Esro satellites observation of spatial and temporal particle flux variations over polar caps

11 p1714 A72-26418

Solar wind distortion of stellar anisotropy of galactic cosmic rays, associating annual particle density variation with earth revolution about sun

13 p2029 A72-28590

Energetic particle flux observation at very low altitudes near geomagnetic equator, noting narrow distribution around 90-deg pitch angle

13 p2034 A72-30122

Midlatitude VLF emissions intensity relationship to dayside auroral particle precipitation flux

15 p2194 A72-31437

Micrometeorite flux observed by rocket-borne electroacoustic transducers

15 p2308 A72-31931

Correlated particle flux, magnetic field, electron intensity and riometer absorption measurements during recovery phase of polar magnetic substorm on 6 March 1970

15 p2226 A72-31946

Micrometeorite and cosmic dust flux rates for near earth orbit and interplanetary space from satellite and ground based measurements

15 p2309 A72-31955

Lunar rock abrasion and catastrophic rupture lifetimes for near earth micrometeoroid flux determination, using hypervelocity impact tests

15 p2309 A72-31956

Satellite Prospero onboard micrometeoroid detector data analysis for near earth flux

15 p2310 A72-31987

Lunar surface microerosion relationship to interplanetary dust particle flux distributions, investigating sputter erosion and lunar rocks lifetimes

15 p2310 A72-31988

Interplanetary particles intensity relationship with solar activity based on Heos A1 observations during 1969-1971

15 p2300 A72-31992

Stable mirror plasma machine, determining particle distribution near loss cone by asymptotic analysis based on transit to mean collision times ratio

16 p2432 A72-32808

Exobase atomic hydrogen densities for zero ballistic net flux as function of temperature distribution, noting support of McAfee hypothesis by OGO-4 polar UV observations

16 p2384 A72-32979

Interstellar absorption of Crab Nebula soft X ray from Aerobee rocket photographic scan, estimating average volume densities for H, O, Ne, Si and Mg

16 p2445 A72-33129

Cosmic ray isotopic data extraction via geomagnetic field, discussing magnetic effects on particle flux and finite resolution limitations of counters

16 p2447 A72-33721

HEAO experiment proposal for Be to Sn flux and energy spectra and Be to Fe isotopic composition of galactic primary cosmic rays

16 p2447 A72-33733

Particle and energy fluxes across magnetic field in axisymmetric toroidal magnetic traps and plasmas with weak collisions, calculating radial electric field

16 p2440 A72-34153

The solar wind H and He/+/- content.

17 p2598 A72-34627

The absolute vertical cosmic-ray muon intensity at sea level.

17 p2600 A72-35147

Entry of high-energy solar protons into the distant geomagnetic tail.

17 p2601 A72-35588

Velocity and flux dependence of the solar-wind helium abundance.

17 p2602 A72-35607

A method of calculating the pitch angle distributions of particle fluxes based on rocket and satellite data.

17 p2558 A72-35840

Possibility of estimating an energetic particle stream in the ionospheric D region at sunrise and under daytime conditions

18 p2688 A72-36858

Zenith angle dependence of the meteorological corrections coefficients for cosmic ray component.

19 p2852 A72-38632

Diurnal variation of the H+ flux between the ionosphere and the plasmasphere.

19 p2793 A72-38759

Observations of the radial gradient of galactic cosmic radiation over a solar cycle.

20 p2964 A72-39333

High latitude particle precipitation and source regions in the magnetosphere.

20 p2964 A72-39542

Particle flux measurements from rockets during a solar cosmic-ray flare in April, 1969

22 p3218 A72-42226

Association between interplanetary shock waves and delayed solar particle events.

23 p3332 A72-44503

Annual variation of the interplanetary He+ velocity distribution at 1 AU.

23 p3332 A72-44505

Energy and mass content of high-speed solar-wind streams.

23 p3332 A72-44508

Nature of the long-term and short-term modulations of cosmic-ray intensity.

23 p3332 A72-44521

Behavior of outer radiation zone and a new model of magnetospheric substorm.

24 p3396 A72-44850

Solar wind distortion of stellar anisotropy of galactic cosmic rays, associating annual particle density variation with earth revolution about sun

24 p3435 A72-45090

PARTICLE IN CELL TECHNIQUE

Numerical solutions to gas dynamic problems with large deformations by particle in cell method

06 p0800 A72-18102

A comparison of some particle-in-cell plasma simulation methods.

21 p3089 A72-40105

PARTICLE INTENSITY

Cosmic ray muon intensity in interplanetary magnetic field, revealing sidereal variation due to motion of solar system relative to local galactic rotation frame

06 p0873 A72-17648

Galactic cosmic ray particle intensity decrease relationship to low energy proton flux increase based on interplanetary Zond 3 and Venera probes measurements

07 p1063 A72-20626

Converging or diverging high intensity charged particle beams arbitrary profile shaping, obtaining solution via Laplace equation through reduction to Cauchy problem

10 p1521 A72-24362

Penning ion source for multiply charged ions high intensity beams generation, describing axial type design with electron focusing magnetic coil

10 p1516 A72-25030

Sea level absolute vertical cosmic ray muon intensity from range spectrometer measurements within tropic zone 12 p1864 A72-28225

Converging or diverging high intensity charged particle beams arbitrary profile shaping, obtaining solution via Laplace equation through reduction to Cauchy problem 17 p2589 A72-34961

Liquid scintillation counters application in search for relativistic quarks in cosmic rays, setting upper confidence limits on particle intensity 17 p2601 A72-35471

Geometric factor of a cosmic ray detector - Equivalence of alternative analytical derivations. 22 p3178 A72-42647

PARTICLE INTERACTIONS

NT ELECTRON CAPTURE

NT ELEMENTARY PARTICLE INTERACTIONS

NT ION ATOM INTERACTIONS

NT MOLECULAR COLLISIONS

NT MOLECULAR INTERACTIONS

NT NUCLEAR INTERACTIONS

NT SPIN-ORBIT INTERACTIONS

Electron beam interaction with electromagnetic waves in longitudinal interaction devices during focusing by homogeneous magnetic and periodic electrostatic fields 02 p0189 A72-11564

Auroral current generation by ionization and space charge transport interaction between charged particles and atmospheres 02 p0273 A72-11928

Macroscopic geometry and velocity spaces of plasma collective modes involving long range force interaction between particles 02 p0267 A72-12841

Fast particle interaction with intergalactic matter, discussing relaxation of power law cosmic ray spectra 04 p0570 A72-14553

Transport coefficients of relativistic gas by method of moments, assuming constant differential cross section of particle interactions in center of mass system 04 p0547 A72-14630

Large amplitude whistler mode wave packet multiple emissions model including wave-particle interactions 04 p0517 A72-14948

Ground state energy of interacting electrons for entire density range from two-point Pade approximation 04 p0549 A72-15229

Book on auroras, discussing primary particle-atmosphere interactions, H line emission, geometry, intensity, height and atmospheric temperature determination from auroral spectra 04 p0519 A72-15356

Second virial coefficient, temperature derivatives and additive components for $12/7$ potential of charged particle interaction in gas 05 p0692 A72-15841

Cosmic ray particle high energy inelastic interactions, discussing pion and nucleon interaction angular and energy characteristics and muon production mechanism 06 p0869 A72-17270

Nuclear photoemulsions under bombardment by pion beam of 60 GeV/c momentum, investigating pion-nucleon interactions involving recoil protons 06 p0851 A72-17273

Pion-nucleon high energy interactions, determining inelasticity coefficient distribution 06 p0851 A72-17274

Solid thermal motion influence on atom colliding with solid surface linear semiinfinite atomic chain, presenting accommodation coefficient calculation method 06 p0853 A72-18140

Magnetospheric plasma sources, discussing wave-particle interactions and acceleration mechanisms 06 p0810 A72-18281

Cs and Hg vapors compressibility factor in supercritical range as function of density, considering charged particles and atoms polarization interactions in ionized metal vapors 07 p1040 A72-18943

Semiautomatic stereophotographic processing of cosmic ray shower particle interaction data from Wilson chamber 07 p0988 A72-19865

Extensive atmospheric showers and high energy transfer from interacting nucleons to electron photon cascades 07 p1060 A72-19867

Electron beam welding induced secondary X rays observation with pinhole X ray movie camera to determine beam-metal interactions during penetration 07 p0997 A72-20003

Quasi-linear theory of magnetosphere gyroresonant wave-particle interactions, discussing particle distribution function anisotropy, wave packet effects, whistler mode, energy and pitch angle distributions, etc 07 p0978 A72-20034

Neutrino interactions in lepton era of universe and hot big bang cosmology according to proton-neutrino coupling theory 07 p1084 A72-20538

Auroral charged particle fluxes electrodynamic interaction with atmosphere, determining ion formation rate and electron concentration and conductivity 08 p1155 A72-20804

Ferroelectrics with strong hydrogen bonds, deriving self consistent optical phonon frequency and coupled proton-phonon vibration spectrum 09 p1366 A72-22221

High energy particle and ionizing radiation effects on glasses in aerospace environment 09 p1336 A72-22402

Interaction forces between monovalent metal crystals determined from electrons quantified energy variations 10 p1525 A72-24136

Incompressible fluid jet propagation beyond charged particle source exit section, investigating electrohydrodynamic interaction parameter 10 p1522 A72-24549

Random walk models replacing Fokker-Planck equation for many particle systems with Coulomb interactions 10 p1513 A72-25041

Particle-proton total cross section from cosmic ray data on proton-air inelastic cross sections 11 p1712 A72-25884

Natural oscillations of magnetosphere and trapped radiation transport by electromagnetic pulses as possible mechanism for disturbances from thermonuclear explosion reaction on particles in natural radiation belt 11 p1712 A72-25935

Nonlinear interactions between synthesized plasma positive and negative ion beams, discussing effect on individual velocity distribution functions 12 p1849 A72-27058

Time structure of massive interacting particles with energies above 20 GeV near axes of cosmic ray showers of energy above 100 TeV 12 p1864 A72-27737

Computer simulation of plasmas by following actual orbits of particles interacting through electrostatic forces 12 p1852 A72-27914

Direct particle theory of weak interactions, considering two component spinors and leptonic decay 13 p2007 A72-28500

Ordering in fcc lattice ternary alloys with allowance for atoms interactions, noting phase transformation critical temperature and superlattices existence 13 p1976 A72-28691

Auroral current generation by ionization and space charge transport interaction between charged particles and atmosphere 13 p2030 A72-29240

Electron beam-helicons interaction in semiconductor plasma, determining instabilities onset conditions for unbounded system 14 p2141 A72-30172

Relativistic plasma particle correlation function based on transverse electromagnetic field energy density treatment by enlarged Bogoliubov hypothesis 14 p2140 A72-30881

Bound states and Coulomb interaction of continuum particles effects on thermodynamic properties of cesium plasma calculated on computer for different pressures and temperatures 15 p2283 A72-31259

Second virial coefficient, temperature derivatives and additive components for $12/7$ potential of charged particle interaction in gas 15 p2280 A72-31260

Review of symposium on D region, upper polar ionosphere, magnetosphere and wave-particle interactions 15 p2229 A72-32251

Electromagnetic field-two level atoms coherent interactions, using semiclassical approximation 15 p2250 A72-32305

Underground delayed shower particles small pulse events interaction analysis for muons and pions compared with quark behavior 16 p2450 A72-34140

Particle excitation processes in solar corona, ionosphere and astrophysics, discussing electron affinities, ion-molecule reactions, forbidden atomic transitions and Fe II problem 16 p2432 A72-34150

Master equations for finite systems. 17 p2576 A72-35153

Superposition principle in test particle method for reducing plasma cloud kinetic theory to determination of conditional probability function involving Vlasov equation 17 p2591 A72-35163

VLF wave propagation and its interaction with the magnetoplasma. 17 p2516 A72-35357

On the magnon interaction in haematite. I - Magnon energy of optical mode. 17 p2595 A72-35358

Whistler side-band growth due to nonlinear wave-particle interaction. 17 p2517 A72-35601

Radiant interchange among suspended particles and its effect on thermal relaxation in gas-particle mixtures. 17 p2638 A72-35643

[DFVLR-SONDDR-210] Approximate calculation of the magnitude of the momentum during the passage of a material particle past an elongated homogeneous biaxial ellipsoid 17 p2618 A72-35812

Accretionary processes in the early solar system - An experimental approach. 17 p2618 A72-35836

Geomagnetic activity and the solar situation in the neighbourhood of proton effects. 18 p2686 A72-36227

Weak decay, branching ratio and decay probability of strongly interacting particle event observed by Niu in cosmic nuclear jet shower 19 p2853 A72-38808

Weinberg model application to hot universe of weakly interacting particles at nonzero temperature, noting long range character 21 p3084 A72-40726

Interactions between stars and local dust formations 21 p3113 A72-41758

Energy degradation calculation for electron interaction with carbon dioxide molecules, discussing relationship with Mariner UV data 22 p3171 A72-42421

The threshold of disintegration of nuclei in a degenerate electron-neutron gas 22 p3209 A72-42963

Ionization calorimeter for neutral pion production investigation in high energy hadrons interaction, noting energy transfer identity for nucleon and pion interactions 23 p3330 A72-44409

Recording high-energy particle interactions by the method of the controlled emulsion stack of large volume 23 p3291 A72-44438

The concepts of mean force, mean velocity, and ensemble velocity for a particle ensemble 24 p3425 A72-45070

Nonlinear interactions between synthesized plasma positive and negative ion beams, discussing effect on individual velocity distribution functions 24 p3431 A72-45711

PARTICLE MASS

NT ELECTRON MASS

Particle mass monitor system based on piezoelectric microbalance combined with electrostatic precipitator collector, considering applications to air quality monitoring, laboratory aerosol research, process control, etc [AIAA PAPER 71-1100] 01 p0067 A72-10548

Lunar ejecta and meteorites experiment, determining speed, direction, mass and flux density of cosmic dust particles 04 p0509 A72-15102

Mass-zero spin-two particle field theory of gravitational interaction with covariance under full conformal group 09 p1355 A72-22684

Reduced mass and asymmetry differences effects on elastic collision integrals and thermal diffusion factors for isotopic hydrogen molecules 10 p1515 A72-24340

Cosmological models with astrophysical and geophysical properties by introducing particles mass field and dimensionless coupling constant in conformally invariant gravitational theory 10 p1541 A72-24475

Finite rest masses of wave quanta in material media, discussing dispersion and Einstein formulas equivalence, Doppler effect, gravitational red shift and radio photon trajectories 10 p1512 A72-24790

Time structure of massive interacting particles with energies above 20 GeV near axes of cosmic ray showers of energy above 100 TeV 12 p1864 A72-27737

Finite particle propagator constructed by path integral method, deriving infinitesimal propagator in relativistic quantum mechanics from mass nature consideration in Machian cosmological sense 13 p2001 A72-28499

Proton accretion effect on circumstellar dust grains mass, noting impossibility of grain formation in H II region 13 p2048 A72-29790

Poincare noninvariance of Stigma equation as alternative to Dirac equation for spin one-half finite mass particles 15 p2780 A72-31519

Isotropic, space-like, Maxwellian particles of real mass and of time-like velocity 18 p2710 A72-36472

Finite range gravitation theory extension to generally covariant massive two-tensor field gravitation theory containing eight dynamically independent degrees of freedom 20 p2953 A72-39342

Longitudinal electric waves absorption in interstellar space due to electron-heavy particle collisions, considering photon rest mass

20 p2969 A72-39348

An upper limit on the neutrino rest mass.

21 p3088 A72-40830

PARTICLE MOTION

Drift shells and pitch angle evolution of energetic particle motion in magnetospheric model including convection electric field

01 p0117 A72-10077

Hot magnetoplasmas cyclotron radiation, investigating thermal particle motion effects

01 p0107 A72-10142

Optimal control of material point motion in thin spherical layer of central gravitational field, solving by approximation

01 p0127 A72-10355

Optimal flight of material point in central field of forces subject to controlled small thrust

01 p0127 A72-10356

Collisionless motion of solar wind ions in helical magnetic field, giving transfer function of charged particles

01 p0118 A72-10360

Plasma electron and proton motion in equatorial plane of magnetosphere under geomagnetic disturbance generated electric field

01 p0058 A72-10586

Euler and Lagrange methods of calculation for agglomeration of particles due to velocity drop disparities among particles in Laval nozzles

02 p0149 A72-11593

Geomagnetic PDP pulsations oscillation frequency drift, considering proton motion characteristics in magnetospheric equatorial plane

02 p0217 A72-11931

Charged particle motion in strong magnetic field, considering magnetic moment and longitudinal adiabatic invariants

02 p0268 A72-12843

Particle motion in uniform acceleration field via Schwarzschild line element of general relativity, applying to clock paradox

03 p0388 A72-13227

Adiabatic charged particle orbits in magnetic null sheet with transverse electric and added normal magnetic fields

03 p0348 A72-13512

Collision integral for classical electron plasma, concerning Born-Bogoliubov-Green-Kirkwood-Yvon equations for long range interaction potential and motions of multiple particles

03 p0399 A72-14069

Relativistic equations of motion of charged particle interacting with plane electromagnetic wave propagating at arbitrary angle to uniform magnetic field for magnetosphere model

04 p0554 A72-14406

Conditionally periodic motions of particle in gravitational field of axisymmetric oblate planet, describing canonical transformations for Hamiltonian function reduction to normal form

04 p0572 A72-14638

Cauchy-Poisson problem of infinitely deep fluid wave motion resulting from initial particle velocities and horizontal equilibrium surface change

04 p0511 A72-14648

Nonrelativistic charged particle resonating with circularly polarized transverse electromagnetic wave in nonuniform magnetic field, showing Fresnel diffraction pattern-like motion

04 p0557 A72-14951

Hydrodynamic equations for non-Lagrangian statistical mechanical particle systems with three degrees of freedom under frictional and velocity dependent forces

04 p0512 A72-15202

Charged particle motion equations for fifth order spherical aberration of quadrupole-octupole lens with arbitrary electrode and pole shapes

05 p0638 A72-16989

Plasma heating and compression with nonadiabatic charged particle motion in uniform magnetic field

05 p0701 A72-17239

Potential around moving test particle in quiescent plasma, discussing energy loss, transport properties and gravitational analog

06 p0859 A72-17549

Longitudinal ambipolar acoustic instability effect on duration of plasma particle motion to wall across magnetic field, using phase method

06 p0860 A72-17693

Field-dynamic equilibrium of macroparticle motion in central field, comparing with Schroedinger equation

06 p0890 A72-18418

Optimization problems in gravitational attraction, considering homogeneous ellipsoids interaction and free particle simple harmonic motion

06 p0851 A72-18740

Convective heat transfer coefficient for particles of arbitrary shape in flow at low Reynolds number, using equivalent radius method

07 p1098 A72-18985

Trapped particle motion response to collapsing dipole moment in secularly varying geomagnetic field

07 p1058 A72-19158

Micron sized particle velocity relaxation measurement in shock wave, using laser Doppler methods [CLEA PAPER 11,3]

07 p1005 A72-19389

Equations of free particle motion, gas energy, distribution evolution and cosmic indeterminacy for Friedmann universe filled with uniform density and pressure ideal gas

07 p1074 A72-19429

Particle motions in earth magnetospheric tail and core, estimating maximum rate of magnetic field annihilation and magnetic drift shell

07 p1062 A72-20027

Book on models of particles and moving conducting media covering generator electrodynamics, electron tubes, particle accelerators, plasma and electron beam simulation, ion propulsion, etc

07 p1036 A72-20203

Distant stellar satellites existence possibility based on maximum distance estimation for material particle motion stability with respect to sun or another star

08 p1231 A72-21133

Particle motion in conformal spaces in general relativity, deriving gravitational potential and proper energy of mass point

08 p1209 A72-21369

Negative reabsorption coefficient for induced emission of neutron moving in medium in magnetic field

09 p1364 A72-23357

Topside ionosphere characteristics, discussing particle mean free path and geomagnetic field effects on conductivity, plasma anisotropies and latitudinal variations

10 p1473 A72-24704

Ionization movement of charged and neutral particles in F 2 region coupled to air movement by collision drag forces

11 p1621 A72-25839

Auroral plasma particle discharge during motion in strong inhomogeneous magnetic field, magnetospheric instability due to temperature anisotropy

11 p1715 A72-26904

Tracer particle motion behavior in laser anemometry for turbulent flow, comparing liquids with gases for accuracy

12 p1809 A72-27763

Theory of magnetotail elongation based on magnetosphere neutral layer drift motion due to electric current from trapped charge carriers inside surrounding plasma sheath

12 p1802 A72-27770

Russian book on geomagnetic field cosmic rays covering charged particle motion theory, extraionosphere currents, magnetosphere tail and solar wind effects, etc

12 p1864 A72-28345

Random number method for particle motion in homogeneous turbulence field, using Brownian motion Markov process for turbulence approximation

13 p1940 A72-28421

Finite particle propagator constructed by path integral method, deriving infinitesimal propagator in relativistic quantum mechanics from mass nature consideration in Machian cosmological sense

13 p2001 A72-28499

Geomagnetic PDP pulsations oscillation frequency drift, considering proton motion characteristics in magnetospheric equatorial plane

13 p1949 A72-29243

Relativistic analysis for synchrotron gravitational radiation emitted by particle in circular orbit around Schwarzschild black hole, noting astrophysical implications

13 p2007 A72-30123

Meteorite particle movement in earth atmosphere, discussing deceleration dependence on velocity, atmospheric density and surface evaporation reactive forces

14 p2152 A72-30493

Earth capture of dust particles moving in ecliptic plane heliocentric orbits, using three gravitational bodies analysis

14 p2153 A72-30494

Auroral electron spectrum space-time dynamics during magnetospheric substorms, using X ray bremsstrahlung balloon data

14 p2101 A72-30637

Geomagnetic field multipoles effects on radiation belt particle motion for analysis of true anomalies

15 p2222 A72-31280

Relaxation oscillations in dynamic systems describing turbulence in fluid, rigid body and particle motions

15 p2263 A72-31755

Dynamic particle field in-line holographic recordings using IR film and p-n junction GaAs lasers

15 p2237 A72-32056

Secular and long term periodic perturbation effects of third body upon particle motion in three body problem, discussing mass motion in Jovian gravitational field

15 p2312 A72-32120

Nonequilibrium relativistic plasma fluctuations with direct movement of particles, considering isotropic velocity distribution of particles

15 p2289 A72-32695

Lorentz-covariant procedure for equations of structure and motion of particles represented by singularities in Einstein relativistic field theory

16 p2422 A72-32880

Spherical particle accelerated motion in stationary viscous fluid, using numerical integration technique for velocity and displacement computations

16 p2375 A72-32907

Plasma motion relation to magnetic field line motion for imperfect electroconductivity, noting comparison with total particle drift distance

16 p2439 A72-33933

Dispersive motions in the ionosphere.

17 p2546 A72-34696

Transverse diffusion and conductivity coefficients for a three-dimensional magnetized equilibrium plasma.

17 p2592 A72-35379

Lunar local surface magnetic fields production mechanism, considering convection currents due to ionization of volcanic-ash-particle flow by electrodynamics model

17 p2614 A72-35586

Approximate calculation of the magnitude of the momentum during the passage of a material particle past an elongated homogeneous biaxial ellipsoid

17 p2618 A72-35812

Auroral zone splitting into various radiation intensity regions, discussing DR currents influence on particle motion in magnetosphere and structural relationship

17 p2550 A72-35856

Capture zone in noninteracting particles rarefied flow around magnetic dipole with transfer into finite orbits under small perturbations

17 p2593 A72-35906

Particle motion behind oblique shock wave in two phase supersonic wedge flow, deriving expressions for particle trajectories and velocity equalization time

17 p2487 A72-35926

On motions with a history of constant deformation

18 p2680 A72-36463

Measurement of aerosol motion and wind velocity in the lower troposphere by Doppler optical radar.

18 p2706 A72-36639

Anomalous motion of radiating particles in strong fields.

18 p2713 A72-36715

Pulses of gravitational radiation of a particle falling radially into a Schwarzschild black hole.

18 p2711 A72-36714

Meteorite particle motion in earth atmosphere, discussing deceleration dependence on velocity, atmospheric density and surface evaporation reactive forces

19 p2864 A72-38322

Earth capture of dust particles moving in ecliptic plane heliocentric orbits, using three gravitational bodies analysis

19 p2864 A72-38323

Radiation of charged particle moving uniformly in a nonstationary magnetoactive plasma

19 p2843 A72-38570

Motion and diffusion of energetic particles in the outer zone.

20 p2916 A72-39231

High energy particle and photon orbital and vortical motions in Kerr metric outside equatorial plane in gravitational field

20 p2953 A72-39341

Heuristic description for harmonic oscillator as quantized model of anharmonicity applied to excitation fields involving particle clusters and multibody configuration

20 p2953 A72-39398

Nonlinear theory of particle motion in monochromatic Alfvén wave field application to Pc-1 geomagnetic pulsations evolution

20 p2917 A72-39408

Motion of particles injected from the surface into stagnation-point flow.

20 p2913 A72-39611

Note on the symmetries of certain material tensors for a particle in Stokes flow.

21 p3044 A72-40113

Improved criteria for hyperbolic-elliptic motion in the general three-body problem.

21 p3109 A72-41333

Charged particle uniform motion in sinusoidally space-time periodic medium, determining Cerenkov and transition radiation field spectrum from Brillouin diagram

21 p3088 A72-41378

Hamiltonian analysis of charged particle motion in the pulsar rotating magnetic field.

21 p3111 A72-41472

Reflector-analyzers for studies of rarefied low-energy plasmas

21 p3058 A72-41731

Radiation of an oscillator moving parallel with the interface of two media 21 p3036 A72-41843

Accuracy of the conservation of the third adiabatic invariant of charged-particle motion in axisymmetric fields. II 22 p3217 A72-42209

Radiation from a free electron interacting with a circularly polarized laser pulse. 23 p3296 A72-43875

Improved calculation of resonant frequencies of Helmholtz resonators. 23 p3315 A72-44372

S-system motion effect on angular distribution of secondary high energy particle cluster in showers formed by primary and neutral particles, considering nucleon collision line 23 p3331 A72-44436

PARTICLE PRODUCTION

NT PAIR PRODUCTION

Neutron production mechanism and energy spectrum in thermal plasma focus by time of flight spectrometry 01 p0109 A72-10243

Atmospheric primary and secondary cosmic ray propagation with close reference to two-fire-ball, H-quantum and excited baryon models of multiple meson production 01 p0121 A72-11122

Monte Carlo simulation on high energy cosmic ray propagation and multiplication in high altitude emulsion chamber observations, examining two-fire-ball and H-quantum models 01 p0121 A72-11123

Micrometer particle formation by water vapor photolysis at 1500-1700 Å, noting particle production rate and implications to planetary atmosphere physics 02 p0268 A72-12207

Atmospheric neutron production by cosmic rays, calculating Cd-In ratio 05 p0662 A72-16258

Ion charge composition in plasma-electron beam system in strong longitudinal magnetic field, noting multiply charged ions production under high temperature conditions 05 p0701 A72-17235

Multiple meson production in 250 GeV nucleon-nucleon collisions in LiH targets, noting 40 per cent formation of heavy meson cluster fireballs 06 p0868 A72-17259

Particle multiplicity and momentum spectra for high energy inelastic nuclear interactions in Wilson chamber with polyethylene target 06 p0868 A72-17261

Multiple production processes hydrodynamic-type models validated by high energy particle collision collective interactions 06 p0869 A72-17265

Particle creation by strong rapidly changing gravitational fields in gravitational collapse of heavy star and in initial singularity 07 p1068 A72-19000

Particle production and vacuum polarization, in anisotropic gravitational field, discussing energy momentum tensor values and collapse behavior 07 p1034 A72-19632

Mathematical model for superheavy cosmic ray production by spallation on interstellar hydrogen, assuming single source for particle injection with given charge spectrum 07 p1062 A72-20197

Solar protons propagation from instantaneous injection source and inhomogeneities interaction description by mean free path and scattering angle specification 07 p1063 A72-20627

Nucleon and electromagnetic component generation, energy spectrum and diffusion during solar flares 07 p1066 A72-20651

Computerized numerical calculation of muons production spectrum, angular distribution and Coulomb scattering in determining meteorological factors effects on cosmic rays 07 p1067 A72-20655

Probabilistic integral multiplicity of generation of primary cosmic ray particles from count rate and primary spectrum relationship, using definition for neutron component calculations 07 p1067 A72-20656

Radio absorption in lower ionosphere obtained from vertical distribution of electron density and production rates from solar protons energy spectrum 08 p1226 A72-20816

Solar atmosphere low energy positron production by solar particle fluxes demodulated according to cosmic ray transport equations 09 p1378 A72-23022

Stellar evolution from precarbon-burning contraction to presupernova stage with and without neutrino production by electron neutrino interaction 10 p1545 A72-24825

Cosmic ray experiment jet shower event with possible new particle existence 11 p1712 A72-25867

X ray observation inconsistency with matter creation in steady state universe due to inner bremsstrahlung from neutron decay 11 p1713 A72-26125

Scaling hypothesis and limiting fragmentation mechanism for cosmic ray muon production, noting energy independent charge ratio 15 p2298 A72-31289

Resonant and semiweak process production cross sections for massive Lee-Wick spin-zero and spin-one bosons at high energies 15 p2280 A72-31290

Energetic electrons generation and relaxation in narrow belt near 2.8 L measured with Cosmos 137 Cerenkov counter 15 p2299 A72-31909

Metastable ²S/ atoms production by electron impact induced dissociative excitation of molecular deuterium, measuring total cross section via Lyman alpha flux 15 p2282 A72-32645

Meson exchange effects on solar pion-production process, using low energy Adler theorem with cross section correction factor 16 p2456 A72-33476

Li, Be and B nuclei production via nuclear spallation reactions generated by Galactic cosmic ray bombardment of interstellar gas 16 p2448 A72-33737

Test of scale invariance in pion production at high energies using cosmic ray primary nucleon and sea level muon intensities. 17 p2599 A72-34875

Evidence for solar particle production above approximately 75 GeV. 17 p2600 A72-35365

Magnetospheric convection induced longitudinal or Fermi acceleration role in nighttime auroral particle flux production mechanism 17 p2601 A72-35592

Neutron production in exploding-wire discharges. 21 p3089 A72-40338

Production of light elements in the solar system. 23 p3335 A72-43487

Multiplicity of particles generated in inelastic interactions of nucleons with LiH nuclei at energies from 150 to 550 GeV 23 p3329 A72-44405

Particle production in inelastic high energy interactions, noting correlation between particle pairs and groups 23 p3330 A72-44407

Multifireball theory of particle production in inelastic high energy interactions, using elastic scattering amplitude for inelastic processes model 23 p3316 A72-44412

General characteristics of proton-nucleon and coherent interactions at an energy of 67 GeV 23 p3317 A72-44415

A study of the mechanisms of formation of penetrating particle groups by the spark calorimeter method 23 p3291 A72-44430

Fluctuations of the spatial distribution of the number of particles in showers generated by muons in heavy material 23 p3331 A72-44431

Coherent cross section effects on primary particle energy in inelastic proton interaction with carbon nuclei at 20-600 GeV 23 p3332 A72-44439

Relationship between the energies of charged and neutral particles generated in the energy region above 100 GeV 23 p3332 A72-44447

Particle production and vacuum polarization in anisotropic gravitational field, discussing energy momentum tensor values and collapse behavior 24 p3424 A72-44564

PARTICLE SIZE DISTRIBUTION

Rain droplet size distribution effects on microwave attenuation at millimeter wavelengths, comparing calculation with measurement 01 p0027 A72-10406

Monostatic and bistatic lidar and solar radiometer sensing techniques for remote measuring of aerosol size distributions [AIAA PAPER 71-1057] 01 p0066 A72-10528

Radiative, segregation and evaporation processes of ice particles surrounding early type stars of Orion association, justifying ice particle model for dust grains 01 p0129 A72-10794

Martian surface nature from Surveyor and Apollo missions data on lunar particle size distribution 01 p0132 A72-11037

Visibility relationships to atmospheric liquid water content in fog derived from fog drop size distribution model 01 p0096 A72-11281

Atmospheric aerosols size/altitude distribution via sun aureole sky brightness and airborne particle counterpoint sampling measurements 02 p0213 A72-11860

Venus cloud reflected radiation flux and polarization by Monte Carlo technique, using models with different particle size distributions 02 p0280 A72-12193

Surface moisture effect on dielectric properties of ultrahigh barium titanate particulates of varying particle size [ACS PAPER 7-E-69F] 02 p0269 A72-12416

Mean free path and particle size distribution in dispersion hardened nickel-thoria alloys, obtaining interparticle spacing by Scheil method 02 p0245 A72-12549

Cobalt-rare earth single particles hysteresis loops interpretation, considering coercive force relationship to particle size [IEEE PAPER 22.1] 03 p0402 A72-13781

Sedimentology of Apollo 11 and 12 soils, investigating grain size distribution 03 p0440 A72-14325

Grain size and precipitate parameters effect on creep properties of Ni-Cr alloys 03 p0379 A72-14339

Luna 16 sampled lunar rock size distribution near craters in Sea of Rains from Lunokhod panoramic pictures 04 p0576 A72-15068

Polydisperse spray device with controllable drop size distribution for two phase detonation research 04 p0509 A72-15486

Impurity content, particle size and abrasion resistance role in abrasiveness of molybdenum disulfide 06 p0836 A72-18589

Molybdenum disulfide lubricating effectiveness improvement with finer particles at aggravated sliding conditions, suggesting surface roughness qualifications 06 p0837 A72-18605

Sputtered molybdenum disulfide lubrication on polished metal surfaces with low friction coefficient, strong adherence, high density and small particle size 06 p0824 A72-18607

IR radiation radiative transfer calculation for selected spectral intervals due to various model cloud droplet size distribution 07 p0980 A72-20456

Particle mass spatial distribution effect on particulate damping of combustion acoustic vibrations in solid rocket propellants 08 p1224 A72-21617

Burning rate dependence on oxidizer particle size of ammonium or potassium perchlorate mixtures with organic fuels 09 p1373 A72-23146

Environment and grain size effect on steady state creep and creep rupture properties of Ni-W solid solution 09 p1331 A72-23381

Aluminum nitride amount and particle size measurement at austenitic grain coarsening temperatures in low carbon steels 11 p1656 A72-25755

Metal powder mixing, examining friction effects and optimal particle sizes, shapes and amounts 11 p1642 A72-26828

Theoretical and measured rainfall attenuation of millimeter waves, correlating attenuation coefficients, rain rate and drop size distributions 12 p1785 A72-27803

Particle size distribution functions reconstruction from scattered radiation data, discussing accuracy and applicability of small angle, spectral transparency and complete indicatrix methods 13 p1955 A72-28514

Cloud statistics stratification by climatological regime, month and time of day, extending simulation to drop size distributions and liquid water content 13 p1989 A72-28808

Coastal and inland fog microphysical features, discussing visibility, liquid water content, drop size distributions and haze droplet concentrations 13 p1991 A72-28842

Catalytic effects on ammonium perchlorate combustion pressure limits, noting distribution, concentration and particle size effects 13 p2025 A72-29303

Ammonium perchlorate burning rate temperature dependence as function of pressure and oxidizer particles size, noting low pressure deflagration limit [ONERA, TP NO. 1079] 13 p2025 A72-29669

Optimum dispersion time and size particle determination for zirconium diboride powder grinding in vibrating mill, using gas flow ratio method 13 p1967 A72-30101

Approximate analytical solution for spherical particle acceleration in uniform gas flow, examining nozzle geometry and particle size effects 14 p2095 A72-30924

Nike-Apache rocket-borne particle collection and photometry of noctilucent clouds, obtaining single-shadowed particle size distributions and inflight shadowing surface data 15 p2226 A72-31923

Explorer 35 and OGO 3 data on picogram size dust particle distribution in cislunar and selenocentric

space, showing fluctuations during meteor shower periods

15 p2309 A72-31937

Zinc oxide effect on alumina dispersion, energy of formation, nucleation and particle size reduction, calculating critical nucleus radii

16 p2476 A72-33255

Hail size distribution and concentration in thunderstorm updraft regions from aircraft and S band radar observations

16 p2419 A72-33946

Development of moldable carbonaceous materials for ablative rocket nozzles.

17 p2572 A72-35668

Rock size, mineralogy and fines size distribution in lunar regolith

17 p2615 A72-35683

Analysis of grain- and particle-size distributions in metallic materials.

17 p2569 A72-35922

Laser IR radiation attenuation in natural and artificial fogs, noting dependence on particle size distribution

18 p2697 A72-36102

Geometric concepts for microstructure change processes dynamics, considering time variation determination of system topological and metrical properties and particle size distribution evolution

18 p2718 A72-36397

Method for calibration and verification of automatic liquidborne particle counter/light method/

[SAE ARP 1192] 18 p2692 A72-36533

Complex index of refraction of airborne fly ash determined by laser radar and collection of particles at 13 km.

18 p2661 A72-36637

Acceleration effects on burning velocity of aluminumized condensed rocket propellant systems, calculating particle size and slag mass

19 p2847 A72-37360

Error of the statistical method for determining the dependence of the combustion characteristics of particles upon particle size

19 p2879 A72-37363

Grain size distribution in recrystallized alpha-titanium.

19 p2820 A72-38297

A method for the study of wear particles in lubricating oil.

19 p2803 A72-38376

Fog and cloud microstructure and particle size distributions from directional light scattering coefficient /halo indicatrix/

20 p2948 A72-39570

Dust particle sizes in cometal atmospheres and the heliocentric distance

20 p2970 A72-39726

Approximate determination of the change in the aerosol distribution spectrum in a Venturi coagulator tube

20 p2928 A72-40039

Induction period, particle size distribution and medium temperature effects on thermal ignition of metal particles under exothermal oxidation reaction on surface

20 p2987 A72-40040

Device for measuring the kinetic characteristics of particle combustion

20 p2928 A72-40050

Propagation loss of centimeter and millimeter waves in rainfall.

21 p3023 A72-41833

Hail formation model based on injection of finite embryo size classes into horizontally homogeneous steady nondivergent updraft, considering growth and accumulation zones

22 p3201 A72-42514

IR reflectance [or emittance] remote spectroscopy of mineral particulate surfaces, discussing particle size, surface roughness, porosity and mixing ratios effects

22 p3178 A72-42526

Electro-optical design and performance parameters of polluted air liquid droplet size distribution measurement by pulsed junction diode laser light external scattering

22 p3179 A72-42680

Theoretical approach to the fracture of two-phase glass-crystal composites.

23 p3306 A72-43560

Stability of Al₃Mg₂ particles against diffusive coagulation in aluminum-magnesium alloys

23 p3301 A72-43649

Influence of the nature of the particle distribution of the hardening phase in powders on the thermal stability of dispersion-strengthened nickel

23 p3302 A72-44011

An experimental investigation of radiative properties of aluminum oxide particles.

24 p3461 A72-44809

Two-phase detonations with bimodal drop distributions.

24 p3463 A72-45052

Fraunhofer single beam holography application to gas/liquid mixture high velocity flow cross section determination, observing liquid component effects on droplet dispersion composition

24 p3405 A72-45624

PARTICLE SPIN

NT ELECTRON SPIN

NT ISOTOPIC SPIN

NT NUCLEAR SPIN

Mass-zero spin-two particle field theory of gravitational interaction with covariance under full conformal group

09 p1355 A72-22684

Resonant and semiwave process production cross sections for massive Lee-Wick spin-zero and spin-one bosons at high energies

15 p2280 A72-31290

PARTICLE TELESCOPES

Gathering power, geometrical factor and directional response of single and multielement particle telescopes

06 p0811 A72-17317

Semidiurnal lunar variation, solar and sidereal effects on cosmic radiation intensity, using zenith pointed particle telescopes

06 p0873 A72-17490

Muon telescopes calibration for cosmic rays rigid component variations by data comparison with variable aperture telescope

08 p1162 A72-20720

Electron scattering effects on response of cosmic ray particle telescopes from pulse height and counting rate measurements

08 p1167 A72-21510

Semidiurnal cosmic ray anisotropy, eliminating atmospheric effects and global isotropic variations in cosmic ray telescope

09 p1377 A72-22928

Satellite-borne semiconductor particle detector telescope for C and Mn isotopes identification in heavy primary cosmic rays, considering scintillation counter and mass resolutions

16 p2389 A72-32883

Nuclear composition telescope measurements on-board OGO 5 satellite, observing presence of geomagnetically trapped carbon, nitrogen and oxygen nuclei

16 p2382 A72-32959

Scintillation telescopes for muon angular distribution, designing test device for photomultiplier tubes selection

17 p2556 A72-35437

Muon telescopes calibration for cosmic rays hard component variations by data comparison with variable aperture standard telescope

19 p2803 A72-38348

Balloon-borne telescope search for solar neutrons and gamma rays during enhanced solar activity periods

21 p3101 A72-41298

PARTICLE THEORY

CP-noninvariance model of baryon interaction and charge asymmetry of universe, postulating kappa particle /neutral massive fermion/

06 p0875 A72-17275

French book on wave mechanics reinterpretation covering double solution theory, particle thermodynamics, guidance dynamics, etc

06 p0847 A72-17813

Elementary particle theory and field equations in cosmological spaces, using four dimensional conformal imbeddings

06 p0891 A72-18421

Ideal gas many particle distribution functions in microspace from solution of chain of integrodifferential equations

09 p1354 A72-22220

Thermodynamic quantities expression in terms of S matrix to formulate questions pertaining to statistical mechanics-particle physics boundary, applying to cosmology

09 p1355 A72-22750

Direct particle theory of weak interactions, considering two component spinors and leptonic decay

13 p2007 A72-28500

Improved calculation of resonant frequencies of Helmholtz resonators.

23 p3315 A72-44372

PARTICLE TRACKS

U PARTICLE TRAJECTORIES

PARTICLE TRAJECTORIES

NT ELECTRON TRAJECTORIES

Liquid and solid particle trajectory calculation in two phase Laval nozzle flows, determining density, velocity and temperature

02 p0149 A72-11588

Electrostatic analyzer for very low energy particles, calculating trajectories

03 p0392 A72-14055

High energy cosmic ray track angular azimuthal distribution in lunar silicate rocks

04 p0577 A72-15154

Fission origin of cosmic ray fossil tracks in augite achondrite high-uranium-concentration meteorite Angra dos Reis

05 p0714 A72-16078

Muon track curvatures in Wilson chamber magnetic field for calibrating ionization levels of logarithmic increase

06 p0811 A72-17293

Bubble chamber high energy particle tracks semiautomatic measuring device, using small on-line computer for data processing

06 p0813 A72-17438

Computerized simulation of high intensity beam charged particle trajectories in electromagnetic fields with rotational symmetry, applying to ion extraction

06 p0852 A72-17491

Cascade wind tunnel and water table determination for trajectories and velocities of suspended particles in fluid flow through axial compressor stage

07 p0907 A72-18756

Nonlinear dynamic system mathematical model for unit mass particle escape trajectories from potential well, taking account of trapped motions and stable oscillations

07 p1025 A72-18807

Wide gap spark chamber feeding technique for compensation of charged particle track drift due to avalanches

07 p0988 A72-19956

Solar protons propagation from instantaneous injection source and inhomogeneities interaction description by mean free path and scattering angle specification

07 p1063 A72-20627

Solar cosmic ray diffusion in interplanetary medium, describing solar flare proton and heavy nuclei propagation in terms of time of arrival measurements

08 p1227 A72-21157

Particle track densities in Lunik 16 soil column grains from Sea of Plenty, noting surface irradiation and regolith age

09 p1380 A72-22268

Fossil track densities and thermoluminescence measurements of Luna 16 feldspar crystal samples compared to Apollo 12 samples

09 p1381 A72-22270

Plasma turbulent diffusion effects on particle trajectories in phase space as Wiener process

09 p1358 A72-22294

Ion quadrupole effects in ion-molecule collisions, calculating capture cross sections and ion trajectories

09 p1354 A72-22658

Ion trajectories equations of motion solution for E x B type mass separator, presenting curves for mass species dispersion inside separator channel

10 p1509 A72-23944

Gas-particle flow trajectories, velocities and pressure distribution in axial flow turbine stage, using cascade tunnel and high speed photographic techniques

11 p1571 A72-25648

Toroidal plasmas heating by neutral injection, discussing ion acceleration, charge exchange and fast ion trajectories

11 p1697 A72-26585

Computer simulation of plasmas by following actual orbits of particles interacting through electrostatic forces

12 p1852 A72-27914

Monte Carlo method for radiative transport theory problems, considering mathematical models of light scattering media and photon trajectory random elements

13 p2001 A72-28505

DR ring current belt formation due to electron and proton gradient drift in inhomogeneous geomagnetic field, calculating charged particles trajectories

14 p2101 A72-30646

Comets formation from Jupiter satellite Io surface eruption using particle trajectory analysis and comet orbital elements calculation

15 p2305 A72-31391

Game problem of impulse controlled soft rendezvous of two material particles under attractive forces

16 p2422 A72-32928

Heavy cosmic ray nuclei tracks in etched plastic sheets flown in satellites and balloons, discussing detector response as function of velocity

16 p2447 A72-33730

Capture zone in noninteracting particles rarefied flow around magnetic dipole with transfer into finite orbits under small perturbations

17 p2593 A72-35906

Two new methods to increase the contrast of track-etch neutron radiographs.

19 p2833 A72-37636

Black hole rotational energy extraction by super-radiant scattering with impinging wave amplification and by floating particle orbits with zero net radiation reaction

19 p2857 A72-37720

Markovian plasma turbulence model to obtain convergent perturbation series for diffusion coefficient via trajectories in particle propagator

19 p2841 A72-38442

Solar cosmic ray diffusion in interplanetary medium, describing solar flare proton and heavy nuclei propagation in terms of time of arrival measurements

20 p2964 A72-39262

Solar wind noble gases and solar flare emitted Fe group nuclei energetic tracks in chondrite Weston, considering galactic cosmic ray generated tracks

22 p3228 A72-42863

Determination of characteristic magnitudes of toroidal electrostatic analyzers - Application to the optimization of analyzers used in space physics

22 p3180 A72-42935

Relativistic test particle escape from circular orbit around central mass due to mass loss, considering orbiting body corrections due to general relativity

23 p3335 A72-43265

East-west asymmetry of cosmic rays at the sea level in the range of geomagnetic latitudes from 50 N to 20 S

23 p3328 A72-43355

A study of the mechanisms of formation of penetrating particle groups by the spark calorimeter method

23 p3291 A72-44430

Electric field orientation, magnetic field strength and high voltage pulse delay effects on spark chamber track displacement from true particle trajectory

23 p3291 A72-44441

Electronic detection of ionizing-particle tracks in liquid argon

23 p3291 A72-44442

Meteor streams orbital elements dispersion from photographic data, and asteroid stream percentage variation with concentration of orbits to ecliptic plane

24 p3445 A72-45462

Thermal IR radiation attenuation by atmospheric particulates, comparing computer simulated brightness temperatures with airborne radiometer and Nimbus 3 observed data

02 p0213 A72-11863

Optical method for measuring the velocity of particles entrained in a flow

17 p2554 A72-34892

Determination of the characteristics of scattering particles in the Venusian atmosphere on the basis of photometric measurements

22 p3223 A72-42215

PARTICULATE FILTERS

U FLUID FILTERS

PARTICULATE SAMPLING

Atmospheric aerosols size/altitude distribution via sun aureole sky brightness and airborne particle counterpoint sampling measurements

02 p0213 A72-11860

Forecasting technique for accumulated particulate contamination on spacecraft assemblies, discussing cleanliness optimization and test procedures

07 p0915 A72-18763

Condensed zinc particle size determined by a time discrete sampling apparatus.

20 p2913 A72-39608

Gaseous and particulate iodine in the marine atmosphere.

22 p3173 A72-42469

Gaseous and particulate bromine in the marine atmosphere.

22 p3173 A72-42470

PARTITIONS [MATHEMATICS]

Automatic classification algorithms using heuristic, partitioning and variational techniques

09 p1283 A72-23429

Centered Gaussian process oscillations /Brownian motion/, obtaining divergence rate in sequence of finite partitions

10 p1504 A72-24054

Scalar and vector partitions of forecasts probability score in two state situation

11 p1681 A72-26078

Electronic partition functions cut-off criteria effect on translational and reactive thermal conductivity and viscosity of thermal plasmas

11 p1698 A72-26602

Diatom molecules partition functions derivation by classical and quantum mechanical theories for simple harmonic oscillator and square-well potential

15 p2280 A72-31693

Approximations and bifurcations in flight dynamic system, investigating singular point motion over trajectory during partition process

19 p2748 A72-37553

PARTITIONS [STRUCTURES]

Book on matrix structural analysis covering matrix algebra concepts, direct stiffness matrix methods, lifting surface, nonlinear truss and structural partitioning analysis, etc

07 p1092 A72-19908

PARTS

U COMPONENTS

PAS

Symphonic satellite stability during perigee, apogee and orbital transfer, considering propellant motion in tank and spinning top containing liquid

02 p0287 A72-12717

PASCHEN SERIES

Magnetic splitting of lines dependence on Paschen-Back effect for Li resonance doublet in sunspots

03 p0427 A72-13293

Planetary nebula IC 418 reddening constant from Paschen line intensities of IR spectrum

04 p0570 A72-14554

Paschen beta emission line equivalent width variation in IR spectra of omicron Ceti

11 p1716 A72-25679

PASSBANDS

U BANDPASS FILTERS

U BANDWIDTH

PASSENGER AIRCRAFT

NT ELECTRA AIRCRAFT
NT EUROPEAN AIRBUS

Passenger aircraft onboard automated inertial navigation devices, emphasizing accelerometer and gyroscope design and construction

01 p0096 A72-10070

VFW-614 short range twin jet passenger transport aircraft, analyzing service performance and economic efficiency requirements influence on design characteristics

03 p0310 A72-13643

Airbus A-300 B design and characteristics for passenger transport on short and medium haul routes

05 p0612 A72-16694

Optimal reversion coefficient determination for passenger aircraft engine thrust reversal

05 p0614 A72-17060

Future civil air transport trends, considering passenger and cargo growth, travel frequency per capita income and STOL market

08 p1257 A72-22150

Mathematical models for passenger aircraft market forecast, discussing stock measurement and life expectancies

13 p2067 A72-30125

Airbus design features, noting passenger number, operational range and propulsion engine number and location

14 p2072 A72-30813

Buoyancy systems and parawings application in short haul passenger transportation, discussing VTOL and STOL operations

16 p2348 A72-33183

The air bus as the aircraft of near future. II

17 p2492 A72-35439

The DHC-7, first generation transport category STOL - Particular design challenges.

[AIAA PAPER 72-809]

19 p2750 A72-38115

Instruments installation effect on soviet passenger aircraft pilot performance, discussing Tupolev aircraft control systems

21 p2994 A72-40173

Airlines requirements for European airbus, discussing design of aircraft structure, control, pressurized cabin and propulsion system

21 p2994 A72-40174

Minimum operational costs of passenger and cargo transport aircraft, considering effects of flight distance, wind conditions and optimum speed and altitude

23 p3252 A72-44338

Systems approach to airport passenger terminal planning.

24 p3387 A72-44585

PASSENGERS

Airport terminal flow and interface transportation systems, discussing access, passenger traffic and cargo handling and government controls

03 p0339 A72-13414

Prolonged jet flight effect on passenger interstitial and intracellular fluid volumes from plasma, extracellular and total body water measurements, noting dehydration and foot swelling

06 p0767 A72-17866

Crew members handling of emotionally disturbed aircraft passengers

07 p0926 A72-18836

Air/ground interface simulation in GPSS/360 for passenger transfer between airport terminal and aircraft

07 p1106 A72-20342

Passenger behavioral inaction in survivable aircraft accidents, suggesting maladaptive behavior counteraction by leadership and/or training

13 p1908 A72-28727

Hierarchical system of helicopter service terminals, calculating passenger lots for single and multiloop arrangements under given stochastic input conditions

15 p2337 A72-31498

Major civil airport passenger and cargo terminal complex design and layout planning, discussing various facilities and equipment requirements

16 p2373 A72-33329

Passenger transfer in airports with total separation between aircraft and permanent buildings for independent functioning, noting Dulles Airport mobile lounges

16 p2374 A72-34143

Airport terminal design - The passenger's point of view.

17 p2535 A72-34225

Kansas City International Airport facilities and features, discussing decentralized passenger processing system

17 p2535 A72-34242

STOL ride quality criteria - Passenger acceptance. [AIAA PAPER 72-790]

19 p2749 A72-38107

PASSIVATION

U PASSIVITY

PASSIVE SATELLITES

NT BEACON SATELLITES

NT PAGESO SATELLITE

Solar radiation pressure effects on balloon satellite behavior, noting orbital eccentricity variations

16 p2463 A72-34182

PASSIVITY

- Passivation velocity apparatus for testing Al-Mg alloy sensitivity to corrosion under voltage
02 p0246 A72-12599

PATCHING

U MAINTENANCE

PATHOGENESIS

- Pathogenesis of in-flight illusory acceleration sensations, discussing amino acid level, protein metabolism rate and pyridoxin metabolism
05 p0619 A72-16642
- Arterial hypoxemia development during hypoxic ontogenesis early stages related to age in dogs
09 p1266 A72-22879
- Electron microscope study of hyperoxia-induced pathogenetic ultrastructural changes in rat lung
12 p1761 A72-27531

PATHOGENS

- Aliphatic hydrocarbons in phytopathogenic fungi spores, discussing similarity to higher plant alkanes, functional roles and species distribution and occurrence
13 p1906 A72-29834

PATHOLOGICAL EFFECTS

- High energy proton irradiation late pathological effects on rabbit brains, discussing brain lesions and radiation dosages
02 p0161 A72-12056
- Aseptic bone necrosis pathology from radiographic studies in dogs with decompression sickness noting articular cartilage erosion and joint dysplasia and exostosis
06 p0764 A72-17876

- Cortical synthesis and information handling properties of evoked potential in human normal and pathological behavior
08 p1119 A72-21840

- Electrophysiological, neurophysiological, metabolic, vegetative, psychological, chemical and pathological aspects of sleep, noting disturbance and wakefulness mechanisms for various clinical disorders
09 p1264 A72-22223

- Pathological significance of high oxygen tension exposure effects on acid soluble collagen extracted from mouse skin
12 p1760 A72-27483

- Case report of pilot near-syncope episode with bradycardia due to hyperactive right carotid sinus reflex
12 p1771 A72-27487

- Physiological effects on anesthetized and conscious dogs during exposure at 80,000 ft for different decompression rates, discussing cardiovascular, biochemical and pathological effects
12 p1768 A72-28322

- Myocardial protein synthesis in acute myocardial hypoxia and ischemia.
17 p2501 A72-34980

- Pathologic-anatomic characterization of changes induced by magnetic fields in experimental animals
17 p2503 A72-35008

- Neuropathological evaluation of monkeys exposed to body-alone X-radiation.
18 p2649 A72-36439

- Reflex and conditional movement observation of central nervous system function restitution in Macaca mulatta monkeys with cortical lesions, studying pathological forced grasping
18 p2651 A72-36977

- Effect of hyperoxic media on the stability of rats during acute carbon monoxide exposure
21 p2998 A72-40437

- Adrenaline and noradrenaline metabolic stages and production mechanism under various physiological and pathological conditions, noting application to flight emotional stress detection
21 p3002 A72-41196

- Changes produced in the nerve structures of the stellate ganglion by total X-ray irradiation
22 p3140 A72-41925

- Influence of ionizing radiation on the tooth organ
22 p3141 A72-41987

- Chronic altitude sickness pathology based on anatomical and histological findings in abnormal mountain inhabitants autopsies, comparing with cardiovascular system morphology in normal people
22 p3143 A72-42586

- Heart function and pulmonary circulation in humans suffering from chronic mountain sickness
22 p3143 A72-42587

- Transarterial leakage - A possible mechanism of high altitude pulmonary oedema.
22 p3143 A72-42588

- Analysis of survival and cause of death statistics for mice under single and duration-of-life gamma irradiation.
23 p3254 A72-43394

- Adrenal morphology changes in rats subjected to hypokinesia
23 p3255 A72-43905

- Natural aging and radiation-induced life shortening in *Drosophila melanogaster*.
24 p3373 A72-45279

PATHOLOGY

NT HUMAN PATHOLOGY

- Clinical death period and reanimation concepts, noting erroneous interpretations of irreversible histological alterations, revival attempt period and organism self reanimation potential
09 p1266 A72-22876

PATTERN DISTRIBUTION

U DISTRIBUTION (PROPERTY)

PATTERN RECOGNITION

NT CHARACTER RECOGNITION

- Crop discrimination with manual and automatic computerized side-looking radar imagery analysis for microtexture pattern recognition
01 p0065 A72-10451

- Pattern recognition in biological and technical systems - Conference, Berlin, April 1970
01 p0017 A72-10463

- Mathematics for pattern recognition, discussing perceptrons, combinatorics and statistics, feature selection, cybernetic methods and fuzzy sets
01 p0034 A72-10465

- Neuron responses in cat visual system/retina, geniculate body, primary, secondary and tertiary visual cortex/ to simple visual stimulus pattern
01 p0011 A72-10466

- Psychology of visual form perception in relation to neurophysiological principles of lateral interaction and organization, considering retinal images, aftereffects, binocular vision, etc
01 p0011 A72-10469

- Feature classifying filter for pattern recognition system simulated on computer for line printed numerals
01 p0034 A72-10473

- Network synthesis of cascaded threshold logic elements to separate binary patterns into two classes by iterative computation of parameters
01 p0034 A72-10474

- Pattern recognition, invariance, redundancy and information reduction in computer aided image processing
01 p0034 A72-10475

- Pattern recognition by computerized local processing of binary matrix representations
01 p0018 A72-10476

- Object size erroneous perception by apparent distance alteration
01 p0012 A72-10478

- Neurophysiological hearing mechanisms of inner ear in peripheral auditory pattern recognition
01 p0012 A72-10481

- Neurophysiology of auditory pattern recognition of simple and complex sounds, using cats data on cochlear nerve neural mechanism
01 p0012 A72-10482

- Auditory pathway neuron discharge response to complex sound stimuli and frequency discrimination of pattern recognition in cats
01 p0012 A72-10483

- Two element matrix patterns generation with different degrees of internal constraint, developing objective complexity measures based on information theory or symmetry and grouping considerations
01 p0013 A72-10715

- Human pattern analysis by stabilized retinal image fragmentation as function of fade frequencies for angle and line stimuli in different orientations
01 p0014 A72-10721

- Pattern recognition computer programs for transforming and characterizing input scene through successive layers of recognition cone
01 p0046 A72-10867

- Operator interactive computer controlled electro-optical system for photographic image enhancement prior to target or pattern identification
01 p0070 A72-10869

- Southern corn leaf blight detectability by remote sensing based on pattern recognition technique application to multispectral color and IR photographic and scanner data
02 p0212 A72-11814

- Data compression and random noise effects on pattern recognition and picture quality of multispectral scanner data
02 p0227 A72-11840

- Multispectral scanner data preprocessing to improve automated recognition by reducing atmospheric and sensor induced signal variability
02 p0227 A72-11841

- Computerized statistical identification of aerial photograph ground patterns, comparing elliptical boundary condition with minimum distance to mean classification models
02 p0187 A72-11842

- Airborne sensors terrain classification, considering sample points clustering approach and signature analysis
02 p0227 A72-11844

- Pattern recognition of multispectral scanner remote sensor data, using table look-up approach for processing simplicity and time reduction
02 p0227 A72-11846

- Automatic soil type mapping, using multispectral remote sensing and computerized pattern recognition
02 p0215 A72-11881

- Urban geographic social-spatial pattern determination with aerial photographic interpretation
02 p0229 A72-12019

- Microelectronic computer system with image data cross correlation generation for real time video pattern abstraction, discussing design and operating characteristics
03 p0329 A72-14178

- Laser coherent monochromatic light for cybernetics research in pattern classification, discussing fingerprints and letters
04 p0531 A72-15137

- Edge-coding operators for two dimensional binary picture black-white boundary pattern recognition suitable for use in parallel processing systems
04 p0496 A72-15203

- Pattern recognition by automatic clustering methods without fixed definitions for number and specification of classes, using sequential diagnosis
05 p0632 A72-16075

- Hough transformation for detection of lines and curves in pictures, using angle radius instead of slope intercept parameters for efficient computation
05 p0664 A72-17164

- Human visual system multiple channels sensitivity to patterns at low luminance or high drift rates, noting retinal ganglion cells selective sensitivity
06 p0761 A72-17602

- Nonsupervised learning algorithm steady state behavior for multicategory pattern classification by analysis and digital computer simulations
06 p0780 A72-18256

- Recognition algorithms of moving objects for patterns alone and in symbolic and motion context, indicating possible recognition mechanism degradation
06 p0780 A72-18257

- Automatic recognition of aircraft by Fourier harmonics of slope densities of silhouettes
07 p0949 A72-19053

- Pattern recognition through atmospheric turbulence by reflected coherent light power spectrum recording technique, using Wiener-Khinchin theorem
07 p0982 A72-19054

- Light variation threshold amounts for flicker and flickering pattern detection as function of variation frequency
09 p1269 A72-22615

- Spatial filtering techniques and numerical classification methods for pattern recognition in automated photointerpretation
09 p1312 A72-23305

- Potential function criterion for feature selection in pattern recognition, obtaining upperbound estimate of misrecognition probability
09 p1342 A72-23419

- Probability density functions shape estimation by deterministic heuristic and entropy maximization algorithms
10 p1442 A72-23798

- Remotely sensed imagery data photointerpretation by gray tone texture context feature extraction, noting identification accuracy
10 p1442 A72-23812

- Feature selection from pattern recognition of Gaussian distributed classes by mapping of vector samples from n dimensional space to m dimensional space via transformation matrix
10 p1445 A72-24461

- Computerized image analysis, establishing desirable scene characteristics for biomedical display in automated system
11 p1602 A72-26388

- Image visual recognition during voluntary saccadic eye movements, noting stimuli visible luminance change effect
12 p1760 A72-27310

- Stochastic time varying patterns classification by Kalman filter, discussing optimum dichotomizer with supervised learning
12 p1790 A72-27498

- Signal mathematical model in optical and acoustic pattern recognition
12 p1786 A72-27571

- Pattern recognition in mental process automation, noting character transformations, written symbols content analysis and syntactic description
12 p1786 A72-27576

- Contrast enhancement for switch-on and -off modes of bar patterns, noting spatial transients due to primary image interaction with negative afterimage
12 p1808 A72-27679

- Heuristic recognition algorithms with learning for homogeneous irreducible stationary Markov chain sequence of recognized objects
12 p1837 A72-27824

- Detection probability for moving small targets embedded in random white noise on TV display, comparing machine processed pattern recognition techniques and human performances
12 p1843 A72-27933

- Optimal random search noise recognition systems with Bayes teaching technique
13 p1924 A72-29162

Image discretization accuracy in recognition system, considering two dimensional object reconstruction on element network

13 p1925 A72-29163

Two phase algorithm for selecting optimal sets of characteristics for image recognition systems

13 p1925 A72-29164

Indirect statistical quality control procedure for piece goods in batch based on image recognition technique for data classification

13 p1965 A72-29175

Human flexible processing accomplishment in speeded recognition task with visual stimulus dimension relevancy contingent upon other dimension stimuli values

13 p1911 A72-29832

Pattern recognition computer programs for input data preprocessing with characterization and transformation through layered recognition cone

17 p2520 A72-34405

Computer processed image enhancement applications to spacecraft returned photoreconnaissance, discussing data transmission and resolution vs recognition and color quality

17 p2520 A72-34408

Texture measurements in earth resources data management system by automatic photointerpretation with analog and digital techniques, discussing data processing rate requirements

17 p2520 A72-34409

Three dimensional model images information content increasing in coherent light interference shadow marking, noting automatic systems for distant objects recognition

17 p2529 A72-34844

Learning strategy-based pattern recognition system for automatic classification of terrain type from aerial photography

18 p2691 A72-36494

Perception of tachistoscopic binary patterns, examining reproduction accuracy with respect to pattern length and fixation and end-segregation reference points

18 p2653 A72-36914

Effect of set size, age, and mode of stimulus presentation on information-processing speed

18 p2654 A72-36922

Stochastic analogs of finite-converging learning algorithms for recognition systems

19 p2769 A72-37421

Optimal recurrent and nonrecurrent algorithms for polynomial dividing functions of learning and recognition in form of adaptive threshold elements

19 p2769 A72-38465

Signal recognizing algorithms for class of large number of normal distributions with unknown probabilities, using statistical complex hypothesis verification

19 p2770 A72-38466

Selection of characteristics for automatic classification of welding defects in radiographic testing

19 p2805 A72-38763

Probability threshold of data element similarity as separation criterion for automatic multiparameter biomedical data classification

20 p2893 A72-38937

Dynamic electromagnetic scattering pattern of flying object, constructing quasi-ergodicity condition to compute standard statistical descriptions for recognition

20 p2903 A72-39071

An electronic model of visual receptive fields

20 p2897 A72-39271

General principles and detail similarities in visual pattern analysis by single neuron operation, computer programs and psychological perception

20 p2891 A72-39275

Book - Fundamentals of pattern recognition

20 p2905 A72-39575

Perceptual differentiation of sequential visual patterns

21 p3008 A72-41021

Adaptive signal-discrimination system using signals for observation of the channel characteristics

21 p3023 A72-41838

A minimization method of describing classes in pattern recognition

22 p3198 A72-42178

Improved holographic matched filter systems for pattern recognition using a correlation method

22 p3177 A72-42445

Application of computer mathematics procedures for prediction of phase diagrams

22 p3191 A72-42812

Suitability of the normal density assumption for processing multispectral scanner data

22 p3157 A72-43025

Decision surface estimate of nonlinear system stability domain by Lie series method

23 p3274 A72-43540

Continuous ECG monitoring method /scattergram/ for arrhythmia pattern recognition in intensive care units

23 p3260 A72-43938

Atmospheric density from spacecraft drag data by successive optimization of control laws, using quadratic programming

23 p3277 A72-44003

PATTERN REGISTRATION

TV speckle pattern recording for coherent laser light measurement of mechanical vibrations in micrometer range

13 p1961 A72-30026

Reconstruction of phase holograms by means of a helium-cadmium laser

23 p3292 A72-44469

PATTERNS

Stabilized retinal image techniques to examine functional relationships between nonstabilized grating pattern orientation adaptation and stabilized line stimuli fading rates

16 p2358 A72-33646

PATTERSON MAP

Solution of the inverse heat conduction problem by using the regularization method to increase the peaks of the self-contraction function /Patterson's function/

19 p2880 A72-37753

PAVEMENTS

Airport apron surface pavement strain measurements under field loading conditions, considering static and dynamic loads with finite element method

01 p0047 A72-10192

Lime, cement, fly ash and sand combination airport pavement design and testing, discussing material structural and chemical properties, compressive strength, costs, etc

02 p0200 A72-12023

Concrete airport pavement thickness determination methods comparison, noting design life dependence on safety factors

18 p2675 A72-36786

Airfield flexible pavement design - A state of the art paper

18 p2675 A72-36787

Systems approach to integrated planning of airfield pavements design, construction, operation and maintenance, emphasizing need for mathematical models, constitutive parameters and limiting criteria

18 p2675 A72-36788

Airlines and aircraft manufacturers requirements for airport pavement evaluation/data system, discussing relationships between strength, landing gear design, aircraft weight, range, etc

18 p2675 A72-36789

PAYLOAD MASS RATIO

Algol 3 solid propellant rocket motor design for Scout D and E launch vehicles first stage, considering high total impulse, payload/mass capability and propellant grains

01 p0115 A72-10261

Nuclear gas core and fusion rocket engines performance potential for various space missions, comparing capabilities in terms of payload ratio

01 p0099 A72-11328

PAYLOADS

Composite materials application for space shuttle structures, relating structural weight to payloads

01 p0090 A72-10727

Space shuttle optimal boost trajectories, showing payload increase by flying pitch profiles optimization

02 p0286 A72-12423

Three-axis attitude control and stabilization system for sounding rocket payload, discussing performance from simulation and ground test results

05 p0728 A72-16478

Dynamic system optimal design with various degrees of maneuver parameters information, considering space flight mechanics problem of payload maximization for limited propulsive power

06 p0849 A72-18306

Space shuttle payloads and space manufacturing candidate materials and methods, discussing float-zone refined semiconductors, electronic crystals, viral insecticides, vaccines and biological cells

06 p0824 A72-18622

High performance sounding rockets design, discussing Skylark propulsion system improvement and new rocket vehicle design for 200 kg payload capability with existing motor hardware

08 p1241 A72-21172

Sounding rocket payloads environmental testing, discussing test techniques for shock, vibration, temperature, humidity, pressure, contamination, corrosion effects during handling, storage, launch, flight and recovery

08 p1241 A72-21173

Multimission capability of solar electric propulsion /SEP/ spacecraft, analyzing payload variations, propellant requirements, thrusting time limitations and throttling range

10 p1552 A72-25125

Spacecraft propulsion into orbit by ground based high-power lasers via thrust generation by material evaporation, emphasizing advantages in launching small payloads

13 p2025 A72-28454

Teleoperator manipulator for payload handling in space shuttle, noting design features and simulations of master-slave remote control system

[AIAA PAPER 72-238] 13 p1909 A72-29075

Equipment for ground and sea recovery of sounding rocket payloads, discussing airbrakes, buoy and parachute assemblies

15 p2319 A72-31690

Parachute systems and flotation gear used to recover sounding rocket payloads and components after water landings

15 p2320 A72-31691

Apollo 15 orbital science payload instruments for exploring lunar origin and evolution to relate to earth history

15 p2310 A72-31984

Space shuttle payload design for weight and cost reduction, discussing refurbishable modular design concept

15 p2321 A72-32317

Space shuttle program, discussing configurational concepts, payload carrying capacity variants and cost reduction design changes

17 p2621 A72-34869

Space shuttle configuration, discussing payload accommodation requirements, accessories, mission operations and reusable tug

[AIAA PAPER 72-737] 18 p2731 A72-36546

Constrained payload-optimum extremal ascent trajectories for space shuttle vehicles

[AIAA PAPER 72-829] 20 p2966 A72-39097

Stability of dual spin spacecraft containing tracking payloads

[AIAA PAPER 72-890] 20 p2975 A72-39111

RAM - A concept for reducing space payload costs

[SAWE PAPER 942] 23 p3343 A72-43482

Explorer satellites and Pioneer space probes development program, discussing launching rockets, reentry tests, payloads, radio communication, Van Allen belts discovery, etc

23 p3358 A72-44353

Operational support of space shuttle transportation and payload systems with modular checkout and test equipment, noting service life and economy of operations

24 p3388 A72-45111

Space shuttle design evolution for program cost minimization, discussing refurbishment, payload impact, management cost and mission specifications and objectives

24 p3450 A72-45171

Study of shuttle-based systems for high-energy planetary missions

24 p3441 A72-45189

The effect of space shuttle payload design techniques on total space program cost

24 p3451 A72-45210

The space tug optimum cost evaluation

24 p3468 A72-45212

The Symphonie transponder in the integration phase

24 p3380 A72-45273

PCM (MODULATION)

U PULSE CODE MODULATION

PCM TELEMETRY

Format logic design for airborne memory controlled PCM telemetry multiplex digital and analog data system

02 p0187 A72-12130

Frame synchronization performance tests for PCM telemetry system, considering code selection, frame length and data recovery

02 p0175 A72-12147

PCM/PM 136 MHz telemetry system of SAS-A satellite, describing operation in record and playback modes

03 p0326 A72-14396

Europa 2 launch vehicle standardized PCM/FM and FM/PM telemetry system compared with Europa 1

05 p0630 A72-16751

Telemetric frame synchronization with the aid of distributed and concentrated frame periods

21 p3024 A72-40329

Particle, plasma and field detectors for rocket investigations in and above atmosphere, considering PCM telemetry system and balloon-borne X ray telescope system

21 p3057 A72-41617

Frame synchronization in time-multiplexed PCM telemetry with variable frame length

23 p3265 A72-44182

PDM (MODULATION)

U PULSE DURATION MODULATION

PDP 8 COMPUTER

Logic character generator for CRT text display and DEC PDP 8/S graphics

11 p1601 A72-26290

PEARLITE

Hardenability and pearlite stee isothermal transformation properties of direct-quenching low Cr case-hardening steels, discussing Mn, Mo and Ni alloying effects on machinability

07 p0995 A72-19571

Austenite formation kinetics in Fe-C ferritic-pearlitic structure at 855 C, comparing experimental data with theoretical calculations

11 p1662 A72-26744

On a method of analysis of the strain energy changes taking place during the rotatory bending fatigue test of carbon steels and an effect of the pearlite patches to these changes.

20 p2935 A72-38881

PEARSON DISTRIBUTIONS

Statistical method of Pearson moments applied to temperature regimes effects on ruby laser output energy distribution

13 p1968 A72-29506

PECLET NUMBER

Forced heat convection from sphere immersed in inviscid fluid stream at small Peclet number, using matched asymptotic expansions

11 p1747 A72-26669

Galerkin boundary method as variational approach to low Peclet number heat transfer in laminar flow

13 p2063 A72-28418

Heat transfer to two dimensional laminar flow, calculating axial conduction and fluid preheating effects on adiabatic forced convection at low Peclet number

15 p2336 A72-32478

PEDALS

Foot forces exerted at various aircraft brake-pedal angles, observing 20 degree zone with maximum effectiveness

[AD-733551] 01 p0018 A72-10567

The foot as input device for control operation.

21 p3012 A72-41428

PEDOLOGY

U SOIL SCIENCE

PEENING

NT SHOT PEENING

PELTIER EFFECTS

Test apparatus and technique for assessing Peltier thermoelectric cooling device operational characteristics

12 p1755 A72-27721

Thermoelectric generators theory, design and performance characteristics, discussing Seebeck, Peltier and Thomson effects

15 p2182 A72-31375

Compound tellurides and their alloys for Peltier cooling - A review.

22 p3215 A72-43088

PELVIS

Hypergravity effects on bats spatial orientation, noting resistance to head-pelvis and pelvis-head accelerations

13 p1907 A72-30015

PENALTIES

Legal problems of aircraft hijacking, discussing jurisdiction, duty to prosecute, penalties, extradition, sanctions and international criminal tribunal

05 p0752 A72-15833

Hague convention on aircraft hijacking, discussing international extradition, prosecution and punishment

05 p0752 A72-15836

PENDULOUS GYROSCOPES

U GYROSCOPIC PENDULUMS

PENDULUMS

NT GYROSCOPIC PENDULUMS

Energy-phase time transformations of damped Liapunov system applied to nonlinear spring pendulum and betatron transient oscillations

01 p0103 A72-11387

Plane physical pendulum motion stability under randomly oscillating suspension point with allowance for viscous friction

04 p0549 A72-15055

Gravitational and inertial masses equivalence principle verification by pendulum torsional oscillation experiment with laser beam

04 p0519 A72-15070

Nonlinear mechanical oscillation systems analysis by analog computer, exemplifying pendulum rotating about vertical axis

06 p0851 A72-18725

Existence and branching of analytical solutions to equations describing oscillatory-rotatory motions of system of two pendulums with different masses

07 p1036 A72-20217

Subharmonic oscillations excited by horizontal vibrations of mathematical pendulum suspension

07 p1036 A72-20232

Dynamic characteristics of strongly damped pendulum, assessing vibrations effects on vertical determination accuracy

08 p1206 A72-20974

Pendulum impact resistance of tungsten fiber-metal matrix composites, noting heat treatment and test temperature effects

11 p1653 A72-25473

Inverted pendulum subjected to small amplitude sinusoidal periodic and stochastic base motion, determining stability boundaries by averaging method

12 p1844 A72-27247

Asymptotic stability of mechanical system with two mathematical pendulums and rod subjected to axial

follower, correcting aerodynamic and dissipative forces

12 p1847 A72-27979

Equations of motion and phase trajectory analysis for resonant oscillations of beam-pendulum system

13 p2003 A72-28721

On the apparent orbit of the Pulfrich pendulum.

18 p2653 A72-36608

Instability conditions for holonomic system with stationary constraints, applying to pendulum and to rectilinear motion of material point

20 p2955 A72-40033

The theory of motion of the horizontal pendulum with a Zoellner suspension and some indications for the instrumental design.

21 p3084 A72-40495

Energy transfer in vibration damping of pendulum with elastic suspension, noting periodic regimes and transient oscillations

21 p3086 A72-41547

Influence of instantaneous and prolonged pulses on the oscillations of timing-device oscillators

21 p3059 A72-41815

Electronically-damped pendulum acceleration measuring device with analog restoring mechanism. I

24 p3403 A72-45271

PENETRANTS

Nondestructive radioactive gas penetrant tests for porosity and fatigue damage in jet engine castings

01 p0069 A72-10813

Two-fold congruency tests of penetrant inspection system sensitivity using hydrophilic and lipophilic removers/emulsifiers/

07 p0995 A72-19650

Surface crack detection in ferrous and nonferrous metals, glass, ceramics and plastics by water-washable dye penetrants process

16 p2397 A72-33239

PENETRATING PARTICLES

U CORPUSCULAR RADIATION

PENETRATION BALLISTICS

U TERMINAL BALLISTICS

PENICILLIN

Ti leaching from granitic rocks by Penicillium, simplicissimum, discussing extraterrestrial life detection

05 p0616 A72-15809

PENNING DISCHARGE

Plasma beam production with Penning type discharge, demonstrating anisotropic electron temperature

03 p0395 A72-13566

Plasma sheath drift origin of hot ions in modified Penning discharge

04 p0551 A72-14439

PIG discharge system with plasma feed from duoplasmatron ion source for steady state operation with ion energies 1.5-5 keV

08 p1214 A72-21435

Quiescent steady state plasma production by beam-plasma discharges in uniform magnetic fields, showing plasma density fluctuation relation to Penning effect

10 p1519 A72-24022

Ultramicromanometer based on photomultiplier for low pressure Penning discharge light flux emission measurement

10 p1480 A72-24208

Rotating low density plasma in magnetic mirror trap with Penning discharge, determining conditions for oscillations damping and plasma lifetime

10 p1521 A72-24354

Penning ion source for multiply charged ions high intensity beams generation, describing axial type design with electron focusing magnetic coil

10 p1516 A72-25030

Plasma beam production with Penning type discharge, demonstrating anisotropic electron temperature

11 p1699 A72-26753

Low-frequency oscillations in a Penning-discharge plasma under conditions of a cyclotron ion source

21 p3095 A72-41682

The negative space-charge density distribution and the potential distribution in a Penning discharge cell

23 p3324 A72-44211

PENNING EFFECT

Electron cyclotron resonance in Penning ion source, measuring electron temperature from X ray emission spectra

10 p1516 A72-25029

Excitation transfer and Penning ionization reactions between helium metastables and carbon monoxide.

18 p2713 A72-36563

PENNING GAGES

Performance characteristics of various types of PIG sources for multiply charged heavy ions production

10 p1516 A72-25027

PENTACHLORIDES

U CHLORIDES

PENTANES

NT NEOPENTANE

PENTOBARBITAL SODIUM

NT RESERPINE

Dose dependent hyperglycemia and hypolipemia response to pentobarbital sodium injection in rats from plasma glucose and fatty acid analysis

08 p1116 A72-21187

PENTODES

Circuit of two parallel connected vacuum pentodes with different reactances to provide exact voltage division of ac signals by another

13 p1930 A72-29045

PENUMBRAS

Prominent Zeeman multiplets in photosphere, penumbra, umbra and sunspot spectra, presenting ratios for temperature sensitivity measurements

03 p0415 A72-12933

Fine structure of magnetic field distribution in umbra and penumbra of sunspots

03 p0428 A72-13299

Sunspots penumbral and umbral areas ratio in eleven year solar activity cycle, noting larger umbras at second maximum

07 p1082 A72-20295

Bright point intensity distribution on CN spectroheliogram of sunspot penumbra on 4 July 1970

13 p2045 A72-29710

Spectroheliograph study of fine structure of Evershed effect, determining radial velocity in penumbra along dark filaments and interfilamentary space

13 p2047 A72-29739

Lunar eclipse of 25 September 1965, observing penumbra densities and isophotes in B and V spectral regions by photoelectric photometry

14 p2161 A72-30915

PEPTIDES

Amino acid code comparisons of polypeptide chains of globins due to mutations during vertebrate evolution from ancestral gene

02 p0159 A72-11764

Energy transfer conditions of transdehydration reactions on primeval earth leading to transphosphorylation, transacylation and peptide synthesis

04 p0468 A72-14768

Atmospheric model for proteins abiogenesis, considering heteropolypeptides formation from hydrogen cyanide and water

04 p0468 A72-14772

Antibiotic polypeptide synthesis of gramicidin S and tyrocidine, using primitive model of sequential addition of amino acids on polyenzymes

04 p0470 A72-14790

Conversion of angiotensin to angiotensin 2 in dog pulmonary circulation, studying peptide synthesis, radioimmunoassay and in vivo and plasma in vitro metabolism

04 p0475 A72-15465

Dipeptidyl aminopeptidase I preparation from beef spleen and rat liver, discussing contamination with catheptic carboxypeptidase C and Ser-Met dipeptidase

07 p0935 A72-18906

Parenterally introduced protein hydrolyzates and aminopeptides influence on human pancreas enzyme secretion activity

09 p1268 A72-23595

Diastereometric S-prolyl dipeptide derivatives adaptation to gas chromatographic quantitative estimation of R- and S-leucine enantiomers

11 p1590 A72-26366

Biochemical analysis of cat brain regions for gamma-aminobutyric, aspartic and glutamic acids, glycogen and phosphatidopeptide concentrations during paradoxical sleep deprivation

16 p2356 A72-33559

Dipeptidyl aminopeptidase. I - Application in sequencing of peptides.

17 p2511 A72-35167

Evolutionary clock - Nonconstancy of rate in different species.

19 p2758 A72-38551

Recently published protein sequences. I.

23 p3254 A72-43570

NT VISUAL PERCEPTION

Universal perception meter for measurements in work psychology laboratories, discussing characteristics and operation

03 p0320 A72-13884

Adaptive neural nets of threshold logic units as models of perception and memory in biological systems

- 09 p1273 A72-23580
Statistical periodic analysis of cyclic activity in human perceptual-motor performance
13 p1911 A72-29845
Space environment weightlessness induced perceptual deprivation, considering hand-eye coordination, visual judgments and motion and time perception
16 p2355 A72-33549
Developmental relationships between field independence and fixity-mobility.
18 p2651 A72-36906

PERCEPTORS

U SELF ORGANIZING SYSTEMS

PERCEPTUAL SPEED

U PERCEPTUAL TIME CONSTANT

PERCEPTUAL TIME CONSTANT

- Time perception distortion level in simulated and real flight due to task complexity-related pilot emotional stress
14 p2078 A72-30392
Non-monotonicity of temporal recognition of brief duration.
18 p2651 A72-36912
Threshold excitation, temporal summation, and impulse response function in the retina of the cat - Temporal receptive fields of retinal ganglion cells
19 p2758 A72-38648

PERCHLORATES

NT AMMONIUM PERCHLORATES

NT POTASSIUM PERCHLORATES

Barium perchlorate thermal decomposition mechanism, presenting pressure-time and weight-loss curves

- 07 p1051 A72-19360
Burning rates of organic perchlorates of aliphatic, aromatic and heterocyclic amines and amidines with explosive compounds containing nitrogen dioxide group as oxidizer
22 p3153 A72-43181

PERCHLORIC ACID

Thermal decomposition of perchloric acid vapor in Pyrex reaction vessels at 279-471 C, using flow technique

- 09 p1276 A72-23143

PERFLUORO COMPOUNDS

Rust inhibited chemically inert perfluorinated polymer greases for liquid fueled rocket engines, discussing lubricating and nonreactive properties under high pressure operating conditions

- 06 p0837 A72-18604

PERFORATED PLATES

Momentum jet and electric discharge from same hole in plane wall bounding viscous incompressible conducting fluid, investigating flow field with similarity solutions

- 01 p0107 A72-10139
Ductile tensile cracking macroscopic simulation with perforated pure Al specimens, determining fracture energy as function of hole size and pattern
01 p0086 A72-10987

Carrying capacity solutions for perforated circular plates of rigid plastic material by kinematic method

- 01 p0143 A72-11366
Polycarbonate yield locus from strain rate, creep, isotropy, isoclinic and reloading tests on perforated plates

[SESA PAPER 1819] Stress and failure analysis of glass-epoxy composite plate with circular hole under uniaxial tension by finite element method

- 02 p0248 A72-11501
[SESA PAPER 1942] Stress tensor asymmetry effects on stress concentration at curvilinear holes in elastic plates under tension

02 p0289 A72-11611
Wake blockage paradox in two dimensional perforated wall wind tunnel, investigating interference velocity distribution

- 02 p0151 A72-12271
Elastoplastic problem of stress concentration in orthotropic plate with circular hole under balanced biaxial tension of infinity

02 p0293 A72-12428
Circularly symmetrical disks with circular hole and loaded by pressure at edges, calculating linear and power-law strain hardening

- 02 p0297 A72-12535
Stress distribution for anisotropic elastic plate containing two or more arbitrary elliptical holes

02 p0298 A72-12674
Square orthotropic and isotropic plates stability with square hole under uniformly distributed load

- 02 p0299 A72-12685
Thermal stress concentration at circular heat-insulated hole in plate with elastoplastic strains, assuming temperature independent mechanical properties

03 p0445 A72-13575
Stress concentration around reinforced curvilinear hole in elastic infinite plate, discussing ring reinforcement rigidity effects

- 03 p0447 A72-13730

Temperature stresses near thermally insulated square holes in unbounded plane, determining temperature distribution

- 03 p0449 A72-13914
Soviet papers on stress concentration near holes in plate and shell structures

03 p0449 A72-14101
Approximate solution for stress concentration near oval shaped hole in nonlinearly elastic plate, using small parameter and boundary perturbation methods

- 03 p0449 A72-14105
Stress concentration near free hole in circular thick compressed plate, using plane elasticity theory

03 p0450 A72-14107
Edge temperature effects on contact stress concentration in anisotropic plate with elliptic hole under mixed boundary conditions of thermoelasticity

- 03 p0450 A72-14109
Stress concentration and stability of plates and shells weakened by holes

03 p0450 A72-14110
Stress concentration at hole in plates after stability loss, using branching and small parameter method

- 03 p0450 A72-14111
Anisotropic plate with hole stiffened at edge by thin isotropic ring, calculating thermal stress distribution

03 p0450 A72-14113
Stress concentration of isotropic rotating multiply connected circular and elliptic plates weakened by two circular holes

- 03 p0450 A72-14114
Pressurized vessel bottoms weakened by central hole with edge stiffened by elastic ring, determining stress-strain state and stress concentration

03 p0451 A72-14120
Stress concentration at circular holes in polyurethane plates under plane compression wave, obtaining interference fringes

- 03 p0451 A72-14121
Transversely isotropic plates with elastic circular insert, calculating stress concentration at holes under bending

03 p0451 A72-14123
Diffusion saturation effects on thermal stress concentration in plate with circular hole under edge heating and lateral surface heat transfer

- 03 p0451 A72-14124
Time effects on stress concentration around circular and elliptical holes in infinite plate with nonlinear creep

03 p0451 A72-14126
Stress concentration around circular hole in infinite semibrittle plate under omnidirectional tension at infinity or pressure at hole contour

- 03 p0452 A72-14127
Stress concentration at circular, elliptical, square, rectangular and triangular holes in isotropic plates stiffened by discontinuous elements under uniaxial tension

03 p0452 A72-14133
Thermal stress concentration at heat insulated holes in orthotropic plate, assuming external-load free contour

- 03 p0452 A72-14134
Stress-strain state of transverse isotropic plate with hole under bending and torsional moments

03 p0452 A72-14136
Dynamic stress concentration at circular hole generated by plane bending wave propagation in thin plate, analyzing dependence on vibration frequency

- 03 p0453 A72-14139
Optimum variable thickness reinforcement around circular hole in flat elastic sheet under radial tension

04 p0583 A72-14463
Analytical model for acoustic impedance of perforated plate liner with multiple frequency excitation, discussing effects of fluid motion, grazing flow and spectral excitation

- 04 p0548 A72-14699
Variable thickness plate under cylindrical bending, considering stress concentration around circular hole

04 p0586 A72-14991
Forced vibrations of elastic plate with infinite series of identical circular holes, discussing elastic wave diffraction and stresses at/near holes

- 04 p0587 A72-15017
Circular disks, rings and perforated plates steady state field components, evolving forced and free vibration natural frequency equations

04 p0592 A72-15505
Disturbances in infinite plate of viscoelastic material due to impulsive radial forces and twist on inner surface of circular hole, using Laplace transformation

- 04 p0594 A72-15709
Complex potentials for nonlinear elasticity, creep and small elastoplastic deformations, applying to stress concentration at curvilinear hole in infinite plate

05 p0742 A72-17183
Stress concentrations at circular holes and inclusions in elastoplastic strain hardening plate under tension and shear

- 06 p0897 A72-18316

Low frequency biaxial load effect on stress concentration factors for circular and elliptical holes in Plexiglas plates

- 06 p0898 A72-18350
Approximate trigonometric solution to thermoelastic boundary value problem of plate with doubly periodic system of holes under unsteady temperature and thermal stress fields

06 p0899 A72-18363
Stress-strain state in elastic plate with small radial cracks and circular hole under hydrostatic tension

- 07 p1091 A72-19765
Stressed state of isotropic nonlinear plate with doubly periodic system of curvilinear holes

07 p1094 A72-20208
Stressed state approximate determination for isotropic slab with randomly positioned circular holes

- 07 p1094 A72-20210
Stressed state of infinite isotropic plate weakened by curvilinear hole with elastic plug, using asymptotic integration method

07 p1094 A72-20212
Stressed state of isotropic plate with curvilinear holes under tension, using computer techniques

- 07 p1094 A72-20215
Three dimensional stressed state of isotropic plate with elliptical holes under tension, solving boundary value problems

07 p1095 A72-20216
Biharmonic boundary value problems solution by summary representations method and conformal mapping for plane with two circular holes

- 08 p1242 A72-20906
Longitudinal plane harmonic elastic wave scattering and stress concentration at rough circular hole boundary in thin isotropic plate

08 p1243 A72-21230
Stress concentration and elastohereditary values at curvilinear hole in fiberglass reinforced plastic plate under bending moment

- 08 p1243 A72-21237
Stress concentration near elliptic and square orifices in plates with nonlinear viscoelastic hereditary creep properties

08 p1244 A72-21242
Thermal stresses in anisotropic annular, circular and perforated plates with temperature dependent coefficients for lateral surfaces heat removal

- 08 p1245 A72-21505
Microwave transmission loss prediction formula for obliquely incident plane wave leakage through perforated flat metal plate

08 p1135 A72-21559
Plane stability of isotropic plate with straight line series of holes reinforced by complex elements or multicomponent rings, determining stress concentration

- 08 p1246 A72-21710
Elasticity theory doubly periodic problem for unbounded anisotropic plate weakened by system of identical arbitrary holes with self balanced loads

08 p1246 A72-21807
Perforated flexible polymer plates stressed state problem with boundary conditions and viscoelastic and creep properties effects

- 08 p1248 A72-21861
Mixed boundary elasticity solutions for plane with cuts on real axis, using hyperelliptic Riemann surface

10 p1553 A72-23768
Plane harmonic compression waves scattering by circular holes in thin elastic plate, calculating dynamic stresses concentration

- 10 p1554 A72-24179
Stress concentrations around circular openings and failure criteria for orthotropic and anisotropic composite laminated plates subjected to uniaxial, biaxial and shear loading

11 p1732 A72-25474
Perforated plates plastic deformation, stresses and strains near holes, using strain gauge data in biaxial tensile tests

- 11 p1733 A72-25540
Linear contingency method for elasticity theory of anisotropic plate with elliptic hole, deriving boundary value problems solutions

11 p1733 A72-25543
Bending of simply supported thin square plate clamped around central circular hole and under uniformly distributed transverse load

- 11 p1736 A72-25985
Equilibrium equations of infinite strip with circular hole, using plane multiply connected domain method for stress field

12 p1878 A72-27087
Stress-strain state approximation for isotropic strip with circular hole, noting method adaptability to computer computations

- 12 p1880 A72-27232
Stress concentration in infinite elastic isotropic disk with circular hole under internal tensile loading

12 p1882 A72-27320
Green function for stress distribution in plane shaped disk with edge loaded circular hole, noting conformal mapping for arbitrary shape

- 12 p1883 A72-27391

Stress-strain state in pure bending for infinite elastic strip with circular central hole, using integral Fourier transforms

13 p2053 A72-28390

Stress-strain concentrations near circular holes in fiberglass reinforced plastic plates under various types of load as function of hole diameter/plate width ratio, anisotropy and load

13 p1983 A72-28560

Quasi-static thermoviscoelasticity problem for infinite plate with circular hole, investigating plate surface heat transfer and material viscosity effect on temperature stresses

13 p2061 A72-29796

Anisotropic plate with doubly periodic system of elastic ring stiffened elliptic holes, calculating stresses at holes due to tensile forces applied at infinity

14 p2165 A72-30685

Point heat source induced thermal stresses in elliptic plate with circular holes, determining stress-strain field by two dimensional elasticity theory

14 p2166 A72-30689

Elastoplastic stress concentration near elliptic hole in plate loaded in smallest axis direction

15 p2325 A72-31606

Equilibrium equations for boundary value problems in Vekua theory with moments allowance for plate with circular hole under bending and torsion

15 p2333 A72-32682

Rigidity effect of reinforcing rings on stressed state of physically nonlinear perforated elastic plates

15 p2333 A72-32683

Analytical solution of stress distribution and load endurance of perforated square plate supported at corners, comparing with photoelastic observations

16 p2470 A72-33410

Strain energy release rate for radial cracks emanating from a pin loaded hole.

17 p2623 A72-34254

On the extension of an infinite elastic plate containing an axisymmetric hole.

[ASME PAPER 72-APM-G] 17 p2624 A72-34313

An asymptotic solution for the large deflection of a circular plate with a central hole.

18 p2732 A72-36081

Infinite plate with a supported reinforced circular hole.

18 p2738 A72-37071

An analytical approach to the non propagating crack problem using the finite element method.

20 p2977 A72-38882

Russian book - Plates strengthened by composite rings and elastic cover pieces.

21 p3116 A72-40385

Theoretical and experimental investigations, conducted with the aid of a plate containing holes, concerning the simulation of a statistically arranged antenna group

21 p3028 A72-40505

Stresses around one hole or two holes subjected to internal pressures in semi-infinite or infinite medium.

21 p3118 A72-40717

A study of stress around non-central holes in a rotating tapered disc.

21 p3118 A72-40775

Thermoelastic problems for multiply-connected plates with heat dissipation at both plane surfaces.

21 p3121 A72-41237

Stress-strain state of thin circular perforated Cu plate under uniform tensile load, showing applicability of small elastoplastic finite deformation theory

21 p3122 A72-41351

Stress concentration around curvilinear holes in plates according to Reissner's theory

21 p3126 A72-41543

Influence of stress raisers in the form of circular holes on the endurance in symmetric bending of AM6BM aluminum-alloy sheet

21 p3071 A72-41704

Stress-strain state of an isotropic half-plane with an elliptic hole, deformed by concentrated loads

22 p3233 A72-42057

Stress-strain state at holes in plates in the case of asymmetric buckling modes

22 p3233 A72-42059

Stress concentration at an elliptic hole in an elastoplastic body

22 p3233 A72-42060

Velocity distribution in turbulent air flow over perforated plates with gas injection in turbulent boundary layer

22 p3166 A72-42256

Bending of a rectangular plate with a clamped edge and an internal symmetric cut

22 p3234 A72-42291

On the effect of the form of the strain energy function on the solution of a boundary-value problem in finite elasticity.

22 p3236 A72-42606

Versatile stretching of a disc shaped as a plane with elliptic aperture.

22 p3236 A72-42627

The stretching of a disc shaped as a semi-infinite plate with half-elliptic edge sector.

22 p3236 A72-42628

Stress concentration around holes in plates and shells.

22 p3238 A72-42834

Extensional vibration of a certain type of composite circular plate with a central hole.

22 p3240 A72-42879

Stress concentration around a circular hole in an elastoplastic medium under the action of a temperature field and omnidirectional tension

23 p3344 A72-43418

Steady thermoelastic state in an infinite plate with a moving parabolic cut

23 p3345 A72-43586

Temperature distribution in a perforated stiffener

23 p3356 A72-43684

Al alloy sheet panel tests for cracks emanating from stress concentration areas at holes or cutout edge

23 p3347 A72-43713

Approximate stress-strain state determination in plate weakened by arbitrarily oriented rectilinear cracks and circular holes in elasticity theory

23 p3349 A72-43801

Stress distributions in a semi-infinite plate with a row of circular holes.

23 p3355 A72-44398

PERFORATED SHELLS

Stress analysis of pressurized ribbed cylindrical shell with intersecting reinforced circular hole under internal pressure

[ASME PAPER 71-PVP-8] 02 p0294 A72-12470

Stress concentration in shallow cylindrical shell with circular hole under axial tension, torsion and internal pressure loading

[ASME PAPER 71-PVP-9] 02 p0295 A72-12472

Soviet papers on stress concentration near holes in plate and shell structures

03 p0449 A72-14101

Stress concentration around circular and elliptical holes in isotropic three layer spherical shells with rigid and lightweight fillers

03 p0449 A72-14104

Stress concentration and stability of plates and shells weakened by holes

03 p0450 A72-14110

Stress concentration at hypotrochoid hole in cylindrical shell under internal pressure and axial tensile stresses

03 p0453 A72-14138

Nonlinear elastoplastic deformations of flexible shells of revolution, calculating stress concentration at circular hole in spherical shell

04 p0588 A72-15049

Stress-strain state of thin ellipsoidal shell with central stiffened hole, using small elastoplastic deformation theory

04 p0588 A72-15050

Stress distribution at hole in multilayer anisotropic shells of composite glass-plastic or cermet material

04 p0588 A72-15052

Stress concentration around elliptic hole in infinitely long circular cylindrical shell under torsional loads

04 p0589 A72-15122

Perturbation solution for stress concentration around elliptic hole in cylindrical shell under torsional loading

04 p0589 A72-15123

Slot length effect on buckling load of cylindrical shell with circular holes

05 p0739 A72-16543

Elastoplastic stressed state of thin cylindrical shells with circular hole, using small strain theory

07 p1092 A72-19896

Membrane and bending moment stresses distribution at elliptical hole in circular cylindrical shell, solving boundary value problems

08 p1243 A72-21234

Critical values of compressive loads applied to mid-section of cylindrical shell weakened by circular holes

08 p1244 A72-21241

Successive approximations method for stress concentration problem at hole in cylindrical shell

08 p1247 A72-21818

Thermal stress distribution in orthotropic cylindrical shell weakened by circular hole, obtaining general solution by small parameter method

09 p1400 A72-22715

Pressure loaded shallow spherical shells with reinforced circular holes, noting stress concentration increase due to reinforcement bead eccentricity

11 p1734 A72-25736

Nonlinear equilibrium equations and elastic stability of cylindrical shell weakened by circular hole

12 p1878 A72-27080

Optimal weight and load capacity of ellipsoidal cylindrical shell of revolution of constant thickness with central circular hole under uniform internal pressure

12 p1885 A72-27977

Stress distribution in circular cylindrical shell weakened by two identical holes on common generatrix

12 p1886 A72-27984

Circular cylindrical shell under distributed edge load along circular hole contour, calculating stress concentration by trigonometric series solution for shallow shell equation

12 p1886 A72-28130

Shear strains and elastic anisotropy of transversely isotropic cylindrical shell with circular hole under uniform internal pressure, using shallow shell equations

14 p2165 A72-30438

Stress concentrations in cylindrical shells with cutouts under uniformly distributed axial tensile load, presenting exact solution of differential equation

15 p3238 A72-32138

Differential equations for stress-strain state of circular cylindrical shell with circular holes resting on elastic base under external pressure

15 p3233 A72-32686

Membrane and bending stress analysis for thin circular cylindrical shells with elliptic hole

16 p2464 A72-32918

Asymptotic singular perturbation solution to thick spherical shell with circular hole under axisymmetric external pressure

16 p2474 A72-34157

Stresses in a circular cylindrical shell having two circular cutouts.

20 p2982 A72-40063

Stress distribution in a cylindrical shell with reinforced holes

21 p3126 A72-41542

Calculation of the stress concentration at the joint between a cylindrical casing and a branch pipe for internal pressure

21 p3127 A72-41710

On the application of the mixed finite element methods to the stress concentration problems of cylindrical shells with a circular cutout or a crack.

22 p3232 A72-41942

Stress concentration around holes in plates and shells.

22 p3238 A72-42834

Stresses in a circular cylindrical shell with arbitrary holes.

22 p3238 A72-42837

Equilibrium equations and deformation of elastoplastic thin isotropic cylindrical shell with circular hole, noting nonlinear partial differential equations for plate displacements

23 p3345 A72-43587

Numerical determination of the stress concentration around a hole in a circular cylindrical shell

23 p3348 A72-43799

Stress concentration of a cylindrical shell with one or two circular holes.

23 p3355 A72-44399

PERFORATION

Stresses in a perforated, continuously loaded cantilever beam.

21 p3117 A72-40452

PERFORMANCE

Receiver performance characteristics and failure mechanism in presence of interference, discussing measurement methods for interference susceptibility

02 p0192 A72-12150

Modified quasi-linearization algorithm for solving nonlinear two-point boundary value problems based on performance index and cumulative error in differential equations

04 p0539 A72-15045

Antenna arrays performance optimization, emphasizing directivity and signal to noise power ratio

04 p0499 A72-15301

Antenna design and performance in random fields, using statistical description of fields

04 p0500 A72-15394

Adjustable structure model for parameter adaptive control, noting convexity of performance index function over evaluation interval

10 p1455 A72-23793

Sensitivity comparison of equivalent open and closed loop optimal control systems, extending performance index formulas to instantaneous and isoperimetric constraints

10 p1456 A72-24456

Hydraulic vortex amplifiers with and without diffusers, discussing supply pressure and liquid viscosity effects on system performance

11 p1578 A72-26980

Magnetovariometers design, operation and applications, discussing ferromagnetic materials properties effect on performance characteristics

12 p1792 A72-27739

EUV open channel photomultipliers satellite-borne long term performance degradation, attributing sensitivity loss to grating contamination

15 p2235 A72-31645

Centrifugal pumps performance instability, considering mass flow rate/pressure curve characteristics as function of impeller slip, fluid prerotation and hydraulic losses

18 p2694 A72-36042

German monograph - Computational and experimental investigations regarding the operational characteristics of a three-stage axial-flow compressor with high performance per stage

19 p2745 A72-37490

Improving diffuser performance by artificial means.
20 p2885 A72-39624

PERFORMANCE CHARACTERISTICS

U PERFORMANCE

PERFORMANCE DECREMENT

U PERFORMANCE

PERFORMANCE PREDICTION

NT PREDICTION ANALYSIS TECHNIQUES

VLF modulation/demodulation system performance prediction by atmospheric noise model, comparing results with measurements
01 p0025 A72-10327

Bipolar transistor model for device and circuit performance prediction, determining parameter from charge distribution by regional approximation technique
01 p0042 A72-10786

Supercapacitor balloons /tetroons/ performance characteristics, determining ascent rates and superpressure, stress and volume perturbations due to forced change in height
01 p0005 A72-10829

Metals mechanical behavior, considering plastic deformability, strain hardening, cohesion and engineering performance prediction
01 p0086 A72-10985

ERTS return beam vidicon imagery simulation, predicting resolvability of ground targets as function of target size, contrast, spectral distribution and radiance level
02 p0226 A72-11833

Signals detection under unknown direction and arrival time conditions, developing performance evaluation method based on detection probability-false alarm curves
02 p0180 A72-12573

Pulse shaped small parameter variation effects on performance index of minimum fuel control systems with initial and final manifolds
03 p0337 A72-12906

Quadrupole mass spectrometer ultimate characteristics concerning resolution, range, recording speed, working pressure and sensitivity
03 p0360 A72-13665

P-channel MOS/silicon-on-sapphire transistor logic circuits for aerospace systems, investigating radiation hardness and performance potential
03 p0334 A72-14086

Two dimensional solar cell model with partial differential equation relating arbitrary point potential to cell parameters for I-V characteristics prediction
04 p0465 A72-14480

Self oscillating dc-to-dc converters performance and design, considering switching frequency, duty cycles, line and load regulation and peak-to-peak ripple
04 p0465 A72-14487

Prolate spheroidal functions application to optical system performance characteristics, discussing laser modes, signals maximal concentration, image data extrapolation, etc
04 p0548 A72-14741

Suboptimal nonlinear filter performance evaluation methods based on Kolmogorov equations for Markov process transition density function
04 p0505 A72-15040

Arc driven shock tubes performance prediction, presenting correlation equations for velocity calculation
[AD-738275] 04 p0510 A72-15499

Nonrecursive and recursive adaptive equalizers for digital communication, discussing computerized simulation of performance
04 p0493 A72-15520

Gas turbine combustors performance model, using reaction rate equation from elementary mass balance equation
[ASME PAPER 71-WA/GT-5] 05 p0704 A72-15898

Forming of 7075-T6 Al in high pressure environments, predicting fracture occurrence via finite element stress analysis computer programs and pressure dependent model
[ASME PAPER 71-WA/PT-11] 05 p0671 A72-15912

Spiral groove shaft vacuum seals, presenting mathematical ballpark performance model
[ASME PAPER 71-WA/PID-5] 05 p0664 A72-15914

Bistable fluidic amplifiers switching dynamics, developing analytic performance prediction method from flow visualization studies
[ASME PAPER 71-WA/FLCS-8] 05 p0615 A72-15916

CW millimeter wave power generation with spiraling electron beams, investigating energy spread effects on performance limitation
05 p0636 A72-16363

Sail rotors for hovering platform, calculating rotor performance based on ideal two-dimensional flexible airfoil section characteristics
[AIAA PAPER 72-66] 05 p0612 A72-16925

Mach 2.65 axisymmetric mixed-compression inlet system diffuser and boundary layer bleed system performance estimates confirmed by tests
[AIAA PAPER 72-45] 05 p0609 A72-16959

presence of thermal noise and intersymbol interference
06 p0772 A72-17408

M-ary orthogonal signal phase noncoherent detection in sequential decision feedback, comparing performance with optimal coherent reception
06 p0773 A72-17596

Pyramidal horn antenna with mesh conducting surface comparing response with geometrically similar horn with continuous walls
06 p0783 A72-17600

Wide range bias dependence of planar bipolar transistor dc and small signal current gain, comparing analytical findings with Si junction experiment
06 p0783 A72-17608

Response surface methodology /RSM/ techniques application to operator target acquisition performance prediction, describing multivariable functional relationship by multiple regression polynomial equation
06 p0773 A72-17714

Fatigue behavior of notched or cracked aircraft structure parts, examining service life prediction problem
06 p0895 A72-17811

Color defective vision performance predictions during day and night tests of aviation color signal light discrimination
06 p0767 A72-17871

Microwave frequency multiplier construction by hybrid circuits based on quasi-lumped components, calculating characteristics from equivalent circuit
06 p0785 A72-18313

Computer aided renormalized perturbation method for inhomogeneously loaded waveguide performance calculation
06 p0786 A72-18377

Quasi-time optimal nonlinear controller for steerable antennas or telescopes in target acquisition or slew mode, predicting performance by digital simulation
07 p0959 A72-19288

Selective attention dichotic listening test as flying proficiency prediction criteria, discussing omission and intrusion errors
07 p0929 A72-19351

Metals and alloys breakdown toughness and mechanical properties predictions under various loading conditions, discussing interatomic bonds and plastic deformation zone size
07 p1019 A72-20146

Aircraft preliminary design procedure with integrated performance simulation, using time sharing computer facility
07 p0913 A72-20353

Numerically exact nonlinear filter synthesis, describing confidence intervals for error performance statistical inferences
08 p1144 A72-20850

Nonlinear filter dynamics for stochastic optimal control for quadratic cost functional, evaluating performance
08 p1145 A72-20866

Coherent radar pulse train clutter performance prediction for targets with range acceleration effects on Doppler response
08 p1133 A72-21405

Rarefied gas sealant viscoelastic performance prediction by analytical models, comparing results with experiments on multiple grooved samples
08 p1177 A72-21929

Hydrodynamically lubricated mechanical seal design, predicting duty variation effects on performance
08 p1179 A72-21942

Single mode He-Ne laser output, predicting intensity correlation function form and decay time near threshold
[AD-742154] 09 p1324 A72-23081

Quadratic performance index generation for optimal design of completely controllable, scalar linear system with state feedback
09 p1454 A72-23783

Prediction method for computing maintenance technician reliability as probability of equipment repair completion within given time
09 p1486 A72-24000

Human performance prediction dependence on task and equipment variables effects, using experimental data for performance classification system
09 p1429 A72-24003

Maximum likelihood receiver performance for optical detection of multimode laser or scattered radiation, considering photocounting distribution, decision threshold and error probability
09 p1452 A72-24681

Radar detection performance calculation with post-detection integration using single valued loss and ideal curves in terms of SNR
09 p1437 A72-24689

Antisymmetric pseudorandom signal performance in measurement of second order kernels in Volterra series representation of nonlinear system by cross correlation
10 p1439 A72-24805

PERFORMANCE PREDICTION

Vortex fluid amplifier design with asymmetrical flow fields, discussing effects of geometrical parameters variations on performance characteristics
10 p1423 A72-25053

Momentum anemometer for wind velocity and vorticity measurement, discussing design principle and performance advantages
10 p1484 A72-25089

Vigilance performance prediction for difficulty-matched auditory and loosely and closely coupled visual intensity discrimination tasks
10 p1433 A72-25127

Hub and shroud boundary layer growth in centrifugal compressor vaneless diffusers, comparing predicted and measured performance at high pressure ratio per stage
[ASME PAPER 72-GT-54] 11 p1570 A72-25645

Fluidic proportional and digital amplifiers environmental effects on sensitivity of gain, noise and null shift based on dependence on Reynolds number
[ASME PAPER 72-GT-84] 11 p1577 A72-25660

Spectral density of frequency deviating process for performance predictions from oscillator testing and frequency noise calibration, discussing sample averages convergence to statistical values
11 p1593 A72-25892

Computer program for biowaste resistojet nozzle performance prediction, taking into account viscous effect at low Reynolds number
[AIAA PAPER 72-450] 11 p1708 A72-26187

Inward radial flow turbines under unsteady flow conditions with full and partial admission, predicting performance by method of characteristics
12 p1751 A72-27349

Glass fiber reinforced thermoplastic resins chemical and hydrolytic resistance, noting composites and polymers long term performance prediction in aggressive environments
12 p1833 A72-27405

Aerospace guidance multiprocessor with memory units attached to time-multiplexed data bus, predicting performance in terms of queueing theory, Markov process and simulation
12 p1786 A72-27433

Factor analysis of grades for successful performance skill identification during undergraduate and graduate jet pilot training
12 p1769 A72-27472

ATS F/G spacecraft thermal control design verification by chamber thermal balance tests and performance prediction mathematical model of earth viewing module and orbital environment
12 p1877 A72-27527

Intensified electron bombarded Si camera tube performance in low light level TV systems, predicting sensor resolution vs irradiance characteristics
12 p1810 A72-27934

Reliability prediction of system with components having independent and constant rate failures
13 p1961 A72-28357

Strike aircraft reliability prediction in cost effectiveness analyses, showing failure probability distribution with time
13 p1896 A72-28360

Model for mercury vapor electron bombardment ion thruster hollow cathodes operation and effects on thrust subsystem performance predictability
[AIAA PAPER 72-420] 13 p2026 A72-28936

Nonequilibrium MHD generator with electrode walls slanted away from magnetic field direction, predicting electrical performance for comparison with flat wall generator
13 p1899 A72-29352

Linear nonequilibrium Faraday type MHD generator, predicting electrode configuration effects on voltage drops, axial leakages and current distribution
13 p1900 A72-29353

MHD power generators analytical modeling by digital technique for prediction of performance and efficiency as function of size and operating conditions
[AD-741173] 13 p1900 A72-29355

Numerical analysis method for performance prediction of linear induction machines including liquid metal MHD pumps and generators and linear motors
13 p1900 A72-29365

Sunspot cycle 21 behavior prediction, explaining solar activity forecasting based on 80 year cycle
13 p2046 A72-29727

Energy cost /oxygen consumption/ prediction for treadmill and various levels terrain walking at two speeds under three different pack loads
14 p2080 A72-30706

Psychological criteria for flying personnel selection in civil aviation, noting performance prediction based on maximum likelihood estimates
14 p2080 A72-30816

Adhesive and abrasive wear technology assessment, considering design equations use for prediction
[ASME PAPER 72-DE-2] 14 p2108 A72-30859

Liquid propellant rocket performance, stability and compatibility prediction techniques, noting effect on design time and cost
14 p2146 A72-30919

Pilot landing performance prediction criteria based on day and night carrier qualification trials and flight training

14 p2081 A72-31084

Multiple port waveguide circulators bandwidth performance calculation to include higher order cylindrical and evanescent modes

15 p2205 A72-31356

Generalized locking equation for microwave oscillator bandwidth prediction for arbitrary cavity configurations and waveforms, considering strong harmonics presence

15 p2205 A72-31358

Parabolic reflector fed by log-periodic dipole antenna array, predicting combined effects of feed phase center lateral and axial displacement on secondary performance

15 p2205 A72-31541

Computer model study of FET with submicrometer gates, noting gain-bandwidth product increase with decreasing gate length

15 p2205 A72-31544

Solid and composite rotor induction motors, comparing predicted characteristics based on analytical and numerical analyses

15 p2182 A72-31779

Limited energy source operational time comparison for continuous and pulse mode operations

15 p2196 A72-31785

Laser Doppler velocimeter designs for atmospheric applications, discussing illuminating techniques, SNR, performance comparison and system selection

15 p2237 A72-32051

Aerodynamic properties prediction procedure for thin jet-flapped airfoil in incompressible inviscid flow bounded by different types of boundaries

15 p2179 A72-32147

Collection efficiency of conical and blunted axisymmetric power law bodies in hypersonic flight through dust clouds and of impact angle and velocity

15 p2180 A72-32580

Crash helmet performance prediction through maximum strain criteria, using brain injury biodynamic model

15 p2192 A72-32607

Automatic systems design for monitoring dynamic control systems, noting feedback control system performance prediction based on subsystems characteristics

16 p2371 A72-33085

Perturbation extremum controller with simple coincidence logic, discussing fluidic implementation and performance in simulated plant control

16 p2350 A72-33193

Performance criteria for transform data coding schemes evaluation under computational constraints, presenting numerical examples for Fourier, Walsh, Haar and Karhunen-Loeve transforms

16 p2366 A72-33214

Teflon-bonded hydrophobic gas diffusion electrode performance prediction by mathematical treatment of flooded catalyst agglomerate model

16 p2352 A72-33892

Aerodynamic stall characteristic prediction from static experimental data for airfoils, noting boundary layer effects

[AIAA PAPER 72-682]

16 p2346 A72-34060

Supercritical pressure convergent nozzle performance prediction by time dependent method of characteristics solution to mixed flow problem, adapting Moretti-Abbott technique

[AIAA PAPER 72-680]

16 p2346 A72-34061

Components creep-rupture life prediction for multiaxial stress from uniaxial test data, discussing crack initiation and propagation phases stress states

16 p2412 A72-34114

An electromagnetic analysis of a cylindrical homogeneous lens.

17 p2525 A72-34362

Simulation models for airports performance evaluation through replication of traffic units actual movement

17 p2535 A72-34414

Pulsed Impatt diode oscillator circuit design and operation frequency prediction for high Q coaxial structures from equivalent circuit

17 p2526 A72-34466

The wake geometry of a hovering helicopter rotor and its influence on rotor performance.

[AHS PREPRINT 620]

17 p2484 A72-34497

Digital simulation for sampled electro-optical imaging system performance prediction and optimization

17 p2557 A72-35553

Flight tests correlation with mathematical models to predict electro-optical viewing systems capability for military missions

17 p2557 A72-35553

Performance of low pressure ratio ejectors for engine nacelle cooling.

[SAE AIR 1191]

18 p2721 A72-36530

Microwave junction transistor geometric design factors effect on reliability and performance, comparing overlay, interdigitated, mesh and inverse overlay structures

18 p2666 A72-36553

Effect of magnetic field on the performance of millimeter-wave detectors using bulk InSb.

19 p2772 A72-37570

Influence of plasma kinetic processes on electrically excited CO₂ laser performance.

19 p2812 A72-38598

Differentially coherent detection scheme with error-correcting capability by means of decision patterns.

19 p2766 A72-38605

Visual aid-to-eye direct coupling, evaluating partial coherence effects on imagery optical performance by computer program

20 p2931 A72-39050

Double-ended, folded-path and double-reflecting transmissometers operation principles, and measurement error sources consideration for relative merits and disadvantages

20 p2923 A72-39054

Thermal scale models utilization to predict spacecraft radiator system performance, presenting criteria for modeling fluid system with combined convection, conduction and radiation effects

[ASME PAPER 72-ENAV-29]

20 p2894 A72-39148

Simple conduction model for theoretical steady-state heat pipe performance.

20 p2984 A72-39607

Performance improvement of amplitude-constrained minimum-variance controller by minimising sum of variance.

20 p2911 A72-39772

Performance of antennas in random fields.

21 p3026 A72-40355

Theoretical model prediction for matched filter selectivity and noise effects on strained object deformation in optical correlation applications, comparing results with experiments

21 p3053 A72-40611

Analysis of large-signal noise in Read oscillators.

21 p3032 A72-40698

Two explanations of temporal changes in ability-skill relationships - A literature review and theoretical analysis.

21 p3008 A72-41015

Team size and decision rule in the performance of simulated monitoring teams.

21 p3008 A72-41016

Shadow shields for minimizing radiant heat transfer into cryogenic propellant tanks on interplanetary missions, predicting performance for comparison with scale model experiment

21 p3130 A72-41181

Integration of aerospace vehicle performance and design optimization.

[AIAA PAPER 72-948]

22 p3137 A72-42355

Performance prediction of large-scale integrated logic circuits.

22 p3160 A72-42824

Two-dimensional model for thermal compression.

22 p3136 A72-42868

Empty weight and cruise performance of very large subsonic jet transports.

[SAWE PAPER 919]

23 p3251 A72-43466

Performance characterization for L-orthogonal signal transmission and detection, discussing tradeoffs between error probability, SNR and bandwidth by numerical evaluation

23 p3265 A72-44180

Book on complete technological system reliability assessment covering performance requirement and achievement, transfer characteristics, sampling, estimation, confidence, synthesis problem, etc

23 p3294 A72-44499

A concept of service life for estimating the reliability of machines and devices

24 p3405 A72-44623

The calculation of elastic tanks partially filled with liquids for prediction of the Pogo effect

24 p3392 A72-45152

Application of cascade and actuator disc theories to computer aided design of fans.

24 p3363 A72-45359

Prediction of velocity profiles for turbulent boundary layers on the blading of radial impellers.

24 p3393 A72-45360

An approximate method for the calculation of the characteristics of axial-flow fans.

24 p3363 A72-45369

California psychological inventory as a predictor of success in the Naval flight program.

24 p3377 A72-45655

PERFORMANCE TESTS

Supersonic ribbon parachute testing by transonic wind tunnel, rocket sled and water channel simulator

01 p0004 A72-10305

Test program to evaluate metallic materials candidates for space shuttle booster thermal protection system

01 p0085 A72-10755

Completely sealed off room temperature CO laser system, discussing performance and continuous wave power

01 p0080 A72-10852

Nimbus 3 and 4 satellite technological and meteorological performance, discussing atmospheric

temperature humidity and ozone vertical sounding for numerical weather forecasting models

01 p0130 A72-10955

Unidirectional glass/graphite fiber-epoxy resin composite, discussing fabrication and performance tests for mechanical properties

[SME PAPER EM 71-192]

01 p0092 A72-10971

Random and algorithmic procedures employing three-valued logic system for sequential circuits fault detection test sequence generation

02 p0185 A72-11486

Multispectral photographic data preprocessing and computerized simulation of ERTS data channel to make terrain maps, testing classification accuracy improvement possibility

02 p0215 A72-11880

Bias and spread in extreme value theory inter-performance tests of communications systems, comparing with bit error rate tests

02 p0173 A72-12129

ECG telemetry systems parameters, discussing manufacturers specifications and standardized laboratory performance test data

02 p0169 A72-12139

Frame synchronization performance tests for PCM telemetry system, considering code selection, frame length and data recovery

02 p0175 A72-12147

One-way error correcting system with 1/3 rate interleaved block code, testing code performance over 1300 km vhf ionoscatter path and 1500 km hf path

02 p0175 A72-12153

Ti-Al-Mo alloys thermomechanical treatment, investigating alloy composition effects on hardening

02 p0244 A72-12246

Navy uhf telemetry transmitter production system, discussing test program contribution to quality control

02 p0177 A72-12322

Optimal smoothing application to testing of inertial navigation systems, gyros and component failure detection during mission

02 p0258 A72-12810

Nozzle boundary layer effects on resistojets performance, presenting conical design model in heater stagnation conditions

03 p0405 A72-12973

Time shared performance test monitor function, operation and self repair of corporate fed array radars with computer control for long time internal reliability

03 p3321 A72-13165

Abastumani Observatory 70 cm meniscus telescope, determining performance from primary focus field data

03 p0359 A72-13498

Ten million bit magnetic film computer memory, discussing design, fabrication, performance and cost per bit

[IEEE PAPER 11.1]

03 p0327 A72-13761

Nondestructive readout in computer storage of plated wires on Permalloy film deposited substrates, testing design parameters effects on performance

[IEEE PAPER 11.2]

03 p0332 A72-13762

High speed easy rewrite read-only memory using plated wire with multilayered nondestructive readout magnetic thin film, testing performance

[IEEE PAPER 11.4]

03 p0332 A72-13764

Isolated antenna system for shielded enclosure measurements at 20-200 MHz, discussing associated circuits design and performance tests

03 p0333 A72-14037

Pioneer F and G space probe EMC specification limits, comparing computer analysis prediction and system test data

03 p0329 A72-14048

Synchronization system for remote control and performance checking of motion picture projectors with running film, discussing recording equipment and stroboscopic pulsed illuminator operations

04 p0521 A72-14711

Gallium-doped Ge bolometers and triglycine sulfate pyroelectric far IR detector, testing performance as functions of frequency and temperature

04 p0525 A72-15601

Military aircraft inertial navigation system design, discussing gyroscope, gyro compassing alignment, accuracy and performance

04 p0545 A72-15666

Arterial and grooved Wick cryogenic nitrogen heat pipe performance tests, comparing elevation sensitivity, priming and heat transfer characteristics

[ASME PAPER 71-WA/HT-42]

05 p0745 A72-15889

Gas turbine procurement standard rating and performance indicators, noting dependence on ambient conditions

[ASME PAPER 71-WA/GT-1]

05 p0703 A72-15894

Spherical air bearing supported test facility for satellite attitude control system performance testing, discussing motion simulator and automatic balancing system

05 p0643 A72-16435

Satellite attitude control with gimbaled reaction wheel digital system, discussing logic and computerized design, implementation, fabrication and performance tests

05 p0726 A72-16458

Three-axis attitude control and stabilization system for sounding rocket payload, discussing performance from simulation and ground test results

05 p0728 A72-16478

Supersonic axial flow shock-in-rotor type compressor performance tests, discussing factors responsible for low efficiency

05 p0601 A72-16481

Circular arc blades two dimensional cascade performance test data for various cambers comparison with potential theory data

05 p0602 A72-16485

Large scale high aspect ratio multielement supersonic nozzle arrays testing for augmentor wings and internally blown flaps

[AIAA PAPER 72-131] 05 p0612 A72-16888

Image data coding by adaptive block classification and quantization of source output symbols, evaluating performance

06 p0772 A72-17402

Raman laser radar /LIDAR/ for remote probing, discussing design, construction, testing, atmospheric scattering, and intensity and polarization measurements

06 p0824 A72-17588

GERT simulation program as stochastic network analysis technique for modeling policies and processes in performance tests and checkout

06 p0780 A72-17977

InP transferred electron microwave oscillators, observing higher efficiency than IMPATT and GaAs devices

06 p0784 A72-18063

Top wall and multiple branch hybrid junction waveguide couplers for millimeter wavelengths, measuring insertion loss performance

06 p0787 A72-18378

Carrier suitability testing for aircraft landing, considering landing gear and supporting structure under simulated shipboard conditions

06 p0759 A72-18497

Semiconductor device IC encapsulation, thermal design, stress analysis, testing and applications

06 p0791 A72-18577

Semipermanent and permanent pressure connections in electronic systems, discussing design and performance evaluation

06 p0791 A72-18580

Economical performance of single rim supersonic turbine stage with repeated low level admission of working body

07 p0908 A72-18986

Gigahertz reflection amplifiers with low cost avalanche transit time diodes, measuring characteristics of amplification by synchronization at center frequency

07 p0955 A72-19191

High voltage axially pulsed carbon dioxide laser performance test, determining output energy dependence on tube parameters

07 p1001 A72-19197

Performance tests of return beam vidicon multispectral television camera system for ERTS program

07 p0986 A72-19657

Explosive/pyrotechnics performance monitoring for acceptance, lot qualification, comparison testing and system design guidelines

08 p1219 A72-20760

Aluminum plated pyrotechnics physical properties and performance for electroexplosive device applications, describing particle size distribution and loading pressure dependence of density

08 p1221 A72-20772

Transcendent Si power rectifier with high current and power dissipation capacity, discussing design, fabrication and performance tests

08 p1111 A72-21413

Sealed-off He-Se laser construction and performance, comparing with He-Cd, He-Zn and He-Ne lasers

08 p1182 A72-21437

Flame resistant materials for aircraft fire fighter protective clothing from systems approach tests

08 p1126 A72-21585

Metallic four-lip seal performance, discussing force cycle, mechanical spring-back, reusability at room and higher temperatures and thermal shock behavior

08 p1179 A72-21939

Workability tests from material deformation stress determination and fracture strain rate relation for forging, extrusion and rolling limits predictions

08 p1190 A72-22198

Zirconia ceramics for high performance storage heaters, discussing operating conditions, optimal properties for heater design, engineering evaluation tests and in-service performance

09 p1333 A72-22383

Alumina microstructure, grain size and impurities effects on ballistic performance, discussing results in terms of microplasticity

09 p1334 A72-22390

Performance characteristics and limitations of electrode and insulation materials for open and closed cycle MHD generators, noting ceramic compositions for channel

[AD-737019] 09 p1335 A72-22401

Magnetic field measurement methods and magnetometers performance in superconducting, thin film, resonance and fluxgate areas

09 p1308 A72-22465

CW Kr arc lamps for high power Nd-YAG laser pumping, testing operating life and electrical and spectral characteristics as function of design

09 p1324 A72-23080

Pulsed arc TIG welding with modulation of current from standard power source, comparing performance with steady dc method

09 p1320 A72-23632

Low speed performance and boundary layer growth in optimal annular diffuser with uniform center body diameter and conically diverging wall

10 p1415 A72-23856

Electric discharge carbon dioxide laser performance in terms of optical beam quality, electrical efficiency and gas utilization

10 p1489 A72-23943

Electron image projection system using converter tube technique for microcircuit lithography, discussing performance tests and design changes

10 p1447 A72-23957

Multistage systems maintainability, presenting equations for optimum allocation of demonstration tests to repairable elements

10 p1443 A72-23982

Reliability program for SAAB 37 Viggen airborne computer, discussing prototype and components operating tests and failure rates

10 p1443 A72-23984

Bulk effect diodes combination with YIG elements to provide oscillator operation up to 18 GHz, discussing design, circuit diagrams and performance

10 p1448 A72-24037

CW circuit stabilized InP microwave reflection amplifiers in Q band, determining power gain and noise figure

10 p1450 A72-24308

Three dimensional wind tunnel investigation of vortex augmented unswept wing with leading edge cusp flap and split upper and lower trailing edge flaps

11 p1568 A72-25584

Liquid metal regenerator design and test evaluation for gas turbine engine fuel consumption improvement

[ASME PAPER 72-GT-33] 11 p1704 A72-25629

Cascade technology for centrifugal compressor vane diffuser design, comparing performance results with conventional diffuser data

[ASME PAPER 72-GT-39] 11 p1569 A72-25633

Multiaxis radial circuits for transferred electron microwave oscillator performance optimization to obtain wideband CW amplification, discussing LSA tests

11 p1604 A72-25745

Engine ignition electronic system for triggering detonators in Aeros aeronomy satellite blastoff and release devices, discussing prototypes acceptance tests

11 p1610 A72-25803

GaAs solar batteries for spacecraft power supplies, comparing effectiveness with Si cells for optimum utilization

11 p1578 A72-25940

Ion thruster performance calibration investigating double ion content, back ingestion, beam spreading and propellant flow rate

11 p1709 A72-26206

Optimization of diagnostic tests for monitoring industrial system efficiency, obtaining compromise between costs and utilization

11 p1611 A72-26441

Vibrating string accelerometer sea gravity meter with electronics for digital readout, discussing performance tests

11 p1635 A72-26499

Atmospheric pressure noise reducer for active microbarograph array, evaluating performance in field tests

11 p1613 A72-26510

Quadrupole ion pump performance characteristics, presenting pumping speed as function of pressure at different peak voltages

12 p1805 A72-27040

Technological parameters effects on resistance values dispersion of thick film resistors, reviewing stability test performance

12 p1788 A72-27274

Performance and environmental tests of large lightweight solar array unit, measuring structural members displacements with electro-optical instruments

[AIAA PAPER 72-569] 12 p1755 A72-27377

Silicon solar cells antireflection coatings for performance loss minimization, obtaining improvement with titanium dioxide compared to silicon monoxide coatings

12 p1757 A72-28027

Integral diode cell for solar arrays compared with bypass configuration, discussing design, advantages and electrical performance test data

12 p1757 A72-28031

Cocuring technique optimization for primary aircraft components composite materials, discussing

mechanical and dimensional properties test data, production cost analysis and cure time

12 p1815 A72-28077

Composite materials application to gas turbine fan guide vane fabrication, noting economic factors and prototypes performance in engine tests

12 p1815 A72-28100

Detection range, color, brightness and flash subjective response tests to evaluate light signals for nighttime sea navigation and visual collision avoidance

12 p1777 A72-28326

Incentive contracts with price differential acceptance test plans to motivate producer to product improvement, defining admissible strategies in terms of risk limitation

13 p2066 A72-28354

Solid propellant pulsed plasma microthruster performance tests, describing engine design and operation

[AIAA PAPER 72-460] 13 p2026 A72-28945

Accelerated reliability, life, fatigue and performance tests of automatic systems components, noting mathematical models for minimum time techniques

13 p1965 A72-29172

Design characteristics and in-flight performance tests of computerized airborne OMEGA receiver, noting time independent one mile accuracy

13 p1997 A72-29188

Thin oxidation resistant alloy claddings for superalloys, comparing performance with aluminide coatings by cyclic furnace and high velocity burner rig tests

14 p1113 A72-30271

Training cockpit TL-29 mean time of failure-free operation from measurement data during development tests and two year guarantee, calculating avionic devices reliability

14 p2092 A72-30281

Microwave radiometer performance analysis, deriving input noise power relation to instrument indication in terms of noise parameters

14 p2105 A72-30587

Semiconductor devices quality assurance based on electrical and mechanical performance tests at every stage of product manufacture from initial design

14 p2091 A72-31164

Low power TTL IC in plastic and hermetic packages tested for reliability via critical dc parameters measurement in initial and post-stress states

14 p2091 A72-31168

Prototype local oscillator for X band communication satellite, discussing electrical and mechanical characteristics and temperature and noise measurements

15 p2204 A72-31182

Large astronomical telescopes construction, discussing aspherical surfaces control, grinding, polishing and optical testing procedures

15 p2234 A72-31612

Ultrasonic sound influence on metal physical and mechanical characteristics, utilizing in testing and manufacturing procedures

15 p2275 A72-31832

Worldwide distress alarm, identification and position location system for downed aircraft, discussing GRAN feasibility tests

15 p2272 A72-32214

Lunar roving vehicle qualification program to meet performance specifications under lunar conditions, describing testing procedures and project management techniques

15 p2214 A72-32613

Optical system production acceptance test based on modulation transfer function, discussing instrument design and test philosophy

16 p2389 A72-32847

Nondestructive monitoring techniques to optimize performance and service tests, considering penetrating radiation, electromagnetic induction, ultrasonics, holography, microwaves, acoustic emission and thermal monitoring

16 p2397 A72-33219

Piezoelectric shock transducers system performance tests, assessing previously recorded shock signatures

16 p2393 A72-33636

Sailplane performance measured in flight

17 p2487 A72-34215

Focusing properties and efficiency of EHF waveguide lens with Al honeycomb as guiding medium, noting design considerations and performance test results

17 p2525 A72-34368

Development of a full-length external-fuel thermionic converter for in-pile testing

17 p2495 A72-34590

Comparison of computer-acquired performance data from several fixed spaced planar diodes

17 p2496 A72-34605

Performance comparison of thermionic converters with several collector materials

17 p2497 A72-34606

Cylindrical diode characteristics with sublimed electrode surfaces

17 p2527 A72-34607

- Performance measurement in helicopter training and operations. 17 p2509 A72-35550
[PP-10-72]
- A relative performance analysis of atmospheric laser Doppler velocimeter methods. 17 p2558 A72-35949
- Thermionic converters performance and life tests, discussing test equipment and diffusion effect on emitter stability 18 p2643 A72-36139
- In-core thermionic converter emitters irradiation tests to determine fuel, fission gas venting system and emission layer performances 18 p2708 A72-36158
- Thermionic fuel element triple diode configuration, processing, assembly and performance during neutron irradiation testing in reactor 18 p2708 A72-36159
- Reactor testing and performance of in-pile thermionic fuel elements, noting neutron radiographs 18 p2708 A72-36160
- Attitude instruments, pitch and roll. I - Minimum performance standard for equipment. 18 p2692 A72-36534 [SAE AS 1162]
- Operation and performance characteristics of flying spot scanning X ray imaging systems for rapid film safe parcel inspection 18 p2692 A72-36671

- PERIGEEES**
Extremum of satellite orbit perigee or apogee height in Hohmann transfer 05 p0713 A72-16006
- Observational bias source in lunar transient events correlation with perigee and tidal stresses, using statistical analysis for 1947-1967 period 14 p2150 A72-30324
- Discrepancy between Brown theory and Griffith values for lunar perigee and node mean motions partial derivatives with respect to moon mean motion 24 p3442 A72-45241
- Explorer 34 satellite orbit perturbation, noting earth gravitational tesseral harmonic effect on perigee passage time 24 p3399 A72-45557
- PERIHILIONS**
Numerical integration of element T /transit time through perihelion/ in perturbations of near parabolic comet orbits 03 p0436 A72-13829
- Comet hypotheses, examining orbit axes and perihelions spatial distribution as possible interstellar origin 03 p0438 A72-13978

- Comet orbits with perihelion distances and inclinations from Jupiter, calculating osculating orbital elements and distributions 03 p0439 A72-14241
- Planetary perturbation of orbits of long period comets with large perihelion distances 07 p1081 A72-20236
- Quantum and classical gravitation theory Mercury perihelion motion dependence on fourth order potential in scalar and Dirac fields 07 p1084 A72-20689
- Quantum gravitation theory and Mercury perihelion motion, calculating three body potentials from treatment of celestial bodies as nucleon assemblies 07 p1084 A72-20690
- Relativistic explanation for excess motion of Mercury perihelion in terms of solar oblateness and interior rotation mechanism 11 p1715 A72-25350 [AD-745666]
- Mercury perihelion advance determination from radar echo delays measurement 16 p2453 A72-33190
- Observation and feature variations of comet 1969e before and during the perihelion passage. 24 p3445 A72-45465

PERIOD EQUATIONS**U PERIODIC FUNCTIONS****PERIODIC FUNCTIONS****NT TANGENTS****NT TRIGONOMETRIC FUNCTIONS**

- Nonautonomous systems periodic solutions through Liapunov functions construction, considering application to nth-order dynamic systems forced oscillations 02 p0251 A72-11498
- Secondary periodic solution for Navier-Stokes type evolution problems, observing stabilities [ONERA, TP NO. 1035] 03 p0389 A72-13786
- Nonhomogeneous elastic structure with quasi-periodic coefficients, deriving mechanical model by continuum spectral theory 04 p0594 A72-15745
- Bang-bang automatic control of linear plant with discontinuous characteristics element, investigating periodic function oscillation 05 p0639 A72-15757
- Dynamic systems stability under periodic impulsive parametric excitation, deriving simple closed-form analytic stability criteria for special cases from general theory [ASME PAPER 71-WA/APM-19] 05 p0733 A72-15961
- Periodic integral convolution equations in elasticity theory and mathematical physics, demonstrating solution existence 05 p0739 A72-16589
- Time independent or periodic Hamiltonian conservative differential equations, studying open, oscillating, limited and abnormal trajectories [ONERA, TP NO. 1046] 06 p0877 A72-17661
- Quasi-periodic n-degrees of freedom solutions to Hamiltonian systems with 2n plus 2 variables, noting applicability to planar three body problem 06 p0839 A72-17882
- Incompressible micropolar fluid flow equations, deducing stable periodic solutions existence by energy method 06 p0799 A72-17917
- Linear equations with periodic coefficients in mathematical models for systems with rotating components, discussing methods for obtaining closed form solutions 07 p0913 A72-20204
- Radial gas bearing air lubrication theory, proving existence and uniqueness theorems for Reynolds equation periodic solution 07 p0998 A72-20473
- Elasticity theory doubly periodic problem for unbounded anisotropic plate weakened by system of identical arbitrary holes with self balanced loads 08 p1246 A72-21807
- Asymptotic almost periodic differential equations solved by introducing semiseparated conditions concept 09 p1340 A72-22246
- Numerical algorithm for matrix case extension of transport problem in periodic media 09 p1342 A72-23368
- Haag synchronization theory generalization through precision improvement and extension to almost periodical systems 10 p1510 A72-24123
- Discrete time systems with periodic feedback gain, deriving stability conditions and Nyquist plot from linear operator spectral theory 11 p1608 A72-25318
- Recursive algorithm for numerical solution of Sturm-Liouville problem with periodic boundary conditions 11 p1679 A72-26958
- Equation difference minimization techniques for ordinary nonlinear differential equations approximate periodic solution generation, noting error bounding procedure validity 12 p1836 A72-27240

- Periodic solutions of forced oscillatory system with hysteresis damping 12 p1844 A72-27246

- Steady bifurcating time periodic solutions stability for flows in bounded domain with complex conjugate simple eigenvalues at critical Reynolds number 12 p1837 A72-27712
- Periodic waveform expression in truncated Fourier series, determining polynomial coefficients relationship to amplitude density function 13 p1920 A72-29108
- Periodic two-parameter solution families of dynamic systems having first integral, showing stability and bifurcation existence criteria relationships to dimensionality and Hamiltonian systems 15 p2261 A72-31309
- Variational calculus methods for periodic solutions of autonomously perturbed Hamiltonian systems of differential equations 15 p2263 A72-31759
- Further periodic solutions of the three-dimensional restricted problem. II. 17 p2604 A72-34444
- Convergence of Rothe's method in the construction of bounded almost periodic and periodic solutions to a parabolic boundary value problem 19 p2824 A72-37433
- Periodic integral convolution equations in elasticity theory and mathematical physics, demonstrating solution existence 19 p2872 A72-37561
- Critical current periodicity of Josephson junction interferometers. 19 p2846 A72-38601
- Approximation of partial sums of multiple conjugate Fourier series of functions whose measure of continuity is given in the mean by Poisson integrals 20 p2945 A72-39394
- Nonlinear differential equation periodic solution approximation by pseudo-linear representation of nonlinear terms effects on single harmonic, using describing function matrix method 21 p3076 A72-41314
- Time-periodic solutions of boundary layer equation systems 22 p3164 A72-41908
- The rotating noncircular shaft as stability problem of a linear periodic system 23 p3347 A72-43718
- Approximation of continuous periodic functions by Faward sums 24 p3419 A72-45547

- Lunar tidal variations of ionospheric electron density at fixed heights for different solar hours over Huan-cayo and Puerto Rico 01 p0053 A72-10089
- Cosmic ray density distribution inside cosmic ray modulating spherical cone in solar wind, noting modulation depth quasi-periodic variation 01 p0119 A72-10606
- Middle geographic latitude sporadic E-layer initial height variations during 1957-1968 solar cycle 01 p0064 A72-11103
- Periodicities from power spectrum analysis of light curve of RR Tauri variable [AD-739638] 02 p0281 A72-12302
- Source motion effects on Doppler period variations of high velocity pulsars, considering first and second time derivatives 02 p0281 A72-12309
- DT Cyg and T Vul cepheid variables light curves and periodic variations from photoelectric observations 03 p0416 A72-13018
- Periodic micropulsations in amplitude and bandwidth observed in long duration vlf whistler mode signals from ground stations, considering explanations 03 p0322 A72-13530
- Cyclic phenomena periodicity by expected mean square deviation statistical analysis of observational data samples, using null hypothesis and unequally spaced sample intervals 04 p0574 A72-14908
- Pulsar CP 0328 wideband rf spectrum long term periodicity, considering origin during propagation through interstellar medium 04 p0580 A72-15369
- Markov model random variation optimal periodicity in preventive maintenance operations, estimating distribution density and moments 04 p0527 A72-15574
- Periodic aspects of nonephemeral Euroatlantic blocking systems persistence, noting dominant role played by cyclonic vortices 05 p0684 A72-16794

Computer aided steady state response analysis for nonlinear electric circuits with periodic input, using Newton algorithm with rapid convergence
06 p0779 A72-17480

Quasar 3C 273 light variation periodicities search, noting confidence level concerning resonance periods
07 p1073 A72-19424

Dynamo action of magnetohydrodynamic fluid motions with two dimensional periodicity
07 p1042 A72-19611

Terrestrial pole motion components, discussing variations in Chandler wobble period and sidereal motion direction and average annual motion along ellipse
07 p0976 A72-19815

Pulsar periods measurement with pulse arrival time calculation based on source position
07 p1080 A72-20052

Stratospheric cosmic ray short period variations at 30 km by spectral density method
07 p1066 A72-20653

Quasi-periodic ionospheric electron density fluctuations effects on electromagnetic waves propagation, noting effect on surface recordings as geomagnetic variations
08 p1156 A72-20824

Pleiades flare stars with slow cyclical variations from 1969-1970 observations
08 p1233 A72-21276

Periodic motion of gyroscope, using geometrical method of analysis
08 p1207 A72-21348

Goriachev-Chaplygin solution to gyroscopic motion of body around fixed point for periodic motion
08 p1208 A72-21355

RR Lyrae variables period-luminosity relations explained by linearized pulsation calculations for quenching of first harmonic
08 p1235 A72-21388

Periodic intensity and period variations of X ray pulsating source Cen X-3 caused by occulting binary system from Uhuru satellite observation
09 p1382 A72-22289

Periodic variations of 12 Cepheids from 4 to 45 days
09 p1384 A72-22515

Photoelectric observation of eclipsing contact binary 44 i Bootis period changes
09 p1391 A72-23534

Microorganisms effects on oxygen and compounds cycles, leading to changes in oxygen distribution in earth crust, hydrosphere, atmosphere and biomass
09 p1267 A72-23592

Secular and periodic variations of orbital elements of Mars satellites due to oblateness and solar attraction
10 p1541 A72-24471

Visual observations of eclipsing period elements of nova-like variable V Sagittae for estimate of total magnitude of uneclipsed binary
10 p1545 A72-24829

Chandlerian wobble period correlation to damping coefficient of earth polar motion for 10 yr intervals during 1900-1970
10 p1475 A72-24871

Short period terms in earth rotation rate and polar motion, considering data truncation effects on periodograms
10 p1475 A72-24872

Atmospheric wind velocity time variations at 80-100 km altitudes from ionospheric drift data, finding planetary oscillation periodicities relationship to solar activity cycle
11 p1620 A72-25273

Perturbation method study of governing differential equations for wave reflection by periodic two-dimensional topography
11 p1685 A72-25358

Sporadic E layer cyclic variations during solar activity cycle, noting time dependence of occurrence probability and critical frequency
11 p1623 A72-26281

Paris Observatory Danjon astrolabe observation of latitude variations, obtaining periodograms by Fourier analysis
12 p1868 A72-27217

Solar activity relation to geophysical phenomena, discussing atmospheric circulation and climatic variation cyclicity and sunspot corpuscular fluxes
12 p1842 A72-28207

Abridged version of 1970 Soviet conference on constant geomagnetic field and paleomagnetism, reviewing secular variation data
13 p1946 A72-28588

Regular cyclic fading of HF and VHF radio signals due to ionospheric scintillation, noting consistency with two ray interference formula
13 p1952 A72-29665

Flux density variations incidence among extragalactic sources found by 3.8 cm sky survey
13 p2048 A72-29830

Nonlinear dispersive wave propagation problems singly and multiply periodic solutions, using perturbation and numerical approximation methods
14 p2130 A72-30227

X ray source Cygnus X-1 pulsation periodicity analysis, showing random shot noise characteristics
14 p2156 A72-30571

Long term atmospheric pressure fluctuations in relationship to solar activity over Northern Hemisphere, confirming 22 year cycle
14 p2101 A72-30648

Pulsars distance computation, considering period-luminosity relationship and uncertainties inherent in dispersion measure /DM/ method
14 p2159 A72-30738

Monthly mean pattern variations for equatorial stratospheric easterly and westerly winds, noting continuity of low latitude regimes
14 p2129 A72-30806

Oscillations in ferromagnetic resonant circuit of parametric amplifier with constant capacitance and periodically variable inductance modulated by input signal
14 p2089 A72-31107

Dispersion equation determining periodic structures natural modes propagation constants, using induced electromotive and magnetomotive forces method
15 p2195 A72-31655

Subsonic wind tunnel for pulsed flows with speed modulation as periodic function of time
16 p2372 A72-32898

Radio source Oj 287 photometric and polarimetric observations, noting optical intensity and plane polarization variability
16 p2452 A72-33134

OSO 1 observation of 300 second oscillation in solar transition region and coronal extreme UV emission line intensity
16 p2453 A72-33137

Uhuru satellite data on periodic pulsating X ray source in Hercules, interpreting intensity variations as occulting binary star system effect
16 p2446 A72-33475

Periodic perturbation effect on oscillatory system behavior at frequencies approaching resonance
16 p2426 A72-33789

Criterion for unique periodic solution of perturbed Liénard equation for small amplitude periodic perturbation
17 p2574 A72-34400

Dissipative periodic process theory for application to elasticity and distributed parameter and hereditary systems defined by partial and functional differential equations
17 p2575 A72-34867

Russian book on atmosphere studies covering determination of periodic variations in meteorological elements to assess seasonal pressure, temperature and wind variations
17 p2546 A72-34975

Observation of the intensity ratio between /5,1/ and /9,4/ bands of OH emission in the night airglow
17 p2546 A72-35059

Association between quasi-periodic VLF emission and micropulsation.
17 p2516 A72-35065

Possible long-period oscillations in solar radio emission at microwaves.
17 p2608 A72-35091

Controllably periodic perturbations of autonomous systems.
17 p2576 A72-35200

Terrestrial pole motion components, discussing variations in Chandler wobble period and sidereal motion direction and average annual motion along ellipse
17 p2549 A72-35740

Identification of periodicities in the structure of natural stochastic processes
17 p2534 A72-35783

Spectral properties of periodically correlated random processes
17 p2535 A72-35784

Period changes in eclipsing variables. II - The system VW Cephei.
18 p2723 A72-36084

Mean period of fluctuations near the wall in turbulent flows.
18 p2682 A72-36721

The Chandlerian wobble from 1900 to 1970.
18 p2727 A72-36731

Solar activity centers characteristics cyclic variations in decreasing and increasing parts of sunspot activity cycles, discussing latitude-longitude distribution
19 p2851 A72-37906

Short-period pulsar intensity variations at 70 to 115 MHz
19 p2862 A72-38056

Three body problem second kind periodic orbit existence proof based on Weinstein theorem
19 p2867 A72-38553

Quasi-periodic variation in F 2 layer reflected signal field strength, noting predominance during periods with type 4 bursts, auroras and geomagnetic disturbances
19 p2792 A72-38639

Rotation period variation in long term behavior of interplanetary magnetic sector structure during nearly four solar cycles
19 p2868 A72-38731

Seasonal, diurnal and magnetic dependence of ionospheric scintillation at 64 deg invariant latitude.
20 p2916 A72-39226

Radiation models and explanations for absence of ground level gamma ray background periodic fluctuations
20 p2964 A72-39386

Straight fins with periodic base temperature variation, calculating design parameters effects on heat transfer rates, temperature distributions and efficiencies
20 p2983 A72-39484

[ASME PAPER 72-HT-E] Response of linear periodically time varying systems to random excitation.
20 p2974 A72-39892

A statistical method for the determination of the rate of changes of period for eclipsing binaries.
20 p2974 A72-39892

Secondary fluctuations in the light curve of epsilon Aur.
20 p2974 A72-39898

Search for high frequency optical variability in X-ray sources.
21 p3100 A72-40685

Magnetic-field variations in 78 Virginis, beta Coronae Borealis, and 73 Draconis.
21 p3106 A72-41036

Thermal oscillations in the high solar photosphere.
21 p3107 A72-41275

Atmospheric model for numerical simulation of five minute oscillation field properties of solar granular convection-excited gravity waves
21 p3107 A72-41277

Transition metals thermal conductivity periodic variations relation to free Fermi surfaces and valence electrons localization variations
21 p3070 A72-41646

Description of global-scale circulation cells in the tropics with a 40-50 day period.
22 p3201 A72-42506

Quantum impulse autocorrelation function of one dimensional harmonic crystal lattice, noting periodic time dependence at high and low temperatures
23 p3312 A72-43405

An algorithm to obtain the steady state response of nonlinear periodic systems.
23 p3267 A72-43852

Radial velocity periodic variability determination from shell star 88 Herculis hydrogen lines, obtaining hypothetical spectroscopic binary elements
23 p3340 A72-44237

Abridged version of 1970 Soviet conference on constant geomagnetic field and paleomagnetism, reviewing secular variation data
24 p3397 A72-45088

PERIODICITY
U PERIODIC VARIATIONS
PERIODICITY [BIOLOGY]
U RHYTHM [BIOLOGY]
PERIPHERAL CIRCULATION
Physical conditioning effect on central and peripheral circulatory responses to arm work, measuring cardiac output at 80 percent maximum aerobic power
04 p0473 A72-14900

Blood circulation minute volume and peripheral resistance changes during human aging process, accounting for body weight
08 p1120 A72-22073

Forearm skin and muscle blood flow change measurements during whole body heating, using plethysmography, isotopic labeling and blood sampling techniques
11 p1587 A72-26617

Water filled volume and strain gage phlethysmography for forearm blood flow measurement during isometric exercise
11 p1587 A72-26622

Peripheral venous renin activity during 70 deg tilt and lower body negative pressure.
19 p2758 A72-38703

Resistance and capacitance vessels of the skin in permanent and temporary residents at high altitude.
22 p3144 A72-42595

Rheographic investigation of cerebral, pulmonary and peripheral circulation during bed rest in antiorthostatic position
23 p3255 A72-43914

Comparative study of regional hemodynamics during tilt test and lower body negative pressure exposure.
24 p3373 A72-45131

PERIPHERAL NERVOUS SYSTEM
EEG study of cortical aftereffects to peripheral stimulation in cats
07 p0915 A72-18866

Russian book - Neurophysiological background of tactile perception.
21 p2998 A72-40464

Pyramidal control of the activity of interneurons related to various types of peripheral afferents
21 p2999 A72-40589

Subjective and objective sensory physiology, discussing transformation processes in sensory receptors and nerves, psychophysical scaling methods, chemoreceptors and peripheral adaptation
22 p3146 A72-42777

Tactile information transmission for orientation and motor control, discussing somatic sensitivity peripheral mechanism

22 p3146 A72-42778

PERMALLOYS [TRADEMARK]

Nondestructive readout in computer storage of plated wires on Permalloy film deposited substrates, testing design parameters effects on performance [IEEE PAPER 11, 2]

03 p0332 A72-13762

Plated-wire computer memory using thin Permalloy film on W wire substrate, testing nondestructive and destructive readout characteristics [IEEE PAPER 11, 3]

03 p0327 A72-13763

Low cost large array of decoding magnetic switches with electrodeposited Au conductors and Permalloy memory elements featuring high output flux for low driving current [IEEE PAPER 21, 3]

03 p0328 A72-13778

Reliable Permalloy integrated magnetic memories with realizable low switching coefficients and square-loop properties, discussing design and fabrication [IEEE PAPER 21, 4]

03 p0328 A72-13779

Annealing effects in plated-wire memory elements, investigating Cu and Permalloy interdiffusion at low temperatures by X ray diffraction and electron beam microprobe

04 p0503 A72-15715

Annealing effects in plated-wire memory elements, discussing recrystallization in Permalloy films from grain size and magnetic dispersion observations

04 p0504 A72-15716

Magnetic stress anisotropy field in plated cylindrical Permalloy films, determining relationships to circumferential composition variation, geometry and easy-axis dispersion

04 p0564 A72-15717

Contribution to the study of creep in thin permalloy films.

17 p2596 A72-35759

PERMEABILITY

NT DIELECTRIC PERMEABILITY

Hydrogen chemical permeation through iron and steel as function of compressive and tensile stress

01 p0083 A72-10206

Nonhomogeneous media electrodynamics with varying permittivity and permeability, solving nonstationary equations by differential operators

03 p0389 A72-13654

Active Na-K transport and passive permeability temperature adaptation in ground squirrel erythrocytes

04 p0475 A72-15546

Permeable porous plate surface properties effect on boundary layer stability

09 p1293 A72-22408

Optimal flexible ferrite keeper for ferromagnetic thin film memories performance improvement, noting requirements for high permeability, low loss factor and dielectric constant, etc

11 p1601 A72-25899

Effect of vibration on the permeability of the blood-brain barrier

22 p3149 A72-42070

Gas permeability of high-porosity nickel cermet

22 p3188 A72-42196

PERMEATING

New measurement and evaluation method for the determination of the diffusion coefficient of hydrogen in solid metals

18 p2692 A72-36841

PERMITTIVITY

Nonhomogeneous media electrodynamics with varying permittivity and permeability, solving nonstationary equations by differential operators

03 p0389 A72-13654

Dispersion characteristics of laminated cylindrical dielectric waveguide in millimeter band, noting application to permittivity measurement

05 p0627 A72-16341

Pulsating point charge potential in cold homogeneous boundless magnetoplasma with complex permittivity tensor coefficients for quadrupole probes theory

06 p0859 A72-17638

Antimony compounds single crystal whiskers permittivity determination at microwave frequencies from power reflection and transmission coefficients

09 p1366 A72-22417

Optical properties of Gd polycrystals in IR, explaining frequency dependence of complex permittivity

09 p1372 A72-23040

Dielectric tensor for electromagnetic waves in weakly inhomogeneous anisotropic media, taking into account permittivity and conductivity fluctuations

09 p1280 A72-23230

Microwave diagnostics of P doped Si semiconductor crystal prism determining relation between complex permittivity and reflection factor by variational method

10 p1450 A72-24404

Q switched ruby laser radiation spatial coherence, considering modes relationship to permittivity inhomogeneities and changes due to holes burning in population inversion

12 p1821 A72-27591

Electromagnetic wave diffraction on ideally conducting homogeneous bodies of revolution with arbitrary complex permittivity and permeability, using variables separation method

13 p1920 A72-29279

Electromagnetic wave propagation in nondispersing media with spatial-time fluctuations of dielectric permittivity, calculating scattered field by perturbation method

14 p2086 A72-30796

Microwave measurements on high permittivity materials with slotted waveguides excited in E mode

15 p2207 A72-31894

Antarctic ice sheet complex permittivity in VLF band from reduction of measurement data with buried dipole antenna under snow surface

15 p2200 A72-32104

Determining electrical ground constants from the mutual impedance of small coplanar loops.

17 p2514 A72-34371

Formation of fluorine-containing solid solutions based on barium titanate

19 p2845 A72-38407

Permittivity measurement of nonmagnetic materials samples in waveguide systems with an unknown movable reflecting load

24 p3404 A72-45504

PERMUTATIONS

Matrices and permutation rules for tetrahedral polynomial finite elements for Helmholtz equation, commenting on computer time and convergence rate

14 p2126 A72-30932

On the Gaussian elimination method for inverting sparse matrices.

17 p2573 A72-34237

Irreducible sparse matrix transformation to upper triangular form by row-column permutation formulated as linear integer programming problem

21 p3075 A72-41312

PEROVSKITES

Sintered prepolarized perovskite type ferroelectric ceramics adiabatic depolarization and energy conversion under shock wave action

10 p1422 A72-24128

Ceramic dielectrics capacitors, considering perovskites and barium titanate physicochemical properties

11 p1702 A72-26545

Pyrochlore and perovskite preparation and structure in bismuth rhodium oxide system, discussing variable position parameter, occupancy factor and structure stability

13 p2022 A72-29375

PEROXIDES

NT HYDROGEN PEROXIDE

Gaseous diethyl peroxide spontaneous ignition during decomposition in cylindrical vessel, investigating diluents and temperature effects on self heating

02 p0301 A72-12027

Epithelial follicle and mast cell role in peroxidase activity of thyroid gland during experimental burn development

13 p1905 A72-29330

Lipid peroxidation on the human skin surface following erythrogenic UV irradiation

19 p2757 A72-38087

PERSEID METEORIDS

Perseid shower radiants observation in August 1969, indicating presence of one secondary and two main radiants

14 p2153 A72-30499

Perseid shower radiants observation in August 1969, indicating presence of one secondary and two main radiants

19 p2864 A72-38328

PERSONALITY TESTS

Group composition and n-dominance personality trait effects on decision and communication task efficiency in laboratory triads

08 p1125 A72-21200

Personality correlates of lateral eye movement and handedness.

18 p2653 A72-36905

California psychological inventory as a predictor of success in the Naval flight program.

24 p3377 A72-45655

PERSONNEL

NT AIRCRAFT PILOTS

NT ASTRONAUTS

NT COSMONAUTS

NT FLIGHT CREWS

NT FLYING PERSONNEL

NT GROUND CREWS

NT INSTRUCTORS

NT MEDICAL PERSONNEL

NT NAVIGATORS

NT OPERATORS [PERSONNEL]

NT ORBITAL WORKERS

NT PHYSICIANS

NT PILOTS [PERSONNEL]

NT SCIENTISTS

NT SPACECREWS

NT TEST PILOTS

Terminal area ATC specialists and trainees job attitude and motivation from questionnaire on challenge, tasks, salary, work schedule, etc

06 p0766 A72-17865

PERSONNEL DEVELOPMENT

Earth Resources Survey /ERS/ program personnel training and education, discussing trainee selection, knowledge categories and training methods for remote sensing

02 p0304 A72-11855

PERSONNEL MANAGEMENT

Social factors of labor organization and control in scientific teams for industry

02 p0304 A72-11728

Individuals with high information potential in informal communications networks of government R and D organizations, discussing personal characteristics

12 p1891 A72-27654

Military R and D organization questionnaires data analysis to obtain relationship between job productivity, satisfaction, ability, age and salary

12 p1891 A72-27655

Heuristic procedure solution for least cost commercial airline crew scheduling, emphasizing combinatorial space size reduction

24 p3466 A72-44584

Employee motivation programs as a means of cost reduction in aerospace industries.

24 p3468 A72-45221

PERSONNEL SELECTION

NT PILOT SELECTION

Earth Resources Survey /ERS/ program personnel training and education, discussing trainee selection, knowledge categories and training methods for remote sensing

02 p0304 A72-11855

Education and training of personnel for photointerpretation, discussing psychological, physiological and methodological aspects of aerial photointerpretation

09 p1272 A72-23298

Soviet space crews selection and training based on professional and scientific background, emphasizing psychological qualities for working compatibility in space environment

09 p1274 A72-23672

Aptitude screening test of ATC training applicants, using directional heading determination under aural distraction

12 p1773 A72-28252

Brief vestibular disorientation test technique for assessment of potential nonpilot airborne specialists or naval flight officers

12 p1773 A72-28256

Potential coronary heart disease susceptibility indicators in ATC population, using Framingham age/obesity parameters

12 p1764 A72-28265

Sight impairment-caused flight personnel disqualification analysis, establishing eye disease structure, sight damage preconditions and ophthalmological practice inadequacies

14 p2080 A72-30748

Psychological criteria for flying personnel selection in civil aviation, noting performance prediction based on maximum likelihood estimates

14 p2080 A72-30816

Systematic detection of myocardial infarction in the course of medical screening of flight personnel

19 p2757 A72-37881

The Macruz index and its clinical evaluation in electrocardiography with regard to the selection and control of air crews

21 p3009 A72-41193

PERSPIRATION

Peripheral modifications to exercise induced central drive for sweating, determining rates as functions of internal temperature

04 p0479 A72-15212

Human temperature regulation during upright and supine exercise, showing nonlinear relationships between perspiration and skin and core temperatures

07 p0922 A72-20275

Human diaphoretic system physiology, discussing skin surface sweat excretion intensity relation to optimal balancing process in thermoregulation

14 p2076 A72-30672

Sweating relation to body temperature after exhaustive exercise for various oxygen uptakes and ambient temperatures

14 p2079 A72-30702

Monograph on hot environments stress covering heat exchange at skin surface, clothing effect, body temperature regulation and sweating control

15 p2185 A72-31515

Heat strain in hot and humid environments.

22 p3150 A72-42492

PERT

An estimate of expected critical-path length in PERT networks.

23 p3308 A72-43806

Cost estimation for engineering proposals in competitive bidding, discussing cost variability quantification methods based on PERT assumptions

24 p3468 A72-45478

PERTURBATION

NT ORBIT PERTURBATION
 NT SATELLITE PERTURBATION
 Nonlinear differential equations system stability conditions for arbitrary initial perturbations of zero solution, using Liapunov functions 08 p1199 A72-21461
 Small perturbation stability of discontinuous solution of equations of motion for solid fuel combustion processes 08 pl253 A72-21463
 Small gap approximation for axial magnetic field effects on stability of nonrotationally symmetric disturbances in inviscid flow between concentric rotating cylinders 11 pl694 A72-25773
 Approximation for mechanical system equilibrium perturbation anharmonic analysis based on Fourier series with real multiplication factors of fundamental pulsation 12 p1845 A72-27542
 Two dimensional Lagrangian hydrodynamic code for stability of shock acceleration perturbed interface between two gases of different density 13 p1942 A72-29114
 Oscillations of spacecraft with on-off attitude control under constant perturbation moment, calculating energy expenditures for desired orientation maintenance 14 p2162 A72-30459
 Determination of the stream function of a perturbation associated with a plane jet 18 p2680 A72-36470

PERTURBATION THEORY
 Warm inhomogeneous plasma models perturbation analysis, computing high frequency oscillation and eigenfrequencies and eigenfunctions formulas 01 p0106 A72-10134
 Hori perturbation theory equivalence to von Zeipel theory established to third order approximations in perturbed elliptic motions 01 p0129 A72-10796
 Coriolis acceleration effects on flight of projectiles fired from earth surface, discussing horizontal and vertical velocities 01 p0132 A72-11050
 Ion oscillation theory for electrogasdynamic channel Poiseuille and Hagen-Poiseuille type flows, using transport and dispersion equations in various ionized media 01 p0111 A72-11214
 Electromagnetic wave scattering from rough surfaces by Kirchhoff approach and small perturbation method, discussing validity near grazing angle 01 p0032 A72-11249
 Hypersonic source flow past wedges and cones, calculating flow nonuniformities effects on shock shape, velocity, pressure and density by perturbation analysis 01 p0033 A72-11394
 Relativistic nonlinear gravitational instability theory for hydrodynamical system of equations applicable to early cosmic expansion, deriving density perturbations associated with rotational and gravitational waves 02 p0275 A72-11524
 Steady sonic flow around three dimensional obstacles by pseudo-axisymmetrical flow approach, revealing singular perturbation of lift downstream at infinity 02 p0150 A72-12096
 Variational perturbation problem solution in power series form for elliptic functional description of elastic continuous medium state by Euler-Lagrange equations 02 p0259 A72-12233
 Normal electromagnetic wave propagation in randomly inhomogeneous medium in presence of super-refraction, deriving phase fluctuation spectra by perturbation method 02 p0180 A72-12587
 Rupture induced perturbation loads in pressurized orthotropic circular cylindrical shells 02 p0299 A72-12704
 Series summations for perturbation theory of multiple photon ionization probabilities of atoms applied to hydrogen and helium 03 p0391 A72-13080
 Perturbation induced long waves boundary effects in ideal incompressible fluid in uniformly rotating basin with stepwise depth difference, using Schwarz symmetry principle 03 p0340 A72-13094
 Kinetic theory application to initially nonuniform gas relaxation to equilibrium, obtaining macroscopic velocity, density and temperature solutions by multitime scale perturbation methods 03 p0340 A72-13155
 Poincare-Lighthill-Kuo perturbation method and method of characteristics equivalence in one dimensional fluid motion due to ideal piston periodic oscillation 03 p0341 A72-13239
 Faraday rotation as perturbation for analytic solution of system of differential equations for line formation in inhomogeneous magnetic fields 03 p0427 A72-13295

Multiplication operator unidimensional perturbation by independent variable, considering spectral function density poles and branch points 03 p0382 A72-13728
 One dimensional Boltzmann equation with linearized small perturbation, determining secondary conditions 03 p0399 A72-14347
 Ultralong wave baroclinic instability, obtaining linearized perturbation equations from layered geostrophic hydrostatic adiabatic model 04 p0541 A72-14451
 General perturbations theory for canonical systems extended to noncanonical systems, applying to perturbed Kepler motion 04 p0573 A72-14875
 Air-filled elliptical waveguide with nonmagnetic metal wall, determining dominant TE mode attenuation by perturbation method with Bessel function 04 p0491 A72-15426
 Fabry-Perot open resonators, determining eigenvalues, resonant frequencies and diffraction losses by asymptotic perturbation method 04 p0502 A72-15436
 Step-by-step perturbation method for calculating vibration modes of aerospace structure [ONERA, TP NO. 968] 04 p0592 A72-15552
 Pulsar planetary systems observation from perturbation of pulse arrival time 05 p0712 A72-15771
 Weakly divergent beam propagation of electromagnetic waves in statistically inhomogeneous nonlinear medium with dielectric constant dependence, using small perturbation method 05 p0625 A72-15818
 Continuous media stationary motion stability using initial boundary value problem of partial differential equations in perturbations [ASME PAPER 71-WA/APM-17] 05 p0647 A72-15963
 German monograph on Poincare orbit stability in restricted three body problem, using canonical mappings of annulus and perturbation method 05 p0689 A72-16044
 Structure, controllability and synthesis of n-dimensional invariant systems under perturbation vector, using governing equations 05 p0641 A72-16352
 Perturbation theory, saturation and relaxation effects in electron and ion plasma wave echoes 05 p0699 A72-17220
 Static perturbation technique functional form for postbuckling equilibrium path analysis by asymptotic approximation, noting relationship to Koiter method 05 p0742 A72-17244
 Electromagnetic wave scattering by underdense plasma layer, considering perturbation calculation for Gaussian, sech squared and parabolic density distribution 06 p0853 A72-17350
 Ion density perturbations propagation through plasma with double-humped Maxwellian ion velocity distribution in single-ended Q machine 06 p0855 A72-17515
 Perturbations in Godel universe, considering Einstein equations in relativistic cosmology 06 p0876 A72-17564
 Hamiltonian algorithms based on Lie transforms and von Zeipel method, discussing application to non-Hamiltonian system perturbation solution 06 p0839 A72-17660
 Book on orbital mechanics covering perturbation theory, many body problem, conic sections, orbit determination, canonical transformations and Hansen methods, moving coordinates, etc 06 p0879 A72-17820
 Perturbation methods for laminar flows near leading edge, discussing approximations of Navier-Stokes equations and domain connection 06 p0756 A72-18108
 Bulk semiconductor material complex microwave conductivity and dielectric constant measurements by cavity perturbation techniques 06 p0786 A72-18371
 Computer aided renormalized perturbation method for inhomogeneously loaded waveguide performance calculation 06 p0786 A72-18377
 Nonlinear self oscillation solution for systems with two degrees of freedom, comparing with harmonic linearization method for error of small parameter method 06 p0851 A72-18721
 Perturbation theorems proving for nonlinear systems of differential equations with integral solution of linearized equation 06 p0840 A72-18739
 Weakly damped harmonic oscillator, using perturbation methods for approximate solution to boundary value problem differential equation 07 p1034 A72-18816
 Small parameter method application to quasi-linear problems solution in nonstationary heat conduction

with substantial nonlinearities and weak perturbation, analyzing error 07 p1098 A72-18937
 Solar chromosphere radiative transfer and thermal conduction coupling, applying singular perturbation method to Frisch analysis 07 p1070 A72-19087
 Magnetized solar wind velocities and fields obtained by three dimensional model using perturbation technique with spherically symmetric boundary conditions 07 p1057 A72-19142
 Monograph on boundary layer generation, presenting two dimensional singular perturbation method 07 p0967 A72-19265
 Singular perturbation of absolute stability of Lure-Postnikov nonlinear systems described by differential equations with small parameters at higher derivatives 07 p1027 A72-19293
 Multivariable linear systems control structure via optimal control theory with quadratic criterion, permitting compensation for nonzero mean value and slowly varying perturbations 07 p0961 A72-19711
 Stress-strain state of homogeneous isotropic medium bounded by noncanonical surfaces of revolution, using perturbation method 07 p1091 A72-19755
 Reduction principle validity in perturbed motion stability theory for near-critical systems with gyro horizon application 07 p1035 A72-19972
 Hydrodynamic stability small perturbation theory, considering potential flow in contact with flexible membrane 07 p0969 A72-20067
 Matched asymptotic expansions method application to problems with two independent perturbation parameters, considering application to boundary layer and hypersonic flow theory 07 p0970 A72-20076
 Perturbation solution to nonlinear nonuniform torsion of thin walled open elastic beams with strain hardening dependent on torque-rotation behavior 07 p1096 A72-20431
 Solar wind plasma parameter spatial perturbation problem solution by method of characteristics 08 p1225 A72-20721
 Perturbation theory oscillatory wave function for second order correction to oxygen 16 nucleus bonding energy 08 p1211 A72-21067
 Linear time optimal problem with analytical perturbations of initial conditions, determining optimal control switching points from convergent series representation 08 p1145 A72-21466
 Nonlinear modal response analysis of plate structures under random acoustic excitation, using finite element method and perturbation technique 08 p1245 A72-21607
 Second order libration solution of ideal resonance problem, using Lie series perturbation technique 08 p1236 A72-21637
 Nonlinear system of differential equations for gravity perturbation on geometrical form of thin axisymmetric cavity in heavy fluid 08 p1151 A72-21705
 Hill variable modification of Brouwer satellite theory algorithm for simplified orbital element and perturbation calculations and orbital eccentricity generalization 08 p1237 A72-21749
 Perturbation solution of deceleration trajectory in ballistic reentry through rotating atmosphere with winds, assuming constant gravitational field and square law drag force 09 p1395 A72-22924
 Perturbation analysis of nonlinear free flexural vibrations of circular cylindrical shell, using Donnell equations 09 p1405 A72-22998
 Microscopic perturbations of metals electron density complex dynamic matrix, deriving electroconductivity and kinetic coefficients 09 p1329 A72-23039
 Book on perturbation theory in celestial mechanics, covering disturbing function, Lagrange method and Delaunay theory 09 p1389 A72-23246
 Book on perturbation theory in celestial mechanics, covering absolute perturbation, Hill lunar theory and application to Jupiter satellites 09 p1389 A72-23247
 Nonlinear vibrations under random excitation, discussing equivalent linearization and small parameter perturbation methods and Fokker-Planck equation 09 p1353 A72-23604
 Equation of isovolumetric fluid pulsed and potential flow in convergent duct solved by perturbation method 10 p1465 A72-24118
 Lie transformations for perturbed canonical system of differential equations solution, proposing parameter

ter square root series development for resonance problems of celestial mechanics

10 p1536 A72-24119

Linear analysis of gravitational perturbations in strongly collisional initially homogeneous and Maxwellian medium

10 p1536 A72-24138

Upper bounds on lumped and continuous dynamic systems motion under loads and perturbations, discussing structure stability conditions

[ASME PAPER 71-APMW-3] 10 p1554 A72-24188

Perturbation method for stability boundaries of Hill equation with three independent parameters

10 p1505 A72-24190

Nonlinear analysis of gravitational stability perturbation based on Maxwellian velocity distribution

10 p1538 A72-24214

Two dimensional low Mach number sound field from line vortex passage around rigid half plane edge, calculating space-time variation by perturbation methods

10 p1468 A72-24370

Modified sweep variation method for optimal control programs, solving two point boundary value problem by linear perturbation technique

10 p1551 A72-24455

Second order Cowley-Imai analogy application to transcribe gas dynamic perturbation solutions into magnetogasdynamic solutions for perfect gas axisymmetric super-Alfvénic flows

10 p1521 A72-24464

Perturbation analysis for forced flow past semi-infinite flat plate parallel to uniform mainstream, calculating two dimensional laminar film condensation by boundary layer theory

10 p1469 A72-24563

Rapid perturbation growth conditions for expanding universe, discussing background density decrease with time

10 p1543 A72-24661

Radio propagation over slightly roughened curved earth surface, using perturbation method and Taylor series in model calculation

10 p1439 A72-24743

Confocal spherical laser resonator deformation analysis based on perturbation method, investigating forced oscillation

10 p1493 A72-25150

Global controllability of nonlinear differential systems during linear system perturbation, discussing controllable and uncontrollable parts splitting and null domain nature

11 p1608 A72-25323

Structure, controllability and synthesis of n-dimensional invariant systems under perturbation vector, using governing equations

11 p1608 A72-25328

Perturbation method for asymptotic solutions of initial value problems for hyperbolic wave equations with small nonlinearities

11 p1676 A72-25355

Perturbation method study of governing differential equations for wave reflection by periodic two-dimensional topography

11 p1685 A72-25358

Pulsed perturbation and Q coupled extremal control systems with noise distortion, obtaining optimal transfer functions with Kolmogoroff-Wiener method

11 p1610 A72-25448

Fluid dynamics layer-type singular perturbation problems, constructing inner and outer asymptotic approximations with overlapping domains of validity

11 p1615 A72-25502

Vlasov perturbation theory of nonlinear plasma wave with Landau damping based on Korteweg-de Vries equation

11 p1692 A72-25517

Perturbation technique application to nonlinear behavior of ion waves produced by two-beam instability in plasma

11 p1692 A72-25519

Asymptotic behavior of unperturbed linear and nonlinear perturbed functional differential equations

11 p1677 A72-25524

Nonlinear theory of gravitational instability in expanding universe, discussing density and velocity perturbations amplification at intermediate stage

11 p1715 A72-25527

First order asymptotic matching computational hyperbola for calculation of perturbed moon-centered hyperbola parameters in earth-moon trajectory

11 p1720 A72-25996

Symmetric discrete elastic conservative structural systems stability boundary estimation through reduction to linear equation recursive solution, using perturbation method

12 p1880 A72-27242

Perturbation procedure for weakly coupled oscillators in connection with statistical mechanics ergodic problem and nonlinear interaction models

12 p1844 A72-27248

Perturbation theory for electromagnetic radiation in weakly anisotropic magnetoplasma, calculating Green

function for delta function source oriented parallel to static magnetic field

12 p1783 A72-27668

Viscous flow stability between two rotating nonconcentric cylinders, obtaining approximate solution to eigenvalue problem by perturbation method

12 p1799 A72-27846

Small perturbations in collisionless stellar dynamics, discussing linear modes for flat axisymmetric galaxy and effects introduced by nonlinear theory of spiral structure

12 p1874 A72-27904

Airplane sideslip and yaw rate perturbations by continuous random vertical and side gusts, using low pass filtered white noise representation for mathematical modeling

12 p1755 A72-28125

Book on density matrix theory application to lasers and masers, covering quantum mechanics, perturbation theory, magnetism and magnetic resonance, statistical ensembles, etc

12 p1826 A72-28203

Asymptotic approximation methods for boundary layers in singular perturbation theory for linear elliptic partial differential equations in two independent variables

13 p1940 A72-28425

Space-time correlation of field amplitude and phase in plane waveguide with statistically irregular boundary, using Born approximation and perturbation theory method

13 p1928 A72-28471

Numerical analysis methods for solution stability of reduced field equations describing perturbed motion of body under nonconservative loads

13 p2001 A72-28485

Quadrature solution for variable mass point motion under perturbing force in trajectory plane normal to velocity vector

13 p2003 A72-28725

Torsional waves far-field structure in infinite elastic rod of elliptical cross section, using perturbation method

13 p2057 A72-29004

Nonlinearity effect on electron plasma wave dispersion relation, using numerical simulation and theoretical analysis by perturbation expansion and Hamilton variational principle

13 p2011 A72-29121

Error analysis of ionospheric parameter measurement by satellite transmitted or reflected multiple frequency pulsed radiation signal, using perturbation method

13 p1920 A72-29276

Perturbation theory of hydrogen and helium atoms multiphoton ionization probabilities, proposing series summation method

13 p2007 A72-29430

Elastic waves propagation in randomly inhomogeneous fiber reinforced or layered composites from perturbation methodology for electron and vibrational waves in disordered media

13 p2061 A72-29697

Differential systems perturbation method by association with easy-to-integrate reduced system, applying to nonlinear mechanics

13 p1987 A72-29780

Given motion realization in presence of constantly acting perturbations by pulsed correction, applying to signal transmission accuracy implementation

13 p2007 A72-30082

Radiation defectoscopy methods based on calculating perturbations in gamma radiation field due to inhomogeneities

14 p2106 A72-30150

Nonlinear dispersive wave propagation problems singly and multiply periodic solutions, using perturbation and numerical approximation methods

14 p2130 A72-30227

Waldman-Snyder equation application to sound absorption and dispersion in dilute polyatomic gases, presenting truncation procedure for perturbation function expansion in irreducible Cartesian tensors

14 p2131 A72-30673

Stability conditions for damped single degree of freedom oscillator system under stationary narrow-band random excitation, obtaining approximate solution by perturbation method

14 p2131 A72-30718

Third order extension of perturbation method to solve Oseen equations for two dimensional steady viscous flow past cylindrical body at low Reynolds number

14 p2095 A72-30722

Electromagnetic wave propagation in nondispersing media with spatial-time fluctuations of dielectric permittivity, calculating scattered field by perturbation method

14 p2086 A72-30796

Infinitesimal mass revolution around smallest primary of restricted four body problem, discussing element perturbation

14 p2161 A72-30913

Spiral structure density wave model of inner parts of Galaxy, calculating density, potential and velocity perturbation and dispersion in gas and stars

14 p2161 A72-30914

Meteor streams secular perturbations computation by Gauss-Halphen-Goriachev method

14 p2161 A72-31078

Asteroids and comets orbit perturbation equations for small eccentricity values

14 p2161 A72-31080

Nonlinear autooscillatory systems forced vibration under random perturbations, calculating dynamic processes by statistical linearization

14 p2132 A72-31114

Van der Pol oscillator periodic pulling behavior under weak perturbation near natural frequency, analyzing Fourier frequency spectrum

14 p2132 A72-31122

Three dimensional boundary layer instability, obtaining linearized perturbation equation on basis of Navier-Stokes equation

15 p2216 A72-31471

Isentropic perfect gas steady compressible flow finite element analysis through nonlinear equations linearization based on perturbation theory

15 p2217 A72-31719

Variational calculus methods for periodic solutions of autonomously perturbed Hamiltonian systems of differential equations

15 p2263 A72-31759

Thermodynamic perturbation and scaling theory for multidimensional spherical models of lattice structure in terms of field of critical phenomena

15 p2293 A72-32219

Quantitative measure for sensitivities of natural frequencies to perturbations leaving modes invariant

15 p2278 A72-32279

Radiative stellar envelopes circulation velocity calculation for various cylindrical rotation laws using perturbation method

15 p2314 A72-32371

Nonlinear stability theory for plane Poiseuille flow under finite amplitude perturbations, solving Orr-Sommerfeld boundary value problem via finite difference method

15 p2218 A72-32469

Perturbation scheme for branching analysis of post-buckling behavior in elastic spherical shells

16 p2465 A72-33001

Perturbation theory for equations of motion of electrically and thermally conducting viscous compressible flow in homogeneous magnetic field, calculating fluctuation modes

16 p2435 A72-33008

Perturbations effects on plane symmetry supersonic molecular beam intensity as function of nozzle-skimmer geometry and nozzle pressures

16 p2304 A72-33062

Group perturbation method for accuracy analysis of nonlinear stochastic automatic control systems, noting computer time reduction

16 p2371 A72-33091

Mechanical system nonlinear perturbation effect on equations of motion solutions, deriving boundedness and stability conditions via inequality theorems

16 p2423 A72-33101

Singular perturbation methods for deflections, frequencies and eigenmodes of statically loaded or freely vibrating circular or annular membrane

16 p2467 A72-33106

Optimal invariant control system synthesis for inertial plants with nonminimal phases and random perturbation compensation

16 p2371 A72-33263

Linearization and perturbation procedures to calculate nonlinear effects in fluid stability problems with application to nonlinear critical layer

16 p2377 A72-33338

Coordinate perturbation and multiple scale techniques application to supersonic flow field around two dimensional wing and oscillations in closed tube

16 p2379 A72-33576

Stellar magnetic oblique rotator internal motion field construction by perturbation technique estimating energy dissipation and turbulent viscosity

16 p2458 A72-33721

Coupled thermoelastic theory for thin plates, using perturbation method to find free vibration frequencies of plates under various boundary conditions

16 p2471 A72-33785

Periodic perturbation effect on oscillatory system behavior at frequencies approaching resonance

16 p2426 A72-33789

Transonic airfoil section design to given surface pressure distribution, applying finite difference procedures to transonic small disturbance equations [AIAA PAPER 72-679]

16 p2346 A72-34062

Perturbation methods for density stratified viscous flow past flat plate, using boundary layer and low Reynolds number approximations [AIAA PAPER 72-646]

16 p2381 A72-34086

Perturbation method for two point boundary value problem for fluid flow applied to optimal reentry control problem

16 p2462 A72-34166

Hamiltonian for first order wave function in charge exchange perturbation theory 17 p2584 A72-34259

Analysis of wave propagation in elastic cylindrical shells by the perturbation method. 17 p2623 A72-34307

Criterion for unique periodic solution of perturbed Liénard equation for small amplitude periodic perturbation 17 p2574 A72-34400

Flight vehicle, control system and perturbations models synthesis from variational problem solution via control functions improvement 17 p2621 A72-35037

Controllably periodic perturbations of autonomous systems. 17 p2576 A72-35200

Nonspherical perturbations of relativistic gravitational collapse. I - Scalar and gravitational perturbations. II - Integer-spin, zero-rest-mass fields. 17 p2612 A72-35390

Perturbation theory for torsional earth oscillations - Second approximation 17 p2548 A72-35475

Use of multiple basis sets in the Brueckner-Goldstone many-body perturbation theory for atomic problems. 17 p2586 A72-35772

Brueckner-Goldstone many-body perturbation calculation of helium photoionization. 17 p2586 A72-35773

The exact evaluation of certain partial sums of the second order energies of atoms. I - The ground and the singly excited states. 17 p2586 A72-35829

Thermal and gravitational instability in universe, obtaining equation for growth rate of density contrast 17 p2618 A72-35910

Coordinate transformation for perturbation analysis of elastic structural system imperfections influence on elastic buckling 18 p2732 A72-36079

Linear homogeneous system of differential equations as model for perturbation problems including functions with retarded and/or advanced arguments 18 p2705 A72-36614

Field fluctuations of a laser beam propagating in a turbulent atmosphere 18 p2661 A72-36656

On disturbances in a viscoelastic rod /of variable cross-section/ of Reiss type placed in a magnetic field. 18 p2711 A72-36752

Perturbation method in inelastic interaction model for transport processes in reacting gases described by Boltzmann kinetic equation 18 p2713 A72-36807

Alternate singular perturbation theory of high Reynolds number flow over flat plate to eliminate asymptotic matching and composite solution for accuracy improvement 18 p2684 A72-37083

Range correction computations for weapons dropped from aircraft. 19 p2747 A72-37286

Intrinsically transonic /almost equal frozen and equilibrium sound velocities/ flows of chemically active gas mixture, developing nonlinear perturbation theory 19 p2745 A72-37390

Perturbations development in laminar flow and transition to turbulent flow based on nonlinear theory of hydrodynamic stability 19 p2785 A72-37468

Undisturbed eccentric anomaly difference as the independent variable in the perturbation differential equations. 19 p2856 A72-37520

On the adiabatic invariants of a quantified system perturbed by a coherent wave 19 p2834 A72-37789

Optimization of control and observation processes in a dynamic system at random disturbances 19 p2778 A72-37991

Rotatory perturbations in anisotropic cosmology 19 p2864 A72-38078

Applicability of the small parameter method to the estimation of stresses in nonhomogeneous elastic media 19 p2876 A72-38153

A stability theory for perturbed difference equations. 19 p2826 A72-38249

Solar wind plasma parameter spatial perturbation problem solution by method of characteristics 19 p2852 A72-38349

The Poincare Lighthill perturbation technique and its generalizations. 19 p2827 A72-38383

Markovian plasma turbulence model to obtain convergent perturbation series for diffusion coefficient via trajectories in particle propagator 19 p2841 A72-38442

Low-frequency vibrations in a rarefied bounded plasma 19 p2842 A72-38530

Book - Astrodynamics: Orbit correction, perturbation theory, integration 19 p2868 A72-38723

On the application of perturbation theory for the calculation of molecular constants due to small mass changes and on the determination of force constants from very heavy isotope substitution. 19 p2763 A72-38806

An intermediate matching technique for solving two point boundary value problems using the perturbation method. 20 p2910 A72-39198

Rotational perturbation of three bodies in space tied by flexible elastic ropes, relating physical parameters to stable motion regions boundaries 20 p2977 A72-39246

Vector wave solution of light beam propagating along lenslike medium. 20 p2903 A72-39266

MHD instability of two dimensional laminar boundary layer in incompressible electrically conducting fluid along concave wall with periodic three dimensional disturbances 20 p2957 A72-39328

Beams on bilinear elastic foundations. 20 p2980 A72-39692

Galaxy formation in generic dust filled anisotropic cosmology, analyzing density perturbations growth rate 20 p2972 A72-39872

Tidal perturbation of the non-radial oscillations of a star. 20 p2974 A72-39895

Reduction principle validity in perturbed motion stability theory for near-critical systems with gyro horizon application 20 p2955 A72-40029

New method of calculating disturbed ephemeris of minor planets 21 p3102 A72-40095

A similarity solution for viscous internal waves. 21 p3044 A72-40118

Optical propagation in space-time-modulated media using many-space-scale perturbation theory. 21 p3014 A72-40142

Reductive perturbation method application to Vlasov equation governing one dimensional motion of collisionless plasmas, investigating nonlinear modulation of plasma waves 21 p3089 A72-40188

Perturbation theory for field moments in inhomogeneous media 21 p3016 A72-40780

Gravitational perturbations as source for solar oblateness fluctuations, considering density in upper convective zone 21 p3106 A72-41039

Comparison of the classical and the global solutions of the ideal resonance problem. 21 p3085 A72-41047

Numerical stabilization of the differential equations of Keplerian motion. 21 p3106 A72-41050

Synthesis of Tolubinskii's integral method and the perturbation method in nonstationary transport problems with nonlinear boundary conditions 21 p3129 A72-41053

Application of methods in perturbation theory to the calculation of the natural vibrations of rod systems 21 p3119 A72-41097

The post-flutter oscillations of discrete symmetric structural systems with circulatory loading. 21 p3120 A72-41207

Stellar evaporation in globular clusters passing through galactic plane, considering gravitational perturbation increase of total energy within system 21 p3107 A72-41269

Regularized linear problem with perturbed equation as solution, presenting error overestimate 21 p3076 A72-41336

Invalidity of Neptune predicted position derivation from perturbations on Uranus via method neglecting eccentricity 21 p3111 A72-41474

Satellite vibration-rotation motions studied via canonical transformations. [AIAA PAPER 72-919] 21 p3115 A72-41564

Long-term orbit prediction using two-variable asymptotic expansions and the automated manipulation capabilities of the FORMAC language. [AIAA PAPER 72-938] 21 p3113 A72-41576

Perturbation analysis of aerodynamic test flow in Ludwig tubes, investigating unsteady coupling effects on nozzle turbulent boundary layer [AIAA PAPER 72-994] 21 p2993 A72-41580

Propagation of electromagnetic disturbances and the stability of stationary states in media with a non-linear Ohm's law 21 p3086 A72-41651

The total pulsation-frequency spectrum of a polytropic atmosphere 21 p3114 A72-41779

Fluidic implementation of a perturbation extremum controller. 22 p3139 A72-42050

Quadrature solution for variable mass point motion under perturbing force in trajectory plane normal to velocity vector 22 p3205 A72-42101

Airborne towed cargo carrying bodies dynamic stability for single-point suspension system, using linearized small perturbation analysis [AIAA PAPER 72-986] 22 p3136 A72-42328

Helicopter rotor blade flapping motion stability, applying perturbation technique to linear equations of motion for different advance ratios and Lock numbers [AIAA PAPER 72-955] 22 p3137 A72-42351

The dependence on inclination of the planetary perturbations of the orbits of long-period comets. 22 p3224 A72-42378

Atmospheric frontal motion stability via two-layer homogeneous incompressible fluid model, solving eigenvalue problem by small perturbation method 22 p3201 A72-42505

The estimation of masses of individual galaxies in clusters of galaxies. 22 p3227 A72-42551

Continuum and finite element branching studies of the circular plate. 22 p3235 A72-42603

On the perturbation method in the stability analysis of continuous systems. 22 p3206 A72-42842

Singular small parameter perturbation effect on absolute stability of high order derivatives in Lure-Postnikov nonlinear systems 23 p3274 A72-43544

Nonlinear mechanics perturbation method for Liapunov functions construction, noting application to nonlinear differential equations 23 p3308 A72-43582

Stresses around an axial crack in a pressurized cylindrical shell. 23 p3346 A72-43705

Perturbation of the shape of the cavity during motion in a ponderable liquid 23 p3280 A72-43797

Gravitational instability of perturbed and unperturbed matter distribution in form of density and velocity fluctuations associated with continuity relationship between wavelength and rotation direction 23 p3338 A72-44036

Differential equations of motion of two mutually perturbing bodies, noting series expansion of perturbation function for close commensurability of mean motions 24 p3437 A72-44761

Small disturbances propagation effect on self similar flow due to point explosion in medium with density varying according to distance from center 24 p3390 A72-44786

Stokes series for perturbing potential determination from gravity anomalies expressed as sum of two convergent series 24 p3418 A72-44858

Electric dipole moment of diatomic molecules by configuration interaction. IV. 24 p3426 A72-44870

On exponential-asymptotic stability properties of Boltzmann's equation and a class of its modifications. 24 p3426 A72-44911

Smoked foil observation technique for transient behavior produced by perturbing equilibrium configuration detonation waves 24 p3462 A72-45033

Weak shock wave propagation in a relaxing gas. 24 p3391 A72-45042

The concept of reference loci applied to four-body dynamics. 24 p3440 A72-45137

Celestial mechanics ideal resonance problem global solution via Bohlman-von Zeipel perturbation technique, modifying Hamiltonian expansion point and separatix and libration region singularities suppression method 24 p3440 A72-45138

Discrepancy between Brown theory and Griffith values for lunar perigee and node mean motions partial derivatives with respect to moon mean motion 24 p3442 A72-45241

A general theory of convergence for numerical methods. 24 p3419 A72-45300

Perturbation methods in atmospheric flight mechanics. 24 p3368 A72-45350

A linear asymptotic theory for anisotropic shells. 24 p3460 A72-45473

PETROGRAPHY

Impact breccias in carbonate rocks of Sierra Madera /Texas/, investigating microstructure, chemical composition, petrography and mineralogy 05 p0654 A72-16038

Mineralogic and petrologic study of lunar anorthosite slide 15415.18 06 p0888 A72-18271

Geological setting, petrography and history of Apollo 15 anorthosite sample, tracing fragmentation and thermal metamorphic events 11 p1722 A72-26239

Broad scale remote mapping of spectral composition of silicate rocks from thermal IR scanner data
14 p2099 A72-30321

Thermal expansion measurements of simulated volcanic and nonvolcanic lunar rocks as function of temperature
15 p2222 A72-31258

Morphology and petrography of volcanic ashes.
18 p2685 A72-36222

PETROLOGY

NT PETROGRAPHY

Lunik 16 core-tube soil sample petrology and chemical composition
01 p0126 A72-10107

Electron microprobe analysis of plagioclase points and pyroxene grains of Apollo 15415 anorthositic genesis rock
02 p0282 A72-12411

High temperature thermal properties of solid and liquid metals and rocks and minerals, discussing earth heat balance and measurement methods for heat capacity and conductivity
04 p0596 A72-14653

Northeast Bank, Southern California Borderland volcanic petrology and geologic history, investigating basaltic rocks, hyaloclastites and fossil fragments
04 p0520 A72-15589

Ti leaching from granitic rocks by *Penicillium*, simplicissimum, discussing extraterrestrial life detection
05 p0616 A72-15809

Alfianello meteorite inspection by optical microscopy for petrological features of shock metamorphism in chondrites
05 p0722 A72-17152

Chemical, geochronological and petrogenetic analyses of Apollo 15 lunar mare basalt rock from Hadley Rille, comparing with Apollo 12 and 14 basalts
06 p0888 A72-18264

Petrological analysis of Mare Fecunditatis regolith returned from Luna 16 mission
09 p1379 A72-22254

Optical petrographic, electron microprobe and single crystal X ray diffraction analysis of basaltic and monomineralic soil fragments of Lunik 16 core sample from Sea of Fertility
09 p1379 A72-22257

Luna 16 rock sample B-1 petrology, mineralogy and chemistry, noting fine grained ophitic basalt nature
09 p1380 A72-22262

Lunik 16 lunar soil samples petrogenesis and chemical composition, comparing to Apollo regoliths
09 p1381 A72-22271

Crystallization sequence, petrology and mineralogy of Apollo 12 basalt sample 12009
10 p1537 A72-24160

Petrologic comparisons of lunar terra materials.
17 p2615 A72-35684

Olivine-garnet reaction in peridotites from Tanzania.
17 p2551 A72-35937

Earth density, surface wave velocity and other properties calculation from model consistent with physical and petrological mantle theories
20 p2917 A72-39475

Instrumental neutron activation analysis of igneous rock abundances in petrogenic and stratigraphic problems, applying to Colombia River basalts and Apollo 11 rock samples
20 p2899 A72-39829

Czech book - Moldavites and tektites.
21 p3111 A72-41536

Lunar interior composition constraints from chemical composition of igneous rocks on surface
22 p3226 A72-42533

Occurrence of chromian, hercynitic spinel /'pleonaste' in Apollo-14 samples and its petrologic implications.
22 p3153 A72-42862

Mineralogy, petrology and chemistry of lunar rock 12039.
23 p3339 A72-44127

Chemical composition of Luna 16 and Luna 20 rock samples from Sea of Fertility and Apollonius Crater
24 p3440 A72-45109

PFM [MODULATION]

U PULSE FREQUENCY MODULATION

PH

Intracellular pH prime regulation in rat brain during acute and sustained hypercapnia, discussing cellular bicarbonate accumulation
01 p0012 A72-10623

Phosphate solubilization and activation on primitive earth, using apatite solubility as function of pH
04 p0483 A72-14769

Microorganism life in extreme high temperature, PH and solute concentration environments, noting salt effect on enzyme activity
04 p0471 A72-14801

Grain boundary region constituents corrosion behavior and solution chemistry within stress corrosion cracks in Al alloys observed from pH changes
04 p0535 A72-15733

Crack corrosion in metals and metal alloys, considering electrochemical reaction kinetics as function of oxygen concentration and pH
04 p0536 A72-15738

Acid-base balance shift during muscular exertion, determining pH and bicarbonate content variation by Astrup micromethod
06 p0765 A72-18062

Direct single electrode measurement of carbon dioxide partial pressure in liquids and gases, using pH changes due to gas diffusion
09 p1317 A72-23671

Continuous and intermittent maximal exercise effects on human muscle intracellular and capillary blood pH
10 p1425 A72-24477

Electrolyte temperature, pH and mixing rate effects on anodic dissolution of steels and brass in electrochemical precision processing, using thermokinetic data processing
11 p1640 A72-26257

Cerebrospinal fluid pH change effects on cat respiratory response before and after vagotomy, showing vagal activity relation to central chemical control of respiration
12 p1762 A72-27825

PH FACTOR

Mathematical model of extracellular pH in brain tissue from blood and cerebrospinal fluid acid-base parameters for respiration central chemosensitive mechanism study
11 p1579 A72-26660

Respiration control by extracellular pH in medullary tissue, studying chemoreceptor response to hydrogen ion concentration in cat cerebrospinal fluid
11 p1579 A72-26661

PHANTASTRONS

Oscillation development time in phantastron oscillator, using linearization of nonlinear term
10 p1450 A72-24517

PHARMACOLOGY

Abdominal injected barbamyol somnifacient and toxic effect on mice subjected to hypokinesia and isolation
05 p0622 A72-16650

Central nervous system pharmacology, discussing somniferous, narcotic and neurotropic substances effects on brain activity
08 p1127 A72-21841

Russian book on pathophysiological principles of air and space pharmacology covering stress and fatigue reduction and pilots and astronauts performance improvement
12 p1772 A72-27926

Medication effects on pilot performance, covering tranquilizers, sedatives, antibiotics, stimulants, antihistamine and hypotension drugs
13 p1909 A72-28750

Work capacity evaluation from fatigue, biological rhythm, tissue respiration and oxygen consumption studies, discussing pharmacological stimulation effects
14 p2078 A72-30376

Effect of Acetazolamide /Diamox/ at different dose levels on survival time of rats under acute hypoxia and on Na⁺/K⁺-ATP-ase activity of rat tissue microsomes.
17 p2499 A72-34546

Pharmacological effects on the central adrenergic regulation mechanisms of blood circulation
17 p2504 A72-35019

The effect of chlordiazepoxide on visual field, extraocular muscle balance, colour matching ability and hand-eye co-ordination in man.
17 p2505 A72-35915

Studies of the influence of theophylline on the vasodilating action of different medications on the cerebral and coronary circulation of man
18 p2651 A72-36799

Apparatus for programmed oral administration of drugs to large primates in altered environments.
18 p2654 A72-36921

Influence of inotropic alteration on the severity of myocardial ischemia after experimental coronary occlusion.
19 p2758 A72-38552

Ocular and induced visual effects of systemic and topical drugs in terms of eye neuroanatomy and pharmacology, stressing glaucoma therapy
22 p3150 A72-42499

PHASE ANGLE

U PHASE SHIFT

PHASE CHANGES

U PHASE TRANSFORMATIONS

PHASE COHERENCE

Coded multiple FSK in presence of random variable phase, predicting optimum reception performance relationship to phase distribution and SNR
01 p0025 A72-10330

Multimode Q switched ruby laser temporal coherence, comparing theoretical with experimental results from Michelson two-beam interferometer measurements
01 p0080 A72-10849

Optimum power allocation in design of phase-coherent receiver having bandpass limiter, extending technique from single channel to two channel system
02 p0174 A72-12136

Nonlinear theory of cascaded two-way coherent spacecraft tracking system model, obtaining steady state probability density functions of phase and Doppler error
02 p0174 A72-12137

Distribution moments mathematical method for partially coherent light beam propagation through random phase screens in linear and nonlinear media
02 p0181 A72-12589

Plane wave intensity fluctuations behind random phase screen, discussing phase structural function relation to field statistical properties and fluctuation dispersion
02 p0181 A72-12590

Recovered carrier phase ambiguity resolution in four-phase PSK digital satellite communications system
06 p0772 A72-17409

M-ary orthogonal signal phase noncoherent detection in sequential decision feedback, comparing performance with optimal coherent reception
06 p0773 A72-17596

Phase coherent frequency synthesizer as modulation source for multiple feature communication system, noting noise resistance, navigation capability, Doppler correction and transmitter to receiver ranging
06 p0777 A72-18619

Hybrid carrier and modulation tracking loops exploiting sideband coherency for phase coherent tracking, telemetry and command system performance improvements
07 p0939 A72-19066

Diffraction efficiency of phase holograms formed by surface deformation of light sensitive dichromated gelatin films
12 p1808 A72-27600

Emulsion response and phase effects on two point resolution in coherent holographic imaging systems, using Rayleigh criterion
15 p2237 A72-32058

Differentially coherent detection scheme with error-correcting capability by means of decision patterns.
19 p2766 A72-38605

Phase holograms wave front formation as replacement of optical elements with aspherical surfaces and multilens objectives
20 p2926 A72-39519

Signal transmission and detection in differentially encoded coherent multiple phase shift keyed digital communication systems, discussing carrier suppression-induced resolution ambiguity
21 p3017 A72-40861

Investigation of optical inhomogeneities in large fields by holographic methods
22 p3176 A72-42106

PHASE CONTRAST

Experiments on the phase contrast transfer functions of a superconducting lens
17 p2594 A72-34284

PHASE CONTROL

Statistical synthesis of antenna arrays using phase amplitude distribution equivalent to reference array radiation pattern
02 p0196 A72-12758

Active all-pass circuits transfer function and synthesis, including delay lines, phase correctors and wide-band phase shifter applications
03 p0338 A72-13169

Polyphase signal generators, using reversed flux region propagation in saturable ring core controlled by switching transistors operation
03 p0322 A72-13773

Phase stabilization of synchronized tracking oscillator with resonant frequency regulated by output voltage
03 p0333 A72-13895

Gas dynamic laser analysis based on phase cancellation model, showing flow induced phase nonuniformity minimization for far field intensity improvement
05 p0669 A72-16857

Phase-plane analysis of transient response of on-off control system relative to sinusoidal inputs
06 p0795 A72-18714

Multiple access to communication satellites in time division multiplex, discussing burst phase control and ground station receiving-transmitting systems
09 p1278 A72-22852

FM mode locked Nd-YAG pulsed laser controlled bistable phase position operation, using modulator cut as Brewster angle prism
09 p1325 A72-23089

Fourier transform plane irradiance distribution for random phase data masks in holographic data recording, discussing phase quantization level change effects
09 p1314 A72-23335

Function space linear bounded phase coordinate control problems under regularity and normality conditions discussing solution existence and uniqueness conditions
11 p1608 A72-25322

Nonlinear variable transformation method to determine locking band and transition processes in automatic phase and frequency control systems
14 p2087 A72-31132

Phase stabilization of synchronized tracking oscillator with resonant frequency regulated by output voltage
15 p2209 A72-32706

Single frequency and mode carbon dioxide laser frequency and power stabilization by phase control with electronic servosystem
16 p2402 A72-33621

Phase optimization of antenna array gain with constrained amplitude excitation.
17 p2513 A72-34355

Some problems of microwave electromagnetic oscillation phase control by using an inductance transistor
19 p2776 A72-38670

Partially coherent light for image formation of objects with amplitude, phase and complex variations, discussing system concepts, coherence control, apodization and techniques
20 p2931 A72-39048

Statistical synthesis of antenna arrays using phase amplitude distribution equivalent to reference array radiation pattern
20 p2907 A72-39064

A solid-state 'flux-drive' control circuit for latching-ferrite-phaser applications.
23 p3275 A72-43574

PHASE DETECTORS
NT SYNCHROSCOPES
Precision phase indicating pulsed optical range finder, using uncooled semiconductor laser
01 p0080 A72-10621

Midlatitude vhf phase detection of magnetic field aligned ionospheric irregularities
01 p0031 A72-10916

Phase measurements at if in microwave plasma diagnostics, examining phase stabilization processes
02 p0223 A72-11417

Capacitor-fed parallel chopper as phase sensitive demodulator, discussing design, stability, linearity and wide dynamic frequency range
04 p0507 A72-15522

M-ary orthogonal signal phase noncoherent detection in sequential decision feedback, comparing performance with optimal coherent reception
06 p0773 A72-17596

Phase locked AFC system, calculating phase detector response effects on dynamic properties
07 p0943 A72-19524

Earth location effect in Fresnel diffraction zone on comparator performance, measuring phase difference fluctuations in turbulent atmospheric boundary layer radio waves
09 p1284 A72-22232

Radar IF voltage in-phase and quadrature components detection thresholds, evaluating square and octagonal approximations to circle for false alarm probabilities
10 p1438 A72-24693

Synchronous detector technique for statistical properties improvement in phase comparison AM radio altimeter signal
11 p1633 A72-26304

Second order phase lock AFC system transient response duration calculation for rectangular and sawtooth characteristics of phase detector, using averaging method
13 p1921 A72-29284

Book on phase locked and frequency feedback systems covering FM and multiple loop principles, limiter-discriminator operation, phase detection techniques, etc
15 p2210 A72-31500

Turbine blade trailing edge wall thickness measurement by phase sensitive eddy current technique
16 p2397 A72-33201

A method of phase detection of the beat signal in FM-CW radar.
17 p2514 A72-34383

Study by phase detection of the velocity of a molecular jet
18 p2714 A72-37200

Phase detector data distortion in phase-lock loop receivers.
19 p2763 A72-37297

Analysis of the performance of a single-half-period synchronous relay detector with an active-capacitance load
19 p2801 A72-37963

A simple reference generator for lock-in amplifiers.
21 p3025 A72-40206

A high-frequency dynamic phase metering instrument for ionospheric research.
21 p3051 A72-40214

An irregular signal phase discriminator
21 p3033 A72-40943

Influence of noise on the accuracy of microwave phase meters
23 p3272 A72-43845

PHASE DEVIATION

Normal electromagnetic wave propagation in randomly inhomogeneous medium in presence of super-refraction, deriving phase fluctuation spectra by perturbation method
02 p0180 A72-12587

Inhomogeneous nonstationary medium caused electromagnetic wavefront phase disturbance reduction in holography by averaging
04 p0522 A72-15381

Spherical reflector antenna phase aberration correction by planar array feeds, discussing synthesis procedure for mean square error minimization
06 p0781 A72-17344

Angle scintillation in laser radar return from retroreflector, comparing measurement with theoretical derivation in terms of phase fluctuation parameter [CLEA PAPER 2,1]
07 p0942 A72-19377

Message distortions analysis in PCM communications systems due to phase fluctuations of synchronization signal
11 p1598 A72-26728

Linear product demodulator for quadrature double sideband signal, evaluating channel noise and phase jitter effect on carrier
13 p1920 A72-29105

Instrumental errors estimation in photomultipliers and photodiodes during measurement of short time phase fluctuations in quasi-harmonic signals
15 p2246 A72-31424

PHASE DIAGRAMS

Al-Mo alloys under high temperature, determining phase equilibria and intermetallic phases
03 p0370 A72-12961

Equilibrium state and microhardness of phase diagrams in Mg-rich region of Mg-Nd-Zn system
03 p0370 A72-13185

Nb-Ti-B ternary system melts hardened in vacuum, determining solidus temperature and surface from phase diagram
03 p0370 A72-13186

Heat treated microstructures relation to equilibrium diagram in beta and alpha Ti alloys
03 p0374 A72-13715

Ta-Ra-B ternary alloy, investigating phase equilibria and isothermal cross sections with X ray analysis
03 p0374 A72-13739

Ta-Co system phase diagram from differential thermal, X ray, and microstructural analyses, determining composition, temperature, structural type and lattice constant
03 p0374 A72-13740

Ta and Nb addition effects on W solid solution strengthening, determining W-Nb-Ta alloys phase diagram and melting point
03 p0375 A72-13943

Y-Mn-Al ternary alloy solid solution phase diagram isothermal section construction from X ray structural data
03 p0376 A72-13945

Quaternary Mo-Zr-Cr-C system, investigating fcc phase liquation from phase diagram by chemical, metallographic and X ray analyses
05 p0666 A72-16099

Phase equilibria of Mo-Mn-C and W-Mn-C systems by X ray analysis, showing eutectoid decomposition involving rhombic modification
06 p0833 A72-18432

Phase diagram of Ta-B system by thermal, X ray and microstructural analyses
06 p0833 A72-18434

Hf-B system alloys phase diagram and impurities effect, discussing synthesis and heat treatment regime
07 p1010 A72-18857

Phase diagrams of yttrium, erbium and ytterbium oxides at 1500-2400 C, using annealing and quenching method with differential thermal analysis
07 p1047 A72-18858

Hf-Co-Al system phase equilibria determination by partial microstructural and X ray analysis
07 p1017 A72-19991

Equilibrium diagram of Cr-Va alloy produced by arc melting under Ar atmosphere, using high temperature differential thermal analysis
07 p1019 A72-20160

Nb-Ga system equilibrium phase diagram determination by differential thermal, tempering microstructural and X ray analysis techniques, discussing various compounds formation temperatures and characteristics
07 p1050 A72-20161

Phase diagrams, superconducting properties and annealing critical temperature of Nb-Al-Ge alloys, establishing four phase peritectic equilibria
08 p1218 A72-21778

Ti-Ce-S alloys phase equilibria with isothermal cross section, discussing eutectic alloys anomalous structure and cerium monosulfide preparation method
08 p1187 A72-21784

Binary system molar energy diagram plotting, covering superheated, saturation and liquid phase regions
08 p1255 A72-22170

Cathodic processes in Al electrodeposition from ethyl pyridine bromide electrolyte, discussing phase equilibrium and electrical conductivity dependence on solution composition
09 p1318 A72-22529

X ray diffraction and chemical phase analysis of Nb alloys in cast and heat treated state, considering hardening mechanism
09 p1327 A72-22636

Nb-W equilibrium phase diagram estimation from known phase diagrams of Ni-Nb, Ni-W and Ni-Nb-W systems via Guggenheim quasi-chemical model application to Ni-Nb-W thermodynamic properties
10 p1496 A72-24233

Melting points and phase diagrams for various tungsten oxide systems, noting alkaline earth and transition and trivalent metal tungstates
10 p1497 A72-24731

Hubbard mathematical model for metal-insulator transition due to electrons correlations, noting schematic phase diagram and transition metal oxides
10 p1527 A72-24939

Deformable wrought stainless steels phase diagram for structural state estimation from chemical composition, considering various austenite, martensite and ferrite combinations
11 p1659 A72-26127

Relative valence effect of transition metal additions on alpha-gamma phase equilibrium in Fe-Cr-Mn system
12 p1827 A72-27099

Mo corner of Mo-B phase diagram constructed from microstructural analysis and microhardness, melting point and lattice constant measurements
12 p1828 A72-27291

Phase composition and lattice constants of carbide films from vaporized Zr interaction on graphite surface at 1700 C
13 p1912 A72-28566

Two phase and three phase composition of ternary alloys Nb-C-Re at 2000 C from X ray, metallographic and chemical analysis
13 p1973 A72-28567

Annealed and quenched Fe-Mo-Co system, defining phase relationships in Fe-rich corner at 2200, 2000 and 1800 F
13 p1973 A72-28650

Phase structure of Cr rich Cr-Ni, Cr-Fe, Cr-Co and Cr-Ni-Fe alloy particles produced by evaporation in Ar using X ray diffraction
13 p1974 A72-28660

Phase diagram of cast and annealed Cr-Sc alloys by differential thermal, X ray, metallographic and microhardness analyses
13 p1981 A72-29953

High refractory gadolinium oxide-strontium oxide system phase diagram and transition temperature by X ray and differential thermal analyses
13 p1984 A72-30109

Phase diagram of Ti-Pd system, using metallographic, X ray and differential thermal analyses
13 p1982 A72-30116

Russian papers on phase diagrams of metallic systems covering thermodynamic, X ray and metallographic alloys analysis
14 p2122 A72-30976

Nb-Ti-Zr-Hf system phase diagram from X ray analysis, observing beta solid solution below solid curve
14 p2122 A72-30977

Zr-Cu-Mo system phase diagram from microscopy, X ray analysis and mechanical tests, noting beta solid solution transformation into alpha, omega and beta phase mixtures
14 p2122 A72-30978

Hf binary systems phase diagrams, noting components effect on melting point, polymorphous transformations and mutual solubility
14 p2122 A72-30979

Phase composition of Nb-O-Hf and Nb-O-Zr ternary alloys, noting O solubility decrease
14 p2122 A72-30980

Interaction of W with transition metals in ternary and multicomponent alloy systems, noting phase diagrams
14 p2122 A72-30981

Phase diagram of quaternary W-Mo-Nb-Ta alloy system, noting dependence of hardness on composition and temperature
14 p2122 A72-30982

W-Nb-C system phase diagram from X ray and microstructural analyses, noting solid solubility, hardness and isothermal cross section
14 p2122 A72-30983

Mo-W-C system high temperature phase equilibria from X ray and microstructural analysis, noting decrease of C solid solubility with temperature
14 p2123 A72-30984

Ti-Si system phase diagram and equilibrium states, noting crystal lattices and thermograms
14 p2123 A72-30986

Cr-N alloy phase diagram from thermal and X ray analysis, metallographic observation and hardness tests, noting melts crystallization
14 p2123 A72-30987

Ni-Al-Nb-Mo system phase diagram from X ray and microstructural analysis, noting solid solubility and dependence of hardness and electrical resistivity on components

14 p2123 A72-30989

Phase diagrams of Ni-C and Co-C systems with metastable equilibrium lines, investigating microstructure and microhardness of carbide eutectic

14 p2123 A72-30990

Ce-N alloys phase diagram from durometric, X ray, metallographic and differential thermal analyses

14 p2123 A72-30991

Phase diagrams of Ru binary and ternary systems, noting admixtures interactions

14 p2123 A72-30992

Ru-Nb-Zr alloys phase diagrams from physicochemical analysis, noting components interaction

14 p2123 A72-30993

Binary systems phase diagrams qualitative and quantitative analysis based on free atoms electron state energy ratios, formulating solid solubility criterion

14 p2123 A72-30994

Temperature measuring instrument with thermocouple for differential thermal analysis equipment used in phase diagram construction

14 p2106 A72-30995

Russian papers on light and nonferrous alloys structure and properties covering phase diagrams, alloying effects, reduction, crystallization and recrystallization, solid solutions decomposition, etc

14 p2123 A72-31027

Phase equilibrium of Mg base solid solutions of Mg-Li-Sn system at 200-500 C, analyzing microstructure, microhardness and electrical resistivity

14 p2124 A72-31029

Russian papers on rare earth metals and alloys covering physical properties, phase diagrams and industrial applications

15 p2252 A72-31183

Scandium alloys properties based on phase diagrams, noting corrosion resistance

15 p2289 A72-31186

Sm and Eu binary alloys, investigating physicochemical interactions and phase diagrams

15 p2289 A72-31187

Phase diagrams of Hf-Ce and Hf-Er alloys, plotting hardness and electroconductivity curves

15 p2289 A72-31188

Phase diagrams of rare earth ternary alloys with transition metals and Si, noting semiconductor properties

15 p2289 A72-31189

Composition diagrams and properties of intermetallic compounds of magnesium in binary and ternary systems

15 p2252 A72-31196

Electronic structure of binary phase diagrams of group III-VI transition metals, using valence separation and condensed state model

15 p2252 A72-31198

Mo, W, Nb, Ti, V and N complex alloying to harden cast heat resistant austenitic steel, discussing phase composition and stress-rupture strength

15 p2254 A72-31563

Phase diagrams for W-Ta-Ti alloys at 1600 C from metallographic and X ray analysis

16 p2407 A72-33533

Cd effect on alpha-beta transformation temperature and phase equilibrium in Ti rich end of Ti-Cd phase diagram, using metallographic and X ray techniques

16 p2409 A72-33806

Liquidus temperatures and isothermals in Al corner of Al-Ti-B alloy phase diagram, using differential thermal analysis

16 p2409 A72-33808

High temperature solid-solubility limit and phase studies in the system tantalum-oxygen

17 p2567 A72-34731

Influence of isothermic reaction levels on the diffusion growth of compounds with a binary equilibrium diagram

19 p2817 A72-37792

Microstructure and differential thermal analyses of ternary system Co-Mn-Al, presenting phase diagrams

19 p2818 A72-37852

Concentration dependences and equilibrium values of the impurity distribution coefficients in bismuth telluride

19 p2845 A72-38177

Phase diagrams of AlSb-GaSb and InAs-GaAs systems, noting mixing energy for liquid and solid phases

19 p2845 A72-38207

Phase equilibria in the hafnium-niobium-boron and tantalum-chromium-boron systems

19 p2819 A72-38285

Peritectic interaction and phase diagrams of quasi-binary semiconductor CdS-CdTe and CdP-CdSe systems

19 p2845 A72-38404

Phase diagram of the neodymium-erbium system

19 p2846 A72-38473

Phase diagram of the chromium-holmium system

19 p2821 A72-38474

Phase composition and isothermal cross section diagrams of Cr-Ni-B system at 800 C, using X ray and microstructural analyses

19 p2822 A72-38678

Systems of niobium monocarbide with transition metals.

20 p2942 A72-39985

Phase diagram study of Cr-Ga alloys, investigating intermetallic compounds presence and polymorphic transformation and temperature effects

20 p2942 A72-39987

Phase diagram, isomorphism and temperature dependence of hexagonal, monoclinic and triclinic modifications of Sr-Ba polycrystalline aluminosilicates

21 p3072 A72-40382

Phase diagrams, microhardness and composition of sintered binary B compounds with Zr, Hf, Ta, Cr, Mo, W, Re, Fe, Ni, and Si

21 p3070 A72-41371

Crystallization and structure of hypereutectic iron-carbon-chromium alloys

21 p3071 A72-41788

Investigation of phase equilibria in alloys of silicon with molybdenum and titanium

22 p3188 A72-42150

Alloys of thorium with certain transition metals. VI - The constitution of thorium-nickel alloys containing 50-96% nickel.

22 p3190 A72-42769

Application of computer mathematics procedures for prediction of phase diagrams

22 p3191 A72-42812

Plotting of composition vs property curves for superconducting systems with a digital computer by the method of simplex arrays

22 p3191 A72-42813

Phase compositions, impurity effects, crystallization and production of plastic W and Mo alloys and heat resistant W-based alloys

22 p3192 A72-42815

Constitution of the Ni-Cr-Fe system from 0 to 40 pct Fe including some effects of Ti, Al, Si, and Nb.

22 p3194 A72-43038

X ray and differential thermal analysis for phase diagrams of binary alloys of samarium oxides and gadolinium oxides with calcium oxides, noting solid solutions formation

23 p3304 A72-43250

Phase diagrams from X ray analysis of rapidly crystallized Ni-Sn alloys, noting crystal lattices and phase transformation

23 p3300 A72-43648

Investigation of the influence of the gas medium on the phase composition and certain properties of refractory materials containing zirconium

23 p3306 A72-43690

High temperature interaction between W and ZrC constructing isothermal structure

23 p3303 A72-44151

Relationship between the strength properties and the phase composition of annealed titanium alloys

24 p3414 A72-45383

Three-phase equilibria of cast and annealed V-Zr-Cr alloy by X ray, metallographic and melting point analyses

24 p3414 A72-45384

PHASE ERROR

Nonlinear theory of cascaded two-way coherent spacecraft tracking system model, obtaining steady state probability density functions of phase and Doppler error

02 p0174 A72-12137

Planar phased array antennas with uniform current amplitudes, calculating beam-pointing error dependence on array geometry, phase errors and scan angle

03 p0325 A72-14179

Two channel radio interferometry, determining limiting accuracy characteristics under arbitrary phase error

05 p0660 A72-15829

Weighted acoustic surface wave dispersive microwave filter apodized interdigital array design modification for phase error correction to reduce distortion

06 p0787 A72-18380

Pulse overlapping effects on phase jittering in carrier regeneration with quaternary phase shift keying

07 p0945 A72-19662

Phase errors and main lobe orientation changes during beam scanning of two reflector Cassegrain antennas

08 p1139 A72-20934

Phase errors in range finding measurements with radio waves reflection from underlying surface

09 p1277 A72-22481

Phase and amplitude error effects on image reconstruction in conventional and weak signal enhancement holography

09 p1312 A72-23242

Phase error magnitudes due to individual microwave elements imperfections and multiple reflections in

phase difference measurements by polarization method in microwave range

13 p1928 A72-28791

Instrument errors of RF phase comparison altimeter for meteor height measurements, using radar tracked aircraft flights calibration

13 p1957 A72-29029

Sinusoidal signal and stationary quasi-white Gaussian noise mixture effects on stochastic phase locked AFC system operation, noting phase error probability density function

13 p1921 A72-29285

Asymptotic formula for approximation of mean cycle-slip time of phase locked loops with low SNR and steady state phase error

16 p2371 A72-33211

Control equipment designs for phase error estimation of pulse sequences in multichannel magnetic recording systems

16 p2367 A72-33264

Russian book - Methods of measurement-information conversion and separation from harmonic signals

19 p2764 A72-37449

Identification and removal of phase errors in interferometry.

23 p3287 A72-43259

Two channel radio interferometry, determining limiting accuracy characteristics under arbitrary phase error

23 p3287 A72-43437

A high-accuracy radio direction finder with a moving antenna

23 p3270 A72-43769

Influence of noise on the accuracy of microwave phase meters

23 p3272 A72-43845

PHASE LOCK DEMODULATORS

Parameter regions for proper operation of multifilter phase lock loops used for demodulation by digital and analog computer techniques

03 p0339 A72-14194

Digital phase locked loop realization for near-optimum demodulation of continuous-time FM signal using stochastic estimation theory

16 p2362 A72-33213

PHASE LOCKED SYSTEMS

Time optimal phase locked AFC system synthesis based on Pontryagin maximum principle, comparing computerized and experimental transient response

01 p0024 A72-10045

FM communication system multifilter phase lock loop state equations derivation from phase model, predicting noise improvement characteristics by analog and digital simulation

01 p0044 A72-10328

AFC for suppressed-carrier SSB voice signal reception, using phase locking procedure or comparative zero-crossing-rate measurement

01 p0025 A72-10333

Phase locked IMPATT diode microwave oscillator transients for reflection amplifier or pulse modulated source applications

01 p0037 A72-10646

Low noise phase locked power microwave sources for solid state radio links with 960 voice channels, discussing design

01 p0006 A72-10712

Phase stable locked local oscillators for K band radiometers for long baseline interferometric measurements, emphasizing construction technique

01 p0044 A72-11307

Transient characteristics of phase lock automatic frequency control system with integrating filter, using nonlinear phase-plane method

02 p0176 A72-12224

Acquisition time for sideband modulated noiseless phase lock loops

03 p0325 A72-14191

Submillimeter wavelength HCN laser stabilization, describing AFC and phase locking

04 p0532 A72-15596

Stability conditions and effective bandwidths of first and second degree pulsed phase locked AFC systems with proportionately integrating filter, using Z transform method

05 p0625 A72-15825

Unlimited phase locked loop analysis for AM signal by Fokker-Planck equation

05 p0637 A72-16554

Phase locked loop bandwidth, acquisition time and SNR for Doppler tracking deep space communications for Venus and Jupiter probes

05 p0629 A72-16575

Pulsed and CW solid state microwave oscillator EM noise as function of power level and locking parameters

06 p0788 A72-18465

X band IMPATT and Gunn oscillator, calculating injection lock time, modulation bandwidth, noise and FM suppression and dynamic response

06 p0788 A72-18471

Phase lock loop receiving system digital simulation for estimating mean time to indicate lock and probability distribution function for wide SNR range

07 p0939 A72-19065

Phase locking loop synchronized quartz oscillator for integral frequency multiplication in wideband carrier frequency systems 07 p0954 A72-19174

First passage time boundary value problem for first order phase locked loop systems, determining probability density function of time to cycle-slip 07 p0959 A72-19273

Millimeter wave techniques for laser stabilization to frequency standards, using phase locked HCN laser and high resolution IR spectrometer [CLEA PAPER 6,7] 07 p1004 A72-19383

Phase locked AFC system, calculating phase detector response effects on dynamic properties 07 p0943 A72-19524

Subharmonically injected phase locked microwave IMPATT oscillator 09 p1285 A72-22894

Stability regions of phase-locked AFC with nonlinear control circuit, describing system dynamics by differential equations 09 p1290 A72-23180

YIG tuned Gunn oscillator phase locking and shifting over 3 GHz range in X band, using feedback control 10 p1451 A72-24596

Capture range and acquisition time analysis of phase locked loop with active filter 10 p1458 A72-24934

Phase noise and transient times for binary quantized digital phase locked loops in white Gaussian noise 11 p1592 A72-25886

Error analysis of measurement-type servo systems with constant product /or quotient/ of dependent and independent variables applying to phase loop AFC operation 11 p1595 A72-26301

Nonlinear stochastic partial differential equations solution by graph technique, calculating correlation function and phase change spectrum in phase locked circuit 12 p1837 A72-27575

FM distortion in injection phase locked oscillator amplifiers from generalized Alder equation 12 p1793 A72-27965

Monte Carlo simulation for imperfect second order hybrid phase locked loop in radio frequency interference and Gaussian noise backgrounds, employing digital computer simulation model 13 p1935 A72-29104

Second order phase lock AFC system transient response duration calculation for rectangular and sawtooth characteristics of phase detector, using averaging method 13 p1921 A72-29284

Sinusoidal signal and stationary quasi-white Gaussian noise mixture effects on stochastic phase locked AFC system operation, noting phase error probability density function 13 p1921 A72-29285

Short term instability of frequency standard using AFC of quartz crystal oscillator by phase locking to optically pumped Rb 87 vapor clock 13 p1968 A72-29296

Vibration stability and interference transfer function of onboard transponder with phase lock AFC used in Doppler system for measuring spacecraft trajectory parameters 13 p1958 A72-29456

Nonlinear microwave circuit feedback model analysis by describing function in control theory, applying to oscillator phase locking problem 15 p2210 A72-31355

Book on phase locked and frequency feedback systems covering FM and multiple loop principles, limiter-discriminator operation, phase detection techniques, etc 15 p2210 A72-31500

Estimation-correlation principle application to harmonic signal receiver with unknown carrier frequency, using searching phase locked AFC circuit as estimation unit 15 p2202 A72-32667

Asymptotic formula for approximation of mean cycle-slip time of phase locked loops with low SNR and steady state phase error 16 p2371 A72-33211

Nonlinear and phase delay distortion of FM modulation in tuned and detuned injection phase-locked oscillator-amplifiers 16 p2369 A72-33760

Phase locked loop model based on AGC circuitry, devising optimum control strategies 17 p2532 A72-34419

Hybrid injection locking of higher power CO₂ lasers. 17 p2564 A72-35343

Determination of the locking range from the reactive power balance of the oscillator. 17 p2530 A72-35430

Phase detector data distortion in phase-lock loop receivers. 19 p2763 A72-37297

Capture of a signal with a linearly varying frequency in an astatic phase autotuning system 19 p2766 A72-38420

Nonautonomous phase system of equations with a small parameter, containing invariant tori and rough homoclinic curves 19 p2828 A72-38579

Digital command system second-order subcarrier tracking loop performance. 21 p3038 A72-40870

Near optimum digital phase locked loops. 21 p3038 A72-40871

Decision directed phase locked loops acquisition properties improvement technique for PCM bit synchronizer of random nonreturn to zero data 21 p3038 A72-40872

Phase locked feedback circuit for FM demodulation, discussing all digital circuit design and voltage controlled oscillator algorithm to avoid analog implementation problems 21 p3018 A72-40873

Detection of whistler mode signals from VLF transmitter in Australia. 21 p3023 A72-41386

Investigation of the threshold properties of a phase-lock AFC detecting a sinusoidally frequency modulated signal against a noise background 22 p3154 A72-42231

Stability conditions and effective bandwidths of first and second degree pulsed phase locked AFC systems with proportionately integrating filter, using Z transform method 23 p3263 A72-43433

Application of an electronic computer to the calculation of the locking band in nonlinear phase-lock automatic frequency control systems 23 p3264 A72-43763

Fluctuations in a quantum frequency standard 23 p3271 A72-43842

Stability criteria for phase-locked oscillators. 23 p3272 A72-44192

PHASE MODULATION

NT FM/PM (MODULATION)

NT PHASE SHIFT KEYING

RF interference in angle-modulated system with predetection linear bandpass filter, calculating output power spectral density in baseband 01 p0045 A72-10332

Parametric amplification of laser waves with amplitude and phase modulation under exponential signal growth applied to Raman scattering picosecond pulse field 01 p0079 A72-10346

Solid state oscillator phase and frequency synchronization by injection of stable sinusoidal uhf signal modulated by 0-180 deg phase jump 02 p0194 A72-12569

Power spectrum analysis of multilevel digital signals phased modulated by arbitrary pulse shapes, giving examples for rectangular and raised-cosine pulses 02 p0183 A72-12797

Interference polarization filter by modulation and phase detection for passband narrowing and secondary maxima attenuation, discussing application to photoelectric recording system 03 p0356 A72-13096

PCM/PM 136 MHz telemetry system of SAS-A satellite, describing operation in record and playback modes 03 p0326 A72-14396

High speed digital communication over space to earth satellite links by quadriphase modulation, discussing modulator, receiver and system technology for maximizing data transfer 04 p0485 A72-14477

Statistical properties of random-phase modulated laser beams, calculating coherence functions of optical fields 04 p0528 A72-14580

Relaxation processes in Michelson interferometer as integral part of carbon dioxide laser cavity in phase Q switching regime 04 p0530 A72-14990

Quasi-monochromatic radio signal propagation for arbitrary amplitude and phase envelopes in nonlinear medium with nonlinearity caused by plasma heating 05 p0627 A72-16404

Algebraic prediction formalism for ring laser mode coupling by phase modulation 05 p0668 A72-16566

Amplitude and phase modulated radar pulse train representation by complex number sequences, discussing generation, processing, and Z transform application to combination codes 06 p0773 A72-17495

AM/PM distortion intermodulation in FM/FDM radio systems during two-path propagation, using Fourier series method for noise power spectra calculation 06 p0775 A72-18239

Binary single sideband phase modulation with simultaneous AM by signal and Hilbert transformation 06 p0776 A72-18395

Variance estimate of second order moment by nonlinear correlator in presence of additive amplitude and phase modulation and normal noise 07 p0939 A72-19021

Hybrid carrier and modulation tracking loops exploiting sideband coherency for phase coherent tracking, telemetry and command system performance improvements 07 p0939 A72-19066

Optimal continuous recording of amplitude-phase distributions on spatial carrier frequency for light wave modulation and optical antenna simulation 08 p1132 A72-21263

Spurious target generation due to hard limiting in pulse compression radars with three phase coded signals superposed at input, comparing with digital simulation 08 p1134 A72-21416

Time dependent phase modulation for high effective reference to object beam intensity ratio, noting linear recording of holograms 09 p310 A72-22649

Multimode ring laser gyro phase modulation theory based on oppositely directed traveling waves 09 p1324 A72-23084

Multimode ring laser gyro with intracavity phase modulation, discussing experimental results concerned with lock-in at low rotation rates 09 p1324 A72-23085

Holographic method for investigating piston type vibrations with phase modulated reference light beam 09 p317 A72-23682

Error probability and reception stability in synchronous detection of phase manipulated signals with additive Gaussian noise at multiplied carrier frequency 10 p1436 A72-24587

Spectral distribution of signal power in AM, FM and PM PCM systems with time division multiplexing 10 p1439 A72-24909

Uncertainty functions side maxima for phase manipulated signals with low sidelobe levels in autocorrelation functions, noting Doppler frequency shift effect 10 p1440 A72-24916

Interference polarization filter by modulation and phase detection for passband narrowing and secondary maxima attenuation, discussing application to photoelectric recording system 11 p1632 A72-25708

Laser emission spectrum broadening due to saturable dye filter bleaching, discussing amplitude and phase modulation contributions 11 p1649 A72-26341

Communication systems design with error control, applying algebraic codes to biphasic and multiphase modulation systems 12 p1782 A72-27488

AM/PM conversion and transfer in nonlinear signal transmission systems, calculating coefficients as function of multicarrier powers for intelligible crosstalk 12 p1782 A72-27554

Q switched carbon dioxide laser based on PM by rotating mirror in one arm of Michelson interferometer, establishing phase relationships 13 p1968 A72-29287

Destabilizing factors effect on parameters of transistorized single circuit phase modulator with varicap control 13 p1932 A72-29455

Atmospheric turbulence induced wave front distortion effects on fast-tracking laser antenna performance, considering infinite plane wave random complex phase modulation 14 p2110 A72-30550

Mechanical oscillator model for experimental investigation of multistage electrical frequency multipliers subharmonic transient oscillations, considering energy flow under constant and/or phase modulated excitation 14 p2131 A72-30719

SSB signal generation without Nyquist filter or auxiliary equipment for PM modems in data transmission 15 p2195 A72-31620

Design data of guided wave structures for electrooptical modulation, evaluating propagation wave numbers, attenuation rate, phase modulation rate and dispersion characteristic 15 p2246 A72-31667

Mode locked lasers, investigating effect of grating-induced phase and spatial modulations by multiple transverse modes on pulse compression across beam cross section 16 p2403 A72-33840

Signal detection by receivers with modulus processing 17 p2515 A72-34836

Differentially coherent detection scheme with error-correcting capability by means of decision patterns. 17 p2766 A72-38605

Harmonic mode locking of the Nd:YAG laser. 19 p2813 A72-38688

Phase modulated data transmission with partial pilot signals, interpolating reference demodulation signals at receiving end by maximum cross correlation 23 p3264 A72-43771

Frequency conversion and limiter action for an angle-modulated wave with amplitude fluctuation in a half-wave linear mixer.

23 p3265 A72-44179

PHASE SHIFT

Electrostatic waves in longitudinally magnetized plasmas with random electron charge distribution and applied magnetic field, finding phase characteristics

01 p0106 A72-10128

Plane electromagnetic wave scattering by imperfectly conducting cylinder with radially inhomogeneous dielectric coating, using phase shift method for evaluation

01 p0024 A72-10130

Differential phase shift and absorption measurements of partially reflected radio waves, providing electron density and collision frequency data from 70-90 km

01 p0030 A72-10836

Phase difference measurement between magnetoelectric components returned from lower ionosphere due to pulsed radio signal, obtaining electron density profiles

01 p0063 A72-10914

Spatial distribution of plasma density from phase shift measurement in millimeter waves based on microwave multichannel probes

02 p0263 A72-11412

FM homodyne phase meter with klystron oscillator for measuring plasma electron concentration, presenting block diagrams of meter, detector and oscillator

02 p0223 A72-11414

Direct phase measuring and measured phase compensating microwave devices designed for plasma diagnostics applications

02 p0223 A72-11416

Phase measurements at if in microwave plasma diagnostics, examining phase stabilization processes

02 p0223 A72-11417

Diurnal and seasonal changes in occurrence frequency of rapid phase fluctuations in vlf received at Franz Josef Land correlated with geophysical observations

02 p0172 A72-11922

Spectral characteristics of ionospheric signal by phase lags introduced in multichannel field recorder

02 p0172 A72-11926

Propagation modes attenuation and phase shift of electromagnetic plane wave in superconducting coaxial cylindrical waveguide

03 p0321 A72-13170

Low energy phase shifts for elastic scattering of electrons by Li and Na

03 p0391 A72-13745

Molecular collision model, comparing generalized phase shift approximation method with classical trajectory calculations for rotational inelasticity

03 p0391 A72-13857

Heuristic theory of positron-helium elastic scattering phase shifts and cross sections

03 p0393 A72-14399

Vlf phase regressions at sunrise related to variations of reflection coefficient in D region, using IENGf data

04 p0485 A72-14465

Intermolecular potentials determination by inverting phase shifts obtained from high resolution measurements of protons differential elastic scattering by rare gas atoms

04 p0552 A72-14577

Wideband microwave acoustic delay line design featuring superior bandwidth, phase linearity, spurious echo and insertion loss characteristics

04 p0521 A72-14720

X ray stars atmospheric ionization effects by vlf phase tracking relative to Omega navigation accuracy, diurnal shift variations and astrophysical data

04 p0486 A72-14877

Linearly polarized wave excitation with specified phase shift and predetermined amplitude ratio by waveguide slots, giving slot configuration design formulas

04 p0487 A72-15243

Diurnal phase and amplitude variations of long radio waves at great distances, explaining sunrise and sunset fadings

04 p0492 A72-15443

Mechanical impedance and phase angle time variation in restrained primate during prolonged sinusoidal vibration

[ASME PAPER 71-WA/BHF-8] 05 p0616 A72-15946

Low cost automated digitized measurement for microwave antenna feed power gain and relative phase, using computer facilities

05 p0637 A72-16420

Coherence function and phase shift dependence of free ocean surface on angular energy distribution in two dimensional wind induced wave spectrum

06 p0841 A72-17625

Radiation polarization from Jovian disk center as function of phase angle from polarimetric observations

06 p0884 A72-18033

Harmonically modulated reflected light signals phase shift and demodulation, assuming single scattering

06 p0848 A72-18047

Radome checkout ensuring reproducibility by insertion phase delay measurement

06 p0822 A72-18195

Microwave dispersive line structures with nonlinear phase characteristics, considering use of empty waveguide segment near cut-off

06 p0785 A72-18312

Optimal receiver synthesis for radio signals with differentiable components of continuous Markov processes masked by phase interference and white noise

07 p0937 A72-18847

Antenna radiation pattern synthesis, discussing current phase and amplitude distribution determination by iterative and quadratures solutions respectively

07 p0953 A72-19004

Spectrometers for phase audible frequencies, discussing linearization theory and application to spectrum analyzer calculation

07 p0983 A72-19186

Second order mode locked GaAs junction laser, observing mode frequencies and phases configurations during self pulsing

07 p1001 A72-19200

Phase shifts of circadian rhythm of optic nerve potentials from isolated eye of sea hare in darkness

07 p0919 A72-19534

Spectral photosensitivities for phase shifting of circadian body temperature rhythms in pocket mice

07 p0919 A72-19535

Phase shifting effect of light on circadian rhythm and photoreceptive pigment location in *Drosophila* in postpupation stages

07 p0919 A72-19536

Slip effect in diurnal phase and amplitude cycles of vlf signals in lower ionosphere due to wave interference at transmitting point

08 p1130 A72-20710

Quasi-stationary three dimensional array excitation by large phase shift calculated for circular conducting elements

08 p1140 A72-21262

Brightness distribution and phase dependence measured for spheres with different colors and roughness for Mars surface optical parameters model validity

08 p1238 A72-21830

Photoelectric measurements of brightness of Galilean satellites of Jupiter as function of solar phase angle

08 p1238 A72-21831

Probabilistic characteristics of radiation pattern for multielement antenna with nonpolar phase front

09 p1285 A72-22575

Phase angle measurements of frequency-oxygen atom lifetime relationship in pulsating auroras

09 p1298 A72-22589

Elastic singlet p wave phase shift calculation for electron scattering by H atom and He cation, using time dependent Hartree-Fock perturbation theory

09 p1355 A72-22786

Effective photoionization sections of neutral atoms, discussing photon energy effects, subshell periodicity and continuum functions phase shift

09 p1356 A72-22828

Information theory and ambiguity concept generalization for signal distinction by phase displacement in time and frequency

09 p1281 A72-23470

Ionospheric inhomogeneity studies from angle of arrival recordings of satellite beacon transmissions, using phase radiometer interferometry

09 p1305 A72-23576

Atmospheric refractive index inhomogeneity statistics from interferometer measurements of distance-dependent phase fluctuations in near-ground horizontal optical propagation paths under turbulence conditions

09 p1354 A72-23696

Phase shift methods for data transmission vestigial sideband signal generation, providing shaping functions by shift registers, weighting resistors, summing amplifiers and low pass filters

11 p1592 A72-25890

Radiation polarization from Jovian disk center as function of phase angle from polarimetric observations

11 p1719 A72-25969

Dynamic range errors and noise bands for phase comparison radio range finders with mutual automatic frequency control in interrogator and transponder

11 p1596 A72-26302

Statistical analysis of errors in altitude readings of phase comparison AM radio altimeters

11 p1633 A72-26303

Probability distribution density of phase difference between noise and signal-noise sum for radar system efficiency estimation, using Bessel and Whittaker functions

11 p1596 A72-26308

Three centimeter balanced ring modulator with carrier and sideband suppression using amplitude and phase relations

11 p1605 A72-26321

Phase metering information converters with digital analog computation, discussing analysis of prototype semiconductor model with ten-digit binary codes

11 p1602 A72-26449

VLF phase changes due to particle precipitation into geomagnetic anomaly during solar proton events explained by exponential ionospheric models with effective reflecting height

11 p1599 A72-26765

Ni powder artificial dielectric in waveguide transverse magnetic field, noting nonreciprocal nature of microwave attenuation and phase shift

11 p1607 A72-26786

Fourier phase angle models of intermittent atmospheric turbulence

12 p1838 A72-27025

Blue filter polarimeter observations of Deimos and Phobos, discussing polarization-phase angle curve for Deimos dust surface layer

12 p1865 A72-27097

Many electron pseudopotential method for electron-atom scattering, calculating singlet s wave and p wave phase shifts

12 p1848 A72-27429

Gage for solids and liquids moisture content measurement based on phase shift of UHF electromagnetic wave propagating through tested material, noting specimen thickness optimization

12 p1807 A72-27466

Chebyshev phase and time delay approximations existence and characterization

12 p1836 A72-27572

Polarization method for measuring small phase difference variations in microwave range, developing rules for optimum selection of multiplication factor

13 p1928 A72-28790

Phase error magnitudes due to individual microwave elements imperfections and multiple reflections in phase difference measurements by polarization method in microwave range

13 p1928 A72-28791

Forward loop signal attenuation and phase shift diagrams for design of feedback amplifier and compensation network for dc flyback converter

13 p1899 A72-29110

OMEGA phase shifts in auroral region due to solar phenomena, discussing methods eliminating PCA induced errors

13 p1997 A72-29185

Diurnal and seasonal changes in occurrence frequency of rapid phase fluctuations in VLF received at Franz Josef Land correlated with geophysical observations

13 p1920 A72-29234

Spectral characteristics of ionospheric signal by phase lags introduced in multichannel field recorder

13 p1920 A72-29238

Q switched carbon dioxide laser based on PM by rotating mirror in one arm of Michelson interferometer, establishing phase relationships

13 p1968 A72-29287

E region drift velocity estimates from amplitude and phase measurements of pulsed radio waves reflected from lower ionosphere

13 p1923 A72-29664

Jupiter electropolarimetric observations, showing polar regions polarization dependence on phase angle

13 p2050 A72-30069

Microwave device phase and amplitude frequency response measuring equipment with wide range test pulse generation, discussing design and performance

13 p1934 A72-30091

Lightly doped InP and vapor epitaxial GaAs laser, observing long wavelength shift in photoemission spectra peak

14 p2108 A72-31082

Van der Pol oscillator acted upon by weak random noise, evaluating oscillations envelope dispersion from probability density function and phase derivation

14 p2132 A72-31123

Model Martian atmosphere, investigating effects of departures from electron density profile spherical symmetry on radio wave phase shift in bistatic radar occultation experiment

15 p2194 A72-31440

Antarctic D region reflection heights from relative phase measurements on VLF transmissions at several phase locked frequencies, interpreting results by waveguide mode theory

15 p2200 A72-32105

Harmonics, intermodulation noise and small signal effects in discrete image points holographic recording on photopolymer material characterized by linear phase shift vs exposure

15 p2238 A72-32158

Random vibration optimal control by transfer function estimation, using relative phase information in cross spectral density functions to sort out self noise

15 p2215 A72-32629

Phase distribution randomization in switched antenna array, noting radiation pattern sidelobe compensation application 15 p2209 A72-32666

Interference measurement techniques for small phase difference changes, noting diffraction and noise effects as limiting factors 15 p2243 A72-32769

Phase and gain response of wideband coaxial X band microwave avalanche diode amplifiers 16 p2368 A72-33073

Polarization modes and phase shifts of normal oscillation modes in anisotropic optical traveling wave resonator with Brewster winders half wave plate and Faraday rotation cell 16 p2403 A72-33979

Pulse length evaluation from frequency domain phase function, applying to mode locked laser theory 17 p2562 A72-34292

Hue shifts accompany phase induced modulation enhancement of sinusoidally flickering lights 18 p2651 A72-36613

A nomogram for determining the phase difference of an elliptically polarized wave 18 p2663 A72-37219

Choice of parameters for measuring devices in a closed-loop linear control system 19 p2777 A72-37319

P-i-n variable attenuator with low phase shift 19 p2773 A72-38294

Slip effect in diurnal phase and amplitude cycles of VLF signals in lower ionosphere due to wave interference at transmitting point 19 p2765 A72-38338

Transmission and phase coefficient logarithmic decrements for wave propagation in random discrete scatterers 19 p2767 A72-38614

Representation of real narrowband signals through nonuniformly displaced basal functions with positive coefficients 19 p2768 A72-38668

Effect of a temporal shift in the min II of eclipsing binaries 20 p2975 A72-40072

Interferometric method for measuring electro-optic coefficients in crystals 21 p3095 A72-40138

The effect of amplitude and phase tolerances on the phase characteristics of dipole arrays 21 p3028 A72-40512

Signal transmission and detection in differentially encoded coherent multiple phase shift keyed digital communication systems, discussing carrier suppression-induced resolution ambiguity 21 p3017 A72-40861

The phase difference between coupled laser oscillations 22 p3184 A72-42109

On the comparison of phase and multi-layer techniques for numerical solution of the scattering problems 22 p3154 A72-42305

Wideband pulsed-RF phase measurement 23 p3270 A72-43575

Ultrasonic diffraction loss and phase change for broad-band pulses 23 p3313 A72-44115

Probabilistic characteristics of radiation pattern for multielement antenna with nonpolar phase front 24 p3384 A72-44754

Constrained proportional controller dynamic equation solution on analog computer, determining limit cycle phase shift and nonlinearity effects on self oscillation parameters 24 p3403 A72-45322

PHASE SHIFT CIRCUITS

NT CIRCULATORS [PHASE SHIFT CIRCUITS]

REDAP 31 network analysis program for design of S-band phase shifter with P-I-N diodes for phase array antennas 01 p0040 A72-10689

Radio wave polarization orthogonality recovery by using differential phase shifter and attenuator in radio communication systems 02 p0183 A72-12799

Active all-pass circuits transfer function and synthesis, including delay lines, phase correctors and wide-band phase shifter applications 03 p0338 A72-13169

Low cost ferrite remanence microwave phase shifter design using periodic loading structures 04 p0497 A72-14716

Reciprocal dual mode millimeter wavelength phase shifter design for use in phased array antennas, calculating phase shift and insertion loss vs frequency 04 p0498 A72-14719

Synthesis method for optimized single-stage reflection type phase shifters, determining transformation coefficient 05 p0634 A72-15831

Longitudinally magnetized fully filled square waveguide reciprocal ferrite phase shifter, predicting frequency characteristics by rotational error analysis 06 p0786 A72-18370

Digital loaded-line phase shifters for phased array antennas, discussing lossy microstrips effects and P-I-N diode switching shortcomings in design requirements 07 p0954 A72-19048

X band high power ferrite phase shifter design and performance 10 p1451 A72-24595

YIG tuned Gunn oscillator phase locking and shifting over 3 GHz range in X band, using feedback control 10 p1451 A72-24596

Broadband diode phase shifter design, discussing switched and loaded line, reflection and lumped element high pass and low pass circuits 11 p1607 A72-26992

Self excited oscillator using emitter follower circuit and distributed active RC phase shifter network 13 p1927 A72-28404

Nonideal component parts effect on behavior of digital microstrip closed circuit X band phase shifter, presenting detailed network analysis 15 p2201 A72-32471

Ferrite and dielectric element waveguide phase shifters with rectangular hysteresis loop, deriving differential phase and attenuation constants for wave propagation 15 p2202 A72-32662

The absolute calibration of periodic microwave phase shifters without a standard phase shifter 17 p2531 A72-35470

X- and Ku-band microelectronic phase shifters 17 p2531 A72-35767

Spatial diversity technique based on predetector equal-gain combining for fast fading reduction of AM radio receiver, using phase shifter 18 p2661 A72-36845

Nature of losses introduced into a ring resonator by a nonreciprocal phase-shifting device that employs the Faraday effect 19 p2814 A72-38788

Phase shifter number reduction effects on phased radar array radiation pattern distortion and sidelobe reduction 20 p2907 A72-39268

New active all-pass network with linear group delay 20 p2910 A72-39431

Faraday rotation dual-mode ferrite reciprocal phaser with performance and cost advantages over toroidal type for microwave phased array applications 20 p2909 A72-39733

A simple reference generator for lock-in amplifiers 21 p3025 A72-40206

Synthesis method for phase and loss optimized single-stage reflection type phase shifters, determining transformation coefficient 23 p3268 A72-43439

Recent advances in diode and ferrite phaser technology for phased-array radars. I. 23 p3270 A72-43572

A solid-state 'flux-drive' control circuit for latching-ferrite-phaser applications 23 p3275 A72-43574

Microwave phase shifting with gain using IMPATT diodes 24 p3385 A72-44963

PHASE SHIFT KEYING

Convolutional coding, Viterbi decoding and binary phase shift keyed modulation for reliable communication on power limited satellite and space channels 01 p0026 A72-10342

Multichannel space station communications using PCM-PSK-PM interplex modulation for reducing cross modulation loss 02 p0174 A72-12131

Binary differentially coherent phase shift keyed system, evaluating error probability performance in presence of thermal noise and intersymbol interference 06 p0772 A72-17408

Recovered carrier phase ambiguity resolution in four-phase PSK digital satellite communications system 06 p0772 A72-17409

Signal coding for discrete information in multichannel systems using multiple differential phase shift keying 06 p0773 A72-17500

Optimal PSK signals selection and synthesis from random sequences ensuring minimum value of maximum side peak of autocorrelation function 07 p0943 A72-19564

Pulse overlapping effects on phase jittering in carrier regeneration with quaternary phase shift keying 07 p0945 A72-19662

Synthesizing antenna arrays perpendicular to conducting screen by PSK signal theory, discussing optimal binary phasing and radiation patterns numerical data 10 p1450 A72-24507

Nonlinear filtering synthesis of optimal receiver for pseudorandom phase shift keyed signal with arbitrary modulation angle and white noise background 10 p1436 A72-24510

Bandpass filter harmonic signal phase shift distortion effect on transient response in PSK of multichannel transmission 12 p1783 A72-27630

Binary PSK signals optimized on minimax and quadratic criteria, noting design of coders and decoders on shift registers with external logic 13 p1914 A72-28415

Transistorized electronic equipment with delay line for optimal filtration of PSK signals 13 p1930 A72-29047

PSK signal cross-correlated receiver output SNR in presence of random misalignments with respect to carrier frequency and arrival signal time 13 p1921 A72-29283

Statistical analysis of random mismatched tapped delay line filters effect on binary phase shift keying pulse compression codes peak-to-sidelobe and SNR 15 p2196 A72-31792

Error rate of phase-shift keying in the presence of discrete multipath interference 17 p2516 A72-35334

Marcum Q function parameters approximations for error probabilities computation in multilevel frequency shift keying and differentially coherent phase shift keying systems 20 p2903 A72-39426

Susceptibility measurements on PCM-FM and four phase differential PSK digital receivers simulated on analog computer 21 p3016 A72-40852

Phase noise types in digital satellite communication links, discussing continuous binary phase shift keyed modulation systems with coherent detection 21 p3020 A72-40896

Optimal PSK signals selection and synthesis from random sequences, ensuring minimum value of maximum side peak of autocorrelation function 22 p3153 A72-42082

On the performance of digital communication systems with bandpass limiters. I - One-link system. II - Two-link system. 23 p3265 A72-44181

Spacing limitations of geostationary satellites using multilevel coherent PSK signals 23 p3265 A72-44183

Effects of bandlimiting on the coherent detection of PSK, ASK and FSK signals 24 p3380 A72-44900

Ti alloys omega phase transformations by cryogenic cooling of bcc beta phase, interpreting electron diffraction pattern change in terms of displacement type reactions 01 p0082 A72-10204

Stress effects on TiNi compound martensitic transformation, investigating deformation as function of composition and heat treatment 01 p0087 A72-11023

Al-Mn system constitution, discussing metastable phase, high and room temperature modifications and transformation equilibrium 01 p0088 A72-11045

Phase oriented precipitation patterns of Ti in Ti-C-O system, discussing composition independence and dislocation networks 01 p0089 A72-11184

Equation of state for porous metals at high temperatures under strong shock compression, considering phase transitions 02 p0258 A72-11469

Allotropic transformations and recrystallization by precipitation hardening in pure Ti crystals, using field emission microscopy 02 p0242 A72-12007

Anodic polarization curves of Ni-Fe alloys relating reaction to attack at controlled voltage of gamma joints and Ni content, using electron microprobe 02 p0243 A72-12168

VT22 high strength Ti alloy beta phase decomposition kinetics studies under heat treatment, noting omega and alpha phases role for low plasticity 02 p0244 A72-12247

Ti-Cr alloys omega phase formation by measurements of hardness, Young modulus and internal friction 02 p0246 A72-12672

Gamma prime precipitate hardened Ni base alloys, attributing strengthening mechanism to coherency strains and precipitates antiphase boundary energy
02 p0247 A72-12817

Single crystal Si defect accumulation and transition to amorphous state under Xe, Ar, Ne, O and P ion irradiation, using EPR
02 p0269 A72-12884

Thermodynamic equilibrium variational theory for multiphase systems subject to nonhydrostatic stress, considering diffusion and phase transformations
03 p0455 A72-12908

Ultrasonic cavitation effects on martensitic specimens, observing plastic deformation, softening, phase transformations and decay
03 p0370 A72-13187

Residual stress formation mechanism in two phase Ti alloys under cutting and plastic deformation, showing phase transformation composition and structure effects
03 p0363 A72-13467

Argon plasma electromagnetic wave transformation and absorption measurements under various gas pressures
03 p0395 A72-13571

Beta structure effect on cyclic fatigue strength in Ti alloy under various heat treatments
03 p0372 A72-13595

Shock waves in solids, investigating Hugoniot curve for condensed and porous media and phase transformation effects in polycrystals
03 p0446 A72-13689

Sigma phase formation in chromous ferrite, investigating vacuum diffusion, hot and cold working, welding and additives effects
03 p0375 A72-13940

Mo and C additives effects on austenite susceptibility to deformation martensite formation and steel resistance to hydroerosion
03 p0375 A72-13941

Heat transfer coefficients to both sides of finite one dimensional slab subject to phase-change coating technique boundary conditions, deriving thin wing correction factors
03 p0457 A72-13956

Dilatometric investigation of martensitic transformation in TiNi compound, observing plastic memory effect
03 p0377 A72-14021

Heat and mass transfer processes in systems of bodies with variable phase boundaries, proposing difference scheme
03 p0458 A72-14159

Kinetic energy losses due to liquid-to-solid phase transformation in heated two-component flow ascending in tube
03 p0342 A72-14161

Low temperatures and deformation rates effect on martensitic phase formation in Cr-Ni austenitic stainless steel under compression and tension
03 p0379 A72-14378

Cholesterol esters polymorphic and mesomorphic behavior, using differential scanning calorimetry, X ray powder diffractometry and positron annihilation techniques
04 p0484 A72-15262

Ni-based metal graphite materials, investigating sintering process control variables effects on structure and phase composition responses
05 p0665 A72-16090

Transformations of Ti alloy in isothermal conditions, observing hardening and loss of ductility
05 p0673 A72-16149

Fe-Co alloy athermal transformation to bcc martensite at industrial cooling rates, investigating effects on mechanical properties
06 p0829 A72-17830

Anelasticity effects due to defects and phase transformations in solids - Conference, Lausanne, Switzerland, June 1970
06 p0830 A72-18291

Internal friction and plastic microstrains in martensitic transformation of Fe-Ni, Co-Ni, and Fe-Cr-Ni alloys
06 p0830 A72-18294

Phase composition and electrical and mechanical properties of compacted zirconium diboride/tungsten alloys after sintering in argon, carbonaceous medium and vacuum
06 p0832 A72-18428

Austenitizing conditions effects on hardness and microstructure of tempered steel, emphasizing martensite structure and grain size changes produced by controlled heat treatment
07 p0995 A72-19486

Ti, Fe, Co, Ni, Pt and steels phase transformation and thermal defect effects on high temperature thermal conductivity
07 p0102 A72-19548

Hardenability and pearlite stage isothermal transformation properties of direct-quenching low Cr case-hardening steels, discussing Mn, Mo and Ni alloying effects on machinability
07 p0995 A72-19571

Cu contents effect on Ti-Cu alloys physical and mechanical properties, discussing beta phase decomposition during annealing
07 p0102 A72-19574

Phase and microstructure changes during nitriding process of Fe-Ti alloys, stressing Ti concentration effect
07 p0103 A72-19749

Deformable thermally work hardenable Al-Mg-Li alloy, detailing phase composition changes during aging
07 p0104 A72-19838

Martensitic transformations induced by plastic deformation in Fe-Ni-Cr-C system, noting stacking fault energy dependence on temperature
07 p0105 A72-19928

Adiabatic reversion of Ni martensitic steel to austenite under shear in orthogonal cutting
07 p0996 A72-19934

Plasma spraying process effects on carbon steel coatings structure and bonding, considering optimal parameters, properties control and phase transformations
07 p0996 A72-19966

Alloying additives effects on Ti and Zr resistivity, thermal expansion, crystal lattice parameters and polymorphous transformations temperatures
07 p0107 A72-19990

Phase composition changes, crater formation and metal ejection during erosion by pulsed laser beam
07 p0109 A72-20610

Gamma irradiation effects on temperature of reversible solid-to-liquid phase transformation in Al
08 p1185 A72-21075

Biot variational principle for phase change problem with constant heat flux boundary condition and without melt removal, noting linear temperature profile choice
08 p1254 A72-21611

Free convection effect on plane crystallization front instability under conditions of phase transition, using method of small perturbations
08 p1151 A72-21661

Soviet papers on phase transformations covering supersaturated solid solutions decomposition, Nb-Al-Ge system phase diagram, martensite decomposition, etc
08 p1186 A72-21776

Cr-Tb alloys monotectic, eutectic and eutectoidal phase transformations study with differential thermal, metallographic, X ray structural and durometric analysis
08 p1187 A72-21781

Ni-Cr-Nb alloys structure and phase composition changes from W-Mo additions and hardening by intermetallic Ni-Nb precipitated from supersaturated solid solution
08 p1187 A72-21782

Ti-Co intermediate phase transformations discussing lattice formation, intermetallics melting points and stoichiometric composition
08 p1187 A72-21783

Helium cryostat for X ray studies of phase transformations and structural changes in single metal crystals
08 p1169 A72-21792

Ti, Zr and Hf hcp-bcc phase transformation isochromat spectroscopic investigation, noting fine structures to confirm electron state density
09 p1371 A72-22849

Microstructural transformations in preaged Ti alloys with unstable beta phase under external tensile stresses
09 p1328 A72-23032

Polymorphism in Ta vacuum condensates, observing beta-alpha phase transformation in films
09 p1329 A72-23041

Quenched and tempered Ni carbon steel retained austenite transformation and crack observation by X ray diffraction under low cycle fatigue testing
09 p1329 A72-23149

Micrograin superplasticity in eutectoid steel, discussing effect of transformation to austenite
09 p1330 A72-23380

Nonanalytic equation of state formulation at critical point of fluid phase transformation
09 p1413 A72-23690

Carbon effects on internal friction of low temperature Fe-Ni alloy during martensitic transformation
10 p1495 A72-24083

Equilibrium thermodynamics of critical points, discussing phase transition theory and scaling hypothesis for single component systems
10 p1562 A72-24400

Small scale flow and surface effects in multiphase media hydromechanics, obtaining entropy production in mixture for interphase transformations characterization
10 p1468 A72-24430

Enthalpy measurements of allotropic transformation of Co alloys during hcp-fcc transition with additive elements
10 p1498 A72-24850

Fracture strength relation to austenite stability in steels with plastic deformation caused by strain induced austenite-martensite transformation
10 p1499 A72-24894

Phase transformations and recrystallization study of Ti-steel bimetal with emission microscope, observing high temperature formation of titanium and vanadium carbides
11 p1654 A72-25493

Iron emission spectrum in phase transformations and recrystallization study of austenitic and carbon steels under high temperature hardening
11 p1655 A72-25496

Austenitizing condition effect on lower bainite transformation in eutectoid carbon steel
11 p1656 A72-25515

Transitional ferrite phase formation in Fe-Cr-Ni alloy evidenced on electron micrographs and diffraction patterns
11 p1657 A72-25760

Transition series oxides metal-insulator phase transition based on electron phonon interaction model
11 p1701 A72-26024

VT22 high strength Ti alloy beta phase decomposition kinetics under heat treatment, noting omega and alpha phases formation effect on ductility
11 p1660 A72-26133

Hugoniot equation of state measurements on iron-silicate garnet, showing shock induced transition to high pressure phase
11 p1627 A72-26524

Interference between recrystallization and allotropic transformation of cold rolled and annealed Co investigated by internal damping measurements
11 p1661 A72-26649

Austenite formation kinetics in Fe-C ferritic-pearlitic structure at 855 C, comparing experimental data with theoretical calculations
11 p1662 A72-26744

Metal silicide phase formation for Nb, Ta, Mo and W, examining Si diffusion and transport processes
11 p1664 A72-26859

W-Ni-Mo alloys obtained by powdered metals sintering, investigating mechanical properties, phase distribution and composition
11 p1666 A72-26876

Coherent phases transformations in alloys, investigating mechanical properties dependence on microstructural features
11 p1667 A72-26929

Multiphase Al alloys strengthening by dislocation substructures in repeated rolling and recovery cycles at elevated temperature
11 p1667 A72-26930

Grain boundary network of allotropic phase change for ductility enhancement in Fe-Ta alloys
11 p1668 A72-26941

Low temperature solid state phase transformations in 2H silicon carbide single crystals, noting time and temperature dependence
12 p1854 A72-27276

High purity Al single crystal orientation explained by Rowland transformation model, observing recrystallization grains
12 p1828 A72-27300

Isothermal profiles for Nb-Zr-C and Nb-Ti-C alloys from microstructural and X ray analyses, noting Widmanstam structure, and second phase formation
12 p1829 A72-27643

Metal surface layers structural changes under external friction, noting hardening, softening and phase transformations of active layer material
12 p1818 A72-28190

Time-temperature-precipitation (TTP) diagrams and phase instabilities of high temperature exposed Mo containing austenitic stainless steels
13 p1974 A72-28658

Mo influence on gamma prime phase precipitate in wrought Ni-base superalloys, considering solvus temperature, weight fraction and lattice parameters
13 p1975 A72-28669

Ordering in fcc lattice ternary alloys with allowance for atoms interactions, noting phase transformation critical temperature and superlattices existence
13 p1976 A72-28691

Ni-Mn alloy phase transformation characteristics from neutron diffraction and small angle scattering studies, showing ordered nearly stoichiometric metastable phase for entire temperature range
13 p1976 A72-28903

Co-Cu alloy phase formation and separation morphology changes with temperature and anomalous diffusive X ray scattering in solid solutions
13 p1976 A72-28905

Martensitic transformation in Cu-Al-Ni alloy thin film, investigating gamma-prime phase substructure formation and crystal growth pattern
13 p1976 A72-28907

Fcc lattice ferronickel alloys para-process susceptibility anomalous increase explanation by phase transition thermodynamic theory
13 p1977 A72-28911

Cu-Al-Ni alloys single crystals internal friction temperature dependence during martensitic transformations
13 p1977 A72-28912

Ni, Si and Mn alloying effect on structural transformations, phase composition and mechanical properties of cast Cr-Ni steels
14 p2114 A72-30273

Ti alloy volume reduction during decomposition of metastable alpha-prime, alpha-two and beta phases after cooling from beta range
14 p2114 A72-30401

U-Zr-Nb and U-Nb-Mo alloys gamma solid solution phase isothermal transformation kinetics at 500-600 C from dilatometric, microstructural and X ray analyses, noting decomposition
14 p2114 A72-30403

Maraging Fe-Ni-Co-Mo alloy ordered metastable omega phase formation during martensite aging from electron microscopic investigation, noting Co addition effects and precipitation
14 p2115 A72-30404

X ray and metallographic analyses of Ni-Mo, Ni-Ta, Ni-Nb, Ni-Zr and Ni-Ti alloys crystallized at high cooling rates, observing metastable phases
14 p2115 A72-30405

Gamma-prime phase crystal structure in Cu-Al-Ni alloy from electron microscopic study, noting twinning and substructure during formation
14 p2115 A72-30406

Martensitic transformation athermal kinetics and accompanied martensite morphology change in Fe-Ni and Fe-Ni-Cr alloys
14 p2115 A72-30407

Surface phase transformation during cavitation erosion in Co and Fe alloys, suggesting stacking fault energy effect on erosion resistance
14 p2119 A72-30603

Si phase identification in super alpha Ti alloys, using electron transmission microscopy and diffraction analyses
14 p2120 A72-30616

Minimum weight phase change thermal control device for planetary descent probes, discussing test over various heat loads
14 p2121 A72-30826

[AIAA PAPER 72-287] Shock heating caused material phase transformation effects on bumper shield performance, studying thin metal sheets response to like-material spheres impact
14 p2128 A72-30921

Zr-Cu-Mo system phase diagram from microscopy, X ray analysis and mechanical tests, noting beta solid solution transformation into alpha, omega and beta phase mixtures
14 p2122 A72-30978

Thermal and microstructural analysis of phase interactions in Mg alloys of Mg-Nd-Y system
14 p2124 A72-31028

Alloying effect on structural transformations and strain hardening during aging of two phase /alpha-beta/ Mg-Li-Zn alloys
14 p2124 A72-31031

Vacancy annealing effect on beta phase transformation during tempering of Ti alloy with Mo, showing strain hardening and contraction increase
14 p2124 A72-31032

Al-Mu-Li alloys phases mechanical and thermal properties under tensile and fatigue tests at room and elevated temperatures
14 p2124 A72-31037

Mn, Zr and Cr alloying effects on grain size and solid solution decomposition of cast Al-Zn-Mg alloy bars
14 p2125 A72-31039

Tensile strength and martensitic transformation effect on stainless steel plastic deformation at cryogenic temperatures
15 p2253 A72-31521

Diffusion layer formation on metallic surfaces, discussing saturation, crystallization, phase structure, chemical reactions, thermal and contact conditions
15 p2255 A72-31571

Solution kinetics of secondary phases in cast dendritic and nondendritic Mg-Zn and Mg-Zn-Zr alloys, using cylindrical and spherical diffusion models
15 p2257 A72-32119

Phase transitions effect on dc electrical resistance of barium titanate investigated for yttrium-doped polycrystals and for reduced single crystals
15 p2294 A72-32483

Crystallographic structure, phase transformations, Curie temperature and Faraday rotation of Ti-substituted MnBi films
15 p2294 A72-32522

Premartensitic beta phase instability, lattice vibration and shape memory effect in noble metal base and Ti alloys
15 p2259 A72-32641

Nb-Mo alloys elastic constants anomalous temperature dependence, proposing phase changes role and relationship to neutron diffraction and specific heat
16 p2405 A72-33167

Alpha to beta transformation of rhombohedral B, investigating lattice structure on heating stage in electron microscope
16 p2405 A72-33204

Time-temperature correlated phase transformations in zirconia nucleated magnesium-aluminum-silicon oxide glass ceramics for isothermal heat treatment
16 p2413 A72-33205

Quenching produced martensitic transformations from equilibrium beta phase region for Ti alloys with Ta
16 p2408 A72-33618

Precipitation reactions during tempering of Ti-Ta alloys, studying hcp and orthorhombic martensitic phases from electron microscope observations
16 p2408 A72-33619

Composition effect on strain-transformation and precipitation hardening of beta Ti alloys at 800-1100 F
16 p2410 A72-33813

Transformation induced plasticity /trip/ Ni-C steel strengthening by thermal cycling between martensite and reverted austenite
16 p2399 A72-33815

Russian book on metal alloys structure and properties covering structural changes in solid bodies, metals atomic structure, diffusion, phase transformations and composite materials
17 p2568 A72-35446

Cluster variation method for boundary free energy solution in lattice model applied to Ising phase and gas-liquid interface and longer range interaction
18 p2711 A72-36565

Thermodynamics and phase relations in refractory metal solid solutions containing carbon, nitrogen, and oxygen.
18 p2699 A72-36576

Phase stability and mechanical properties of carbide and boride strengthened chromium-base alloys.
18 p2700 A72-36579

Phase structure and solution kinetics of cast and wrought Al alloys after plastic deformation by rolling
18 p2700 A72-36585

Behavior of Fe-21.6 Ni, Fe-18.4 Ni-15.0 Co, Fe-16.8 Ni-5.0 Mo subjected to cumulative thermal cycling at 300 C/hr
18 p2701 A72-36701

The effect of Mo, Al, and C on phase transformations in Ni alloys
19 p2814 A72-37417

Some problems concerning microplastic deformation and isothermal transformation of Fe-Ni-C alloy. III - Effect of aging in the temperature range from 203 to 304 K on microplastic deformation at 77 K
19 p2814 A72-37419

Some problems concerning microplastic deformation and isothermal transformation of Fe-Ni-C alloy. IV - Effect of transformation plasticity on microplastic deformation at 77 K
19 p2815 A72-37420

Solid-state phase transformations.
19 p2815 A72-37442

Zr and V alpha and beta stabilizing element effects on phase boundaries in arc fused Ti-Al alloy studied by diffusion layer method
19 p2817 A72-37754

Alpha aluminum oxide whiskers growth in presence of lead by vapor/liquid/solid phase mechanism in moist hydrogen at 1200-1400 C
19 p2823 A72-38279

Aging characteristics of Ti-Mo base beta alloys.
19 p2820 A72-38371

Time spectrum and angular distribution for positron annihilation studies of electron structure and phase transformations of materials
19 p2845 A72-38401

Role of an electric field in the diffusion mechanism of the graphite-to-diamond phase transformation
19 p2823 A72-38405

X-ray analysis of iron-chrome solid solutions
19 p2821 A72-38572

The effect of plastic deformation on the martensite-to-austenite transition in an iron-nickel alloy.
20 p2938 A72-39298

Fine structure in quenched Fe-Al-C steels.
20 p2938 A72-39300

X ray diffraction study of crystal structure of metastable phase in rapidly solidified Al-Zr alloys
20 p2939 A72-39307

Decomposition, solubility and coherent phase stability of modulated structure Co-Ni-Ti system at high nucleation temperatures
20 p2939 A72-39312

Pressure pulsations relationship to fixed boundary of turbulent flow with kinematic structure, considering phase transitions effect
20 p2912 A72-39361

Phase transformations and exsolution in lunar and terrestrial calcic plagioclases.
20 p2970 A72-39480

A study of the liquid-vapor phase change of mercury based on irreversible thermodynamics.
20 p2983 A72-39481

[ASME PAPER 72-HT-A] Habit plane interpretations of surface martensite transformation and orientation measurements compared with invariant plane strain /IPS/ theory
21 p3065 A72-40088

Single and double shear invariant plane crystallographic theories for martensitic transformations, calculating lattice deformations by combined Bain and complementary shear strains
21 p3065 A72-40089

Fe-Ni sheet with austenitic cube texture by rolling and annealing, investigating plastic deformation during martensitic transformation
21 p3065 A72-40090

Stress induced martensitic transformation relationship to shape memory effect compared with su-

perelasticity, transformation plasticity and reversible linear change
21 p3065 A72-40091

Beta to omega phase transformation and structure in Zr and Ti alloys bcc solid solutions by dark field electron microscopy, diffraction and ultrasonic technique
21 p3065 A72-40092

Arc furnace for thermal analysis of ultra-refractory materials
21 p3039 A72-40208

Formation of deformation martensite in Fe-Ni-C alloys which do not undergo transformation on cooling.
21 p3066 A72-40270

Deformation-induced martensitic transformation in isothermal and athermal Fe-Ni-C alloys.
21 p3066 A72-40272

Phase transition between solid hydrate and saturated solution of lithium chloride electrically detected on a lithium chloride heated hygrometer.
21 p3054 A72-40689

Phase precipitation structure of superconducting Nb-Ti alloys after cold working and low temperature annealing
21 p3067 A72-40951

Dilatometric studies of volume compression effect during aging of nimonic alloy showing linear dependence of matrix lattice constant on gamma prime phase
21 p3068 A72-40957

On the growth kinetics of Laves phase precipitates in Fe-Ti alloys at elevated temperatures.
21 p3069 A72-41011

Holographic technique for investigation of critical phenomena in aniline-cyclohexane and triethylamine-water binary critical mixtures, noting phase transition visualization
21 p3056 A72-41219

Detection of crystals in CO2 jet plumes.
21 p3046 A72-41306

Changes in the phase composition of metal-glass materials depending on the sintering temperature
21 p3073 A72-41370

Martensite formation temperature decrease and grain size reduction caused by martensite crystals interaction with barriers in Fe alloy containing austenite beta phase particles
21 p3070 A72-41679

Alpha stabilizing Al and Sn suppression effect on beta-omega transformation during Ti alloy hardening
22 p3189 A72-42278

Dielectric dispersion of irradiated BaTiO3 near the phase transition.
22 p3215 A72-42934

X-ray structural examination of phase transformations in the VT14 titanium alloy during heating
22 p3192 A72-43015

Martensitic transformation in filamentary cobalt crystals
22 p3192 A72-43017

Carbide phases in nickel-based heat-resistant alloys
22 p3192 A72-43018

Fe-Ni-C martensite reverse transformation to austenite during large and rapid applied shear, evaluating shear zone neighboring partially pierced hole
22 p3193 A72-43031

Pure Co single crystals allotropic transformation effects on deformation behavior, noting flow stress and work hardening rate relationship to history
22 p3193 A72-43034

Enhanced strengthening of a spinodal Fe-Ni-Cu alloy by martensitic transformation.
22 p3194 A72-43040

Model of degenerate semiconductor near segnetoelectric phase transformation, noting superconducting state at low temperatures with corresponding impurity concentrations
23 p3323 A72-43317

Mechanical properties of titanium alloys with isomorphous beta-stabilizing elements
23 p3300 A72-43590

Martensitic transformation during deformation in titanium alloys with a metastable beta phase
23 p3300 A72-43591

Phase diagrams from X ray analysis of rapidly crystallized Ni-Sn alloys, noting crystal lattices and phase transformation
23 p3300 A72-43648

Peritectic solid phase transformations in cast homogenized Al-Cu-Li-Mn-Cd alloy, noting Li strengthening effect
23 p3303 A72-44093

Structure of the 01420 alloy with zirconium
23 p3303 A72-44094

Alpha aluminum whiskers growth in mullite ceramic composition following vapor-liquid-solid phase
23 p3303 A72-44152

Phase transformations in chromium-titanium compounds.
24 p3413 A72-44922

Residual stress formation mechanism in two phase Ti alloys under cutting and plastic deformation, showing phase transformation composition and structure effects
24 p3407 A72-44942

Non-steady shock waves in metals with phase transitions and hardening by explosion. 24 p3414 A72-45025

Factors affecting phase-change paint heat-transfer data reduction with emphasis on wall temperatures approaching adiabatic conditions. [AIAA PAPER 72-1030] 24 p3389 A72-45407

Transition of the oxide film on a molybdenum surface from the two-dimensional to the three-dimensional phase 24 p3432 A72-45503

Gas dynamics and shock wave physics of supersonic flow in two phase media, noting evaporation, condensation and phase transformations 24 p3364 A72-45525

PHASE VELOCITY

Propagating waves characteristics measurement on Yagi-Uda array, obtaining k-beta diagrams and phase velocities 01 p0043 A72-11244

Plasma oscillations stabilization, considering nonlinear effects in phase velocity of plasma waves 05 p0695 A72-16416

Vlf propagation and D region aeronomy model for vlf phase behavior predictions and observations during two solar eclipses 05 p0630 A72-16618

Phase and group velocity of electromagnetic waves in drifting uniaxial magnetoplasma, obtaining dispersion relation from Maxwell and plasma equations 06 p0853 A72-17349

Phase velocity of first order mode of vlf waves propagating in earth ionosphere 06 p0773 A72-17598

Resonant frequency, phase velocities and dispersion curves for wave propagation in isotropic elastic cylinders 06 p0895 A72-17854

Fast electron-cyclotron wave excitation with infinite phase velocity along magnetic field in nonequilibrium electron plasma 06 p0862 A72-18402

Drift waves propagation in ionized plasma, considering drift rate, ion sound phase velocity and effect of impurities 07 p1045 A72-20444

Long distance atmospheric propagation in earth-ionosphere waveguide, obtaining phase velocities and damping factors 08 p1131 A72-20802

Ar/He plasma acoustic wave properties, expressing phase velocity and damping as function of ion-electron temperature ratio and relative species densities 10 p1520 A72-24300

Phase velocity and Landau damping of ion acoustic waves propagating through plasma boundary layer at conducting sphere or cylinder based on two fluid model 10 p1523 A72-24746

Fast and slow ion acoustic free streaming wave propagation in drifting plasma, showing phase velocity and damping in agreement with Maxwellian distribution 11 p1692 A72-25518

Cylindrical waveguide proper modes instability regions boundary calculation, determining dispersion characteristics and waves phase and group velocities 12 p1791 A72-27537

Signal propagation along homogeneous drifting electron beam focused by strong magnetic field, obtaining phase velocity and space charge density 13 p1914 A72-28373

Frequency equation for torsional wave phase velocity in solid circular rod under initial tension, plotted for various propagation modes 13 p2002 A72-28620

Wave channel type antenna design with modulated phase velocity and multiple use of antenna array 13 p1929 A72-28895

VLF and LF electromagnetic waves amplitude and phase velocity in spherical earth-ionosphere waveguide, discussing wave hop method 13 p1923 A72-29661

Equations of motion for incompressible viscous fluid thin layer on cylinder outer side under gravity, calculating wave number, phase velocity and film thickness 14 p2094 A72-30699

Variable amplitude and phase velocity electromagnetic traveling wave field distribution in diverging MHD induction machine channel with liquid metal flow 16 p2435 A72-33282

Sea surface wind-caused waves spectral component phase velocity measurement method based on statistical treatment of synchronous continuous records of surface elevation 16 p2417 A72-33291

Electromagnetic waves attenuation and phase velocity correction in polycrystals with anisotropic crystal distribution 16 p2365 A72-34013

Fast electron cyclotron wave excitation with infinite phase velocity along magnetic field in nonequilibrium electron plasma 17 p2588 A72-34853

Measurements of ultrasonic velocities using a digital averaging technique. 18 p2691 A72-36401

WKB approximation to suggest vertical phase velocity measurement at turning points of acoustic-gravity wave propagation in thermosphere 18 p2686 A72-36411

Large-signal analysis of efficiency and nonlinear phase distortion in a phase velocity tapered traveling-wave tube. 24 p3385 A72-45283

PHASE-SPACE INTEGRAL

Optimization programs for linear control systems with nonconvex constraints on phase coordinates applied to material point transfer 04 p0504 A72-14624

Vlasov equation phase space boundary integration for evolution of one dimensional self gravitating collisionless stellar systems with constant density 05 p0714 A72-16056

Small scale phase space density granulations/clumps/ in turbulent plasma due to fluctuating electric field 07 p1041 A72-19510

Control synthesis equations for aircraft motion on phase space surface 09 p1261 A72-22208

PHASED ARRAYS

Phased array antennas design and performance characteristics, examining feeding and electronic scanning problems with special attention to all-solid-state designs 01 p0038 A72-10659

Microwave module circuit design for airborne phased array radar with distributed power generation, reception and phase shift functions, considering performance, reliability and cost 01 p0028 A72-10660

X-band linear phased array tracking antenna with digital phase shifters and beam steering, evaluating beamwidth, gain and direction error 01 p0028 A72-10663

Low sidelobe pencil beam thinned phased arrays design involving element position selection 01 p0039 A72-10664

Far field patterns of hourglass reflector phased array for electronic despin of communications antenna on spin stabilized satellite 01 p0029 A72-10666

Characteristic equation of surface wave propagation on two dimensional corrugated structures for phased array applications 01 p0030 A72-10845

Phased scanning array for ATC radar beacon systems, airport or air route surveillance radars and ground landing systems 01 p0098 A72-10962

Boundary value problem solution for multiple interleaved phased arrays of waveguide radiators operating at different frequencies, investigating transmission characteristics 01 p0042 A72-11234

Large reflector and phased array antennas, discussing synthesis and analysis, active impedance and blind spots, matching, beam steering and implementation 02 p0191 A72-11686

Radiation pattern and reflected field analysis for incident plane wave on phased arrays of thick wall rectangular waveguides 03 p0330 A72-13168

Planar phased array antennas with uniform current amplitudes, calculating beam-pointing error dependence on array geometry, phase errors and scan angle 03 p0325 A72-14179

Phased antenna array blind spot detection and elimination, describing aperture match with inductive irises 04 p0486 A72-14493

Waveguide radiators linear phased array impedance matching during E-plane wide angle scanning improved by reflection coefficient variation compensation 04 p0499 A72-15239

Random phasing algorithms to reduce phase quantization lobes for radiation patterns of commutated phased array antennas 05 p0634 A72-15820

Computer controlled production test system for airborne phased array modules, describing various measurement capabilities 05 p0637 A72-16417

Small array technique for active impedance amplitude and phase measurement of large phased arrays 06 p0782 A72-17361

Electronic scanning steerable phased array radar beam pointing capability improvement for moving target detection probability 06 p0772 A72-17423

S band module with Gunn diode oscillators in series connection used as phased array radar 250 W power sources with efficient heat sink 06 p0789 A72-18476

Digital loaded-line phase shifters for phased array antennas, discussing lossy microstrips effects and P-I-N diode switching shortcomings in design requirements 07 p0954 A72-19048

Element position design of pencil beam thin phased arrays with low sidelobes 07 p0941 A72-19256

Computer simulated phased arrays with randomly located elements, deriving peak sidelobe level for comparison with measurement 07 p0945 A72-19783

Anomalous wave nulls and relation to endfire surface wave radiation on phased arrays of TEM waveguides with metallic fences perpendicular to ground plane 07 p0945 A72-19788

Gain function for planar phased array far field pattern, deriving calculation method for excitation pattern for prescribed radiated beam behavior 08 p1132 A72-21328

Targets discovery in predetermined direction by phased array radar, using sequential analysis 09 p1278 A72-22896

Phased array radar systems synthesis based on life cycle cost minimization, taking into account high-speed digital data processing 09 p1280 A72-23374

Agile beam electronically scanned multitarget phased array tracking radar, dwell allocation strategy and trajectory extrapolation algorithm effects on target handling capacity 10 p1437 A72-24685

Single engine aircraft-borne weather radar with electronically scanned steerable phased array antenna [SAE PAPER 720315] 11 p1591 A72-25579

Finite and infinite number element phased array antennas, deriving active impedance, element pattern and power gain 11 p1593 A72-26096

Radiation pattern forming circuit with compensated mutual coupling in phased antenna arrays, noting synthesis by matched multipoles 11 p1598 A72-26712

Parasitic sidelobe suppression in radiation patterns of phase switching linear antenna array without gain loss 11 p1598 A72-26717

Communication and data relay satellites multibeam antennas characteristics, discussing multiple feed reflectors, bootlace lens configuration and phased arrays [AIAA PAPER 72-530] 12 p1789 A72-27355

Electro-optical processing of phased array signal reception, using electron beam addressing system with potassium dideuterium phosphate target crystal 12 p1785 A72-27954

Optimal parameters of electro-optical signal processor for phased array antennas, noting optical subsystem correspondence to optoacoustical spectrum analyzer 13 p1926 A72-28374

Mutual coupling in phased arrays of randomly spaced antennas, investigating probabilistic properties of main beam amplitude fluctuations 13 p1916 A72-28532

Two dimensional optical phased array beam steering based on membrane light modulation and high speed digital techniques 15 p2248 A72-32053

Airborne ground mapping and meteorological radar with steerable phased array antenna without mechanical scanners 15 p2200 A72-32216

Properties of a nonisosceles triangular grid planar phased array. 17 p2524 A72-34352

A broad-band wide-angle scan matching technique for large environmentally restricted phased arrays. 17 p2513 A72-34353

Computer aided impedance matching of an interleaved waveguide phased array. 17 p2525 A72-34373

Quadratic phase feed for phased arrays as method of preventing degradation of sidelobe level of patterns due to quantization 17 p2526 A72-34384

Book - Theory and analysis of phased array antennas 17 p2515 A72-34621

Broadband high power L-band phased array amplifier chain. 17 p2528 A72-34710

Statistical estimate of the attainable sidelobe level in phase-switched antenna arrays with a nonlinear initial phase lead 17 p2529 A72-34833

Solid state phased arrays for ECM applications. 17 p2531 A72-35569

Airborne waveguide element reliable advanced solid state radar /RASSR/ phased array radiation patterns and design 17 p2531 A72-35571

SHF airborne distributed phased array antenna system. 17 p2531 A72-35572

Cylindrical phased arrays - Beam scanning and sidelobe control. 17 p2531 A72-35573

Multifunction microwave apertures - Concepts and potential. 17 p2531 A72-35574

Digital tracking with phased arrays. 19 p2765 A72-38261

Methods for monitoring the parameters of phased antenna arrays. 19 p2767 A72-38622

Antenna pattern analysis for compatibility prediction. 20 p2902 A72-39000

Phase shifter number reduction effects on phased radar array radiation pattern distortion and sidelobe reduction 20 p2907 A72-39268

Faraday rotation dual-mode ferrite reciprocal phaser with performance and cost advantages over toroidal type for microwave phased array applications 20 p2909 A72-39733

A flat-feed technique for phased arrays. 21 p3026 A72-40356

On the removal of blindness in phased antenna arrays by element positioning errors. 21 p3027 A72-40363

Mutual coupling of infinite periodic phased arrays of arbitrarily oriented dipoles, investigating dipole length, orientation and phase effects on current distribution 21 p3027 A72-40368

Wave equation for infinitely long slotted screen in elliptic cylindric coordinates, noting radiation pattern for phased antenna array of metallized hyperbolic striplines 21 p3028 A72-40507

Design and investigations regarding a phase-controlled dipole group with radiation input 21 p3028 A72-40508

Numerical integration of integral equation for phased array radiation modeled by impedance filaments in conductive plane, noting excitation by magnetic flux 22 p3159 A72-42663

Random phasing algorithms to reduce phase quantization sidelobes for radiation patterns of commutated phased array antennas 23 p3268 A72-43428

Design of radiating elements for large planar arrays - Accomplishments and remaining challenges. 23 p3269 A72-43571

Recent advances in diode and ferrite phaser technology for phased-array radars. 1. 23 p3270 A72-43572

Influence of modulating /multiplicative/ noise on signal processing in a phased-array-antenna/receiver system 23 p3265 A72-44205

Butler-matrix fed arrays, discussing phase differences, scan steps and sectors, sidelobe structure and attenuation 23 p3273 A72-44363

PHASES

Phase extraction and analysis in superalloys - Summary of investigations by ASTM Committee E-4 Task Group 1. 23 p3304 A72-44257

PHENOLIC RESINS

Phenolic-novolak prepolymer molecular structure and pyrolysis reactions thermokinetic parameters, presenting statistical methods for estimating char yield 01 p0023 A72-11261

Fire resistant fibrous materials for potential military and transportation applications, considering aromatic polyamide polybenzimidazole, fluorocarbon resin polymer, phenolic and glass fibers and fabrics 08 p1191 A72-21586

Gruneisen tensor relationship to elastic and thermal properties of anisotropic quartz fiber-phenolic composite 10 p1500 A72-24251

Two dimensionally reinforced quartz-phenolic composite material dynamic fracture behavior under stress wave loading in uniaxial strain, noting spallation threshold time dependence 11 p1669 A72-25291

Carbon-phenolic composite ablation and expansion in thermal environment during reentry shielding, using flight and simulation tests [AIAA PAPER 72-363] 11 p1669 A72-25390

Mechanical behavior of three dimensional reinforced ablative composites, including carbon-phenolic, quartz-phenolic and quartz-carbon materials 11 p1670 A72-25459

Stress pulse attenuation in cloth-laminate quartz phenolic. 17 p2571 A72-35284

PHENOLS

NT BISPHENOLS

Mechanical and thermochemical erosion during ablation of silicophenolic material 04 p0597 A72-15554

PHENOMENOLOGY

Generalized Navier-Stokes equations for incompressible turbulent flow time mean values, using non-linear phenomenological theory 07 p0972 A72-20109

PHENYLS

NT POLYPHENYLS

Methyl phenyl polysiloxane bonded solid film lubricants, discussing air curing at ambient temperatures and performance tests 06 p0836 A72-18592

Electron impact induced fragmentation of alkyl-N-/1-phenylethyl/-carbamates of primary, secondary and tertiary alcohols, using deuterium labeling and high resolution mass spectrometry 07 p0936 A72-19500

PHILOSOPHY

NT PARADOXES

Human biology, including evolution, organism structure, organizations of people, degeneracy, interactions with environment and philosophical concepts 06 p0765 A72-18315

PHOBOS

Mars observation by Mariner 9, discussing TV pictures of surface, UV and IR spectroscopy of atmosphere, S band experiment and Phobos and Deimos studies 10 p1538 A72-24309

Blue filter polarimeter observations of Deimos and Phobos, discussing polarization-phase angle curve for Deimos dust surface layer 12 p1865 A72-27097

Phobos and Deimos orbital characteristics, noting related Martian physical properties determination 15 p2302 A72-31277

Mars and its satellites as viewed by Mariner 9 17 p2607 A72-34752

Viewing Phobos and Deimos for navigating Mariner 9. [AIAA PAPER 72-927] 24 p3423 A72-45433

PHONEMICS

Interhemispheric effects on choice reaction times to single and multiple letter displays, analyzing cerebral dominance and visual information transmission compared with verbal response 12 p1768 A72-27075

PHONOCARDIOGRAMS

U PHONOCARDIOGRAPHY

PHONOCARDIOGRAPHY

Lf subaudible chest wall vibration recordings, discussing external, epicardial surface and intraventricular pressure precordial displacement tracings 01 p0017 A72-10120

Right heart ventricle intracardiac phonocardiograms, recording pulmonary early diastolic click simultaneous with artery pressure curve diastolic wave 01 p0010 A72-10121

Doppler ultrasonic probe phonocardiography for human cardiovascular velocity measurement, showing normal tracings and aging effects 05 p0617 A72-16154

Doppler cardiometry determination of human cardiovascular velocities in patients with heart diseases, discussing impaired left ventricular function detection 05 p0617 A72-16155

Hot thermistor and hot-wire anemometer principles for phonocardiographic transducer design, using theory of hydraulic amplification with high SNR 10 p1430 A72-24374

Computer assisted monitoring of ECG waveforms and heart sounds frequency spectra to detect bubble laden blood during decompression sickness 11 p1587 A72-26626

Heart and circulatory system functional diagnostics, discussing ECG, blood pressure, X ray, phonocardiographical and pulmonary examinations 12 p1760 A72-27271

Temporal relation of the second heart sound to aortic flow in various conditions. 19 p2759 A72-38818

PHONON BEAMS

Noise characteristics of a digital system of light-beam deflection 24 p3410 A72-45323

PHONONS

NT PHONON BEAMS

Viscous friction effects on phonon-electron interactions and dislocation velocity by deformation measurement of metallic crystals under pulsating magnetic fields 02 p0243 A72-12169

Electroacoustic magnetic and Hall effects in semiconductors in strong electric field involving phonon production by supersonic electron drift 03 p0401 A72-13088

Background phonon X ray and gamma quanta intensities dependence on solar activity from Geiger counter recordings in deep space 05 p0711 A72-17046

PHOSPHATES

Multiphonon capture of charge carriers by deep impurity centers in homopolar semiconductors from generalized Lucovsky model 08 p1216 A72-21094

X ray diffuse scattering from Al crystal at 100-500 V, considering phonon modes effects on anharmonicity and atomic deformation 08 p1186 A72-21591

Phonon limited mean free path in Cd by limiting point method, proposing model with elastic anisotropy 08 p1217 A72-21592

Free and stressed polymer molecules nonlinear vibrations, estimating three- and four-phonon processes contribution to linear chain vibration bands half width by numerical methods 08 p1195 A72-21851

Ferroelectrics with strong hydrogen bonds, deriving self consistent optical phonon frequency and coupled proton-phonon vibration spectrum 09 p1366 A72-22221

Phonon dispersion curves from inelastic neutron scattering for actinide and transition metals carbides, noting superconducting properties 09 p1369 A72-22564

NbN family high transition temperature values application to phonon spectrum prediction based on superconductivity microscopic theory 09 p1369 A72-22565

Phonon dispersion curves of bcc transition metals for normal lattice vibration modes 09 p1369 A72-22680

Metal welded joints formation as diffusion intensification from atom jumps stimulation by phonons from atomic thermal vibrations or crystal defects generation 09 p1319 A72-22867

Franck-Condon phonon displacement effects on mobility edge and energy gap in disordered materials 09 p1357 A72-22986

Ion crystal plasma wave echoes from conduction electrons interaction with phonons in self consistent field 10 p1527 A72-24926

Phonon scattering and induced energy levels in electron irradiated Sb doped Ge in n to p-type conversion region, measuring thermal conductivity and Hall effect 12 p1857 A72-28057

Electroacoustomagnetic and Hall effects in semiconductors within strong electric field involving phonon production by supersonic electron drift 13 p2022 A72-29437

Steady motion of dense electron beam in rarefied phonon plasma along magnetic field, analyzing polarization effects 14 p2136 A72-30305

Strong LF electromagnetic wave propagation in semiconductors with inelastic scattering of current carriers by optical phonons, calculating harmonics reflection coefficients 14 p2142 A72-30361

Surface phonon appearance criteria associated with crystal surface gas adsorption, discussing entropy variation and colliding particle-crystal energy exchange 15 p2280 A72-31858

Electron contribution to phonon damping in anharmonic metal for collision-free regime, evaluating relaxation times 15 p2277 A72-31890

Angular force models with electron-ion interaction applied to bcc and fcc metals, calculating phonon dispersion curves for V, Nb and Ta 15 p2258 A72-32226

X ray Brillouin scattering investigation of phonon phenomena for small momentum transfers with Bragg condition nearly satisfied 15 p2250 A72-32308

Quantum crystals in the single-particle picture. 19 p2844 A72-37943

Solid state physics experiment for conduction electrons effective mass determination in ultrapur n-type InSb by means of magnetophonon effect 21 p3096 A72-40203

Steady motion of dense electron beam in rarefied phonon plasma along magnetic field, analyzing polarization effects 23 p3317 A72-43207

Phonon dispersion relations and Debye characteristic temperature for Ti, Hf and Y hcp lattices 24 p3415 A72-45629

PHOSPHATES

NT ADENINES

NT ADENOSINE DIPHOSPHATE [ADP]

NT ADENOSINE TRIPHOSPHATE [ATP]

NT ADENOSINES

NT AMMONIUM PHOSPHATES

NT CALCIUM PHOSPHATES

NT NUCLEOTIDES

NT POTASSIUM PHOSPHATES

Amino acid-phosphate anhydrides polymerization in presence of clay minerals, noting reactions superposition and monomer diffusion 04 p0483 A72-14774

Neural tissues excitability relationship to precellular organization, considering polyphosphate distribution in vertebrate tissues

04 p0470 A72-14789

Inorganic polyphosphates effect on phosphorus metabolism evolution in primary living organisms, noting polyphosphate glucokinase distribution in various microorganisms

04 p0470 A72-14797

Biological energy transformation origin and evolution, discussing inorganic pyrophosphates precursor to adenosine phosphates as energy carriers

04 p0470 A72-14798

Biological phosphate origin through atmosphere-hydrosphere interrelations, discussing concentrative processes, dehydration mechanics and evaporation

05 p0617 A72-16129

Trimethylphosphite interaction with acetyl- and benzoyl-p-quinone in dry nitrogen atmosphere, noting phosphate formation through intermediate bipolar ion

06 p0770 A72-17986

Lubricating mixtures of mineral oil with inorganic phosphates, hydroxides and sulfides, discussing lubrication mechanism and physical properties

06 p0837 A72-18603

Energy transfer rates and spectral line inhomogeneity of narrow band oscillation phosphate glass and inorganic liquid lasers with Nd

07 p1004 A72-19227

Zinc dithiophosphate and bisphenol effects on surface activation of additive compositions with succinimide base in lubricant applications

07 p1023 A72-19903

Synthetic fire resistant hydraulic fluids, comparing chlorinated hydrocarbons and phosphate esters chemical properties with water based products

08 p1197 A72-22160

Amorphous chromate and phosphate conversion coatings of Al, providing inert surface for painting

09 p1317 A72-22480

Thermolabile triose phosphate isomerase in psychrophilic *Clostridium* at moderate temperatures

10 p1426 A72-24750

Changes in energy stores in the hypoxic heart.

17 p2501 A72-34985

Rat pulmonary lipid metabolism during feeding and fasting from studies of lung lecithin half life after C-14/1/palmitate and H-3/U/glucose injection

18 p2651 A72-36573

Structure-property relationships in flame retardant systems - Relative effects of alkyl phosphates, phosphonates and phosphites on cellulose flammability.

20 p2987 A72-39698

PHOSPHIDES

NT GALLIUM PHOSPHIDES

NT INDIUM PHOSPHIDES

Peritectic interaction and phase diagrams of quasi-binary semiconductor CdAs-CdTe and CdP-CdSe systems

19 p2845 A72-38404

Structure and properties of nickel-phosphorus coatings as a function of the temperature and annealing time

20 p2929 A72-39583

PHOSPHINES

Vibrational IR and Raman spectra of dimethylaminodichlorophosphine, determining molecular structure symmetry in liquid and solid phases

04 p0481 A72-14444

Investigation of certain complex compounds of triaryl phosphines /phosphites/ in optically sensitized photographic emulsions

21 p3052 A72-40390

PHOSPHORESCENCE

Cameron bands phosphorescent yield of carbon monoxide from carbon dioxide photodissociation in helium buffer

11 p1590 A72-26013

Development of phosphorescence during ruby irradiation

23 p3323 A72-43412

A thermal mapping technique for shock tunnels and a practical data reduction procedure.

[ALAA PAPER 72-1031] 24 p3389 A72-45408

PHOSPHORIC ACID

Sorption properties of anodic aluminum oxides prepared in orthophosphoric and chromic acid solutions, determining dependence on pH by isotopic labeling method

05 p0624 A72-17055

Antioxidative and antiwear action of S-containing and S-free phosphoric acid ester additives in lubricating oils

12 p1835 A72-28201

Allyl esters of phosphoric acid preparation and application as substitutes for heavy metal sulfides and silver compounds in single operation photographic process

16 p2392 A72-33363

Mass and energy balance in air cooled matrix type phosphoric acid cell, noting operational reliability and construction

16 p2351 A72-33889

PHOSPHORS

Near field characteristics of solid state laser frequency converters emission, determining medium transluence during single pulse excitation of organic phosphors

10 p1490 A72-24052

Electron beam excited P-15 phosphor 3900 A spectral component fast decay time measurement by delayed coincidence technique

13 p2000 A72-29762

Mechanism and controlling factors of infrared-to-visible conversion process in Er³⁺/ and Yb³⁺/doped phosphors.

21 p3096 A72-40186

Optical quenching of the Gudden-Pohl effect in zinc sulfide luminophors and IR photography

21 p3057 A72-41680

Recombinational luminescence of NaI-Tl single crystals excited in the A-band of activation absorption

23 p3323 A72-43342

PHOSPHORUS

Thermoluminescent phosphorus films irradiation by electrons with energies up to 15 keV in vacuum chamber

01 p0114 A72-10372

Phosphorus absolute transition probabilities determination from P I and P II lines strength measurement, using gas-driven shock tube

01 p0104 A72-11111

Powdered chromium carbide-nickel alloys phosphorus addition effects on sintering temperature, shrinkage, density and hardness

03 p0372 A72-13546

Phosphorus-containing austenitic stainless steel, investigating quenching defects and precipitation from microstructure by transmission electron microscopy

03 p0379 A72-14260

Potassium chlorate/red phosphorus mixtures sensitivity tests for initiation by electrostatic discharge, heating and impact

08 p1221 A72-20776

Nonstabilized Ni-P thin films electrical conductivity at 50-280 C, using mass spectrographic, thermal differential, X ray diffraction and electron microdiffraction analyses

10 p1495 A72-24076

Zn, Ge and P based semiconductor alloy specimens chemical composition determination via ac polarograms

12 p1854 A72-27443

Significance of Apollo 11 and 12 lunar rock fragments of norite rich in K, rare earth elements and P /KREEP/ for lunar evolution assessment

13 p2037 A72-28990

PHOSPHORUS COMPOUNDS

NT ADENINES

NT ADENOSINE DIPHOSPHATE [ADP]

NT ADENOSINE TRIPHOSPHATE [ATP]

NT ADENOSINES

NT AMMONIUM PHOSPHATES

NT CALCIUM PHOSPHATES

NT GALLIUM PHOSPHIDES

NT INDIUM PHOSPHIDES

NT NUCLEOTIDES

NT ORGANIC PHOSPHORUS COMPOUNDS

NT PHOSPHATES

NT PHOSPHIDES

NT PHOSPHINES

NT PHOSPHORIC ACID

NT POTASSIUM PHOSPHATES

Phosphorus compounds incorporation in polyurethane foams and polyesters for flame retardancy

[PI PAPER 12] 03 p0380 A72-13246

Phosphorus effect on Widmanstatten pattern in iron meteorites, using Fe-Ni-P phase diagram and cooling experiments

06 p0878 A72-17792

Stimulated emission cross section, loss coefficient and terminal level lifetime of high power Nd-phosphorus oxychloride liquid lasers

07 p1004 A72-19226

Phosphorus hydride electron affinity determination by electron photodetachment cross section measurement, using ion cyclotron resonance spectrometer

07 p0935 A72-19432

Antiwear properties of mixed anhydrides of alkyl xanthogene and phosphorus containing acids for use as oil lubricant additives

09 p1336 A72-22499

Giant pulse amplification with neodymium-phosphorus oxychloride liquid laser amplifier

09 p1323 A72-22655

Optical Kerr constant measurement in liquid phosphoryl chloride and toluene and glasses, noting nonlinear refractivity

12 p1823 A72-27756

Laser effect in solution of neodymium oxide in mixture of phosphorus oxychloride and heavy water, presenting preparation procedure

15 p2246 A72-31680

Effect of neurohomologous phospholipids associated with other substances on experimental intoxication by asymmetrical dimethylhydrazine. II -

Biochemical aspects of the pyridoxine-phospholipid association

21 p3009 A72-41195

PHOSPHORUS METABOLISM

Biochemical processes and structures interrelation, using nucleoprotein coacervate models and ribonuclease and polynucleotide phosphorylase enzymes

04 p0469 A72-14783

Inorganic polyphosphates effect on phosphorus metabolism evolution in primary living organisms, noting polyphosphate glucokinase distribution in various microorganisms

04 p0470 A72-14797

Biological energy transformation origin and evolution, discussing inorganic pyrophosphates precursor to adenosine phosphates as energy carriers

04 p0470 A72-14798

Potassium cyanide effect on phospholipid exchange in rat brain and liver during histotoxic hypoxia as function of body temperature

05 p0618 A72-16357

Isolation stress effect on excretory products in unrestrained chimpanzee, suggesting Ca to P excretion ratio as physiological stress indicator

07 p0921 A72-20179

Calcium and phosphorus excretion relation to bone density changes in immobilized Macaca nemestrina monkeys

12 p1760 A72-27473

Chlorella population age structure and cell requirements correlation with nutrient medium nitrogen and phosphorus absorption

13 p1909 A72-29311

PHOSPHORYLATION

Energy transfer conditions of transdehydration reactions on primeval earth leading to transphosphorylation, transacylation and peptide synthesis

04 p0468 A72-14768

Inorganic phosphates-nucleoside hypohydrous thermal reaction mechanism, discussing thermal polymerization of orthophosphates for phosphorylation and condensing agents in primordial synthesis

04 p0483 A72-14770

Cyanogen induced phosphorylation of sugars in aqueous solution, discussing system prebiotic plausibility

04 p0483 A72-14771

Bacterial respiration through oxidative phosphorylation origin hypotheses, discussing photosynthesis and sulfate respiration in anoxygenic atmosphere and thiobacillus and aerobic evolution in oxygen at mesophere

04 p0470 A72-14798

Cold adaptation effects on rat skeletal muscle tissue Vant-Hoff coefficient, considering phosphorylation and oxidation rate, P/O and mitochondrial ATP-ase activity

13 p1902 A72-28639

Prebiotic thymidine phosphorylation at 65 C by urea-phosphate mixtures in simulated desert conditions

15 p2185 A72-31629

PHOTOABSORPTION

Electron and population densities in inhomogeneous nonequilibrium plasmas with photoabsorption, using radiative transport equation

02 p0266 A72-12441

Photoabsorption and simple and multiple excitations of rare gases internal atomic layers under X ray action, relating electron transition and relaxed core energies

09 p1357 A72-22836

Total absorption cross sections of several gases of aeronomic interest at 584 A.

22 p3152 A72-42419

Light absorption by visual pigment in photoreceptor, noting Airy disk diameter effect

23 p3259 A72-44388

Calculation of photoabsorption processes in helium.

24 p3426 A72-45012

Photoionization and photoabsorption cross sections for ionospheric calculations.

24 p3400 A72-45590

PHOTOCATHODES

Fabry lens application in stellar photometry, describing technique of image construction on photomultiplier tube cathode

07 p0985 A72-19419

Alkali antimonide photocathodes photoelectric yield /quantum efficiency/ relation to reversible variation of surface potential, noting critical current density temperature dependence

08 p1171 A72-21968

Low light level small intensifier/vidicon camera tube using bombardment induced conductivity target, and planar photocathode, detailing design and performance

08 p1171 A72-21969

III-V metal photocathodes for near IR and shorter wavelengths, noting performance improvements over conventional cathodes

11 p1630 A72-25683

- Photocathode relative sensitivity spatial distribution as function of wavelength, noting maximum shift from photoeffect contribution to photomultiplier current 19 p2800 A72-37821
- Effect of pulsed voltages fed into the external modulating electrode on the threshold sensitivity of a photomultiplier 19 p2774 A72-38415
- Richardson and effective work functions measurements for thermionic emission from alkali and extended red-sensitive trialkali photocathodes, discussing error minimization 20 p2890 A72-39646
- I-V, spectral and temperature characteristics of autophotocathode emission in p-type silicon cathodes with varying acceptor concentrations 21 p3098 A72-41692

- IR radiation detection by microwave biased photoconductor, lead-tin telluride photovoltaic detector and thermal imaging pyroelectric detector and array system 07 p1034 A72-19425
- Computer simulation for performance of carbon dioxide laser heterodyne communication system with photoconductive n-type mercury-cadmium telluride detector/mixer 15 p2198 A72-32062
- Thermoplastic photoconductor media for holographic recording, discussing structure fabrication techniques and performance 15 p2239 A72-32359
- Dosimetric characteristics of CdS semiconductor detectors and photoresistors for gamma rays recording 16 p3390 A72-33076
- Mercury-cadmium telluride photoconductive detectors array for S-192 multispectral scanner for Skylab earth scanning experiments 23 p3288 A72-43879
- Mercury-cadmium telluride multispectral photoconductive detectors, discussing fabrication techniques and performance characteristics 23 p3288 A72-43880

Heterodyne, microwave bias and pyroelectric photon infrared detectors, noting mixed crystal photoconductive and photovoltaic detectors
23 p3291 A72-44392

PHOTOCURRENTS

U ELECTRIC CURRENT
U PHOTOELECTRIC EMISSION

PHOTODECOMPOSITION

Interstellar formaldehyde, ammonia, water, methane and carbon dioxide photochemistry, discussing decomposition and lifetime
04 p0578 A72-15311

Explosive p-process nucleosynthesis limiting conditions in supernova envelopes, using proton capture and neutron photodisintegration rates
04 p0579 A72-15318

Flashlamp pumped cryptocyanine Q switched high peak power ruby lasers, noting UV radiation responsible for methanolic solution photochemical decomposition
15 p2249 A72-32156

PHOTODETACHMENT

Meteors radio echo duration dependence on electron attachment, photodetachment and turbulent and ambipolar diffusion deionization processes
09 p1383 A72-22502

Meteor method for determining errors in rate measurement of electron attachment to neutral air particles based on nonexistent recombination, turbulent diffusion and photodetachment
09 p1383 A72-22503

Electron attachment, photodetachment and turbulent diffusion deionization effects on duration distribution of Geminid meteor radio echoes
09 p1384 A72-22512

Relative cross sections for gas phase photodetachment of electrons from amide and arsenide ions using ion cyclotron resonance spectrometer
13 p1914 A72-30064

Gas phase photodetachment of electron from selenide ion, determining affinity and spin-orbit coupling constant for SeH negative ion
16 p2360 A72-33580

An investigation of the ionospheric D region at sunrise. I - Time variations of ozone, metastable molecular oxygen, and atomic oxygen. II - Estimation of some photodetachment rates. III - Time variations of negative-ion and electron densities.
18 p2656 A72-36295

Photodetachment of electrons from major negative ions in the lower D region.
18 p2686 A72-36622

PHOTODIODES

Si monolithic multispectral image photosensor array for satellite application, presenting fabrication and spectral response data
04 p0500 A72-15304

Silicon Schottky barrier photodiodes development for photographic, photometric and analytical instrumentation, comparing sensitivity, time response and fatigue characteristics with classical photodetectors
06 p0813 A72-17428

Pulsed dye lasers logarithmic detector circuit with two ultrafast photodiodes, eliminating intensity variations problem
07 p1005 A72-19415

Physical and operational characteristics of Si and Ge photoelectric semiconductor devices with p-n junctions, discussing photodiodes, phototransistors, mosaic arrays and coordinate sensitive structures
08 p1139 A72-21055

Photogrammetric measurement with photodiode sensor arrays substitution for film in cameras and yielding real time readout of stellar and satellite coordinates
08 p1169 A72-21700

Optoelectronic elements for information system applications, discussing photomultipliers, photodiodes, photoresistors, avalanche and photoparametric diodes response and bandwidth characteristics
08 p1169 A72-21844

Image dissector, silicon photodiode and vidicon behavior comparison for medium resolution star mappers design for three axis stabilized vehicles
08 p1172 A72-21975

Lead tin telluride photovoltaic p-n junction diode and lasers, discussing n-type layer fabrication by proton bombardment
10 p1450 A72-24552

Avalanche photodiode optical detector noise amplitude distribution as function of operating conditions
13 p1971 A72-29924

Instrumental errors estimation in photomultipliers and photodiodes during measurement of short time phase fluctuations in quasi-harmonic signals
15 p2246 A72-31424

Light emitting diodes, photodiodes and photon coupled pair temperature compensation schemes, including uses of n-p-n transistors, operational amplifier and thermistor-resistor network
15 p2247 A72-32034

Avalanche photodiodes for Nd and injection lasers radiation detection, reducing noise equivalent power
15 p2247 A72-32035

Avalanche photodiode with n-p-p-i double diffused reach-through structure for visible and near-IR regions, noting high efficiency, low noise and gain stability
15 p2248 A72-32036

Unmodulated solar radiation effect on electro-optical photoreceptors voltage sensitivity, noting photomultipliers and silicon photodiodes
15 p2237 A72-32121

Photodiode assembly for fast laser pulses and optical signal detection, utilizing Hewlett-Packard 5082-4220 diode in impedance matched holder
15 p2208 A72-32432

Photodiode-operational amplifier circuit for pulsed laser systems energy variations monitoring, noting insensitivity to ambient light conditions
16 p2402 A72-33607

High-speed image scanning devices using acoustic surface waves and photodiode array.
18 p2658 A72-36267

Solid state laser sources, light modulators and silicon avalanche photodiode detectors for fiber optical communication, discussing performance and limitations from system design viewpoint
21 p3018 A72-40866

Low capacitance high speed lead tin telluride photodiodes via liquid phase epitaxial growth, discussing frequency response to Nd-YAG and carbon dioxide lasers
22 p3159 A72-42620

Mercury-cadmium telluride photodiode detectors for near IR laser receivers, discussing time response and I-V characteristics as function of temperature
23 p3296 A72-43881

PHOTODISSOCIATION

Molecular continuity relationship relating discrete absorption oscillator strengths to photodissociation cross sections
01 p0104 A72-11115

Kinetic model and analysis of elementary characteristics of carbon trifluoride photodissociation laser
03 p0366 A72-13078

Oxygen and hydrogen atoms production in atmosphere by photodissociation, investigating terrestrial hydrogen escape efficiency
03 p0346 A72-13381

Molecular oxygen photodissociation in Schumann-Runge bands, discussing determination of solar radiation penetration depth into chemosphere
03 p0412 A72-13386

Atmospheric model for mesosphere odd-nitrogen concentration relation to NO dissociation rate and downward flux through mesopause
03 p0350 A72-13526

Atomic selective two step photoionization and molecular photodissociation by tunable laser radiation, experimenting on Rb vapor and HCl respectively [CLEA PAPER 12,4]
07 p1005 A72-19395

Photodissociation cross sections of methyl chloride and nitrous oxide cations, using ion cyclotron resonance technique
07 p0936 A72-19492

Neutral species chemical reactions in D and E regions, taking into account effects of photodissociation and transport by horizontal and vertical flow and molecular diffusion
07 p0936 A72-20039

Nitrogen dioxide photodissociation by pulsed ruby laser at 6943 Å, noting single photon energy relationship to dissociation energy
07 p0937 A72-20676

Fluorescence and absorption spectra from oxygen sulfur dichloride photodissociation in vacuum UV, discussing SO formation
11 p1590 A72-26012

Cameron bands phosphorescent yield of carbon monoxide from carbon dioxide photodissociation in helium buffer
11 p1590 A72-26013

Zeeman effects in hyperfine structure of atomic iodine photodissociation laser emission, noting magnetic fields effect on time behavior
11 p1692 A72-26558

Time estimate criterion of lasing breakdown in photodissociative iodine-alkyl lasers with iodine molecule buildup
12 p1819 A72-27053

Kinetic model and analysis of time characteristics of trifluoriodomethane photodissociation laser
13 p1968 A72-29428

Carbon origin in comets associated with propyne photodissociation by solar 1216 Å Lyman alpha radiation
13 p2050 A72-29995

Bond dissociation energy calculation for carbon disulfide in vacuum UV from fluorescence threshold energy of incident photons, measuring absorption coefficient at 1200-1400 Å
13 p1914 A72-30060

Molecular iodine photolysis in photodissociative laser due to selective pumping, noting recombination-like storage mechanism
14 p2110 A72-30354

Solar radiation induced molecular oxygen photodissociation rate as function of column density and temperature in mesosphere and lower thermosphere
16 p2383 A72-32967

French monograph - Determination of the absolute value of the absorption in the bands of the Schumann-Runge system of molecular oxygen
19 p2836 A72-37476

Isotopic effect in photodissociation processes of triplet excited molecules
19 p2838 A72-38779

Two-step photodissociation of ammonia molecules excited by laser radiation.
21 p3013 A72-40724

Generation spectrum kinetics of a photodissociative iodine laser
23 p3297 A72-44480

Multiphoton dissociation, predissociation, and autoionization of the hydrogen molecule.
24 p3427 A72-45476

Analytic criteria for laser quenching moment, generation power and stimulated emission energy for photodissociative iodine-alkyl lasers with iodine molecule buildup
24 p3412 A72-45706

PHOTOELASTIC ANALYSIS

Elastic incompressible isotropic transparent media, deriving photoelastic effect relationship to stress function
01 p0089 A72-10123

Clearance, friction and load effects on turbine blade root fastening stress distribution, comparing finite element method with photoelastic experimental results
01 p0141 A72-11048

Polycarbonate yield locus from strain rate, creep, isotropy, isoclinic and reloading tests on perforated plates [SESA PAPER 1819]
02 p0248 A72-11501

Electromagnetic plane stress wave generation by capacitor bank for transient loading of photoelastic models along straight and curved boundaries [SESA PAPER 1907A]
02 p0199 A72-11503

Air holography interferometry for acrylic model materials inspection and selection for optical flatness, comparing with photoelasticity [SESA PAPER 1941]
02 p0224 A72-11516

Stress distribution analysis of femoral neck, using three dimensional photoelastic model
03 p0318 A72-12957

TV time lapse interferometry and contouring for photoelastic nondestructive testing, comparing with photographic techniques
03 p0358 A72-13436

Stress-strain state determination for plane orthotropic bodies by optical polarization method, discussing numerical methods for stress and strain tensor components
03 p0445 A72-13580

Griffith crack propagation in polymethyl methacrylate, examining stress changes by photoelastic method
03 p0380 A72-13719

Longitudinal and transverse wave diffraction on cavities, investigating field pattern by dynamic photoelasticity method with flat models
03 p0452 A72-14131

Photothermoelastic analysis of shrinkage stresses near discontinuity in fiber composite material, relating matrix cracking to fiber packing
06 p0835 A72-17800

Residual stress measurements in metals by annular photoelastic gages, obtaining relationship to fringe orders
06 p0818 A72-18317

Elastic-plastic strain measurement on flat steel surfaces by moiré gratings, using electroluminescent source and crossing jig
06 p0818 A72-18323

Interferometric holography application to photoelastic stress analysis of opaque anisotropic composite plates under static and dynamic transverse and in-plane loads
06 p0898 A72-18349

Photoelastic analysis of cylindrical shells of revolution with one hemispheric closed end and reinforcing flanges at opposite end rim, examining boundary conditions effects
06 p0899 A72-18640

Transient high speed deformations analysis of annealed Al under impact loads by three dimensional moiré fringe techniques
07 p0983 A72-19131

Two- and three dimensional photoelastic experiments evaluation to obtain principal stresses differences
07 p1088 A72-19171

Physical analysis of photoelastic interferometry and holography, considering retardation, isochromic and isopachic fringe systems and model materials
08 p1166 A72-21330

Photoelastic measurement of stress concentration in three dimensional fiber reinforced brittle plastic matrix under uniaxial tension [PI PAPER 1]
09 p1398 A72-22538

Photothermoelasticity method for determining thermal stresses
09 p1402 A72-22737

Photoelastic studies of plane stress fields in plate induced by moving loads at subsonic, transonic and supersonic speeds
10 p1553 A72-23746

Photoelastic analysis of piezooptical and rheological properties of anisotropic composite glass plastics
10 p1557 A72-24626

Photothermoelastic analysis of temperature and rupture stress in cryogenic tanker structures, using steel and plastic ship models
[AIAA PAPER 72-344]
11 p1728 A72-25373

Infinite elastic thick plate with loads symmetrical to axis of revolution and middle plane, analyzing stress functions, Fourier-Bessel expansion and photoelastic experiment
11 p1626 A72-26427

Three dimensional photothermoelastic method of refrigeration with composite model to study transient thermal stresses in wing rib
14 p2168 A72-30907

Real time focused image holographic interferometry for deformation recording in diffusively reflecting plate under compression
15 p2233 A72-31415

Holography application to photoelastic stress analysis, showing information content correspondence to angles of incidence for different model regions
16 p2389 A72-32905

Differential stress-holo-interferometry.
[SESA PAPER 1989A]
17 p2554 A72-34816

Photoelasticity, holography, moiré and strain gage methods in European experimental mechanics research
18 p2733 A72-36357

Polarization offset angle effect on isochromatic fringe visibility of holographic photoelasticity recordings, noting reference beam ellipticity adjustment
18 p2733 A72-36360

Techniques in photoelastic analysis of pressure vessels.
18 p2690 A72-36363

Three dimensional photoelastic analysis of edge loaded ring reinforced rotating shells with zero bending, assuming pure membrane stress field
18 p2733 A72-36365

An optical method for the determination of constrained zones at crack-tips.
18 p2733 A72-36368

Mechanical component acceleration-induced stress and transient phenomena analysis by dynamic photoelasticity and interferometry, applying to elastic birefringent and other materials
18 p2734 A72-36373

Photoelastic investigation of a Hertzian contact with shallow grooves in the contact area.
18 p2734 A72-36374

Photoelastic study of stress concentration in rectangular panels with inserts.
18 p2734 A72-36376

Effect of fiber end, fiber orientation and spacing in composite materials.
18 p2738 A72-37086

An improved Cranz-Schardin high-speed camera for two-dimensional photomechanics.
19 p2795 A72-37516

A general theory of polarization holography and its application to photoelastic analysis.
19 p2799 A72-37627

Photoelastic determination of mixed mode stress intensity factors.
20 p2981 A72-39963

The gamma-ray-irradiation method applied to three-dimensional thermal photoelasticity.
21 p3051 A72-40230

Edge effect improved fringe definition on high contrast film by pseudo-solarization for polariscopes in photoelastic stress analysis
21 p3052 A72-40232

Three-dimensional photoelastic and finite-element analysis of a propellant grain.
21 p3052 A72-40237

Determination of stresses along the symmetry axis in the isometric problem on the basis of an elastooptical image of isochromes
21 p3122 A72-41347

Stress differentiation procedure for screen technique studies in dynamic photoelasticity, giving expressions for elastic modulus and Poisson coefficient
21 p3123 A72-41363

Dynamic photoelasticity application to periodic/vibrating and pulse/stress wave fields, considering loading rate effect on material fringe value
22 p3237 A72-42767

Photoelastic analysis of cardiovascular-magnitude stress pattern produced by flow through gelatin-agar walled channels for analysis of mechanical stresses on blood vessel walls
23 p3260 A72-43936

Photoelastic analysis with Stokes vector and new methods for the determination of characteristic parameters in three dimensional photoelasticity.
23 p3354 A72-44255

Mapping of large dynamic deflections of structures.
24 p3454 A72-44606

Photoelastic verification of a mechanical model for the flow of a granular material.
24 p3460 A72-45697

PHOTOELASTIC MATERIALS

Local heating effect of electrical resistance gages measuring strain across thickness of plane photoelastic Araldite models
12 p1807 A72-27316

Materials selection for models used in thermal stress studies by restrained shrinkage method with emphasis on polyurethanes
12 p1813 A72-27460

Composite materials stress analysis techniques, discussing strain gages, photoelastic coatings moiré and holographic applications
[ASME PAPER 72-DE-6]
14 p2167 A72-30861

A photoelastic material with variable modulus of elasticity.
19 p2822 A72-37731

Comparison of experimental and numerical results concerning a hollow photoelastic bar with a slot subjected to torsion
21 p3122 A72-41337

PHOTOELASTIC STRESS MEASUREMENT

U PHOTOELASTIC ANALYSIS

PHOTOELASTICITY

NT PHOTOVISCOELASTICITY

Dislocations forces during sintering of loose and cold-pressed metal powders, using photoelasticity for stress estimation and electron microscopy for defects structure
02 p0232 A72-11430

Nonlinear photoelasticity, elastoplasticity and creep problems studies by optical polarization methods, comparing transparent model and photoelastic coating techniques
02 p0289 A72-11613

Photoelastic investigation of star shaped models for loading direction influence on shear stress distribution at notch tip region in uniform tensile field
10 p1559 A72-24897

Photoelasticity with stress induced optical activity analysis using Stokes parameters, discussing rotational effects in scattered light problems
15 p2277 A72-32235

Direct and indirect creep modelling technique in photoelasticity.
18 p2734 A72-36379

Stress wave propagation observation in rigid high modulus epoxy polymer by slow motion photography, noting photoelastic properties and viscosity effect
18 p2734 A72-36380

Poincare sphere application to polarimetry and two- and three-dimensional photoelasticity by scatter light
18 p2691 A72-36381

Application of matricial formalisms to the specification of light polarization changing systems.
20 p2928 A72-40025

Photoelastic study of stress concentration in perforated composite pipes under external pressure
22 p3233 A72-42064

Pulse modulation of a laser during the tuning of an auxiliary passive resonator with the aid of ultrasound
22 p3186 A72-42666

A neoteric interferometer for use in holographic photoelasticity.
23 p3290 A72-43985

Photothermoelastic study of stress concentrations in a plate with internal heating.
23 p3349 A72-43986

Orthotropic photoelasticity methods application to concentrated force on half plane edge and to stress distribution on elliptical hole boundary in tensile strip
24 p3455 A72-44790

PHOTOELECTRIC CELLS

NT PHOTOVOLTAIC CELLS

Electric and photoelectric properties of CdTe films, describing solar cells preparation
04 p0465 A72-14593

Photometers with CdS cells, discussing calibration difficulties
07 p0992 A72-20584

Low temperature Si photoconverters transparent in IR solar spectrum tested on Cosmos satellites
07 p0915 A72-20616

Polarization effect on sensitivity of photocells and photomultipliers with/without cover glass
09 p1289 A72-23670

Electronic fringe counter with CdS cell photosensors, dc bridge and strip recorder for interferometric applications
12 p1792 A72-27762

Digital theodolite for automatic angle measurement with photoelectric sensor and magnetic data recorder for computer use
16 p2394 A72-33800

PHOTOELECTRIC EMISSION

Measurement of surface leakage currents in a semiconductor photoelectric converter
22 p3140 A72-43188

Influence of nonuniformities of the built-in field on the collection efficiency of a semiconductor photocell
22 p3140 A72-43190

PHOTOELECTRIC EFFECT

NT PHOTOIONIZATION

Lateral photoelectric effect in junction FET under homogeneous illumination, detailing current-voltage characteristics
01 p0114 A72-10859

Light wave electric field Franz-Keldysh effect on GaAs absorption edge, using electroabsorption, electroreflectance and photoconductivity spectrum and internal photoeffect analysis
04 p0561 A72-14621

Microwave photoconductivity and photodiodelectric effect in organic semiconductors
04 p0561 A72-15083

Zero crossing photoelectric autoreflector pickoffs for readout gyro systems with suspended spherical rotors, classifying systems according to modulation type
05 p0661 A72-16036

Photoelectric transducer with electric pulses as measure of rotating disk angle of turn, discussing design and measurement accuracy
05 p0662 A72-16124

Photoelectrically excited electrons diffusion and dc effect in ZnO single crystals, calculating drift mobility and lifetime product
05 p0667 A72-16158

Solar cells with improved photoelectric efficiency, describing use of noncorroding Ti-Pd-Ag contacts, titanium oxide antireflection layer and welded cell joints
06 p0760 A72-17751

Photoelectric temperature measurements in contact zone during grinding of aluminum oxide ceramic materials by synthetic diamond disks
07 p0997 A72-20252

Alkali antimonide photocathodes photoelectric yield /quantum efficiency/ relation to reversible variation of surface potential, noting critical current density temperature dependence
08 p1171 A72-21968

Scanning photoelectric image conversion /photoanalyzing/ systems for data telemetry from remote optical sensors
11 p1634 A72-26461

High temperature gaseous disperse flow radiation spectra photoelectric recording by DFS-8 spectrograph
12 p1812 A72-28116

Spectral line width measurement accuracy based on digital autocorrelation of photon counting fluctuations, noting light field and photoelectric process limiting effects
16 p2357 A72-32949

Photocathode relative sensitivity spatial distribution as function of wavelength, noting maximum shift from photoeffect contribution to photomultiplier current
19 p2800 A72-37821

Quenching of fluorescence and the photoeffect in anthracene crystals
19 p2847 A72-38782

PHOTOELECTRIC EMISSION

G and K giants atmospheric parameters determination by photoelectric indices, considering effective temperature, chemical composition and surface gravity
01 p0132 A72-11013

Lunar occultation light curve model for photoelectric data analysis, using least squares method
03 p0421 A72-13133

Photoemission from polyethylene, Kapton, Teflon and polyvinyl chloride under photon irradiation
03 p0403 A72-14084

Photoemission electron microscopy application to refractory metals and nonmetallic materials, discussing image formation and contrast enhancement problems
10 p1493 A72-23823

Photoemission from tetracene organic semiconductors due to electron capture defect ionization by excitons
11 p1700 A72-25785

Satellite surface coating materials photoemission properties, discussing reflectance, work function, photoyield and photoelectron energy distributions
12 p1844 A72-27280

Transparent dielectric surface photoelectric emission current under laser pulse illumination, noting correlation to surface treatment and damage threshold
12 p1822 A72-27613

Negative photoconductivity effect in high resistance n-type indium phosphide single crystals, noting photocurrent spectral distribution and I-V characteristics
13 p2022 A72-29647

Lightly doped InP and vapor epitaxial GaAs laser, observing long wavelength shift in photoemission spectra peak
14 p2108 A72-30182

Jupiter decametric radiation modulation by photoelectron emission by satellite Io, describing future probe experimental test

14 p2156 A72-30558

Photoelectric emission usefulness for investigation of energy parameters and optical transitions of semiconductor surfaces

15 p2276 A72-31865

Optical field emission effects on photoelectron emission nonlinearity from metal cathode using ultrashort mode locked laser pulses

15 p2250 A72-32303

Report on photo-sheath calculations for the satellite GEOS.

17 p2553 A72-34629

Photoemissive properties of bismuth-cesium films

17 p2595 A72-34754

Undamped photocurrent fluctuations in CdSe single crystals

18 p2718 A72-36348

Quantitative microstructural measurements by room temperature photoemission electron microscopy, discussing relief contrast, edge effect, resolution and information depth

18 p2719 A72-36831

Angular distribution measurements of photoemitted electrons for InAs by means of magnetic field.

19 p2843 A72-37406

Low light level optics for image forming photoemissive sensors, discussing refractive and catadioptric lenses and reflective systems with magnetic focusing

20 p2921 A72-39029

Photoemissive method of recording Mertz shadowgrams and vibrating electrode technique for reading out images in reconstruction of X ray sources original distribution

21 p3051 A72-40219

I-V, spectral and temperature characteristics of autophotoelectron emission in p-type silicon cathodes with varying acceptor concentrations

21 p3098 A72-41692

Photoelectron energy distributions from clean polycrystalline W, observing surface state

22 p3190 A72-42477

Photoemission from surface states on tungsten.

22 p3190 A72-42478

Investigation of the nature of photostimulated exoelectronic emission during the friction of precision contacts

22 p3183 A72-43158

Photoemission studies of wurtzite zinc oxide.

24 p3432 A72-45387

PHOTOELECTRIC GENERATORS

Au film optical refractivity, absorptivity and transmittance in visible and UV ranges of Au-GaAs and Au-GaP photoelectric converters

14 p2141 A72-30224

Determination of the quality of the reflective properties of mirrors used in photoelectric converter assemblies

17 p2498 A72-35510

Investigation of the dependence of the electrical characteristics of a 'Fotovolta'-type high-voltage matrix photoconverter on the radiation intensity and temperature

17 p2498 A72-35511

PHOTOELECTRIC MATERIALS

Preparation and properties of nonheat-treated single crystal Cu₂S-CdS heterojunctions.

17 p2595 A72-35331

PHOTOELECTRIC PHOTOMETRY

U ELECTROPHOTOMETERS

PHOTOELECTRICITY

Interference polarization filter by modulation and phase detection for passband narrowing and secondary maxima attenuation, discussing application to photoelectric recording system

03 p0356 A72-13096

Interference polarization filter by modulation and phase detection for passband narrowing and secondary maxima attenuation, discussing application to photoelectric recording system

11 p1632 A72-25708

Weak signals detection at visible wavelengths with background noise, examining photoelectric recording and optimal detection characteristics of receiver

11 p1596 A72-26314

Photoelectric properties of cadmium telluride thin film solar cells, discussing energy gap temperature dependence, work function and current variations anomalies

12 p1756 A72-28018

High resolution angular velocity measurement by high speed digital transducer feeding photosensor pick-up pulses into pulse shaping circuit

14 p2103 A72-30199

Procedure for the calibration of photoelectric components in the IR spectral range

18 p2693 A72-37005

A photoelectric method for measuring the temperature pulsations of solids

19 p2799 A72-37664

Rational selection of structures and parameters for photoelectric meters and follow-up systems

19 p2801 A72-37964

Influence of a surface space charge on certain photoelectric properties of p-type gallium arsenide

21 p3098 A72-41684

Electroconductivity anisotropy effect on transverse Demer effect angular dependence and spectral distribution in p-type CdSb lattice

21 p3098 A72-41693

Effect of the video signal shaping mechanism in a photosensitive scanistor sensor on the optical data processing accuracy

21 p3058 A72-41735

Automatic coaxial alignment system with photoelectric positioning sensors, discussing alignment errors as function of light source distance and components spacing

21 p3059 A72-41817

PHOTOELECTROMAGNETIC DETECTORS

U RADIATION MEASURING INSTRUMENTS

PHOTOELECTRONICS

U ELECTRONICS

U PHOTOELECTRICITY

PHOTOELECTRONS

Ionspheric photoelectron fluxes and motions simulated by Monte Carlo technique, including transport effects, elastic and inelastic collisions and energy losses

03 p0412 A72-13517

Energy transfer rate from photoelectrons to thermal electrons, presenting function of three independent variables

03 p0413 A72-13532

Molecular oxygen photoelectron spectra at autoionizing resonance frequencies, comparing with Franck-Condon calculations

04 p0552 A72-14892

Height profiles for volume emission rate and intensity of second positive band of nitrogen molecule excited by photoelectron impact, noting solar activity effects

04 p0518 A72-14962

Intensity-height profiles for molecular oxygen first and second negative bands in F region, using equilibrium velocity distribution of photoelectrons

04 p0518 A72-14963

Windowless ultrahigh vacuum photoelectron spectrometer for high resolution studies of gas-metal surface reactions, measuring electron energy levels

04 p0523 A72-15489

Molecular nitrogen photoelectron impact excitation of Herman-Kaplan upper electronic state, considering cascade contribution to low lying states in electron auroras and dayglow

06 p0806 A72-17647

Statistical model of signal amplitude distribution and thermoelectron noise of photoelectron multiplier

06 p0816 A72-17837

Photoelectron flux measurement of intensities of plasma lines in radar incoherent scatter spectrum by uhf radar

06 p0874 A72-18732

Phosphorus hydride electron affinity determination by electron photodetachment cross section measurement, using ion cyclotron resonance spectrometer

07 p0935 A72-19432

Thermostimulated autophotoelectron emission from Cr-alloyed p-type GaAs electrode, determining spectral distribution and light and electric field effects on current

08 p1216 A72-21071

Molecular X ray emission spectra interpretation based on singly ionized states observation by photoelectron spectroscopy and transition probability calculation

09 p1357 A72-22838

Rare earth elements outer electrons X ray and UV photoemission spectra interpretation by multiplet splitting of final state

09 p1371 A72-22844

Differential photoelectron flux in lower ionosphere during 7 March 1970 solar eclipse observed by Nike-Apache rockets

09 p1378 A72-23012

Differential photoelectron fluxes at 560 km altitude observed by OVI-18 satellite on 22 March 1969, noting latitudinal variation

09 p1378 A72-23013

Receivers for PPM optical communication and pulsed signal detection in background light, evaluating upper bounds on error probability based on photoelectron Poisson statistics

11 p1591 A72-25311

Conjugate point photoelectron flux measurements in ionosphere during 7 March 1970 solar eclipse, using retarding potential analyzer onboard Nike-Tomahawk rocket

12 p1801 A72-27153

Resonance scattering and direct photoelectron excitation contribution to molecular nitrogen first positive bands emission in day airglow from rocket measurements

13 p1953 A72-29808

Predawn airglow enhancement project, discussing magnetically conjugate photoelectron impact excitation observation and geophysical interpretation

14 p2098 A72-30147

Incoherent scatter and filter photometer search for 6300 A predawn enhancement by magnetically conjugate photoelectron impact excitation, comparing with ionospheric electron density

14 p2098 A72-30148

Solar UV Lyman alpha radiation intensity measurements, using Vertikal-1 rocket-borne photometer and photoelectron analyzer

14 p2128 A72-30465

Photoelectron precipitation induced dissociation of atmospheric nitrogen molecules during moderate solar activity

14 p2102 A72-30659

Radiative transfer equation application to ionospheric photoelectrons transport, predicting photoelectrons angular distribution and escape flux

16 p2444 A72-32963

Electrons angular distribution effect on photoionization branching ratio measurement by photoelectron spectroscopy

17 p2552 A72-34288

Report on photo-sheath calculations for the satellite GEOS.

17 p2553 A72-34629

Use of X-ray photoelectron spectroscopy to study bonding in Cr, Mn, Fe, and Co compounds.

18 p2657 A72-36568

Signal-to-noise ratio of a photodetector with a virtual cathode

21 p3055 A72-40802

Photoelectron energy distributions from clean polycrystalline W, observing surface state

22 p3190 A72-42477

Threshold characteristics of receivers with optical quantum amplifiers.

24 p3412 A72-45617

PHOTO GEOLOGY

Photogeological remote sensing of high voltage dc power transmission system induced ground current paths, discussing X-15 near IR photographic recordings

02 p0212 A72-11826

Satellite photographs of Himalayan-Indian Ocean tectonic patterns, showing major left and right lateral shear belts as evidence of wrench movements

05 p0655 A72-16046

Photointerpretation methods for earth resources and geological studies, discussing quantitative photogrammetric techniques, automation and digital evaluation methods

09 p1302 A72-23292

Black and white vs color photography application to photogeological interpretation of West Greenland Precambrian terrain

09 p1303 A72-23294

Photogeologic evidence of differentiation and deposition of lunar highland volcanic rocks at Apollo 16 landing site

12 p1866 A72-27115

The accuracy of the intermittent photographic film advance in the camera of an airborne thermal scanner.

18 p2692 A72-36697

PHOTOGRAMMETRY

Photogrammetry - Conference, San Francisco, September 1971

01 p0065 A72-10448

ERTS satellite return beam vidicon TV system and multispectral scanner images, describing photogrammetric and cartographic evaluations

01 p0065 A72-10449

Precision photogrammetric techniques coordinated with classical geodetic surveys for moderate cost control surveys, discussing error sources

01 p0065 A72-10455

Aerial triangulation for optimum photogrammetric project parameters, discussing flight altitude, bridging distance and control points for computerized optimization

01 p0066 A72-10462

Photogrammetric techniques for Tranquillity base experiment locations map based on surface and spacecraft photographs

02 p0280 A72-12198

Astronomical method of satellite photograph reduction in geodesy using photogrammetric technique

02 p0231 A72-12602

Urban area aerial photography survey for large scale photomaps, discussing building feature examination and universal stereophotogrammetric instruments utilization

03 p0362 A72-14311

Photogrammetric coordinate relation of points on lunar surface and stereo panoramas of scanning photographs by Luna 9 and 13 orbiters

05 p0660 A72-15832

Buffalo photographic aircraft for oil slick remote sensing, using aerial cameras and thermal IR scanner

05 p0658 A72-16600

A-7 D/E navigation/weapon delivery system flight testing, using photogrammetric technique
05 p0663 A72-16656

Lunar configuration, limb relief and coordinates of western hemisphere and far side from Zond 6 photograph reduction
05 p0721 A72-17040

Computerized photogrammetric terrain analysis and representation in three dimensional coordinates, discussing construction of digital terrain model
06 p0813 A72-17429

Interpolation in numerical photogrammetry by least squares method
06 p0815 A72-17752

Planiacart stereoplotter for map compilation and revision in photogrammetry
06 p0815 A72-17756

Satellite-borne multispectral photographic line-scan system with direct optoelectrical signal conversion for photogrammetric and cartographic applications
06 p0815 A72-17757

Film flatness in airborne cameras, reducing large area and short period photogrammetric deviations
06 p0815 A72-17758

Apollo 6 photogrammetric, photometric and neutron activation analysis of smoke plume, determining eddy diffusivity
06 p0819 A72-18439

Lunar center of mass position with respect to visible hemisphere physical surface calculated from photogrammetric analysis and Lunar Orbiter 1 data
08 p1232 A72-21158

Photogrammetric light beam refraction during aerial surveys, considering air pressure, temperature and humidity gradients in and out of camera carrier
08 p1165 A72-21161

Photogrammetric measurement with photodiode sensor arrays substitution for film in cameras and yielding real time readout of stellar and satellite coordinates
08 p1169 A72-21700

Terrestrial altitude differences effects on photogrammetric data accuracy in two step compensation with models
09 p1311 A72-22966

Rectification process for transformation of single photograph orientation into setting value, noting reduced accidental residual errors
09 p1311 A72-22967

Mean coordinate and distance errors in photogrammetric measurements of two neighboring models carried out by two image scales and four aerial cameras
09 p1311 A72-22969

Object reconstruction procedure in two- and multimedia photogrammetry involving image distortion by refraction on interfaces
09 p1311 A72-22970

Mitogenic and IR radiation and plant bioelectricity in photogrammetry, using metabolic energy-photoemulsion relation
09 p1312 A72-23283

Measurement accuracy and reliability of photogrammetric methods in stereoscopic height determinations of wooded areas
09 p1312 A72-23284

Photointerpretation methods for earth resources and geological studies, discussing quantitative photogrammetric techniques, automation and digital evaluation methods
09 p1302 A72-23292

Aerial photography and photogrammetry objectives and requirements for natural resources surveys
09 p1304 A72-23312

Mathematical model of block adjustment and star coordinate accuracy in photographic astrometry
09 p1392 A72-23541

Apollo mapping camera system synchronized laser altimetry utilization in astro-photogrammetric triangulation
12 p1872 A72-27816

Film flatness in airborne cameras, reducing large area and short period photogrammetric deviations
12 p1809 A72-27818

Photogrammetric camera system imaging characteristics comparison with aerial reconnaissance, multispectral and return beam vidicon systems, noting economic benefits due to smaller scale imagery
12 p1805 A72-27819

Large scale mapping by photogrammetric method based on contour points of outdated small scale aerial survey photographs, noting root-mean-square errors
13 p1959 A72-29633

Algorithms for photogrammetric model coordinates variance and covariance estimation, considering convergence properties
16 p2384 A72-33029

Three dimensional transformation for continental scale geodetic grids photogrammetry by satellite method, noting scale alteration and Euler angles determination
16 p2387 A72-33799

Photogrammetric light beam refraction during aerial surveys, considering air pressure, temperature and humidity gradients in an out of camera carrier
17 p2552 A72-34452

Holographic photogrammetry and cartography
17 p2555 A72-35184

Epipolar scanning to convert image correlation from two dimensional to one dimensional task for application to photogrammetric automation
18 p2691 A72-36492

Nonholographic coherent optical correlation for automatic stereoperception.
18 p2691 A72-36493

The precision-processing subsystem for the Earth Resources Technology Satellite.
18 p2674 A72-36497

A new computer-assisted stereocomparator.
18 p2664 A72-36499

Russian book - Refraction of light rays in the atmosphere
19 p2834 A72-37448

Holography application in photogrammetric contour mapping, discussing topographic data acquisition, storage, retrieval and display problems
19 p2797 A72-37609

Lunar center of mass position with respect to visible hemisphere physical surface calculated from photogrammetric analysis and Lunar Orbiter 1 data
20 p2969 A72-39263

Aerotriangulation by simultaneous adjustment of photogrammetric and geodetic observations /SAPGO/ incorporating geodetic distances, horizontal angles, Laplace azimuths, longitudes, latitudes and elevation differences
20 p2927 A72-39738

Photogrammetric refraction equation and integral interpretation for actual atmosphere, climate and weather conditions suitable for photographic flights
20 p2927 A72-39739

The measurement of three-dimensional body movements by the use of photogrammetry.
20 p2898 A72-39806

Photogrammetric method for determining the deflection of light beams by spacecraft windows during flight
21 p3052 A72-40305

Russian book - Stereophotogrammetric processing methods for photographs made from a mobile basis.
22 p3175 A72-40205

Investigations regarding the condition of normal equations in the case of block triangulation according to the bundle method. I
23 p3284 A72-43632

Coordinates of features on the Mariner 6 and 7 pictures of Mars.
24 p3436 A72-44695

Improvement of an algorithm for the rejection of points in the solution of a mutual orientation problem on a digital computer
24 p3401 A72-44861

Determination of the covariance matrix of the spatial coordinates of points of a geometrical model
24 p3397 A72-44867

PHOTOGRAPH INTERPRETATION
U PHOTINTERPRETATION
PHOTOGRAPHIC DEVELOPERS
Astronomical photographic emulsions and phenidonehydroquinone developer relative detective quantum efficiency measurements
03 p0352 A72-13007

Developers evaluation for processing of photoresist used in hologram recording
12 p1812 A72-27956

PHOTOGRAPHIC EMULSIONS
NT NUCLEAR EMULSIONS
Astronomical photographic emulsions and phenidonehydroquinone developer relative detective quantum efficiency measurements
03 p0352 A72-13007

Surface phase holograms recorded on materials with depth removal effect on exposure, noting emulsion thickness effect on image quality
03 p0359 A72-13449

Amplitude holograms diffraction effectiveness increase by conversion to phase holograms through photoemulsion bleaching, evaluating various bleaching agents effectiveness
05 p0663 A72-16614

Holographic measurement for optical transfer function of lenses, considering negative black and white photographic indicator emulsion effect
05 p0663 A72-16728

Scanned reference beam holography techniques with limited exposure time, noting use of hypersensitized photographic plates
07 p0985 A72-19418

Latent image formation in radiographic emulsion of AgBr crystals dispersed in gelatin layer, considering crystal structure and X and gamma rays energy recording
07 p0991 A72-20424

Two point analysis of phase, coherence and emulsion response effects on holographic image resolution
08 p1168 A72-21698

Hologram diffraction efficiency for bleached high resolution photoemulsions for blue line of He-Cd laser
09 p1311 A72-22964

PHOTOGRAPHIC FILM
Ecological study of damp wasteland according to seasons and with various photographic emulsions
09 p1303 A72-23293

Photopolymers formulations and processing for holography applications, discussing sensitivity, keeping and reciprocity properties
10 p1482 A72-24566

Impurity centers formation and development in AgBr/I₁ photographic emulsion under ultrasonic irradiation
11 p1636 A72-26794

Crowded photographic emulsions, predicting granularity of multilayer sandwich as function of layers number
12 p1808 A72-27676

Photoemulsion diffraction efficiency from latent holographic image signal formed during beam incidence on one or both photoplate sides
13 p1959 A72-29685

Aerial survey camera with automatic exposure control, discussing film emulsions sensitivity characteristics, object light intensity range and measuring methods
14 p2105 A72-30839

Emulsion response and phase effects on two point resolution in coherent holographic imaging systems, using Rayleigh criterion
15 p2237 A72-32058

Harmonics, intermodulation noise and small signal effects in discrete image points holographic recording on photopolymer material characterized by linear phase shift vs exposure
15 p2238 A72-32158

Resultant modulation transmission function of projection photometry photographic materials, discussing techniques for resolution and sharpness
16 p2392 A72-33364

Holographic image reconstruction using He-Ne laser as coherent light source and black-white and color photographic emulsions
17 p2554 A72-34930

Holographic interferometry application to weak inhomogeneities visualization in gas flows, using photographic emulsion nonlinear properties
17 p2558 A72-35893

Image forming mechanism in photographic silver halide emulsions due to incident optical signals, considering latent image amplification process efficiency
19 p2800 A72-37857

Investigation of certain complex compounds of triaryl phosphines /phosphites/ in optically sensitized photographic emulsions
21 p3052 A72-40390

Characteristics of the low temperature effect of an electric field on the sensitivity of photographic emulsions
21 p3053 A72-40391

PHOTOGRAPHIC EQUIPMENT
NT BALLISTIC CAMERAS

NT FRAMING CAMERAS
NT HIGH SPEED CAMERAS
NT LALLEMAND CAMERAS
NT PANORAMIC CAMERAS
NT PHOTOGRAPHIC PROCESSING EQUIPMENT
NT PHOTOGRAPHIC RECTIFIERS
NT SCHMIDT CAMERAS
NT TELEVISION CAMERAS

Camera slit lamp apparatus design for anterior eye diagnosis in two dimensional and stereoscopic photography and ophthalmic application
04 p0478 A72-14725

Photo-optical instrumentation - Conference, Tokyo, June 1970
06 p0812 A72-17426

The laser - A source of light in high speed photography
17 p2563 A72-35182

Optimum diopter value for a view-finder of photographic camera.
21 p3054 A72-40729

Measurement of the optical transfer function of an onboard objective in the space environment
24 p3403 A72-45225

PHOTOGRAPHIC FILM
NT MICROFILMS
Remote sensing photointerpretation tests, discussing film-filter combinations, image acquisition time, scale and detection accuracy
01 p0065 A72-10450

Photosensitive magneto-optic films for large capacity computer memories
01 p0035 A72-11316

Crimped films for object reconstruction and image storage, comparing performance to holographic films
01 p0073 A72-11318

Digital picture processing techniques for increased detail resolution, applying equidensity film methods [DFVLR-SONDDR-170]
02 p0229 A72-12018

Apodized Fresnel zone plate construction for solar X-ray image formation
03 p0354 A72-13047

High resolution CRT application to UV film recording and radar and X ray scanning

03 p0360 A72-13712

Visual film, TV and optical data systems unified classification for performance criteria based on equation similar to ideal imaging system description by Rose

03 p0329 A72-14188

Film flatness in airborne cameras, reducing large area and short period photogrammetric deviations

06 p0815 A72-17758

Real time hologram photosensitive materials, determining power requirements and resolution for diffraction gratings in saturable absorbers and absorbing liquids

[CLEA PAPER 15.4] 07 p0984 A72-19397

Automatic photoelectric device for measuring internal stresses and deformations of photographic films

07 p0988 A72-19861

Electron photon cascade energy measurement by photometering blackened spots on X ray films

07 p0988 A72-19870

Commercial radiographic system with data enhancement based on monochromatic blue film, noting image quality and exposure range

07 p0991 A72-20425

TV tube type image sensors to replace photographic film for space telescope, discussing design and performance

08 p1169 A72-21956

Multiband aerial photography application to vegetal cover determination, evaluating film types, seasons and scales

09 p1302 A72-23287

Terrain evaluation by aerial imagery, discussing various film types for conventional visible and IR black and white and color photography, thermal IR and/or radar

09 p1303 A72-23303

Pulsed laser sensitometer using multiple imaging technique to retrieve average energy distribution from photographic plate optical density

09 p1325 A72-23346

Diffraction efficiency of phase holograms formed by surface deformation of light sensitive dichromated gelatin films

12 p1808 A72-27600

Film flatness in airborne cameras, reducing large area and short period photogrammetric deviations

12 p1809 A72-27818

Radiation transfer equations solved in isotropic light scattering approximation, relating transfer function to motion picture film optical properties

13 p1955 A72-28519

Photographic observation of satellites to sixth magnitude with K-24 aerial camera on Polaroid 3000 and 10,000 ASA film, recording time signals on magnetic tape

14 p2084 A72-30235

Modulated laser beam record wideband signals on photographic film, discussing noise sources and compensation methods for SNR improvement

15 p2248 A72-32039

Dynamic particle field in-line holographic recordings using IR film and p-n junction GaAs lasers

15 p2237 A72-32056

Thick phase holograms in dichromated gelatin, discussing physical properties requirements and reliable processing procedures

15 p2239 A72-32355

Thermoplastic photoconductor media for holographic recording, discussing structure fabrication techniques and performance

15 p2239 A72-32359

Recyclable holographic recording media performance parameters comparison to develop tradeoffs for storage and imaging applications

15 p2239 A72-32360

Photographic characteristics of high resolution film for Orion spaceborne astronomical observatory spectrograms, discussing aerospace environment effect on sensitivity and physicochemical properties

15 p2243 A72-32745

Off-axis hologram recording on thin bismuth film with picosecond pulse train from mode-locked Nd-glass laser

17 p2558 A72-35817

Digital image processing and interpretation of photographic film data

18 p2690 A72-36319

The accuracy of the intermittent photographic film advance in the camera of an airborne thermal scanner

18 p2692 A72-36697

Laser beam scanning and recording in two dimensional pattern on silver halide, evaluating systems performance based on signal response, granularity and noise characteristics

20 p2930 A72-39040

Production of holograms developed on a film by white light

21 p3053 A72-40392

Compensation of Fabry-Perot surface defects. II - Silicon oxide compensating layers

21 p3053 A72-40608

PHOTOGRAPHIC MEASUREMENT NT PHOTOGRAMMETRY

Forestry and agricultural applications of multiband photography, considering photointerpretation of black and white, color and IR photographs

01 p0057 A72-10459

Noncoherent moire contour-sum contour-difference and vibration analysis of three dimensional objects using grid projection and offset camera

03 p0358 A72-13438

Velocity measurement of glass particles emerging from plasma flame by high speed cine-streak photography

03 p0361 A72-13992

Meteor passage time determination by optical shutter with wedge-shaped blades for light flux periodic intersection and production of two discontinuous lines for identification

06 p0816 A72-17930

Brightness profiles of earth daytime horizon from Soyuz spacecraft photographic photometry, deriving atmospheric scattering coefficient relation to optical thickness vertical distribution

06 p0808 A72-18040

Photorecorder for burning rate measurements, consisting of electric motor driven film carrying rotating drum in slitted housing and flame front imaging optical system

06 p0817 A72-18215

Electron photon cascade energy measurement by photometering blackened spots on X ray films

07 p0988 A72-19870

High speed photographic pyrometer for surface temperature measurements on aerodynamic models during free flight in aeroballistic range

15 p2237 A72-32050

Slope angle determination with respect to photograph surface from visible horizon line configuration

15 p2238 A72-32123

High and medium energy molecular beam detection for large dispersion angle collision cross sections determination, using photographic plates

16 p2389 A72-33060

Displacement measurement from double-exposure laser photographs

17 p2564 A72-35751

Meteor passage time determination by optical shutter with wedge-shaped blades for light flux periodic intersection and production of two discontinuous lines for identification

18 p2693 A72-37155

Hering's law of equal innervation and the position of the binoculars

19 p2756 A72-37828

Exact positions of Mars as determined by the photographic method at Pulkovo in 1966 and 1967

19 p2859 A72-37914

Exact positions of Uranus for 1919 through 1969 according to photographic observations at Pulkovo and Tashkent

19 p2859 A72-37915

Catalog of individual motions of stars in the open star cluster NGC 6866 and vicinity

19 p2860 A72-37918

Computer processed Mars photographic positional measurements with Pulkovo normal astrophotograph in 1965

19 p2861 A72-37985

Surface tilt and vibration measurements by laser speckle pattern photography, comparing with moire fringes in strain analysis

20 p2930 A72-39032

Determination of corneal configuration by the measurement of its derivatives

21 p3055 A72-40745

Optical method for measuring the concentrations of axisymmetric gas jets

21 p3055 A72-40990

Comet integral brightness estimation by mathematical analysis of photometric characteristics

21 p3110 A72-41449

Ground observation for outer planets natural satellites ephemeris, using astronomic telescopes, photographic and plate reduction techniques

[ALAA PAPER 72-904] 24 p3443 A72-45426

PHOTOGRAPHIC PROCESSING

Drobyshev stereograph corrector operation for aerial photographs processing with transformed beam of stereoprojector

09 p1308 A72-22483

High efficiency low noise volume /Lippmann-Bragg/ holograms recorded on photographic plate, using bleaching-darkening procedure

11 p1629 A72-25316

Exposure conditions and film processing parameters effects on sensitivity, diffraction efficiency and SNR of holograms recorded with continuous and pulsed radiation sources

11 p1637 A72-26796

Allyl esters of phosphoric acid preparation and application as substitutes for heavy metal sulfides and silver compounds in single operation photographic process

16 p2392 A72-33363

Remotely sensed data processing by scanner/printer designed for photograph scanning, geometric correction and photographic printing of corrected image

18 p2691 A72-36495

Edge effect improved fringe definition on high contrast film by pseudo-solarization for polariscopes in photoelastic stress analysis

21 p3052 A72-40232

Separation and detection of signals in the presence of nonadditive noise

21 p3023 A72-41746

Photographic processing method for solar activity macrostructural distributions determination, suppressing minor and sporadic formations by defocusing technique

23 p3340 A72-44231

PHOTOGRAPHIC PROCESSING EQUIPMENT

Plateholder for on site wet processing of holograms in real time holographic interferometry, obtaining undistorted reconstructed image by liquid gate immersion

07 p0992 A72-20581

PHOTOGRAPHIC RECORDING

Absorption and exposure characteristics of silver halide photochromic glasses for hologram recording

01 p0068 A72-10622

Coronal events in 5303 A wavelength, discussing loops and arches and slow and fast events from photographic recordings

03 p0422 A72-13209

Target motion simulator with photographic recording of image velocity and motion compensation in cameras, discussing errors

03 p0356 A72-13226

Solar spectra photographic recording technique, using spectra-spectroheliography method with data reduction

03 p0429 A72-13313

Surface phase holograms recorded on materials with depth removal effect on exposure, noting emulsion thickness effect on image quality

03 p0359 A72-13449

Liquid breakdown and subsequent propagation by focused high power laser irradiation, presenting short term photography of event sequence

[AD-736005] 03 p0368 A72-13606

High resolution CRT application to UV film recording and radar and X ray scanning

03 p0360 A72-13712

Photomaterial nonlinear effects on contour distortion in holographic recording of Fourier image slit for graphic memory use

04 p0522 A72-15151

High speed photography and radiography applications to high explosives research, discussing shock wave visualization, illumination techniques for rapid processes time resolution, etc

06 p0813 A72-17436

Photo-optical techniques in biomedical data acquisition, discussing cineangiography and X ray tomography applications in cardiological research work

06 p0766 A72-17437

Self calibration of surveying cameras for three dimensional object photography without control points, using homologous ray method

06 p0815 A72-17754

Pulsed and hf electric field effects on ionizing particle recording in nuclear and photographic emulsions

06 p0816 A72-17833

Photorecorder for burning rate measurements, consisting of electric motor driven film carrying rotating drum in slitted housing and flame front imaging optical system

06 p0817 A72-18215

Photographic observations of W particle cluster high velocity impact against polystyrene, paraffin and W targets for energy dissipation in meteorite impact simulations

08 p1232 A72-21152

Three dimensional hologram recording and reconstruction, discussing image geometry, reference beam intensity, size finiteness, transition limits and photosensitive materials

08 p1166 A72-21399

Multibeam indicator with block diagram description for meteor ranging radar and photofilm based recording system

09 p1308 A72-22508

Time dependent phase modulation for high effective reference to object beam intensity ratio, noting linear recording of holograms

09 p1310 A72-22649

Vesicular films in electron and laser beam recording suitable for computer output microfilm duplication and graphic arts

10 p1488 A72-23930

Recording holographic networks in polycrystalline transparent ferroelectric ceramics of lead and lanthanum titanate-zirconate system

10 p1480 A72-24111

Ultrahigh strain rate measurement via diffraction gratings directly impressed into test material surface, recording outputs by high speed cameras or photoelectric techniques

10 p1487 A72-24573

Image dissector system fabrication for two dimensional area scanning, applying to photograph digitization
11 p1631 A72-25688

Holographic recording systems stabilization with intermittent exposure control for interference patterns fidelity
12 p1806 A72-27263

Multiple exposure hologram recording on photosensitive plate for extended reference-beam source
12 p1808 A72-27601

Photosensitive polymeric films for hologram recording with high diffraction efficiency, requiring low laser powers
12 p1808 A72-27602

Holographic interferometry for impact loaded object transient impulse response recording with double-pulse Q switched laser
12 p1809 A72-27761

Image deformation sources correction in space photography, discussing stationary and moving cameras and panoramic and complex sensing systems
12 p1809 A72-27817

Optical feedback exposure control mechanism of high resolution CRT film recorder intended for tactical military usage
12 p1810 A72-27932

Developers evaluation for processing of photoresist used in hologram recording
12 p1812 A72-27956

Involuntary head movement and helmet motion displacements during human centrifuge runs to 6 Gz from photographic recordings
12 p1766 A72-28288

Solar flare induced vortex ring formation, describing photographic observations by Okayama Astrophysical Observatory solar telescope on 30 October 1970
13 p2048 A72-29741

Noise suppression by time exposure oscilloscope photography to enhance repetitive electric signals obscured by noise of equal amplitude
13 p1959 A72-29754

Automatic digitizing and recording of analog information from oscilloscope photographs
13 p1959 A72-29755

Holographic diffraction grating production by impressing interference fringes with photographic procedure, using two laser beams
14 p2105 A72-30579

Three dimensional medium recording of multicolor holographic interferometry, comparing scale factor, spatial frequency and optical distortions with two dimensional medium
15 p2233 A72-31412

Two beam high speed frame holographic recording of dynamic processes, using passive shutter ruby laser with diaphragmed resonator
15 p2233 A72-31417

Time-average holography with thin phase recording materials, obtaining characteristic function solution for sinusoidal vibration and constant velocity motion
15 p2235 A72-31614

Modulated laser beam record wideband signals on photographic film, discussing noise sources and compensation methods for SNR improvement
15 p2248 A72-32039

Dynamic particle field in-line holographic recordings using IR film and p-n junction GaAs lasers
15 p2237 A72-32056

Harmonics, intermodulation noise and small signal effects in discrete image points holographic recording on photopolymer material characterized by linear phase shift vs exposure
15 p2238 A72-32158

Holographic information storage survey, discussing hologram classification, characteristics, physical recording processes, and capacity-limiting factors
15 p2239 A72-32351

Undoped lithium niobate for holographic storage applications, reviewing physics and recording performance
15 p2239 A72-32353

Off-axis phase holograms of photographic transparencies recording, comparing Fresnel, Fraunhofer and lensless Fourier transform holograms
15 p2239 A72-32358

Comet Tago-Sato-Kosaka /1969/ L alpha emission image recorded by f/2 objective-grating spectrograph aboard Aerobee rocket, discussing ice sublimation in nucleus
16 p2455 A72-33466

Stabilizing techniques for holographic recording.
17 p2556 A72-35416

Effect of photographic factors on the line intensities in the Fraunhofer spectrum of the sun
19 p2860 A72-37960

Optical design and production of low cost oscilloscope camera incorporating reliable setting for correct exposure and focus
20 p2921 A72-39031

Photographic observations of W particle clusters high velocity impact against polystyrene, paraffin and W targets for energy dissipation in meteorite impact simulations
20 p2969 A72-39257

Electronic circuit for linearizing the transfer function of a photographic plate used in mass-spectrometry.
20 p2925 A72-39428

Comparison of information takeoff from a shadow-indication instrument by television and photographic techniques
20 p2928 A72-40049

Production of holograms developed on a film by white light
21 p3053 A72-40392

Experimental investigation of a holographic system that records front surface detail from a scene moving at high velocities.
21 p3053 A72-40612

Dry photopolymer holographic recording film with ability to form images in near real time by exposure without processing
21 p3054 A72-40620

A large viewfield laser photographic system for in-flight model contour measurements in an aeroballistic range.
22 p3179 A72-42679

Scanning electron microscope stereophotographic picture synthesis from sequential holographic recording of three dimensional objects
23 p3290 A72-43904

Metallic solid material transient displacement field measurement by moire fringe photographic recording technique with computer program for data analysis
24 p3401 A72-44611

Studying hologram imagery by a ray-tracing method.
24 p3401 A72-44773

A new method for linear recording in holography retaining the reconstruction efficiency.
24 p3401 A72-44775

Simplified, low-noise processing technique for photographic phase holograms.
24 p3401 A72-44804

PHOTOGRAPHIC RECORDING INSTRUMENTS
U OPTICAL MEASURING INSTRUMENTS
U PHOTOGRAPHIC RECORDING
U RECORDING INSTRUMENTS

PHOTOGRAPHIC RECTIFIERS
A digital portable line-drawing rectifier.
18 p2692 A72-36500

PHOTOGRAPHIC TRACKING
WINDCO interactive man-computer system for automated cloud motion tracking using precisely aligned digital ATS satellite pictures
01 p0070 A72-10872

Systematic errors in scan-and-measure devices for tracking cameras photographs analysis, discussing correction during measurements
08 p1209 A72-21913

Pallada, Vesta, Irida and Harmony asteroids positions computed from observations with 400 mm photographic telescope
09 p1389 A72-23066

Camera shake under stress of tracking moving targets viewed briefly in poor light, considering blur in horizontal and vertical dimension
10 p1483 A72-24986

Photographic observation of satellites to sixth magnitude with K-24 aerial camera on Polaroid 3000 and 10,000 ASA film, recording time signals on magnetic tape
14 p2084 A72-30235

Radio meteor orbit inclination angle dispersions for semimajor axis intervals compared with photographic meteors
16 p2456 A72-33514

Error analysis of East European triangulation network photographic observations of Echo and Pagueos satellites from ground stations
16 p2387 A72-33798

Automated cloud tracking using precisely aligned digital ATS pictures.
17 p2521 A72-34411

Photographic observation of artificial earth satellites without the aid of time recording devices. II
17 p2517 A72-35384

The track method and its application in studies of atomized-fuel combustion kinetics
18 p2720 A72-36243

Accuracy of the determination of the positions of stars and artificial satellites from an aircraft
19 p2861 A72-37973

Triaxial mount for electrophotometric observations of satellites during their transit into the shadow of the earth
23 p3290 A72-44040

NT ULTRAVIOLET PHOTOMETRY

Silicon Schottky barrier photodiodes development for photographic, photometric and analytical instrumentation, comparing sensitivity, time response and fatigue characteristics with classical photodetectors
06 p0813 A72-17428

Holography applications and processes, discussing holographic microscopy, particle analysis, high speed photography, data storage and retrieval, interferometry, nondestructive testing, etc
07 p0989 A72-20221

New technique of image multiplexing using random diffuser.
21 p3050 A72-40145

Photographic material characteristics for adequate diffraction efficiency and contrast and noise levels and acceptable nonlinear distortions of holograms, noting optical transfer function optimization
21 p3052 A72-40389

PHOTOINTERPRETATION
Remote sensing photointerpretation texts, discussing film-filter combinations, image acquisition time, scale and detection accuracy
01 p0065 A72-10450

Agricultural land use analysis by remote sensing, discussing side-looking airborne radar systems and image interpretation for local needs
01 p0056 A72-10456

Forestry and agricultural applications of multiband photography, considering photointerpretation of black and white, color and IR photographs
01 p0057 A72-10459

Interpretation model for aircraft and spacecraft remote sensing of tropical agricultural systems
02 p0210 A72-11798

Sea waves energy spectra from optical Fourier analysis of ocean photographs under particular skylight irradiance
02 p0211 A72-11809

Southern corn leaf blight detectability by remote sensing based on pattern recognition technique application to multispectral color and IR photographic and scanner data
02 p0212 A72-11814

Small scale aerial photography use in regional agricultural survey, discussing equipment used, sampling techniques and data collection and interpretation
02 p0213 A72-11835

Spectral texture effects on remotely sensed high altitude automatic IR image interpretation, using Bayesian probability techniques
02 p0228 A72-11873

Land pattern mapping from monoisimagery analysis, using coordinate digitizer system with planimetric computer input
02 p0187 A72-11874

Crop, soil and geological mapping from digitized multispectral satellite photography, discussing data processing requirements and surface features distinguishable from satellite altitudes
02 p0214 A72-11876

Thermal modeling for IR images geologic interpretation, discussing physical parameters role in materials natural environmental diurnal temperature behavior
02 p0214 A72-11877

Natural formation interpretation from spectrophotometric measurements of underlying earth surface from manned spacecraft Soyuz 7 and Soyuz 9
02 p0228 A72-11887

Hyperaltitude photography evaluation for geological mapping, comparing Gemini 4 and aerial photographs
02 p0216 A72-11891

Urban geographic social-spatial pattern determination with aerial photographic interpretation
02 p0229 A72-12019

Quantitative reliability criteria for aerial photo decoding, noting dependence on observation time
02 p0229 A72-12172

Satellite photograph interpretations, discussing wind direction indication, cloud structure, automatic mapping and hydrographic exploration
03 p0351 A72-14306

Book on aerial photoecology covering aerial survey images interpretation, processing and printing operations and economic considerations

04 p0514 A72-14572

Panoramic aerial cameras with revolving objective or mirror, presenting formulas for photoimage plots geometric characteristics

09 p1308 A72-22487

Photointerpretation - Conference, Dresden, Germany, September 1970, Parts 1 and 2

09 p1301 A72-23276

Aerial photography interpretation for studies of natural environment and resources

09 p1312 A72-23277

Multifactor landscape synthesis of aerial imagery for regional surveys

09 p1301 A72-23278

Aerial photointerpretation for landscape analysis with respect to agricultural land use, considering geomorphologic, hydrographic, soil and microclimatic conditions

09 p1301 A72-23280

Urban geography of U.S. cities on vertical aerial photography, considering site, location, street orientation, expansion, business districts and transportation networks

09 p1301 A72-23281

False color aerial photographs interpretation for cultivated wooded area inventory

09 p1302 A72-23282

Multiband color aerial photography interpretation for forest appraisal in U.S.S.R.

09 p1302 A72-23285

Color aerial photographs interpretation for forest tree type composition determination, comparing to IR sensitive black and white films

09 p1302 A72-23286

Multiband photointerpretation of forested land units, using aerial black and white photographs and film-filter combinations

09 p1302 A72-23288

Aerial photointerpretation in forest administration, discussing electronic data processing methods

09 p1302 A72-23291

Photointerpretation methods for earth resources and geological studies, discussing quantitative photogrammetric techniques, automation and digital evaluation methods

09 p1302 A72-23292

Ecological study of damp wasteland according to seasons and with various photographic emulsions

09 p1303 A72-23293

Black and white vs color photography application to photogeological interpretation of West Greenland Precambrian terrain

09 p1303 A72-23294

Education and training of personnel for photointerpretation, discussing psychological, physiological and methodological aspects of aerial photointerpretation

09 p1272 A72-23298

Psychological aspects in aerial photointerpretation, discussing importance of perception of image contrast, contours and areal distribution

09 p1272 A72-23299

Internal and integral aerial photointerpretation, discussing enhancement of information quality, quantity and reliability through participation of experts in various specialized fields

09 p1303 A72-23300

Spatial filtering techniques and numerical classification methods for pattern recognition in automated photointerpretation

09 p1312 A72-23305

Sea depth determination in coastal waters based on solar reflection aerial photographs interpretation, presenting formula as function of swell parameters

09 p1303 A72-23307

Automation of aerial photointerpretation based on application of photometric, microdensitometric and digital computer technology

09 p1313 A72-23308

Topographical stereo map plotting apparatus with auxiliary device for orthophoto production, describing design for combined photointerpretation-cartographic applications

09 p1313 A72-23309

Optical image filtering to simplify and facilitate automatic aerial photointerpretation processes

09 p1313 A72-23310

Color interpretation of pedological factors from aerial photographs in relation to agricultural seasons and use of panchromatic and false color emulsions

09 p1304 A72-23313

Terrain evaluation for engineering purposes through aerial photointerpretation in terms of physiography, geology, soil and vegetation

09 p1304 A72-23314

Three stage retinal model for visual monitoring method applied to computerized photointerpretation of aerial photographs

09 p1284 A72-23624

Atmospheric vertical shear at visible cloud level in Jupiter equatorial zone from blue and red wavelength photographs

10 p1531 A72-23712

Remotely sensed imagery data photointerpretation by gray tone texture context feature extraction, noting identification accuracy

10 p1442 A72-23812

Analog computer for practical evaluation of hologram interference fringes, analyzing errors

12 p1811 A72-27940

High speed photographic analysis of spot welding galvanized steel, observing three stage process

13 p1958 A72-29421

Photointerpretation and computerized radiometric analysis of ERTS multispectral TV and scanner imagery of Israel

15 p2221 A72-31242

Geographical interpretations of ESSA and Nimbus weather satellite pictures for earth resources applications, noting ERTS project

15 p2221 A72-31248

Exposure calibration, orientation and point coordinate distortions in aerial photographs from one or two camera stations

15 p2240 A72-32378

Texture measurements in earth resources data management system by automatic photointerpretation with analog and digital techniques, discussing data processing rate requirements

17 p2520 A72-34409

Screen equidensities in aerial photograph interpretation

17 p2555 A72-35337

Texture synthesis by image processing equipment consisting of digital computer and input/output unit, noting image signatures of constant parameter areas

17 p2555 A72-35338

Psychophysical information content evaluation of aerial photographic images by human viewer for photointerpretation and search in reference library

20 p2894 A72-39042

Investigation of the structural content and the determination of the optimal image of focus series in light and electron microscopy with the aid of Fraunhofer diffraction /structure spectroscopy/

21 p3055 A72-40747

Waterways outfall detection from color and IR color aerial photography, describing photointerpretation technique

22 p3181 A72-43197

Earth resources technology satellites /ERTS/ program requirements, considering coverage, spectral characteristics, system performance, photographic interpretation and information extraction

24 p3398 A72-45115

Detection of waste water effluents and of their surface spread in the English channel, the North sea and the Baltic sea, through determination of the surface temperature of the sea by means of infrared air pictures taken by satellites

24 p3398 A72-45223

PHOTOIONIZATION

Eta Carinae model with IR spectrum details described by compact H II region photoionized by hot massive star radiation

02 p0277 A72-11668

Altitude, photon wavelength and solar activity effects on photoionization yield of ionospheric monatomic and diatomic oxygen and nitrogen via Monte Carlo simulation

03 p0345 A72-12983

Series summations for perturbation theory of multiple photon ionization probabilities of atoms applied to hydrogen and helium

03 p0391 A72-13080

Formaldehyde photoionization and absorption spectrum measurements in vacuum UV region, using single configuration self consistent field procedure for Rydberg states and model

03 p0321 A72-13856

Fe group transition metal impurities in semiconductors, calculating ground state wave functions and photoionization cross section dependence on wavelength

04 p0563 A72-15473

Quasar photoionization and emission line spectra, determining radiation/gas density

05 p0720 A72-16713

Molecular Cs role in multiphoton ionization process during interaction with low intensity Q switched Nd-glass laser radiation

05 p0670 A72-17082

Ar core polarizability effect on photoionization cross section calculation for ground state configuration

05 p0693 A72-17173

Fast ionization fronts ahead of laser produced plasma expansion into low density gas, noting Langmuir probe and microwave diagnostics indication of photoionization density augmentation

06 p0864 A72-18532

Atomic selective two step photoionization and molecular photodissociation by tunable laser radiation, experimenting on Rb vapor and HCl respectively [CLEA PAPER 12,4]

07 p1005 A72-19395

Vibrationally excited nitrogen photoionization spectrum obtained with quadrupole mass spectrometer in flowing nitrogen afterglow

07 p1037 A72-19434

Methanol and formaldehyde photoionization by UV irradiation, determining ion yields as function of wavelength by mass spectrometric analysis

07 p1038 A72-20498

Diatomic oxygen and carbon dioxide density profiles effects on photoionization rates in D region [AD-741091]

09 p1274 A72-22356

Model calculation for electron production rates due to photoionization and particle precipitation below 100 km at midlatitude during solar minimum and maximum years

09 p1375 A72-22357

Ultrasoft X ray absorption spectra features of inner atomic shell photoionization in molecules

09 p1356 A72-22827

Effective photoionization sections of neutral atoms, discussing photon energy effects, subshell periodicity and continuum functions phase shift

09 p1356 A72-22828

Molecular gases absorption coefficients measurement in extreme UV, analyzing photoionization curves in energy range far beyond threshold

09 p1356 A72-22829

Absorption by Nd laser generated ionized Al plasma of extreme UV radiation due to inverse bremsstrahlung and photoionization

09 p1360 A72-22831

Excitation accompanying photoionization in atoms and molecules and relationship to electron correlation observed from rare gases inner and valence shell satellite lines measurements

09 p1356 A72-22835

Ultrasoft X ray region photoionization absorption spectra features of inert gases, solids, rare earth elements and transition metals

09 p1357 A72-22845

Photoionization cross sections for atoms and ions of Al, Si and Ar on basis of Hartree-Fock bound-electron and close coupling approximation free-electron wave functions

10 p1516 A72-24669

Critical shock wave velocity for ionization front propagation with photoionization of hydrogen by radiation, using pinch discharge tube measurements [ATA PAPER 72-410]

11 p1706 A72-26161

Population inversion through metastable ion formation by atomic inner shell electrons photoionization, determining effectiveness relationship to emission source plasma composition

11 p1648 A72-26332

Equatorial F region photoionization and chemical loss rates for electrons from simultaneous observations of vertical drift velocity and electron concentration, deriving plasma transport

13 p1949 A72-29336

Perturbation theory of hydrogen and helium atoms multiphoton ionization probabilities, proposing series summation method

13 p2007 A72-29430

Ionospheric oxygen ions loss rate in charge exchange reactions with hydrogen, molecular nitrogen and oxygen and atomic oxygen photoionization rate

13 p1953 A72-29811

Vertical distribution of atomic nitrogen ions in F region produced by dissociative photoionization and charge transfer, suggesting undiscovered source at 300 km altitude

13 p1954 A72-29815

Absorption coefficient of H-He plasma measured in temperature and electron density range of inverse bremsstrahlung and photoionization absorption

15 p2284 A72-31522

Precursor photoionization production of ionization onset point equivalent electron number densities, calculating phenomenon occurrence Mach number

15 p2281 A72-32407

Hydrogen direct photoionization and photoexcited autoionization cross sections calculation for radiation in 600-800 A region

16 p2431 A72-33579

Oscillator strength and ground state photoionization cross sections computation for Na, K, Rb and Cs atoms, including core polarization correction to dipole moment

16 p2431 A72-33724

Electrons angular distribution effect on photoionization branching ratio measurement by photoelectron spectroscopy

17 p2552 A72-34288

Photoionization models for the emission-line regions of quasi-stellar and related objects.

17 p2605 A72-34527

Cs vapor photoionization by sequential method via thermally tunable Ga-As laser and arc-lamp monochromator radiation

17 p2585 A72-34614

Photoionization of a gas by far ultraviolet radiation of a laser-created plasma 17 p2588 A72-34872

Brueckner-Goldstone many-body perturbation calculation of helium photoionization. 17 p2586 A72-35773

Excited-state cesium photoionization cross sections. 19 p2837 A72-37838

Effect of spatio-temporal laser light structure on multiphoton ionization. 20 p2934 A72-39814

Absorption spectra in the far ultraviolet of Be, B, C, N, Mg, Al, and Si 21 p3013 A72-40818

Coulomb approximation method for photoionization cross sections of hydrogen molecule singly excited states 22 p3208 A72-42718

Drift velocities, diffusion coefficients, and temperatures of photoions in argon, nitrogen, and oxygen 22 p3209 A72-42926

The ionization of caesium vapour by the method of space charge amplification. 23 p3316 A72-44344

Photoionization and photoabsorption cross sections of CO₂ at 584 Å. 23 p3317 A72-44519

Model potential calculations of lithium transitions. 24 p3426 A72-44808

Calculation of photoabsorption processes in helium. 24 p3426 A72-45012

Initiation of a detonation by a laser beam focused in a gaseous medium 24 p3410 A72-45026

Photoionization of N₂, O₂, NO, CO, and CO₂ by soft X rays. 24 p3426 A72-45302

Multiphoton dissociation, predissociation, and autoionization of the hydrogen molecule. 24 p3427 A72-45476

Photoionization and photoabsorption cross sections for ionospheric calculations. 24 p3400 A72-45590

PHOTOLUMINESCENCE

NT X RAY FLUORESCENCE

Photoluminescence of Er cations in CdS, observing group I co-dopants sensitizing behavior and broad-band emission spectra 04 p0563 A72-15472

IR luminescence and photoconductivity in p-type GaSe single crystals alloyed with Sn and Ge impurities 08 p1216 A72-21069

Radio luminescence of an yttrium-aluminum garnet activated by rare-earth elements 19 p2845 A72-38181

Photoluminescence and photoconductivity of hole-type cadmium telluride single crystal films 19 p2845 A72-38403

Low-temperature photoluminescence of GaAs under conditions of strong interaction of the non-equilibrium carriers. 19 p2847 A72-38821

PHOTOLUMINESCENT BANDS

Annealing behavior of electrical properties and photoluminescence spectra in electron irradiated n-type GaAs semiconductors 12 p1859 A72-28068

Quantum efficiency and radiative lifetime of the band-to-band recombination in heavily doped n-type GaAs. 19 p2844 A72-37947

PHOTOLYSIS

NT RADIOLYSIS

Hydrogen iodide flash photolysis in presence of nitrous oxide, carbon dioxide and water investigated by kinetic spectroscopy, observing imidogen as intermediate reaction product 01 p0023 A72-11114

Micrometer particle formation by water vapor photolysis at 1500-1700 Å, noting particle production rate and implications to planetary atmosphere physics 02 p0220 A72-12207

Ozone photolysis in UV region, determining primary products from oxygen optical emission detection using time-resolved flow system 03 p0320 A72-13394

Flash photolysis HF chemical laser pulse delay measurements, showing pressure, flash lamp intensity and optical cavity loss dependence 05 p0668 A72-16606

Sunlight irradiated atmosphere formaldehyde photolysis as hydrogen atom source, estimating photodecomposition rates from extinction rates and photochemical results 08 p1230 A72-20981

Chemistry and performance characteristics of flash photolysis and microwave discharge initiated CW carbon disulfide/oxygen lasers 09 p1325 A72-23236

Fast coaxial flash lamp pumped liquid dye laser /LDL/ for photolysis and biophysical and biochemical applications 09 p1326 A72-23406

Molecular process and pressure effects on hydrogen formation in methyl acetylene photolysis at 1236 Å 11 p1590 A72-26011

Carbon monoxide quantum yield measurements of carbon dioxide photolysis by radiation at 1470 and 1500-1670 Å 11 p1590 A72-26423

Ozone photochemical reactions measurements for quantum yield of UV photolysis in strong Hartley band with water vapor chain decomposition effects 14 p2083 A72-30134

Molecular iodine photolysis in photodissociative laser due to selective pumping, noting recombination-like storage mechanism 14 p2110 A72-30354

Absolute rate constant for the reaction H + H₂CO. 17 p2511 A72-34739

Nitrous oxide production from ozone photolysis reaction with molecular nitrogen 19 p2762 A72-38753

Ammonia photolysis and the role of ammonia in chemical revolution. 20 p2898 A72-39375

Pulsed photoexcitation /flash photolysis/ spectrophotometers in terms of light sources, recording sensitivity enhancement, data processing, laser use and performance requirements 21 p3058 A72-41726

PHOTOMAGNETIC EFFECTS

Carrier mobility measurement in inhomogeneous semiconductors based on bulk photovoltaic and photomagnetolectric effects 03 p0402 A72-13862

Determination of electron and hole capture rates in nickel-doped germanium using photomagnetolectric and photoconductive methods. 24 p3432 A72-45388

PHOTOMECHANICAL EFFECT

Electromechanical, photomechanical and concentration effects of impurities in semiconductors 21 p3098 A72-41677

PHOTOMECHANICS

PHOTOMETERS

NT ELECTROPHOTOMETERS

NT ULTRAVIOLET SPECTROMETERS

NT ULTRAVIOLET SPECTROPHOTOMETERS

Absolute UV calibration of rocket photometers used to update OAO calibration for determining energy distribution of reference stars 03 p0355 A72-13065

Real time analog video magnetogram, describing differential photometer for electronic subtraction technique 03 p0357 A72-13286

Light distribution photometry in Japan, discussing photometers, luminous flux integration and source distribution and positioning errors 03 p0358 A72-13426

Radiation thermometry trends, considering photodetectors, optical pyrometers and filters [ASME PAPER 71-WA/TEMP-3] 05 p0661 A72-15909

Incoherent optical system model with photodetectors governed by Laguerre counting statistics obtaining error probabilities for comparison with Poisson counting 06 p0776 A72-18394

Photometer using rotating wedge interference filter as wavelength scanning element near 6300 Å for high altitude sounding rocket application 07 p0985 A72-19403

Intercosmos 4 solar radiation equipment, including Lyman, optical and X ray photometers, spectroheliographs, polarimeters and optical orientation system 07 p0986 A72-19643

Spherical scatterers extinction efficiency effect on photometer optical systems transmittances, using Mie equation and numerical methods 07 p0987 A72-19831

Photometers with CdS cells, discussing calibration difficulties 07 p0992 A72-20584

Sensitivity threshold of optical heterodyne receiver as function of laser radiation amplitude spectrum, using photodetector output noise 08 p1181 A72-20794

Integrating two dimensional silicon diode array vidicon astronomical photometer for telescope use 09 p1313 A72-23330

Integrating silicon target vidicon photometer for two dimensional photometric images of planets and stars 11 p1631 A72-25686

Helios solar probe-borne zodiacal light photometer for diffuse light measurements in interplanetary space 11 p1632 A72-25805

Image tube /TV/ and scanning photometer sensor comparison for outer planet mission onboard navigation 15 p2270 A72-32192

Spectrophotometers and photometers calibration and standardization, emphasizing necessity for periodic control of instrument parameters 16 p2394 A72-33872

Book on Soviet astronomical reflecting telescopes, paraboloid mirrors, computer control, microphotometers and image converters 17 p2553 A72-34623

Performance of a modified Askania iris photometer. 18 p2692 A72-36768

Low temperature interference filter design for atmospheric windows far IR photometers based on selective restrahlen reflection of crystals 19 p2796 A72-37586

A system for programmed control of the motion of the carrier of a microphotometer along two coordinates 19 p2801 A72-37966

Airglow observations with a Hadamard photometer. 22 p3169 A72-42023

NT ULTRAVIOLET PHOTOMETRY

NT VISUAL PHOTOMETRY

Silicon Schottky barrier photodiodes development for photographic, photometric and analytical instrumentation, comparing sensitivity, time response and fatigue characteristics with classical photodetectors 06 p0813 A72-17428

Apollo 6 photogrammetric, photometric and neutron activation analysis of smoke plume, determining eddy diffusivity 06 p0819 A72-18439

Nondestructive tests of welded joint heterogeneities and corrosion cavities by densitometric photometric differentiation of radiographs 07 p0995 A72-19674

Photometric monitoring of film thickness of stacked structures for high strength and laser flux resistance 07 p1049 A72-20126

Light emitting diodes for efficient conversion of electrical energy into electromagnetic radiation, discussing photometry, electrical injection, electroluminescence, design and applications 08 p1141 A72-21430

Automation of aerial photointerpretation based on application of photometric, microdensitometric and digital computer technology 09 p1313 A72-23308

Visual and automatic stereometric image analysis, citing minimum measurable contrast thresholds for various devices 10 p1478 A72-23826

Flame photometric detection of small concentrations of sulfur compounds in ambient air, describing spectrum scanning detector, rotating interference filter and correlation detector 10 p1480 A72-24101

Photometric determination of Mo in Ni based steels and alloys in molybdenum-unithiol complex form, noting temperature and aqueous solution pH effects 12 p1828 A72-27445

Disturbance-induced lunar surface darkening due to soil photometric function changes resulting from particle rearrangement 13 p2037 A72-28994

Operating conditions of photometers for optimum photomultiplier photon counting photometry, considering measurement precision dependence on experimental parameters 14 p2105 A72-30733

Whole blood flow dependence on optical density from light transmission measurement, showing photometric effects of red cell aggregation, deformation and orientation 15 p2185 A72-31639

Nike-Apache rocket-borne particle collection and photometry of noctilucent clouds, obtaining single-shadowed particle size distributions and inflight shadowing surface data 15 p2226 A72-31923

Daytime zodiacal light intensity and polarization measurement at elongation angles between 15-30 degrees from Skylark rocket photometric observations 15 p2227 A72-31951

Report to COSPAR on Netherlands space research covering solar and stellar radiation, cosmic gamma and X rays, photometry and satellite geodesy 15 p2338 A72-32010

Resultant modulation transmission function of projection photometry photographic materials, discussing techniques for resolution and sharpness 16 p2392 A72-33364

Microphotometric chemiluminescence measurement for analysis of turbulent flame fine structure for homogeneous air-fuel mixtures at high Reynolds numbers 16 p2479 A72-34005

Photocolorimetric determination of boron in nickel and titanium borides via Magnezone I in alkaline medium, determining solution pH, reaction time, light absorption, etc 18 p2655 A72-36099

Luminance profiles photometry for axisymmetrical propagation in propane-air turbulent flow combustion with turbulence level control in jet core

19 p2879 A72-37366

German monograph - A photometric method for measuring the concentration distribution in turbulent boundary layers

19 p2799 A72-37652

Photometric observations from sounding rockets - Selection of horizontal sightings

19 p2789 A72-37784

Auroral photometric observations at geomagnetically conjugate points.

22 p3169 A72-42020

Objective-prism plates photometric computerized calibration method based on continuum energy distribution of standard stars within photographic plate field

22 p3177 A72-42376

German monograph - A hologram interferometer for the determination of amplitude and phase of optical excitation in diffraction patterns.

22 p3181 A72-43056

PHOTOMICROGRAPHY

Micrographic evaluation of inclusions in austenitic stainless steel tubes ensuring surface quality control

07 p0994 A72-18972

Photomicroscopy of sintered refractory alloys and nonmetallics of B-Si-C-N system, discussing microstructural interactions between binder metal and refractory component

10 p1493 A72-23824

Graphite morphology in metallic materials from scanning electron micrographs, discussing sulfur contents effect in tempered cast iron

10 p1500 A72-23825

Interval scanning photomicrography for recording growth of microbial cell populations during incubation

13 p1911 A72-29749

Investigation of the structural content and the determination of the optimal image of focus series in light and electron microscopy with the aid of Fraunhofer diffraction/structure spectroscopy/

21 p3055 A72-40747

PHOTOMULTIPLIER TUBES

Rocket-borne photomultipliers housing, recommending fiber reinforced epoxy resin structure with metal flanges

03 p0440 A72-13062

Photomultiplier signal for water axial velocity in glass pipe, providing turbulent liquid flow information and laser Doppler velocimeter evaluation

04 p0520 A72-14438

Cu-Be electron multipliers SNR restoration by removing surface contamination on dynodes by chemical etching and cleaning

04 p0524 A72-15500

Channel electron multiplier efficiency for protons of 0.2-10 keV from aurora rocket sounding

04 p0524 A72-15501

Photomultiplier operation pulsed control in semiconductor circuit for background cosmic radiation noise error minimization in atmospheric shower station

06 p0811 A72-17294

Ultrahigh speed electro-optical cameras with exposure times of several picoseconds, using biplanar image converter, electron multiplier and Kerr cell

06 p0812 A72-17415

Statistical model of signal amplitude distribution and thermoelectron noise of photoelectron multiplier

06 p0816 A72-17837

Gain variations in channel electron multipliers, investigating total radiation exposure effect

07 p0984 A72-19324

Fabry lens application in stellar photometry, describing technique of image construction on photomultiplier tube cathode

07 p0985 A72-19419

Optoelectronic elements for information system applications, discussing photomultipliers, photodiodes, photoresistors, avalanche and photopotametric diodes response and bandwidth characteristics

08 p1169 A72-21844

Channel electron multiplier arrays for double proximity focusing image intensifier design

08 p1171 A72-21973

Polarization effect on sensitivity of photocells and photomultipliers with/without cover glass

09 p1289 A72-23670

Ultramicromanometer based on photomultiplier for low pressure Penning discharge light flux emission measurement

10 p1480 A72-24208

Multichannel photomultiplier matrix anode design for various tube types fabrication

11 p1631 A72-25687

Compact photomultiplier housing with controlled cooling, discussing temperature control and measurement

12 p1806 A72-27265

Low energy particles spectrometer channels calibration for satellite auroral observation, discussing photomultiplier detector properties

13 p1960 A72-29843

Molnaya 1 satellite slow neutron monitor with photomultiplier scanned scintillator, noting limiting effect of geomagnetic perturbations

14 p2105 A72-30628

Operating conditions of photometers for optimum photomultiplier photon counting photometry, considering measurement precision dependence on experimental parameters

14 p2105 A72-30733

Instrumental errors estimation in photomultipliers and photodiodes during measurement of short time phase fluctuations in quasi-harmonic signals

15 p2246 A72-31424

Photomultiplier negative electron affinity emitter materials photosensitivity performance, considering Cs-activated GaP and applications for low light level detection

15 p2291 A72-31531

Electron-optical parameters effect on GaP/Cs/dynode photomultipliers time response characteristics, describing computer simulation and pulse response measurement techniques

15 p2234 A72-31532

Ceramic envelope electron multiplier design with hemispherically shaped dynodes, discussing electron optics, photosensitivity and applications

15 p2234 A72-31533

Miniature high gain photomultiplier for pulse counting applications in close-packed arrays and mosaics for scintillation imaging and spectrum analyzing

15 p2234 A72-31534

Cerenkov counter for astronomical observatory high energy cosmic ray experiments, discussing UV-reflecting paint, radiator and photomultiplier positioning improvements

15 p2234 A72-31536

EUV open channel photomultipliers satellite-borne long term performance degradation, attributing sensitivity loss to grating contamination

15 p2235 A72-31645

Unmodulated solar radiation effect on electro-optical photoreceptors voltage sensitivity, noting photomultipliers and silicon photodiodes

15 p2237 A72-32121

Excess white noise source in photomultiplier as function of temperature from voltage, intensity and ion pulse measurements, noting effect on photon counting statistics

15 p2207 A72-32238

Scintillation telescopes for muon angular distribution, designing test device for photomultiplier tubes selection

17 p2556 A72-35437

Use of a loaded silicon elastomer for insulation of channel multipliers of onboard electrons

18 p2670 A72-37140

Photon count circuit conjugation with photomultiplier for spectrometric measurement of lines emitted by atomic barium jet excited by slow electron beam

19 p2799 A72-37671

Photocathode relative sensitivity spatial distribution as function of wavelength, noting maximum shift from photoeffect contribution to photomultiplier current

19 p2800 A72-37821

Effect of pulsed voltages fed into the external modulating electrode on the threshold sensitivity of a photomultiplier

19 p2774 A72-38415

The employment of a novel Quantacon photomultiplier for increasing the sensitivity of older flame photometers in the near IR

20 p2927 A72-39697

PHOTON ABSORPTION

U ELECTROMAGNETIC ABSORPTION

PHOTON BEAMS

NT LIGHT BEAMS

Two photon absorption of ruby laser emission in mixed zinc cadmium sulfide crystals, plotting laser light damping vs beam power density

09 p1322 A72-22212

Pulsed carbon dioxide laser output monitor with Ge cylinder using photon drag effect to measure radiation pulse profile

09 p1326 A72-23389

Superradiant laser stationary behavior and photon statistics, solving Fokker-Planck equation for quantum mechanical distribution function in Hilbert space of atomic system

10 p1514 A72-24247

Multiphoton ionization of atomic hydrogen in the presence of an intense electromagnetic field.

17 p2586 A72-35827

German monograph - A method for the determination of the differential albedo for photons in the range from 1-17 MeV

19 p2836 A72-37484

Photon count circuit conjugation with photomultiplier for spectrometric measurement of lines emitted by atomic barium jet excited by slow electron beam

19 p2799 A72-37671

Investigation of laser light spatial correlation by the photon coincidence method

21 p3064 A72-41691

PHOTON DENSITY

Monte Carlo calculations of lunar photon albedo from galactic and solar proton bombardment for lunar soil composition information

07 p1070 A72-19139

Relativistic beaming from periodically orbiting light point source in terms of photon fluxes, relating to pulsar radiation theory

19 p2835 A72-38697

Investigation by the photon count method of the statistical properties of the emission of a laser operating in the mode of several axial oscillations

21 p3063 A72-40784

PHOTON-ELECTRON INTERACTION

Soviet monograph on electron flux nonlinear interaction with slow electromagnetic waves in TWT, discussing output power and efficiency increase

03 p0333 A72-13949

Intraband multiphoton conduction-electron transfer probability in semiconductor under electromagnetic wave action in uniform magnetic field

08 p1216 A72-21066

Shock wave structure in radiation spectrum of photon-electron interaction via induced Compton effect

12 p1848 A72-27056

Photon trapping in photosystem II of photosynthesis - The fluorescence rise curve in the presence of 3-/3,4-dichlorophenyl/-1,1-dimethylurea.

17 p2505 A72-35761

Equations for electron and high-energy photon transfers in magnetic fields

19 p2837 A72-38059

Shock wave structure in radiation spectrum of photon-electron interaction via induced Compton effect

24 p3431 A72-45709

PHOTONIC PROPULSION

Interstellar flight conditions in photon vehicle

05 p0713 A72-15979

PHOTONS

NT LIGHT BEAMS

Optical radar target range estimation, determining suboptimum post detection signal processing algorithms in photon counting mode

01 p0024 A72-10047

Series summations for perturbation theory of multiple photon ionization probabilities of atoms applied to hydrogen and helium

03 p0391 A72-13080

Fluctuation theory for single mode laser detuning effect on photon intensity and spectral line width

03 p0368 A72-13671

Two photon method of measuring ultrashort pulses and nonlinear optical effectiveness of lasers in synchronized mode

03 p0369 A72-14063

Two-photon time distribution in mixture of light from He-Ne laser and Gaussian source of same central frequency

05 p0669 A72-16691

Multilayer X ray chamber for gamma quanta energy spectrum determination by primary photon impact and absorber calorimetric methods

06 p0869 A72-17266

Black radiation kinetics of photon thermalization in body cavity in static thermodynamic equilibrium

06 p0847 A72-17732

Photon radiative exit from scattering isothermal atmosphere containing atoms with two energy levels

06 p0848 A72-18051

Quantum optics analysis of light propagation and photon flux fluctuations in medium with random dielectric constant inhomogeneities

07 p0938 A72-18912

Photon counting system for low level radiation measurement in UV visible region, discussing simplifications

07 p0983 A72-19133

Lattice and photon components of thermal conductivity of cerium dioxide at high temperatures

07 p1044 A72-19881

Nitrogen dioxide photodissociation by pulsed ruby laser at 6943 A, noting single photon energy relationship to dissociation energy

07 p0937 A72-20676

Image photon counting technique using digital accumulation of individual events registered by high gain image intensifier and TV camera and stored in on-line computer

08 p1170 A72-21960

Finite rest masses of wave quanta in material media, discussing dispersion and Einstein formulas equivalence, Doppler effect, gravitational red shift and radio photon trajectories

10 p1512 A72-24790

Black radiation kinetics of photon thermalization in body cavity in static thermodynamic equilibrium

11 p1685 A72-25336

Image tube scanner photon loss probability, considering effects of system gain, aperture time and sweep rate via computer simulation

11 p1631 A72-25694

Evanescent photons absorption and emission in light excited molecules fluorescence
11 p1691 A72-26745

Angular annihilation photon distribution curves from positron-electron annihilation method for metallic phase interaction with crystal lattice in synthetic diamonds
12 p1833 A72-27764

Combined photon and particle diffusion of two level system with ground and excited atomic states and photon emission-formed radiation field
13 p2001 A72-28509

Perturbation theory of hydrogen and helium atoms multiphoton ionization probabilities, proposing series summation method
13 p2007 A72-29430

Photon correlation spectrometer for laboratory wind tunnel measurement of laser Doppler signals backscattered from dust particles
14 p2111 A72-30854

Joint photon-count probability distribution measurement of electric field amplitude correlation function for random-Gaussian light fields produced by laser beam scattering
15 p2280 A72-31378

Lunar laser ranging experiment single photon detection and nanosecond timing precision
15 p2233 A72-31530

Photon loss coefficients and gain measurement in CdS electron beam pumped lasers, noting absorption mechanism and efficiency
15 p2246 A72-31668

Nonionizing component of underground high energy cosmic radiation investigated with anticoincidence screen and counters, noting bremsstrahlung as photons source
15 p2301 A72-32232

Circularly polarized photon echo decay measurement as function of Cr concentration in ruby, noting relationships to temperature, pulse separation and external magnetic field
15 p2295 A72-32545

Born approximation for resonance bremsstrahlung emission and photon absorption cross sections at electron-ion scattering, solving multiparticle problem
15 p2279 A72-32697

Astronomical objects spectral lines red shift interpretation in terms of noncosmological origin and photon-photon interactions
16 p2450 A72-32863

Spectral line width measurement accuracy based on digital autocorrelation of photon counting fluctuations, noting light field and photoelectric process limiting effects
16 p2357 A72-32949

Q switched laser operation with electro-optic switch mechanism, measuring initial photon number per mode of Nd-glass and Nd-YAG lasers
16 p2399 A72-33014

A photon rest mass and the dispersion of longitudinal electric waves in interstellar space.
18 p2728 A72-36923

Two quantum induced photon-plasmon transition probability for hydrogen atom in processes of nebulae and stellar chromospheres
19 p2837 A72-38058

Macroscopic photon echo polarization and radiation intensity in Cr ion doped ruby laser stimulated by coherent light pulses
19 p2814 A72-38780

High energy particle and photon orbital and vortical motions in Kerr metric outside equatorial plane in gravitational field
20 p2953 A72-39341

Longitudinal electric waves absorption in interstellar space due to electron-heavy particle collisions, considering photon rest mass
20 p2969 A72-39348

Quantum optics analysis of light propagation and photon flux fluctuations in medium with random dielectric constant inhomogeneities
20 p2932 A72-39378

Effect of spatio-temporal laser light structure on multiphoton ionization.
20 p2934 A72-39814

Group theory for spontaneous coherent radiation of multilevel sources, noting angular distribution of photon echo effects
23 p3295 A72-43306

Theory of dispersion in relation to light shifts.
24 p3409 A72-44921

PHOTONUCLEAR REACTIONS
Device for studying the photonuclear interaction of superhigh-energy muons
23 p3291 A72-44440

Multiphoton dissociation, predissociation, and autoionization of the hydrogen molecule.
24 p3427 A72-45476

PHOTOOXIDATION
Linear four step model for photosynthetic molecular oxygen evolution, discussing oxidation states, flash yield oscillation damping and deactivation
06 p0770 A72-18424

Vehicle components oxidation in thermal control coatings, investigating resistance to oxidation by UV photoproducted ZnO electronic holes
[AIAA PAPER 72-264] 11 p1699 A72-25207

PHOTOPEAK
Numerical integration of gamma ray photopeak digital data from nondestructive activation analysis
20 p2899 A72-39834

PHOTOPIEZOELECTRICITY
U PHOTOELECTRICITY
U PIEZOELECTRICITY
PHOTOPLASTICITY
CdTe single crystals photoplastic characteristics, detailing illumination effect on yield stress and resistivity
15 p2294 A72-32501

Stress analysis in two dimensional bending process using the photo-rheological stress analysis.
22 p3183 A72-42483

PHOTOPRODUCTION
Charge carrier photoproduction and energy structure of trans-bis-indonylene (TBB)/ semiconductor thin films
11 p1700 A72-25784

PHOTORECEPTORS
Nonmammalian vertebrate retinal receptor rods and cones birefringence as function of fixation, temperature and immersing medium
01 p0014 A72-10862

Flavin photoreceptor participation in contemporary organism metabolic systems
04 p0469 A72-14781

Optical image transfer functions characteristics and modulation in isolated retinas and retinal receptors, noting similarity to optical fiber bundles
07 p0916 A72-19027

Coincidence model tests of photoperiodic time measurement relation to circadian system in moth *Pectinophora gossypiella*, using induction by skeleton photoperiods and light cycles
07 p0919 A72-19533

Phase shifting effect of light on circadian rhythm and photoreceptive pigment location in *Drosophila* in postpupation stages
07 p0919 A72-19536

Selective chromatic adaptation in cone photoreceptors of cynomolgous macaque monkeys, using late receptor potential as response index
13 p1907 A72-29967

Unmodulated solar radiation effect on electro-optical photoreceptors voltage sensitivity, noting photomultipliers and silicon photodiodes
15 p2237 A72-32121

Lamellar structure and rhodopsin location in bleached and unbleached rod photoreceptor membranes of dark adapted frog retinas by X ray diffraction study
15 p2186 A72-32199

Semiconductor quadrupole optical links consisting of electroluminescent diode and photoreceptor, discussing operation and design principles
17 p2594 A72-34333

The distribution of the long wave photoreceptors in the compound eye of the honey bee as revealed by selective osmic staining.
17 p2500 A72-34877

Electroretinographic evidence for a photopic system in the rat.
17 p2500 A72-34878

Fly colour vision.
18 p2651 A72-36609

Reliability of semiconductor optoelectronic components - Analysis of the long-term behavior
18 p2670 A72-37138

Isolated retina receptor potential amplitude relation to visual pigment bleaching kinetics, indicating excitation-inhibition receptor response generation mechanism
19 p2756 A72-37830

Threshold excitation, temporal summation, and impulse response function in the retina of the cat - Temporal receptive fields of retinal ganglion cells
19 p2758 A72-38648

The photopigment bleaching hypothesis of complementary after-images - A psychophysical test.
23 p3258 A72-44376

Component analysis of electroretinogram in dark and light adapted sheep eye, noting rod and cone receptor potentials and transient and dc responses
23 p3261 A72-44382

Light absorption by visual pigment in photoreceptor, noting Airy disk diameter effect
23 p3259 A72-44388

Small field tritanopia of central fovea in terms of dichromatic area color response mechanism and adaptation speed
23 p3259 A72-44390

Optical directionality of retinal receptors and corresponding points. I - Nasal-temporal asymmetry of retinal spatial values and orientation of receptors: Are the corresponding points cones. II - Variation of form of the experimental horoptera, and possibility of reorganization of the retinal correspondence according to the orientation of the eyes
24 p3371 A72-44907

PHOTOSENSITIVITY
Functional organization of the periphery effect in retinal ganglion cells.
24 p3371 A72-44908

PHOTORECONNAISSANCE
Computer image processing for photoreconnaissance, enhancement and calibration applications
01 p0070 A72-10870

Microwave and IR radiometer surveillance of oil spills, discussing sources tracking, sea surface oil volume and flow rate determination and terminal location prediction
05 p0658 A72-16599

Geomorphological and thermographic reconnaissance of Central Sahara, using orbital photographs
09 p1303 A72-23297

Computer processed image enhancement applications to spacecraft returned photoreconnaissance, discussing data transmission and resolution vs recognition and color quality
17 p2520 A72-34408

Photomorphic units for regional analysis from hyperaltitude and spacecraft remote sensing data
18 p2690 A72-36321

PHOTOREDUCTION
U PHOTOCHEMICAL REACTIONS
U REDUCTION [CHEMISTRY]
PHOTOSENSITIVITY
U PHOTOCONDUCTIVITY
PHOTORESISTORS
U PHOTOCONDUCTORS
PHOTOSENSITIVITY
NT LIGHT ADAPTATION
NT PHOTOTROPISM
Photosensitive MOS devices array as converters performing optical image data analysis, considering sensor sensitivity regulation
02 p0193 A72-12342

Photochemical electron transfer evolution models, noting titanium and zinc oxides as photosensitizers
04 p0484 A72-14777

Pulsed ruby laser and photopolymer materials applications to holography, considering research programs for surmounting difficulties
06 p0813 A72-17427

Silicon Schottky barrier photodiodes development for photographic, photometric and analytical instrumentation, comparing sensitivity, time response and fatigue characteristics with classical photodetectors
06 p0813 A72-17428

Real time hologram photosensitive materials, determining power requirements and resolution for diffraction gratings in saturable absorbers and absorbing liquids
07 p0984 A72-19397

Scanned reference beam holography techniques with limited exposure time, noting use of hypersensitized photographic plates
07 p0985 A72-19418

Spectral photosensitivities for phase shifting of circadian body temperature rhythms in pocket mice
07 p0919 A72-19535

Semiconductor structure investigation by measuring photoresponses to optical probe motion
07 p1049 A72-19963

Multipole network characteristics of optical link assemblies [optons/ using photosensitive element and light source
08 p1139 A72-21057

Photosensitive MOS devices array as converters performing optical image data analysis, considering sensor sensitivity regulation
08 p1143 A72-21948

Sintered cadmium sulfide films microstructure analyzed by X rays, discussing structural changes effects on dark resistance and photosensitivity
09 p1366 A72-22414

Absorption spectra and detection sensitivity enhancement by organic dye laser quenching with broadband cavity
09 p1323 A72-22601

Incoherently light radiating object and background light focusing on photosensitive mosaic, observing linear restoration by comparison of mean square error with Wiener filter theory
09 p1350 A72-22611

Polarization effect on sensitivity of photocells and photomultipliers with/without cover glass
09 p1289 A72-23670

Photopolymers formulations and processing for holography applications, discussing sensitivity, keeping and reciprocity properties
10 p1482 A72-24566

Photostimulated potentials of human visual cortex, determining retinal macular area involvement
10 p1426 A72-24786

Multiple exposure hologram recording on photosensitive plate for extended reference-beam source
12 p1808 A72-27601

Photosensitive polymeric films for hologram recording with high diffraction efficiency, requiring low laser powers
12 p1808 A72-27602

Color discrimination threshold determination for spectral sensitivity in subjects with congenital color vision disorders
13 p1903 A72-28763

Solar photosensitive elements prepared p-type GaAs liquid epitaxy on n-type GaAs substrate, measuring dark and light I-V characteristics and spectral response

14 p2142 A72-30225

High resistance n-type InP crystals electrical conductivity and photoconductivity characteristics at 80 K, discussing photosensitivity spectral distribution and temperature dependence

15 p2290 A72-31371

Photomultiplier negative electron affinity emitter materials photosensitivity performance, considering Cs-activated GaP and applications for low light level detection

15 p2291 A72-31531

Ceramic envelope electron multiplier design with hemispherically shaped dynodes, discussing electron optics, photosensitivity and applications

15 p2234 A72-31533

Celestial Thomson-scattering X ray polarimeter design for OSO-1, optimizing sensitivity in 4-24 keV energy range by Monte Carlo simulation computer program

15 p2234 A72-31540

EUV open channel photomultipliers satellite-borne long term performance degradation, attributing sensitivity loss to grating contamination

15 p2235 A72-31645

High contrast and sensitivity thermal erase cathodochromic sodalite for storage and display applications, measuring contrast ratio versus electron beam flux

15 p2240 A72-32362

Holograms on bismuth and paraffin thin films with pulsed high power TEA carbon dioxide IR laser, discussing photosensitivity and capability for interferometric measurement

16 p2392 A72-33390

Blue green algae *Anacystis nidulans* UV light-sensitive mutants photorecovery capacity following irradiation

16 p2356 A72-33673

Semiconductor optoelectronic devices, discussing light emitting indicator diodes, data display systems, photosensitive arrays and optical data transmission links

17 p2594 A72-34332

Colorimetric photometric matching tests, showing subject differences in parafoveal spectral sensitivity indicated by photopic curve peaks

17 p2508 A72-34882

Pyroelectric radiation detector with ferroelectric crystals, discussing operation mode, construction, sensitivity and IR applications

17 p2530 A72-35445

Photocathode relative sensitivity spectral distribution as function of wavelength, noting maximum shift from photoeffect contribution to photomultiplier current

19 p2800 A72-37821

Temperature dependence of electroconductivity and photosensitivity in CdS films

20 p2959 A72-39223

The employment of a novel Quantacount photomultiplier for increasing the sensitivity of older flame photometers in the near IR

20 p2927 A72-39697

Investigation of certain complex compounds of triaryl phosphines/phosphites/ in optically sensitized photographic emulsions

21 p3052 A72-40390

Characteristics of the low temperature effect of an electric field on the sensitivity of photographic emulsions

21 p3053 A72-40391

Spectral sensitivity after prolonged intense spectral light exposure of rhesus monkey corneas, demonstrating long term loss of cone photopigment response

21 p3000 A72-40739

Electronic superregeneration in semiconductor photosensitive structures with negative resistance

23 p3268 A72-43345

Sensitivity of the human ERG and VECP to sinusoidally modulated light

23 p3258 A72-44385

Visual sensitivity measurement in retinal areas with stepwise change from one monochromatic light to another, discussing eye movements effects and perception thresholds

23 p3258 A72-44385

PHOTOSENSORS

U PHOTOELECTRICITY

U RADIATION MEASURING INSTRUMENTS

PHOTOSPHERE

Brightness correlation and mapping of weak photospheric magnetic fields and faculae using CN 3883-A spectroheliograms

03 p0414 A72-12927

Prominent Zeeman multiplets in photosphere, penumbra, umbra and sunspot spectra, presenting ratios for temperature sensitivity measurements

03 p0415 A72-12933

Solar coronal magnetic field large scale structure relation to photospheric and interplanetary sector patterns

[AD-734628]

03 p0422 A72-13207

Kitt Peak 40 channel magnetograph using fiber optic probe for spectral and spatial resolution in weak photospheric field detection

03 p0356 A72-13282

Solar magnetic field configuration evolution in active region of photosphere, using solar magnetograph

03 p0428 A72-13305

Magnetic field fine structure in undisturbed photosphere for high latitude solar regions, constructing model to explain magnetograph response

03 p0428 A72-13306

Magnetograph scans of solar disk center supergranulation, showing downdrafts relation to magnetic field strength and chromosphere and photosphere brightness

03 p0429 A72-13307

High resolution magnetographic and spectrographic observations of plage fields and photospheric effects in weakly active regions

03 p0429 A72-13308

Zeeman spectroheliograms of photospheric magnetic fields in Ca I 6102.7 Å line

03 p0430 A72-13317

Five-minute plasma oscillations in solar photospheric and low chromospheric magnetic fields, discussing evidence, properties and production mechanism

03 p0430 A72-13319

H alpha solar flare association with photospheric magnetic field patterns, discussing flare insertion and relation to magnetic structure evolution

03 p0410 A72-13320

Corona X ray emitting structures comparison to photospheric magnetic field distribution

03 p0410 A72-13324

Photospheric vortex motions effect on flare productive magnetic patterns in solar active regions

03 p0411 A72-13330

Solar magnetic field distribution in sunspots surface layers, considering photospheric three dimensional magnetohydrostatic model

03 p0431 A72-13337

Solar magnetic field origin in fine structure elements of photosphere and sunspots

03 p0431 A72-13340

Solar magnetic field sector boundaries, discussing photospheric field direction, activity regions, flares, coronal enhancements, faculae and geomagnetic response

03 p0433 A72-13359

Solar photospheric facula blue light limb photographs, determining spatial variation in contrast levels

03 p0434 A72-13494

Solar magnetic fields small scale structure with emphasis on photospheric measurements, discussing sunspots fields

03 p0437 A72-13869

Rotating dipole sector structure of interplanetary and solar photospheric magnetic fields from spacecraft observations

03 p0437 A72-13871

Missing solar UV opacity from band adsorption coefficient comparison between photospheric diatomic molecules and metals and hydrogen

04 p0579 A72-15327

Goldberg-Unno method accuracy for solar photospheric microturbulent velocities, discussing correction for damping effect and LTE deviation

05 p0718 A72-16503

Intensity variations of CN photospheric and K line chromospheric network with time

05 p0718 A72-16505

Temperature variation with latitude in upper solar photosphere from photoelectric meridional and equatorial limb-darkening scans

05 p0719 A72-16710

Temperature and density fluctuations in photosphere from Fe and Mg line intensities, noting variations due to granulation in solar atmosphere model

06 p0876 A72-17579

Solar magnetic field filamentary structure based on analysis of photospheric photographs and presumptive spectrograms obtained during Soviet stratospheric observatory flight

06 p0886 A72-18100

Solar photosphere active regions and large scale flow patterns from Greenwich sunspot statistics

07 p1068 A72-18886

Sunspot umbra spectrophotometric scans with spatial cancellation techniques, finding 4200 K umbral temperature with 0.60 photosphere contrast

07 p1069 A72-19081

Solar MgH isotopic abundance ratios and photospheric lines, correcting previous overestimation for sunspot spectra analyses

07 p1071 A72-19179

Turbulent micro and macromotion velocities in solar photosphere from CN molecule vibrational band line contours

07 p1077 A72-19810

Solar energy sources and dissipation and emission mechanisms, considering radiant flux of convection zone and photosphere and solar variabilities

07 p1078 A72-20005

Electroconductivity distribution and vertical gradients in photospheric layers of solar active region, using approximate model

07 p1082 A72-20293

Three dimensional structure of interplanetary magnetic field from observed line of sight field component in solar photosphere

07 p1082 A72-20379

Solar corona structure during 22 September 1968 total eclipse noting N-S asymmetry and correspondence of large details to formations in photosphere and chromosphere

08 p1228 A72-20825

Solar rotation as function of heliographic altitude from measurements of Fe and H lines, sunspots and magnetic field in photosphere

10 p1541 A72-24569

Active chromosphere coupling to magnetic field determined by subphotospheric motions, discussing active regions rotation period

11 p1720 A72-26117

New and old sunspot groups proper motions in large scale flow of solar photosphere investigated as function of age, noting angular momentum transport direction

13 p2036 A72-28834

Outer corona and interplanetary space magnetic fields calculated from photosphere magnetic fields measured during 7 March 1970 solar eclipse

13 p2041 A72-29528

Spectral line variations in transition region from photosphere to chromosphere during March 1970 solar eclipse

13 p2041 A72-29530

Photospheric network, magnetic fields, Ca emission and continuum faculae from multichannel magnetograph observations

13 p2045 A72-29705

Observed continuous solar spectrum intensity comparison with photospheric models, noting bend-off due to veiled line haze

13 p2047 A72-29734

Solar photosphere velocity field photoelectric measurements, emphasizing long periods and low spatial wave numbers in deep layers

13 p2048 A72-29927

Solar photospheric fluctuations, applying fast Fourier transform to power coherence and phase spectra calculations

13 p2049 A72-29928

Undisturbed and active solar photospheric turbulent velocity determination by comparing half widths of observed weak Fraunhofer line profiles with model calculation

13 p2049 A72-29929

Solar magnetogram recorded mean photospheric magnetic field cross correlation with interplanetary magnetic field

13 p2049 A72-29935

Pleiades slow flareup in photosphere, comparing with Orion flare stars

15 p2304 A72-31329

Solar instruments and methods for photosphere magnetic field measurement, noting spectroheliographic mapping in violet spectral region

15 p2306 A72-31647

Photoelectric measurement of solar photosphere pole-equator temperature differences, analyzing statistical and systematic errors

15 p2317 A72-32770

Solar photosphere and low chromosphere spectral lines non-LTE empirical analysis, relating coefficients of departure from LTE to elemental state temperatures

15 p2317 A72-32771

High time resolution observations of photospheric velocity field, interpreting short period oscillations origin as result of combined image motion and Doppler velocity gradients

15 p2317 A72-32776

Solar photospheric resonance oscillation power spectrum observation, noting statistical significance

15 p2317 A72-32777

Solar rotational properties in photosphere, solar wind and magnetic fields, including long lived sunspots and magnetic dipole observations

16 p2459 A72-33917

Spectral analyses of solar photospheric fluctuations.

II.

17 p2608 A72-35081

A physical mechanism for the production of solar flares.

17 p2608 A72-35088

Photographic magnetograms comparison with H alpha filtergrams, investigating chromospheric features relationship to photospheric magnetic fields

17 p2616 A72-35702

Doppler shift of solar photospheric spectral lines related to downward motions over plages

17 p2617 A72-35705

Turbulent micro and macromotion velocities in solar photosphere from CN molecule vibrational band line contours

17 p2617 A72-35735

New measurements of the polarization of photo-spheric light near the solar limb
18 p2727 A72-36739

Photospheric faculae brightness influence on solar gravitational oblateness determination, considering criticism of Dicke-Goldenberg argument on Mercury excess perihelion motion
19 p2855 A72-37239

Radial velocities and brightness distribution in active and quiet solar atmosphere from magnetograph measurements, discussing motion directions in photosphere and chromosphere
19 p2858 A72-37818

Initial phase in the development of activity centers in the photosphere
19 p2860 A72-37951

Correlation of polarization in type III solar radio bursts at frequencies of 23.5 and 30 MHz
19 p2851 A72-38065

Energy spectrum of small scale solar magnetic fields.
20 p2971 A72-39765

Investigation of physical conditions in the solar photosphere by a curve of growth technique
21 p3102 A72-40097

Thermal oscillations in the high solar photosphere.
21 p3107 A72-41275

A method to calculate electric currents in quiescent prominences.
21 p3108 A72-41282

Behavior of carbon monoxide in the upper photosphere
21 p3114 A72-41777

Solar photospheric fluctuations measured from time sequence of Sacramento Peak Observatory spectrograms, using power, coherence and phase spectra computed by fast Fourier transform
22 p3221 A72-42029

Micro- and macroturbulent motions and the velocity spectrum of the solar photosphere.
22 p3221 A72-42030

Low abundance of solar photosphere iron from Fe I excitation and ionization computations, showing LTE departure effects on spectral lines
22 p3228 A72-42569

Free oscillations of the sun and their possible stimulation by solar flares.
22 p3219 A72-42570

PHOTOSYNTHESIS
Chlorella growth rate model, presenting specific photosynthetic and urea and carbon dioxide utilization rates
02 p0160 A72-12038

Acid base equilibrium effects on chlorophyll primary photosynthetic regulating mechanism, considering electron transfer to NADP and ATP formation
04 p0468 A72-14778

Pigment system and primary photosynthesis evolution, using comparative analysis of bacteriochlorophyll, bacterioviridin and chlorophyll
04 p0469 A72-14780

Bacterial respiration through oxidative phosphorylation origin hypotheses, discussing photosynthesis and sulfate respiration in anoxygenic atmosphere and thiobacillus and aerobe evolution in oxygen atmosphere
04 p0470 A72-14795

Biochemical functions of organisms in evolution of biosphere, presenting redox reactions, elementary compositions and metal compounds role in photosynthesis
04 p0470 A72-14796

Manganese catalyst photoactivation process for oxygen photosynthetic evolution investigated in Mn-deficient Anacystis nidulans cells
05 p0624 A72-15811

Linear four step model for photosynthetic molecular oxygen evolution, discussing oxidation states, flash yield oscillation damping and deactivation
06 p0770 A72-18424

Photon trapping in photosystem II of photosynthesis - The fluorescence rise curve in the presence of 3-/3,4-dichlorophenyl/-1,1-dimethylurea.
17 p2505 A72-35761

Thermodynamic properties and mathematical modeling of complex biological systems, considering energy and mass exchange in photosynthesizing organisms for exobiological life support
20 p2891 A72-38960

The presence of P700 in chloroplast fragments prepared by short time incubation with Triton X-100.
23 p3258 A72-44325

PHOTOTHERMOTROPISM
U ANISOTROPY
U PHOTOTROPISM
U TEMPERATURE EFFECTS

PHOTOTRANSISTORS
Physical and operational characteristics of Si and Ge photoelectric semiconductor devices with p-n junctions, discussing photodiodes, phototransistors, mosaic arrays and coordinate sensitive structures
08 p1139 A72-21055

Solid state array camera based on diffused junction phototransistors, discussing sensor technology and fabrication
12 p1810 A72-27931

The field-effect modified transistor - A high-responsivity photosensor.
23 p3273 A72-44455

PHOTOTROPISM
Phototropic substance effect on spatial structure of passive Q switched ruby laser emission, considering gallium phthalocyanine solution
02 p0239 A72-12568

Phototropic borosilicate glass optical density variation by exposure to UV or blue light, considering utilization for digital data storage and/or cathode ray tubes
22 p3180 A72-42941

PHOTOTUBES
NT PHOTOMULTIPLIER TUBES

PHOTOVISCOELASTICITY
Slow viscous flow shear stress and velocity field analysis, using photoviscosity and bubble technique [SESA PAPER 1902]
02 p0201 A72-11508

PHOTOVOLTAGES
Surface energy states of CdS basal plane based on photovoltage inversion effect model
03 p0400 A72-12991

PHOTOVOLTAIC CELLS
Copper sulfide-cadmium sulfide single crystal photovoltaic heterojunctions, showing optically induced and thermal effects on short circuit current degradation
03 p0389 A72-13603

Cadmium mercury telluride photovoltaic cell features, noting gigahertz range frequency response, heterodyne sensitivity, operating temperature and nonstoichiometric p-n junction preparation
07 p1003 A72-19224

IR radiation detection by microwave biased photoconductor, lead-tin telluride photovoltaic detector and thermal imaging pyroelectric detector and array system
07 p1034 A72-19425

French R and D programs on Si and various thin film photovoltaic solar cells, considering efficiency, reliability, and weight and cost reduction problems
12 p1756 A72-28002

Organic semiconductors for photovoltaic cell applications, discussing structural characteristics, improved charge transfer and crystallographic conductivity mechanisms
12 p1856 A72-28015

Determination of the parameters of minority carriers in semiconductor photocells from a spectral sensitivity curve
17 p2498 A72-35512

Reliability of HgTe-CdTe photovoltaic detectors
18 p2670 A72-37139

Effects of impurities on gamma-irradiated silicon crystal examined by photovoltaic effect of p-n junction diode.
21 p3097 A72-40693

Photovoltaic properties of single-crystal CdS-Cu2S cells.
22 p3214 A72-42457

PHOTOVOLTAIC EFFECT
Carrier mobility measurement in inhomogeneous semiconductors based on bulk photovoltaic and photomagnetolectric effects
03 p0402 A72-13862

Heterojunction p-GaAs-n-ZnSe diodes electrical and photovoltaic properties, showing space charge limited current effects
11 p1606 A72-26624

Photovoltaic effects in solar cell p-n homojunctions and heterojunctions at low and high excitation levels
12 p1855 A72-28006

Photovoltaic effect and energy band model of solar cell cadmium-sulfide-copper-disulfide heterojunctions
12 p1855 A72-28007

Low photon IR photovoltaic response of CdS-metal junction, noting energy conversion efficiency
12 p1855 A72-28009

Photovoltaic effects in CdS films evaporated onto barium titanate single crystal and ceramic ferroelectric substrates
12 p1856 A72-28014

Proton and electron radiation effects on silicon solar cells electric and photovoltaic properties, determining damage coefficients via minority carriers diffusion length measurement
12 p1759 A72-28045

Trapped charge effect on photovoltaic properties of copper sulfide-cadmium sulfide single crystal heterojunction in terms of tunneling by photocapacitance technique
15 p2294 A72-32520

Interpretation of steady-state surface photovoltage measurements in epitaxial semiconductor layers.
22 p3215 A72-43087

Heterodyne, microwave bias and pyroelectric photon infrared detectors, noting mixed crystal photoconductive and photovoltaic detectors
23 p3291 A72-44392

PHTHALATES
Shear modulus of liquids at elastohydrodynamic lubrication pressures.
21 p3059 A72-40688

PHTHALOCYANIN
Phototropic substance effect on spatial structure of passive Q switched ruby laser emission, considering gallium phthalocyanine solution
02 p0239 A72-12568

Organic catalysts for oxygen reduction, discussing phthalocyanines, Pfeiffer complexes and porphyrins
16 p2361 A72-33884

Investigation of the lubricant properties of molybdenum disulfide, graphite, and phthalocyanine
19 p2823 A72-38094

PHUGOID OSCILLATIONS
U OSCILLATIONS
U OSCILLATORS
U PITCH (INCLINATION)

PHYSICAL CHEMISTRY
Mercury vapor physicochemical processes kinematics in shock tube, determining electron gas energy balance equations
03 p0395 A72-13572

Fog modification at all temperatures with physicochemical techniques, discussing blowing hygroscopic salts and use of alginates of sodium and marine algae extracts
04 p0543 A72-14696

Irreversible thermodynamics applications to physicochemical and biological stability, including allosteric activation model
04 p0482 A72-14754

Glass network physical properties model, using physical chemistry description of crystal structure without regularly repeating lattice
10 p1502 A72-24735

Physicochemical processes in metal surface layers subjected to contact friction with aircraft fuels presence, noting secondary compounds and thermal oxidation acceleration
12 p1817 A72-28183

Liquid crystals synthesis, physical chemistry and material parameters effects on mesomorphic and electro-optical behavior
15 p2240 A72-32363

General analysis and synthesis of alloys and materials with inhomogeneous physical properties, noting thermal physicochemical methods for laminates and metal powders
16 p2405 A72-33095

Stress-strain state induced by local physicochemical transformations in a layer
22 p3242 A72-43164

PHYSICAL CONSTANTS TESTING REACTOR
U WATER COOLED REACTORS

PHYSICAL ENDURANCE
U PHYSICAL FITNESS

PHYSICAL EXAMINATIONS
Functional diagnostics of teeth condition as pilot health factor in stomatological aviation medicine, discussing caries, parodontosis and aerodontalgia
07 p0922 A72-20374

Physiological evaluation of crew piloting qualities, considering nervous/emotional stress, ECG, arterial pressure and breathing frequency recorded on simulator
07 p0934 A72-20375

Asthmatics evolution and treatments in armed forces aircrews, noting acetylcholine test
08 p1125 A72-21270

Clinical and laboratory examinations of workers exposed to trichlorotrifluoroethane vapor for long range health effects study
10 p1431 A72-24590

Potential coronary heart disease susceptibility indicators in ATC population, using Framingham age/obesity parameters
12 p1764 A72-28265

Diagnostic errors in draft age patients, noting doctor, examination methods, disease type and patient factors and psychosomatic disturbance detection
16 p2359 A72-34149

A model corporate pilot physical program.
20 p2897 A72-39746

PHYSICAL EXERCISE
Acute, short and long term and life long high altitude hypoxia exposure effects on pulmonary gas exchange control and efficiency during physical exercise
01 p0014 A72-10848

Ventricular ectopic arrhythmias from treadmill exercise in patients observed during ECG monitoring
02 p0156 A72-11424

Radiotelemetric cardiorespiratory determinations during submaximal dynamic exercise
02 p0168 A72-12134

Physical exercise effect on ECG atrial recovery wave duration and magnitude in humans with A-V blocks
02 p0166 A72-12891

Exercise ECG correlation to morphological patterns of selective cinecoronary arteriography and ventriculography, revealing significant information on occlusion and stenosis
03 p0314 A72-13178

Xenon 133 method for coronary blood flow measurement during exercise, noting unsuitability for patients with coronary disease

03 p0319 A72-13180

Training effect on oxygen consumption in negative muscular work, considering connective tissue strengthening and muscle viscosity changes

03 p0315 A72-13676

Free oxygen content and diffusion coefficient in adrenalectomized rat skeletal muscles after physical strain

03 p0317 A72-13991

Heat acclimatization, work habituation and exercise effects on body thermoregulation, measuring tympanic temperature, sweat rate and oxygen intake

04 p0472 A72-14896

Serum enzyme activity changes response to constant test exercise, discussing relation to maximum oxygen uptake

04 p0472 A72-14897

Physical conditioning effect on central and peripheral circulatory responses to arm work, measuring cardiac output at 80 percent maximum aerobic power

04 p0473 A72-14900

Peripheral modifications to exercise induced central drive for sweating, determining rates as functions of internal temperature

04 p0479 A72-15212

Daily prolonged exercises effects on human muscle glycogen utilization, noting reduced lactate accumulation and increased free fatty acid levels

04 p0480 A72-15213

Plasma renin activity during supine physical exercise as function of salt loading

04 p0480 A72-15214

Hypertrophic effects of chronic exercise on plasma corticosterone and adrenal cortex in rat

04 p0473 A72-15219

Exercise effects on pulmonary circulation in dogs, measuring pulsatile arterial flow and pressure and vascular input impedance, resistance and hydraulic power

04 p0475 A72-15464

Airline pilot postexercise electrocardiograms, showing S-T segment depression correlation to subsequent coronary heart disease

06 p0768 A72-17881

Electrophysiological responses to maximum exercise in healthy humans from polarcardiographic display of heart vector changes

07 p0916 A72-18891

Maximum aerobic power response and oxygen consumption to training stimulus intensity, duration and frequency, using bicycle ergometer exercise

07 p0916 A72-18965

Maximal oxygen intake prediction in acute moderate hypoxia during exercise, showing heart rate linearity with work load

07 p0916 A72-18966

Hemodynamic response to running exercise stress for aeronautics personnel selection, determining systolic ejection variation measurement and cardiac frequency increase

07 p0927 A72-19242

Acid base balance in arterialized capillary blood in men after maximal short duration exercise

07 p0929 A72-19441

Maximum oxygen intake during exercise on treadmill compared with bicycle ergometer, analyzing circulatory dynamic factors and cardiac output relation to oxygen transport capacity

07 p0922 A72-20251

Human performance and exhaustion predictive model from responses to exercise and environmental stresses, considering circulation, thermal regulation, work load and oxygen pressure effects

07 p0934 A72-20358

Autonomic blockade effects on reflex bradycardia due to phenylephrine induced arterial pressure in man during rest and supine exercise

07 p0925 A72-20688

Rebreathing technique to estimate human mixed venous oxygen and carbon dioxide tension changes at start of exercise under respiratory stress and natural conditions

08 p1122 A72-20883

Environmental chamber tests for ozone exposure effects on human pulmonary function at rest and during bicycle exercise

08 p1122 A72-20884

Oxygen intake and cardiac output measurements during various treadmill and bicycle ergometer exercises, relating exercise type to heart rate and arteriovenous oxygen differences

08 p1123 A72-20885

Acceleration tolerance increase by static forearm muscular contraction exercise comparison to g-suit protection during human centrifuge tests

08 p1114 A72-20887

Muscle blood flow relation to oxygen consumption from measurements during bicycle ergometer exercises, using Xe 133 clearance method

08 p1123 A72-20888

CO hypoxia effect on oxygen transport during exercise, discussing changes in cardiac and respiratory functions and work capacity

08 p1114 A72-20893

Hypoxic and normoxic gas mixture breathing during intense muscular activity, relating oxygen consumption and carbon dioxide elimination magnitudes and motor performance

08 p1121 A72-22081

Human blood serum 11-oxy corticosteroid content after maximum stress exercise, noting heart rate and blood pressure changes

09 p1266 A72-22878

Ventricular and supraventricular arrhythmias incidence during maximal treadmill exercise in normal man, noting age factor and cardiovascular disease presence effects

09 p1266 A72-23272

ECG, physical exercise and drug use in diagnosis and aeromedical evaluation of supraventricular arrhythmias, presenting case histories of pilots with wandering cardiac pacemakers

[AD-740987] 10 p1428 A72-23741

Continuous and intermittent maximal exercise effects on human muscle intracellular and capillary blood pH

10 p1425 A72-24477

Tachycardia role in coronary vascular bed hemodynamic response to severe exercise in dogs

10 p1426 A72-24483

Beta-adrenergic blocking effect on canine coronary and systemic hemodynamic adaptation during treadmill exercise

11 p1579 A72-25802

Bicycle ergometer measurements of thermoregulation input and output under wide range of work load and climatic conditions, deriving correlation equation

11 p1579 A72-25874

Maximal oxygen uptake and heart rate during ladder climbing, inclined treadmill running and cycling ergometer tests

11 p1586 A72-26612

Weight loss due to respiratory tract evaporative water loss during exercise, from humidity change, ventilatory exchange and oxygen uptake data

11 p1586 A72-26613

Speed and mechanical work measurements during knee bending and immediate or delayed leg extension exercise, showing muscle elastic potential energy utilization

11 p1587 A72-26615

Hemodynamic variables relation to coronary blood flow and myocardial oxygen consumption during upright bicycle exercise

11 p1587 A72-26618

Water filled volume and strain gage phethysmography for forearm blood flow measurement during isometric exercise

11 p1587 A72-26622

Physical training effect on rat cardiac function and metabolic response to hypoxia

11 p1581 A72-26701

Exercise role in ventilatory acclimatization to graded hypoxia in goats from carbon dioxide response curve measurements

12 p1762 A72-27727

Hemodynamic response to physical exercise stress in dogs with angiotensin-induced acute arterial hypertension

12 p1764 A72-28216

Stress vectorcardiography quantitative analysis of ECG response to treadmill exercise test to establish diagnosis criteria for coronary heart disease

12 p1775 A72-28282

Plasma protein concentration, volume and hematocrit changes during exercise, bed rest and high forward acceleration

12 p1766 A72-28296

Cardiorespiratory response to breathing dense sulfur fluoride-oxygen mixture under physical exercise conditions

12 p1767 A72-28314

Gas mask-caused air flow resistance effects on respiratory and circulatory response to exercise, assessing maximal oxygen uptake

13 p1906 A72-29818

Red blood cell reserve mobilization in healthy and chronically irradiated dogs after treadmill exercise

14 p2074 A72-30379

Cardiac stroke volume measurements during supine bicycle exercise and recovery period, using indicator-dilution technique

14 p2079 A72-30701

Sweating relation to body temperature after exhaustive exercise for various oxygen uptakes and ambient temperatures

14 p2079 A72-30702

Muscle cell ATP, creatine phosphate and lactate concentration changes relation to oxygen uptake during and after exercise

14 p2080 A72-30705

Exercise cardiometer with heart rate display on beat to beat basis, R wave recognition circuit and noise linear filtering efficiency

14 p2082 A72-31092

Cardiac output and body temperature response to prolonged intermittent exercise

15 p2185 A72-31448

Water loss replacement effect during rest and exercise in high temperature environment thermoregulation experiment

15 p2185 A72-31449

Two compartment analog model of thermoregulation during rest and exercise, considering temperature, heat conductance, sweat rate and oxygen uptake

15 p2185 A72-31450

Cardiac cycle length /RR interval/ and QT interval mathematical relationship from ECG obtained during exercise and recovery periods

15 p2187 A72-32747

Unconditioned /muscular load stimulus/ and conditioned /metronome stimulus/ cardiac reflexes in hypnotic and alert states

16 p2353 A72-32991

Ventilatory peripheral chemoreflex response to hypoxia during physical exercise in native highlanders and altitude-acclimated lowlanders

17 p2499 A72-34345

Myocardial lipid and carbohydrate metabolism in fasting men during prolonged exercise

17 p2499 A72-34347

Exercise capacity in a population of domestic fowl - Effects of selection and training

17 p2499 A72-34726

Work capacity and physiological responses to maximum exercise in 54 year old men in relation to heart disease and cardiovascular hazard studies

17 p2505 A72-35822

Hemodynamic thermoregulatory and sympathoadrenal responses to heat acclimatization in man during supine and upright position exercise

17 p2506 A72-35963

Bradycardia diving reflex to apneic face immersion related to physical exercise

17 p2506 A72-35964

Disproportional changes in hematocrit, plasma volume, and proteins during exercise and bed rest

17 p2506 A72-35966

Effect of nicotinic acid on myocardial metabolism in man at rest and during exercise

17 p2506 A72-35968

Correlation between ergometry, ballistocardiography and coronary angiography in 267 patients

18 p2649 A72-36034

Fluid transfer between blood and tissues during exercise

18 p2650 A72-36560

Left ventricular dynamics during handgrip

19 p2755 A72-37243

Systemic haemodynamics in borderline arterial hypertension - Responses to static exercise before and under the influence of propranolol

19 p2756 A72-37773

Changes of the catecholamine content in the brain of albino rats under overstrain caused by running in a rotating drum

19 p2757 A72-38034

Significance of the nature of an increase in physical strain as it affects the adaptation of an organism to intense muscular activity

20 p2891 A72-38933

Variation of the acetylcholine content and of the cholinesterase activity in the blood under muscular strain

20 p2891 A72-38934

A modified acetylene method for the determination of cardiac output during muscular exercise

20 p2898 A72-39807

Muscle metabolism of ATP, CP, glycogen and lactates at rest and during submaximal and maximal exercise

21 p3005 A72-40421

Muscle metabolism during isometric exercise performed at constant force

21 p3005 A72-40425

Chemical energy transformation to mechanical energy and heat in muscles during exercise, considering energy sources for contraction, oxidations, glycolysis and alactic anaerobic mechanism

21 p3003 A72-41470

Effect of hypoxia and physical activity on plasma enzyme levels in man

21 p3003 A72-41522

Effects of physical exercise on spinal reflectivity in man

21 p3003 A72-41524

Effects of externally imposed mechanical resistance on breathing dense gas at exercise - Mechanics of breathing

22 p3150 A72-42489

Heat strain in hot and humid environments

22 p3150 A72-42492

Speech intelligibility during exercise at normal and increased atmospheric pressures

22 p3150 A72-42496

Heat acclimatization by exercise-induced elevation of body temperature

22 p3151 A72-42741

Analysis of femoral venous blood during maximum muscular exercise

22 p3145 A72-42742

Yield of ischaemic exercise electrocardiograms in relation to exercise intensity in a normal population. 22 p3151 A72-42900

Lung volume changes of people in antihistostatic position in hospital beds for control, exercising and muscle electric-stimulated groups 23 p3256 A72-43918

Physical training as a prophylactic measure against the hypodynamic syndrome 23 p3260 A72-43920

Metabolic changes in healthy humans caused by prolonged bed rest in horizontal position, noting prevention by physical exercises and electric muscle stimulation 23 p3260 A72-43921

Animal studies of effect of chronic exercise on the heart and atherosclerosis - A review. 24 p3370 A72-44563

Changes in certain hemodynamic indices during muscular strain in people with differing capacity to perform work 24 p3370 A72-44591

Changes in the pituitary-thyroid and in the pituitary-gonad systems under conditions of functional loading and of physiological immobilization. 24 p3371 A72-44823

Longevity and cardiovascular mortality among former college athletes. 24 p3374 A72-45689

PHYSICAL FACTORS

Human functional level performance characteristics, noting relationship between spontaneous rhythm diurnal variations in psychic and physical performance 11 p1589 A72-26691

PHYSICAL FITNESS

Screening test for physical fitness on bicycle ergometer, comparing endurance indices derived from heart rate, oxygen consumption, oxygen debt and work rate measurements 01 p0010 A72-10212

Pilots oxygen uptake vs flight time and altitude as indicator of physical condition, noting large fluctuations and differences for individual pilots and different flights 05 p0623 A72-16748

Human tilt tolerance relation to aerobic capacity, weight, height and physical fitness, determining correlation coefficient between heart rate and orthostatic response 10 p1428 A72-23733

Hemodynamic criteria for physical fitness in air-men, discussing age dependent variations in heart beat, arterial pressure and body temperature 11 p1590 A72-26987

Physiological and subjective responses of physically fit young men to combined exercise-carbon dioxide stress tests 12 p1767 A72-28311

Exercise capacity in a population of domestic fowl - Effects of selection and training. 17 p2499 A72-34726

PHYSICAL OPTICS

Book - Introduction to optical electronics. 23 p3295 A72-43650

Exact solution of the equations of molecular optics for refraction and reflection of an electromagnetic wave on a semi-infinite dielectric. 23 p3313 A72-43803

PHYSICAL PROPERTIES

Interstellar medium physical properties and distribution, discussing ionization heating by starlight, cosmic X rays and subcosmic rays 01 p0128 A72-10413

Melting atmosphere, atomizing media and consolidation techniques effects on Co base alloy powder products physical properties 02 p0240 A72-11436

Physical properties of transition metals nitrides, carbonitrides and nitride-based cemented hard alloys, discussing carbides stability in presence of high pressure nitrogen 02 p0241 A72-11450

Physical properties of monocarbides of Zr, Nb and alloys in homogeneity range, explaining electronic structure relationship to composition changes 02 p0241 A72-11453

High speed jet noise source physical properties interpretation by theory and scale-model experiments for supersonic transport aircraft noise suppression problem 02 p0154 A72-11973

Critique of self similar solutions for physical property models of laminar boundary layer separation due to adverse pressure gradients, noting viscosity-enthalpy relation 02 p0204 A72-12265

Space environment simulator with ultrahigh vacuum chamber and UV and corpuscular radiation for material samples physical properties in-situ measurement 02 p0201 A72-12701

Titanium melting, casting and molding techniques, discussing shapes, sizes and physical properties 03 p0370 A72-13100

High strength Ti alloys for aircraft accessories structural materials, comparing room temperature physical properties of ultrahigh tensile steels and other alloys 03 p0373 A72-13617

Physicomechanical properties of metals at crystallization temperatures, considering density, viscosity, strength, hardness, elasticity and creep 03 p0378 A72-14219

Aerodynamic noise measurement, discussing physical units, spectral analysis, conversion and correction formulas 05 p0614 A72-17195

Mechanical, technological and physical properties of steel with and without molybdenum 05 p0679 A72-17204

Co and carbide containing alloys, investigating milling and sintering temperature effects on technological and physical properties 06 p0829 A72-17831

Radio galaxy spectra determination from measurements over various frequencies, noting correlation with physical parameters 06 p0879 A72-17859

Cu contents effect on Ti-Cu alloys physical and mechanical properties, discussing beta phase decomposition during annealing 07 p1012 A72-19574

Liquid polysulfide rubber, discussing fabrication method and physical properties 07 p1024 A72-20603

Physicomechanical properties of steel with oxide, sulfide, silicon, phosphorus and mixed metal-non-metal inclusions 07 p1022 A72-20618

Aluminum plated pyrotechnics physical properties and performance for electroexplosive device applications, describing particle size distribution and loading pressure dependence of density 08 p1221 A72-20772

Physical properties, combustion characteristics and applications of pyrotechnic castable composition for smoke generation 08 p1222 A72-20785

Furan resins and chemically resistant furan-fiberglass composites flame resistance, heat distortion and physical properties at high temperatures 08 p1192 A72-21678

Alicyclic dicarboxylic anhydride structure effects on cured epoxidized novalac resin physical and chemical properties 08 p1193 A72-21695

Soviet papers on imperfections of crystalline structure effects on physical and mechanical properties of metals and alloys, covering radiation damage, microdeformations, X ray investigations, etc 08 p1187 A72-21785

Material properties nonuniformities effect on wound fiber glass reinforced plastic rings and cylinders thermoelastic residual stresses 08 p1196 A72-21858

Fiber orientation effects on physical properties of carbon fiber-epoxy resin composites [PI PAPER 3] 09 p1337 A72-22540

Vacuum and inert gas TOR-1 device for studying physical properties of lunar soil and terrestrial analogs 10 p1478 A72-23754

Hot-stage optical microscopes for microhardness measurements at elevated temperatures, describing techniques to determine heat resistant alloys mechanical and physical properties temperature dependence 10 p1478 A72-23827

General dimensional analysis as extension of conventional/restricted/ dimensional analysis of physical phenomena, using progressive homogeneity law and fundamental magnitudes 10 p1503 A72-23918

Pi-theorem alternative formulation, defining independent dimensionless products in terms of universal constants, governing equations and initially and additionally specified physical quantities 10 p1503 A72-23920

Viking Lander physical properties experiments for Martian soil, studying bearing strength, cohesion, adhesion, grain size, porosity, thermal properties and internal friction 10 p1540 A72-24390

Glass network physical properties model, using physical chemistry description of crystal structure without regularly repeating lattice 10 p1502 A72-24735

Carbohydrate based gelling agent for gas turbine fuel, describing development and chemical and physical properties [ASME PAPER 72-GT-9] 11 p1702 A72-25612

Crash safe turbine fuel to reduce fire probability and severity during aircraft ground crash, investigating physical and chemical properties [ASME PAPER 72-GT-28] 11 p1702 A72-25624

Numerical calculation of temperature distribution and tempering depth for inductive hardening process with automatic material feed, taking into account temperature dependent material properties 11 p1639 A72-25898

Stellar atmospheric structure physical parameters from model atmosphere calculations, applying method to G and K stars 11 p1717 A72-25904

Luna 16 automatic probe drilling experiment, obtaining lunar rocks physicochemical properties for comparison with terrestrial rocks 11 p1613 A72-25938

Mechanical, technological and physical properties of steel with and without molybdenum 11 p1660 A72-26139

Organic and metal matrix composites physical and mechanical properties and application to spacecraft and missile components, considering cost effectiveness 11 p1674 A72-26233

Impact glass-like objects as evidence of meteoritic origin of Lunar Crater /India/, discussing physical, chemical and optical properties 11 p1723 A72-26521

Chemical composition, physical properties, microstructure and production of 1300 kg powder metallurgy forged billets 11 p1644 A72-26845

IMPATT diode and transferred electron Gunn devices for systems applications, comparing thermal noise and physical properties 12 p1788 A72-27295

GaAs semiconductor devices role in microwave communications, discussing physical properties and potential applications 12 p1792 A72-27736

Crystal growth, physical and spectroscopic properties and laser performance of Nd and Ho doped crystals with apatite structure 12 p1825 A72-27927

Fabrication, and physical, mechanical and ablation properties of three dimensional carbon-carbon cylinder composite materials 12 p1834 A72-28086

Ethylene-vinyl acetate-asphalt thermoplastic material properties, filler effects, application methods and commercial uses 12 p1835 A72-28094

Haynes high strength heat resistant Ni-Cr-W alloy metallurgical and structural relationship, mechanical and physical properties, oxidation and corrosion behavior and fabrication processes 13 p1973 A72-28649

Stratospheric aerosols physical properties and chemical composition, discussing various measuring techniques and results 13 p1991 A72-28839

Coastal and inland fog microphysical features, discussing visibility, liquid water content, drop size distributions and haze droplet concentrations 13 p1991 A72-28842

Combined thermal, vibrational and dimensional treatments effect on WC-Co alloy physical and mechanical properties, noting tensile and impact strength increase 13 p1979 A72-29480

Effect on physical and mechanical properties of hard metals due to gas sorption by metallic films spray-coated on surfaces, describing vacuum apparatus 13 p1939 A72-29488

High strength carbon fiber reinforced plastics, discussing fabrication techniques, fiber structural, physical and mechanical properties and potential technological applications 13 p1984 A72-30075

Cobalt-base superalloys powder-metallurgical fabrication techniques and related effects on physical and mechanical properties 13 p1982 A72-30126

Superplastic alloys based on Al, Cu, Zn, Mg, Ti and carbon or stainless steels, discussing macroscopic properties and manufacturing cost reduction 14 p2120 A72-30622

Explosives life limitation due to aging phenomena, discussing chemical and physical processes and environmental effects 14 p2143 A72-30752

Russian papers on light and nonferrous alloys structure and properties covering phase diagrams, alloying effects, reduction, crystallization and recrystallization, solid solutions decomposition, etc 14 p2123 A72-31027

Russian papers on rare earth metals and alloys covering physical properties, phase diagrams and industrial applications 15 p2252 A72-31183

Russian papers on intermetallic compounds covering structure, properties and applications of carbides, nitrides, oxides, phosphides, aluminides, antimonides, arsenides and chalcogenides 15 p2252 A72-31192

Physicochemical properties and composition diagrams of antimonides and arsenides of Zn, Cd, Al, In and Ga 15 p2290 A72-31194

- Epoxide resins for application in composite materials, discussing crosslinking reactions, temperature effects on cure, and electrical and physical properties 15 p2260 A72-31441
- Ultrasonic sound influence on metal physical and mechanical characteristics, utilizing in testing and manufacturing procedures 15 p2275 A72-31832
- General analysis and synthesis of alloys and materials with inhomogeneous physical properties, noting thermal physicochemical methods for laminates and metal powders 16 p2405 A72-33095
- Manufacturing process for glass fiber chopped strand mats, discussing physical and electrical properties and applications to filament winding 16 p2414 A72-33303
- Ionized gas-solid suspension thermal physical properties verification by micro-sized MgO dispersion in AR plasma [AIAA PAPER 72-688] 16 p2439 A72-34054
- Re applications technology, discussing production methods, mechanical and physical properties, plasma spraying, annealing and alloying techniques 17 p2567 A72-34825
- Physical property measurements at high temperatures. 17 p2554 A72-34934
- Composite materials sum and product physical properties, considering magnetostrictive and piezoelectric interactions 18 p2717 A72-35996
- Physical-mechanical properties of beryllium oxide and investigation of its electrical resistance under irradiation in a reactor 18 p2703 A72-36147
- Studies of physical-mechanical properties of monocrystall molybdenum and tungsten and electrical characteristics of TIC /thermionic converter/ 18 p2698 A72-36154
- Transition metals physical and mechanical properties, production, refining and vacuum processing techniques 18 p2696 A72-36840
- Properties of lithium greases as a function of the saturation level of commercial 12-oxytetrastearic acid 19 p2823 A72-38093
- A method of improving the physicochemical properties of filled epoxy compounds by treatment in an ultrasonic field 19 p2823 A72-38184
- Super-alpha Ti alloy development, measuring physical and mechanical properties 20 p2936 A72-39205
- Laminar composite materials with special physical properties 20 p2940 A72-39451
- Constitution and property relations regarding ceramics and other multiphase materials 20 p2940 A72-39453
- Physical properties of interstellar matter surrounding binary stars from astronomical spectroscopy, discussing eruptions and photometric changes 20 p2975 A72-40069
- Russian book on electron configuration model of condensed matter based on Hubbard model covering physicochemical properties of transition metals, alloys and compounds 21 p3066 A72-40348
- Russian book - Handbook of aircraft materials. 21 p3072 A72-40459
- Void lattice model for Mo physical properties and equilibrium lattice spacing determination, calculating defect Green function 21 p3066 A72-40623
- Certain physical properties of the borides of cobalt and nickel 21 p3068 A72-40953
- Russian book - Physical chemistry of rare metals. 22 p3190 A72-42802
- Physicochemical properties of rare earth metals for alloying Al, Mg, Cu and Ti, noting getter and permanent magnet materials 22 p3191 A72-42806
- Effect of rare earth metals on the structure and properties of aluminum and its alloys 22 p3192 A72-42818
- Physical properties and electronic structure of $V_{1-x}Cr_x/3Si$ ternary alloys 22 p3192 A72-43014
- Physicochemical properties of fiber carbides 23 p3299 A72-43291
- Physical and chemical properties and stratification of neutral matter in comet atmospheres, discussing neutral gas dynamics and surface brightness distribution in comet images 23 p3335 A72-43299
- Making a product from composites. II. 24 p3412 A72-44556
- Physical parameters of asteroids and interrelations with comets. 24 p3445 A72-45460

PHYSICAL SCIENCES

Physical and biological sciences approaches to attainment of knowledge, noting indeterminateness in organic realm 07 p0934 A72-20394

PHYSICAL WORK

- Age and physique effects on human continuous work capacity, monitoring heart rates during task performance 01 p0018 A72-10568
- Physical training effect on subjective rating of perceived exertion, investigating correlation with heart rate and blood lactate concentration 03 p0319 A72-13678
- Prolonged muscular work effects on erythrocyte 2,3-DPG generation relation to oxyhemoglobin affinity 04 p0472 A72-14898
- Quotient of arrhythmia relation to physical work load, noting heart rate amplitude and frequency variations 04 p0472 A72-14899
- Short and long term mental and physical work effects on central nervous system and motor apparatus in young people 04 p0474 A72-15230
- Optimum duration of human circadian cycle with respect to energy cost during work hours, relating normal cycle change to prolonged space mission stresses 05 p0619 A72-16639
- Rapid ventilatory response in man at work on set for different standard starting commands, discussing relation to work load and conditioning process 05 p0619 A72-16788
- Heart pacemaker activity during muscular exertion, developing mathematical model based on system dynamics transient processes analysis 06 p0764 A72-18059
- Acid-base balance shift during muscular exertion, determining pH and bicarbonate content variation by Astrup micromethod 06 p0765 A72-18062
- Human oxygen intake and blood lactic acid removal kinetics during recovery from mild steady work on bicycle ergometer 10 p1426 A72-24989
- Safe exposure times for men working in high temperature environments, showing hyperbolic heat collapse relationship to environmental severity 10 p1432 A72-24990
- Physical work capacity comparison during bicycle ergometry and treadmill walking tests, measuring oxygen uptake, ventilatory parameters and excess carbon dioxide production 11 p1579 A72-26095
- Simulated gravity environment tests of vertical jump features, recording work performed, body center of gravity upward velocity, potential and kinetic energy changes 12 p1770 A72-27479
- Rigid body model for nonholonomic kinematic linkages of tangentially sliding nonrolling bearings, noting virtual displacements and mechanical work 12 p1845 A72-27539
- Human visual accommodation biorhythm and reactions under hard physical work and visual stress 13 p1909 A72-28749
- Possibilities and dangers during long working periods in space rescue. 17 p2507 A72-34436
- Natural acclimatization to work in severe heat. 17 p2508 A72-34550
- Thermoregulation during positive and negative work at different environmental temperatures. 18 p2650 A72-36559
- Self-paced ergometer performance - Effects of pedal resistance, motivational contingency and inspired oxygen concentration. 18 p2653 A72-36911
- Relationships among isometric forces measured in aircraft control locations. 19 p2761 A72-38706
- The silent period in man during muscle lengthening produced by loading 20 p2892 A72-39590
- Metabolic energy requirements for pushing loaded handcarts, measuring expenditure during treadmill and outdoor asphalt circuit walking 21 p3005 A72-40419
- Hypercapnia with relief of hypoxia in normal individuals with increased work of breathing. 21 p3005 A72-40420
- Evaluation of cardiopulmonary function and work performance in man during caloric restriction. 21 p3005 A72-40423
- Mental and physical workload measure and differentiation in man machine systems 21 p3012 A72-41427
- Oxygen uptake kinetics for various intensities of constant-load work. 22 p3145 A72-42743

PHYSICIANS

- Civil aviation physician duties for airline personnel and passenger benefit, discussing medical advice, health precautions, first aid training, etc 08 p1125 A72-21269

PHYSICS

- Physics - Conference, Bratislava, Czechoslovakia, May 1968 08 p1205 A72-20936
- Physics - Conference, Evian, Haute-Savoie, France, May 1971 11 p1692 A72-26430

PHYSIOGRAPHY

U GEOMORPHOLOGY

PHYSIOLOGICAL ACCELERATION

- Cardiac acceleration by voluntary muscle contractions of minimal duration in men due to vagal tone inhibition 07 p0929 A72-19442
- Human leg muscle reflex excitability changes during angular acceleration, suggesting vestibular apparatus as coordination means in quasi-static and dynamic movement control 14 p2075 A72-30388
- Alcohol ingestion effect on vestibular responses to angular acceleration and Coriolis stimulation, discussing nystagmus and subjective responses 14 p2082 A72-31090
- Airline pilot rotation perception during angular acceleration tests, noting power law description of subjective motion for three major body axes 16 p2358 A72-33649
- Synchronous and asynchronous BASH /body acceleration synchronous with heart beat/ effects on hemodynamics and ventilation in dogs and humans 18 p2648 A72-36033

PHYSIOLOGICAL EFFECTS

- NT HEMODYNAMIC RESPONSES
- NT PHYSIOLOGICAL RESPONSES
- Environmental noise induced human fatigue, considering physiological and psychological effects 01 p0016 A72-10050
- Biochemical and physiological effects of Apollo flight diet, noting no significant variations in serum electrolytes, endocrine values, body fluids and hematologic parameters 02 p0167 A72-11707
- Physiological effects of localized ventilation, noting human comfort improvement association with reductions in average skin temperature and sweat rate 02 p0159 A72-11955
- Physiological effects of transfusing 2,3-diphosphoglycerate (DPG) depleted red cells with high oxygen affinity in anemic hypoxic patients 04 p0473 A72-15211
- Metrology and technology for sounds intense enough for physiological distress and mechanical structure damage, discussing accompanying high temperature and vibration [ONERA, TP NO. 1009] 05 p0661 A72-16024
- Adrenocortical steroids during acute exposure to environmental stresses, noting effects of injected cortisol removal, uptake and release 06 p0763 A72-17874
- Erythrocytes catalase activity and number content relationship in human and albino rats blood, discussing compensatory effects 06 p0764 A72-18060
- Tranquilizers effect on pilot in-flight performance, discussing flight safety, alcohol potentiating effect, student pilot stress reactions and airsickness treatment 06 p0768 A72-18158
- Harmful influence of random vibrations on human organism, discussing Fokker-Planck analysis and amplitude and frequency variation effects 06 p0770 A72-18720
- Ultrasonic transducer monitoring of decompression-caused gas bubbles in rat thigh muscle tissue for decompression sickness time course development studies 07 p0921 A72-20183
- Rhythmiasis as fundamental life characteristic analogous to homeostasis, discussing human circadian rhythm and cycle desynchrony during air travel 07 p0923 A72-20445
- Environmental chamber tests for ozone exposure effects on human pulmonary function at rest and during bicycle exercise 08 p1122 A72-20884
- Physiological evaluation of modified jet transport passenger oxygen mask from altitude chamber experiments 08 p1126 A72-21571
- Diurnal and beat-to-beat variation factors in vectorcardiograms, noting respiratory movements, electrode location shift, skin-electrode impedance and heart electrical center mobility 08 p1127 A72-21849
- Sonic booms effects on domestic and wild animals, discussing field and laboratory findings 09 p1267 A72-23322
- Medicobiological investigations of prolonged weightlessness effects on astronaut physiological system based on Soyuz flight program 10 p1425 A72-24409
- High altitude acclimatization effects on human lung diffusing capacity for carbon monoxide at different oxygen tensions 10 p1425 A72-24476

- Cardiovascular changes produced by whole body vibration of dogs and pigs, obtaining resonant frequencies of organ systems 10 p1426 A72-24484
- Clinical and laboratory examinations of workers exposed to trichlorotrifluoroethane vapor for long range health effects study 10 p1431 A72-24590
- Food deprivation stress effects on urinary excretion values in unrestrained chimpanzees 10 p1426 A72-24822
- Medical and physiological hazards for SST passengers and crews, discussing cumulative cosmic radiation and high altitude decompression risks 11 p1583 A72-25816
- Case report of rapid decompression in supersonic trainer aircraft pressurized cabin, discussing physical and blast effects, pressurization safety, decompression sickness and hypoxia 11 p1584 A72-26020
- Medical evaluation of manned space flight physiological effects, considering Mercury, Gemini and Apollo programs 11 p1585 A72-26100
- Time displacement effects on human physiological and psychological functions, discussing circadian rhythm phase shift and performance deficits 11 p1580 A72-26681
- Time zone transition induced circadian physical disturbance effect on military personnel mental and physiological performance 11 p1589 A72-26696
- Weightlessness effects on human organism, discussing physiological changes, artificial gravity by spacecraft rotation and exercise to counter adverse reactions 11 p1589 A72-26891
- Multihour immersion effects on blood plasma protein and electrolyte concentration in trained and untrained subjects 12 p1770 A72-27480
- Physiological and clinical effects of long distance flight in pressurized commercial planes with simulated altitudes over 15000 meters 12 p1771 A72-27486
- Magnetic storm strength ELF electromagnetic field effects on rabbits, dogs and bacteria, discussing changes in EEG, ECG and blood characteristics 12 p1763 A72-28214
- Ascorbic acid influence on blood coagulation and anticoagulation systems in dogs with acute hypoxia, discussing plasma recalcification time and heparin tolerance 12 p1764 A72-28217
- Plasma protein concentration, volume and hematocrit changes during exercise, bed rest and high forward acceleration 12 p1766 A72-28296
- Physiological effects of intense anticollision flash light backscatter pulses on instrument rated pilots 12 p1775 A72-28303
- Physiological effects on anesthetized and conscious dogs during exposure at 80,000 ft for different decompression rates, discussing cardiovascular, biochemical and pathological effects 12 p1768 A72-28322
- Effects of long periods of clinical death from drowning or lethal blood loss on higher nervous activity in reanimated dogs 13 p1902 A72-28642
- Radioprotectants /mexamine and cystamine/ effects on radio-hematic barrier permeability in rats under hypokinetic conditions 13 p1904 A72-29308
- Hermetic chamber medico-engineering experiment for long term isolation effects on human intestinal microflora, showing reduction and disappearance of certain microbe populations 13 p1904 A72-29323
- Human physiological function variations dependence on hyperthermia levels in high temperature environment 14 p2074 A72-30257
- Lower body decompression effects on ECG, showing heart rate increase, R and T amplitude changes and heart electric axis displacement 14 p2074 A72-30383
- Stepwise altitude acclimatization and subsequent reanimation after blood loss caused clinical death effects on dog peripheral blood erythrocytes, reticulocytes, hemoglobin and hematocrit 14 p2076 A72-30671
- Astronauts physiological and psychological reliability, discussing Apollo flights and prolonged missions to other planets 14 p2079 A72-30677
- Physiological and psychological effects of noise noting vulnerability of circulatory apparatus, neurovegetative system and stomach 14 p2079 A72-30696
- Russian book on functional morphology under extremal space flight conditions covering overloads, hypoxia and hyperoxia effects on organism and cellular structure and metabolism 14 p2077 A72-30996
- Medical factors in air racing accidents, investigating drug, fatigue and gastrointestinal symptoms effects on pilot reaction to emergency 14 p2081 A72-31089
- Technology R and D program to qualify man for long term weightlessness, assessing space flight stress effects on physiology and psychology 16 p2358 A72-33544
- Prolonged weightlessness effects on cardiovascular, digestive, musculoskeletal and nervous systems, blood and metabolism, noting compensatory reactions 16 p2354 A72-33546
- Physiological effects on prolonged weightlessness in dogs aboard Cosmos 110 biosatellite, emphasizing body weight loss and enzyme activity and bone tissue mineral concentration changes 16 p2354 A72-33547
- Weightlessness effects on animal voluntary motor activity and wakefulness from brain and muscle area electrical activity recordings during ballistic flight 16 p2355 A72-33548
- Space environment weightlessness induced perceptual deprivation, considering hand-eye coordination, visual judgments and motion and time perception 16 p2355 A72-33549
- Long term space flight weightlessness and hypodynamic effects on orthostatic and vestibular tolerances, infection susceptibility and drug reactivity 16 p2355 A72-33550
- Weightlessness effects on calcium and electrolyte metabolism from measurements during Gemini 7 flight, using dietary control and excreta collection techniques 16 p2355 A72-33552
- Hypothermia, asphyxia and ionizing radiation effects on rat immunological defense mechanisms against particulate antigens 16 p2355 A72-33555
- Astronauts red cell mass changes associated with space flight due to space and earth environment differences 16 p2356 A72-33564
- Aqueous formaldehyde effects on *Bacillus subtilis* spores, showing sporostasis due to germination inhibition and sporocidic due to temperature dependent inactivation 16 p2357 A72-33772
- Blood coagulation changes at high altitude predisposing to pulmonary hypertension. 17 p2498 A72-34222
- Effects of nitrogen and helium upon pulmonary damage after rapid decompression to 2 torr. [AD-746093] 17 p2508 A72-34544
- Effects of combined O-G simulation and hypergravity on eggs of the nematode, *Ascaris suum*. (DFVLR-SONDDR-225) 17 p2499 A72-34547
- Cell proliferation in lungs of mice exposed to elevated concentrations of oxygen. 17 p2499 A72-34548
- Exercise capacity in a population of domestic fowl - Effects of selection and training. 17 p2499 A72-34726
- Influence of hyperosmolality on left ventricular stiffness. 17 p2499 A72-34727

- The silent period in man during muscle lengthening produced by loading 20 p2892 A72-39590
- Circadian rhythms in physiological and psychological functions related to jet travel, studying body temperature variations and psychomotor performance during isolation and varying light-dark cycle conditions 20 p2897 A72-39723
- Comparison of irregular vibrations of a limited frequency range with sinusoidal vibrations in regard to their effect on man 20 p2897 A72-39804
- Effect of hypoxia on the condition of skeleton muscles in rats under hypokinesia 21 p2998 A72-40433
- Morpho-functional changes in the endocrine system during oxygen starvation 21 p2998 A72-40447
- Separation of central effects of CO2 and nicotine on ventilation and blood pressure. 21 p3001 A72-40918
- Blood serum enzymes activity changes in polytraumatized humans injured in automobile accidents 21 p3002 A72-41188
- Hematological modifications due to acute exposure to heat 21 p3002 A72-41191
- Effect of hypoxia and physical activity on plasma enzyme levels in man. 21 p3003 A72-41522
- Neurophysiological mechanisms of the extinction of the orienting reflex 22 p3142 A72-42280
- Effects of externally imposed mechanical resistance on breathing dense gas at exercise - Mechanics of breathing. 22 p3150 A72-42489
- Effects of the space flight environment on man's immune system. I - Serum proteins and immunoglobulins. 22 p3150 A72-42493
- Adaptive processes responsible for natural acclimatization of human organism to low ambient pressures at high altitudes 22 p3143 A72-42584
- Morphometric evaluation of changes in lung structure due to high altitude. 22 p3143 A72-42585
- Succinic and lactic dehydrogenases activities in homogenates from myocardial tissues of guinea pigs, rabbits and dogs in high altitude environments 22 p3144 A72-42592
- Coronary blood flow and myocardial metabolism in man at high altitude. 22 p3144 A72-42593
- Anatomy of the coronary circulation at high altitude. 22 p3144 A72-42594
- Effects of weightlessness on astronauts - A summary. 23 p3253 A72-43385
- Effects of an 18-day flight on the human body. 23 p3253 A72-43386
- Physiological and hematological effects of chronic irradiation. 23 p3254 A72-43392
- Influence of a preliminary exposure to carbon monoxide on the development of hypokinetic disturbances in albino rats 23 p3255 A72-43909

- Features of a speech signal during cumulative action of Coriolis accelerations 23 p3257 A72-44154
- Physiologic effects of passive hyperventilation on oxygen delivery and consumption. 23 p3258 A72-44365
- Animal studies of effect of chronic exercise on the heart and atherosclerosis - A review. 24 p3370 A72-44563

PHYSIOLOGICAL FACTORS

NT PHYSICAL FACTORS

- Book on physiological approach to ergonomics covering muscular system, performance, work and fatigue, working efficiency and environment, man machine systems, etc 07 p0930 A72-19875
- Flight personnel statistical survey of clinical, physical and psychic causes of temporary and permanent flight service unfitness 07 p0923 A72-20447
- Education and training of personnel for photointerpretation, discussing psychological, physiological and methodological aspects of aerial photointerpretation 09 p1272 A72-23298
- Human performance dependence on time of day, discussing circadian and physiological rhythms relation and environmental change effects 11 p1580 A72-26677
- Transzonal air travel as cause of psychological and physiological rhythm change effects on pilot performance 11 p1589 A72-26694
- Aircraft and other vehicle simulators for training crews, discussing evolution of needs, digital techniques, and visual and physiological experiences 14 p2092 A72-30844
- Visual stimulus orientation effect on movement perception, relating physiological and psychological factors 15 p2184 A72-31368
- Airline management and flight crew role in prevention, detection and dealing with airline pilot incapacitation in flight, noting physiological and psychological factor recognition 17 p2508 A72-34555
- Habitability factors in a rotating space station. 18 p2652 A72-36436
- Mutual relations between different physiological functions in circadian rhythms in man. 22 p3147 A72-42979

PHYSIOLOGICAL INDEXES

U PHYSIOLOGICAL TESTS

PHYSIOLOGICAL RESPONSES

NT HEMODYNAMIC RESPONSES

- Frog Rana temporaria striated muscle tension response recording during sudden fiber length alteration, suggesting force generation mechanism 01 p0009 A72-10017
- Vibration space analysis for human voice characteristics change during unintended speech under experimental psychological stresses and actual emergency situations 01 p0017 A72-10213
- Hypothermia induced by hypoxia in rats, discussing colonic temperature during high altitude exposures and seasonal variations 01 p0011 A72-10214
- Physiological response to affective visual stimuli, observing signal value change effect on forehead pulse amplitude and galvanic skin response 01 p0014 A72-10854
- Mice tolerance to long term accelerations or supergravities, detailing physiological consequences 01 p0014 A72-10934
- Short term response of insulin, glucose, growth hormone and corticosterone to acute vibration stress in rats 01 p0015 A72-11289
- Receptor activity control from clinical physiological and electrophysiological observation data analysis, noting central nervous system role and feedback and self adaption capabilities 02 p0157 A72-11543
- Inert gas narcosis under hyperbaric conditions relationship to mental performance and auditory and visual evoked responses in man 02 p0166 A72-11705
- Heart and respiration rates response to free fall parachuting, using FM/FM telemetry 02 p0167 A72-11709
- Pyramidal tract neuron reactions to antidromic and afferent stimuli in cats, determining somatosensor cortical neurons responses by intra- and extracellular potential outlets 02 p0159 A72-11768
- Bats auditory cortex electrical responses to ultrasonic stimuli, determining maximum sensitivity frequency range 02 p0159 A72-11769
- Ventilatory and metabolic responses of unanesthetized dogs exposed to various carbon dioxide concentrations at 2 and 18 C, discussing oxygen uptake relation to cold 02 p0159 A72-11954

Physical interpretations of physiological control, covering history, biochemical oscillator viewpoint of life and conferences 02 p0160 A72-12039

Alpha-L-fucosidase, beta- and alpha-D-galactosidases and alpha-D-mannosidase activity changes in human placenta at various embryogenesis phases 02 p0163 A72-12294

Retinomotor light/darkness responses phylogenetic variations, discussing retinal elements structural and functional development in fishes and amphibians 02 p0164 A72-12484

Visual response to monocularly and dichoptically presented flashed patterns, discussing physiological mechanism based on cortical visual field concept 02 p0164 A72-12485

Heat exposure effect on Sidman avoidance performance in rats, discussing organism thermoregulatory capacity disruption and shock and body temperature regulation 02 p0169 A72-12525

Physical exercise effect on ECG atrial recovery wave duration and magnitude in humans with A-V blocks 02 p0166 A72-12891

Astronaut zero gravity adaptive responses in performance, locomotion, orientation, sleep and physiological and functional characteristics 03 p0319 A72-13867

Operant conditioning for producing gross motor responses, discussing application to physical medicine and rehabilitation with mentally retarded Downs syndrome children 04 p0478 A72-14706

Daily prolonged exercises effects on human muscle glycogen utilization, noting reduced lactate accumulation and increased free fatty acid levels 04 p0480 A72-15213

Human coagulating and anticoagulating blood system changes due to emotional stress during parachute jumps, noting plasma recalcification time increase 04 p0474 A72-15233

Human vestibulo-ocular responses to oscillatory rotational stimulation during various sleep and arousal stages, discussing Sugie-Jones reflex system mathematical model 04 p0474 A72-15249

Cats cochlea and cochlear nucleus neural responses in auditory masking of low frequency tones, showing phase locked cells progressive desynchronization with intensity 04 p0475 A72-15251

External biodynamic models for human mechanical response to various environmental forces, emphasizing injury mechanisms [AD-736985] 04 p0481 A72-15266

High and low pass filtered clicks lateralization tests, suggesting lateral position discrimination dependence on lf content and cochlear partition apical end 04 p0550 A72-15297

Exercise effects on pulmonary circulation in dogs, measuring pulsatile arterial flow and pressure and vascular input impedance, resistance and hydraulic power 04 p0475 A72-15464

Single olfactory bulb units under cyclic stimulation, observing activity related to inhalation cycle and odor quality 05 p0617 A72-16162

Hypoxia effect on diurnal mitotic activity rhythm of marrow erythropoiesis system of guinea pigs in pressure chamber 05 p0618 A72-16631

Human craniocerebral trauma dependence on impact conditions, giving case histories 05 p0619 A72-16643

Rapid ventilatory response in man at work on set for different standard starting commands, discussing relation to work load and conditioning process 05 p0619 A72-16788

Human taste papillae sensitivity to chemical stimuli, showing stable quality and intensity response patterns 05 p0620 A72-17129

Occipital and vertex visual evoked response relation to sensory information, perception and stimulation 06 p0763 A72-17723

Electromyogram study of antagonist muscles reactions to Achilles tendon percussion or whole body sudden motion via test stand jerking 07 p0915 A72-18864

Electrophysiological responses to maximum exercise in healthy humans from polarcardiographic display of heart vector changes 07 p0916 A72-18891

Suppression of visual evoked responses to low intensity light flashes and shifting stripe patterns during saccadic eye movements 07 p0926 A72-19025

Extraretinal inflow eye position information awareness from experimental load application to eyes in total darkness 07 p0926 A72-19026

Computerized simulation from model of human pupillary motor behavioral response to light, accommodation and fusional inputs 07 p0928 A72-19310

Acid base balance in arterialized capillary blood in men after maximal short duration exercise 07 p0929 A72-19441

Eastbound and westbound transmeridian flights effect on body temperature and psychomotor and visual performance circadian rhythms, discussing readjustment times [AMRL-TR-71-89] 07 p0921 A72-20176

Cardiovascular and respiratory responses to intraarterial injection of K and Na ions in dogs for peripheral receptor site determination 07 p0921 A72-20177

Hyperbaric oxygen exposure effect on cardiovascular system in rats, discussing pulmonary edema relation to hypertensive left ventricular failure 07 p0921 A72-20182

Galvanic skin response techniques for palmar and dorsal sweat detection during motion sickness by vestibular stimulation, comparing arousal and thermal sweat response 07 p0933 A72-20185

Human performance and exhaustion predictive model from responses to exercise and environmental stresses, considering circulation, thermal regulation, work load and oxygen pressure effects 07 p0934 A72-20358

Inhaled oxygen pressure variation effects on adenosines, glucose, lactate and pyruvate levels in rat brains, noting anoxic limit value relation to age 07 p0924 A72-20658

Light-dark cycles and physiological stress stimuli effects on circadian rhythm in rat blood serum serotonin levels 08 p1115 A72-21081

Endurance exercise effect on respiratory capacity in white, red and intermediate muscles in rats, relating fiber type to oxidative capacity 08 p1115 A72-21083

Animal response to sonic booms, considering mink reactions in detail 08 p1119 A72-21909

Respiration in altered gas environment for spontaneous breathing and voluntarily maintained pulmonary ventilation level conditions 08 p1120 A72-22077

Arterial chemoreceptor deafferentation influence on rat respiratory response to hypoxic and hypercapnic gas mixture breathing 08 p1120 A72-22078

Human reactions to sonic boom acoustic stimuli noting startle reflex responses 09 p1267 A72-23320

Calorimetric study of sweating man response to drinking hot saline solution as function of temperature, volume and salinity of ingested liquid 09 p1267 A72-23441

Isolated specific color dependent waveforms of visual evoked response to strong colored lights relating luminance and wave amplitude changes 09 p1267 A72-23500

Sympathetic responses in human skin nerves with accompanying vasomotor reactions induced by emotional, thermal and respiratory stimuli 10 p1424 A72-24241

Single lateral geniculate neuron recording during receptive field-centered flashing spot variations for intensity response function comparison with optic neurons in cats 10 p1427 A72-25177

Lenticular conditioning-shock stimulation effect on cat visual cortex response to light stimuli, noting lateral gyrus photically evoked potential amplitude increase 11 p1578 A72-25801

Cardiovascular responses to positive pressure oxygen breathing from blood pressure and heart and respiratory rate measurements 11 p1584 A72-26017

Electromyogram and myogram responses in phasic stretch reflex under prestrain conditions as index of fusimotor activity level in normal humans 11 p1588 A72-26632

Mountain sickness relation to ventilation response to hypoxia, noting response intensity dependence on peripheral chemoreceptor sensitivity 12 p1771 A72-27481

Cat and rat cardiac and cardiovascular reflexes response to electric pulse stimulation of sensorimotor cerebral cortex 12 p1761 A72-27647

Cat auditory cortex neurons response to auditory and medial geniculate body electrical stimulation 12 p1761 A72-27651

Cerebrospinal fluid pH change effects on cat respiratory response before and after vagotomy, showing vagal activity relation to central chemical control of respiration 12 p1762 A72-27825

Metabolic and hormonal response adaptation to prolonged hypodynamics in water immersion/head out, 12 p1762 A72-27825

noting diurnal and nocturnal differences in circadian rhythms

12 p1765 A72-28267
Parachutist biomedical responses in aerial tow at 110-175 knots, determining heart and respiration rates and urinary catecholamines

12 p1774 A72-28272
Acceleration stress effects on splanchnic blood flow due to organ displacement and neurogenic vasoconstriction in vascular beds

12 p1765 A72-28285
Periodic, continuous and aperiodic white noise effects on human serial decoding performance, relating subjective and autonomic responses

12 p1775 A72-28289
Physiological and biochemical responses of Paramere caudatum to hypo- and hyperbaric stresses, discussing protoplasmic inactivation by high oxygen pressure

12 p1766 A72-28299
Thermoregulation changes during simulated weightlessness of prolonged bed rest, noting lower sweating threshold and decreased vasodilation /autonomic dysfunction/

12 p1767 A72-28301
Circadian rhythms of visual accommodation responses and physiological correlations during target tracking, recording monocular focus state by IR optometer

12 p1767 A72-28306
Physiological and subjective responses of physically fit young men to combined exercise-carbon dioxide stress tests

12 p1767 A72-28311
EEG recording and analysis by analog technique as means of studying human responses to hyperventilation

12 p1767 A72-28312
Cardiorespiratory response to breathing dense sulfur fluoride-oxygen mixture under physical exercise conditions

12 p1767 A72-28314
Pilot and back-seat man physiological responses during high-g aerial combat maneuvers in F-4E aircraft, discussing ECG, respiratory rate and minute volume

12 p1767 A72-28317
Neuroendocrine responses in microwave radiation exposed rats, correlating thyroid and thyrotropic activity

12 p1767 A72-28321
Miniature swine as human analog to investigate physiological response to high positive acceleration, comparing human and animal tolerances

12 p1768 A72-28329
Physiological evaluation of diastole mechanism in rat hypertrophied myocardium as function of heart rate, Ca ion concentrations and temperature

13 p1901 A72-28521
Disposable emergency oxygen mask for air passengers based on continuous flow, phase dilution principle, describing altitude chamber tests with human subjects to study physiological responses

13 p1908 A72-28702
Rat adrenal cortex morphology after 24 hour transverse exercise stress, studying changes in lipid, ascorbic acid and RNA content and acid phosphatase activity

13 p1904 A72-29310
Quantitative model to describe vestibular detection of body sway motion in postural response mode

13 p1905 A72-29374
Mechanical vibration induced physiological changes in rats, determining plasma Ca, Mg and inorganic phosphate concentration and xanthine oxidase activity response to frequency and g-levels

13 p1910 A72-29560
Gas mask-caused air flow resistance effects on respiratory and circulatory response to exercise, assessing maximal oxygen uptake

13 p1906 A72-29818
Alveolar carbon dioxide pressure-ventilation response curve measurement by Campbell rebreathing method in consecutive daily trials

13 p1906 A72-29846
Five-component cyclic model of retinal photopigment kinetics for photochemical changes corresponding to rod adaptation in rat and man in dark

13 p1906 A72-29966
Consensual photopupil responses to light flashes recorded in full dark adaptation, noting bleaching and backgrounds effects

13 p1907 A72-29969
Foveal and nonfoveal afterimages effects on saccadic behavior of eye movement

13 p1907 A72-29971
Cat visual cortex receptive field responses to light bands of variable widths and intervals

14 p2074 A72-30256
Delayed growth of rats carcasses and skeletal muscles during prolonged hypokinesia, comparing effects on flexor muscles to ankle joint extensors

14 p2074 A72-30378

Red blood cell reserve mobilization in healthy and chronically irradiated dogs after treadmill exercise

14 p2074 A72-30379
Visual cortex repetitive stimulation effect on primary response habituation in young normal rabbits and adults with septum pellucidum lesion

14 p2076 A72-30596
Cat cerebellum cortex evoked response impulses interaction during stimulation of hypothalamus and peripheral nerves

14 p2076 A72-30669
Human diaphoretic system physiology, discussing skin surface sweat excretion intensity relation to optimal balancing process in thermoregulation

14 p2076 A72-30672
Human organism readaptation after prolonged hypokinesia and weightlessness, discussing coordination disturbances, vegetative and vascular system instabilities, reduced orthostatic stability and asthenia

14 p2076 A72-30745
Platelet electrophoretic mobility response to adenosine diphosphate /ADP/ in patients with coronary artery disease

15 p2183 A72-31283
Human cerebral hemodynamic changes during arousal and orienting reactions to auditory stimuli

16 p2353 A72-32993
Long term weightlessness-induced physiological response normalization by muscle bioelectrostimulation, muscular tissue energy load increase and mineral metabolism stabilization

16 p2354 A72-33543
Organism response to extreme overload factors, discussing centrifuging and vibration stress effects on mean swimming time and post-irradiation survival time in mice

16 p2355 A72-33554
Psychological and physiological parameters correlation for astronaut functional state relation to emotional tension level during ground and flight tests

16 p2356 A72-33563
Simulation of the human cardiovascular system - A model with normal responses to change of posture, blood loss, transfusion, and autonomic blockade.

17 p2507 A72-34445
Vestibular behavior of fish during diminished g-force and weightlessness.

17 p2499 A72-34549
Natural acclimatization to work in severe heat.

17 p2508 A72-34550
Heat, noise and vibration stress combined effects on skin and rectal temperature, heart rate, weight loss and biochemical urinalysis

[AD-746083] 17 p2508 A72-34551
Stress and adaptation responses to repeated acute acceleration.

17 p2500 A72-34729
Linear-nonlinear-linear transition as a function of frequency in the retinal response to light.

17 p2508 A72-34885
Changes of intracellular myocardial electrolytes in experimental hypertension.

17 p2501 A72-34984
Ion alterations during myocardial ischemia.

17 p2502 A72-34994
Influence of thermal, osmotic, and chemical stimulations on food and water intake

17 p2504 A72-35016
New data on physiological adaptations to arid zones

17 p2504 A72-35021
Russian book - Intracranial blood circulation under conditions of accelerations and weightlessness

17 p2509 A72-35460
Work capacity and physiological responses to maximum exercise in 54 year old men in relation to heart disease and cardiovascular hazard studies

17 p2505 A72-35822
Functional development of the altitude convulsion mechanism in mice and rabbits /Research note/.

18 p2650 A72-36445
Role of the autonomic nervous system in the hypoxic response of the pulmonary vascular bed.

18 p2650 A72-36572
Optokinetic thresholds in the normal monkey.

18 p2651 A72-36610
Electrical stimulation of vestibular nuclei - Effects on light-evoked activity of lateral geniculate nucleus neurones.

19 p2758 A72-38220
Frequency response studies of human and avian respiratory regulation.

19 p2761 A72-38229
Receptive fields of units in the visual cortex of the cat in the presence and absence of bodily tilt.

19 p2758 A72-38646
Influence of rhythmic photostimulation on lower-order monkeys with hyperkinesia of post-encephalitic origin

20 p2890 A72-38930
Myogenic and eardrum evoked auditory potentials and cortical responses to 0.2 millisecond voltage pulse acoustic stimuli

20 p2891 A72-38932

Hemopoiesis in the pig-tailed monkey Macaca nemestrina during chronic altitude exposure.

20 p2892 A72-39344
Hematologic responses to hypobaric hypoxia.

20 p2892 A72-39345
Effects of chloralose-urethan anesthesia on temperature regulation in dogs.

21 p2997 A72-40426
A possible anatomical basis for descending control of impulse transmission through the dorsal horn.

21 p2998 A72-40578
Blood vessel reactions to natural defense and conditioned reflexes from plethysmography and blood pressure measurements, discussing cortical effects mechanisms

21 p3000 A72-40758
Tilt table tests for orthostatic tolerance, measuring heart rate, blood pressure and responses of fainters and nonfainters

21 p3008 A72-41020
Adrenaline and noradrenaline metabolic stages and production mechanism under various physiological and pathological conditions, noting application to flight emotional stress detection

21 p3002 A72-41196
Visual experience as a determinant of the response characteristics of cortical receptive fields in cats.

21 p3003 A72-41461
The prediction of the condition of man during a space flight

22 p3149 A72-42067
Effect of fasting on tolerance to moderate hypoxia.

22 p3150 A72-42487
New mechanical device for producing traumatic shock in dogs - Circulatory and respiratory responses.

22 p3142 A72-42490
Heart rate variability in a binary choice reaction task - An evaluation of some scoring methods.

22 p3143 A72-42550
The carotid body in animals at high altitude.

22 p3143 A72-42589
Suprapontine influences on hypoxic ventilatory control.

22 p3143 A72-42590
Histological analysis of hypoxia exposure effects on mouse skin homograft reaction due to lymphatic organ function changes

22 p3144 A72-42675
Time series analysis of meteoropathological disturbances of human regulation mechanisms, investigating annual variations of diurnal rhythms

22 p3147 A72-42977
Electrophysiological investigation of the excitation and inhibition processes in the auditory cortex

22 p3148 A72-43165
Limbic-neocortical, cardiovascular and hormonal system vegetative shifts associated with emotional behavior response, presenting neurogenic stress model for animals

22 p3148 A72-43166
Nervous mechanisms of the acoustic stress reaction

22 p3148 A72-43169
Calcium metabolism under stress and in repose.

23 p3254 A72-43389
Pyrogenal injection test for hematopoietic tissue function in dogs, describing response as transient leukopenia followed by pronounced leukocytosis due to bone marrow granulocyte ejection

23 p3255 A72-43911
Otorhinolaryngological organ response during hypokinetic antiothostatic bed rest for control, exercising and muscular electric-stimulated groups

23 p3256 A72-43917
The simultaneous action of stimulants and tranquilizers on the efficiency of a human operator

23 p3260 A72-43923
Electrophysiological analysis of limbic-reticular interaction during the orientating reflex

23 p3257 A72-44081
Responses of anterior suprasylvian gyrus neurons to peripheral stimuli of different modalities

23 p3257 A72-44090
Sensitivity of the human ERG and VECP to sinusoidally modulated light.

23 p3258 A72-44383
Techniques for analysing differences in VERs: Colored and patterned stimuli.

23 p3258 A72-44387
Ensemble characteristics of the human visual evoked response - Periodic and random stimulation.

24 p3374 A72-44575
Analysis of changes in thermal regulation after destruction of the medial preoptic area of the hypothalamus

24 p3371 A72-44593
Eye movements evoked by collicular stimulation in the alert monkey.

24 p3371 A72-44906
First-breath response of medullary inspiratory neurones to the mechanical loading of inspiration.

24 p3372 A72-44959
Comparison of three methods for quantitating respiratory response to hypoxia in man.

24 p3372 A72-44960

Response to daily lower body negative pressure /LBNP/ exposure /-70mm Hg/, with emphasis on plasma renin activity, sodium and potassium excretion. 24 p3377 A72-45658

Human physiological responses to high magnitude short duration positive accelerations, considering peripheral vision loss as function of time 24 p3377 A72-45660

PHYSIOLOGICAL TESTS

NT BODY SWAY TEST
NT CARBOXYHEMOGLOBIN TEST
NT EAR PRESSURE TEST
NT VESTIBULAR TESTS

Screening test for physical fitness on bicycle ergometer, comparing endurance indices derived from heart rate, oxygen consumption, oxygen debt and work rate measurements 01 p0010 A72-10212

Optimum muscle work conditions experiments with rabbits, correlating total work performance and power output with muscle temperature variations 02 p0160 A72-12013

Femoral arterial blood pressure third order waves onset mechanism in narcotized dogs, noting changed blood and respiration dynamics 02 p0160 A72-12014

Acute hypercapnia neurotropic effect in rabbits, describing carbon dioxide inhalation period, preanesthetic and narcotic stages and recovery phase 02 p0160 A72-12015

Monotonous auditory stimulation frequency effects on human orienting reaction habituation and sleep onset 02 p0169 A72-12494

Auto- and cross correlation functions for neuron reactions in vasomotorial center to adequate stimulation of cats vestibular apparatus 06 p0762 A72-17673

Organism blood volume and losses determination by measuring human body electrical resistance, noting unsatisfactory results 06 p0768 A72-17994

Visual acuity measurement methods, comparing angular acuity by Beyne optometer and morphoscopic acuity by Mercier optometric scale 07 p0927 A72-19246

ECG evidence of myocardial ischemia in patients without arteriographic evidence of coronary artery disease, studying myocardial oxygen supply 07 p0920 A72-19995

Asthmatics evolution and treatments in armed forces aircrews, noting acetylcholine test 08 p1125 A72-21270

Temporal summation function form change during dark adaptation, noting relationship to change under other stimulus manipulations 09 p1269 A72-22616

Respiration function testing device using spirometers and gas analyzers 09 p1272 A72-23256

Physiological index changes in parachutists of various ages, considering plasma recalcification, blood prothrombin, heparin time, fibrinolytic activity, pressure and heart beat 11 p1590 A72-26988

Visual acuity measurement by dynamic and static tests as function of target velocity and exposure time 13 p1911 A72-30042

Standardization of microwave irradiation experiments on animals, discussing power density level evaluations and local vs whole-body irradiation effects 14 p2080 A72-30746

Annual clinical and physiological evaluation of test pilots physical performance over ten year period from body composition, pulmonary function and work capacity measurements 14 p2082 A72-31093

Effects of instructions on measures of state and trait anxiety in flight students. 17 p2507 A72-34464

Rhesus monkey retinas ultrastructural alteration and damage in rods and cones produced by Q switched ruby laser coherent radiation 17 p2509 A72-35396

Study of bilateral cortical nerve connections between the preoral gyrus and various cortical regions 20 p2891 A72-39323

Problem of artificial gravitation in terms of experimental physiology 21 p3006 A72-40441

Separation of central effects of CO2 and nicotine on ventilation and blood pressure. 21 p3001 A72-40918

Body orientation under vertical sinusoidal vibration. 21 p3008 A72-41019

The Macruz index and its clinical evaluation in electrocardiography with regard to the selection and control of air crews 21 p3009 A72-41193

Potassium chloride test for electrocardiogram evaluation in flight personnel medical appraisal 21 p3012 A72-41747

Prediction of vegetative reactions in the case of stress and extreme effects upon the organism 22 p3149 A72-42069

Thirty day experiment for assessment of weightlessness simulation test methods and evaluation of applicable prophylactics 23 p3259 A72-43912

Health condition changes in test subjects during strict bed rest in hypokinetic recumbent and antiorthostatic position subject to lower body negative pressure 23 p3259 A72-43913

Changes in the impulse activity of cortical neurons during selective reinforcement of a chosen range of their interpulse intervals 23 p3257 A72-44087

Post-synaptic potentials of motor neurons of the facial nerve nucleus evoked by afferent and corticofugal pulse stimulation 23 p3257 A72-44091

Classification of neurons in the lumbosacral section of the spinal cord according to their discharge during evoked locomotion 23 p3257 A72-44092

Biochemical and physiological evaluation of nourishment of subjects feeding on dehydrated products in test chamber with regenerative life support system, discussing metabolic data and hormone function 24 p3375 A72-45128

PHYSIOLOGY

NT AUDIOLOGY
NT BODY COMPOSITION [BIOLOGY]
NT ELECTROPHYSIOLOGY
NT HEMATOPOIETIC SYSTEM
NT NEUROPHYSIOLOGY
NT PSYCHOPHYSIOLOGY
NT RESPIRATORY PHYSIOLOGY

Foresight, forecast and prognosis concepts in physiology, discussing intuition role and relation between molecular and cellular processes and organism activity 02 p0163 A72-12346

Energetic motor activity rule hypothesis for physiological mechanisms of certain ontogenesis patterns, suggesting motor activity as excess anabolism induction factor 09 p1264 A72-22225

Russian book - Mechanisms regulating physiological functions 17 p2503 A72-35014

Clinical observations as a research method in physiology 17 p2504 A72-35017

PIASECKI MILITARY AIRCRAFT

U MILITARY AIRCRAFT

PICKLING

U CHEMICAL CLEANING

PICKOFFS

U SENSORS

PICTURE TUBES

Color TV tube design without difference current generator, describing scanning unit saddle coils fabrication technique 18 p2667 A72-36678

PIERCING

Metal barrier maximum puncturable thickness dependence on high velocity meteorite particle impact parameters 22 p3234 A72-42217

PIEZOELECTRIC CRYSTALS

Piezoelectric interaction between Lamb waves and charge carriers in piezoelectric plate inserted into semiconductor 06 p0865 A72-17388

Lamb waves interaction with conduction electrons in piezosemiconductor, deriving dispersion equation for CdS wafers 06 p0865 A72-17393

Piezoresonance modulation of IR amplitude in GaAs crystal by electric field at single, doubled and quadrupled frequencies 06 p0866 A72-17843

Thin films thickness control by piezoelectric quartz crystal, discussing electrically excited oscillations wavelength and damping characteristics 07 p0990 A72-20285

Piezoelectric quartz crystal microbalance for material outgassing and optical element contaminant film measurements 12 p1806 A72-27043

Torsional crystal measurements of viscosity for He 4 and He 3-He 4 mixture at lambda points 12 p1888 A72-27388

Surface piezoelectric effects of mechanical bending of noncentrosymmetric CdS semiconductor wafers 13 p2020 A72-28524

Radiation coherence enhancement in pulsed semiconductor injection laser by voltage controlled barium zirconite piezoceramic element 15 p2245 A72-31416

Nondispersive guidance structure for acoustic surface waves due to velocity reduction of thin conducting strip on piezoelectric substrate 15 p2278 A72-32506

Piezosemiconductor crystals acoustoelectric surface domain waveguide effect for classical and transverse surface waves 16 p2441 A72-33596

Rayleigh wave propagation on a piezodielectric-semiconductor boundary 17 p2596 A72-35541

PIEZOELECTRIC GAGES

Variable torque determination in precision work technology, discussing electronic measurements of length, shaft deformation, torsion angle and force 14 p2104 A72-30485

PIEZOELECTRIC TRANSDUCERS

NT PIEZOELECTRIC GAGES

Multi-electrode piezoelectric chip ultrasonic transducer, sampling and readout techniques for radioisotope encapsulation testing 01 p0069 A72-10810

Gas turbine rotor disk and blade vibrations piezoelectric measurement, describing capacitive transmitter system devoid of rotor mounted power supplies 02 p0232 A72-12735

Ultrasonic resonance thickness gage sensitivity and accuracy, noting damper, piezoelectric plate, protector and frequency band influence 03 p0361 A72-13986

Acoustic emission systems application to materials nondestructive testing, discussing single and multiple piezoelectric transducer arrays with on-line computer analysis [SAE PAPER 720175] 06 p0819 A72-17323

Acoustic wave detection in strain transducer consisting of silicon insulated gate field effect transistor with piezoelectric film incorporated in insulator region 08 p1168 A72-21556

Statistical analysis of piezoelectric transducer voltage-displacement characteristic, determining linearity deviations magnitude 09 p1317 A72-23676

Transducers for piezoelectric detection of torsional waves for wire chambers 10 p1480 A72-24212

Electromechanical coupling and acoustic impedance response in piezoelectric transducer with diffusion under fixed charge 11 p1636 A72-26590

Piezoelectric transducer for indirect on-wrist blood pressure measurements for clinical environment 12 p1772 A72-27961

Laplace transformation for mechanical response of piezoelectric composite transducer under action of thermal field and electric potential, noting time dependent modulus of elasticity 13 p1955 A72-28621

Frequency method of mechanical impedance monitoring of natural frequency of transducer-article system under load in defectoscopy 13 p1956 A72-28923

Physical operation principles of semiconductor sensors using deformation potential for mechanical stress detection and measurement 14 p2104 A72-30445

Acoustic surface wave chirp filters application in pulse compression radar system, considering various piezoelectric substrate materials characteristics 14 p2089 A72-31045

Embedded piezoelectric quartz crystal transducer with Hopkinson pressure bar to measure internal dynamic stress 15 p2240 A72-32433

Piezoelectric shock transducers system performance tests, assessing previously recorded shock signatures 16 p2393 A72-33636

Piezoelectric waveguide generalized treatment via field representation by sum of normal mode waves, using modified orthogonality relation 16 p2369 A72-33761

High-frequency ultrasonic devices. 17 p2526 A72-34564

Theory for the excitation of SHF elastic waves by multiple-film transducers /Allowance for the influence of metallic and dielectric layers/ 17 p2529 A72-34843

Some uncommon electric transducers for the measurement of mechanical quantities. 18 p2690 A72-36369

Effect of electrode thickness on the frequency response of a piezoelectric transducer 18 p2693 A72-37218

A technique for position sensing and improved momentum evaluation of microparticle impacts in space. 19 p2795 A72-37518

Room temperature operation of microwave acoustic delay lines with magnesium aluminate spinel, discussing acoustic mode conversion and shear wave piezoelectric transducers 19 p2800 A72-37875

Analysis of piezoelectric thin-film transducers for elastic surface waves. 19 p2804 A72-38607

Pulsed operation mode of acoustic system of damper-piezovibrator-layer load connected into electrical circuit of thyatron generator
19 p2805 A72-38764

Acoustic emission experiments design based on piezoelectric transducer, discussing signal detection and data acquisition methods
20 p2924 A72-39278

Response of the average pressure acting on the surface of an emitting circular transducer due to different reflecting objects.
21 p3055 A72-40948

Pressure dependence of electrical characteristics of semiconductor sensors using deformation potential for mechanical stress detection and measurement
21 p3056 A72-41109

Application of piezoelectric transducers for the measurement of static pressures
21 p3035 A72-41811

Allowance for the striking angle of a meteoric body with penetration-depth and piezoelectric sensors in the evaluation of the spatial density of meteoric matter
22 p3234 A72-42219

Miniaturized piezoelectric transducer electronics versus charge amplifiers - A comparison of the two systems in vibration and pressure applications.
22 p3159 A72-42702

A preamplifier with high input impedance for use with piezoelectric sensors
22 p3160 A72-42923

On mechanical response of a non-uniform piezoelectric transducer under the influence of a body-force.
23 p3291 A72-44316

PIEZOELECTRICITY

Transverse acoustoelectric surface wave domain in piezo-semiconducting body, obtaining gain coefficient and generation threshold criterion
05 p0702 A72-16283

Two terminal semiconductor strain tensor based on evaporated piezoelectric layer for modulation of forward I-V characteristics of thin film diode
08 p1164 A72-20925

Piezoresistance magnitude and temperature dependence changes of electron irradiated n-type silicon due to oxygen vacancy complex /A center/
09 p1372 A72-23239

Telecommunications ultrasonic resonators, electromechanical and piezoelectric filters and microacoustic surface elastic wave devices
09 p1281 A72-23468

Coupled electroelastic vibrations of piezoceramic cylinders from polycrystalline electrostriction theory, taking into account mechanical and dielectric losses
14 p2132 A72-31117

Piezoelectric substrate covered with semiconductor layers, calculating sound amplification characteristics at microwave frequencies
15 p2197 A72-31893

Be doped p-type Si piezoresistance and hole transport properties dependence on temperature, crystal orientation and doping concentration
16 p2442 A72-33834

Composite materials sum and product physical properties, considering magnetostrictive and piezoelectric interactions
18 p2717 A72-35996

Acousto-optic modulation with coupled Gunn oscillator-piezoelectric structure.
20 p2960 A72-39702

Amplification of acoustic surface waves under transverse magnetic field in coupled intrinsic semiconductor-piezodielectric systems.
20 p2960 A72-39703

Method of eigenfunctions in problems of thermoelasticity and electroelasticity
21 p3122 A72-41348

Electromagnetic waves interaction with transverse waves of thin piezoelectric plate in waveguide, noting transformation into acoustic waves
23 p3312 A72-43407

PIEZOMETERS

State of gas parameters measurement apparatus at high temperatures and pressures involving constant volume piezometer with internal heating
06 p0814 A72-17616

PIEZORESISTIVE TRANSDUCERS

NT PIEZOELECTRIC GAGES
Viscously damped miniature piezoresistive biaxial accelerometer for operation in single cavity to 250 F
22 p3179 A72-42701

PIGEONS

Component duration and relative response rates in multiple schedules of pigeon training
08 p1128 A72-22175

PIGMENTS

NT CHLOROPHYLLS
NT CYTOCHROMES
Porphyrin exobiology, discussing organic and random biosynthesis and extraterrestrial existence based on interstellar spectral evidence
05 p0617 A72-16130

Phase shifting effect of light on circadian rhythm and photoreceptive pigment location in Drosophila in postupation stages
07 p0919 A72-19536

Zirconium dioxide white pigment coatings for spacecraft thermal control, discussing impurities effects on optical absorption properties
07 p1023 A72-19692

High purity fine particle pigment materials preparation for spacecraft thermal control coatings, discussing hydrothermal, cryochemical and vapor phase processes
10 p1500 A72-24145

Apollo 12 material effect on tobacco tissue cultures, noting pigment increase
12 p1761 A72-27626

Five-component cyclic model of retinal photopigment kinetics for photochemical changes corresponding to rod adaptation in rat and man in dark
13 p1906 A72-29966

Nitriles, nitrogen bases and prophyrin-like pigments catalytic synthesis products analysis by mass spectroscopy gas and other chromatographies
14 p2157 A72-30583

Human retinal rod rhodopsin bleaching and regeneration measurements, tracing dark adaptation curves
15 p2184 A72-31364

Dark adaptation studies of bleach-induced visual threshold rise and subsequent return to rhodopsin level
15 p2184 A72-31365

Lamellar structure and rhodopsin location in bleached and unbleached rod photoreceptor membranes of dark adapted frog retinas by X ray diffraction study
15 p2186 A72-32199

The distribution of the long wave photoreceptors in the compound eye of the honey bee as revealed by selective osmic staining.
17 p2500 A72-34877

Electroretinographic evidence for a photopic system in the rat.
17 p2500 A72-34878

Fly colour vision.
18 p2651 A72-36609

Isolated retina receptor potential amplitude relation to visual pigment bleaching kinetics, indicating excitation-inhibition receptor response generation mechanism
19 p2756 A72-37830

Spectral sensitivity after prolonged intense spectral light exposure of rhesus monkey corneas, demonstrating long term loss of cone photopigment response
21 p3000 A72-40739

The presence of P700 in chloroplast fragments prepared by short time incubation with Triton X-100.
23 p3258 A72-44325

The photopigment bleaching hypothesis of complementary after-images - A psychophysical test.
23 p3258 A72-44376

Light absorption by visual pigment in photoreceptor, noting Airy disk diameter effect
23 p3259 A72-44388

PIGS [SWINE]

U SWINE

PILOT ERROR

Aircraft accident statistical projections from human error review, analyzing situational circumstance limitations
14 p2081 A72-31086

Airplane attitude display motion relationship to external world as factor in pilot error due to visual frame of reference shift
14 p2083 A72-31151

Grouping of the causative factors in investigation of aircraft accidents attributed to pilot errors.
17 p2508 A72-34557

Relation between a pilot's sensory perception of linear accelerations and the aircraft motion.
24 p3377 A72-45654

PILOT PERFORMANCE

Foot forces exerted at various aircraft brake-pedal angles, observing 20 degree zone with maximum effectiveness
[AD-733551] 01 p0018 A72-10567

Soyuz 9 flight crew physiological data, discussing mental and physical performance and adaptation and readaptation to space-earth environments
01 p0020 A72-10933

Navigators, pilots and airman trainees response to Coriolis accelerations, investigating nystagmus sensitivity coefficient relationship to motion sickness resistance
01 p0021 A72-11286

Disorientation and related experiences reported by pilots flying several aircraft types, comparing with previous reports
01 p0021 A72-11288

Pilots in aircraft systems management involving machine and air traffic environment
03 p0309 A72-13419

Moving display visibility effect on pilot tracking performance, discussing dependence on illumination intensity and color
04 p0477 A72-14445

Collision avoidance systems and pilot warning instruments, minimizing cost by pilot detection, evaluation and avoidance execution
04 p0545 A72-14823

Pilot in-flight incapacitation probability from airline reports, career termination studies and questionnaire responses
04 p0479 A72-14870

Feedback gains for STOL aircraft display pilot interactive flight director design, using computerized approach-touchdown simulation and optimal control theory
[ASME PAPER 71-WA/AUT-9] 05 p0684 A72-15956

Pilot perception tests on estimating flight path inclination, ground image and touchdown time under poor visibility
05 p0684 A72-16180

Pilots oxygen uptake vs flight time and altitude as indicator of physical condition, noting large fluctuations and differences for individual pilots and different flights
05 p0623 A72-16748

General aviation type light airplanes pilot workload during steep landing approach, comparing flight tested control response parameters with handling qualities criteria
[AIAA PAPER 72-125] 05 p0613 A72-16941

Pilot evaluation of Boeing 747 handling, directional stability, stall, rudder feel forces, landing, inertial navigation and reliability
05 p0614 A72-16992

Emotional aspects of pilot performance under high stress in emergency situations, discussing psychophysiological training methods
05 p0623 A72-17098

Airline pilot performance in automated ATC system involving use of surveillance data and instantaneous discrete communications
06 p0844 A72-17331

Pilot role in automated ATC system using onboard situation display with navigation and collision avoidance devices
06 p0844 A72-17332

Airline pilot postexercise electrocardiograms, showing S-T segment depression correlation to subsequent coronary heart disease
06 p0768 A72-17881

Tranquilizers effect on pilot in-flight performance, discussing flight safety, alcohol potentiating effect, student pilot stress reactions and airsickness treatment
06 p0768 A72-18158

Psychophysiological potentials of pilots in simulated emergency situations, investigating motor reaction time, signal selection time, error number and type and processed information amount and rate
06 p0769 A72-18199

Aircraft pilot performance during instrument approach in low visibility conditions
07 p0925 A72-18832

Selective attention dichotic listening test as flying proficiency prediction criteria, discussing omission and intrusion errors
07 p0929 A72-19351

Sleep pattern relation to duty hours of aircrew operating worldwide east-west routes
07 p0932 A72-20178

Hypoxia effect on aircraft pilot performance during altitude and flight simulation, testing instrument landing approaches
[AMRL-TR-71-97] 07 p0933 A72-20186

Hypnotic drug use effect on pilot performance and flight safety, using glutethimide, flurazepam and placebo in double blind study
07 p0933 A72-20188

Physiological evaluation of crew piloting qualities, considering nervous/emotional stress, ECG, arterial pressure and breathing frequency recorded on simulator
07 p0934 A72-20375

Kalman filter estimator for nonlinear human pilot model parameters including time delay
08 p1145 A72-20861

Pilot and ATC radar controller workload variations relation, discussing distraction stress effects
09 p1271 A72-23132

Pilot warning systems for visual midair collision avoidance, noting reaction to imminent threats, scanning patterns and display sector size effects
[SAE PAPER 720312] 11 p1583 A72-25576

Case report of fighter pilot disorientation episode during night flying exercise, suggesting psychological stress factor
11 p1584 A72-26019

Transnational air travel as cause of psychological and physiological rhythm change effects on pilot performance
11 p1589 A72-26694

Factor analysis of grades for successful performance skill identification during undergraduate and graduate jet pilot training
12 p1769 A72-27472

Computer analysis of helicopter pilots eye movement patterns dependence on visual task skill and performance time

12 p1770 A72-27475

Vestibular, auditory, acceleration and altitude decompression testing of pilot following endolymphatic shunt surgery for Menieres disease

12 p1771 A72-27485

Flight tests of stability augmentation system for light airplane improving pilot control during IFR encounter

12 p1754 A72-27513

Project pilot criteria for preparation and execution of flight test specifications

12 p1754 A72-27517

Pilot evaluation of C-5 automatic landing system in Category III weather environment

12 p1842 A72-27521

Russian book on pathophysiological principles of air and space pharmacology covering stress and fatigue reduction and pilots and astronauts performance improvement

12 p1772 A72-27926

Pilot-aircraft system model for relationship between weapons delivery accuracy and manual flight control system design, noting display, computation and control aids to pilot

12 p1773 A72-28121

Arterial blood gas tensions, using sequential phased dilution for pilot oxygen delivery

12 p1764 A72-28255

Motion sickness experience correlations to vestibular tests in pilots and nonpilots

12 p1764 A72-28257

Semicircular canal function correlation to thresholds, aftereffects and power functions in pilot vestibular tests

12 p1764 A72-28259

Pilot glide slope and localized tracking performance during successive in-flight simulated ILS approaches

12 p1773 A72-28260

Biothermal response of increased core temperature in rhesus monkey to mechanical vibration, noting implications for pilot performance during prolonged buffeting

12 p1774 A72-28268

Angular oscillation in yaw effect of pilot visual performance, showing vestibulo-ocular compensation and frequency response

12 p1774 A72-28269

Mathematical expression for pilot incapacitation applied to data from high stress/short duration encounters with environmental problems

12 p1775 A72-28284

Workload modification effects on pilot neurological changes during Boeing 707 letdown, approach and landing

12 p1775 A72-28290

Physiological effects of intense anticollision flash light backscatter pulses on instrument rated pilots

12 p1775 A72-28303

Hypoxia effect on aircraft pilot performance, using Link GAT 1 trainer and controlled composition atmosphere under varied altitude conditions for simulated ILS landing approaches

12 p1776 A72-28310

Pilot pursuit tracking performance under acceleration stress, simulating high performance aircraft dynamics via human centrifuge equipped with simulated head-up predictive gunsight

12 p1776 A72-28320

FAA program for revision of aviation aircraft maximum allowable control forces specifications, taking into account female pilots capabilities

12 p1777 A72-28325

Medication effects on pilot performance, covering tranquilizers, sedatives, antibiotics, stimulants, anticholinergics and hypotension drugs

13 p1909 A72-28750

Pilot landing performance prediction criteria based on day and night carrier qualification trials and flight training

14 p2081 A72-31084

Medical factors in air racing accidents, investigating drug, fatigue and gastrointestinal symptoms effects on pilot reaction to emergency

14 p2081 A72-31089

Annual clinical and physiological evaluation of test pilots physical performance over ten year period from body composition, pulmonary function and work capacity measurements

14 p2082 A72-31093

Stapedectomy postoperative complications as flying hazard, discussing pilot reaction to middle ear pressure changes

14 p2082 A72-31094

General aircraft accident investigation approach, using subsequent psychosocial reconstruction of pilot lifestyle to explain accident-producing behavior

14 p2082 A72-31095

Pupil reflex loss /pupillotonia/ diagnosis in pilots, testing sensitivity to methacholine chloride [AD-744368]

14 p2082 A72-31096

ECG heart rate recording of helicopter instructor pilots during flight training tasks, administrative work, automobile driving and eating

14 p2082 A72-31097

Airplane attitude display motion relationship to external world as factor in pilot error due to visual frame of reference shift

14 p2083 A72-31151

Aircraft pilot reaction capability for switch activation in response to voice countdown, tone initiation and termination, noting standard deviation

15 p2188 A72-31787

Airline pilot rotation perception during angular acceleration tests, noting power law description of subjective motion for three major body axes

16 p2358 A72-33649

Airline management and flight crew role in prevention, detection and dealing with airline pilot incapacitation in flight, noting physiological and psychological factor recognition

17 p2508 A72-34555

Performance measurement in helicopter training and operations.

17 p2509 A72-35550

Pilot-fighter aircraft system mathematical model relating pilot performance to air to ground weapon delivery accuracy

17 p2493 A72-35564

Congruent and spurious motion in the learning and performance of a compensatory tracking task.

17 p2510 A72-35692

Human factors engineering techniques in pilot-aircraft-environment adaptation to ease workload and in performance efficiency improvement

17 p2493 A72-35792

Midair collision causes and prevention, considering pilot responsibilities, anticollision devices and procedures

19 p2831 A72-37800

Resumption of flight after retinal surgery

19 p2760 A72-37879

Active leisure effect on pilot work efficiency, health maintenance and job longevity

19 p2760 A72-38148

Studies in pilot training - The anatomy of transfer.

20 p2897 A72-39718

Instruments installation effect on soviet passenger aircraft pilot performance, discussing Tupolev aircraft control systems

21 p2994 A72-40173

Application of the head-up display /HUD/ to a commercial jet transport.

21 p3060 A72-41256

Improved qualitative flight data rating scales.

21 p2996 A72-41257

Results of the investigation of different extrapolation displays.

21 p3012 A72-41431

Influence of prolonged longitudinal accelerations on control habits

21 p3004 A72-41750

Biological rhythms origin and mechanisms, discussing 24-hour cycle, subcellular biological clock and rhythm disruption effects in speologists, astronauts and pilots

22 p3141 A72-41985

An analysis of aircraft lateral-directional handling qualities using pilot models.

22 p3137 A72-42347

Agricultural aircraft flight loads - Typical spectra and some observations on airworthiness.

24 p3366 A72-44734

Pilot workload assessment technique during transport aircraft approach and landing, correlating with aircraft serviceability, crew efficiency, navigation aids, meteorological conditions and control procedure factors

24 p3377 A72-45657

Intoxicating liquor and the general aviation pilot in 1971.

24 p3377 A72-45662

PILOT SELECTION

Long term prognosis of transient hypertension in young male adults, evaluating importance in pilot selection

01 p0022 A72-11295

Student naval aviator selection by multiple correlation technique using noncognitive college and flight background questionnaire to reduce attrition rate

02 p0166 A72-11704

Hazard rate of recurrence in patients with malignant melanoma, investigating survival

02 p0167 A72-11713

Hemodynamic response to running exercise stress for aeronautics personnel selection, determining systolic ejection variation measurement and cardiac frequency increase

07 p0927 A72-19242

Pilot selection criterion for replacement air group /RAG/, using scored maneuver item correlations for flight crew and pilot training

12 p1774 A72-28262

IR pupillography for screening narcoleptics and fatigue prone individuals from driver and pilot training applicants

12 p1777 A72-28323

Anthropometric data utilization for military pilot/aircraft compatibility evaluation, discussing cockpit exclusion code development and implementation

12 p1777 A72-28324

Piloting aptitude evaluation from ECG during hypoxia, considering right intraventricular conduction and ventricular repolarization anomalies

13 p1906 A72-29857

Prophylactic otolaryngological investigation of vestibular analyzer function in aviation medicine

15 p2186 A72-31769

California psychological inventory as a predictor of success in the Naval flight program.

24 p3377 A72-45655

PILOT TRAINING

Hypoxia tolerance among pupil pilots during aeromedical instruction in decompression chamber, obtaining EEG and cardiac rhythm recordings

04 p0466 A72-14567

Medicopsychological surveillance of aircrew in fighter pilot school, stressing time factor in pilot training

04 p0467 A72-14569

Fighter pilots training by simulators, determining learning effectiveness by mathematical model based on renewal theory

[AIAA PAPER 72-161]

05 p0644 A72-16827

Student pilot syncope during altitude chamber training, discussing physiological mechanism from cardiovascular studies and psychiatric evaluation

06 p0767 A72-17879

Night Carrier Landing Trainer flight and carrier environment simulator for A-7 aircraft pilot training, discussing performance predictions from computer data analysis

07 p0927 A72-19137

Disorientation in naval aircraft accidents from psychophysiological and environmental factors, suggesting flight scheduling and training improvements

08 p1126 A72-21574

Pilot survival probabilities under various conditions of high performance aircraft takeoff and landing accidents, suggesting emergency action guidelines for pilot training

10 p1428 A72-23732

Interactive computer graphics with three dimensional real time CRT display of air combat maneuvers for fighter pilot training

11 p1613 A72-26299

Factor analysis of grades for successful performance skill identification during undergraduate and graduate jet pilot training

12 p1769 A72-27472

Flight stress and performance of training in general aviation simulator compared with actual flight

12 p1774 A72-28261

Pilot selection criterion for replacement air group /RAG/, using scored maneuver item correlations for flight crew and pilot training

12 p1774 A72-28262

Anxiety relation to success or failure in naval flight training program

12 p1774 A72-28263

Pilot trainer transfer function identification for man-machine and on-line adaptive control system using analog/hybrid computer

14 p2091 A72-30721

Aircraft and other vehicle simulators for training crews, discussing evolution of needs, digital techniques, and visual and physiological experiences

14 p2092 A72-30844

Low cost flight simulator for general aviation pilot training, containing IFB instrumentation and turbulence injection device

15 p2214 A72-32211

Simulated blind approach trainer for general aviation aircraft pilot training, discussing design concept and instrumentation with emphasis on components simplicity and economy

17 p2536 A72-35325

Performance measurement in helicopter training and operations.

[PP-10-72]

17 p2509 A72-35550

Congruent and spurious motion in the learning and performance of a compensatory tracking task.

17 p2510 A72-35692

How United trains DC-10 pilots.

19 p2760 A72-37898

Studies in pilot training - The anatomy of transfer.

20 p2897 A72-39718

Future aspects of business aviation, discussing pilot training and aircraft reliability and maintenance in context of flight safety

20 p2988 A72-39741

Visual simulation - A proven training method.

20 p2897 A72-39749

PILOTTED CENTRIFUGES

U HUMAN CENTRIFUGES

PILOTLESS AIRCRAFT

NT TARGET DRONE AIRCRAFT

Unified single rf channel tracking, telemetry and command control systems for guidance of unmanned vehicles, including pilotless aircraft and satellites
05 p0685 A72-16556

Remotely manned vehicles (RMV) application in aerial warfare, considering anti-aircraft defenses lethality increase, equipment costs and role of man during combat mission
13 p1896 A72-28451

PILOTS (PERSONNEL)
NT AIRCRAFT PILOTS
NT TEST PILOTS
Sudden pilot incapacitation and death due to sub-arachnoid hemorrhage secondary to ruptured intracranial aneurysm
10 p1429 A72-23742

PINCH EFFECT
NT PLASMA PINCH
NT THETA PINCH
Multivalley semiconductors electrical pinch effect during electron heating, considering Sasaki effect and sample depletion
02 p0269 A72-12886

Dash phenomenon in eruptive loop prominences representing solar flare process at all levels of atmosphere, discussing pinch effect instability
03 p0411 A72-13332

Pinch-in effect due to emitter current distribution instability in transistors with emitter-stripe geometry
04 p0499 A72-15209

Magnetospheric quasi-stationary pinch effect and filamentary structure due to electron streams parallel to geomagnetic field lines
14 p2103 A72-30664

Barium cloud striations deformation in ionosphere explained by equations of motion for plasma cloud thin bar model, discussing pinch effect
16 p2387 A72-33907

Earth magnetosphere pinch effect related to geomagnetic field pulsations and polar aurora luminosity fluctuations
18 p2688 A72-36867

Time dependence of the divergence of the radiation emitted by a rhodamine laser pumped by a pinched discharge.
24 p3411 A72-45612

PINHOLES
Pinhole, fly-eye and holographic stereogram methods, examining resolution relationships, horizontal and vertical parallax and aberrations
05 p0663 A72-16673

X and gamma ray astronomy with multiple pinhole cameras and a posteriori image synthesis, obtaining SNR gain
11 p1629 A72-25313

PINTLES
Pintle-controlled rocket engine design with gimbaled supersonic splittine thrust vector control, featuring variable thrust, attitude controls and high propulsion efficiency
[SAE PAPER 710763] 01 p0115 A72-10260

PION BEAMS
Linear energy transfer distribution for negative pions beams in human tissue, calculating relative biological efficiency and oxygen enhancement ratio
[CERN-71-16] 02 p0162 A72-12064

Analysis of pion-helium scattering for the pion charge form factor.
19 p2837 A72-37922

PIONEER SPACE PROBES
Electrical power subsystem design in Pioneer F/G spacecraft, using SNAP 19 deployable radioactive thermoelectric generators supplemented by Ag-Cd battery
01 p0008 A72-11065

Pioneer F and G space probe EMC specification limits, comparing computer analysis prediction and system test data
03 p0329 A72-14048

Distributions and average values for proton speed, azimuthal and polar flow directions and proton temperature and density in solar wind from Pioneer data
07 p1063 A72-20380

Jupiter investigation by Pioneer F and G after asteroid belt traversal, discussing Jovian physical characteristics, spacecraft systems and experiments
08 p1230 A72-20979

Astronomical interpretation of dust particle data recorded by Pioneer spacecraft, suggesting sensor surface orientation role for error correction
08 p1232 A72-21149

Engraved message on Au anodized Al plate aboard Pioneer 10 spacecraft for extraterrestrials after exiting solar system via momentum exchange with Jupiter
08 p1236 A72-21459

Pioneer 10 probe survival hazards during passage through asteroids belt and intense Jupiter radiation fields
10 p1551 A72-24272

Conical scanning system for Pioneer Jupiter spacecraft pointing control, discussing signal processor, spacecraft dynamic behavior, system stability and error budget
15 p2320 A72-31791

Pioneer spacecraft intermittent solar wind streams data temporal variations analysis to account for anomalous type 3 bursts
15 p2299 A72-31964

Scientific problem resolution during Jupiter missions, discussing Pioneer probes, trapped particle belts, Red Spot, atmosphere, biological activity, internal heat sources and radio emission
19 p2864 A72-38381

Astronomical interpretation of dust particle data recorded by Pioneer spacecraft, suggesting sensor surface orientation role for error correction
20 p2968 A72-39254

Attitude perturbations of a spinning Jupiter Orbiter spacecraft.
[AIAA PAPER 72-920] 21 p3115 A72-41565

Explorer satellites and Pioneer space probes development program, discussing launching rockets, reentry tests, payloads, radio communication, Van Allen belts discovery, etc
23 p3358 A72-44353

PIONEER 6 SPACE PROBE
Solar wind reverse and forward oblique slow shocks, examining discontinuities from Pioneer 6 plasma and magnetic field data
01 p0120 A72-10882

PIONEER 7 SPACE PROBE
Pioneer 7 observations of the August 29, 1966, interplanetary shock-wave ensemble.
21 p3104 A72-40481

PIONEER 8 SPACE PROBE
Pioneer 8 plasma wave measurements at distant bow shock crossings, considering solar wind-magnetosheath interaction
01 p0062 A72-10903

Change in the eleven-year modulation at the time of the June 8, 1969, Forbush decrease.
22 p3172 A72-42424

PIONS
Absorbed doses at various depths in water target exposed to charged pions, muons and electron beams, using Monte Carlo program
[CERN-71-16] 02 p0162 A72-12063

Neutron energy spectrum of radiative pion captured by carbon 12, using gamma and neutron counters
05 p0692 A72-16688

Nuclear-electron cascades longitudinal evolution calculation in ionization calorimeter for primary nucleons and pions, using Monte Carlo method
06 p0811 A72-17260

Cosmic ray hadrons inelastic collision cross sections and partial K-neutral pion inelasticity factor in ionization calorimeter
06 p0868 A72-17262

High energy cosmic ray pions and nucleons interactions with atomic nuclei, using ionization calorimeter and spark chambers system
06 p0869 A72-17267

K-neutral pion inelasticity factor measurement for nucleon interactions in carbon corresponding to primary neutron energy transferred to pions
06 p0869 A72-17269

Secondary particles in pion-nucleon and coherent interactions, measuring momentum from multiple Coulomb scattering
06 p0870 A72-17272

Nuclear photoemulsions under bombardment by pion beam of 60 GeV/c momentum, investigating pion-nucleon interactions involving recoil protons
06 p0851 A72-17273

Pion-nucleon high energy interactions, determining inelasticity coefficient distribution
06 p0851 A72-17274

Spark calorimeter calibration by particle accelerator induced high energy pions, noting neutral and charged particles track detectors high geometric resolution
06 p0811 A72-17292

K-neutral pion energy fractions and inelasticity coefficients at primary energies of 100-1500 Gev during hadron-target interaction
06 p0872 A72-17295

Meteorological effects on cosmic rays, deriving muon and pion intensity and meteorological coefficient formulas and computer calculation scheme
07 p1066 A72-20654

Pion generation during collective interactions between nucleons of heavy cosmic ray nuclei, using Proton 4 satellite data
08 p1228 A72-22179

Pionic X ray fields and transitions in Li 6, Be 9, C 12 and O 16, obtaining 2p level absorption broadening
10 p1515 A72-24418

Scintillation TICI /Li,Be/ crystal response to 8 GeV ionizing negative pions, noting pulse shape and resolution characteristics
15 p2291 A72-31535

Meson exchange effects on solar pion-production process, using low energy Adler theorem with cross section correction factor
16 p2456 A72-33476

Pion-electron conjugation and twist angles determination in biphenyls via Raman intensity, comparing with hypsochromic UV shift of Suzuki method
16 p2431 A72-33585

Underground delayed shower particles small pulse events interaction analysis for muons and pions compared with quark behavior
16 p2450 A72-34140

Test of scale invariance in pion production at high energies using cosmic ray primary nucleon and sea level muon intensities.
17 p2599 A72-34875

Pion generation during collective interactions between nucleons in heavy cosmic ray nuclei, using Proton 4 satellite data
18 p2721 A72-36235

Pion exchange and the cosmic-ray nucleon cascade.
19 p2851 A72-37923

High altitude cosmic ray pion and nucleon interaction characteristics at high energies, using spark chamber, Cerenkov absorption spectrometer and ionization calorimeter measurements
23 p3329 A72-44402

Ionization calorimeter for neutral pion production investigation in high energy hadrons interaction, noting energy transfer identity for nucleon and pion interactions
23 p3330 A72-44409

Approximation for Monte Carlo method modeling of pion-nucleon and nucleon-nucleon inelastic collisions at high energies
23 p3317 A72-44414

High energy inelastic collisions of pions and protons with nuclear emulsion nucleons, noting pion pulse spectra
23 p3317 A72-44417

Characteristics of pion and nucleon interaction with carbon and aluminum nuclei over the energy range from 30 to 300 GeV
23 p3331 A72-44435

Study of the angular distribution of charged and neutral pions during inelastic interactions in the energy region above 1 TeV
23 p3291 A72-44443

Angular and impulse characteristics of negative-pion interactions at an energy of 60 GeV in the emulsion
23 p3292 A72-44446

PIPE FLOW
Laser anemometer system for instantaneous velocity measurement in turbulent pipe flow, determining two point velocity correlation coefficients
01 p0071 A72-11169

Hydraulic analogy application to heat conduction problems, considering seepage and network pipe flow models for complex heat flux phenomena representation
01 p0145 A72-11174

Pressure drop relation to entropy production in viscous low velocity adiabatic pipe flow, showing analogy with Oswatitch theorem
01 p0051 A72-11255

Equivalence laws and approximate equations for incompressible and compressible viscous flows in pipes with variable cross sections
01 p0051 A72-11256

Velocity and temperature effects on momentum and temperature equalization in coaxial turbulent jet mixing in pipe inlet section
[DFVLR-SONDDR-183] 01 p0051 A72-11257

Finite difference technique for heat transfer rate in laminar flow in tube with step change in cross section, discussing velocity profiles
02 p0301 A72-11273

Cross flow through in-line tube bank, investigating surface roughness effects on behavior by pressure drop, static pressure and skin friction distributions measurements
02 p0203 A72-12102

Thin liquid layer linear hydrodynamic stability in vertical rotating tube with core gas flow
02 p0303 A72-12353

Rarefied gases pressure flow and self diffusion through cylindrical tubes, presenting kinetic model with velocity independent mean free path
02 p0205 A72-12357

Heat transfer of nonequilibrium dissociating nitrogen dioxide in round tube, allowing for finite reaction velocity
02 p0303 A72-12861

Acoustic attenuation calculation for turbulent flow in rigid tubes, determining critical flow velocity dependence on wall roughness and sound wave frequency
03 p0340 A72-12954

Conducting fluid steady MHD pipe flow under transverse magnetic field, obtaining mass flow rate
03 p0394 A72-13241

Dynamic and electromagnetic characteristics of MHD flow in square tube with walls differing in electroconductivity within oblique transverse magnetic field
03 p0398 A72-14007

Kinetic energy losses due to liquid-to-solid phase transformation in heated two-component flow ascending in tube
03 p0342 A72-14161

Turbulent mixing length formulation and velocity profiles for non-Newtonian power law fluids, deter-

mining friction factor for pipe flow at high Reynolds numbers

03 p0343 A72-14318

Start-up flow of viscous incompressible fluid under constant head in entrance region of circular tube

03 p0344 A72-14343

Numerical solutions of integral equation for transition and turbulent flows through pipes and channels, discussing computer simulations

04 p0510 A72-14469

Pressure distribution and compressible gas critical flow rate in constant cross sectioned circular pipe with impermeable adiabatic wall from Frossel equations

04 p0511 A72-14640

Soviet book on hydraulics, hydraulic machines and hydraulic drives covering fluid dynamics, pipe flows, jet pumps, turbines, bladed transmissions, etc

04 p0466 A72-15247

Weakly ionized turbulent gas flow in pipe, comparing neutral and plasma fluctuations with laser beam scintillations

04 p0558 A72-15331

Conducting incompressible fluid in laminar pipe flow under traveling magnetic field, investigating friction coefficient and energy balance

04 p0558 A72-15341

High velocity unsteady flow calculations in metal pipes by numerical methods for boundary conditions, including turbomachinery, column separation and gas accumulator

[ASME PAPER 71-WA/FE-13] 05 p0646 A72-15931
Turbulent flow in smooth and rough pipes at Reynolds numbers 30,000-480,000, presenting velocity mean and fluctuating components rms and cross correlation values

[ASME PAPER 71-WA/FE-7] 05 p0647 A72-15935
Nonlinear disturbances of viscous flow in pipes and between rotating cylinders, considering Couette and Poiseuille flows

05 p0648 A72-16027

German book on turbulent flow theory and applications covering isotropic and homogeneous nonisotropic fields, shear flows, pipe flows, free turbulence, boundary layers, etc

05 p0649 A72-16286

Noncoagulating polydisperse aerosol deposition from two dimensional turbulent boundary layer and fully developed turbulent pipe flows

[ALAA PAPER 72-81] 05 p0650 A72-16806

Unsteady axisymmetric incompressible pipe flow solution near piston, using Navier-Stokes equations solution with finite difference forms

05 p0653 A72-17006

Uniformly curved fluid conveying tube free vibration and stability, showing flow velocity, fluid pressure and Coriolis force effects on natural frequency

06 p0821 A72-17853

Reynolds analogy based correlation method for Stanton number prediction for turbulent heat and mass transfer in smooth tubes

06 p0903 A72-18186

Heat transfer and drag during air laminar flow in circular pipe with constant heat flux density at wall

07 p0966 A72-18938

Temperature pulsation spectra of turbulent mercury flow in horizontal pipe at various Reynolds numbers, showing dependence on magnetic field

07 p1100 A72-19882

Heat and mass transfer in initial section of circular pipe under stabilized laminar flow, using modified Leveque method

07 p0968 A72-19883

Inviscid relaxing gas flow through tube with variable cross sectional area, deriving governing equation for weak discontinuity amplitude evolution

07 p0970 A72-20073

Turbulent friction coefficients and velocity distribution in channel and pipe flow, using eddy viscosity model

08 p1150 A72-21623

Unsteady uniform turbulent flow of incompressible liquid in circular pipe, verifying mathematical model with velocity distribution calculations

08 p1151 A72-21666

Hydrodynamics of dispersed annular two phase flow in cylindrical channels characterized by concurrent motion of flow core and liquid film at wall

08 p1151 A72-21667

Turbulence measurements in shear flow systems including pipe, tank and multijet reactor configurations

09 p1292 A72-22306

Visual observations of wall in turbulent pipe flow, using suspending solid MgO particles

09 p1306 A72-22310

German monograph on heat transfer in chemically reacting gases covering laminar and turbulent tube flows for dissociated dinitrogen tetroxide

09 p1274 A72-22339

Steady turbulent flow and heat transfer downstream of circular pipe sudden enlargement, computing streamline and temperature profiles and wall fluxes

09 p1412 A72-23687

Adiabatic velocity profiles and pressure variations of developing laminar flow in circular tube, using finite difference computation in FORTRAN IV

10 p1463 A72-23863

Steady compressible fluid flow and plane shock wave propagation in pipe bends, discussing parameter effects and boundary conditions

10 p1464 A72-23878

Solute dispersion distribution over tube cross section with flowing solvent, comparing with Gaussian distribution

10 p1466 A72-24330

Laminar flow dispersion coefficient for curved tubes and channels determined by mathematical model, permitting concentration distribution computation

10 p1468 A72-24371

Second order fluids plane Poiseuille flow instability to finite amplitude disturbances, noting implications to Toms friction pressure reduction phenomenon in pipe flow

10 p1470 A72-25065

Axial pressure variations in incompressible laminar tube flow with uniform suction, noting application to heat pipes

[AIAA PAPER 72-257] 11 p1614 A72-25202
Real time hologram-moire interferometry for visualization of turbulence phenomena in liquid flow through cylindrical pipe

11 p1629 A72-25317

Non-Newtonian pipe flow turbulence measurements by laser anemometer, describing optical system and signal processing instrumentation

11 p1646 A72-25554

Thermodynamic coupling effects on temperature distribution, Nusselt number and cooling requirements in laminar nonisothermal pipe flow with coolant injection

11 p1745 A72-25734

Fluid compressibility effect on nonstationary laminar flow within infinite cylindrical pipe

11 p1618 A72-26502

Turbulent pipe flow laminarization by fluid injection, measuring axial turbulence intensity field and streamwise velocity distribution by hot-film anemometer

11 p1619 A72-26636

Reynolds analogy for twisted liquid flow in tube with swirl vanes

11 p1619 A72-26968

Viscoplastic media flow rate in noncircular tube from Newtonian fluid velocity profile, using Green formula

12 p1799 A72-27981

Swirling flow in round pipe with sudden expansion, discussing separation and reversal characteristics

13 p1942 A72-29640

Hydraulic fluids flow measurement in pipes by ultrasonic waves convection method, discussing transducers performance and mounting

13 p1959 A72-29668

Turbulent friction relation to averaged velocity profile of liquid flow in pipes and channels

14 p2096 A72-31019

Heat and mass transfer in steady viscous flow through curved circular tubes, investigating velocity and temperature profiles

14 p2173 A72-31064

Tangential and radial eddy diffusivity effects on nonsymmetric turbulent diffusion in plain impervious tube as function of Schmidt number

14 p2096 A72-31069

Steady state temperature field and heat flux at wall for metallic coolant flow in thin walled axisymmetric pipe with nonhomogeneous Neumann boundary condition

16 p2477 A72-33413

Energy and momentum losses of high temperature gas flow through externally cooled tube, solving laminar flow differential equations numerically on digital computer

16 p2378 A72-33430

Heat transfer and friction coefficients for turbulent flow in rough tubes as function of Reynolds and Prandtl number, using von Karman method

16 p2478 A72-33513

Drag reducing polymers influence on velocity gradients at wall for turbulent pipe flow, observing viscous sublayer thickening

16 p2379 A72-33574

Negative pressure gradients effects on turbulent viscosity profiles for gas flow through tubes, comparing dependence on transverse coordinates to incompressible flow case

16 p2380 A72-33860

The effect of axial boundary motion on pressure surge generation

[ASME PAPER 71-WA/FE-15] 17 p2539 A72-34969

Heat and mass transfer in initial section of circular pipe under stabilized laminar flow, using modified Leveque method

17 p2637 A72-35131

On the flutter of thin cylindrical shells conveying fluid.

17 p2634 A72-35415

Some specific characteristics of turbulent wall pressure fluctuations in a flow in a tube

17 p2541 A72-35545

Flow problems solutions estimation by variational principles application, exemplifying by plane Couette and Poiseuille and axisymmetric pipe flow

18 p2679 A72-36391

The stability of Poiseuille flow in a pipe of circular cross-section.

18 p2681 A72-36480

Poiseuille flow linear spatial stability in rigid pipe under infinitesimal disturbances, obtaining propagation modes eigenvalues

18 p2681 A72-36481

Closed system of differential equations derived for kinematic characteristics of nonstationary turbulent flow in pressurized smooth pipe

19 p2785 A72-37473

Linearized problem of one-dimensional periodic gas flow in a pipe

19 p2786 A72-37666

The friction drag factor for an unsteady motion in tubes

20 p2913 A72-39392

An analysis of heat transfer in turbulent pipe flow with variable properties.

[ASME PAPER 72-HT-59] 20 p2985 A72-39657

Non-isothermal laminar flow of gases through cooled tubes.

[ASME PAPER 72-HT-45] 20 p2985 A72-39665

The linear stability of flow in a circular pipe in the presence of a strong transverse magnetic field.

20 p2958 A72-40018

Turbulent mixing of fluids of different density moving in a tube

21 p3044 A72-40129

Flow of a non-Newtonian fluid in a tube with sinusoidal deformation.

21 p3044 A72-40192

Perturbation analysis of aerodynamic test flow in Ludwig tubes, investigating nonsteady coupling effects on nozzle turbulent boundary layer

[AIAA PAPER 72-994] 21 p2993 A72-41580

Experimental friction factors for turbulent flow with suction in a porous tube.

21 p3047 A72-41618

Unsteady laminar flow in a tube with arbitrary variation of the flow rate in time

22 p3164 A72-41892

Extremal bounds for mass flow rate of laminar MHD flow in circular and thin walled conducting pipes at high Hartmann number

22 p3210 A72-42315

Reverse flow sensing hot wire anemometer.

22 p3177 A72-42392

Unsteady convective heat transfer in the initial section of a pipe with a smooth inlet

23 p3356 A72-43670

Approximation for boundary value problem of homogeneous stationary combustion in laminar gas flow through cylindrical tube

23 p3356 A72-43798

Experimental study of heat transfer during cooling of a high-temperature gas flow in a pipe.

23 p3357 A72-44539

Periodic solutions of a nonlinear mixed problem for the Navier-Stokes equations

24 p3418 A72-44780

Decay of swirl in a straight pipe flow /with hub at the entrance/.

24 p3394 A72-45367

PIPELINES

Creep deformation upper bounds for smooth pipe bends under constant external bending moments, using energy method analysis

16 p2473 A72-34123

Rocket body longitudinal autooscillation modes, taking into account pipeline fluid discontinuous cavitation oscillations

17 p2620 A72-34469

Rational utilization of the strength capabilities of thermal-expansion compensators

21 p3127 A72-41702

PIPER AIRCRAFT

Design and development program for air conditioning system of twin engine unpressurized Piper Navajo, noting flight test results

[SAE PAPER 720328] 11 p1577 A72-25590

PIPES (TUBES)

NT U BENDS

Torsional stiffness /shear modulus/ of glass fiber reinforced plastic tubes as function of filament winding angle

01 p0141 A72-10999

Strain anisotropy effect on thin walled tubular steel samples with combined bending and torsion, constructing matrix and stress vectors

03 p0445 A72-13578

Small parameter method solutions to linear viscoelasticity problems with nonhomogeneous temperature field applied to reinforced tube under internal pressure

03 p0454 A72-14217

Two dimensional stationary temperature fields determination in ribs, cylinders and pipes with temperature independent heat conductivity

05 p0746 A72-16188

Axisymmetric stress analysis in various weld configurations of stub end high pressure pipe connections, using finite element method

06 p0820 A72-17709

Combined stress wave propagation in thin welded prestressed tube under longitudinal and torsional impact loading

06 p0898 A72-18321

Micrographic evaluation of inclusions in austenitic stainless steel tubes ensuring surface quality control

07 p0994 A72-18972

End holes effects on dielectric constant measurement of long glass tubes by cylindrical microwave resonant cavity

08 p1164 A72-20940

Pipe joint flexible metal seal development and testing for Concorde Olympus 593 under thermal and pressure cycling

08 p1178 A72-21938

Metric swaged pipe coupling design and development for aircraft hydraulic systems, presenting fatigue test results

08 p1179 A72-21940

Secondary normal stresses in fixed flange zone of thin welded nonlinearly elastic pipe under bending moment and torsion

08 p1249 A72-22096

Low thermal flux glass fiber composite over-wrapped tubing with metallic liners for leak free cryogenic propulsion plumbing systems

11 p1637 A72-25364

Uniaxial, biaxial and shear loading tests on filament wound carbon-carbon composite tubes and rings

11 p1670 A72-25458

Thin walled tubular carbon steel specimen deformation pattern under biaxial tension and internal pressure at normal and low temperatures

12 p1830 A72-28227

Statistical energy analysis of sound-structural interaction, considering sound transmission through complex walls and piping systems and fluid filled container vibrations

13 p2005 A72-29556

Dispersion hardening /aging/ effect on embrittlement of Ni base alloys in cold worked pipes during heat treatment

15 p2255 A72-31569

A method of calculating acoustic resonance phenomena generated by the unsteadiness of singular pressure losses in the pipes

17 p2580 A72-34279

Brazed-welded lightweight high pressure aerospace tube-fittings.

17 p2560 A72-34939

Stress criterion for creep rupture in tubes under combined axial load and internal pressure, deriving stress concentration from high temperature tests

19 p2874 A72-37715

Reduction of temperature difference in shielding pipes for light-beam transmission.

20 p2903 A72-39267

On the radiation from an open-ended corrugated pipe carrying the HE sub 11 mode.

21 p3015 A72-40366

Photoelastic study of stress concentration in perforated composite pipes under external pressure

22 p3233 A72-42064

Theory of thin elastic shells applied to pipe bends subjected to bending and internal pressure.

24 p3456 A72-44795

PISTON ENGINES

NT DIESEL ENGINES

Uranium hexafluoride pulsed plasma core reactor with artificial neutron source for spark plug and enclosed by cylinder and piston analogous to internal combustion engine

01 p0100 A72-11361

Vibration of reciprocating engine crankshafts and steam turbine, alternator and gas turbine rotor shafts supported on hydrodynamic sleeve bearings

08 p1225 A72-22133

Russian book - The ASH-62IR engine /4th enlarged edition/.

21 p3098 A72-40463

PISTON THEORY

Ballistic piston fissioning plasma production involving compression of uranium hexafluoride

01 p0111 A72-11333

Poincare-Lighthill-Kuo perturbation method and method of characteristics equivalence in one dimensional fluid motion due to ideal piston periodic oscillation

03 p0341 A72-13239

Flying machine using reaction forces on body moving in compressible fluids within piston device equivalent to air pressure pump

08 p1108 A72-21798

Piston exerting pressure on liquid filled cylinder, determining deformation state based on thin elastic orthotropic plate theory

10 p1556 A72-24266

Two and three dimensional pistons motion in stationary gas, calculating potential flow characteristics near weak discontinuities as function of piston geometry and acceleration

10 p1468 A72-24431

Spherical, cylindrical or plane piston motion in nonuniform medium with radiative energy transfer, obtaining approximate analytic solutions and temperature profile behind shock front

15 p2336 A72-32394

Piston generated magnetosonic shocks, investigating ion and electron pressure effects on formation

15 p2281 A72-32415

Self-similar unsteady magnetogasdynamic flows of a radiating gas produced by the motion of a piston

18 p2716 A72-36897

Experimental investigation of finite-amplitude acoustic oscillations in a closed tube.

23 p3314 A72-44124

PITCH

Pitch shift of pure tone by masking tones and band limited noise

01 p0101 A72-10159

Multiple pure tone noise generation from turbofan blade to blade nonuniformities in rotor geometry, using two dimensional inviscid flow model

04 p0565 A72-15568

An aspect of the problem of pitch dependence on the duration of short sinusoidal signals.

20 p2897 A72-39217

Tone noise from rotor/stator interactions in high speed fans.

24 p3433 A72-44917

PITCH [INCLINATION]

Drift shells and pitch angle evolution of energetic particle motion in magnetospheric model including convection electric field

01 p0117 A72-10077

Aircraft pitching and yawing cross couplings compensation at high speed

01 p0005 A72-10506

Self organizing adaptive aircraft control system with C criterion pitch axis performance and failure compensation

03 p0337 A72-12920

Pitch angle distributions of energetic protons for different geomagnetic activity levels as function of invariant latitude and magnetic local time from ESRO IB satellite measurements

07 p1057 A72-19141

Pitch angle and radial diffusions relationship in presence of drift shell splitting at arbitrary equatorial pitch angle

07 p1057 A72-19147

Strong pitch angle scattering of energetic electrons in presence of electrostatic waves due to ion cyclotron instability above midlatitude ionospheric trough region

11 p1714 A72-26398

Anisotropic electron pitch angle distributions at synchronous altitude due to wave-particle scattering and ionospheric acceleration along field lines

15 p2299 A72-31961

Geomagnetically trapped protons pitch angle distribution from ESRO 2 semiconductor telescope measurements

15 p2300 A72-31991

Pitch-angle diffusion of radiation belt electrons within the plasmasphere.

17 p2602 A72-35597

A method of calculating the pitch angle distributions of particle fluxes based on rocket and satellite data.

17 p2558 A72-35840

PITCH ANGLES

U PITCH [INCLINATION]

PITCH ATTITUDE CONTROL

U LONGITUDINAL CONTROL

PITCHING MOMENTS

Wind tunnel stability tests of aerodynamic pitch damping of aircraft model oscillating in two degrees of freedom

03 p0307 A72-13539

Nonspinning satellite earth-pointing attitude control for elliptic orbits using active regulation of pitch moment of inertia

08 p1204 A72-21605

Pitching moments effect on phugoid and height mode stability of aircraft in supersonic flight

09 p1263 A72-23622

Nose bluntness effect on bodies of revolution pitching moment characteristics in incompressible flow at various angles of attack

11 p1573 A72-26576

Effect of lagging pitching moment on re-entry vehicle dynamic stability.

17 p2619 A72-34202

PITOT STATIC TUBES

U PITOT TUBES

U SPEED INDICATORS

PITOT TUBES

Flight test procedures for subsonic transport aircraft pitot static pressure system, recommending trailing cone calibration method

01 p0064 A72-10389

Hypersonic two component gas mixture nozzle flow with condensation or evaporation discontinuity, determining Pitot pressure limits

02 p0230 A72-12255

Spatial boundary layer variations in low speed wind tunnel working section due to settling chamber screens, discussing mesh variations effects on Preston tube measured pressure coefficient distributions

07 p0966 A72-19061

Yaw calibrations of Preston tubes for wall shear stress measurements in two and three dimensional turbulent boundary layers

08 p1254 A72-21627

Pitot tube pressure measurements in supersonic gas flow, calculating free molecular conditions limits

10 p1419 A72-24548

Velocity calculation from pitot tube pressure measurements in compressible two phase flow, taking into account droplet momentum loss

14 p2104 A72-30252

Viscosity, velocity gradient and wall effects on pitot tube measurement of gas flow velocity measurement in turbulent boundary sublayer

14 p2094 A72-30294

Cylindrical pitot tube displacement effects on stagnation point and static pressure angle in impeller nonuniform peripheral flow

14 p2094 A72-30720

Turbulent friction values diminished by reading errors in pitot tube flow measurement of solid particles suspensions and polymer solutions caused by viscoelastic associations

14 p2106 A72-31007

On the use of the Preston tube in elliptical ducts.

18 p2676 A72-37094

A new stagnation pressure probe having a high pressure recovery in supersonic flow.

22 p3179 A72-42687

A comparison of disturbance levels measured in hypersonic tunnels using a hot-wire anemometer and a pitot pressure probe.

24 p3388 A72-45402

PITTING

Titanium sulfide initiation of pitting corrosion of Ti stabilized corrosion resistant Cr-Ni-Ti steels

03 p0379 A72-14367

Potential change under pitting corrosion and repassivation on Cr-Ni steels alloyed with V, Si, Mo and Re

04 p0535 A72-15730

Pitting potential and intergranular corrosion of anodically polarized Al and Al alloys in electrolytes

04 p0536 A72-15736

Etch pit technique for titanium and zirconium crystal orientation determination, discussing etch pit locations and polycrystalline specimen goniomicroscopic observation

05 p0679 A72-17124

Pitting and film deposits with organic fluid by electrolysis and fluid flow, discussing electrokinetically produced corrosion

07 p1010 A72-18802

Corrosion effects evaluation from electrode potentials, noting copper pitting and weathering

08 p1189 A72-22108

Metal single crystals use for corrosion tests, noting anisotropy, adsorption, oxidation and pitting

08 p1189 A72-22111

Liquid flow cavitation impact on rotating disk surfaces, showing pitting characteristics dependence on physicochemical properties of specimens

09 p1327 A72-22297

Stainless steels sensitivity to pitting corrosion under sulfides action, measuring rupture potential

11 p1661 A72-26648

Active corrosion in aqueous solutions, discussing reactions, adsorption, intergranular attack, pitting, crevice corrosion and stress corrosion cracking

19 p2815 A72-37446

Electrochemical protection potential of metals and alloys in pitting, intergranular corrosion and stress corrosion cracking in presence of chlorides

21 p3065 A72-40087

Influence of prior electrochemical history on the propagation of localized corrosion.

22 p3195 A72-43129

PITUITARY GLAND

Hypophysectomy in rats, resulting in prolonged red blood cell survival due to oxygen consumption decrease and altered erythrocyte enzymatic processes

01 p0010 A72-10075

PITUITARY HORMONES

Shock-induced fighting effect on pituitary adrenocorticotrophic hormone ACTH and adrenocortical steroids plasma concentration in rats, relating psychological stress to physiological function

05 p0617 A72-16080

Human male gonadotropin secretion relation to sleep stages, using electrophysiologic recordings and radioimmunoassay techniques

05 p0620 A72-17128

Human prolactin - 24-hour pattern with increased release during sleep.

23 p3316 A72-43977

Changes in the pituitary-thyroid and in the pituitary-gonad systems under conditions of functional loading and of physiological immobilization.

24 p3371 A72-44823

PIVOTS

Impulse excited spatial systems of rigid bodies linked by pivot joints with arbitrary kinematics, applying Maxwell-Betti theorem

15 p2323 A72-31461

PLAGES [FACULAE]

U FACULAE

PLAN POSITION INDICATORS

Peak reading and thresholding in radar weather data processing, describing PPI map

06 p0843 A72-18440

PLANAR STRUCTURES

Planar Gunn effect devices for microwave oscillators, discussing impedance matching and diode conductivity profile effect on output power

01 p0028 A72-10628

MHD boundary waves properties, noting application to traveling wave nonreciprocal devices and planar structures based on microwave integrated circuits

01 p0029 A72-10703

Isoplanatic instrument wave aberration determination, using longitudinal defocusing

03 p0360 A72-13563

Stress-strain state determination for plane orthotropic bodies by optical polarization method, discussing numerical methods for stress and strain tensor components

03 p0445 A72-13580

Si planar unijunction transistor fabrication, operation principles, parameter measurements and applications

05 p0635 A72-16196

Critique on condition for planar antennas physical reliability, concerning smoothness of aperture edges

06 p0782 A72-17362

Gain function for planar phased array far field pattern, deriving calculation method for excitation pattern for prescribed radiated beam behavior

08 p1132 A72-21328

Nonlinear mathematical dc models of planar transistors for computerized IC design and analysis obtained by continuity equation approximate solution

12 p1789 A72-27313

Pulse generation in planar Gunn devices of epitaxially grown GaAs layers, measuring current reduction by domain nucleation

12 p1791 A72-27671

Forward voltage vs temperature characteristics for Si planar p-n junction diodes, determining zero temperature energy gaps for silicon, germanium and GaAs

13 p1933 A72-29824

Thermal resistance of planar semiconductor structures.

17 p2594 A72-34296

Properties of a nonisosceles triangular grid planar phased array.

17 p2524 A72-34352

Pattern synthesis of hexagonal planar arrays.

17 p2525 A72-34363

Comparison of computer-acquired performance data from several fixed spaced planar diodes.

17 p2496 A72-34605

Controlled self heating effect in semiconductor barium titanate positive temperature coefficient resistor substrate heater for planar Si devices

17 p2527 A72-34680

Monoplastic solid encapsulant for n-p-n and p-n-p silicon planar passivated signal transistors

17 p2528 A72-34715

Application of the moving-slit X-ray automonochromatization method in structural studies of planar diodes and an attempt to correlate electrical properties with lattice defects.

17 p2595 A72-34749

Calculation of two-dimensional cascades in isentropic flow

17 p2484 A72-34893

Design of radiating elements for large planar arrays - Accomplishments and remaining challenges.

23 p3269 A72-43571

Hypersonic flow around plane and axisymmetric bodies of arbitrary shape with inviscid radiating gas.

24 p3360 A72-45110

PLANE WAVES

Stepped reflector image region fields at plane wave incidence angle to reflector axis, determining field components as Fourier series

01 p0035 A72-10115

Plane electromagnetic wave scattering by imperfectly conducting cylinder with radially inhomogeneous dielectric coating, using phase shift method for evaluation

01 p0024 A72-10130

Asymptotic intensity fluctuations of plane light wave propagating in turbulent medium, using parabolic equation and Markov model

01 p0050 A72-10348

Transient electromagnetic plane wave ionospheric transmission and reflection, considering impulsive and step modulated sine wave excitations

01 p0031 A72-11102

Far field diffraction due to annular apertures of plane wave light rendered partially coherent by atmospheric turbulence

01 p0103 A72-11166

Numerical-integral equation approach to plane wave scattering from nonplanar conducting surface with sinusoidal height profile for magnetic field parallel to surface ridges

[AD-735574] 01 p0032 A72-11237

Radar target thin rectangular plate model backscattering from incident and reflected waves, noting front and trailing edge phenomena with emphasis on side edge contribution

01 p0032 A72-11250

Electromagnetic plane stress wave generation by capacitor bank for transient loading of photoelastic models along straight and curved boundaries [SESA PAPER 1907A]

02 p0199 A72-11503

Explosion induced plane shock wave propagation in gas medium with exponential density distribution, determining gas flow behavior by difference approximation method

02 p0201 A72-11578

Iterative truncation error estimates in solution for plane wave diffraction by grating

02 p0171 A72-11738

One dimensional plane magnetoacoustic wave stability from synchronous flow in narrow flow gap MHD induction machine

02 p0265 A72-12263

Einstein gravitational field equations plane-front parallel ray wave exact solutions generalization to f-g gravity theory equations exact solutions

02 p0260 A72-12375

Plane wave intensity fluctuations behind random phase screen, discussing phase structural function relation to field statistical properties and fluctuation dispersion

02 p0181 A72-12590

Diffraction of plane electromagnetic waves of arbitrary orientation and incidence on triangular grid of cylindrical conductors

02 p0183 A72-12753

Plane electromagnetic wave diffraction on magnetoactive plasma cylinder, using energy method and particle scattering model

02 p0183 A72-12754

Plane electromagnetic wave reflection and transmission at moving boundary between two dielectric media

03 p0321 A72-13091

Radiation pattern and reflected field analysis for incident plane wave on phased arrays of thick wall rectangular waveguides

03 p0330 A72-13168

Plane and conical shock waves, presenting graphs and tables for numerical applications

03 p0341 A72-13684

Simple wave interaction solutions for nonlinear plane k-waves of nonelliptic quasi-linear differential equations using Riemann invariants

03 p0389 A72-13885

Stress concentration at circular holes in polyurethane plates under plane compression wave, obtaining interference fringes

03 p0451 A72-14121

Relativistic equations of motion of charged particle interacting with plane electromagnetic wave propagating at arbitrary angle to uniform magnetic field for magnetosphere model

04 p0554 A72-14406

Plane shock wave and blunt body interaction in supersonic gas flow in two-diaphragm shock tube

04 p0461 A72-14639

Long wave propagation in curved ducts and pipes, considering plane wave transition and distortion

04 p0548 A72-14698

Frequency characteristics of selectively reflecting screens in multichannel parabolic mirror antennas and determination of Fresnel coefficients dependence on polarized plane wave incidence angle

04 p0499 A72-15241

Conformal transformations applications to plane electromagnetic wave diffraction by infinitely conducting network, discussing energy distribution

04 p0490 A72-15410

Plane wave diffraction by infinite strip grating, providing closed form solution by boundary value problem reduction to singular integral equation

04 p0490 A72-15411

Plane electromagnetic wave diffraction on two cylinders with different radii, assuming infinite length and ideal conductivity

04 p0491 A72-15413

Plane electromagnetic wave diffraction by periodic lattice of long finite conductivity cylinders with arbitrary electric radius

04 p0491 A72-15414

Electromagnetic traveling plane wave diffraction from arbitrary angled dielectric wedge, investigating surface currents on walls

04 p0491 A72-15420

Plane harmonic electromagnetic wave diffraction by conducting parallel half planes in uniaxially anisotropic media

04 p0492 A72-15447

Hf backscattering of plane electromagnetic wave at oblique incidence on conducting circular metallic disk, noting polarization dependence on angle

04 p0493 A72-15524

Nonstationary plane shock wave propagation in inelastic medium with soil properties, discussing boundary problem solution and numerical analysis

05 p0689 A72-16284

Plane electromagnetic wave diffraction by infinite cylinder with unsteady impedance boundary conditions

05 p0627 A72-16409

High frequency electric field backscattering by plane electromagnetic wave incident on perfectly conducting sphere with radially inhomogeneous dielectric coating

05 p0630 A72-16621

Multifrequency plane, spherical and beam waves propagation, calculating temporal frequency spectra in turbulent atmosphere

06 p0771 A72-17339

Electromagnetic plane wave diffraction by infinite slit in screen with surface impedance, deriving field and transmission coefficient by asymptotic numerical solution

06 p0771 A72-17352

Plane supersonic ionizing shock wave in magnetic field under small wave plane perturbation from equilibrium position, calculating stability from linearized equations

06 p0798 A72-17678

Differential equations describing dynamic behavior of unsteady plane exothermic reaction front in gasless system

06 p0903 A72-18204

Transient plane wave reflection and scattering by periodic grating of thin conducting cylinders

06 p0777 A72-18736

Ring-plane type slow wave structure hot tested near 3 cm for scale modeling in mm range

07 p0938 A72-18854

Test facility for thermal diffusivity measurements in solids by method of plane temperature waves using periodic optical heating at 1500 K

07 p0982 A72-18942

Plane harmonic waves propagation in stressed polycrystalline bodies with slight orthotropy in unstressed state, substantiating theory for initial stress determination by ultrasonic technique

07 p1090 A72-19753

Current distribution in cylindrical parasitic antenna immersed in arbitrarily directed and polarized incident plane electromagnetic wave

07 p0957 A72-19787

Gas motion behind plane detonation wave orthogonal to free surface, solving Goursat problem for perturbed region

07 p0969 A72-19979

Plane oblique shock wave diffraction on wedge moving in homogeneous gas flow at supersonic speed, reducing boundary value problem to Hilbert problem

07 p0910 A72-20317

Transverse hydromagnetic plane waves existence in uniformly heated electrically conducting fluid under temperature gradient and magnetic field

07 p1045 A72-20442

Plane electromagnetic wave reflection from conducting convex cylinder in radially inhomogeneous absorbing medium, deriving equations for beam trajectories calculation

08 p1131 A72-20742

Kirchhoff method application to asymptotic solution of plane wave diffraction on dielectric conical shells, calculating electromagnetic field vector

08 p1131 A72-20931

Microwave transmission loss prediction formula for obliquely incident plane wave leakage through perforated flat metal plate

08 p1135 A72-21559

Plane wave propagation in laminated reinforced elastic plates with difference-differential equations analysis

08 p1247 A72-21809

Horizontally polarized impulsive plane electromagnetic wave reflection from perturbed linear ionosphere model, obtaining transient response as inverse Fourier transform

08 p1136 A72-21979

Electromagnetic field radiation from linearly and sinusoidally variable thickness layered structures under plane wave and concentrated source excitations

08 p1137 A72-21986

Random gravitational plane wave metric effect on electromagnetic wave mean value, noting light dispersion and attenuation

09 p1351 A72-22682

Uniform plane wave theory of internal upconversion and frequency doubling in optical parametric oscillators

09 p1324 A72-23079

- Steady state plane wave theory of intracavity coupled parametric oscillator/unconverter, obtaining efficiency, pump power transmission and optimum output coupling
09 p1325 A72-23086
- Plane shock wave propagation in polytropic plastic body with elastic unloading properties, deriving closed form solution for time dependent stepwise decreasing load
09 p1353 A72-23554
- Dipole moment expression for Rayleigh scattering field from finite closed perfectly conducting body irradiated by LF plane electromagnetic wave
[AD-742573] 10 p1434 A72-23720
- Acoustic waves generation in liquids by Q-switched ruby laser, noting transition from plane to spherical waves with dye concentration and focusing configuration variations
10 p1490 A72-23954
- Plane harmonic compression waves scattering by circular holes in thin elastic plate, calculating dynamic stresses concentration
10 p1554 A72-24179
- Ionization kinetics influence on light absorption zone behind plane stationary shock wave in hydrogen
10 p1467 A72-24358
- Plane ionizing shock wave stability in MHD channel within magnetic field
10 p1522 A72-24542
- Plane electromagnetic wave diffraction on ideally conducting convex body of large electrical dimensions, obtaining Maxwell equations asymptotic solution
10 p1436 A72-24577
- Plane wave solutions to atmospheric gravity waves, including effects of nonlinearity, instability, molecular dissipation, temperature, wind and diurnal tides
10 p1473 A72-24705
- Laser conductive heating of plasma with accounted nuclear fusion energy, assuming plane thermal wave
10 p1522 A72-24722
- Plane and uniform heterogeneous electromagnetic waves reflection, observing Goos-Hanchen and Imbert effects
11 p1597 A72-26482
- Slow and fast plane magnetoacoustic waves mutual transformation and reflection at plasma and magnetic field inhomogeneities
11 p1698 A72-26643
- Submillimeter plane waves formation by quasi-optical line and diverging lens with phase front adjustment
11 p1598 A72-26719
- Colliding plane gravitational waves equations for linear polarization
12 p1845 A72-27409
- Reflection and transmission of plane E wave incident on moving conducting medium, discussing growing wave excitation
12 p1782 A72-27490
- Two dimensional wave motion generated in prestressed body by crack extension, noting consistency with fracture criterion related to cohesive traction zones near crack tip
12 p1883 A72-27560
- Plane monochromatic electromagnetic wave scattering by rotating metallic cylinder, noting frequency shift dependence on cylinder translational motion velocity
13 p1914 A72-28370
- Plane sound wave scattering by acoustically soft sphere at constant subsonic velocity
13 p2003 A72-28797
- Plane longitudinal displacement wave reflection from fixed surface in micropolar elastic half space, presenting reflection laws and amplitude ratios for specific cases
13 p2056 A72-29001
- Diagnostic procedures for nonhomogeneous plasma based on geometrical optics approximation, irradiating plasma by plane wave at oblique incidence
13 p2013 A72-29295
- High latitude ionospheric transmission and reflection properties for oblique hydromagnetic plane waves at micropulsation frequencies for daytime and nighttime conditions
13 p1951 A72-29390
- Fiberglass performance as duct liner in presence of spinning modes from free field measurements, noting ineffectiveness for plane wave attenuation
13 p2028 A72-29573
- Small amplitude plane wave speed variation with pressure for Na and K at absolute zero temperature, using crystal strain energy formulation
13 p2006 A72-29675
- Quasi-longitudinal and quasi-transverse plane wave propagation in anisotropic elastic-plastic solids, approximating Be single crystal behavior
14 p2163 A72-30176
- Wire antenna half-space problem analysis by Sommerfeld integral approach and plane wave reflection coefficient approximation
14 p2085 A72-30338
- Diffraction of plane waves scattered by impedance structures in anisotropic medium, noting wedge shaped region with cold plasma under external magnetic field
14 p2086 A72-30809
- Plane nonlinear wave propagation in transonic region of two dimensional and axisymmetric steady flows, considering disturbance at arbitrary point
14 p2095 A72-31000
- Submillimeter plane monochromatic waves propagation in ground layer of turbulent atmosphere, deriving received signals levels fluctuations
15 p2195 A72-31653
- Dispersion equations and resonant absorption of plane and cylindrical surface waves in transition layer between plasmas, noting Langmuir oscillations
15 p2286 A72-32385
- Plane wave dispersion and nonlocal elasticity equations linearization, demonstrating continuum treatment of lattice dynamics
15 p2330 A72-32445
- Nonlinear anisotropic elastic constitutive equations for micromorphic and micropolar mixtures, investigating plane wave propagation via field equations with restricted coupling
15 p2278 A72-32446
- Exact solutions for plane thermoelastic and magnetothermoelastic wave frequency equations, determining specific loss extremum values
15 p2336 A72-32447
- Plane electromagnetic wave diffraction on periodic arbitrary profile array, presenting near and far field asymptotic characteristics
15 p2202 A72-32660
- Radial vibrations and plane wave propagation in elastic deforming sphere with superimposed time dependent displacement field
16 p2467 A72-33117
- Nonlinearity effects on finite amplitude, plane uniform oblique shock wave reflection, using inviscid gas analogous solution techniques
16 p2426 A72-33661
- Constitutive equations for plane harmonic waves propagation in composite fiber reinforced elastic material
17 p2625 A72-34321
- Scattering of electromagnetic waves from an inhomogeneous magnetoplasma column moving in the axial direction
17 p2587 A72-34359
- Invariant imbedding in time-varying homogeneous nondispersive media
17 p2513 A72-34366
- Diffraction of electromagnetic waves by a two-dimensional aperture with arbitrary cross-sectional shape
17 p2514 A72-34385
- Diffraction of a plane electromagnetic wave on an anisotropic half-plane in free space and in a plane waveguide
17 p2515 A72-34828
- Ionization kinetics influence on light absorption zone behind plane stationary shock wave in hydrogen
17 p2539 A72-34957
- On the behavior of the electromagnetic field with crests
17 p2584 A72-35913
- Scattering of elastic waves by moving objects
18 p2709 A72-36403
- Elementary plane waves in a Signorini-Cattaneo's thermoelastic solid
18 p2735 A72-36512
- Electromagnetic radiation and scattering from loaded bodies of revolution of arbitrary shape, calculating plane wave scattering from apertures in cylinders and hemispheres
18 p2662 A72-36927
- Fourth moment of a wave propagating in a random medium
18 p2712 A72-37025
- Near sidelobes in Cassegrain antenna systems

22 p3239 A72-42856
- Diffraction of a plane wave by a ribbon grating in the case of short wavelengths
23 p3264 A72-43527
- Scattering of acoustical waves by a prolate spheroidal obstacle.
23 p3313 A72-44118
- One dimensional steady conducting gas flow in nonaccelerating coordinate system under magnetic field, calculating pressure, density and temperature variations with boundary shock wave
23 p3281 A72-44265
- Acoustic transmission and reflection by a shear discontinuity separating hot and cold regions.
23 p3315 A72-44373
- Use of the three-dimensional covariance matrix in analyzing the polarization properties of plane waves.
23 p3315 A72-44518
- Electromagnetic-wave propagation in a random nonlinear dispersive medium.
24 p3379 A72-44784
- Plane thermoelastic one-dimensional waves in an inhomogeneous medium with allowance for connectedness
24 p3459 A72-45266
- Reflection and transmission of electromagnetic waves by a moving inhomogeneous medium.
24 p3381 A72-45644

PLANET EPHEMERIDES

Minor planet Eros photographic observations by long-focus refracting telescopes and Ross cameras at various Yale observatories, tabulating ephemerides
[AD-737017] 02 p0286 A72-12894

Planetary mass determination tables, presenting mass inverse value in constants system with international ephemerides

04 p0575 A72-15032

Meridian circle planet and asteroid positions and deviations from ephemerides during 1950 to 1955

05 p0723 A72-17158

Outer planets masses and ephemerides, noting guidance system and fuel quantity for orbit corrections on interplanetary flight

15 p2312 A72-32181

Accuracy of outer-planet ephemerides.

19 p2857 A72-37683

Exact positions of Uranus for 1919 through 1969 according to photographic observations at Pulkovo and Tashkent

19 p2859 A72-37915

Results of observations of the minor planet Icarus by the Maksutov meniscus astrograph in Chile

19 p2859 A72-37916

Right ascensions of the sun, Mercury, and Venus observed with the transit instrument at Nikolaev during 1966-1967

19 p2861 A72-37982

Declinations of the sun, Mercury, and Venus in the FK4 system as deduced from observations with the vertical circle of the Nikolaev Observatory during 1966-1967

19 p2861 A72-37983

Attempt at determining the exact positions of Venus from photographic observations on the short-focus double astrograph and the 26-in. refractor of the Pulkovo observatory

19 p2861 A72-37984

Computer processed Mars photographic positional measurements with Pulkovo normal astrograph in 1965

19 p2861 A72-37985

Determination of major planet coordinates by an expeditionary astrograph

19 p2861 A72-37986

Photoelectric transit observations of Saturn and Mars, showing culmination in universal ephemerides time

19 p2862 A72-37987

New method of calculating disturbed ephemeris of minor planets

21 p3102 A72-40095

Recent developments in the theory of the motion of the moon.

21 p3102 A72-40124

Accurate positions of the planet Pluto in the years 1969-1970.

21 p3105 A72-40576

Ephemerides and improved orbital elements of minor planets, noting general theory of relativity verification from astronomical observations of Icarus

24 p3437 A72-44758

Poorly founded systems of equations in astronomical practice and methods for their solution

24 p3437 A72-44760

Correction of the orbits of 161 minor planets

24 p3437 A72-44763

Observations of minor planets at the Crimean Astrophysical Observatory AN SSSR, XVIII

24 p3437 A72-44764

Ground observation for outer planets natural satellites ephemeris, using astrometric telescopes, photographic and plate reduction techniques

24 p3443 A72-45426

Accuracy of the determination of the zero points of a fundamental catalog from observations of major and minor planets

24 p3447 A72-45676

Photographic observations of Mars at the Main Astronomical Observatory, AN USSR during 1963-1967

24 p3448 A72-45686

PLANET ORIGINS

U PLANETARY EVOLUTION

PLANETARY ATMOSPHERES

NT JUPITER ATMOSPHERE

NT MARS ATMOSPHERE

NT VENUS ATMOSPHERE

Planetary atmosphere IR radiative transfer model using matched asymptotic expansions method

01 p0125 A72-10099

Transfer from high elliptical to circular orbit, using successive spacecraft braking maneuvers in planetary atmosphere with incomplete information

01 p0130 A72-10927

Micrometer particle formation by water vapor photolysis at 1500-1700 Å, noting particle production rate and implications to planetary atmosphere physics

02 p0220 A72-12207

Solar wind induced atmospheric mass loss from magnetic field-free planets, using mass, momentum and energy conservation laws

02 p0275 A72-12465

Spherical planetary atmosphere tendency equation of pressure variation for horizontal stratification, using static and continuity equation in spherical harmonics

03 p0351 A72-14356

Rotating and nonuniform planetary exosphere model, examining density profiles

04 p0579 A72-15333

Radio absorption spectra sounding for planetary atmospheric impurities calculating water vapor content in Venus cloud level

05 p0715 A72-16169

Thermodynamic parameters correlation of planetary atmosphere with planetary probe parachute descent rate applied to Venera 5 and 6 data

05 p0721 A72-16769

Radiative heat transfer damping rates of turbulent temperature pulsations in upper planetary atmospheres, assuming Kirchhoff radiation law validity

06 p0882 A72-17935

Atmospheric freestream pressure profiles determination from base pressure and flow phenomena of Mars, Venus or Jupiter entry probes

[AIAA PAPER 72-202]

07 p0982 A72-18959

Planetary atmosphere diffuse radiation from limb side, applying to Mars atmospheric emission

08 p1238 A72-21832

Methane contribution to thermal opacity in Uranus and Neptune atmospheres for atmospheric model synthesis

09 p1383 A72-22293

German monograph on optimal planetary atmosphere effects for increasing hyperbolic velocity at flyby for Venus and Earth

09 p1383 A72-22322

Spectral line formation in cloudy planetary atmospheres, applying to Venus

09 p1386 A72-22669

Exospheric temperatures in hydrogen dominated planetary atmospheres for evaporative loss rates estimation, noting two component diffusive equilibrium model

09 p1393 A72-23661

Mars and Venus probes entry into planetary atmospheres, discussing aerodynamics of trajectory control and soft landing

09 p1394 A72-23673

Photographic measurements of Saturn, observing atmospheric belt latitudes, ring dimensions and southern hemisphere bright spot rotation

10 p1531 A72-23711

Spacecraft-based observations of gamma and X radiation resulting from planetary surface and atmosphere processes to obtain source medium chemical composition

10 p1530 A72-25060

Time dependent geopotential as function of position weighted atmospheric density from Poisson equation, noting satellite orbit perturbations due to mass shifts in planetary atmospheres

12 p1838 A72-27022

Diving operations medical aspects significance for manned planetary surface exploration in high density atmospheres, considering protective clothing, breathing apparatus and gas mixtures, etc

12 p1769 A72-27415

Mars and Venus instrumented spacecraft flight results, describing planetary topographies, atmospheres and magnetic fields

12 p1877 A72-27650

Laboratory simulation of diffuse reflectivity from plane parallel cloudy planetary atmosphere, comparing to theory

12 p1796 A72-27947

Radio absorption spectra sounding for planetary atmospheric impurities calculating water vapor content in Venus cloud level

14 p2149 A72-30238

Saturn thermal radio emission brightness temperature calculations for subcloud atmosphere ammonia abundance evaluation

14 p2152 A72-30490

Saturn rings gas-dust atmosphere, thickness and motion, considering planetary radio emission and brightness temperature

14 p2161 A72-31073

Light rays total, astronomical and photogrammetric refraction in planetary atmospheres with arbitrary composition

15 p2224 A72-31602

Planetary cloudy atmosphere synthetic spectral line profile computation, using analytic scattering diagrams

15 p2192 A72-31649

Solar wind and planetary atmosphere interaction observation by simulation of ionization mechanism in comet, using gun produced plasma stream and gas cloud

15 p2301 A72-32341

Hydrogen to helium mixing ratio in giant planets from far IR spectroscopy for atmospheric thermal models and greenhouse effect calculations

15 p2315 A72-32727

Stellar and planetary atmosphere dynamics, deriving balance equations for variance analysis of angular momentum

16 p2453 A72-33247

Planetary atmospheres and interiors in terms of dynamics, rotation, magnetic fields, Jupiter features, geomagnetism, earth baroclinic waves, global circulation and gravitation, etc

16 p2384 A72-33339

Solar radiation anisotropic nonconservative scattering in semiinfinite atmosphere, calculating plane and spherical albedo by exponential kernel approximation

16 p2446 A72-33463

Radiative heat transfer damping rates of turbulent temperature pulsations in upper planetary atmospheres, assuming Kirchhoff radiation law validity

16 p2459 A72-33776

Longitudinal dynamic stability of hypersonic shuttle vehicle designed for operation to planetary atmosphere rim

16 p2462 A72-34019

Planetary atmosphere thermodynamic parameters correlation between spacecraft parachute descent rate and measured data, noting Venera spacecraft example

17 p2610 A72-35272

Radiation transfer in planetary atmospheres with a three-term scattering indicatrix

17 p2618 A72-35810

The influence of line shape and band structure on temperatures in planetary atmospheres.

18 p2726 A72-36640

Titan and its atmosphere.

18 p2729 A72-36989

Similarity theory of planetary atmosphere circulations applied to solar atmosphere in terms of radius and rotatory Mach number

19 p2863 A72-38066

Absorption line profile and equivalent line width derivation for planetary atmosphere with low and high optical thicknesses, assuming arbitrary scattering coefficients

19 p2863 A72-38071

Saturn thermal radio emission brightness temperature calculations for subcloud atmosphere ammonia abundance evaluation

19 p2864 A72-38319

Rayleigh and Raman scattering by H₂ in a planetary atmosphere.

20 p2966 A72-38914

Russian book - Large-scale motions in the convective zones of stars and large planets.

21 p3104 A72-40462

New observations on the Kuiper bands of Uranus.

21 p3106 A72-41043

Temperature range estimation method for planetary atmospheric component generating spectral lines, applying to Venus observations at 7820 Å carbon dioxide band

21 p3106 A72-41045

Minor constituents in planetary atmospheres - Ultraviolet spectroscopy from the Orbiting Astronomical Observatory.

21 p3111 A72-41459

Integrals of the motion for optimal trajectories in atmospheric flight.

[AIAA PAPER 72-931]

21 p3112 A72-41570

The total pulsation-frequency spectrum of a polytropic atmosphere

21 p3114 A72-41779

A calculated hydrogen distribution in the exosphere.

22 p3168 A72-42004

Theory of radiative heat transfer in polytropic atmospheres

22 p3229 A72-42962

Absorption profile of a planetary atmosphere - A proposal for a scattering independent determination.

23 p3289 A72-43889

Jupiter - Its Red Spot and disturbances in 1970-1971.

24 p3435 A72-44690

On required guidance for transfer from hyperbolic trajectory to the planetary satellite orbit by aerodynamic drag in atmosphere.

24 p3450 A72-45176

Radiation gasdynamics of planetary entry - Concepts and recent advances.

24 p3361 A72-45188

Optimization of spacecraft reentry into a planetary atmosphere

24 p3453 A72-45597

Approximate formulas for the intensity of diffuse reflected emission from a semiinfinite atmosphere

24 p3448 A72-45685

PLANETARY BASES

Mars and Venus automatic station data transmission systems for surface and atmosphere studies, discussing relay and direct transmission modes

15 p2203 A72-31823

PLANETARY COMPOSITION

Outer planets satellites physics and chemistry, discussing steady state thermal models based on energy equilibrium between internal radioactivity decay and surface radiation

04 p0568 A72-14495

Mars Hellas area surface features, relating crater absence to surface age and white spot phenomena to water reservoir under permafrost layer

06 p0881 A72-17929

Mariner 9 experiments, discussing IR interferometric spectroscopy observations of Mars dust composition and pole flattening

06 p0889 A72-18340

Oxygen isotopic abundances and equilibrium temperatures of meteoritic minerals, chondrules, meteorites and planets

07 p0985 A72-19589

Earth and moon chemical composition differences based on model of lunar formation from circumterrestrial swarm of particles and larger objects

07 p1077 A72-19820

Mars internal structure models with chondrite as potential core-forming material, discussing absence of internal origin magnetic field

07 p1084 A72-20518

Viking Lander seismic investigations for Martian tectonic activity, internal structure and composition, core size and conditions of formation

10 p1540 A72-24389

Viking Lander magnetic properties investigation of Martian surface with implications for planetary composition and differentiation and atmospheric interaction

10 p1541 A72-24391

Extraterrestrial environment utilization, describing space power plants, manufacturing operations in earth orbit and planetary mineral resources

12 p1871 A72-27625

Chemical equilibrium models of low temperature condensation from solar nebula relating to planetary composition

15 p2311 A72-32083

Planetary atmospheres and interiors in terms of dynamics, rotation, magnetic fields, Jupiter features, geomagnetism, earth baroclinic waves, global circulation and gravitation, etc

16 p2384 A72-33339

Earth and moon chemical composition differences based on model of lunar formation, from circumterrestrial swarm of particles and larger objects

17 p2618 A72-35745

General relativistic planetary structures comparison with Newton gravitational theory, deriving field equations for spherically symmetric planets with explicit pressure and density distributions

18 p2728 A72-36751

Mars Hellas region surface features, relating crater absence to surface age and atmospheric condensation-produced white spot phenomena to sub-permafrost water reservoir

18 p2730 A72-37154

Statistical mechanics of light elements at high pressure. II - Hydrogen and helium alloys.

21 p3106 A72-41044

Thin ice crust, chondritic composition and ionospheric considerations for Io electrical conductivity and decametric radio emission modulation in unipolar inductor model

24 p3437 A72-44704

PLANETARY ENTRY

U ATMOSPHERIC ENTRY

PLANETARY ENVIRONMENTS

NT JUPITER ATMOSPHERE

NT MARS ATMOSPHERE

NT MARS ENVIRONMENT

NT PLANETARY ATMOSPHERES

NT VENUS ATMOSPHERE

Solar flare, galactic and magnetically trapped (Van Allen) nuclear particle radiation environments calculation for three outer planet Grand Tour missions

03 p0413 A72-14095

Astrogenic and planetogenic environments characteristics examination for stellar spectral classes effect on intelligent life evolutionary pace and existence probability

04 p0573 A72-14887

PLANETARY EVOLUTION

Rotation production in giant planets by gaseous impact, discussing Jupiter and Saturn formation

02 p0282 A72-12331

Terrestrial planets internal constitution and thermal history model, emphasizing iron fractionation in structure

03 p0418 A72-13110

Early catastrophic degassing of earth, considering mechanisms and times from volatiles abundances and distribution in atmosphere, hydrosphere and crust

03 p0350 A72-13744

Toroidal oscillations of spherical planetary models, presenting regular eigenfunction form near center

03 p0352 A72-14381

Jupiter outer satellite group formation theory, suggesting asteroid-larger satellite collision

04 p0569 A72-14496

Martian atmospheric volatiles history, noting initial chemical conditions favorable to abiotic organic synthesis

04 p0569 A72-14503

Protoplanetary bodies mass distribution by coagulation theory, using inverse power law

06 p0884 A72-18030

Martian atmosphere evolution, stressing photochemical production of oxygen, carbon and nitrogen

06 p0889 A72-18275

Planetary bodies mass and energy losses as indications of eruptive evolution, discussing mean densities, geological processes scale and volcanic activities

08 p1228 A72-20829

Lunar evolution theory, discussing terrestrial cluster dynamics during earth accumulation

08 p1231 A72-21129

Origin of life as chemical evolution product, tracing juvenile carbon history through planetary and geological phases

08 p1162 A72-22004

Planetary atmospheres composition diversity, discussing evolution of Mars, Venus, earth and Jupiter from primitive solar nebula

08 p1119 A72-22012

Life beyond solar system, discussing planetary formation and prebiological organic chemistry developments and interstellar communication

08 p1120 A72-22016

Adsorption role in planetary primordial rare gas origin based on adsorptivity pattern of pulverized Alende meteoritic samples at 113 K

09 p1385 A72-22597

Martian cratering by asteroid impact, discussing Palomar-Leiden asteroid statistics, Opik capture theory and evolutionary extrapolation limitations

10 p1531 A72-23705

Protoplanetary bodies mass distribution by coagulation theory, using inverse power law

11 p1719 A72-25966

Rotation production in giant planets by gaseous impact, discussing Jupiter and Saturn formation

13 p2039 A72-29215

Protoplanet cloud model of solar system as flat gas-dust disk, discussing density profile, gravitational stability and mass loss

14 p2148 A72-30206

Book on astronomy covering optical and radio telescopes properties and atmospheres of inner and outer planets, stellar lifetimes and evolution, galaxies, cosmology, etc

15 p2306 A72-31516

Earth and Mars - Evolution of atmospheres and surface temperatures.

17 p2613 A72-35395

Astronomical model for primitive solar nebula showing planetary evolution in hot initial state under centrifugal forces

17 p2614 A72-35677

Lunar composition as a clue to the early history of the solar system.

17 p2614 A72-35678

Planetary volcanic activity and matter disintegration as source of development in solar system, using density and rotational energy data

18 p2725 A72-36521

Space science advances and NASA Planetary Program, noting solar system evolution, life origin and Skylab and Space Shuttle programs

19 p2855 A72-37274

Chronology of first phases of formation of solar system solid objects, meteorites and primitive lunar rocks, describing models

19 p2867 A72-38548

Metal/silicate fractionation in the solar system.

20 p2967 A72-39177

Ammonia photolysis and the role of ammonia in chemical revolution.

20 p2898 A72-39375

Russian book - Hydrodynamic evolution model of the earth.

21 p3103 A72-40461

Role of the swarm of satellite-particles on the origination of the earth's rotation

22 p3220 A72-41916

Earth geophysical effects due to tidal capture of moon from direct orbit, discussing volcanism, atmosphere and hydrosphere origins and biological evolution

22 p3226 A72-42539

Origin and evolution of the earth-moon system.

22 p3227 A72-42540

Book on moons and planets covering celestial mechanics, solar system origin, stellar formation, comets, asteroids, meteorites, planetary interiors, surfaces, atmospheres, etc

22 p3228 A72-42750

Shmidt cosmological hypothesis impact on geophysics, geochemistry and geology, discussing planetary evolution, initial earth temperature and gravitational differentiation

22 p3230 A72-43154

Protoplanet cloud model of solar system as flat gas-dust disk, discussing density profile, gravitational stability and mass loss

23 p3333 A72-43236

Production of light elements in the solar system.

23 p3335 A72-43487

Lunar composition in terms of evolutionary mode based on inhomogeneous planetary accretion and high temperature condensation

24 p3439 A72-44977

Early stage condensation in planetary formation, discussing atomic and molecular reactions in interstellar space and earth outer atmosphere properties

24 p3444 A72-45452

Origin of the planetary systems astronomical evidence in other stars.

24 p3444 A72-45453

A gasdynamical view on the motion, heating and accretion of solid bodies in the solar system.

24 p3444 A72-45456

Conditions in the early solar system, as inferred from meteorites.

24 p3445 A72-45458

On certain aerodynamic processes for asteroids and comets.

24 p3445 A72-45463

Investigation of solar system evolution by automatic vehicles on the moon.

24 p3445 A72-45466

PLANETARY EXPLORATION

U SPACE EXPLORATION

PLANETARY EXPLORER

U OUTER PLANETS EXPLORERS

PLANETARY GRAVITATION

Gravitational fields of giant planets in hydrostatic equilibrium, solving equations for linear and quadratic density distributions

03 p0436 A72-13818

Conditionally periodic motions of particle in gravitational field of axisymmetric oblate planet, describing canonical transformations for Hamiltonian function reduction to normal form

04 p0572 A72-14638

Perturbed satellite motion in gravitational field of aspherical rotating planet

06 p0892 A72-18036

Statistical and probabilistic analyses of comet groups existence with similar orbital elements, considering gravitational capture by trans-Neptunian planets

07 p1075 A72-19559

Short period comets orbital evolution and major planets gravitational effects, discussing cometary cloud formation, diffusion, motion and discovery

07 p1078 A72-19981

Planetary perturbation of orbits of long period comets with large perihelion distances

07 p1081 A72-20236

Perturbed satellite motion in gravitational field of aspherical rotating planet

11 p1727 A72-25972

Jupiter and Saturn gravitational moments from available models, taking into account rotation, density and radius

12 p1871 A72-27744

Mars doublet cratering by impacting meteoroid breakup due to stresses in gravitational field, using Monte Carlo simulation

14 p2149 A72-30317

Trajectory analysis for swingby technique using Jovian gravitational field for leaving ecliptic plane along heliocentric orbit and for solar flyby at specified distance

14 p2150 A72-30452

Error sources in numerical integration of spacecraft equations of motion in solar and planetary gravitational fields, suggesting methods for improving accuracy

14 p2151 A72-30453

Stability analysis of satellite motions in Newton planetary field by Liapunov method, considering ellipsoid of revolution under gravitation of sphere

14 p2162 A72-31081

Preflight and real time gravity sensing for Mariner 9 satellite orbit determination during Mars 1971 mission

15 p2270 A72-32186

Gravitational fields of Jupiter and Saturn

19 p2857 A72-37734

Cometary parent bodies transfer to short period orbits by Jupiter caused gravitational disturbances, noting qualitative analysis of orbits evolution

22 p3219 A72-41913

Saturn-Jupiter rebound - A method of high-speed spacecraft ejection from the solar system.

23 p3340 A72-44323

Russian book - Space research 1970: Investigation of the gravitational fields and shapes of the earth, other planets, and the moon on the basis of spacecraft observations.

24 p3443 A72-45399

PLANETARY LANDING

Digital computer investigation of radio signals transmitted by Vener 7 during Venus soft landing, describing spectral analysis and telemetric data detection methods

05 p0630 A72-16770

Static and dynamic analysis of legged planetary instrument landers, taking into account structural flexibility, elastic-plastic gear load characteristics and soil properties

11 p1725 A72-25396

Digital computer investigation of radio signals transmitted by Venera 7 during Venus soft landing, describing

ing spectral analysis and telemetric data detection methods

17 p2516 A72-35273

Experimental and simulation study results on the development of a planetary landing site selection system.

[AIAA PAPER 72-868] 20 p2951 A72-39131

Space Shuttle landing navigation using precision distance measuring equipment.

24 p3421 A72-44637

The results of Soviet research into Mars.

24 p3447 A72-45559

PLANETARY LONGITUDE

U PLANET EPHEMERIDES

PLANETARY MAGNETIC FIELDS

Solar wind induced atmospheric mass loss from magnetic field-free planets, using mass, momentum and energy conservation laws

02 p0275 A72-12465

Planetary magnetic activity effects on hf cosmic noise absorption measurements at low and temperature latitudes

04 p0516 A72-14941

Geophysical applications of high resolution magnetometers to geomagnetic measurements, archaeological investigations and satellite sounding of planetary magnetic fields

06 p0812 A72-17374

Mariner 9 radio tracking measurements of Mars gravity field and pole direction, comparing to moon and earth

06 p0890 A72-18346

Mars and Venus instrumented spacecraft flight results, describing planetary topographies, atmospheres and magnetic fields

12 p1877 A72-27650

Planetary atmospheres and interiors in terms of dynamics, rotation, magnetic fields, Jupiter features, geomagnetism, earth baroclinic waves, global circulation and gravitation, etc

16 p2384 A72-33339

Extensive air showers and the sporadic decimeter radio emission of Jupiter

19 p2863 A72-38073

PLANETARY MASS

Planetary mass estimation from radar and optical observation data analysis of sun and planets [AD-737167]

01 p0127 A72-10292

Planetary mass distribution in solar system from gravitational contraction of nebula formed by accretion of ring shaped particle cloud

02 p0282 A72-12311

Jupiter mass from motion of /76/ Freia, plotting residuals in right ascension and declination

02 p0286 A72-12893

Planetary mass determination tables, presenting mass inverse value in constants system with international ephemerides

04 p0575 A72-15032

Outer planets mass determination noting anomalous latitude residuals of Uranus

04 p0575 A72-15033

Solar system data processing system /SSDPS/ computer solution for major planetary masses from optical, radar and radio tracking data

04 p0575 A72-15034

Planetary mass errors effects on orbit determinations, discussing Ceres mass from influence on Pallas orbit

04 p0575 A72-15035

Jupiter mass correction from minor planets /153/ Hilda, /279/ Thule and /334/ Chicago observations

04 p0576 A72-15036

Principal planets mass derivation using fundamental and independent determinations in table form

04 p0576 A72-15037

Jupiter mass from discrete time observations of JIX satellite positions and velocities, using sequential Kalman-Bucy filter

06 p0876 A72-17580

Protoplanetary bodies mass distribution by coagulation theory, using inverse power law

06 p0884 A72-18030

Planetary bodies mass and energy losses as indications of eruptive evolution, discussing mean densities, geological processes scale and volcanic activities

08 p1228 A72-20829

Disturbing parameters effect on spacecraft trajectory X coordinate values estimation, including planetary masses and coordinates, astronomical unit and light speed

08 p1232 A72-21151

Outer planet mass determination limitations from mutual motion perturbations

08 p1236 A72-21636

Protoplanetary bodies mass distribution by coagulation theory, using inverse power law

11 p1719 A72-25966

Lunar mass, gravitational field and moments of inertia from Lunar Orbiter spacecraft Doppler tracking data

13 p2037 A72-28989

Mars and moon cores elastic properties inferred from hydrostatic equilibrium based on observed data for total mass, radius and moment of inertia

13 p2048 A72-29809

Earth-moon system mass from ratio of solar mass to sum of terrestrial and lunar masses, discussing solar attraction effects and radar distance measurements

15 p2306 A72-31598

Outer planets masses and ephemerides, noting guidance system and fuel quantity for orbit corrections on interplanetary flight

15 p2312 A72-32181

The Laplace plane and the masses of the planets

17 p2618 A72-35813

The masses, densities and moments of inertia of Uranus and Neptune.

20 p2967 A72-39184

Disturbing parameters effect on spacecraft trajectory X coordinate values estimation, including planetary masses and coordinates, astronomical unit and light speed

20 p2969 A72-39256

A determination of the motion of the ecliptic.

23 p3337 A72-43833

Determination of parameters related to the interior of Mercury.

24 p3436 A72-44696

PLANETARY MOTION

U SOLAR ORBITS

PLANETARY NEBULAE

Planetary nebulae dynamic models, incorporating expanding shell thermal histories and thermal stability in terms of high temperature evolutionary phase

02 p0276 A72-11667

Planetary nebula IC 418 reddening constant from Paschen line intensities of IR spectrum

04 p0570 A72-14554

Orion and planetary gaseous nebula helium atoms metastable triplet states population calculations

04 p0578 A72-15314

Planetary nebulae NGC 2392, 6210, 6826, 6720 and 6853 observations, presenting monochromatic photographs and isophotic contours

05 p0713 A72-16021

Model computations for population I stars of 0.6, 0.8 and 1.2 solar masses, considering evolutionary sequences correspondence to planetary nebulae evolution

06 p0882 A72-17999

Faint planetary nebulae classification and measurement in northern Milky Way between Cygnus and Perseus from Schmidt camera survey

07 p1070 A72-19084

Planetary nebula IR continuum and line radiation from spectrophotometric observation relation to visual and radio wave data

08 p1235 A72-21387

Hyades member star BD plus 16.516 deg described as late evolution product of binary system with mass exchange and loss through planetary nebula phase

10 p1543 A72-24618

Luminous filaments model of density condensations optically thick to ionizing radiation in planetary nebulae

10 p1550 A72-25197

Planetary nebula classification based on forbidden line ratios and morphology, discussing galactic plane distribution, radial velocities and evolution

12 p1867 A72-27209

Planetary nebulae RF observations comparison with optically determined H-beta intensity for extinction coefficients

15 p2307 A72-31797

Planetary nebulae nuclei evolution, describing shell ejection mechanism with dependence on progenitor star luminosity

16 p2451 A72-33032

Planetary nebula M2-9 spectrum analysis, discussing IR excess, internal motions and Fe II emission lines

16 p2455 A72-33459

Energy level population and emission spectrum of C IV ion in planetary nebula with radiative excitation

16 p2458 A72-33688

Emission line polarization prediction for planetary nebula C IV ion emitted spectrum via theory for energy level population

16 p2458 A72-33689

Theoretical He-triplet line strengths compared with astronomical observations of planetary nebulae and H II regions

17 p2614 A72-35646

Observations of planetary nebulae at 1.65 to 3.4 microns.

19 p2854 A72-37233

Statistical investigations of motions and distances of planetary nebulae

19 p2860 A72-37969

Photometric study of the NGC 3587 planetary nebula /the Owl/ observed in H sub alpha light - Structure of hydrogen in the nebula

20 p2973 A72-39890

Numerical model of NGC 7662 consistent with line strengths and ratios, considering double shell structure and central star flux deviation from black body

21 p3105 A72-41033

Ionization structure and coarse and fine analyses in planetary nebulae spatial spectroscopic diagnostics based on line profile monochromatic intensity integral equation inversion

23 p3339 A72-44236

PLANETARY ORBITS

Jupiter outer satellite origin, considering capture orbit dimensions based on three body elliptical problem

02 p0275 A72-11594

Meridian circle planet and asteroid positions and deviations from ephemerides during 1950 to 1955

05 p0723 A72-17158

Relative motion of two mass points linked by flexible weightless tether in orbit around planet

06 p0891 A72-18695

Trojan deep space communications systems, maintaining powerful relay satellites in equilibrium at Lagrangian points of earth, Mars and Venus orbits

10 p1548 A72-24975

Three body problem study of satellite capture by planets in elliptical orbits, deriving orbital elements in terms of mass ratio and planetary orbit eccentricity

12 p1865 A72-27096

Phobos and Deimos orbital characteristics, noting related Martian physical properties determination

15 p2302 A72-31277

Orbital correction problems for vehicle around spherical planet, considering velocity, fuel consumption and trajectory optimization

15 p2308 A72-31819

Computational method for determining numerical values of relativity by two-way Doppler radio tracking and ranging data from planetary orbiting spacecraft

15 p2310 A72-31978

Existence proof and boundary regions for multiple solutions in minor planets circular orbits determination

18 p2723 A72-36085

Representation of the coordinates of a satellite of a spheroidal planet with the aid of series expansions

21 p3102 A72-40099

Least squares method for satellite motion parameters determination in orbital plane, using altimeter distance to planet surface measurements

22 p3223 A72-42202

Ephemerides and improved orbital elements of minor planets, noting general theory of relativity verification from astronomical observations of Icarus

24 p3437 A72-44758

Search for trans-Plutonian planets with the aid of periodic comets

24 p3437 A72-44759

Correction of the orbits of 161 minor planets

24 p3437 A72-44763

Maneuver design and implementation for the Mariner 9 mission.

24 p3443 A72-45429

[AIAA PAPER 72-913] Mariner 9 Mars orbital trajectory analysis from earth based radio data, considering gravity field, n-body perturbation and solar radiation pressure effects [AIAA PAPER 72-928]

24 p3443 A72-45434

PLANETARY QUARANTINE

Papers on planetary quarantine covering microbial survival in deep space, contamination by nonsterile flight hardware and sterilization

01 p0019 A72-10817

Planetary quarantine microbiological and engineering problems, discussing cost, international policies, contamination and sterilization

01 p0019 A72-10818

Planetary quarantine cost and mission success constraints, formulating mathematical models for international goals and implementation systems

01 p0019 A72-10819

Planetary quarantine microbial contamination control, considering clean room concept and microbiological barrier techniques

01 p0019 A72-10821

Nonsterile space flight hardware effects on planetary quarantine, evaluating contamination sources, design and mission parameters, cleanliness conditions and bioload

01 p0020 A72-10824

Optimum aim point biasing in case of a planetary quarantine constraint.

20 p2968 A72-39196

Development of planetary quarantine in the United States.

23 p3259 A72-43382

Effects of aeolian erosion on microbial release from solids.

23 p3253 A72-43384

Application of planetary quarantine methodology and spacecraft sterilization technology to improved health care delivery.

24 p3375 A72-45148

PLANETARY RADIATION

To modulation of Jupiter decametric emissions, using cyclotron magnetosphere model and coupling by whistler mode electromagnetic waves

Jupiter decameter radio burst possibility as indicator of high velocity fluxes and shock waves in solar wind

Martian radio emission at 8.57 mm during 1971 approach, comparing brightness temperature to Jupiter

Grating spectra of Jupiter North Equatorial Belt, noting absorption feature at 4.73 microns

Giant planets internal constitution models, discussing Jupiter visual magnitude variability, Saturn ring system, cold matter equations of state and He abundances

Real time complete Stokes vector scanning photoelectric polarimeter with 16 cm aperture for measuring visible radiation of solar disk, corona, moon and planets

Mars short wave line spectra from measurement with reflector, estimating nitrogen dioxide content in atmosphere

Jovian planets methane and ammonium absorption bands spectrophotometric investigation, noting Saturn spectral variations

Jupiter decametric radio emission relation to solar wind, geomagnetic activity and shock waves causing Forbush decreases

Saturn radio emission and brightness temperature measurements, determining rings optical thickness upper limit

Extrasolar planets UVB color indices calculation, noting relative reflectivity and primary star color

Jovian decametric radiation observations, showing satellite Io relative position correlated to highest frequency

Venus, M17 and M82 observation on ground through 345 micron atmospheric window, discussing IR fluxes

Bright O, C and carbon dioxide emissions in Martian airglow from temperature profile models based on Mariner UV spectrometry

Venus 8.2 mm radio emission dependence on sun-light phase angle, considering implications regarding day/night atmospheric temperature variations

Radiation polarization from Jovian disk center as function of phase angle from polarimetric observations

Astronomical model for Jovian decametric radio emission control by Io satellite based on two surface sources on planet and particle interaction with plasma

Maximum cut-off frequency of Io controlled Jovian decametric radiation as function of lambda coordinates

Cyclotron magnetoacoustic wave generation by planets and binary stars in circular orbits, deriving interstellar gas density variations

UV absorption levels in different areas of Jupiter disk from spectrophotometric studies at 3300-4800 A, noting temporal variations in reflectance

Venus, Mars, Jupiter and Saturn UV spectra from OAO-2 objective grating spectrophotometry, obtaining planetary albedos from G-type stars observations

Saturn radio emission detection and measurement at 49.5 cm, determining equivalent disk brightness temperature

Narrow band frequency drifts of polarized Jovian L bursts from simultaneous radio observations

Spacecraft-based observations of gamma and X radiation resulting from planetary surface and atmosphere processes to obtain source medium chemical composition

Venus 8.2 mm radio emission dependence on sun-light phase angle, considering implications for day/night atmospheric temperature variations

Radiation polarization from Jovian disk center as function of phase angle from polarimetric observations

Three station interferometer observations of Jovian decametric burst at 18 MHz, discussing possible solar wind interference

Jupiter decameter radio bursts as indicator of high velocity fluxes and shock waves in solar wind

Mars surface normal albedo distribution function from red light photometry data

Monochromatic brightness coefficient measurements for Jupiter and Saturn disk centers and Uranus geometric albedo

Jupiter decametric radiation modulation by photoelectron emission by satellite Io, describing future probe experimental test

Saturn rings gas-dust atmosphere, thickness and motion, considering planetary radio emission and brightness temperature

Venus long wave radiation spectral composition, angular distribution and carbon dioxide transmission from thermal, structure and vertical radiation absorption profile

Jovian synchrotron emission measurements by radioheliograph at 80 MHz, passing square low detector outputs through RC integrators

Mars violet haze and blue clearing for Syrtis Major-Arabia from photographic and photoelectric data

Venus brightness temperature and phase dependence at 2.7 cm wavelength during 1968-1970

Photometric search for Venus halo effect during 1970 inferior conjunction in relation to brightness maximum and ice in cloud tops

Hydrogen to helium mixing ratio in giant planets from far IR spectroscopy for atmospheric thermal models and greenhouse effect calculations

Mars integrated radio temperature relation to blanket electrical properties for 1971 opposition, assuming Martian soil properties independence from depth and temperature

Fourier analysis of Pluto light curve in terms of geometrical model consisting of bright and dark areas

The plasma physics of the Jovian decameter radiation.

Strong beaming of Jupiter's non-Io-related radio emission.

Brief survey of the problems of space radiobiology and radiation safety in space flights.

Some photometric parameters of the minor planet 2 Pallas.

Extensive air showers and the sporadic decameter radio emission of Jupiter

Saturn ring thickness estimates according to observations in 1966

Measurement of Jovian radio emission at a wavelength of 2.94 m

Mars surface normal albedo distribution function from red light photometry data

Monochromatic brightness coefficient measurements for Jupiter and Saturn disk centers and Uranus geometric albedo

Mars atmosphere temperature profiles inference from outgoing radiation spectral characteristics, constructing atmospheric model

Electrodynamic effects of Jupiter's satellite Io.

Jupiter - New evidence of long-term variations of its decimeter flux density.

Uranus methane brightening at limb and south pole explained by Rayleigh scattering and haze in upper atmosphere

Sunlight scattering by double reflection on rough and absorbing surfaces, deriving fractional circular polarization from models for comparison with observation

Structure of Jupiter's decametric radio sources - Two-dimensional probability and flux studies, 1957-1970.

PLANETARY SURFACES

PLANETARY ROTATION

Limited three body problem applied to planetary angular momentum increment due to accretion of particles in heliocentric orbits, discussing planet rotation laws

Rotation production in giant planets by gaseous impact, discussing Jupiter and Saturn formation

Linearized continuous baroclinic atmospheric model, discussing stability for planetary vorticity gradient

Perturbed satellite motion in gravitational field of aspherical rotating planet

Jovian belts, zones, great red spot, white ovals and atmospheric rotation and circulation from methane photographs analysis, comparing to earth atmosphere

Mariner 9 radio tracking measurements of Mars gravity field and pole direction, comparing to moon and earth

Numerical simulation of atmospheric turbulence in planetary boundary layer due to wind shear and/or unstable thermal stratification, noting buoyancy and planetary rotation effects

Perturbed satellite motion in gravitational field of aspherical rotating planet

Cosmic spherical rotating bodies angular velocity zonal distribution determination, noting application to Jupiter and Saturn

Limited three body problem applied to planetary angular momentum increment due to accretion of particles in heliocentric orbits, discussing planet rotation laws

Rotation production in giant planets by gaseous impact, discussing Jupiter and Saturn formation

Solar activity long term effects on Jupiter cloud structure rotational periods, using Chree superposition analysis

Earth based Mars photographic observations with direct image transmission via TV system, determining rotation period

Saturn rotation period latitudinal difference, presenting graphic plots derived from various visual observations

Russian book - Large-scale motions in the convective zones of stars and large planets.

The role of eruptive centers of the atmosphere of Jupiter in the determination of the rotation velocity of the core

Jupiter - Its Red Spot and disturbances in 1970-1971.

PLANETARY SATELLITES

U NATURAL SATELLITES

PLANETARY SPACE FLIGHT

U INTERPLANETARY FLIGHT

PLANETARY SPACECRAFT

U INTERPLANETARY SPACECRAFT

PLANETARY SURFACES

NT MARS SURFACE

Organic materials detection on planetary surfaces with in situ gas chromatography and mass spectrometry

Automatic craft for planet surface exploration, classifying propulsion gear

Planetary and lunar surface relief reconstruction from photographic imagery, discussing statistical morphological characteristics determination from relief

Jupiter evolution from summer 1969 to autumn 1970, noting north equatorial and south temperate bands and Red Spot intensity and surroundings

Photographic measurements of Saturn, observing atmospheric belt latitudes, ring dimensions and southern hemisphere bright spot rotation

Steady state exact solutions of MHD equations for perfectly conducting self gravitating incompressible fluid, showing solutions existence for rotating planetary ellipsoid free liquid surface

Topography of swath around Venus equator from wavelength dependence of radar cross section

Spacecraft-based observations of gamma and X radiation resulting from planetary surface and at-

mosphere processes to obtain source medium chemical composition 10 p1530 A72-25060

Circularly polarized ultrashort radio wave reflection from lunar and planetary surfaces, determining angular scattering spectrum 11 p1599 A72-26908

Mercury topography and scattering characteristics from 3.8 cm radar observations, comparing to Mars and Venus 12 p1865 A72-27098

Diving operations medical aspects significance for manned planetary surface exploration in high density atmospheres, considering protective clothing, breathing apparatus and gas mixtures, etc 12 p1769 A72-27415

Mars and Venus instrumented spacecraft flight results, describing planetary topographies, atmospheres and magnetic fields 12 p1877 A72-27650

Venus atmospheric parameters below critical refraction and surface refractive index from signal amplitude measurement by radio holographic occultation techniques 14 p2151 A72-30467

Wind velocity and some Venusian surface characteristics monitored by the "Venera-7" automatic interplanetary station 17 p2610 A72-35210

How to measure surface and atmospheric conditions on Venus by microwave interferometry 17 p2611 A72-35321

Russian book - Physics of the earth and planets: Figures and internal structure 19 p2856 A72-37474

Methods of radar studies of the moon and planets from spacecraft 21 p3103 A72-40307

Albedo and surface illuminance of a planet having a nonhomogeneous purely scattering atmosphere 21 p3050 A72-41796

Jupiter surface maps for 1965-70 from drawings obtained with astrophotograph, noting high activity and eruptive changes after 1961-63 outburst 22 p3220 A72-41920

Jupiter surface maps from synoptic observations with refracting telescope, considering white cloud formations and atmosphere motions 22 p3220 A72-41921

Effects of aeolian erosion on microbial release from solids 23 p3253 A72-43384

PLANETARY TEMPERATURE

Titan and Galilean satellites effective temperatures from broadband observations, suggesting low surface emissivity or high opacity for Titan 13 p2041 A72-29417

Mars upper cover temperature, representing diurnal variations at different areographic latitudes as harmonic series 14 p2148 A72-30207

Unipolar steady electromagnetic bow shock interaction of Mercury with solar wind, calculating planetary surface temperature 15 p2303 A72-31305

Jupiter cloud models, observational characteristics and temperature error at 5 micron wavelength 15 p2312 A72-32095

Jupiter atmospheric greenhouse effect modeled by two layer emission, deriving temperatures from non-gray step function approximation of IR absorption 15 p2312 A72-32096

Uranus, Neptune and Pluto disk temperature observations via National Radio Astronomy Observatory interferometer 16 p2455 A72-33464

The spectrum of Mars between 8 and 13 microns 17 p2606 A72-34575

Earth and Mars - Evolution of atmospheres and surface temperatures 17 p2613 A72-35395

Gas-liquid hydrogen mixture and helium adiabatic model of Jupiter temperature and pressure distribution, estimating planet center temperature 19 p2863 A72-38074

Martian surface relief and atmospheric properties from Mars probe observations, considering soil, dust storms, temperature distribution and life possibility 22 p3222 A72-42139

Mars upper cover temperature, representing diurnal variations at different areographic latitudes as harmonic series 23 p3333 A72-43237

PLANETOCENTRIC COORDINATES

NT GEOCENTRIC COORDINATES

Representation of the coordinates of a satellite of a spheroidal planet with the aid of series expansions 21 p3102 A72-40099

PLANETOLOGY

Review of papers on planetology given at Brighton symposium, covering moon, Venus, Mars and Jupiter 01 p0132 A72-11071

Martian internal structure, investigating oxidation rate of chondritic material 02 p0277 A72-11752

Terrestrial planets internal constitution and thermal history model, emphasizing iron fractionation in structure 03 p0418 A72-13110

Mariner Venus/Mercury 1973 flyby mission imaging experiment, discussing mission constraints, objectives and use of real time transmission vidicon camera and high resolution UV photography 04 p0568 A72-14494

Mars carbon dioxide distribution map determination of surface topography from spectrophotometric observations of equatorial region 04 p0569 A72-14499

Earth mantle and core density using Monte Carlo models compared with lunar structure from crust and seismology data, noting planetological contrast 04 p0571 A72-14616

Outer planets mass determination noting anomalous latitude residuals of Uranus 04 p0575 A72-15033

Principal planets mass derivation using fundamental and independent determinations in table form 04 p0576 A72-15037

Nearby spherical planet with two irrotational force fields, comparing identical frequency along latitude and meridian circles 05 p0656 A72-16185

Distant stellar satellites existence possibility based on maximum distance estimation for material particle motion stability with respect to sun or another star 08 p1231 A72-21133

Soviet papers on physics of moon and planets covering Martian violet clouds, UV absorption levels in Jupiter and Saturn disks, etc 08 p1237 A72-21826

Martian crater obliteration theory, suggesting filling by dust deposition 10 p1531 A72-23706

Book on stellar astronomy covering H-R diagram, solar system, nuclear energy sources, Milky Way Galaxy, quasars, cosmology, planetology, etc 16 p2453 A72-33275

Internal structure dynamics of earth, moon and planets, showing density variation and bulk modulus as function of pressure with correction of Bullen hypothesis 16 p2461 A72-34176

International Geological Congress, 24th, Montreal, Canada, August 21-30, 1972, Proceedings. Section 15 - Planetology. 17 p2614 A72-35676

Russian book - Physics of the earth and planets: Figures and internal structure 19 p2856 A72-37474

Book on moons and planets covering celestial mechanics, solar system origin, stellar formation, comets, asteroids, meteorites, planetary interiors, surfaces, atmospheres, etc 22 p3228 A72-42750

Solar system thin disk form planet formation in equatorial plane from nebula dust component, discussing gravitational effects and mass increase rate 23 p3335 A72-43261

Russian book - Space research 1970: Investigation of the gravitational fields and shapes of the earth, other planets, and the moon on the basis of spacecraft observations. 24 p3443 A72-45399

Book on earth, moon and planet space photography, discussing synoptic meteorological data, mapping, surface detail inspection and planetary exploration 03 p0438 A72-14099

Outer planets satellites physics and chemistry, discussing steady state thermal models based on energy equilibrium between internal radioactive decay and surface radiation 04 p0568 A72-14495

Telescope observations of occultations of stars by outer planets, natural satellites and asteroids 09 p1387 A72-22977

Disk diameter errors due to wire thickness in reduction of visual planetary observations 09 p1311 A72-23062

Trans-Plutonian planet effect on Halley comet, considering perihelion errors and comet residuals 13 p2038 A72-29012

Sub-Mercurial planet Vulcan observation data, calculating orbital elements, angular size and velocity radial distance and object diameter 14 p2149 A72-30234

New orbital elements for moon and planets. 17 p2609 A72-35106

A possible mechanism for the capture of micrometeoritic particles by the earth and other planets of the solar system. 17 p2619 A72-35939

Positions of the major planets and the moon observed at the 0.33 M photographic equatorial 19 p2858 A72-37856

Data link design for planetary video data transmission back to earth based on rate distortion theory generalization of information theory 21 p3019 A72-40891

Search for trans-Plutonian planets with the aid of periodic comets 24 p3437 A72-44759

Biological aspects of communications with extraterrestrial intelligence, discussing life existence possibility on wandering planets 24 p3372 A72-45127

Critical inclinations and eccentricities concepts for N planet problem, applying results to general three body problem 24 p3442 A72-45239

From plasma to planet; Proceedings of the Twenty-First Nobel Symposium, Saltsjobaden, Sweden, September 6-10, 1971. 24 p3444 A72-45451

Plant leaves light reflectance, transmittance and absorptance characteristics relationship to leaf

mesophyll arrangement, considering interpretation of aircraft/spacecraft remotely sensed data

02 p0213 A72-11856

Origin and development of plasma membrane derived invaginations in *Vinca rosea*, observing endocytosis in plant cells

05 p0616 A72-15810

Manganese catalyst photoactivation process for oxygen photosynthetic evolution investigated in Mn-deficient *Anacystis nidulans* cells

05 p0624 A72-15811

Illumination effect on proton and gamma irradiated cabbage plant growth, height and foliage, indicating radiation protective effect for certain light intensities

05 p0622 A72-16649

Radiative transfer equation for solar irradiance penetration of turbid atmosphere and plant canopy, using four point quadrature method

09 p1297 A72-22442

Mitogenic and IR radiation and plant bioelectricity in photogrammetry, using metabolic energy-photoemulsion relation

09 p1312 A72-23283

Biological experiments on plants, animals and bacteria aboard Zond 5, 6 and 7 space probes, noting flight conditions effect on physiological functions and hereditary structures

11 p1579 A72-25941

Plant leaves biochemical activities study by light scattering techniques, discussing photometric, spectroscopic and bionics methods

13 p1955 A72-28518

Hermetic chamber medico-engineering experiment for long term isolation effects on human intestinal microflora, showing reduction and disappearance of certain microbe populations

13 p1904 A72-29323

Dose response curves for pink somatic mutations in *Tradescantia* after neutron and X ray irradiation

15 p2186 A72-31723

Man, chlorella and wheat plant in life-supporting biological system, showing compatibility relative to gas and water exchange

15 p2189 A72-31826

Cytological, genetic and physiological analyses of space flight factors effects on seeds and plants aboard Zond 5 probe

15 p2186 A72-31828

Gravity effects on plant organ orientation with respect to force direction from Chara rhizoid cell statoliths

15 p2189 A72-31932

Action of a constant magnetic field on plant growth

17 p2503 A72-35006

Instrumental neutron-activation determination of cobalt and certain other elements in plant materials

22 p1383 A72-42471

Determination of copper, iron, cobalt, nickel, and manganese in biological samples of vegetable origin

23 p3260 A72-43924

PLANTS [INDUSTRIES]

U INDUSTRIAL PLANTS

PLASMA ACCELERATION

Plasma jet formation within high pressure discharges in air at atmospheric pressure, discussing electrode configuration, current density and accelerating magnetic field strength

03 p0396 A72-13662

Acceleration equations for plasma injectors with capacitive and inductive energy storage elements

05 p0697 A72-16985

Electric eddy currents formation during thermal acceleration of inviscid quasi-linear plasma in profiled channel

08 p1215 A72-21654

Snow-plough model of plasma acceleration for determining time dependence, gas density distribution and energy transfer

09 p1359 A72-22819

Solid body model for electric arc acceleration in thermionic cathode rail accelerator, discussing plasma mass effects

[AIAA PAPER 72-412]

11 p1706 A72-26162

Parallel rail solid fuel pulsed electric microthruster performance, noting mathematical model for mass ablation and plasma acceleration mechanism

[AIAA PAPER 72-458]

11 p1708 A72-26194

Shock-induced flow acceleration in Ar plasma, studying shock front behavior from high-speed photographs

11 p1696 A72-26374

Linear electron acceleration mechanism in plasma, showing polarization fluctuations in diode under strong electric field

11 p1699 A72-26761

Acceleration equations for plasma injectors with capacitive and inductive energy storage elements

12 p1850 A72-27129

Russian book on electrodynamic plasma acceleration covering charged particles motion in electromagnetic field and pulsed, MHD, steady and Hall accelerators

12 p1853 A72-28341

Some comments on the generation of electromagnetic traveling and standing waves for inductive acceleration of plasmas

[DFVLR-SONDDR-209]

17 p2589 A72-34895

Electron and plasma particle acceleration by moving pulsed laser, noting appearance of fast particles, hard radiation and neutrons

23 p3295 A72-43312

Calculation of the parameters of a plasma accelerated in a high-frequency electric field and a static magnetic field

23 p3320 A72-43660

PLASMA ACCELERATORS

NT COAXIAL PLASMA ACCELERATORS

High velocity plasma generation in induction hydrodynamic shock tube and flow into rail type plasma accelerator, investigating possible T layer formation

01 p0110 A72-11203

Passive electric microwave probe with balancing capacitance for studying waveguide fields at high microwave power levels in radiative plasma accelerators

02 p0223 A72-11418

Compressible turbulent boundary layer equations for flow on B wall of MHD accelerator, including electron thermal nonequilibrium and finite rate ionization

03 p0397 A72-13923

One dimensional continuous electrode shock tube driven MHD accelerator, analyzing unsteady flow behind ionizing shock wave by method of characteristics [AIAA PAPER 72-102]

05 p0697 A72-16973

Pulsed flat electrode erosion plasma accelerator, determining electric and magnetic fields distribution, current density and electron concentration

05 p0697 A72-16987

Unipolar pulsed plasma accelerator, describing trigatron circuit design for generation of 100 kA unipolar current pulses of 35 microsec duration

07 p1040 A72-19316

Electromagnetic plasma accelerator with electron drift and diffusion towards anodes, neutral gas ionization and extended ion acceleration zone

09 p1361 A72-22955

Steady state plasma interactions with electromagnetic force field in plasma accelerators, showing shock wave formation

[AIAA PAPER 72-413]

11 p1706 A72-26163

Magnetic fields effect on anode heat losses in MPD accelerator arcs, noting minimal charge current density

[AIAA PAPER 72-502]

11 p1711 A72-26225

Pulsed flat electrode erosion plasma accelerator, determining electric and magnetic fields distribution, current density and electron concentration

12 p1850 A72-27131

Pulse plasma injector accelerating circuit resistance dependence on time and current amplitude calculated from current oscillograms

13 p2010 A72-28733

Supersonic dense low temperature plasma jet generation by pulse mode accelerator based on dielectric erosion and electrically exploded conductor

13 p2011 A72-29007

High speed frame photography application in spectroscopic studies of plasma jet in cylindrical pulsed accelerator with dielectric

15 p2283 A72-31418

Fine structure similarities between solar flares and current sheath in laboratory hot plasma coaxial accelerator, noting X ray and high energy particles production mechanism

16 p2438 A72-33919

Electromagnetic plasma accelerator with electron drift and diffusion towards anodes, neutral gas ionization and extended ion acceleration zone

17 p2593 A72-35884

Production of intense ion beams by high-frequency electric fields

19 p2839 A72-37331

Measurement of electron concentration in the plasma of a pulsed erosion-type accelerator

19 p2843 A72-38535

Estimation of the mass composition and energy spectrum of a plasma jet from a conical pulsed accelerator

21 p3089 A72-40134

PLASMA ARC SPRAYING

U ARC SPRAYING

U PLASMA SPRAYING

PLASMA ARC WELDING

Plasma generator with Ar as ionizing medium for metal cutting and welding, discussing protection against secondary arc formation

08 p1176 A72-21048

Ar-H microplasma welding of thin Cr steel sheets with narrow seams for aircraft engines and precision equipment casings

09 p1318 A72-22548

Pulsed microplasma and intermediate current plasma welding of AL, comparing with tungsten arc and electron beam welding

09 p1320 A72-23628

Pulse shaping, arc plasma jets and torch movement indexing for high precision pulsed tungsten inert gas (TIG) welding

09 p1321 A72-23635

Prototype fine wire feed unit and microplasma welding torch and equipment for butt welding of Ni maraging steel, testing welds mechanically

09 p1321 A72-23636

Plasma arc and MIG /metal inert gas/ welding combination with filler wire, obtaining high melting rates and penetration control

09 p1322 A72-23645

Automatically controlled plasma arc welding for uniform cross section weld seams production under fluctuating electric current conditions, describing electronic control system

15 p2244 A72-31773

Magnetic control of arc plasma and its application for welding

24 p3406 A72-44777

PLASMA ARCS

U PLASMA JETS

PLASMA CHEMISTRY

Chemical reaction rates for dissociation and exchange in nonisothermal plasma from molecular energy level occupation investigation

20 p2957 A72-39018

Formation and loss of O₂+/ and O₄+/ ions in krypton-oxygen afterglow plasmas

23 p3316 A72-44345

Kinetic equations for a chemically reacting plasma

24 p3430 A72-45566

PLASMA CLOUDS

Plasma inhomogeneities effect on radio wave absorption in interstellar clouds of ionized hydrogen, analyzing cosmic radio emission spectrum

08 p1231 A72-21120

Geomagnetic field effects on initially spherically symmetric ion cloud diffusive motion in earth upper atmosphere

09 p1297 A72-22577

Spectrum of hot hydrogen plasma continuum radiation, discussing models for Scorpius X-1 source and inhomogeneous clouds

09 p1391 A72-23536

Deionization mechanism of expanding plasma cloud produced by arc burning in vacuum, discussing charged particle concentration and ion thermal velocity

10 p1521 A72-24356

Rocket released artificial Cs plasma clouds in upper atmosphere, measuring electron density by HF radar observation

15 p2231 A72-32330

Geomagnetic field line tracing by plasma clouds produced by Ba vapor release, noting different ion drift rates and directions

16 p2384 A72-32977

Barium cloud striations deformation in ionosphere explained by equations of motion for plasma cloud thin bar model, discussing pinch effect

16 p2387 A72-33907

Deionization mechanism of expanding plasma cloud produced by arc burning in vacuum, discussing charged particle concentration and ion thermal velocity

17 p2589 A72-34956

Motion of ion-cloud in the ionosphere, field-aligned cloud with Gaussian distribution of ionization density

17 p2546 A72-35060

Superposition principle in test particle method for reducing plasma cloud kinetic theory to determination of conditional probability function involving Vlasov equation

17 p2591 A72-35163

Study of the motion of ionized artificial clouds in the upper atmosphere

18 p2688 A72-36864

Effect of Thomson scattering on the emission spectrum of an optically semitransparent plasma

21 p3102 A72-41774

Transfer effects on X-ray lines in optically thick celestial sources

24 p3435 A72-44843

Microwave observations of a partially ionized interstellar cloud

24 p3447 A72-45551

PLASMA COMPOSITION

Ion charge composition in plasma-electron beam system in strong longitudinal magnetic field, noting multiply charged ions production under high temperature conditions

05 p0701 A72-17235

Satellite and ground station observed ionospheric plasma parameters comparison, considering electron density and temperature and ion temperature and composition

12 p1804 A72-27785

Nature of ion generation during the action of laser emission on a solid body

19 p2811 A72-38193

Estimation of the mass composition and energy spectrum of a plasma jet from a conical pulsed accelerator

21 p3089 A72-40134

PLASMA CONDUCTIVITY

Plasma hydrodynamic Buneman current instability under strong electric field, considering nonlinear stage in one dimensional case

01 p0105 A72-10024

Acoustic instability of plasma with current under equilibrium ionization and moderate neutral gas pressures

01 p0109 A72-10485

MHD instabilities of plasma with current, using two fluid model in crossed magnetic-electric fields

01 p0109 A72-10486

Kubo bulk electrical conductivity of two dimensional guiding center plasma in strong dc magnetic field

02 p0263 A72-11966

Free hf discharge plasma column generator, discussing equipment and current and resistance measurements

03 p0393 A72-13083

Plasma conductivity frequencies, including electromagnetic wave propagation in alternating field and scattered light intensities

03 p0396 A72-13653

Intense pulsed electron beam production by current flow through narrow gap filled with plasma

03 p0396 A72-13656

Immersion-type electroconductivity probe for anisotropic plasmas, calculating Hall coefficient

03 p0397 A72-13922

Rotationally symmetric static incompressible infinite conducting plasma elliptic differential equation reduction to boundary value problem

03 p0400 A72-14353

Nonideality effects on Coulomb gas conductivity by finding conductivity due to electron scattering at atoms, solving kinetic equation of three component plasma model

05 p0694 A72-15850

Poloidal Hall current calculation in hydrodynamic approximation for stationary weakly interacting and conducting cylindrical plasma flow with uniform transverse flow parameter distribution

05 p0701 A72-17240

Plasma conductivity dependence on electron velocity distribution function in distorted Maxwellian form

06 p0860 A72-17690

Thermal conductivity of stationary toroidal plasma in form of Pfirsch-Schluter diffusion factor, using ion heat balance equation

07 p1042 A72-19616

External circuit coupling effects on dc anomalous resistivity in electron plasma oscillation

07 p1043 A72-19666

Combustion product plasma electrical conductivity dependence on neutral component density fluctuation

07 p1044 A72-19888

Dense low temperature Ar and Hg plasmas, observing correlation between electrical conductivity and optical emission

10 p1517 A72-23835

Nonlinear conductivity of plasma with FM electromagnetic wave propagation, proposing electronic current density calculation method

10 p1519 A72-24130

Electrical conductivity of two dimensional strongly magnetized guiding center plasma, using Liouville equation

11 p1693 A72-25563

Magnetosphere neutral layer plasma conductivity determination from model of linear magnetic dipole in conducting fluid flow

11 p1622 A72-25945

Plasma interchange instability and convection in gravitational field, showing viscosity and resistivity stabilization and critical Reynolds number

11 p1697 A72-26584

Nonequilibrium ionization phenomena effects on electric conductivity of combustion gas-particle plasma generated by aluminized fuel seeded with potassium nitrate

13 p2013 A72-29363

Nonlinear model of ionization instability of MHD generators, assuming discharge stability with alternating layers of high and low electrical conductivity

13 p2014 A72-29371

Magnetosheath electron precipitation effect on dayside auroral-oval plasma density and conductivity, relating precipitation heat flux to solar wind energy density

13 p1950 A72-29381

Free HF discharge plasma column generator, discussing equipment and current and resistance measurements

13 p2015 A72-29433

Electron-ion collision frequency and conductivity of non-Debye plasma formed in high pressure discharge from Ar, Kr and Xe tubes

13 p2018 A72-29891

Low temperature homogeneous plasma electric conductivity in magnetic field, noting monotonic decrease

13 p2018 A72-29892

Ion-acoustic oscillations effect on turbulent plasma electric conductivity within weak external electric field

13 p2019 A72-29990

Isotropic conducting plasma dynamic behavior near rotating magnetized sphere, showing electric field-produced meridional convective currents

14 p2138 A72-30630

Hydromagnetic waves excited by transverse magnetic dipole in finite-conductivity plasma

14 p2102 A72-30662

Nonideality effects on Coulomb gas conductivity by finding conductivity due to electron scattering at atoms, solving kinetic equation of three component plasma model

15 p2283 A72-31269

Electrical conductivity of shock wave produced Xe plasma measured by probe, noting dependence on Mach number

15 p2284 A72-31583

Anisothermal magnetoplasma with non-Maxwellian particle distribution function, calculating electrical conductivity collisional factor from convergent classical kinetic equation

15 p2287 A72-32410

Multispecies magnetoplasma as electrical conductivity tensor collision factor from quantum mechanical convergent kinetic equation

15 p2287 A72-32411

Microscopic theory of weakly ionized plasma conductivity, showing particle diffusion function or transition probability description by linear Boltzmann equation

15 p2287 A72-32412

Auroral electrojet polarization model, considering ionospheric Hall and Pedersen conductance maximum due to precipitation from electron plasma sheet inner edge

[AD-745672] 16 p2444 A72-32961

Heat conductivity effect on structure and critical Mach number of shock wave propagation across magnetic field in cold rarefied plasma

16 p2435 A72-33152

Nitrogen plasma jet flow, attributing discrepancies in electrical conductivity and velocity to shock effects on probe measurements

[AIAA PAPER 72-671] 16 p2440 A72-34069

Combustion product plasma electrical conductivity dependence on neutral component density fluctuation

17 p2590 A72-35136

Transverse diffusion and conductivity coefficients for a three-dimensional magnetized equilibrium plasma.

17 p2592 A72-35379

Soft collision plasma scattering function, conductivity and particle energy loss from simplified Fokker-Planck collision model

17 p2592 A72-35621

Electric fields in MHD channels in the case of anisotropic and nonuniform conductivity

18 p2716 A72-36817

Temperature dependence of the electron thermal conductivity in rare gas plasmas.

18 p2716 A72-36958

Wave propagation in plasmas with fluctuations.

19 p2842 A72-38525

Stability of a plasma conductor with axial current, surrounded by cold gas with a pressure gradient

19 p2842 A72-38533

Observation of superheat instability in a fully ionized current-carrying plasma.

20 p2958 A72-39854

Nonlinear magnetosonic waves in a plasma with a finite conductivity.

21 p3090 A72-40485

Impedance of a partially ionized cesium plasma.

21 p3091 A72-40694

Boundary fluctuations of a plasma column with a current

22 p3211 A72-42655

Disequilibria created by an electric field in a nitrogen plasma

23 p3321 A72-43695

Role of nonlinear effects in the problem of the anomalous resistance of a plasma

23 p3322 A72-44481

PLASMA CONFINEMENT

U PLASMA CONTROL

PLASMA CONTROL

Nonlocal theory of electrostatic trapped particle instability in collisionless toroidal plasma, estimating particle mode nonlinear diffusion coefficient

01 p0108 A72-10239

Nonlocal behavior of ion sound instability in collisionless nonuniform confined plasma shock wave

01 p0108 A72-10240

Electrostatic potential fluctuations spectrum in turbulent hot ion plasma confined between magnetic mirrors, investigating mode coupling, energy cascading and electron concentration

01 p0108 A72-10242

Ideally conducting plasma confined in vacuum by circularly polarized magnetic field, investigating MHD

instabilities suppression by distributed automatic control system

01 p0109 A72-10503

Electrical and nuclear propulsion plasma containment problems, discussing simulation experiments and scaling devices feasibility

01 p0117 A72-10938

Quasi-static surface waves at Maxwellian plasma boundary with diffuse electron scattering, considering plasma electromagnetic oscillations

02 p0266 A72-12577

Equilibrium state linear theta pinch plasma confinement dependence on nonuniform magnetic force lines curvature radius

03 p0396 A72-13659

Moving plasma beam capture by transverse magnetic field due to polarization space charges electrostatic separation

03 p0396 A72-13657

Plasma density profiles by microwave interferometry technique in Sirius stellarator diverter for two magnetic field configurations and injection methods

04 p0555 A72-14619

Electron beam interaction with bounded solid state plasma, deriving slow wave dispersion relations

04 p0561 A72-15080

Toroidal plasma column in Tokamak systems, discussing field inhomogeneity role in maintaining equilibrium with conducting casing, confirming magnetic field and transformer iron core

04 p0557 A72-15171

Flutelike microinstabilities in mirror-confined homogeneous magnetized one-species plasma with broad perpendicular velocity distribution

04 p0559 A72-15354

Plasma ion collision transport analogy with turbulent velocity space momentum transfer, explaining confined plasma runaway electron absence in strong electric fields

04 p0560 A72-15469

Magnetic multipole confinement of magnetic field-free He and Ar plasmas in vacuum chamber, observing decay

06 p0854 A72-17505

Ion distribution function oscillations in first order ionic waves of single ended Q device, noting plasma confinement in static magnetic field

06 p0855 A72-17507

Closed line magnetic confinement device filled with laser produced hydrogen plasma, discussing laser beam high speed numerical control for injected pellet interception

[CLEA PAPER 12.1] 07 p1040 A72-19392

Field free constricted plasma discharge stability between electrodes, obtaining critical current

07 p1042 A72-19608

High frequency heating of dense toroidal plasma by nonaxisymmetric ion cyclotron waves resonant excitation in closed magnetic trap

07 p1043 A72-19638

Stability conditions of dissipative trapped ion mode in axisymmetric toroidal confinement systems, in vestigating collisional damping rate

07 p1045 A72-20476

Design equations for transpiration radiometer applicable to radiation measurement from confined Ar plasma

08 p1163 A72-20919

Two dimensional model for plasma without magnetic field trapped near current sheet end in dipole magnetic field resembling geomagnetic tail

08 p1157 A72-21108

Electron beam interaction with bounded homogeneous plasma layer natural oscillations, using collisionless kinetic equation

08 p1215 A72-21720

Propagation time of charge diffusion across magnetic field in bounded plasma

08 p1215 A72-21879

Soviet book on plasma physics and controlled thermonuclear synthesis covering plasma-electromagnetic interactions, magnetic traps and plasma cryogenic technology

09 p1361 A72-23201

Colliding plasma flows motion and capture in transverse magnetic field with mirror configuration, noting polarization effect

09 p1362 A72-23209

Plasma injected into closed multipole magnetic trap, investigating plasma wave locking time and characteristic life

09 p1362 A72-23213

Plasma injection in magnetic trap along curvilinear inhomogeneous magnetic field, showing long plasmasoids polarization and drift reduction by depolarization currents

09 p1363 A72-23218

Star stellarator model for hot electron plasma production by steady electron beam injection in closed magnetic traps

09 p1363 A72-23219

Crossed fields effect on plasma injection in magnetic trap

09 p1363 A72-23220

Multipole magnetic field configuration effectiveness in electromagnetic plasma trap, discussing electron losses critical angle and captured ions maximum density
09 p1363 A72-23221

Target jet density variations effect on vacuum in neutral atom beam ionization region of fast neutral particle magnetic trap
09 p1363 A72-23223

Charged to neutral particle transformation capacity of wide aperture recharge target formed by supersonic gas jets in magnetic trap with annular nozzle
09 p1363 A72-23224

Bounded plasma ionization instability inhomogeneity scale evaluation, assuming negligible electron energy losses due to heat conduction
10 p1517 A72-23844

Rotating low density plasma in magnetic mirror trap with Penning discharge, determining conditions for oscillations damping and plasma lifetime
10 p1521 A72-24354

Superconducting levitron machine for trapped hot plasma stability and confinement studies in vacuum, discussing construction and coil performance
10 p1460 A72-24758

Collective self fields generated from intense electron beams for high energy positive particle acceleration and Astron hot plasma confinement for fusion control
10 p1523 A72-24788

Parallel viscous modification of resistive tearing instability in Cartesian model of hard core pinch plasma confinement
10 p1523 A72-24795

Ion and electron temperature ratios in hot plasma, discussing energy relaxation, heating and cooling effects and electrostatic confinement by ambipolar diffusion
10 p1524 A72-25032

Plasma equilibrium configurations, considering magnetically contained focus in external magnetic field
11 p1694 A72-25788

Collisional distributions in mirror plasmas, using successive approximation technique for Fokker-Planck equation lowest eigenvalue and eigenmode
11 p1694 A72-25792

Laser pulse form effect on confined plasma heating, taking into account inverse electron-ion bremsstrahlung and stimulated Compton scattering
11 p1651 A72-26672

Nature and requirements of electrostatic inertial plasma confinement, deriving potential and particle densities as function of radius, grid voltage and current
12 p1850 A72-27281

Ionization stabilization in MHD generators by sensing electron density perturbation with linear feedback into nonequilibrium plasma
13 p2014 A72-29369

Nd laser irradiation of LiH particles in magnetic trap, investigating resultant plasma expansion and diffusion
13 p2015 A72-29431

Plasma diffusion coefficient in crossed electric and magnetic fields, discussing lifetime in magnetic trap and expression for ion mobility
13 p2019 A72-29942

Plasma capture by stellarator diverter magnetic field, noting stream length controllability by field pulse duration
14 p2135 A72-30168

Plasma heating in Tuman 2 toroidal magnetic trap by microwave injection at upper hybrid frequencies
14 p2137 A72-30311

Plasma containment by superposed fields/sustained field/ technique application to theta pinch, studying hydrogen and helium discharge behavior
14 p2138 A72-30400

Plasma containment in toroidal systems investigated on basis of fluid model containing inertia, momentum transfer, ionic collisions and thermal conductivity effects
15 p2285 A72-32273

Magnetic field profile optimization for beta-limitation in minimum-B mirror confined plasma in nuclear reactor
16 p2432 A72-32805

Skin effect in large hot tokamaks predicted by computer studies based on empirical transport coefficients, discussing suppression by moving limiter
16 p2433 A72-32812

Magnetic configuration for plasma confinement in torsatron with helical windings and no toroidal field coils
16 p2433 A72-32816

High latitude trapping boundary for 20 KeV electrons and 100 KeV protons during intense geomagnetic substorms, observing field-line motion
16 p2444 A72-32958

Nuclear composition telescope measurements on-board OGO 5 satellite, observing presence of geomagnetically trapped carbon, nitrogen and oxygen nuclei
16 p2382 A72-32959

Particle and energy fluxes across magnetic field in axisymmetric toroidal magnetic traps and plasmas with weak collisions, calculating radial electric field
16 p2440 A72-34153

RF discharge gap in cascaded plasma limiters, using tritium igniter as reliable electron priming source
18 p2715 A72-36451

Magnetic surface equation and collisional diffusion of finite beta tokamak plasma in low density regime
19 p2838 A72-37330

Electron-plasma-wave shocks in a bounded plasma.
19 p2840 A72-37719

Parametric coupling of large amplitude pump wave to E layer plasma mode to explain auroral electrojet irregularities external production and control
19 p2793 A72-38746

Pulsed IR laser for heating superdense plasma to high temperature, featuring inertial confinement by use of short duration energy and strong magnetic field
19 p2843 A72-38823

Determination of the magnetic field B in vacuum for general two-dimensional MHD-equilibria.
20 p2957 A72-39352

Plasma equilibrium in configurations with a helical magnetic axis with allowance for toroidality.
20 p2957 A72-39353

Low beta model of collision dominated plasma flow effect on toroidal confinement, simulating Stellarator, Levitron and Tokamak
20 p2957 A72-39356

Computer simulation of RF-confinement of plasmas in an open-ended toroidal quadrupole.
21 p3089 A72-40191

Resonant scattering of trapped particles by toroidal plasma modes.
21 p3092 A72-41217

Transverse velocity shear instabilities within a magnetically confined plasma.
21 p3093 A72-41628

External high-frequency modulation of an electron beam and heating of plasma ions in the case of beam-plasma instability in the magnetic trap
21 p3095 A72-41678

Pressure dependent microwave cavity breakdown field relationship to steady state plasma luminosity interpretation as evidence of RF confinement of low density plasma
22 p3212 A72-42897

Confinement time of plasma injected in magnetic field of racetrack with diverter, noting plasma equilibrium in toroidal magnetic field
22 p3213 A72-43106

Plasma heating in Tuman 2 toroidal magnetic trap by microwave injection at upper hybrid frequencies
23 p3318 A72-43213

Landau dispersion equations for oscillations damping of bounded electron plasma, noting application to plasma cylinder in conducting tube
23 p3319 A72-43410

Apparent constant wavelength oscillations in a bounded plasma.
23 p3320 A72-43577

High frequency heating of dense toroidal plasma by nonaxisymmetric cyclotron waves resonant excitation in closed magnetic trap
24 p3427 A72-44568

Magnetic control of arc plasma and its application for welding.
24 p3406 A72-44777

Kinetic approximation for confined electron beam stability in plasma situated in magnetic field, deriving instability increments and dispersion relations
24 p3428 A72-45078

Instability of a magnetically active plasma in the presence of a specified transverse velocity of the ions
24 p3429 A72-45488

Transformation of trapped charged particles to transit particles under the influence of a high-frequency electric field
24 p3429 A72-45494

PLASMA CYLINDERS

Plasma column equilibrium position feedback control based on combination principle, analyzing system stability
01 p0109 A72-10502

Traveling wave antenna for exciting ion cyclotron waves in cylindrical anisotropic magnetoplasma
02 p0188 A72-11468

Plane electromagnetic wave diffraction on magnetoactive plasma cylinder, using energy method and particle scattering model
02 p0183 A72-12754

Free hf discharge plasma column generator, discussing equipment and current and resistance measurements
03 p0393 A72-13083

Vacuum UV spectra of free plasma column in microwave field at high pressures for discharge in helium-deuterium mixture
03 p0394 A72-13084

Wall double layer temperature and plasma oscillations effect on electron energy distribution in low discharge plasma column
03 p0394 A72-13192

Nonlinear ionization wave equation, calculating nonlinear response of unstable positive plasma column to weak pulse disturbance
03 p0399 A72-14346

Nonuniform radial electric field effects on low beta magnetized plasma column stability from numerical analysis for weakly collisional regime
04 p0557 A72-15023

Plasma column interaction with counter rotating hf magnetic fields of multipole configurations, calculating angular velocity
04 p0557 A72-15169

Nonlinear surface wave propagation on pinched cylindrical plasma, developing asymptotic approach from L undquist equations
04 p0559 A72-15348

Geomagnetic tail natural oscillations, applying model of plasma cylinder with free boundary immersed in interplanetary medium
05 p0659 A72-17044

Poloideal Hall current calculation in hydrodynamic approximation for stationary weakly interacting and conducting cylindrical plasma flow with uniform transverse flow parameter distribution
05 p0701 A72-17240

Cylindrical alkali metal plasma column structure in single ended Q device under axial magnetic field
06 p0854 A72-17503

Cylindrical plasma ion-acoustic resonance measurements from various excitation methods for noise component identification
06 p0856 A72-17523

Q-machine plasma column drift instability passive feedback control, regulating feedback drive current phase and amplitude by varying resonance circuit characteristics
06 p0857 A72-17532

Electrostatic energy analyzer for local ion velocity distribution function measurement in double ended Q machine plasma column
06 p0814 A72-17551

Force-free magnetic fields effects on plasma column stability
06 p0860 A72-17744

Anisotropic equilibrium solution to Vlasov equation for high beta theta pinch plasma column
07 p1045 A72-20478

Dynamic stabilization of MHD instabilities in plasma column by multipole hf fields, analyzing dispersion equation
07 p1045 A72-20479

Refraction of electromagnetic wave with electric field perpendicular to applied magnetic field in anisotropic plasma cylinder cross section
07 p1046 A72-20507

Weakly damped Alfvén ion-cyclotron waves and fast magnetoacoustic waves in infinite plasma cylinder inserted into current bearing finite coil
07 p1046 A72-20516

Slow and fast longitudinal ion acoustic waves in plasma cylinder under axial magnetic field
08 p1215 A72-21873

Plasma flows interaction with plasma cylinder in diverter magnetic field, investigating plasma dynamics with electric probes, plasmascope and mass spectrograph
09 p1362 A72-23210

Charged and neutral particles radial distribution across positive isothermal plasma column in high current discharges
10 p1521 A72-24355

Positive plasma column theory for longitudinal cylindrical discharge problem in ambipolar conditions, stressing surface and bulk temperature effects
10 p1521 A72-24357

Magnetic diffusion into moving cylindrical incompressible plasma with radial divergence
10 p1521 A72-24413

Combined plasma and magnetic field cumulation due to heavy conducting liner implosion, noting compression parameters for plane and cylindrical bodies
10 p1523 A72-24723

Electron densities and drift velocities dependence on macroscopic discharge parameters in positive column of He-Cd laser
10 p1493 A72-25048

Plasma column stabilization by constant longitudinal inhomogeneous magnetic and rotating HF electromagnetic fields, noting application to plasma convective instabilities
11 p1694 A72-25786

Finite element method application to hydromagnetic plasma stability analysis, considering cylindrical plasma immersed in axial magnetic field and bounded by conducting shell
11 p1695 A72-25794

Plasma layer effect on natural oscillations of magnetosphere tail, using infinite plasma cylinder model immersed in interplanetary plasma
11 p1622 A72-25944

Geomagnetic tail model with plasma cylinder immersed into solar wind, obtaining dispersion equation for oscillations
11 p1627 A72-26532

Bounded systems dispersion relations interpretation for plasma waves and instabilities on finite cylinders, with emphasis on end plate damping and axial current effects on Q machines

11 p1697 A72-26597

Electromagnetic wave propagation in cylindrical plasma column of electrons and ions with and without applied uniform magnetic field in absence of collisions

13 p2010 A72-28681

Free HF discharge plasma column generator, discussing equipment and current and resistance measurements

13 p2015 A72-29433

Vacuum UV spectra of free plasma column in microwave high pressure discharge in helium-deuterium mixture

13 p2015 A72-29434

Homogeneous plasma column generation by HF generator, probing for electron temperature and charged particle concentration

13 p2015 A72-29507

Dispersion characteristics of ion-acoustic waves in positive gas discharge plasma column

13 p2019 A72-29912

Experimental investigation of electrostatic cyclotron harmonic waves excited in inhomogeneous plasma column with axial magnetic field by RF capacitor field

14 p2138 A72-30398

Magnetized plasma discharge steady state problem of finite cylinder positive column in magnetic field, detailing radial and axial solutions

15 p2288 A72-32508

Ion acoustic and guided electron plasma waves excitation by grid antenna produced LF signals in cylindrical plasma column

15 p2289 A72-32650

Plasma column formation by interaction with rotating HF electromagnetic field and longitudinal constant magnetic field

16 p2433 A72-32815

Magnetic field distribution measurement in axisymmetric plasma column inside Tokamak device by alpha particle beam from radioisotope

16 p2434 A72-32818

Nonlinear electromagnetic wave interaction in rarefied plasma cylinder subject to constant magnetic field in hydrodynamic approximation

16 p2363 A72-33479

Low pressure He and Ne discharge generated positive plasma column potential, determining electron concentration from electron energy distribution functions

16 p2437 A72-33746

Probe temperature, shape and size effects on electron energy distribution measurements for positive plasma column of low pressure He and Ne discharges

16 p2437 A72-33750

Electron-ion heating in high beta perpendicular collisionless shock waves by plasma cylinder magnetic compression using theta pinch

16 p2439 A72-33936

Scattering of electromagnetic waves from an inhomogeneous magnetoplasma column moving in the axial direction.

17 p2587 A72-34359

Charged and neutral particles radial distribution across positive isothermal plasma column in high current discharges

17 p2589 A72-34955

The propagation of non-axisymmetric Alfvén waves in an argon plasma.

17 p2591 A72-35371

Two fluid MHD model to study cylindrical plasma condenser resonance properties in crossed axial magnetic and alternating electric fields

17 p2593 A72-35881

Excitation of nanosecond waves on positive columns.

19 p2838 A72-37328

Kinetic theory of surface waves in a cylindrical plasma waveguide

19 p2842 A72-38531

Plane electromagnetic wave diffraction on magnetoactive plasma cylinder, using energy method and particle scattering model

20 p2902 A72-39060

Identification of transverse Kelvin-Helmholtz turbulence in a magnetoplasma column.

21 p3091 A72-40768

Method of calculation of the emission coefficient of a cylindrical plasma starting from the experimental profile of the intensity

21 p3092 A72-41198

Electronically scannable plasma leaky wave antenna system.

21 p3022 A72-41325

Eigenvalue numerical solution for dispersion relation and propagation characteristics of nonlocal drift waves in cylindrical plasma based on two fluid model

21 p3093 A72-41495

Transverse velocity shear instabilities within a magnetically confined plasma.

21 p3093 A72-41628

Helical field experiments on a three-meter theta pinch.

21 p3094 A72-41636

Comet tail wave motion explanation via consideration as plasma cylinder with free boundary tangential discontinuity surface immersed in interplanetary plasma

22 p3221 A72-42011

Boundary fluctuations of a plasma column with a current

22 p3211 A72-42655

Pulse discharge plasma in Ar with gas ionization level near unity, noting plasma cylinder parameters, electron temperature and I-V characteristics

22 p3212 A72-43103

Landau dispersion equations for oscillations damping of bounded electron plasma, noting application to plasma cylinder in conducting tube

23 p3319 A72-43410

Apparent constant wavelength oscillations in a bounded plasma.

23 p3320 A72-43577

Study of microwave scattering in a plasma-beam discharge

23 p3321 A72-44212

Nonlinear effects in the dynamic behavior of the positive column from a low-voltage low-pressure discharge

24 p3428 A72-44965

PLASMA DECAY

High resolution apparatus to record time dependent light flux variations at 380-700 nm, discussing He plasma decay investigation

01 p0064 A72-10375

Photoresonance cesium plasma development and decay, determining density spatial-temporal behavior and recombination and polar diffusion coefficients by probe measurements

03 p0396 A72-13664

Collisional radiative recombination applicability to time dependent electron density decay in helium afterglow before reaching quasi-steady state

04 p0555 A72-14579

Submillimeter wave sulfur dioxide molecular laser, investigating lasing lines, plasma decay and relaxation, line interactions and signal temporal behavior

04 p0532 A72-15595

Magnetic multipole confinement of magnetic field-free He and Ar plasmas in vacuum chamber, observing decay

06 p0854 A72-17505

Weakly ionized decaying afterglow plasma potential fluctuation and instability in magnetic field, using electrostatic probes

06 p0860 A72-17692

Radial distribution of charged particle concentration fluctuation during decaying plasma instability development magnetic field

06 p0863 A72-18416

Plasma decay instabilities in finite amplitude Alfvén wave field, discussing critical wave amplitude

11 p1694 A72-25790

Parametric decay instability of Langmuir and acoustic plasma waves induced by incident electromagnetic wave near plasma frequency, noting application to ionospheric instabilities

13 p2012 A72-29126

Weakly ionized plasma decay within cylinder with electrically conducting walls in presence of longitudinal magnetic field, determining electric current dependence on cylinder length

13 p2016 A72-29603

Mass spectrometric techniques for collision processes in decaying nitrogen-helium and nitrogen-neon plasmas, obtaining ambipolar diffusion coefficients and reaction rate constants

15 p2283 A72-31299

Anomalous diffusion coefficient of axially decaying RF discharge collisional plasma under instability mode suppressed by feedback technique

16 p2437 A72-33657

Radial distribution of charged particle concentration fluctuation during decaying plasma instability development in magnetic field

17 p2588 A72-34865

Thermal decay of an infrared-laser-heated arc plasma.

21 p3090 A72-40341

Weakly ionized plasma decay within cylinder with electrically conducting walls in presence of longitudinal magnetic field, determining electric current dependence on cylinder length

21 p3091 A72-40657

Measurements of enhanced absorption of electromagnetic waves and effective collision frequency due to parametric decay instability.

21 p3092 A72-40829

PLASMA DENSITY

Electron layer precession under magnetic field in background plasma, noting density effect on instability

01 p0107 A72-10144

Double Langmuir probe, microwave cavity and upper hybrid frequency measurements of plasma density in hydrogen, helium, neon and argon

01 p0110 A72-11190

Electron density microwave measurements in helium-neon laser plasma, discussing population inversion during glow discharge

01 p0081 A72-11216

Strong linearly polarized electromagnetic wave propagation in overdense plasmas, considering relativistic electron velocities and nonlinear penetration effect

01 p0111 A72-11226

High speed streak cameras applicability to low density theta pinch studies, describing image converters design, operation and block diagrams

02 p0263 A72-11410

Spatial distribution of plasma density from phase shift measurement in millimeter waves based on microwave multichannel probes

02 p0263 A72-11412

Multifrequency interferometer for inhomogeneous plasma density soundings, determining time dependence, spatial distribution and plasma layer size

02 p0263 A72-11413

Low temperature plasma electron density measurements using ruby laser light scattering method

02 p0264 A72-12210

Signal modification of microwaves propagating transversely in underdense turbulent plasma jet

02 p0265 A72-12365

Electron and population densities in inhomogeneous nonequilibrium plasmas with photoabsorption, using radiative transport equation

02 p0266 A72-12441

Excited Hg atom and electron concentration measurement behind shock front in nonstationary plasma by continuous displacement recording of interference bands

03 p0357 A72-13374

Plasmoid transport in quadrupole and octupole magnetic fields, measuring plasma amounts in axial region charged particle densities and flux densities at vacuum chamber wall

03 p0395 A72-13568

Photoresonance cesium plasma development and decay, determining density spatial-temporal behavior and recombination and polar diffusion coefficients by probe measurements

03 p0396 A72-13664

High temperature dense plasma formation by laser heating of gas target, noting fusion reaction in deuterium-tritium mixture

03 p0399 A72-14066

Electron-ion recombination and ambipolar diffusion disruption of electron density in cryogenic helium plasma, using cavity resonator measurements

03 p0399 A72-14067

Force free high beta plasma stability in homogeneous magnetic field and with inhomogeneous temperature and density

04 p0554 A72-14408

Plasma electron density profiles from Tonks-Dattner resonance frequencies for plane parallel and cylindrical columns

04 p0554 A72-14530

Direct display plasma density and temperature meter, using floating double probe method

04 p0520 A72-14533

Plasma density profiles by microwave interferometry technique in Sirius stellarator diverter for two magnetic field configurations and injection methods

04 p0555 A72-14619

Argon and nitrogen plasma viscosity measurements, using pressure difference probe

04 p0558 A72-15344

Plasma satellite linewidth broadening due to density inhomogeneity, considering evidence based on light scattering from Ar plasma jet

04 p0559 A72-15355

German monograph on spectroscopic investigation of Cs plasma electron density and temperature and excited atom density in various operational states of thermionic converter

04 p0560 A72-15699

Electron temperature measurement error elimination with radio frequency Langmuir probe in low density plasma, measuring floating potential

05 p0694 A72-16049

Interplanetary media plasma density fluctuations and power law spectra effects on radio wave scintillation

05 p0695 A72-16068

Hf electromagnetic field spectrum in one dimensional plasma cavity in pressure balance for arbitrary density

05 p0696 A72-16604

Electromagnetic wave scattering by underdense plasma layer, considering perturbation calculation for Gaussian, sech squared and parabolic density distribution

06 p0853 A72-17350

- Ion-acoustic collisionless shock generation by initial plasma density discontinuity in Q machine, correlating experimental results with numerical simulation
06 p0856 A72-17520
- Hf fluctuations in density gradient of alkali plasma within Q device
06 p0858 A72-17536
- Interplanetary plasma electron and proton density fluctuation measurements by space probes and from radio sources scintillation spectra, noting agreement with power-law irregularity spectrum
06 p0881 A72-17901
- Radial distribution of charged particle concentration fluctuation during decaying plasma instability development magnetic field
06 p0863 A72-18416
- Plasma density inhomogeneity effects on beam-plasma instability and Landau damping from digital simulation using charge sheet model
06 p0865 A72-18541
- Electrical conductivity of nonideal low temperature plasma as function of metallization densities, applying to semiconductors and mercury vapor systems
07 p1043 A72-19880
- Combustion product plasma electrical conductivity dependence on neutral component density fluctuation
07 p1044 A72-19888
- Collisionless ion beam plasma simulation of ionospheric plasma with Langmuir interpretation of density and frequency agreement
07 p1044 A72-20367
- Rf excitation produced plasma instability, considering density fluctuation and drive frequency introduction by amplitude modulation
07 p1045 A72-20441
- Hf potential effect on high amplitude waves propagation in magnetoactive plasma plane layer, noting particle density distribution
08 p1212 A72-21211
- High energy electron beam interaction with dense plasma, investigating unstable waves growth by numerical methods
08 p1213 A72-21259
- Laser plasma density and velocity distributions and mass flow from surface and plasma pressure in target heating process based on interferometric measurements
08 p1215 A72-21719
- Hollow cylindrical cathode discharge sustaining potential reduction and recombination probability increase from transverse magnetic field and rising pressure and plasma density
09 p1361 A72-22957
- Moving plasma interaction with oblique magnetic field, establishing magnetization ranges for plasma density and velocity
09 p1362 A72-23208
- Reference electrode area and floating potential influence in Langmuir probe measurements of plasma density and temperature
09 p1311 A72-23229
- Coulomb interactions within dense Boltzmann plasma in transition from ideal to nonideal state, proposing effective Coulomb pair cross section concept
10 p1517 A72-23834
- Quiescent steady state plasma production by beam-plasma discharges in uniform magnetic fields, showing plasma density fluctuation relation to Penning effect
10 p1519 A72-24022
- Relativistic electron beam injection into dense plasma, analyzing perturbed electric and magnetic fields and charge and current densities
10 p1521 A72-24353
- Density fluctuations and ion acoustic two stream instability characteristics of RF generated plasma derived from electromagnetic scattering at 24 GHz
10 p1523 A72-24800
- Low temperature plasma electron density measurements using ruby laser light scattering method
11 p1693 A72-25706
- Nonideal dense plasma properties, discussing electrostatic shielding, many particle clusters, phase transitions, metallization and electrical conductivity [AIAA PAPER 72-414]
11 p1695 A72-26164
- Interplanetary plasma microinstabilities within framework of underlying electron-proton solar exosphere, discussing solar wind high beta effects
11 p1714 A72-26529
- Plasmoid transport in quadrupole and octupole magnetic fields, measuring axial charged particle and flux densities at vacuum chamber wall
11 p1699 A72-26755
- Electromagnetic wave transformation and absorption in Ar plasma with nonmonotonic longitudinal density distribution
11 p1699 A72-26758
- Electrical conductivity measurement of dense nonideal Cs plasma at high pressure and temperatures
12 p1849 A72-27057
- Statistical Coulomb potential and thermodynamic, kinetic and optical properties of nonideal dense plasma
12 p1853 A72-28173
- Input impedances and current distributions of cylindrical monopole antennas of various lengths in hot lossy plasma as function of plasma density
13 p2009 A72-28538
- Low energy Cs ion beam energy loss during traverse through near-thermal equilibrium Cs plasma as function of plasma density, comparing measurements with theoretical predictions
13 p2011 A72-29000
- Magnetosheath electron precipitation effect on dayside auroral-oval plasma density and conductivity, relating precipitation heat flux to solar wind energy density
13 p1950 A72-29381
- Magnetic apex coordinate system for plasma density organization in low and middle latitude F2 region
13 p1951 A72-29395
- Electromagnetic waves scattering by underdense plasmas, examining intermittency phenomenon due to mixing between turbulent inner and outer inviscid wake
13 p1922 A72-29473
- Positively and negatively charged plasma components thermodynamic density fluctuations effect on ionospheric and magnetospheric slowly varying electric fields measurement
13 p1953 A72-29810
- Discharge tube geometry effects on sensitivity of plasma electron density measurement by cylindrical cavity resonators
13 p2018 A72-29822
- Enhanced damping of electrostatic wave primary mode due to combination scattering from plasma electron density oscillations
13 p2018 A72-29854
- Dense isothermal plasma heating due to electron and ion scattering on turbulent pulsations of electric field oscillations
13 p2019 A72-29916
- Density and electric field oscillations of plasma in stellarator, considering magnetic field strength effect, stabilization by ionic collisions and energy pumping mechanism
13 p2019 A72-29985
- Millimeter wave scattering at turbulent density discontinuities in plasma from electrodeless inductive discharge
14 p2136 A72-30174
- Microwave interferometry as plasma diagnostic technique to measure electron densities in partially ionized dense gases
14 p2103 A72-30177
- Pulsed Ar plasma temperature and charged particle concentration obtained as functions of elapsed discharge time by spectroscopic observation
14 p2139 A72-30780
- Magnetosphere thermal plasma densities determination from hydromagnetic whistler digital sonograms and modified normalized dispersion curves
15 p2283 A72-31430
- Thermodynamic plasma density fluctuation induced electric noise field measurement as means to determine plasma density and electron and ion temperatures
15 p2284 A72-31943
- High power carbon dioxide laser produced dense He plasma, comparing experimental and theoretical Stark profile of forbidden and allowed transitions
15 p2285 A72-32223
- Direct display plasma density and temperature meter with Langmuir probe for ionospheric observation
15 p2231 A72-32338
- Glow mode electron plasma source for space chamber, measuring electron density and temperature for comparison with back diffusion sources
15 p2286 A72-32339
- Dense helium theta pinch plasma heating by TEA carbon dioxide laser, studying temperature and density with high speed photography and spectrography
15 p2251 A72-32530
- Spectroscopic analysis of condensations density and intensity variations in solar eruptive prominences, discussing hypothetical magnetic field effects
15 p2318 A72-32781
- Langmuir wave coupling in inhomogeneous plasma due to combined density gradient and external HF electric field
16 p2436 A72-33654
- Plasma electron density profile reflection coefficient frequency-dependent amplitude and phase determination by measuring time response to fast-rising voltage pulse
16 p2437 A72-33767
- Microwave absorption by longitudinally inhomogeneous plasma, noting waveguide excitation in critical density region
17 p2588 A72-34859
- Radial distribution of charged particle concentration fluctuation during decaying plasma instability development in magnetic field
17 p2588 A72-34865
- Relativistic electron beam injection into dense plasma, analyzing perturbed electric and magnetic fields and charge and current densities
17 p2589 A72-34954
- Electrical conductivity of nonideal low temperature plasma as function of metallization densities, applying to semiconductors and mercury vapor systems
17 p2590 A72-35129
- Combustion product plasma electrical conductivity dependence on neutral component density fluctuation
17 p2590 A72-35136
- Toroidal plasma spectroscopic investigation from current pulse start to afterglow, noting electron temperature and density radial distributions and energy balance
17 p2591 A72-35373
- Investigation of transient pressures in the plasma of a thermionic emission converter
18 p2647 A72-36214
- Determination of the plasma density in a collisionless plasma.
18 p2717 A72-37041
- Nonlinear theory of density fluctuations in turbulent plasmas.
19 p2841 A72-38443
- Mathematical model for perfectly absorbing spherical Langmuir probe in collisionless plasma, obtaining plasma density and ion temperature
19 p2842 A72-38524
- Wave propagation in plasmas with fluctuations.
19 p2842 A72-38525
- Exact solution of the problem of measuring the parameters of a dense plasma with the aid of a spherical probe
19 p2842 A72-38534
- Kinetic theory of density fluctuations in a magnetized collision-dominated plasma in an electric field.
19 p2792 A72-38745
- Double-beam interferometry method for investigating axisymmetric configurations of dense plasma.
20 p2958 A72-39505
- Parametric excitation of Bernstein waves in inhomogeneous magneto-plasmas.
21 p3089 A72-40187
- Plasma low density regions caused by Langmuir turbulence, discussing energy dissipation of long wave oscillations and wave collapse
21 p3090 A72-40410
- Identification of transverse Kelvin-Helmholtz turbulence in a magnetoplasma column.
21 p3091 A72-40768
- The measurement of the local electron density by means of direct reading microwave interferometer.
21 p3056 A72-41220
- Calibration procedure to correct for the effects of dielectric containers in microwave plasma density measurements.
21 p3056 A72-41377
- Measurement of the electron density distribution in plasmas from the bending of a gas laser beam.
22 p3211 A72-42396
- Self-consistent description of the magnetotail current system.
22 p3172 A72-42429
- Lyman alpha resonance line asymmetry calculation in dense hydrogen plasma, noting disagreement between theory and experiment
22 p3212 A72-42917
- Method of solving boundary-value problems for a Langmuir probe in a dense plasma
22 p3213 A72-43119
- Possibility of determining the three-dimensional distribution of a plasma with the aid of an SHF resonator
22 p3214 A72-43122
- Ray structures of polar auroras and their association with drift-current instability in a plasmoid
23 p3282 A72-43358
- Longitudinal magnetic field effect on the characteristics of a high frequency ion source
24 p3428 A72-45015
- Electrical conductivity measurement of dense nonideal Cs plasma at high pressure and temperatures
24 p3431 A72-45710

PLASMA DIAGNOSTICS

- Strong ionizing shock waves production in hydrogen and deuterium gases, measuring plasma electron temperature, axial electric field and density and magnetic field compression
[AD-734469]
01 p0108 A72-10237
- Nonisothermal theory of electrostatic probe in weakly ionized plasma, giving I-V characteristics
01 p0108 A72-10238
- Neutron production mechanism and energy spectrum in thermal plasma focus by time of flight spectrometry
01 p0109 A72-10243
- Mass spectrometric investigation of high power laser beam plasma on solid target, determining multicharged ion yield, energy, angular distribution and recombination effect
01 p0079 A72-10349
- Plasma source with arc stabilized by supersonic air stream, measuring enthalpy, heat flux and potential distribution
01 p0048 A72-10491

Carbon dioxide laser electrical plasma properties from probe and techniques, discussing effects of electron energy distributions, dissociation and N, He and Xe additions

01 p0079 A72-10514

Magnetospheric diagnostics from ground stations data, considering dimensions, cusp, ring current, tail flux, electric fields, radiation zone, solar wind and interplanetary field

01 p0132 A72-11072

Microwave measurements of plasma parameters in medium pressure gas discharges in absence of constant magnetic field and in weak electromagnetic field

01 p0072 A72-11215

Argon-hydrogen plasma seeded with submicron tungsten particles, measuring composition, temperature, radiant heat output and opacity

01 p0112 A72-11343

Papers on plasma diagnostics, Volume 1, Optical techniques

02 p0263 A72-11401

Michelson interferometers with large interference fields for plasma diagnostics emphasizing structural rigidity, monochromatic light pulse power, instrument vibrations resistance, etc

02 p0223 A72-11402

Fabry-Perot interferometer for studying spatial distribution of plasma electron concentration, discussing resolution using solid state gas laser light source

02 p0223 A72-11403

Laser spark plasma initial development phase showing high electron temperature and concentration, continuous spectrum emission, line broadening and shock wave formation

02 p0237 A72-11405

Plasma diagnostics facilities design, circuit diagrams and operation based on Q switched ruby laser and optical recording system

02 p0237 A72-11407

High speed photographs of plasma emission spectra in UV and soft X radiation spectrum regions, discussing theory, design and operation of facilities

02 p0223 A72-11408

Millimeter and submillimeter microwave spectrometric studies of high temperature plasmas and noise emission, discussing instrumentation and absolute measurements

02 p0223 A72-11409

Direct phase measuring and measured phase compensating microwave devices designed for plasma diagnostics applications

02 p0223 A72-11416

Phase measurements at if in microwave plasma diagnostics, examining phase stabilization processes

02 p0223 A72-11417

Time of flight mass spectrometers for plasmoids generated by theta pinch and discharge over organic glass, showing ion and electron currents oscillograms

02 p0223 A72-11420

Plasma state variables diagnosis using laser light scattering

02 p0263 A72-11697

Plasma electron density depletion by electron attaching gas introduction, deriving electrostatic probe technique

02 p0264 A72-12261

Induction heated low density supersonic free plasma jet diagnosis, determining velocities and heavy particle temperatures

02 p0265 A72-12361

Ion and electron temperatures difference relaxation rate in uniform plasma, noting relationship to Debye length

02 p0267 A72-12769

Space potential determination in plasma diagnostics, comparing second harmonic analysis with experimental results

02 p0268 A72-12868

Plasma physical characteristics, considering experiments with Ba and Sr atom clouds introduced into ionosphere

03 p0394 A72-13196

Plasma diagnostic technique using three-mirror He-Ne laser interferometer for electron concentration measurement

04 p0555 A72-14654

Rectangular pulse propagation through inhomogeneous medium as plasma diagnostics, investigating electron collisions effect on signal distortion

04 p0556 A72-14946

Ultrarapid holographic camera for plasma diagnostics, noting exposure time and reconstructed image resolution

04 p0521 A72-14972

Numerical method for cylindrical microwave cavities calibration for plasma diagnostics, noting computer programs applicability for arbitrary electron density radial distributions

05 p0662 A72-16418

Metastable He atoms concentration in plasma from absorption characteristics at temperatures 4-300 K and pressures 1-70 mm Hg

05 p0696 A72-16612

Nonlinear wave coupling, scattering and radiation in plasmas for diagnostics application

05 p0699 A72-17221

Heated lithium ion system (HELIOS) facility for quiescent steady state plasma studies, noting MHD instabilities minimization

06 p0854 A72-17502

Density and flux measurements by Langmuir probes in uranium plasma produced in single ended Q device, noting application to isotope separation

06 p0855 A72-17506

Electron temperature fluctuations associated with drift-type instability in Q device, discussing plasma diagnostic techniques

06 p0857 A72-17530

Exact linear dielectric operator for stratified plasma streams with velocity gradients for diagnostics with electromagnetic waves

06 p0861 A72-17748

Linear Z plasma pinch in Ar as spectroscopic source, investigating effects on shock-piston separation

06 p0865 A72-18544

Subtractive microwave holography application to plasma discharge diagnostics

07 p0981 A72-18889

Schlieren cinematographic and holographic diagnostic of giant pulse ruby laser produced plasma in Xe [CLEA PAPER 12,2]

07 p1040 A72-19393

Comparative IR schlieren and interferometry techniques for measuring electron density profiles from refractive index effects of rotationally symmetric plasmas

07 p0986 A72-19613

Plasmasphere structure as outermost ionospheric region from direct measurements by particle traps, ion mass spectrometers and Langmuir probes on satellites

07 p0978 A72-20044

Transient plasma diagnostics using carbon dioxide laser interferometry and absorption for electron density and temperature determination

07 p1008 A72-20557

Plasma diagnostics using carbon dioxide laser absorption and interferometry, comparing electron densities with shock data

07 p1008 A72-20565

Multiple charge Al and C ions X-UV spectra use for studying laser produced plasmas build up and expansion regions

09 p1359 A72-22830

Gas discharge plasma detection characteristics, examining electron and ion densities and collision rates dependence on electromagnetic field frequency and amplitude

09 p1361 A72-22956

Plasma flows interaction with plasma cylinder in diverter magnetic field, investigating plasma dynamics with electric probes, plasmascope and mass spectrograph

09 p1362 A72-23210

Coulomb interactions within dense Boltzmann plasma in transition from ideal to nonideal state, proposing effective Coulomb pair cross section concept

10 p1517 A72-23834

Electra method of plasma diagnosis around reentry vehicle head, describing onboard antennas impedance measurements and use of triple Langmuir probe mounted on telescopic mast

10 p1552 A72-24659

Quadrupole probe theory for hot collisionless isotropic plasma, noting impedance dependence on electron temperature at resonance and optimum dimension relationship to Debye length

10 p1523 A72-24798

Langmuir probe techniques for plasma measurement in ion thruster hollow cathode discharge configurations

[AIAA PAPER 72-416]

11 p1706 A72-26166

Plasma diagnostics of inductively coupled RF Hg discharge in RIT-10 ion thruster

[AIAA PAPER 72-472]

11 p1709 A72-26203

MPD thruster diagnostics and interpretation of electric current distribution, applying integral form of Maxwell equation for moving Hall probe

[AIAA PAPER 72-498]

11 p1711 A72-26221

Electron temperature determination from rate of ionization due to collisions between electrons and neutral particles in plasma

11 p1697 A72-26586

Spherical probe impedance characteristics in isotropic plasma predicted by hydrodynamic theory compared to experimental results

11 p1699 A72-26768

High temperature heating of plasma by ultrashort laser pulses focused onto lithium deuteride, noting various diagnostic methods

12 p1851 A72-27581

Diagnostic procedures for nonhomogeneous plasma based on geometrical optics approximation, irradiating plasma by plane wave at oblique incidence

13 p2013 A72-29295

Homogeneous plasma column generation by HF generator, probing for electron temperature and charged particle concentration

13 p2015 A72-29507

Electron density and temperature measurement from scattering of laser radiation in plasma within axisymmetric toroidal magnetic mirror machine

13 p2017 A72-29609

Discharge tube geometry effects on sensitivity of plasma electron density measurement by cylindrical cavity resonators

13 p2018 A72-29822

Microwave interferometry as plasma diagnostic technique to measure electron densities in partially ionized dense gases

14 p2103 A72-30177

Multiply charged ions motion velocity measurement for pulsed discharge plasma in nitrogen, krypton and xenon

14 p2139 A72-30777

Soft X ray emission for plasma temperature determination in laser induced gas breakdown for air and He

14 p2139 A72-30805

Electronic density measurement in ionized Cs vapor by observation of fundamental series lines mixture, comparing to Stark widening theory based profiles

14 p2134 A72-30852

Spoke and disk mode for rotating plasma production in hydrogen, using high speed photographic, electrical and magnetic diagnostic techniques

14 p2139 A72-30855

Hydrogen plasma ion density determination from atomic beam attenuation by resonant charge exchange with protons

15 p2284 A72-31582

Electrical conductivity of shock wave produced Xe plasma measured by probe, noting dependence on Mach number

15 p2284 A72-31583

Thermodynamic plasma density fluctuation induced electric noise field measurement as means to determine plasma density and electron and ion temperatures

15 p2284 A72-31943

Direct display plasma density and temperature meter with Langmuir probe for ionospheric observation

15 p2231 A72-32338

Symmetrical and asymmetrical electrostatic probes for RF plasma discharge data, describing feedback network, stabilization, generation and electron temperature profiles

15 p2288 A72-32509

Thermal induction plasmas phase measurements using dual magnetic probe system

15 p2289 A72-32511

Magnetic field distribution measurement in axisymmetric plasma column inside Tokamak device by alpha particle beam from radioisotope

16 p2434 A72-32818

Visible and UV stimulated emission in plasma of direct pinch discharge on Ar II and III ions, discussing application possibility to plasma diagnostics

16 p2400 A72-33297

Book on plasma production, diagnostics and thermodynamics for equilibrium and stationary ionization states covering magnetic containment, toroidal and adiabatic traps, MHD flow, etc

16 p2435 A72-33450

Continuously burning optical discharge in Ar and Xe at atmospheric pressures, evaluating laser beam energy absorption, electron density and plasma temperature

16 p2402 A72-33691

Plasma electron density profile reflection coefficient frequency-dependent amplitude and phase determination by measuring time response to fast-rising voltage pulse

16 p2437 A72-33767

Low density and pressure air plasma electron density simultaneous measurements by Langmuir and RF capacitance probes

16 p2438 A72-33836

Russian monograph on ionospheric measurements covering plasma parameters, wave propagation, absorption sounding methods and radio communication applications

16 p2387 A72-33875

Blunt nose cone flow field characteristics microwave measurement at stagnation point during atmospheric reentry, using plasma diagnostic sensors with antennas and electrostatic probes

[AIAA PAPER 72-693]

16 p2345 A72-34049

Material injection RF blackout alleviation and plasma diagnostic measurement with electrostatic probes and S-band reflectometer during RAM C-III reentry flight

[AIAA PAPER 72-690]

16 p2365 A72-34052

Ionized gas-solid suspension thermal physical properties verification by micro-sized MgO dispersion in Ar plasma

[AIAA PAPER 72-688]

16 p2439 A72-34054

Plasma electron density measurements using flat plate and semifocal millimeter wave Fabry-Perot interferometers

[AIAA PAPER 72-672]

16 p2440 A72-34067

- Nitrogen plasma jet flow, attributing discrepancies in electrical conductivity and velocity to shock effects on probe measurements
[ALAA PAPER 72-671] 16 p2440 A72-34069
- Optically thick plasma temperature profile determination by extended brightness emissivity method
16 p2440 A72-34100
- Theory of a coaxial gas-discharge generator loaded by a spiral line
17 p2529 A72-34841
- Spectral measurements of atomic level populations in a plasma
17 p2591 A72-35307
- Runaway electrons in toroidal plasma investigation by thick target bremsstrahlung measurement, noting energy distribution and runaway rate estimates
17 p2591 A72-35370
- An analysis of Pioneer 9 low-frequency wave observations near interplanetary discontinuities.
17 p2614 A72-35585
- Explorer 33 and 35 plasma observations of magnetosheath flow.
17 p2548 A72-35587
- Ion temperature diagnostic using a high power alternating current probe.
17 p2557 A72-35617
- Gas discharge plasma detection characteristics, examining electron and ion densities and collision rates dependence on electromagnetic field frequency and amplitude
17 p2593 A72-35885
- Investigation of physical processes and optimization of thermionic converters with a Cs-Ba filling
18 p2647 A72-36203
- Probe measurements of a cesium plasma in a simulated thermionic energy converter.
18 p2647 A72-36206
- Hybrid and pyrotechnic IR flare generated plasma effects on dual frequency Doppler range measurement system, discussing diagnostics and contamination concentration analysis
18 p2660 A72-36339
- Transition from sheath-convection to saturation-current behaviour of a Langmuir probe in a flowing plasma.
18 p2715 A72-36688
- Time-resolved diagnostic method for hydrogen plasmas.
18 p2716 A72-36949
- Electron density measurements in early stage of the high current pulsed discharge.
18 p2716 A72-36957
- Determination of the plasma density in a collisionless plasma.
18 p2717 A72-37041
- An appraisal of the single Langmuir probe technique in the study of afterglow plasmas.
19 p2840 A72-37456
- Interferometric holography of laser-produced gas breakdown.
19 p2798 A72-37623
- Potential created by a point charge oscillating in an inhomogeneous plasma
19 p2842 A72-38522
- Mathematical model for perfectly absorbing spherical Langmuir probe in collisionless plasma, obtaining plasma density and ion temperature
19 p2842 A72-38524
- Exact solution of the problem of measuring the parameters of a dense plasma with the aid of a spherical probe
19 p2842 A72-38534
- Purification of hydrogen plasmoids by the magnetic field of an injector-diverter device
19 p2843 A72-38539
- Fixed-bias floating double-probe technique with simple Langmuir-probe characteristics.
19 p2804 A72-38592
- Effect of plasma resistance on electron temperature measurement by means of an electrostatic probe.
19 p2804 A72-38593
- A new method for in situ electron temperature determinations from plasma wave phenomena.
19 p2793 A72-38758
- Heat-pipe plasma oven for microwave and spectroscopic measurements.
20 p2912 A72-39433
- Double-beam interferometry method for investigating axisymmetric configurations of dense plasma.
20 p2958 A72-39505
- Measurements of plasma velocity distributions in free-burning dc arcs up to 2160 A.
20 p2958 A72-39644
- Interferometric study of a TEA-CO₂ laser produced plasma.
20 p2958 A72-39816
- A technique for recording Langmuir probe characteristics in afterglow plasmas.
21 p3051 A72-40212
- A system of disc-stabilized dc arc and solution nebulization device for the investigation of multicomponent plasmas.
21 p3039 A72-40213
- Electron density and temperature measurement from laser radiation scattering in plasma within axisymmetric toroidal magnetic mirror machine
21 p3091 A72-40663
- Impedance of a partially ionized cesium plasma.
21 p3091 A72-40694
- Coulomb-collision corrected ion-acoustic line profiles.
21 p3092 A72-40819
- An apparatus to investigate plasmas at very high pressure.
21 p3056 A72-41004
- The measurement of the local electron density by means of direct reading microwave interferometer.
21 p3056 A72-41220
- Polarization interaction between plasma flows in a transverse magnetic field
21 p3095 A72-41689
- Reflector-analyzers for studies of rarefied low-energy plasmas
21 p3058 A72-41731
- Ar plasma diagnostics from stabilized arc emission spectra, noting thermodynamic equilibrium in central zone of arc channel
22 p3209 A72-41880
- Uniform low temperature gas discharge plasma diagnostics in shielded volume, noting application of stable plasma generation effect for isotope analysis
22 p3210 A72-42152
- Simultaneous solar-wind plasma and magnetic-field measurements in the expected region of the extended geomagnetic tail.
22 p3170 A72-42405
- High energy electron spatial distribution in plasma sheet from Ogo 5 magnetometer experiments
22 p3211 A72-42406
- An optical magnetic probe with pulsed detector voltage.
22 p3177 A72-42447
- Recent progress regarding the measurement techniques in the hypersonic area [ONERA, TP NO. 1055]
22 p3178 A72-42581
- Direct measurement of diffusion cooling in an afterglow plasma.
22 p3212 A72-42918
- Plasma diagnostics by means of microwave cavity resonators
22 p3212 A72-42950
- Electronic density and temperature deduced from the observation of the cone of resonance of an antenna in a magnetoplasma
22 p3212 A72-43049
- Spectroscopic study of the parameters of a turbulent plasma
22 p3213 A72-43107
- Method of solving boundary-value problems for a Langmuir probe in a dense plasma
22 p3213 A72-43119
- Possibility of determining the three-dimensional distribution of a plasma with the aid of an SHF resonator
22 p3214 A72-43122
- Monochromatic plasma waves linear and nonlinear coupling, discussing LF modulation partial transfer /Luxembourg effect/ and application to ionospheric diagnostics
23 p3319 A72-43517
- Damping of finite-amplitude electron plasma waves in a collisionless plasma.
23 p3321 A72-44075
- Measurements of magnetotail plasma flow made with Vela 4B.
23 p3342 A72-44514
- A Lecher wire microwave interferometer for measurements of electron density and electron temperature in a flowing transient plasma.
23 p3292 A72-44543
- Some infrared diagnostic techniques in high temperature gasdynamics.
24 p3402 A72-45043
- Sharp focused short pulse X ray source with laser flash synchronization for radiographic plasma diagnostics
24 p3429 A72-45495
- Determination by the scattering method of the parameters of a plasma produced by a laser spark in air
24 p3429 A72-45496
- PLASMA DIFFUSION**
- Meteor trail forms diversity explanation from magnetic pressure and Reynolds number and plasma diffusion in magnetic fields, discussing geomagnetic effect on trail shape
02 p0282 A72-12336
- Neodymium laser plasma dispersion and diffusion in magnetic field, using electrostatic injection of LiH particles
03 p0393 A72-13081
- Fluctuations and diffusion correlation analysis in linear octupole magnetic confinement, determining dispersion relation for interchange instability
03 p0396 A72-13660
- LF oscillations due to drift diffusion of current free weakly ionized inhomogeneous plasma in magnetic field
05 p0697 A72-16984
- Parallel and perpendicular magnetic field effects on optically injected electron-hole plasma diffusion in Ge from density measurement by infrared beam absorption technique
05 p0702 A72-17167
- Equilibrium diffusion of rotating plasma in toroidal systems, deriving two fluid hydrodynamic equations with allowance for ion temperature perturbation
05 p0701 A72-17242
- Cross-field current driven ion acoustic instability in two plasma devices, causing neutral sheet phenomena, anomalous dispersion and ion heating
[AD-740261] 06 p0858 A72-17541
- Cyclotron resonance interaction between electromagnetic waves and nonthermal plasmas for Cauchy velocity distributions yielding algebraic dispersion equations
06 p0860 A72-17745
- Plasma ambipolar diffusion coefficient and electron density determination from thermal density fluctuations cross spectrum based on Langmuir probe measurements
06 p0864 A72-18536
- Critical magnetic flux indications of microanomalous plasma diffusion in electron bombardment ion engines
07 p1054 A72-19614
- Ionization change induced stratiion instability of low temperature plasma with ambipolar diffusion in transverse magnetic field
07 p1043 A72-19878
- Dynamic stabilization of MHD instabilities in plasma column by multipole hf fields, analyzing dispersion equation
07 p1045 A72-20479
- Hydrogen plasma generation by microwave field in magnetic-mirror device due to electron cyclotron resonance, measuring transverse diffusion coefficient dependence on magnetic field
07 p1046 A72-20506
- Ambipolar diffusion in weakly ionized unstable plasma afterglow in presence of uniform axial magnetic field
07 p1047 A72-20558
